SHORE LEAVE: All crew members allowed ashore after Free Pratique granted. Each crew member to carry Landing Card.

IDENTIFICATION CARDS: Passports and/or Seaman's Books are accepted by the Police and Immigration Authorities.

On ship's arrival, Passports and/or Seaman's Books are retained by the Immigration Authorities against the issue of Landing Cards which are used until the ship's departure when the passports and/or Seaman's Books are returned to the Master.

GARBAGE DISPOSAL: Plastic bags are supplied to all vessels on arrival and garbage is collected each day between 1200 hrs. and 1300 hrs..

Drums are also provided on the quayside. For large quantities a truck must be hired. Contact the Harbour Master, Tel: 65388/64790.

WASTE OIL DISPOSAL: Can be arranged by the agent.

SEAMAN'S CLUBS: None, but Harbour Master will assist where possible.

CURRENCY: Turkish Lira (TL).

REGULATIONS: Authority is required from Harbour Master: for immobilising engine for cleaning or repairs whilst vessel alongside quay; for lowering lifeboats; for using ship's radio; for sailing (Port and Customs Clearances are required).

Ships berth by rotation according to time of arrival. However, passenger and cruising vessels as well as ferryboats can berth (maximum 2 berths) on priority.

DELAYS: Delays in berthing are very seldom. Slight congestion of 1 or 2 days during citrus export season.

GENERAL: Flag of Northern Cyprus to be hoisted on mast from 0800 hrs. to Sunset.

Landing of dogs or other animals not allowed. Disposal of garbage and waste strictly prohibited both in port and territorial waters. Garbage and waste are collected by the municipality against a nominal fee, through Agents.

Charts: Relevant Admiralty Publications: B.A. Chart 847, 851, List of Lights Vol. E., Mediterranean Pilot Vol. V., Tide Tables Vol. I. (European Waters).

Free Port: Part of the Outer Harbour is being used as a Free Port, adjacent to which is the Industrial Free Zone with a maximum development area of 554,964 sq.m.

The Free Port and Zone is managed by the Free Port Manager who is responsible to the Board of Directors and function under the auspices of the Ministry of Trade and Industry.

Directorate: Tel: 392-36-66164, 392-36-64775. Telex: 57140 Mslb Tk.

AUTHORITY: Ministry of Communications & Works, Department of Ports, Famagusta, Northern Cyprus.

Postal Address: The Director of the Department of Ports, Famagusta (Gazi Magusa) via Mersin 10, Turkey. *Tel:* 392-36-62626, 392-36-62627, 392-36-62951. *FAX:* 392-36-66465. *Contact:* Davut Izkan, Director of Ports.

Harbour Master's Office: *Tel:* 392-36-65388, 392-36-64790.

Also see "General".

GEMIKONAGI (Morphu Bay): 35.08 N. 32.50 E. (See Plan)

DOCUMENTS: See "Famagusta".

PILOTAGE: Government pilot available from Kyrenia Tourism Harbour.

ANCHORAGES: Anchorage point Lat. 35° 09.2' N., Long. 32° 49.8' E. Anchorage exposed to W. and N.W. winds.

RESTRICTIONS: Karavostassi Jetty established for loading minerals, discharging operations not available.

HEALTH: Pratique is required only at first port of call in Northern Cyprus. Pratique is granted either before or after berthing as appropriate.

RADIO/VHF: "Northern Cyprus Radio" R/T 2182 kHz. and VHF Channels 16, 26 and 27.

Kyrenia Tourism Harbour Pilots maintain VHF watch on Channel 16, during working hours.

BERTHING:

Karavostassi: One jetty berth with depth alongside 18 m. for loading minerals by conveyor belt. Average capacity 1,000 t.p.h. Vessels moor to buoys.

Xeros Pier: 132 m. long with depth of 4.3 m. at outer end. Pier only used by small coasters, weather permitting, as it is exposed to North winds. One crane of 5 tons capacity is available.

MEDICAL: Government hospital in Lefka area.

DENSITY: 1027.

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCES: See "Famagusta".

REPAIRS: Minor repairs for deck and engine can be carried out at local workshop.

AIRPORT: 70 km. to Ercan Airport.

TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.

SHORE LEAVE: All crew members allowed ashore after Free Pratique granted. Each crew member to carry a Landing Card.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

GENERAL: *Tides:* Max. tide 0.45 m.

Stores: Available.

AUTHORITY: Ministry of Communications & Works, Department of Ports, Famagusta.

Postal Address: The Director of the Department of Ports, Famagusta, 6 Magusa Trnc, via Mersin 10. *Tel:* 392-36-62626, 392-36-62627, 392-36-62951. *FAX:* 392-36-66465. *Contact:* Davut Izkan, Director of Ports.

Official at Gemikonagi: Mehmet Umur, Officer in Charge:Tel: 07717-340/334.

KALECIK (Gastria Bay): 35.19 N. 33.59 E. (See Plan)

DOCUMENTS: See "Famagusta".

PILOTAGE: Not compulsory. If required, supplied from Famagusta.

ANCHORAGES: Anywhere within the limits of Gastria Bay. Occasional storms mainly from North, N.E. and N.W. directions. No hazards or sandbars exist. Vessels can approach from any direction as there is no approach channel.

NAVIGATION AIDS:

Name: Cape Elia Lighthouse.
Place: 10 nautical miles N.E. of Famagusta.
Position: Lat. 35° 19.5' N., Long. 34° 02.8' E.
Characteristics of Light: Fl. 10 secs.
Range of Light: 15 nautical miles.
Period and Phase: Fl. 1 sec., ev. 9 secs.
Arc of Visibility: 360°.
Colour and Peculiarity of Lighthouse: Concrete tower with horizontal black and white stripes.
Height in metres of building from base to vane: 11 m.
Height in metres of centre of lantern above MHWS: 31 m.

RESTRICTIONS: None, but advance notice should be given by cable.

HEALTH: See "Famagusta".

RADIO/VHF: No radio or VHF facilities at this port. Ships calling at Kalecik should communicate with Northern Cyprus Radio or Famagusta Pilot Station.

TUGS: Not required. Private mooring boats available to assist in the mooring operations.

BERTHING: Concrete pier with a conveyor belt and crane operated by Boghaz Industry & Mining Co. Ltd. and solely used for exportation of cement, etc. Lat. 35° 19' N., Long. 34° 00.1' E.

Length of the pier 42 m. At a distance of 44 m. from the far end of the pier there is a dolphin used for mooring purposes. Ships of 100 m. LOA may have a safe berth alongside. Depth of the water alongside the pier is 6.0 m. Installation suitable for unloading and/or loading of bulk and bagged cargoes with a maximum hourly rate of 250 tons.

STEVEDORES: Privately arranged by the Shippers.

MEDICAL: See "Famagusta".

TANKERS: Tanker terminal with underwater pipelines extending 410 m. into the sea. Operated by Cyprus Turkish Petroleum Products Co. Ltd. Lat. 35° 19.1' N., Long. 33° 59.4' E.

Ships moored between two buoys which have a distance of 160 m. from one to the other, also using anchors. Max. depth 9.0 m.

DENSITY: 1028.

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCES: See "Famagusta".

CARGO GEAR: Ship's gear.

REPAIRS: Minor deck and engine repairs may be carried out by local workshops.

DRY DOCKS: No dry docks.

AIRPORT: Ercan Airport 80 km. from port.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Famagusta".

POLICE/AMBULANCE/FIRE: See "Famagusta".

TELEPHONES: Available at the nearby installations.

SERVICES: See "Famagusta".

SHORE LEAVE: All crew members allowed ashore after Free Pratique granted.

IDENTIFICATION CARDS: See "Famagusta."

GARBAGE DISPOSAL: Mooring boat can be used for garbage disposal.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Currency is Turkish Lira (TL).

REGULATIONS: Authority is required from the Harbour Master Famagusta for using ship's radio. For sailing, Port and Customs Clearances are required.

DELAYS: No delays.

GENERAL: Flag of Northern Cyprus to be hoisted on mast from 0800 hrs. to sunset.

AUTHORITY: Harbour Master and Senior Pilot – Famagusta.
Tel: 392-36-65388, 392-36-64790.

Also see "Famagusta".

KYRENIA: 35.20 N. 33.19 E. (See Plan)

LOCATION:
Kyrenia Tourism Harbour: 35° 20.5' N., 33° 19.8' E.
Kyrenia Yacht Harbour: 35° 20' N., 33° 19' E.

DOCUMENTS: See "Famagusta".

APPROACHES: Sea approach is unobstructed with deep water and Tourism Harbour entrance has a 180.0 m. width.

PILOTAGE: Pilotage is compulsory for vessels over 300 g.r.t. Harbour Pilot maintains VHF watch on Channel 16, during working hours.

Pilot Boat: Open motor launch, orange colour, flying Pilot's flag, light and sound signals for Pilot.

Requirements: International signals apply.

ANCHORAGE: 0.8 miles N.W. of Yacht Harbour Entrance light, in depths 22 m. to 24 m.

RESTRICTIONS/MAX. SIZE:

(a) Kyrenia Tourism Harbour: This harbour used only by passenger vessels (passenger ferries, hydrofoils, etc.).
Max. LOA: 110 m.
Max. draft: 7.0 m.

(b) Kyrenia Yacht Harbour: This harbour used only by pleasure craft and yachts.
Max. LOA: 30 m.
Max. draft: 2.6 m.

HEALTH: Pratique is required only at first port of call in Northern Cyprus. Pratique is granted either before or after berthing as appropriate.

RADIO/VHF: Northern Cyprus Radio. Radio Telephone 2182 kHz. VHF Channels 16, 26 and 27.

TUGS: 1 × 150 h.p. and 1 × 225 h.p.

BERTHING: Berthing and unberthing of vessels carried out between 0600 hrs. and midnight, including weekends and official holidays.

Kyrenia Tourism Harbour: 6 quays with depths of 3.0 m. – 8.0 m. and various quay levels above LWOST from 1.25 m. – 1.75 m.

Kyrenia Yacht Harbour: Depth in basin 3.2 m. Depth alongside 3.0 m.

MEDICAL: State hospitals and private clinics available.

DENSITY: Mediterranean salt sea water (1027).

FRESH WATER: Available. U.S.$ 5.0 per tonne.

FUEL: No bunkering facilities alongside quay. Limited fuel deliveries to vessels alongside quay can be made by lorry tankers of 8–10 tons each.

REPAIRS: Minor repairs for deck and engine can be carried out at local workshop.

CUSTOM ALLOWANCES: Same as Famagusta.

AIRPORT: 40 km. to Ercan Airport from Kyrenia.

TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer (May–September).

HOLIDAYS: Same as Famagusta.

LARNACA: 34.55 N. 33.39 E. (See Plan)

PORT LIMITS: The port limits are: That part of the coastline and the territorial waters of Cyprus contained within a line drawn 089° to the high seas from Livadhia Church Belfry and a line drawn 089° from Mosque (Hala Sultan Tekke) on Admiralty Chart No. 851 of 8th August, 1941.

DOCUMENTS:
1 Arrival Declaration.
5 Crew Lists.
5 Passenger Lists.
5 Transit Passenger Lists for passenger ships only.
1 Crew Declaration for dutiable goods.
2 Ship's Stores List Declarations.
2 Firearms Declarations.
1 Maritime Declaration of Health.
2 Entry Outward and Clearances.
1 Port Marine Police Form.
1 Mail List.
1 Form of Appointment of Agent.
1 Dangerous Cargo List (IMO).

PILOTAGE: Ships are not allowed to enter the port or berth at the mooring buoys outside the breakwater port without Pilot, unless permission is granted by the Port Authority. Pilot boards vessel at roadstead. Master must give 24 hours notice of ETA to vessel's Agents to enable them inform the Port Manager in time. Pilot boats are off-white in colour with words "Larnaca Pilots" written on the sides in blue letters. Pilot may be contacted on VHF Channels 16/14 during office hours 0730 – 1430 hrs. and Channel 14 at any other time during port operations. Pilot's telegraphic address is "Port Manager, Larnaca Cyprus". Tel: 04-635405.

ANCHORAGES: Open roadstead.

Prohibited Anchorage:

Positions of Prohibited Anchorage:
1. Lat. 34° 54' 39" N., Long. 33° 38' E.
2. Lat. 34° 54' 16.8" N., Long. 33° 41' E.
3. Lat. 34° 52' 48" N., Long. 33° 38' E.
4. Lat. 34° 52' 48" N., Long. 33° 41' E.

Positions of Prohibited Anchorage obstruction of the Port Entrance:
1. Lat. 34° 55' 21" N., Long. 33° 37' 49" E.
2. Lat. 34° 55' 21" N., Long. 33° 40' 18" E.
3. Lat. 34° 55' 55" N., Long. 33° 39' 03" E.
4. Lat. 34° 55' 55" N., Long. 33° 40' 37" E.

RESTRICTIONS: See "Max. Size" and "Berthing".

Rise of tide up to 0.6 m.

MAX. SIZE: For berthing in the port, vessels must not exceed LOA 272 m. However, vessels in excess may receive berthing permission if vessel's manoeuvrability and prevailing weather conditions permit.

The port is dredged to 12.0 m., and the approach channel is dredged to 13.0 m. Max. draft allowed 11.4 m. The height of the quay above sea level is 2.30 m.

Tankers discharge outside port at mooring buoys. Draft up to 41 ft. Max. LOA 730 ft.

HEALTH: Pratique is required at Cyprus first port of call only. Pratique is granted either before or after berthing as appropriate.

RADIO: Cables sent through "Cyprus Radio", call sign: 5BA.

VHF: Port Manager Larnaca and Pilot service on VHF Channels 16 and 14.

RADAR: No port radar service.

TUGS: Port Authority tugs join vessels outside breakwater using ship's lines. 4 tugs available.

BERTHING: Vessels may berth or unberth between 0600 hrs. and midnight. Cargo vessels are allowed to berth during night-time provided berth space is available and vessel will immediately operate with at least 1 gang. Mother vessels may unberth later.

Quay length: (a) Main quay 666 m. and (b) Floating pontoon quay 200 m.

Ro-Ro ramp available in Northwestern basin of the port.

Warehouse Space: 18,000 sq.m.

Container and General Cargo paved Stacking Areas: 150,000 sq.m.

Equipment: 1×45 tonne heavy duty crane on rails with articulated jib, especially designed and equipped to handle containers. Two container gantry cranes in operation. 1×35 ton level luffing crane. 1×36 ton heavy harbour mobile crane for containers. 8×5 – 16 ton mobile cranes. 4×15 – 40 ton fork-lift trucks for container handling. 17×2 – 8 ton forklift trucks. 36×10 – 40 ton trailers and 5 tractors.
BRIDGES: None.
STEVEDORES: 24 hours notice of ETA to Agent is required to enable him arrange gangs.
MEDICAL: It is necessary for Agents to receive advance notice of at least 2 – 3 hours before vessel's arrival. Hospital facilities constantly available. Inoculations or vaccinations are required according to prevailing circumstances.
TANKERS: Diameter of discharge lines up to 12 in. Max. draft 32 ft. Discharging takes place at mooring buoys outside port. Position of buoys Lat. 34° 54.75' N., Long. 33° 39' E. No slop discharge facilities.
Buoy berths outside port:
Oil Tankers Berths:
Cyprus Petroleum Refinery: Berth: LOA 214 m. Max. draft 11.6 m. Depth of water 13.7 m.
Petrolina: Stern discharge facilities only. LOA 214 m. Max. draft 11 m. Depth of water 13 m. Slop tank 2,000 tonnes.
Gas Tankers Berths:
Mobil: Pipe diameters: 3 in. for liquid, 2 in. for vapour. Depth of water 13 m. LOA 110 m.
Synergas: Pipe diameters: 4 in. for liquid, 2 in. for vapour. LOA 110 m. Depth of water 9 m. Draft 8.5 m.
Central Gas: Pipe diameters: 3 in. for liquid, 2 in. for vapour. LOA 110 m. Depth of water 6.5 m. Draft 6 m.
DENSITY: 1025.
FRESH WATER: Facilities available on quay. Delivery by hoses at about 50 t.p.h.
FUEL: All types provided by special bunkering vessels at berths and roadstead and by tanker lorries at the quay.
FIRE PRECAUTIONS: No tankers are allowed in the port. Vessels and operators must comply with internationally applicable regulations concerning explosives and dangerous goods.
CONSULS: Italy, Sweden, Denmark, Portugal, Finland and many other countries.
REPAIRS: Minor repairs and overhauls may be carried out.
DRY DOCKS: Not available.
SURVEYORS: Lloyd's, Bureau Veritas, Registro Italiano Navale, Germanischer Lloyd.
GANGWAY/DECK WATCHMEN: Not necessary but available.
HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: 50 grams tobacco or 40 cigarettes, and 0.25 litres spirits, 0.25 litres wines, per man per day.

For reasons of administrative convenience, issues of high duty goods for use by Crew on board will be made every 3 days, beginning with the first day of the ship's arrival in Cyprus waters. For each member of the Crew (other than the Master, the Chief Officer and the Chief Steward) each issue will consist of, 120 cigarettes or an equivalent quantity of other tobacco goods. 1 bottle of spirits, and 3 bottles of wine.

Each issue for the Master, the Chief Officer and the Chief Steward of ocean-going vessels will consist of: 200 cigarettes, 2 bottles of spirits and reasonable quantity of wine they may request.

Concessions to Crew landing from ship. On coming ashore, for a short period, 50 grams of tobacco, or 40 cigarettes per day or part thereof.

The above allowances are in force for all Cyprus ports.
CARGO GEAR: Load or discharge may be effected either by ship's or shore gear. Heavy lifts up to 90 tons.
REPATRIATION: Facilities are available.
AIRPORT: Larnaca International Airport 3 miles from Larnaca Port. Daily flights to Europe and Middle East.
TIME: GMT plus 2 hours. Summertime – GMT plus 3 hours.
HOLIDAYS: 1996: 1st January; 6th January; 26th February; 25th March; 1st April; 12th – 15th April; 1st May; 3rd June; 15th August; 1st October; 28th October; 25th December; 26th December.

Port workers will abstain from work on 1st January, 14th April and 25th December, but they may normally work on overtime basis during the rest of the holidays.
POLICE/AMBULANCE/FIRE: Dial 199.
EMERGENCY CO-ORDINATION CENTRE: Port Manager Tel: 635563. Res. Tel: 657043/638779. Marine Police Tel: 630200.
TELEPHONES: Line available for placing telephone on board.
BANKS: Bank of Cyprus, 71 Archbishop Makarios III Avenue, Port Area, Larnaca. Tel: 04-656182. Fax: 04-620769.

Popular Bank of Cyprus, 69 Archbishop Makarios III Avenue, Port Area, Larnaca. Tel: 04-655345.

Hellenic Bank, Archbishop Makarios III Avenue, Port Area, Filanda Court, Larnaca. Tel: 04-634970.
STORING: Trucks come alongside berth. Forklifts available on the quay. Port of Larnaca is a free trade zone. Local riggers can be employed.
SERVICES: Compass adjusting; Radar; Radio telephones; Gyro compass repairs; hull scraping and engine repairs.
SHORE LEAVE: Crew members are allowed ashore.
IDENTIFICATION CARDS: Shore leave passes are issued. Seaman's Book or Passport required whilst ashore.
GARBAGE DISPOSAL; A daily collection of garbage is available between 0800 hrs. and 1300 hrs.. Plastic bags are supplied by the Port Authority. Charges:

Conventional Vessel	CY£12.50
Container Vessel	CY£11.25
Passenger Vessel	CY£37.50
Tanker/Bulk Carrier	CY£10.00

WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: SEK and PEO Seaman's Clubs. Facilities include library, telephone, services and restaurant. Contact SEK, Tel: 351766, and PEO, Tel: 371532.
CURRENCY: Cypriot Pound (CY£).
REGULATIONS: Port Manager's permission is required for: immobilising engine, cleaning or repairs whilst vessel alongside quay, lowering lifeboats and use of ship's radio. Port and Customs clearance required before departure. Cyprus flag to be hoisted on mast from 0800 hrs. to sunset. Landing of dogs or other animals not allowed; also discharging of fruits, vegetables and eggs unless authorised by Produce Inspection Office. Disposal of garbage and waste strictly prohibited both in port and Cyprus waters.
DELAYS: According to prevailing circumstances but normally no delays.
GENERAL: Weather conditions permit entrance and working of ships all the year round.

PILOTAGE: Ships are not allowed to enter the port or to berth at the mooring buoys outside the breakwater port without Pilot, unless permission is granted by the Port Authority. Pilot boards vessel at roadstead. Master must give 24 hour's notice of ETA to vessel's Agents to enable them inform the Port Manager in time. Pilot's Telegraphic Address is Port Manager, Limassol, Cyprus. Tel: 365246. Fax: 5-365597.

ANCHORAGE: No specific boundary but ships usually anchor about 0.5 mile S.E. of lighter basin entrance but not eastwards from basin entrance lights, bearing 315°T (See "Plan"), where depth is 8 fathoms or S.S.E. of the entrance to the new breakwater port.

RESTRICTIONS: See "Max. Size" and "Berthing". Rise of tide up to 0.6 m.

MAX. SIZE: *New Breakwater Port:* Depth alongside 11 m. – 14 m. Max. draft 10.5 m. – 13.5 m. No LOA limit on ships entering and berthing. The height of quay above sea level is 2.30 m.

HEALTH: Pratique is required at first Cyprus port of call only. Pratique is granted either before or after berthing as appropriate.

RADIO: Cables sent through "Cyprus Radio", call sign: 5BA.

VHF: Port Manager and Pilots equipped with VHF radiotelephone operating on Channel 10 during office hours only.

RADAR: No port radar service.

TUGS: Port Authority tugs join vessels outside breakwater using ships' lines. 4 tugs available with bollard pull up to 35 tons.

BERTHING: Vessels may berth inside port between 0600 hrs. and sunset, but may unberth and sail until midnight. Cargo vessels are allowed to berth during night-time provided berth space is available and vessels will immediately operate with at least 1 gang.

Quay Length: 1,980 m. Ro-Ro vessels can discharge/load on the quays, but a 50 m. long Ro-Ro berth also available.

Warehousing Space: 39,760 sq.m.

Paved Yard for Containers (full and empty): 342,500 sq.m.

Paved Stacking Area for General Cargo: 57,000 sq.m.

Grain Silo: Modern, (recently built) with a 30,000 tonnes storage capacity, connected with the quay via an overhead conveyor belt.

Equipment: 35 ton level luffing crane. 4×40 ton and 2×45 ton gantry cranes for container handling. 1×20 ton and 1×40 ton mobile cranes. There are also 7 private mobile cranes with capacity of 20 tons – 112 tons available on demand. Four 7 tons – 15 tons forklifts and 7×32 ton van carriers for container handling. Eighty-eight 3 ton – 60 ton forklifts for general cargo handling. One hundred and fourteen 3 ton – 25 ton trailers, 15 tractors and other auxiliary equipment.

STEVEDORES: 24 hours notice of ETA to Agent is required to enable him arrange gangs.

MEDICAL: It is necessary for Agent to receive advance notice of at least 2–3 hours before vessel's arrival. Hospital facilities constantly available. Inoculations or vaccinations are required according to prevailing circumstances.

TANKERS: Not allowed to berth in the port. No slop discharge facilities. 1026.

FRESH WATER: Facilities available on quay.

FUEL: All types provided by special bunkering vessels at berths and roadstead and by tanker lorries at the quay.

FIRE PRECAUTIONS: No tankers are allowed in the port. Vessels and operations must comply with internationally applicable regulations concerning explosives and dangerous goods.

CONSULS: Belgium, Colombia, France, Greece, Italy, Malta, Mexico, Norway, Netherlands, Panama and Sierra Leone.

REPAIRS: A floating dock 63 m. long and 18.3 m. wide capable of lifting a 1,360 ton ship up to 75 m. LOA.

SURVEYORS: Lloyd's, Bureau Veritas, Registro Italiano Navale, Germanischer Lloyd.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: By crew or stevedores.

CUSTOMS ALLOWANCES: 50 grams tobacco or 40 cigarettes, and 0.25 litres spirits, 0.25 litres wines, per man per day.

For reasons of administrative convenience, issues of high duty goods for use by crew on board will be made every 3 days, beginning with the first day of the ship's arrival in Cyprus waters. For each member of the crew (other than the Master, the chief officer and the chief steward) each issue will consist of, 120 cigarettes or an equivalent quantity of other tobacco goods, 1 bottle of spirits and 3 bottles of wine. Each issue for the Master, the chief officer and the chief steward of ocean-going vessels will consist of: 200 cigarettes, 2 bottles of spirits and reasonable quantity of wine they may request. Concessions to crew landing from ship. On coming ashore, for a short period, 50 grams of tobacco, or 40 cigarettes per day or part thereof.

CARGO GEAR: Load or discharge may be effected either by ship or shore gear.

REPATRIATION: Facilities available for effecting crew changes and arranging any necessary repatriations. Usually arranged with Agent.

AIRPORT: Larnaca International Airport served by regular lines, situated 43 miles from Limassol.

TIME: GMT plus 2 hours. Summertime GMT plus 3 hours.

HOLIDAYS: 1996: 1st January; 6th January; 26th February; 25th March; 1st April; 12th – 15th April; 1st May; 3rd June; 15th August; 1st October; 28th October; 25th December; 26th December.

Port workers will abstain from work on 1st January, 14th April and 25th December, but they may normally work on overtime basis during the rest of the holidays.

POLICE/AMBULANCE/FIRE: Tel: Police 330134/330411; Ambulance 330333, Fire Brigade 330166 or 199. Emergency Dial 199.

TELEPHONES: Available on request, for placing on board.

Bank of Cyprus, Franklin Roosevelt and Omonia Avenue, Limassol. Tel: 05-352040. Fax: 05-352148.

Popular Bank of Cyprus, Franklin Roosevelt and Omonia Avenue, Limassol. Tel: 05-369050. Fax: 05-376717.

Hellenic Bank, Franklin Roosevelt, Limassol. Tel: 05-350244.

Barclays Bank Plc., 47 Omonia Avenue. Tel: 05-341777. Fax: 05-341965. Telex: 4821 Baromo Cy.

SERVICES: Compass adjusting, servicing of radar, R/T, echo sounders.

SHIP SUPPLY SERVICES:
1. A. Lamaris & Co.Ltd., P.O.Box 37, Limassol. Tel: 05-362625. Fax: 05-359857. Telex: 3319 Lamaris Cy. VHF: Channel 6.
2. Messrs. Thesseas Savva, 118 Franklin Roosevelt Avenue, P.O.Box 114, Limassol.
3. Brasal Off-Shore Services Limited, P.O.Box 1518, Limassol. Tel: 373086. VHF: Channels 74 or 86.
4. Vasos Aivaliotis Limited, 4 Ermou Street, P.O.Box 110, Limassol.
5. Mercury Divers Company Limited, P.O.Box 114, Limassol.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore leave passes only needed when staying overnight, otherwise Seaman's Book or Passport required whilst ashore.

A collection service is available by the Cyprus Ports Authority at New Limassol Port. Tel: 5-365246. Fax: 5-365597. Skips are provided alongside on request. Collection is carried out daily, usually during working hours and charges vary according to ships' type.

Conventional Vessel	C £ 12.50
Container Vessel	C £ 11.25
Passenger Vessel	C £ 37.50
Tanker/Bulk Carrier	C £ 10.00

A collection service is available by a private contractor (Mr. Andreas Tsoulloftas. Tel: 5-335421/382594. Fax: 5-337647) by tanker trucks of capacity 12 cu.m. and 25 cu.m. and charges are accordingly C £ 50 and C £ 100 per visit. No restriction on shore capacity, as entire quantity is received and consumed by a nearby cement factory.

SEK - Tel: 5-342772 and PEO - Tel: 5-377228. Both are at the old port. Facilities include restaurant, library and telephone service.

"Flying Angel", Missions to Seamen, located within port limits. Tel: 05-365246, 04-651327, 05-747211.

Several duty free shops are located in the New Port Passenger Terminal and a great variety of items can be purchased either in most foreign or local currency.

International telephone service for seafarers is available through public telephone booths by automatic connection, inside and outside the terminal, either using local currency coins or telephone cards purchased locally.

Cyprus Pound (C £).

REGULATIONS: Port Manager's permission is required for: immobilising engine, cleaning or repairs whilst vessel alongside quay, lowering lifeboats and use of ship's radio. Port and Customs clearance required before departure. Cyprus flag to be hoisted on mast from 0800 hrs. to sunset. Landing of dogs or other animals not allowed; also discharging of fruits, vegetables and eggs unless authorised by Produce Inspection Office. Disposal of garbage and waste strictly prohibited both in port and Cyprus waters.

DELAYS: According to prevailing circumstances but normally no delays.

GENERAL: Weather conditions permit entrance and working of ships all the year round.

DEVELOPMENTS: Grain silo extension in progress to double storage capacity to 70,000 tons by 1997/98. West Basin Container Terminal to be further developed to reach 2,000 m. of quay space by the year 2010.

RADIO OFFICER'S REPORT: September 1990 (Updated 1992).

Documents:

Customs:
3 copies Entry Outwards and Clearance for Vessels (only fill in upper half).
3 copies Ships Stores Declaration.
1 copy Crew Personal Declaration ("Magazines" should be placed under seal).

Quarantine:
1 copy Maritime Declaration of Health.

Port Authority:
1 copy Arrival Declaration.
1 copy Crew List.
1 copy Passenger List.
1 copy Dangerous Cargo List(IMO).

Agent:
1 copy Arrival Condition.
1 copy Crew List.
1 copy Mail List.
1 copy Port and Marine Police Form.

Immigration: Shore passes only needed when staying overnight, otherwise passport is sufficient.

Customs Allowances: 120 cigarettes or 150 gr. of tobacco, 1 bottle of spirits and 3 bottles of wine.

AUTHORITY: Cyprus Ports Authority, Headquarters, 23 Crete Street, P.O.Box 2007, Nicosia, Cyprus. *Tel:* (02) 450100. *Telex:* 2833 CYPA CY. *FAX:* (02) 365420. *Cables:* Cyports. *Contact:* The General Manager.

AGENT: Gulf Agency Co. (Cyprus) Ltd., P.O.Box 1141, Limassol, Cyprus. Tel: (357-5) 341950. Telex: 2817 and 2744 ("Gacship Cy"). Fax: (357-5) 372932. Cables: "Gacship", Limassol.

MONI: 34.42 N. 33.11 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
4 Passenger Lists.
1 Arrival Declaration.
1 Crew Declaration.
1 Store List (for cigarettes, spirits, etc).
2 Manifests.(Custom forms).

PILOTAGE: Compulsory for berthing. The tanker berth is situated in open roadstead. Pilot available through Harbour Master at Limassol (8.5 miles).

RESTRICTIONS: Docking in daylight only. Sailing possible at any time.

MAX. SIZE: Tankers up to 750 ft. length with max. draft 40 ft.

HEALTH: Pratique granted by Health Authorities after boarding on arrival. No Pratique necessary when vessel arrives from another port in Cyprus.

RADIO: Communication by Walkie-talkie

TUGS: None available or required.

BERTHING: Electricity Authority of Cyprus. Three conventional buoy mooring for tanker discharging fuel oil to Moni Power Station. Depth of water 18.20 m. – 30.48 m.

MEDICAL: Necessary for agent to receive advance notice of medical attention required. Hospital facilities available.

TANKERS: Flange at end of flexible line is ASA 300 – 15 in. OD. (12×1 in. holes. 13 in. P.C.D.). Hose connection made on port side. No slop facilities available. Terminal crew connect and disconnect hoses. Ship's gangway required. Distance to shore tanks 3,950 ft. Max. pressure 135 p.s.i. Minimum receiving rate 500 tonnes per hour, 1500 sec. Redwood No. 1.

Loading signals – 1 blast, stop pumping. 2 blasts, start pumping.

DENSITY: 1025

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Light machine shop.

CUSTOMS ALLOWANCES: See "Limassol".

TIME: GMT plus 2 hours. GMT plus 3 hours from last Sunday in March until last Sunday in September.

SHIP SUPPLY SERVICES:
1. Brasal Off-Shore Services Limited, P.O.Box 1518, Limassol.
2. Vasos Aivaliotis Limited, 4 Ermou Street, P.O.Box 110, Limassol.
3. Messrs. Thesseas Savva, 118 Franklin Roosvelt Avenue, P.O.Box 114, Limassol.
4. Mercury Divers Company Limited, P.O.Box 114, Limassol.
5. A.Y. Steel and Marine Construction Co. Ltd., P.O.Box 4035, Limassol.

IDENTIFICATION CARDS: When on shore leave, Seamen's Books required.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Cyprus Pound.

VASSILIKO BAY: 34.43 N. 33.19 E.

LOCATION: 13.5 miles due East of Limassol and 1.5 miles West of Zyghi (Lat. 34° 42' 46" N., Long. 33° 18' 37" E.)

DOCUMENTS:
1 Arrival Declaration.
5 Crew Lists.
5 Passenger Lists.
5 Transit Passenger Lists.
2 Firearms Declarations.
1 Dangerous Cargo List (IMO).
2 Ship's Stores List Declarations.
1 Declaration signed by each member of crew stating dutiable goods in their possession.
1 Form of Appointment of Agent.
1 Maritime Declaration of Health.
2 Entry Outward and Clearances.
1 Port Marine Police Form.
1 Mail List.

PILOTAGE: Pilots available for berthing and shifting operations. Can be contacted on VHF Channel 16, working Channel 8. Owners or Master of vessel must give by cable/radio ("Helco Nicosia" or "Vascem Nicosia" 48) notice of vessel's ETA 24 hours in advance. Message of ETA must also include:
(a) Name/call sign of vessel.
(b) Nationality.
(c) Length, draft, d.w.t. and n.r.t.

MAX. SIZE: Vessel's LOA 175 m. (approx.); Breadth, no restriction; Draft 8.50 m.

HEALTH: For Pratique, vessel must cable name and nationality, last port of call, number of crew and passengers, and condition of health on board. For vessels calling first at another port in Cyprus, Pratique is automatic.

RADIO: "Cyprus Radio".

TUGS: Tugs available from Larnaca port. 12 hours' notice in advance is required.

BERTHING: Length of quay, 540 m. Depth at LW, 9 m.

LOAD/DISCHARGE: Can be effected by shore equipment and/or ship's own gear.

Bulk cargoes (i.e. Pyrites, Cement, Copper, Chrome, Ore, Gypsum Rock, Phosphate Rocks, Coal, Clinker, etc.), fuel oil and liquid chemical cargoes (i.e. Liquid Ammonia, Sulphuric Acid).

CRANES: 3 mobile cranes of 30 tonnes SWL capacity each are constantly available. Services of an 100 tonne mobile crane can be also secured on request.

SPECIALISED CARGO-HANDLING FACILITIES: Facilities for Roll-on/Roll-off traffic and for handling liquid chemicals are available.

TANKERS: No special facilities.

DENSITY: 1027.

FRESH WATER: Available.

FUEL: Full bunkering facilities available.

OPENING/CLOSING HATCHES: Ship's crew.

REPATRIATION: Crew changes and repatriation facilities available.

AIRPORT: Distance 35 miles; served by regular operators. Larnaca 49.6 km. and Paphos 101 km.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: 1996: 1st January, 6th January, 26th February; 25th March, 1st April, 12th – 15th April, 1st May, 3rd June, 15th August, 1st October, 28th October, 25th December, 26th December.

Port workers will abstain from work on 1st January, 14th April and 25th December, but they may normally work on overtime basis during the rest of the holidays.

AUTHORITY: Cyprus Ports Authority, P.O.Box 2007, Nicosia, Cyprus. *Tel:* (02) 450100. *Telex:* 2833 Cypa Cy. *Cables:* Cyports. *FAX:* (02) 365420. *Contact:* General Manager.

At Vassiliko Bay: Tel: 4-333001. Fax: 4-332651. Telex: 5000 Vascem Cy.

NOTES

Please also advise Shipping Guides Ltd.

Denmark

GENERAL (See Plan)

CUSTOMS ALLOWANCES: For use on board during the stay in Denmark a total of 40 cigarettes or 40 grammes of tobacco, 0.25 litres of alcoholic liquors and 0.25 litres of wine can be released per member of the crew a day.

Tobacco may be released for 5 days' consumption at a time, i.e. 200 cigarettes, alcoholic liquors and wine may be released for 3 or 4 days' consumption, i.e. 1 bottle containing 0.25 or 1.0 litres.

ROUTEING: A routeing system has been established, so ships with a draft up to 17 m. (55.77 ft.) can pass the Great Belt. Ships bound for the Baltic are restricted to a draft of 15 m. (49.21 ft.) owing to shallow waters N.E. of Gedser.

For the passage through Danish waters by ships with a d.w.t. of more than 40,000 tons or with a draft of 13 m. or more, we would like to draw your attention to the "IMO–recommendation of Nov. '75 on navigation through the entrances to the Baltic Sea", and to the radio reporting system established by the Danish Ministry of Commerce.

ROUTE "T" (17 metres Transitroute) – THE SOUND – RADIO REPORTING SERVICE (Shippos): With the object of ensuring the safety of navigation of large ships passing through Danish waters and also of reducing the risk of oil pollution resulting from the grounding and collision of tankers, the Danish Government has established a transitroute between Skagen and the area N.E. of Gedser with a minimum depth of water of 17 m. The route is named "Route T".

The route is marked by light buoys and lights, the Decca coverage is good and Danish Pilot assistance is available. Portable Decca equipment can be hired for use during the passage through Danish waters and can be taken on board at the Pilot Stations Skagen or Allinge (Bornholm). Under ice conditions Danish icebreakers, as far as possible, render free assistance to shipping.

In spite of the good buoyage, navigation through Danish waters presents, however, in certain areas difficulties to large ships on account of narrow waters, sharp bends, strong currents and shallow depths. Furthermore there is an intensive East and Westbound ferry traffic in Store Baelt, particularly in the area immediately South of Sprogo.

Therefore a radio reporting service (SHIPPOS) has been established the rules of which are given in the following.

The International Maritime Organisation (IMO) has adopted a recommendation on navigation through the entrances to the Baltic Sea according to which ships with a deadweight-tonnage of over 40,000 tons or with a draft of 13 m. or more shall fulfil certain conditions about equipment, navigation, etc.

IMO has furthermore adopted a recommendation (which see) according to which certain ships shall use a Pilot when navigating in the Sound.

The Commission of the European Communities has adopted a directive which makes it compulsory for tankers of 1,600 gross tonnage and more en route to a community port to transmit a Sailing Plan and to complete a "Tanker Check List". The directive has been put into force by Order No. 306 of 4th June 1981 concerning minimum requirements for certain tankers entering or leaving a Danish port.

Rules concerning radio reporting service in Danish waters – SHIPPOS:

1. With the objects of ensuring the safety of navigation and of reducing the risk of pollution of Danish coasts and waters as may result from grounding or collision of oil tankers, gas carriers and chemical tankers, a reporting service has been established for the purposes mentioned below:
   a. To inform shipping about large ships' movements, so that smaller ships can take into account the limited manoeuvrability of those and in order to avoid the risk of large ships meeting one another in areas difficult to pass.
   b. To inform ships about navigational hazards en route and deviations from normal conditions of current, water level, and wave height.
   c. To notify the ferry traffic South of Sprogo about the passage of large ships.
   d. To facilitate the authorities early and effective pollution combatting action in case of an accident.
   e. To notify the authorities immediately about any deficiency which could affect safe navigation and the marine and coastal environment, and about ships' observation of considerable pollution.

2. The reporting service applies to:
   a. all ships of 20,000 tons gross tonnage and above,
   b. all ships with a draft of 13 m. and more,
   c. all loaded oil-, gas- and chemical tankers of 1,600 tons gross tonnage and above, and
   d. all ships carrying radio active cargoes.

3. Messages to the reporting service shall be sent over a Danish coast radio station as telegrams addressed to "SHIPPOS Aarhus".

The transmission of reports from ships is free of charge.

Information about position of large ships, mentioned under 2, a. or b., participating in the radio reporting service will be broadcast over VHF as "SHIPPOS INFORMATION" by the coast radio stations Lyngby Radio and Skagen Radio.

The broadcast will include information about actual water levels and serial numbers of Navigational Warnings in force for the SHIPPOS – area.

The broadcast will be preceded by an announcement over Channel 16, informing about the Channel used for the broadcast.

The information will be broadcast every third hour according to the table below, preferably by using the mentioned Channels. Other Channels might be used, which – if occasion should arise – will appear from the preceding announcement on Channel 16.

Position of VHF-station	*VHF-Channel*	*Time UTC*	*Serviced by*
Skagen	4	0220, 0520, 0820, etc.	Skagen Radio
Laeso	64		
Arnholt	7		
Fornaes	5	0220, 0520, 0820, etc.	Lyngby Radio
Rosnaes	2		
Karleby	63		
Mon	2		

4. In the SHIPPOS-system the following reporting lines are established (See "Plans"):
   a. Skaw.
   b. Hatter.
   c. Baltic W.
   d. Sound N.
   e. Sound S.
   f. Moen.

5. Ships which are **inward bound** en route to a Danish port or to the Baltic Sea shall when passing the reporting line SKAW send a *Sailing Plan* (SP) (See "Drafting of Messages") to "SHIPPOS Aarhus".

During their voyage ships shall send *Position Reports* (PR) (See "Drafting of Messages") when passing the reporting lines SOUND N. or HATTER and BALTIC W.

Ships **outward bound** (from the Baltic) shall when passing the reporting line MOEN or SOUND S. send a *Sailing Plan* and during their voyage send *Position Reports* when passing the reporting lines BALTIC W. and HATTER or SOUND N..

6. Ships which en route to or through Danish waters do not pass the reporting line SKAW, MOEN or SOUND S. shall in sufficient time before passing first reporting line during the voyage send a *Sailing Plan* to "SHIPPOS Aarhus".

7. About 2 hours before **departure** from a Danish port, ships shall send a *Sailing Plan* to "SHIPPOS Aarhus".

8. Upon **arrival** at a Danish port, when passing the reporting line SKAW outward bound or when passing the reporting lines MOEN or SOUND S. inward bound a *Final Report* (FR) (See "Drafting of Messages") shall be sent to "SHIPPOS Aarhus".

9. If destination is changed, or if after transmission of a report **changes** occur which result in a time difference of more than 30 minutes from the estimated time of passing the next reporting line, or – for ships en route to a Danish port – the estimated time of arrival, the ship shall as soon as possible send a *Deviation Report* (DR) (See "Drafting of Messages") to "SHIPPOS Aarhus".

10. If during the voyage through Danish waters deficiencies occur, which might reduce the normal and safe manoeuvring capabilities of the ship, or a situation arises, which can endanger the marine environment and the adjacent areas, ships shall as soon as possible send an *Incident Report* (IR) (See "Drafting of Messages") to "SHIPPOS Aarhus". An Incident Report shall also be sent when observing an oil pollution or a pollution by any other substance, which is considered to be harmful to the marine and coastal environment.

11. Due to the intense East- and Westbound ferry traffic in Store-Baelt South of Sprogo the following special rules apply for ships of 20,000 tons gross tonnage and above and for ships with a draft of 13 m. and more when navigating in this area:

About one hour before passing the ferry route the ferries shall if possible be informed thereof on VHF, using the call sign "Ferry Leader". The call shall be made on Channel 16 and the information should be sent on Channel 10 or another available Channel (See "Drafting of Messages").

Ships which cannot operate VHF are requested to inform "SHIPPOS Aarhus" 2 hours before passing the ferry route about the estimated time of the passing.

Upon receipt of such information the ferries will endeavour to navigate so that risk of collision does not arise. If, nevertheless, risk of collision does arise, the International Regulations for Preventing Collisions at Sea must always be applied.

This special rule can also apply for ships with a draft of 10 m. and more regardless of tonnage.

Drafting of messages:

1. Messages transmitted in accordance with the Rules concerning radio reporting service in Danish waters shall be sent over a Danish coast radio station as telegrams addressed to "SHIPPOS Aarhus".

To ensure brevity of messages and to reduce the possibilities of mistakes the following designations shall be used for reporting lines (See "Plans"):

Latitude 57° 45' N.: SKAW
Latitude 56° 00' N.: HATTER
Latitude 54° 40' N.: BALTIC W.
The line Nakkehoved – Kullen: SOUND N.
The line Stevns – Falsterb: SOUND S.
Position of Mon SE. Lightvessel: MOEN

Positions, other than the above mentioned, shall be given in latitude and longitude or by stating name of port.

2. All messages shall begin with the word SHIPPOS as the first word in the text.
The messages shall be drafted according to the following format:

Designator	*Function*	*Information Required*
	System identifier	"SHIPPOS"
	Type of report	One of the following 2-letters identifier. "SP" (Sailing Plan) "RP" (Position Report) "FR" (Final Report) "DR" (Deviation Report) "IR" (Incident Report)
A	Ship	Name and call sign
B	Date and time of event	A 6 digit group giving date of month (first two digits), hours and minutes (last four digits). The digit group to be followed by the letter "Z" indicating time in UTC. (e.g. 041330Z).
C	Position	Geographical position by two 4 digit groups giving latitude in degrees and minutes suffixed with N (North) and longitutde in degrees and minutes suffixed with E (East). (e.g. 5610N 1230E).
D	Position	Reporting line, port of departure or port of arrival
E	True Course	A 3 digit group
F	Speed in knots	A 2 digit group
G	Port of departure	Name of last port of call
I	Destination and expected time of arrival	Name of port and date time group expressed as in B
J	Pilot	State whether a pilot is on board (e.g. PILOT EMBARKED)
L	Route information	Intended route (e.g. 1. Route T – The Sound) (e.g. 2. Route T – Great Belt)
N	Expected time of passing next reporting line and its identification	Date time group as in B and reporting line (e.g. 071500Z HATTER)
O	Maximum present draft in metres	A 4 digit group giving metres and centimetres
P	Cargo	Type and amount of cargo including whether cargo included in the International Maritime Dangerous Goods Code is carried
Q	Defects/Damage/ Deficiencies/other limitations	Brief details of defects, damage, deficiencies or other limitations
R	Description of pollution incident or observation	Brief details including type of pollution (oil, chemical, etc.)
U	Ship size and type	Gross registered tonnage and type
X	Miscellaneous	Any other information – give brief details

3. The different types of reports shall contain information according to the following table:

Designator	*Type of Report*				
	SP	PR	FR	DR	IR
A	M	M	M	M	M
B	M	M	M	M	M
C/D	M	M	M	M	M
E	O	M	–	O	–
F	O	M	–	O	–
G	O	–	–	–	–
I	M	–	–	O	–
J	O	O	O	O	O
L	M	–	–	O	–
N	M	M	–	O	–
O	M	–	–	–	–
P	M	–	–	–	O
Q	O	O	O	–	O
R	O	O	O	–	O
U	M	–	–	–	–
X	O	O	O	O	O

M = "Mandatory" (always to be included).
O = "Optional" (to be included if appropriate).

4. *Sailing Plan* ("SP") shall be sent
(a) when passing reporting line SKAW inward bound,
(b) when passing reporting line MOEN outward bound,
(c) when passing reporting line SOUND S. outward bound,
(d) in sufficient time before passing the first reporting line during the voyage if passage has not taken place as mentioned under (a),(b), or (c),and
(e) about 2 hours before departure from a Danish port.

Pilotage within Route T: Pilotage through Route T from Skagen to Bornholm can be ordered from "DANPILOT", Skagen, via a coast radio station.

Pilotage through Route T from Bornholm to Skagen can be ordered from "SOUNDPILOT", Copenhagen, via a coast radio station.

When ordering a pilot the following information is required:
1. Name and call sign.
2. Estimated time of arrival (ETA) at the position from where pilotage is required.
3. Gross tonnage and draft.
4. Sea speed.
5. To where pilotage is required.

The order should be given at least 12 hours before ETA and should be confirmed or corrrected 3 hours before ETA. The Pilot Stations at Skagen and at Bornholm keep a continuous watch on VHF Channel 16.

Anchorages: If anchoring is considered necessary the following anchorages are recommended:
(a) Off Skagen.
(b) Off Sjaellands Rev.
(c) N.W. of Rosnaes.
(d) Off Romso.
(e) Off Keldsnor.

Furthermore anchoring is possible in most places along the route depending on the draft of the ship.

It must be emphasized, that for ships with a draft of 13 m. or more anchoring may be necessary owing to the weather and sea conditions in relation to the size and draft of the ship and to the sea level.

Electronic position-fixing equipment: IMO recommends that ships with a draft of 13 m. (42 ft. 7 in.) or more when navigating through the entrances to the Baltic Sea should have on board suitable electronic position-fixing equipment.

With proper notice (a minimum of 24 hours) ships not fitted with such equipment can rent a portable Decca receiver on application to Racal-Decca Navigator Aktieselskab, Kalvebod Brygge 20, 1560 Kobenhavn V., Denmark. Tel: (01) 12 83 10. Telegram: DECCAMAR.

The Decca receiver can be installed when passing Skagen or Bornholm.

The installation time is about 1 hour and the receiver can be installed by day and night.

The Pilot Station will assist with the arrangement and will also on request give information about fees for hire.

The Decca receiver can be delivered fitted for one of the following voltages:
DC: 24 v./32 v., 110 v. and 220 v.; AC: 85-260 v., 40-440 Hz.

It is quite important when requesting rent of Decca receiver to state the voltage available on board.

The receiver can remain on board until the ship again leaves Danish waters at Skagen, or it can be dismounted in a port in Denmark, Sweden, Finland or Germany.

Payment for rent and installation is to be settled through Racal-Decca Navigator Aktieselskab.

Order on the Calling of a Pilot:
(Royal Danish Administration of Navigation and Hydrography, Order No. 29 of 30th January 1985 as amended by Order No. 795 of 11th November 1986).

Pursuant to section 7(4) of the Danish Pilotage Act and under the authority of the Minister of Defence it is hereby laid down:

1. (i) Ordering of a pilot from Danish Pilot Stations shall be made to the Pilot Station in question subject to the notices stipulated in section 2 hereof. The order shall contain information as to:
   (1) Name and call sign of the ship,
   (2) estimated time of arrival at the place from which pilotage is requested,
   (3) gross registered tonnage and draft of the ship,
   (4) speed of the ship, and
   (5) place to which pilotage is requested.
   (ii) In connection with arrival of the ship at the place from which pilotage is requested, the international signal "G" should be used and be displayed by flag or flashlight.
2. (i) With respect to ships coming from the sea the order shall be given at least 6 hours before estimated arrival at the place from which pilotage is requested, and this shall be confirmed or corrected 1 hour before the estimated time of arrival, see also subsection 2 of this section.
   (ii) Where transit pilotage takes place via Route "T" from the waters off Skagen to the waters around Bornholm, or conversely, the order must, however, be given at least 12 hours before estimated time of arrival and shall be confirmed or corrected 3 hours before estimated time of arrival.
   (iii) With respect to ships requesting pilotage from harbour, anchorage or the like the order shall be given at least 4 hours before the pilotage is requested to commence. Confirmation and possible changes shall be given at least 1 hour before estimated time of departure.
3. (i) The ship's Master shall manoeuvre the ship in such a way that the pilot can embark or disembark the ship in the safest and fastest manner.
   (ii) If due to special circumstances the Pilot is prevented from boarding the ship, pilotage can take place from the pilot boat or from shore.
4. Unless prevented by special circumstances, the Master of the ship shall during pilotage be obliged to take the pilot boat in tow upon the Pilot's request.
5. During pilotage the Master of the ship furthermore has a duty to provide the Pilot with all information of importance to the pilotage.
6. Apart from the lights prescribed in accordance with the International Regulations for Preventing Collisions at Sea, a vessel performing pilotage duty shall fly a flag the upper half of which is white and the lower red. In addition the vessel shall fly the national flag.
7. Any contravention of Sections 3-6 shall in pursuance of Section 23(2) of the Pilotage Act be punished by a fine.
8. (i) This Executive Order shall come into force on the 15th February 1985.
   (ii) With effect as from same date Executive Order No. 120 of 21st March 1979, of the Royal Danish Administration of Navigation and Hydrography as amended by Executive Order No. 643 of 16th December 1983, on the Calling of a Pilot, etc., shall be repealed.

Notice about Passage to the Harbour of Enstedvaerket, the Harbours of Stigsnaesvaerket and Gulfhavn, Stigsnaes, of Ships with a Draft of 13 metres or more: (Ministry of Industry, Notice of 7th January 1987).

1. The maximum draft for entering the harbour of Enstedvaerket and the harbours of Stigsnaesvaerket is 17.0 m. and for Gulfhavn, Stigsnaes, 15.5 m.
2. With reference to IMO Resolution A. 339 about navigation through the entrances to the Baltic Sea it is recommended that ships with a draft of 13 m. or more comply with the following:
   a. A pilot shall be used during the entire passage within the Skaw.
   b. The ship shall be equipped with a VHF fitted with appropriate frequencies.
   c. The ship shall have on board suitable electronic position-fixing equipment to make use of hyperbolic systems which will provide sufficient fixing accuracy for navigating in this area.
   d. The ship shall be equipped with a 3 cm. and a 10 cm. radar both able to function.
   e. The ship shall participate in the ship reporting system operated by the Government of Denmark (SHIPPOS).
   f. When constrained by its draft the ship shall show the signal prescribed in Rule 28 in the International Regulations for Preventing Collisions at Sea.
   g. The Master must be aware that temporary anchoring may be necessary owing to the weather and sea conditions in relation to the size and draft of the ship and to the sea level.
3. Attention is drawn to the fact that under ice conditions, when the buoyage cannot be expected to be in position and in order, there exists a greater risk of grounding than under normal conditions.
   3.1. If the passage takes place under ice conditions, when the buoyage cannot be expected to be in position and in order, it is recommended that ships furthermore comply with the following:
   When navigating South of the Latitude 56° North (Sjaellands Odde) ships shall use 2 tugs, which both are equipped with Decca and with a pilot on board, and the navigation should, when considered necessary, take place in daylight and in good visibility.
   3.2. For ships equipped with operational Channel Navigation System the use of the tugs mentioned in 3.1. can be limited for the passage between Keldsnor and Enstedvaerket.

4. Pilot stations and "SHIPPOS Aarhus", when being aware of the fact that ships with destination to one of the harbours concerned does not comply with the recommendation herein, are requested to report such to the Ministry of Industry.

PILOTAGE:

The Baltic Pilotage Authorities Commission Recommendation:

The Baltic Pilotage Authorities Commission, recognising that Deep-Sea Pilotage helps to enhance safety of navigation and prevention of pollution of the marine environment, in particular to reduce the risks resulting from the high density of ships carrying dangerous or noxious cargoes and that the presence of a Deep-Sea Pilot on board would strengthen a vessel's navigational team and improve emergency measures in case of incidents and having considered the necessity to establish a certain order in Deep-Sea Pilotage in the Baltic Sea,

recommends

A. Masters of ships which are constrained by their draft and
B. Masters of ships other than registered in one of the Baltic states, infrequently sailing in the respective area

coming from or being bound for ports in the Baltic Sea to avail themselves of Deep-Sea Pilots, certified by a competent authority of a Baltic coastal state.

Also see "Baltic Deep-Sea Pilotage".

The Royal Danish Pilotage Service – Danpilot:

As of 1st January 1995, the former independent pilot stations at The Skaw, Grenaa and Great Belt united under one pilot station named "Danpilot".

Principal Boarding Stations:

Region Skagen:
Telex: 67 550 PILOT DK
Fax: +45 98 44 59 63
Cable: DANPILOT
VHF: Channel 16
Skagen (The Skaw): Lat. 57° 47' N., Long. 10° 42' E.
Tel: +45 98 44 55 66
Grenaa: Lat. 56° 25' N., Long. 11° 05' E.
Tel: +45 86 32 05 50
Fax: +45 86 32 05 99

The above mentioned pilot stations serve Frederikshavn, Mariager, Randers and Grenaa.

Region Great Belt:
Telex: 50 391 PILOT DK
Fax: +45 62 50 15 28
Cable: DANPILOT
VHF: Channel 16
Sprogoe NE: Lat. 55° 23' 05" N., Long. 11° 00' E.
Tel: +45 62 50 15 35
Great Belt South:
Tel: +45 62 50 15 35
Route "T" (Tango): Lat. 54° 46' N., Long. 10° 49' E.
Route "H" (Hotel): Lat. 54° 47' 05" N., Long. 10° 52' 05" E.

The above mentioned stations serve Stigsnaes, Korsoer, Nyborg, Svendborg, Nakskov and Faaborg.

When having decided to make use of a Danpilot:

Notices: The following important notices must be given:

At the 12 hours notice or more: Please state the following:

A: ETA.
B: Destination.
C: Sea speed.
E: Whereto pilotage is required.
F: Bunkering requirement . . . . . ts. If operation will take place.
G: Stores and provisions. If operation will take place.
H: All information having influence on your coming transit.

At the 3 hours notice: Please verify your ETA on VHF Channel 16 and from this hour keep a constant listening on Channel 16.

At the 1 hours notice: Please confirm your final ETA. Please note: On certain weather and ice conditions boarding can take place at another position given by the pilot station.

Draft: Route "T" (Tango) to the Baltic Sea: 15.0 m.
The Sound Transit to the Baltic Sea: 7.5 m.

Additional Information:

1. Deep-Sea Pilotage Service in the Baltic Sea:
   Danpilot have licensed pilots available for any port in the Baltic Sea. Therefore, please state your requirements in your 12 hours notice to Danpilot.
2. Deep-Sea Pilotage Service in the North Sea:
   Danpilot will order a licensed North Sea pilot through any of the competent companies in Great Britain, Netherlands and France, as you may wish. Therefore please state your requirements to Danpilot in a 24 hours notice when outwardbound from the Baltic Sea.
3. Bunkering:
   If your ship is about to bunker when passing through the Danish waters, the pilot will assist you in communciation with your bunkering company, as well as finding a safe place to anchor for the bunkering operation. Therefore please state your requirements in your 12 hours notice to Danpilot.
4. Stores and Provisions:
   Same procedure as above. Danpilot will assist you.
5. Crew Change: Can be arranged through Danpilot at the individual pilot stations.

Note: For protection and preservation of the environment, the International Maritime Organisation (IMO) recommend in their Resolution 620 A(15) that ships with a draft of 13.0 m. or more should, for the passage which at several places will be difficult to navigate, make use of the pilotage services locally established by the Danish Government.

GARBAGE/WASTE OIL DISPOSAL: In the majority of Danish ports the reception facilities are based on an agreement between the port authorities and the technical department of the local council or with a local company using trucks. 24 hrs. notice is required in all Danish ports. A "No-special-fee-system" operates under the following conditions:-

The delivery of residues shall normally take place within the normal working hours of the port. If however the ship is calling only outside of these hours, the delivery shall be free of charge to the ship.

The amount of residues to be delivered should be in reasonable proportion to the size and type of the ship and the duration of the voyage.

The ship should be equipped with standard connections on deck and must be able to deliver the necessary pumping capacity.

The ship must pay harbour dues.

In the event that a vessel encounters any inadequacies in the system, they should be reported to Ministry of the Environment, National Agency of Environmental Protection, Strandgade 29, DK-1401 Copenhagen K, Tel: 31578310. Telex: 31209 Miljoe DK. Fax: 31572449.

To obtain further information contact the local port authorities.

DEVELOPMENTS: There is a bridge under construction in Store Belt (Great Belt) from Sjaelland via Sprogo to Fyn.

SHIPMASTER'S REPORT: July 1994.

Simplified information on pilotage and participation in "Shippos" in Danish waters:

The Administration of Navigation and Hydrography has issued the publication "Route T, 17 Meter Transit Route – the Sound – Radio Reporting Service, 1987 Edition".

PILOTAGE

Ships to and from Danish Ports: Legislation regarding compulsory pilotage in Danish waters came into force 1st July 1989.

Vessels concerned:
(a) Oil tankers loaded or in ballast with tanks not secured (inert gas).
(b) Chemical tankers loaded or in ballast with tanks not secured.
(c) Gas tankers.
(d) Vessels carrying radioactive cargoes (IMO Class 7).

Exemptions for Pilotage:
(a) Below 1,500 d.w.t. (loaded or ballast).
(a)(b)(c)(d) Same Master and ship more than 5 times within 6 months.

Transit Passage: Skagen Baltic. IMO 1985/1987, Resolution A.339 (IX).

Vessels concerned:
(a) 40,000 d.w.t. or more (loaded or in ballast).
(b) Draft 13.00 m. or more.
(c) Vessels carrying radioactive cargoes.

These vessels are recommended to use Pilot between the Skagen/Vinga line and the Baltic to reporting line "Moen Se".

The Sound. IMO 1975, Resolution A.578 (14).

Vessels concerned:
(a) Oil tankers, loaded, draft 7.00 m. and above.
(b) Chemical tankers, loaded, any draft.
(c) Gas tankers, loaded, any draft.
(d) Vessels carrying radioactive materials.

These vessels are recommended to use Pilot between Svinbada Light/"MI" Buoy and Drogden Light.

Shippos: Participants in the "Shippos" Reporting System:
All vessels over 20,000 g.r.t.
All vessels over 13.00 m. draft.
All tankers over 1,600 g.r.t. loaded with oil, gas or chemicals.
All vessels carrying radioactive cargoes.

AABENRAA: 55.02 N. 09.26 E. (See Plan)

LOCATION: Aabenraa is situated on the East Coast of Jylland (Jutland) in the Aabenraa Fjord.

DOCUMENTS: Crew List, Passenger List, Tobacco List, Stores List, Load Line Certificate (all vessels above 150 g.r.t.), Safety Equipment (all cargo vessels of 500 g.r.t. and over), Derat, Tonnage and Nationality, Clearance from last port of call, cargo documents.

PILOTAGE: Telegraphic address: "Pilot – Aabenraa". Short notice about 2–4 hours – VHF Channel 16. Small red motor-boat flying international pilot flag. Normally located middle of Aabenraa Fjord.

Larger ships usually take Pilot by Skaw L/V or at Kiel. Pilots to be ordered by ETA-telegrams to "Danpilot, Region Skagen", at least 12 hours in advance when passage via the Skaw. "Danpilot" listening on VHF Channel 16.

ANCHORAGES: Aabenraa Fjord or Road. Depths: about 75 ft. – 80 ft.

RESTRICTIONS: See "General" before first port.

MAX. SIZE: Depth of water in the Channel, at the Sonderjyllandskajen and at Oil Jetty I is 11.0 m. and at Oil Jetty II is 7.0 m. Max. length at the Oil Jetty I is 200 m. and Oil Jetty II is 100 m. No restriction on beam. Max. length at Sonderjyllandskajen 250 m. No breadth restriction.

Depth of water in dry cargo basins from 4.0 m. to 8.5 m. Max. length 200 m. No breadth restrictions. No tide – occasionally low water of 3 ft. – 5 ft. in heavy gales from West. Entry day or night.

HEALTH: In event of disease or fever on board, vessel's Agent to be informed before arrival.

RADIO: Blavand Radio or Lyngby Radio.

VHF: The port is equipped with Channels 12, 13 and 16.

TUGS: There are no tugs stationed in the port, however, tugs of 1,400 h.p. – 3,600 h.p. available at 24 hours notice.

BERTHING: There are 3 basins, a dry cargo pier and 2 tanker berths.
Sydhavn: 340 m. quay, depth 4.0 m.
Gammelhavn: 680 m. quay, depth 7.5 m.
Nyhavn: 600 m. quay, depth: First 160 m., 8.5 m. Next 140 m., 7.5 m. Remaining 300 m., 6.5 m. – 6.75 m.
Sonderjyllandskajen: 250 m. quay, depth 11 m.

New Ro-Ro berth under construction. Length 140 m., width 55 m., depth 11.00 m. Max. LOA 130 m.
Oil Jetty I: "T"-head with breasting dolphins, depth 11 m.
Oil Jetty II: "T"-head with dolphins, depth 7.0 m.

For the port the mean water-level is 0.0. Extreme high water level is plus 1.5 m. and extreme low water is minus 1.4 m. due to strong North/Easterly gales and strong South/Westerly gales. There are no currents except in connection with the mentioned high and low water. The port can be entered day and night, and is generally open for navigation throughout the year and in case of ice-difficulties during Winter, state-owned icebreakers will keep the port open for navigation.
DENSITY: Average water density in port area 1015.
CRANES: 1 mobile crane – lifting capacity 36 tons.
1 mobile crane – lifting capacity 30 tons.
1 mobile crane – lifting capacity 23 tons.
2 front loaders.
1 fork lift – 4 tons capacity.
Tractors and similar modern machinery also available.
STEVEDORES: Stevedores arranged by Agent.
MEDICAL: 12 hours notice required to arrange for doctor to come on board. Hospital in Aabenraa.
TANKERS: Load/discharge connection 6 in. or 8 in. Also see "Berthing". Facilities for dirty ballast available.
FRESH WATER: Day and night from shore line, 25 t.p.h. – 30 t.p.h.
FUEL: All grades available by barge or truck. Minimum 24 hours notice.
CONSULS: German; Finnish; Norwegian; Swedish; British.
REPAIRS: All types of deck and engine repair are possible.
DRY DOCK: Shipyard with floating dock of 600 tons lifting capacity. Max LOA 53 m.
SURVEYORS: Lloyd's and N.V. available.
GANGWAY/DECK WATCHMAN: Can be arranged.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCES: See "General" before first port.
REPATRIATION: Facilities exist for effecting crew changes.
AIRPORT: Skrydstrup. Distance from airport is 25 km. Airport is served by regular airlines.
TIME: Local time is GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Dial "112".
TELEPHONES: Available for placing on board at the Sonderjyllandskajen.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Garbage disposal arranged with agent and port.
WASTE OIL DISPOSAL: Waste oil disposal by tanker truck, arranged with agent and port.
SEAMAN'S CLUBS: Aabenraa Somandshjem, Skibberoen 28, 6200 Aabenraa, Tel: 7462 7062. Facilities include restaurant, t.v. room, newspapers, pool, shop, telephone, currency exchange, library and laundry.
CURRENCY: Danish Kroner.
DELAYS: Normally no delay except during severe Winters due to ice between mid December and end March.
AUTHORITY: Aabenraa Port Authority, Havnekontoret, 25 Mellemvej, 6200 Aabenraa. *Tel:* (National) 74 622514, (International) 4574 622514. *FAX:* (National) 74 623143, (International) 4574 623143.
Contact: N.K. Kristiansen, Harbour Master.

AALBORG: 57.03 N. 09.55 E. (See Plan)

DOCUMENTS:
Ship's Register.
Load Line Certificate. (All vessels over 150 g.r.t.)
Road Safety Certificate.
Safety Equipment Certificate.
Derat Certificate or Exemption.
1 Crew List.
Stores List.
Crew Personal Effects List.
Cargo Manifest or Bills of Lading.
Oil Liability Insurance Certificate.
PILOTAGE: Pilotage is compulsory for the following:
(a) All tankers of 1,500 d.w.t. or more.
(b) Tankers of less than 1,500 d.w.t. which carry or having uncleaned tanks last containing ammonia or other hazardous liquid chemicals as listed in the Pilot Act of 4th August 1989.
(c) All LNG and LPG carriers.
(d) Vessels drawing 6.0 m. or more which pass through the dredged channel over Hals Bar.

Pilot may board at Hals Bar Roads in one of 4 different positions. Pilot station and Pilot boat equipped with VHF Channel 16.

The Western entrance at Logstor is only navigable in daylight for vessels under 3.8 m. draft.
ANCHORAGE: Anchoring inside the port area can only take place when permission has been granted by the Port Authorities. Permission can be requested on VHF Channel 16 or on Tel: 99301500.

RESTRICTIONS: The port is situated in the Limfjorden, 10 – 16 miles from entrance at Hals. Controlling factor is depth at Hals Bar of 10.4 m. at MLW.
MAX. SIZE: Max. draft for crossing Hals Bar 9.3 m.
Largest Vessel: 102,000 d.w.t., LOA 250 m. and max. draft 9.3 m.
HEALTH: Pratique granted by Customs Officers who bring Health Declaration for Masters to complete. In event of suspected disease or fever on board radio details to Agent before arrival.
RADIO: Radio stations to be used: Skagen and Lyngby, Port Authority, Pilot Station. Tugs and Bridges can be contacted on VHF Channel 16.
TUGS: Four tugs available from 250 h.p. to 2,000 h.p. Not compulsory.
BERTHING: There are both public and private quays in the port, with total length of public quayage of approximately 12 km. and private quayage approximately 1,100 m.

On the South side of the fjord are the private quays of Aalborg Portland Cement factory (APCF).

In the harbour basin (Quays No. 4010 – 4020) between the bridges, berths are for visiting pleasure craft.

Quays No. 4030 and 4040 are used for minor shipments of general cargo, and for calls by naval, cruise and other types of vessels.

Quay No. 4050 is used for naval, cruise and other types of vessels. It is also used as a waiting berth.

Part of Quay No. 4061 is used for discharging coal to the Nordjyllandsvaerket Aalborg Power Station. Quay No. 4062 and Quays No. 4070 – 4080 are used for grain and feedstuff.

Quays No. 4110, 4111, 4112 and 4113 are used for general cargo and bulk cargo.

Quay No. 4120 covers the Oil Harbour.

Also situated on the South side of the fjord, West of the railway bridge, are 2 yachting basins, and close by in Skudehavnen is a coaster basin. West of Skudehavnen, a small ferry connects the Isle of Egholm with the South side.

Situated on the North side of the fjord in the central port are Quays No. 3012, 3013, 3014, 3015, 3016 and 3017.

Quays No. 3012 and 3013 mainly used as waiting berths, whilst Quays No. 3014 – 3017 mainly used for handling grain, feedstuff and fertilisers.

At Lindholm, West of railway bridge, is a minor harbour, mainly used for small tankers.

Situated East of the central port, on the North side of the fjord, is a private quay used for vessels calling at the power plant Nordjyllandsvaerket Vendsyssel, accommodating vessels of 260 m. LOA with 33 m. beam. Water depth of 10.0 m. available.
East Harbour: The Port of Aalborg is currently being enlarged and developed in order to fulfill the requirements of a modern port. Most developments are taking place in the East Harbour, approximately 6 nautical miles East of the central port. The development plans involve an expansion from the present 2,200 m. of quay to quayage of more than 5,000 m.

Piers No. 1 and 2 are developed, each pier covering an area of around 500,000 sq.m.

Piers No. 3, 4 and 5 have been approved in the regional and municipal plans, and the development has commenced. Pier No. 3 is also approved in a local plan, which is the last stage in the planning procedures before actual establishment of the pier. Pier No. 3 is specially prepared to accommodate factories which are a long distance from its nearest neighbours.

The East Harbour has 620 m. of quayage for engineering and construction (the Great Belt East Bridge construction), for handling bulk cargo and for shipbuilding and repair (Danyard). A further 600 m. of quayage for Greenland trade and 850 m. for handling containers, frozen food and bulk.

The NTC (Nordjysk Transport Centre) is situated at Pier No. 2. The Centre offers the following facilities: Cargo storage, container freight station, reefer facilities, cool store, combi-terminal, rail centre, administration centre, transport logistics, hotel facilities and bunkering by truck.
Norresundby: Situated on the North side of the fjord is a yachting harbour, on the West side of the Limfjordsbridge. To the East side of the bridge is a general cargo quay, and quays for handling grain and feedstuffs, as well as quays for handling raw materials and fertiliser.

At Lindholm, West of Norresundby, is a small harbour, mainly used for small tankers.
Hals: At Hals, in the East entrance of the fjord, is a harbour mainly used for fishing vessels, coastal vessels and yachts, with a quayage of 1,080 m. The Limfjord East Pilot Station is situated at Hals.
Cruise Terminal: Berth for cruise vessels in the town centre, max. draft 8.0 m.
Container and Ro/Ro Facilities: The container terminal, covering approximately 55,000 sq.m., of which 40,000 sq.m. is paved and used for heavy loads. The terminal has 430 m. of quayage, and is equipped with 2 mobile cranes, with spreaders for container handling, of 52 tons and 45 tons respectively. Within the terminal area is a 1,000 sq.m. warehouse and a Ro/Ro ramp.

The Pier II, multi-terminal, in which the container terminal is situated, is additionally equipped with a 30 m. Ro/Ro ramp.
Bulk Cargo Facilities: All private piers and installations alongside quays are capable of loading and discharging bulk cargoes. Equipment includes a 19 ton capacity crane for bulk and general cargo.

The 620 m. long Bulk Terminal in the East Port, has a maximum discharging capacity of 8,000 tons/day.
Cranes and Elevators: Cargo handling facilities include 9 public cranes, of which 3 are mobile cranes with a lifting capacity of 52 tons, 45 tons and 18 tons. They operate in the East harbour area in addition to 6 private cranes. There are 3 private pneumatic elevators (60-150 t.p.h.) and 3 private grain loading pipes. Public cranes and operating crews may be hired, but loading and discharging is undertaken by private stevedoring companies, which have modern equipment, including a number of forklifts for handling containers.
Storage: Warehouse floor space of 110,000 sq.m.; silo capacity of 161,000 tons; cold storage of 84,000 sq.m.; oil tanks of approximately 900,000 cu.m. and coal storage of 473,000 tons.

BRIDGES: Two bascule bridges cross Western end of Aalborg harbour. Horizontal opening 30 m. Only vessels bound for Lindholm Pier are affected. The railway bridge can only be passed by ships over 800 g.r.t. or 80 m. in length with pilot on board.

Close South East of the power station is an overhead power cable (vertical clearance 47 m.) which spans the fjord.

STEVEDORES: *Working Hours:* Monday to Thursday 0700 hrs. – 0830 hrs., 0900 hrs. – 1200 hrs., 1230 hrs. – 1530 hrs. Friday 0700 hrs. – 0830 hrs., 0900 hrs. – 1200 hrs., 1230 hrs. – 1500 hrs. Overtime possible.

MEDICAL: Doctors, hospital facilities available.

TANKERS: 13 berths with lengths from 125 m. – 235 m. Maximum draft 9.3 m. Night berthing possible. Water, bunkers and slop tank facilities available.

FRESH WATER: Available at all berths.

FUEL: All grades available.

CONSULS:

Brazil	Tel.	(98)	13 12 33
Finland	″	″	13 30 33
France	″	″	18 16 66
Germany	″	″	12 56 33

Iceland	″	″	16 33 39
Netherlands	″	″	12 44 22
Norway	″	″	17 00 88
Spain	″	″	18 50 99
Sweden	″	″	13 36 66
United Kingdom	″	″	18 16 00

REPAIRS: Machinery repairs can be effected.

DRY DOCKS: One dry dock operated by Danyard.

DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally by crew with assistance of stevedores.

CUSTOMS ALLOWANCES: See "General" before first port.

REPATRIATION: Aalborg Soefarts Service (Seamen's Service).

AIRPORT: Situated 3 miles from town centre.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours (April – September).

HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Prayer Day; Ascension Day; Whit Monday; Christmas Day; Boxing Day. Half-holidays; May 1st, June 5th and December 24th.

POLICE/AMBULANCE/FIRE: Tel: 112

TELEPHONES: Installed by request at certain quays.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: When port fees paid, collection service is free of charge for small quantities, otherwise actual costs will be charged.

WASTE OIL DISPOSAL: When port fees paid, collection service is free of charge for small quantities (less than 8 cu.m.). When standard connection available on ship, otherwise actual costs will be charged. Notice to be given at least 24 hours before collection to be made.

SEAMAN'S CLUBS: Aalborg Sofartsservice, Snekkerstenvej 101, DK-9270 Klarup. Tel: 98317722.

CURRENCY: Danish Kroner.

GENERAL: *Weather:* During the Winter months, ice may occur, especially in the fjord, but even in severe Winters, the port is always kept open by local ice-breakers and powerful state ice-breakers.

Tides: Navigation conditions are good. The normal tidal range is 0.3 m., but Westerly gales may raise the water level by up to 1.3 m. above MSL, and prevailing strong Easterly winds may set level to 0.7 m. below MSL. Currents in the fjord are irregular.

DEVELOPMENTS: Aalborg has considerable areas under development for industry. In connection with this, preparations are being made for the building of new public harbour facilities. On the South bank of the fjord the Port Authority has available a 3.2 km stretch of coast with an area of approx. 206 hectares. This area is in connection with a new industrial and residential district of approx. 400 hectares. According to present plans approx. 7,000 m. of new quayage can be built here. Investments are estimated at 350 mill. Kr. Factories within the electronic and textile sectors are already established here and a continuous expansion goes on. On the site a special harbour with a quayage of 660 m. and depth 8.5 m. with facilities for unit load ships as well as conventional cargo ships, with warehouses and administration blocks, etc. was constructed as base port for the Royal Greenland Trade Department's routes calling at all ports in Greenland. Enterprises undertaking construction, repairs and maintenance of oil rigs etc., for offshore activities have also settled on this site. (See "Plan" – East Harbour).

Also see "Berthing" – "East Harbour".

AUTHORITY: Port of Aalborg Authority, Langerak 19, DK-9220 Aalborg Ost, Denmark. *Tel:* 0045-99301500. *Telex:* 69933. *FAX:* 0045-99301515. *Contact:* Svend Christensen, General Manager. Peter Petersen, Harbour Master.

AARHUS: 56.09 N. 10.13 E. (See Plan)

DOCUMENTS:

Ship's Register.
Derat Certificate.
Load Line Certificate (all vessels above 150 g.r.t.).
Radio and Equipment Safety Certificates.
Customs Clearance from last port.
Spirits and Tobacco List for ship and crew.

PILOTAGE: Harbour Pilotage only compulsory for:

(a) Tankers of 1,500 d.w.t. or above.
(b) Tankers loaded with inflammable liquids with flash point below 23°C.
(c) Tankers loaded with, or have unclean tanks which have recently contained, dangerous liquid chemicals listed in IMO's "Code for the construction and equipment of ships carrying dangerous chemicals in bulk", and
(d) Non gas-free gas tankers.

Exceptions for frequent callers.

Harbour Pilot boards 1-2 miles outside port.

Larger vessels usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to "Danpilot, Region Skagen", at least 12 hours in advance. Skawpilot listening on VHF Channel 16.

Vessels leaving harbour or changing berth should report at least 15 minutes in advance, to the Pilot Station on Channel 16. If the movement is delayed, a further report should be sent 10 minutes in advance.

ANCHORAGE: Anchorage in roads – good holding ground. Nature of bottom: clay.

RESTRICTIONS: No restrictions. Night entry permitted. Also see "General" before first port.

MAX. SIZE: *Draft:* Oil port 10.5 m. General cargo port up to 9.5 m. Container terminal up to 10.5 m. Eastern Division 13.0 m. Bulk Terminal 13.0 m. No tide.

HEALTH: Necessary formalities carried out by Customs on arrival.

RADIO: Radio stations to be used: Skagen and Lyngby. Pilot station and tugs can be contacted on VHF Channel 16.

TUGS: 2 Tugs stationed at the port. Additional tugs available from outside.

CARGO HANDLING FACILITIES: 7 cranes for coal, fertilisers, sulphur, ore, etc., and 6 cranes up to 5 tons.

Container Terminal: Max. depth of water 11 m. Total quay length 816 m. 4 gantry container cranes up to 40 tons. Fork lifts up to 40 tons.

Multi-Terminal: Quay length 1,000 m., depth 13.5 m. Facilities for bulk, break bulk, container and Ro/Ro cargoes. 1×50 tonne crane. 5 multi-purpose cranes (35 tonnes on hook and 12 tonnes on grab).

Roll-on/Roll-off: 1 movable and 4 solid Roll-on/Roll-off berths. Forklifts up to 40 tons. Several berths for liquid chemicals and LPG carriers.

Bulk Cranes: Bulk Terminal: Length 450 m., depth 13.5 m. 2 gantry cranes, combined capacity 1,000 t.p.h.

Private Suction Plants, etc.: 4 grain suction plants, capacities of 60 – 100 t.p.h. 1 grain elevator, capacity of 35 t.p.h. 4 grain loading pipes. 6 cup elevators for copra and soya beans (80 t.p.h. each). 4 suction elevators for copra and soya beans (125 t.p.h. each). 1 loading pipe for copra and soya beans.

STEVEDORES:

Aarhus Stevedore Company: Stevedoring is carried out by cooperation between the individual brokers/agents and Aarhus Stevedore Company.

Round-the-clock service is available every day including Saturdays, Sundays and most holidays.

Standard hours:

Mondays	0700 - 1630
Tuesdays-Fridays	0700 - 1600

Container Terminal:

Mondays-Fridays	0700 - 1730

Work outside standard hours may be carried out against overtime pay. (The basis of the above information is a 37-hour standard working week.)

Aarhus Stevedore Company has all kinds of modern equipment at its disposal, including:

17 front loaders, } All equipped with automatic spreaders for
2 container stackers. } full and empty containers.
21 tugmasters with 11 goose-necks.
56 terminal vans, 9×20 ft. and 47×40 ft.
22 fork lift trucks, capacity from 2.5 tons to 30 tons.
7 loaders.

Special gear for handling different kinds of cargo, e.g. bulk cargo, paper, timber, project cargo and cars, etc. also available.

Thor Jorgensen A/S: Situated at Pier No. 4, Quay 85.

There is a 5,000 sq.m. warehouse/CFS in the area, also 96 reefer sockets and cleaning facilities, etc., are available and a total loading/discharging service is offered in connection with containers and break-bulk cargo. Terminal chassis, tugmasters, contchamps, forklifts available for handling cargo, etc.

MEDICAL: All medical services possible. Call Pilots if medical attendance required on board.

TANKERS: Discharge lines: 4 in., 6 in., 8 in., 10 in. and 12 in. Quay 201 – 203, max. oil discharging 1,200 cu.m./hr. Quay 202 and 124, 1,000 cu.m./hr., and Quay 120, 800 cu.m./hr. Berth 313 depth 12.0 m.

FRESH WATER: Shore installations at most berths.

FUEL: All grades available.

FIRE PRECAUTIONS: Tankers discharging: Fire watch. Special harbour fire fighting on tugs.

REPAIRS: Most repairs and overhauls possible.

DRY DOCKS: Aarhus Dry Dock. The shipyard possesses a large repair section and specialises, among other things, in extending ships and in undertaking comprehensive re-building. But all kinds of ships' repairs and overhauls of machinery are performed in its modern workshops. It employs a staff of 500–600, and it has recently invested in new cranes, floating docks, and workshops.

Dock No. 1 has a lifting capacity of 19,000 tons. Dock size – 190 m. × 25 m.

Dock No. 2 has a lifting capacity of 4,000 tons. Dock size – 110 m.×22.8 m.

There is also one minor slipway in the Port of Aarhus, and the city has numerous service workshops.

CONSULS:

Belgium	Tel: 86.19.15.00	Japan	Tel: 86.12.58.55
Brazil	86.11.79.11	Netherlands	86.13.18.55

Iceland	86.78.40.00		

DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Normally by crew with assistance of stevedores.

REPATRIATION: Aarhus Sofarts Service. Tel: 86.19.13.33.

AIRPORT: 32 km. from port.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summertime (April to October).

HOLIDAYS: New Year's Day, Maundy Thursday, Good Friday, Easter Monday, Prayer Day (fourth Friday after Easter), Ascencion Day, Whit Monday, Constitution Day, Christmas Day, Boxing Day.

POLICE/AMBULANCE/FIRE: Tel: 112.

TELEPHONES: At several piers.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Ordinary garbage from ships may be disposed of free of charge in garbage containers placed throughout the harbour. Harmful or dangerous waste must not be placed in these containers. Disposal of such waste and of large quantities of garbage must be arranged with the Vessel Traffic Service, VHF Channel 16, Tel: 86.133266.

WASTE OIL DISPOSAL: Large quantities are received at Berth No.122, shore tank capacity 2,000 cu.m. Small and reasonable quantities are collected at ship's berths free of charge. Contact Vessel Traffic Service, VHF Channel 16, Tel: 86.133266.

SEAMAN'S CLUBS: International Seaman's Club, Sverigesgade 1, 8000 Aarhus. Tel: 86.121599. Fax: 86.131652.

Facilities include international telephone service, postage, church services, football matches and other sports.

CURRENCY: Danish Kroner (DKr.). No currency restrictions.

AUTHORITY: Port of Aarhus Authority, P.O. Box 130, Mindet 2, DK-8100 Aarhus C, Denmark. *Tel:* 45.86.133266. International + 45.86.13.32.66. *FAX:* 45.86.127662. *Contact:* Harbour Master.

AEROSKOBING: 54.54 N. 10.25 E. (See Plan)

DOCUMENTS: See "Copenhagen".

PILOTAGE: Contact using VHF Channel 16, Tel: (62) 521253.

MAX. SIZE: Length 80 m., beam 17 m., draft 4.5 m.

HEALTH: See "Copenhagen".

RADIO: Lyngby Radio OXZ.

VHF: Harbour Master/Pilot on Channels 16 and 12.

TUGS: Not compulsory, pilot boat assists if necessary. Larger tugs can be ordered on request.

BERTHING: 3 berths available.

CRANES: 1 mobile crane available.

STEVEDORES: Ordered by Agents.

MEDICAL: Doctors and hospital facilities available.

FRESH WATER: Available.

FUEL: Available.

FIRE PRECAUTIONS: Normal fire precautions.

CONSULS: None.

REPAIRS: All repairs possible.

DRY DOCKS: None, however there is one slipway for vessels up to 50 m. × 10 m.

GANGWAY/DECK WATCHMEN: Not necessary.

HATCHES: Opening/closing carried out by crew.

AIRPORT: Local airport 9 km. away, with private connections to Copenhagen. Nearest commercial airport at Odense.

TIME: GMT plus 1 hour; Summertime (March – September) GMT plus 2 hours.

HOLIDAYS: Normal Danish holidays.

POLICE/AMBULANCE/FIRE: Dial 112.

BANKS: Den Danske Bank.

STORING: By truck alongside.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Not required.

AUTHORITY: L. Andersen, Harbour Master. *Tel:* 45-62-521253.

AGENT: W. Nielsen & Co., P.O.Box 20, DK-5970 Aeroskobing, Denmark. Tel: 45-62-521150. Telex: 50583. Fax: 45-62-521120. Cables: Williamco.

ASNAES (Asnaes Power Station, Kalundborg): 55.40 N. 11.05 E. (See Plan)

PORT LIMITS: When boarded by Harbour Pilot at the Firth of Kalundborg; or when at anchorage at the Firth waiting for berth.

DOCUMENTS:

Ship's Register.
Load Line Certificate.
Safety Radio and Safety Equipment Certificates.
Safety Equipment Certificate.
Derat or Exemption Certificate.
Construction Certificate.
Certificate of Insurance or other financial security in respect of civil liability for oil pollution damage.
2 Crew Lists.
Certificate of Origin (T2L. EUR).
Tobacco and Spirit List covering all goods on board belonging to crew, officers, Master, ship's bar or passengers.
Cargo Manifest or Bill of Lading.

PILOTAGE: A Harbour Pilot must be used for ships calling at the pier, except ships less than 5,000 d.w.t. on which the Master has called at the pier 5 times on the same vessel within the last 6 months. Harbour Pilot boards at entrance of Kalundborg Firth; bigger ships usually take Pilot at Skaw Pilot Station about 130 miles from Kalundborg. Skaw Pilot ("Danpilot") as well as Harbour Pilots listening on VHF Channel 16. Kalundborg Pilot Station Tel: 53510200.

Pilots to be ordered by ETA–telegram to Agents at least 24 hours in advance.

ANCHORAGE: Anchorage is 4-5 miles W.N.W. of oil pier.

Lightening: According to Order No. 472 of 21st September 1978 by the Ministry of Commerce, lightening of tankers and bulk carriers must only take place at position Lat. 55° 42' N., Long. 10° 59.8' E., and within a radius of 300 m. When tankers lighten in Kalundborg Fiord, other vessels must pass the area with caution and at slow speed.

RESTRICTIONS: No entry restrictions; arrival day and night and no tide with normal winds. Also see "General" before first port.

Navigation Restrictions: The harbour is closed to traffic when the wind speed exceeds 20 m./sec., or the visibility does not exceed one ship's length.

When the wind speed is between 15 m./sec. and 20 m./sec., and the wind direction is between S.W. and North, the Inspector together with the Master/Pilot will every time evaluate whether arrival/departure can take place safely, if more tugs shall be used or the ship must wait for an improvement in the weather.

MAX. SIZE: Oil Berth: Depth alongside: 9.5 m.

Old Coal Berth: Depth alongside: 9.5 m. Length of quay: 285 m. New Coal Berth: Depth alongside: 13 m. Length of quay: 216 m. However, vessels with length of 290 m. acceptable as there are dolphins between the Oil Berth and the New Coal Berth.

Ash Berth: Depth alongside: 7.7 m.

HEALTH: No special restrictions as to Free Pratique, which will be granted by authorities on arrival.

RADIO: Lyngby Radio.

Pre-Arrival Information: For all ships, the Master is requested via the ship's Agent to inform Asnaes Power Station of ETA according to Charter Party or contract.

For all ships the ETA shall contain the following information:

Name of the ship and call sign.
Flag.
D.w.t. and g.r.t. of the ship.
Arrival draft (fore and aft).
Departure draft (fore and aft).
Quantity of ballast/slops to be discharged and expected time for discharging.
Quantity of cargo.
Names of the loading ports.

VHF: Channel 16 to Pilot Station (also Skaw Pilot).

Vessel to call Agent when 5 miles from the port to confirm ETA.

BERTHING:

Pier/Berth		*Coal Pier*	*Oil*	*Coal*	*Ash*	*Gypsum*
Water depth	(m.)	13.5	9.5 **	9.5	7.7	9.5
Tide max./min.	(m.)	±0.5	±0.5	±0.5	±0.5	±0.5

Branch pipe outlet		4×8 in.	2×8 in.			
Max. pressure manifold	bar	10.5	10.5			

* Only when discharging coal.

** Check with Harbour Pilot.

RADAR: No radar installations.

TUGS: At Firth of Kalundborg – 2/3 miles from port – ships' lines to be used. Pilot decides number and size of tugs.

BULK HANDLINGFACILITIES: Also see "Berthing".
Product types: All types of coal, fly ash and gypsum.

Before receipt of cargo, a complete calculation will be made. The Asnaes Power Station normally use an independent survey company to do the draft survey and sampling. For smaller vessels, the internal inspectors from Asnaes Power Station do the surveys. If the loss of cargo is more than 0.5%, the internal inspector will call an independent surveyor.

Before discharge/loading, the Officer-in-charge must sign a document with the following regulations:

Grab damage must be reported when possible to the discharge foreman.
Air draft (See "Plan").
Always keep discharge foreman informed about any irregularities.

STEVEDORES: Private stevedores to be ordered through receivers – coal discharge rate: about 700 t.p.h.

New Coal Berth: Discharge rate about 1,500 t.p.h. (average).

MEDICAL: All medical and hospital facilities available. No advance notice necessary.

TANKERS: 2 discharge hoses (a possibility of 3) of 8 in. each. Average discharge rate 3,000 t.p.h., max. back pressure 10 kg./sq.cm. Loading rate 60 t.p.h. – 1,000 t.p.h. Discharge of dirty ballast from fuel oil and gas oil tankers. Oil spills to be handled by Fire Brigade and Police. Also see "Berthing".
Cargo Handling (Oil Products): Product types: Heavy fuel oil and orimulsion (emulsion of bitumen and 30% water).

Before receipt of cargo, a complete calculation of the cargo will be made. An average sampling of all cargo tanks will be made.

Measurement of ullage will be made to the nearest mm.

Temperature measurement will be made electronically. Top, middle and bottom temperatures shall be recorded for all cargo tanks and an average for each cargo tank has to be reported to Asnaes Power Station.

Any tank or hatch measurements shall be corrected for trim.

If the increase in ROB is more than 0.1% of the Bill of Lading, samples will be taken of the tanks that contain the greatest proportion of ROB for later reference. The ship is expected to do its utmost to drain ship tanks and pipe system satisfactorily.

Ships experience factors will be calculated. This factor will be used to calculate the final outturn (Only for Orimulsion cargoes).

Asnaes Power Station normally uses an independent inspector for sampling, gauging and tank inspection.

Before discharging Orimulsion, doing some lab tests is necessary. Time used for lab tests is usually 3-4 hours.

The following documents are to be handed over to Asnaes Power Station before discharging:

Tank Inspection Certificate, after discharge/before loading.
Bill of Lading.
Certificate of Quantity.
Certificate of Analysis.
Ullage Report from loading port.
Ullage Report upon arrival.
Sealed samples from loading port.
Copy of any Protest issued to Loading Terminal.

The following documents will be handed over after loading:

Bill of Lading.
Certificate of Analysis.
Statements of Facts.

Discharging/Loading Regulations: Procedures for an emergency stop shall be agreed before any operation. The manning needed is at least one man in the control room near the emergency stop buttons, and one man near the manifold. For communications, they shall use the vessel's internal radio system (VHF). For small ships with stop buttons on deck, the manning can be reduced to one man.

It is not allowed to operate across another vessel.

It is not allowed to load through tank hatches. The discharging/loading system must always be used.

All tank hatches must be kept closed and all bearing holes must be protected by metal wire screens. Hatches and screens must only be removed for bearing and sampling.

Loading rates must be in accordance with the tank venting system.

All flange connection systems must be equipped with the correct size and full number of bolts, exceptions from this rule can only be granted by the inspector.

Drip trays shall be placed under all hose connections.

Always keep the discharge foreman informed about any irregularities.

Tank Inspection: Before loading, vessel's cargo tanks are to be inspected for water, impurities and foreign matter by the pier personnel or an independent inspection company.

All valves in the cargo system must be open during the inspection to check the lines are empty.

The inspection shall be made from the deck through hatches or sounding holes by using torches or mirrors.

Pier personnel are not allowed to enter the ship's tanks without special permission from the inspector or his deputy.

Entry Permit: When an independent surveyor wishes to enter a ship's cargo tanks for approval of these, it is the duty of the responsible ship's officer and the inspector to ensure that the appropriate procedures are followed, to ensure the safety of the personnel concerned. An entry permit must be issued.

Tank Cleaning and Gas Freeing: Tank cleaning and gas freeing are not permitted at the pier.

Loading Speed: If the ship is gas-free on arrival, the loading speed will normally be about 600-1,300 cu.m./hr. Initial loading rates to each tank must not exceed 1 m./sec. to avoid turbulence and splashing.

BALLAST: *Ballast and Slop Handling:* Ballast shall be discharged to ballast tanks ashore, except clean ballast water from segregated tanks. Ballast water from Sigsnaes Power Station and from other places with fish farms is not allowed to be discharged to the sea at Asnaes Power Station.

The ballast tank ashore can hold 2×3,800 cu.m., usually there is about 1,500 cu.m. available.

During the ship's stay at the pier, all sea and overboard valves that have connections to the loading system must be closed and sealed. The seal must only be broken in concert with the inspector.

When loading ballast at the pier, the sea valves must not be opened before the pumps are running.

The danger by ballasting in non-gas-free tanks is important. Look out for gas concentrations as well on the ship as on the pier and reduce the ballast loading if necessary.

It is important that all ships, which are to pump ballast water ashore, inform the inspector via the ship's Agent of the quantity of ballast/cleaning water to be pumped ashore and the expected pumping time, and type of last cargo.

Ballast/cleaning water will only be accepted from ships calling at the pier for loading/discharging. Exceptions from this rule can only be obtained from the management of Asnaes Power Station.

Asnaes Power Station cannot accept ballast/cleaning water containing chemicals, coal tar oil or similar products that may contain phenol.
Sampling of Ballast Water: Samples will be taken from all ballast/tank cleaning water being pumped to the ballast tank at Asnaes Power Station. The sample will be taken before discharging. The sample will be marked with the name of the ship, arrival number and quantity discharged.

When taking a sample, a visual check will be made. If the sample appears red toned, the water can be contaminated with phenol, and all operations should be stopped until analysis has determined that is was not phenol contamination.

DENSITY: Brackish 1006 – 1021. Normal about 1011.
FRESH WATER: Available by pipeline at the berth. Rate 7 t.p.h.
FUEL: Available by barge or truck.
CONSULS: Swedish and Norwegian at Kalundborg. Others at Copenhagen.
REPAIRS: All types of smaller repairs can be carried out.
DRY DOCKS: No dry dock available.
SURVEYORS: Caleb Brett and SGS have local offices in Kalundborg. Saybolt have an office in Copenhagen.
GANGWAY/DECK WATCHMEN: Recommended.
HATCHES: Opening/closing hatches to be carried out by crew.
CUSTOMS ALLOWANCES: See "General" before first port.
REPATRIATION: All repatriation can be arranged normally via Copenhagen 100 km. from Kalundborg.
AIRPORT: Nearest at Copenhagen (100 Km.).
TIME: GMT plus 1 hour (from Late September – Late March). GMT plus 2 hours (from Late March – Late September).
HOLIDAYS: Saturday/Sunday normally no work, also no work on holidays declared as official Danish holidays.
POLICE/AMBULANCE/FIRE: 1-1-2 all alarms.
EMERGENCY CO-ORDINATION CENTRE:
Radio: VHF Channel 16 Lyngby Radio – will contact the Authorities involved.
TELEPHONES: A pay-telephone for international calls is installed at the main gate.
SERVICES: No tank-cleaning facilities; all other services to ships can be arranged via Agent. Discharge of dirty water/oil can be arranged.
BANKS: Unibank A/S, DK-1786 Copenhagen K. Telex: 27543 UNIB DK.

A/S Den Danske Bank, Holmens Kanal 12, 1092 Copenhagen K. Telex: 15880 DDBFX DK.

Privatbanken A/S, Boersgade 4, 1215 Copenhagen K. Telex: 27196 PRIVCO DK.

STORING: See "Prelims".
1. Vessel can be stored from barge and truck.
2. No restrictions – can be stored during discharging.
3. Trucks can proceed alongside.
4. Fork lift trucks can be used on the Jetty.
5. No special customs' regulations except: spirits and tobacco, and other goods under bond to be declared to Customs before unloading/loading.
6. Local riggers can be employed.

SHORE LEAVE: No restrictions for shore leave.
OIL/WASTE DISPOSAL: Special waste containers are placed on the Coal Pier/Oil Pier and the Oil Wharf. Chemical and oily waste must be placed in the yellow container or in drums and deposited next to the waste container. If the ship wants to dispose of a larger amount of oily or chemical waste, a request must be given in advance through the Agent who can advise the cost.

Ships that do not respect the separation of waste will be charged for the expense of separation.
Sanitary Measures: If the ship wants to pump sewage ashore, it must contact the ship's Agent, as ships are not allowed to flush out toilets or bathing water.
IDENTIFICATION CARDS: Shore passes necessary.
AUTHORITY: *Owners of the Port:* SK Power, Strandvejen 102, DK-2900 Hellerup, Denmark. *Tel:* 39473947. *Telex:* 35158. *FAX:* 31-612888.
Port Authority: Asnaes Power Station, Asnaesvej 16, DK-4400 Kalundborg, Denmark. *Tel:* 53-511500. *FAX:* 53-515004. *Contact:* Arne Krogh.

ASSENS: 55.15 N. 09.53 E. (See Plan)

LOCATION: On West side of Funen in Little Belt. Open all year except in severe weather when Little Belt may be frozen.

DOCUMENTS:

Customs Declaration for Ships, Form G25.
Maritime Declaration of Health, Z2 Ln 00-146.
Master's Declaration, Arrival, P650-010 (3/79).
Ice-Breaker Dues, Form G92 (only from 15th December – 31st March).
Crew List.

All Forms can be obtained from the Agent.

PILOTAGE: Not compulsory. Pilot requires 4 hours' notice. Pilot boarding points are 1 – 2 miles North or South of Assens. If necessary, Pilot can board in Little Belt.

ANCHORAGES: In the Roads North of Assens and S.W. of Assens.

MAX. SIZE: Vessels up to 130 m. LOA, max. draft 7 m. and max. beam 20 m. No tides.

RADIO: Lyngby Radio (OXZ).

VHF: There is a VHF station at the Pilot Station, Channel 16.

RADAR: There is radar in the tug used by the Pilot.

TUGS: There is a small tug, for larger tugs 6 hours' notice to be given. Ship's lines are used.

BERTHING: Loading/discharging normally takes place in the Northern Basin, depth 7 m., which is served by railway. The total length of quays is 400 m., made up of 100 m. on the North side, 170 m. on the East side and 130 m. on the South Side.

CRANES: 2 mobile cranes 32 tons, 1 mobile crane 24 tons and 1 mobile crane 8 tons capacity.

STEVEDORES: Working hours 0700 – 1530, Monday to Friday. Overtime by arrangement.

MEDICAL: Full hospital facilities available without prior notice.

FRESH WATER: Good quality potable water available in unlimited quantities.

FUEL: Can be delivered, if sufficient notice given.

REPAIRS: Most types of repairs can be undertaken at the shipyard.

DRY DOCKS: One floating dock for ships up to 1,350 tons, max. length 80 m. and 15 m. beam. and 1 dock for ships up to 1,200 tons, max. length 80 m. and 15 m. beam.

GANGWAY/DECK WATCHMEN: Not necessary.

HATCHES: Opening/closing done by crew.

CUSTOMS ALLOWANCES: See "General" before first port.

AIRPORT: Odense, 50 km. away. Daily connections to Copenhagen.

TIME: GMT plus 1 hour; Summertime GMT plus 2 hours from March to September.

HOLIDAYS: Usual Danish holidays.

POLICE/AMBULANCE/FIRE: Dial 112.

TELEPHONES: Available aboard vessels.

STORING: See "Prelims".

1. Vessels can be stored by truck.
3. Yes.
4. Yes.

SHORE LEAVE: Permitted.

DELAYS: Normally no delays.

AUTHORITY: Assens Havn, Harbour Office, Ndr. Havnevej 21, DK-5610 Assens, Denmark. *Tel:* (64) 713165-713580. *Contact:* N. Hald-Andersen, Harbour Master.

AGENT: A. Fage-Pedersen A/S, Ndr. Havnevej 12, DK-5610 Assens, Denmark. Tel: 64-711200. Telex: 50301 (Fage DK). Cables: Shipping. Fax: (45) 64-711255.

BANDHOLM: 54.50 N. 11.30 E. (See Plan)

DOCUMENTS:

1 Crew List.
1 Passenger List.
1 Stores List.
1 Manifest or Bill of Lading.

PILOTAGE: Not compulsory. Pilot boards vessel at Sea Buoy off Vejroe from pilot vessel, hull painted orange and "Pilot" on each side of the hull. Pilot ordered through Agent, telephone 53888011 four hours prior arrival at Sea Buoy. VHF Channel 16. Telephone number of Pilot Station 54704975/54704152 day/night.

ANCHORAGE: Near Sea Buoy off Vejroe.

RESTRICTIONS: See "General" before first port.

MAX. SIZE: Length 120 m. (approx.) depending on draft. Depth of water 5.5 m.

HEALTH: Normal quarantine rules.

RADIO: Lyngby Radio or Kiel Radio.

TUGS: None.

BERTHING: Sheltered harbour with 570 m. of stone quays available and easily accessible. Depth of water at entrance 5.50 m. Depth at West quays, 4.4 m. At East quay 232 m. there is 5.8 m. average depth. Mobile crane to discharge 100 – 125 t.p.h. with grab. Average daily rates: Coal and coke 800 – 1,000 tons. Grain elevator at East quay, loading capacity 120 t.p.h. storage capacity 25,000 tons. Grain elevator at West quay, loading capacity approximately 140 t.p.h. Storage capacity 20,000 tons.

At North Quay, length 102.8 m., depth 4.4 m., there is a new warehouse available for grain, fertilisers, etc. with a capacity of about 10,000 tons.

STEVEDORES: Ordered by Agent. Working hours Monday to Thursday from 0700 hrs. daily to 1530 hrs., Friday 0700 hrs. – 1500 hrs. Saturday no work.

MEDICAL: Doctors, hospital facilities available.

FRESH WATER: Supplied from quay installations.

FUEL: Available.

REPAIRS: Small deck and engine repairs possible.

OPENING/CLOSING HATCHES: Carried out by crew.

GANGWAY/DECK WATCHMEN: Not necessary.

CUSTOMS ALLOWANCES: See "General" before first port.

AIRPORT: Maribo Airport, 15 km. away. Copenhagen Airport 150 km. away.

TIME: GMT plus 1 hour.

HOLIDAYS: See "Copenhagen".

POLICE/AMBULANCE/FIRE: Dial 112 and ask for Police, Ambulance or Fire Brigade.

TELEPHONE: Not available on board vessels.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Service available through Agent.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Danish Kroner (DKr.).

GENERAL: Tide normally 1 ft.

AUTHORITY: Knuthenborg Godskontor, Birketvej 1, DK-4941 Bandholm, Denmark. *Tel:* (45) 53-88 80 89. *Telex:* 40256 hoban dk. *FAX:* (45) 53 88 84 58.

AGENT: Alfr. Hovmand, Shipbroker, Havnepladsen 6, DK-4941 Bandholm, Denmark. Tel: +45-53888011. Telex: 40256 Hoban Dk. Fax: +45-54763611. Cables: "Hovmandship, Bandholm".

COPENHAGEN: 55.42 N. 12.37 E. (See Plan)

DOCUMENTS:

1 Crew List.
2 Passenger Lists.
1 List giving stock of stores and provisions.

Customs Officers bring form to be signed by Master indicating that no epidemic diseases are on board. Formal Bill of Health signed by Danish Consul in port of departure is not necessary.

ARRIVAL: Before a vessel enters the port, its national flag shall be hoisted and the anchors shall be ready to drop. If the vessel is to pass any of the bridges or the lock, outboard davits, etc. shall be taken in.

All vessels shall notify their entry, departure or shifting (of berth) in advance and in ample time to the Port of Copenhagen's Traffic Control Centre by telephone 45 33 47 99 99 or by calling via VHF, Channels 12 or 16. When making such notification, the vessel's name, port of registration and the location from which it is to come or to which it is to sail shall be declared.

Passage through the Port of Copenhagen is forbidden, under the penalty of a fine – cf. Section 70 of these Regulations – to vessels which are not to discharge and load in the port, unless the vessels can pass under both Knippelsbro and Langebro without opening (i.e. raising) of these bridges.

PILOTAGE: Telegr. address: Soundpilot-Copenhagen. Fax: 35431017. Tel: 31386700. Pilotage not compulsory. ETA minimum 6 hours and confirm 1 hour before arrival. VHF Channel 16. Pilot boats painted red. "Pilot" painted in white on side. Pilot flag "G" (white light) – VHF. Pilot comes on board at Middelgrund Fort (Pilot for Drogden at the same place). Pilot boards by ship's ladder.

Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to Danpilot, Region Skagen, at least 12 hours in advance. Danpilot listening on VHF Channel 16.

ANCHORAGE: Depth 11 m., 1 mile North of Middelgrund Fort.

RESTRICTIONS: See "General" before first port.

MAX. SIZE: Limited by draft only. Depths in the port, 10 m.; in the Oil Harbour, 10.5 m.; at the Oil Pier (Berths No.842, 843 and 844), 12.0 m.

HEALTH: See "Documents". If fear of suspected disease or fever: yellow flag – VHF.

RADIO: Lyngby Radio: OXZ. VHF Channel 16 to all installations. ETA cables to Agents and receivers, preferably by Lyngby Radio.

RADAR/VHF: No port radar. VHF Channel 16.

TUGS: Towage not compulsory. Tugs join ships at entrance to port. Ship's hawsers only.

Also see "Tankers".

*Please note that the minimum and maximum lengths of the quays are not directly related to the depths shown. The depths are the minimum and maximum depths in the relevant harbours.

BRIDGES: Larger ships must take Pilot and tugs to pass the bridges down to the South Harbour.

The Knippelsbro and Langebro will be closed for passage as follows:

	Knippelsbro/Langebro
Monday – Friday	0000 – 0550 hrs.
	0615 – 0655 hrs.
	0735 – 0900 hrs.
	1500 – 1800 hrs.
Saturday	0000 – 0655 hrs.
	0735 – 0900 hrs.
	1200 – 1230 hrs.
	1300 – 1330 hrs.
	1800 – 2400 hrs.
Sundays and Holidays	0000 – 0800 hrs.
	1200 – 1800 hrs.
	2000 – 2400 hrs.
Constitution Day 5th June	1200 – 1300 hrs.
Christmas Eve 24th December and New Year's Eve 31st December	1800 – 2400 hrs.

CONTAINER TERMINAL: At the Levant Quay in the free port. Quay length 500 m., depth alongside 10 m. 2 Container cranes capacity 32 tons. Horizontal handling by straddle carriers and a number of front loaders.

STEVEDORES: ETA earliest possible by VHF and not later than noon on the day before loading or discharging is intended to be commenced.

MEDICAL: No advance notice necessary. Hospitals available.

TANKERS: 10/12 berths according to size.

Provestens Oil Harbour:

Depth at Quay 1:	10.5 m.
Quay 2:	9.1 – 10.5 m.
Quay 3:	6.0 – 9.1 m.
Quay 4:	9.1 – 10.5 m.
Quay 5:	10.5 m.
Oil Pier North:	6.0 m.
Oil Pier East:	12.0 m.

Length and beam unimportant. Slop barge available.

FRESH WATER: From quay or water boat.

FUEL: All grades available. At bunker station, no notice required, delivery 24 hours a day. By lighter in port or in roads; 10 hours notice preferred.

FIRE PRECAUTIONS: Ready hawsers fore and aft. No engine repairs.

CONSULS: The following countries are represented.

Argentina
Australia
Austria
Belgium
Bolivia
Brazil
Bulgaria
Burkina Faso
Canada
Chile
China
Colombia
Costa Rica
Cuba

REPAIRS: All types of repairs possible.

GANGWAY/DECK WATCHMEN: Deemed unnecessary.

OPENING/CLOSING HATCHES: To be opened by ship's crew.

CERTIFICATES: To be on board:

Ship's Register.
Radio Safety Certificate.
Safety Equipment Certificate.
International Load Line Certificate.
Derat Certificate.

CUSTOMS ALLOWANCES: See "General" before first port.

REPATRIATION: Facilities exist for changing crew and arranging any necessary repatriation.

AIRPORT: 6 miles from centre. Direct lines for all parts of the world.

TIME: GMT plus 1 hour.

HOLIDAYS: New Year's Day (January 1st); Maundy Thursday; Good Friday; Easter Monday; Prayer Day; Ascension Day; Whit Monday; Christmas Day (December 25th); Boxing Day (December 26th).

Half Holidays: Labour Day (May 1st); Constitution Day (June 5th); Christmas Eve (December 24th).

Working Hours: 0700 – 1630 with 2 half-hour meal breaks.

Overtime work on Saturday and Sunday should be ordered by 1130 hrs. on Friday.

The working hours vary slightly from port to port as some start at 0730 and others at 0800 hrs., but a 42.5 hour week is common to all.

POLICE/AMBULANCE/FIRE: Call "112".

TELEPHONES: In many berths telephones can be placed on board ships.

SERVICES: All services available (tank cleaning, discharge of tank washings, compass adjusting etc.).

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not necessary except in Oil Harbour, where the Port Authority deliver the cards.

GENERAL: Customs Authorities supervision of ship's provisions and bonded stores is carried out in the Free Port in the same way as in Customs Port. In this connection the Free Port is not a Free Port.

AUTHORITY: Port of Copenhagen Authority, P.O.Box 2083, Nordre Toldbod 7, DK-1013 Copenhagen K, Denmark. *Tel:* 45 33 14 43 40. *Telex:* 15439. *FAX:* 45 33 93 23 40. *Cables:* "Copenport". *Contact:* Erik Schafer, General Manager. Erik Lober, Port Captain.

ENSTED: 55.01 N. 09.26 E. (See Plan)

Also refer to "Aabenraa".

DOCUMENTS: See "Aabenraa".

PILOTAGE: See "Aabenraa".

ANCHORAGES: See "Aabenraa".

HEALTH: In event of disease or fever on board, vessel's Agent to be informed before arrival.

RADIO: Blaavand or Lyngby Radio.

TUGS: Large vessels may require towage assistance on entering and leaving Ensted Harbour. 24 hours notice is required to call a Svitzer tug.

VHF: Pilot on Channels 12 and 16.

BERTHING:

Oil Terminal:

Oil Pier (Berth No. 1):

Length overall	350 m.
Beam	No limits
Water depth	18 m.
Bow/centre	165 m.
Max. height water-level/manifold	26.5 m.
Load/discharge line	2×16 in.
Capacity (each line)	2,500 cu.m./hr.

Oil Pier (Berth No. 2):

Length overall	350 m.
Beam	No limits
Water depth	15.5 m.
Bow/centre	165 m.
Max. height water-level/manifold	17.0 m.
Load/discharge line	2×12 in.
Capacity (each line)	1,000 cu.m./hr.

Coal Terminal: Largest vessels which can be accommodated at the Deep Sea Coal Berth:

Max. Length Overall	350 m.
Max. Beam	No restriction.
Water Depth	18 m.
Discharging facilities for coal	1×40 ton unloading crane and 1× continuous unloader (1,550 cu.m./hour)
Total outturn/24 hours	40,000 tonnes
Height from water level to hatch coaming	20 m.
Outlay of cranes from quay side to centre grab	38 m.
Max. distance between centre of cranes (grabs)	285 m.

STEVEDORES: To be informed by Agent.

DENSITY: 1015.

MEDICAL: A few hours notice required to arrange for doctor to come on board. Hospital in Aabenraa.

TANKERS: See "Berthing".

TIDE: No tide – arriving and sailing day and night.

FRESH WATER: Fresh water from shore line 5 t.p.h.
FUEL: Available by barge or truck.
CONSULS: Norway, Germany, Finland, Sweden and United Kingdom.
REPAIRS: All types of deck and engine repairs are possible.
OPENING/CLOSING HATCHES: By crew.
REPATRIATION: Facilities exist for effecting crew changes.
AIRPORT: Skrydstrup. The distance from airport is 25 km. Airport is served by regular airlines via Copenhagen.
POLICE/AMBULANCE/FIRE: Telephone number 112.
SHORE LEAVE: Crew members are allowed ashore.
TELEPHONES: Available for placing on board.
GARBAGE DISPOSAL: A garbage container will be placed alongside by harbour officials if requested to do so.
WASTE OIL DISPOSAL: On request to Port Authorities, it is possible to have tanker trucks come alongside vessel to receive slops. These must be pumped by the vessel and providing the quantity is reasonable (residues from last voyage) this service is free.

ESBJERG: 55.28 N. 08.26 E. (See Plan)

DOCUMENTS:
Tonnage Certificate.
Derat or Exemption Certificate.
1 Crew List.
1 Crew Personal Effects List.
1 Master's Declaration.
1 Stores List.
Cargo Manifest or Bill of Lading.
Dangerous Cargo List.

PILOTAGE: Advance notice of 12 hours prior to ETA Pilot Station at "Graadyb Barre" is required. This ETA to be confirmed/altered 3 hours prior to actual time of arrival.

Message can be given via coast radio station "Blaavand Radio" (OXB) or via Port Authority's VHF – watch is kept on Channel 16. (Tel: +45-75129200).

Cable address: "Pilotstation Esbjerg".

Telephone: +45-70208100.

Two pilot vessels, painted orange, with "Pilot" painted in white on sides stationed in the Port of Esbjerg. One is a 78 g.r.t. vessel and one is a fast launch.

Both vessels equipped with VHF Channel 16 and carrying signals as prescribed. Pilot boards outside Graadyb Barre, at Buoy No. 2. Vessels awaiting Pilot or high tide should anchor approximately 1 mile West of buoy No. 2. Large vessels wait 2 miles from buoy No. 2.

Pilot is not compulsory except for tankers over 500 d.w.t. and when tugs are assisting in berthing.

ANCHORAGES: There are anchorage areas West of Buoy No. 2 (depth 35 ft. at MLWST).
RESTRICTIONS: No ice to impede navigation. No ice dues charged. Also see "General" before first port.
MAX. SIZE: Pilot Restrictions: Max. draft accepted: 10.5 m.

Entry to port is through a dredged channel over Graadyb Barre, width 200 m., depth 10.3 m. at MLWST.

Tide: Difference between normal high water and normal low water is 4 ft. (approx.). Max. current 2.5 knots – 3 knots.

RADIO: Lyngby Radio.
TUGS: Tugs join vessel at Esbjerg Roads. Ship's own hawsers must always be used. 3 tugs available of 800 h.p., 2,500 h.p. and 4,000 h.p.
BERTHING:

	Approach at MLWST	*Berth at MLWST*
Trafikhavn	33 ft. 9 in.	24 ft. 7 in. – 37 ft. 9 in.
Australienkaj	35 ft.	35 ft.
Foergehavn	28 ft.	15 ft.
Outer Foergehavn for Roll-on/Roll-off vessels	31 ft.	22 ft. – 28 ft.
Dokhavn	22 ft.	22 ft.
Englandskaj	31 ft.	25 ft.
Osterhavn	31 ft.	22 ft. – 35 ft.
Osterhavn – New Berth (when entering max. draft 31 ft., LOA 705 ft.)	31 ft.	35 ft.
Sonderhavn	31 ft.	35 ft.
Tauruskaj	17 ft.	20.6 ft.
Fishery Harbour – Consumption	15 ft.	15 ft. – 17 ft.
Fishery Harbour – Industrial Fish	22 ft.	17 ft. – 22 ft.

For berthing in Trafikhavn with vessels of (approx.) 5,000 g.r.t. or more and for berthing in Sonderhavn with vessels of 10,000 g.r.t. or more. The Pilots require "Slack Water" – i.e. high or low water.

Max. draft for berthing on high water: 10.5 m. (34 ft. 5 in.).

Max. draft for berthing on low water: 8.9 m. (29 ft. 3 in.).

CARGO HANDLING: The Port of Esbjerg has no specially equipped berths besides the tanker berths, and container terminals for lift-on/lift-off equipped with one travelling gantry crane 32 tons, but private companies own suction plants for discharge/loading of feeding stuffs. Furthermore, mobile cranes also with grabs and stationary coal cranes are available. Container terminals for Roll-on/Roll-off. Vessels with own gear can however be handled successfully, at different berths. 12 mobile cranes, capacity up to max. 120 tons, 86 trucks, capacity up to 45 tons, 4 bobcats, 1,200 trailers 20 ft. and 40 ft., and 30 tugmasters.
STEVEDORES: Gangs are mustered daily at 0700, and 1000 hrs. ETA should be given to above hours to ensure that gang(s) are available on arrival. Working hours are from 0700 to 1630 and meal hours are 0830-0900 and 1200-1300. No work on Saturdays. Overtime can be arranged.
MEDICAL: Medical attention can be arranged at any time. Modern hospital facilities available.
TANKERS:
Trafikhavn: Depth in approaches to oil berths in Trafikhavn MLWST 33 ft. 9 in. (MHWST 38 ft. 1 in.).

New Oil Berth No. 101: Depth alongside old oil berth No. 101 MLWST 35 ft. (MHWST 40 ft.)

Old Oil Berth No. 102: Depth alongside new oil berth No. 102 MLWST 25 ft. (MHWST 30 ft.)

The length between the outer point of Berth No. 101 and the opposite outer point of Berth No. 102 is 1,200 ft.

Osterhavn: Depth in approaches to oil berth in Osterhavn MLWST 31 ft. (MHWST 36 ft.). Max. draft 31 ft. 2 in.

Powerstation Vestkraft No. 506: Depth alongside MLWST 35 ft. (MHWST 40 ft.).

Under normal weather conditions Pilot states to be able to berth tankers with a LOA of max. 735 ft.

FRESH WATER: Can be delivered at all berths. Rate 20 t.p.h.
FUEL: All viscosities available by road tanker. Marine Gas Oil also by tanker vessel. 4 hours should be given, always during office hours.
FIRE PRECAUTIONS: A fire watch is necessary when loading/discharging oil and petrol, if flash point is under 50°C.
CONSULS:

REPAIRS: All types of deck and engine repairs can be effected.
DRY DOCKS: No dry docks, but slipways: Slipway No. 1 for trawlers, with weight max. 125 tons; Slipway No. 2 for vessels, with weight max. 250 tons; No. 3 – 500 tons; No. 4 – 750 tons.
GANGWAY/DECK WATCHMEN: Watchman is not essential, but advisable.
OPENING/CLOSING HATCHES: This can be done by members of ship's crew, or by stevedores at an additional charge of 8%.
CUSTOMS ALLOWANCES: See "General" before first port.
REPATRIATION: Ample facilities for effecting crew changes and arranging repatriations.
AIRPORT: 8 km. from centre of town. Daily flights to Copenhagen Stavanger and Humberside.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (6th April – 28th September).
HOLIDAYS: New Year's Day (Jan. 1); Maundy Thursday; Good Friday; Easter Day; Day after Easter Day; the 4th Friday after Easter; Ascension Day; Whit Sunday and Whit Monday; Christmas Day and Boxing Day. Permission to load/discharge on these days obtainable.
POLICE/AMBULANCE/FIRE: In case of emergency, dial "112" and ask for: Brand (fire), Politi (police), or Ambulance. Regular Tel. numbers are: Police 75 12 46 66; Ambulance and Fire Dept. (Falck) (75) 15 82 22.
TELEPHONES: Possible to have telephones installed on board.
SERVICES: No tank-cleaning equipment available. For discharge of tank washings apply to Port Master's Office Tel. 75 12 92 00. Compass adjusting can be effected.
SHORE LEAVE: Normally granted.
IDENTIFICATION CARDS: Not necessary.
GARBAGE DISPOSAL: Service available through local private firms. Contact Gunnar Lunds Olieservice AS, Tel: (75) 138600 or EAR Disposal Service, Tel: (75) 141011.
WASTE OIL DISPOSAL: Service available. Contact Gunnar Lunds Olieservice AS, Tel: (75) 138600 or notify the port through your Agent.
SEAMAN'S CLUBS: No seaman's clubs. Cinemas, restaurants and entertainment available in town.
CURRENCY: Danish Kroner (DKr.).
DEVELOPMENTS Extension of the Harbour towards the East, and modernisation of Trafikhavn, Sonderhavn and Fishery Harbour. Extension of Lo-Lo Terminal.

FREDERICIA: 55.33 N. 09.45 E. **(See Plan)**

DOCUMENTS:

1 copy Bill of Lading for all cargo (manifests are not required).
1 copy Manifests for Dangerous Cargo.
2 copies Crew List.
2 copies List of Dutiable Goods.
2 copies Stores Lists.

PILOTAGE: Eight Pilots available for docking purposes and for through traffic to any place in Denmark or the Baltic. Pilots have a 24-hour watch and are located in the West Harbour. Can be contacted day or night over VHF radio Channel 16, working 12, 13 and 71, or Tel. 75-920959 and 75-920888. Pilotage is compulsory for all ships for Quay No. 23 and for tankers carrying chemicals or LPG and for all other tankers above 1,500 d.w.t.

Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to "Danpilot, Region Skagen", at least 12 hours in advance. Danpilot listening on VHF Channel 16.

Shipmaster's Report: June 1985.

Pilot may be taken onboard near buoy in position Lat. 55° 34.8' N., Long. 9° 50.8' E.

ANCHORAGE: To avoid hindrances to docking or undocking ships, ships of over or about 4,000 d.w.t. are requested to anchor off Trellenes. Smaller ships will find good anchoring conditions in Strib Bugt.

RESTRICTIONS: Day and night entry possible, least depth in the approach channel is 15.0 m. Also see "General" before first port.

MAX. SIZE:

	Max. draft acceptable
Kastels Harbour	11.70 m.
Old Harbour	5.3 m. to 7.20 m.
Fishing and Shipyard Harbour	2.80 m.
Dock Entrance	4.60 m.
West Harbour	6.70 m. – 8.70 m. – 9.70 m.
Mollebugt Harbour	8.70 m. – 13.25 m.
Centre Harbour	14.70 m.

Also see "Tankers".

HEALTH: See "Copenhagen".

VHF: Radio communication for ship movements through "Fredericia Harbour", Channels 16, 13, 12 and 71. Advise "Fredericia Port" prior to arrival, shifting and departure (Day and night).

Agents, receivers, etc., can be called through usual coastal radio stations ("Lyngby Radio" when in Danish waters).

TUGS: Tugboats from Svitzer's Salvage Enterprise is stationed in Fredericia, but any amount of tugs are available, when ordered previously.

BERTHING:

Mollebugt Harbour: Quays Nos. 24, 25, 26, 27 and 28. Length 750 m., depth 9.0 m. – 13.5 m.

Facilities for container traffic and Ro/Ro traffic. 40 ton gantry crane and 3×25 ton gantry crane with hook and grab, max. capacity 300 t.p.h. and grain conveyor with max.capacity 600 t.p.h. 2 mobile cranes, capacity 52 tons and 60 tons with hook and grab. Rail tracks. Facilities for temporary storage of goods. Modern quayside warehouses.

Centre Harbour: Quay No. 21-22, length 175 m. + 250 m., depth 15 m., 3×25 ton gantry cranes with hook and grab, max. capacity 450 t.p.h. 60 ton and 52 ton mobile cranes with hook and grab.

Facilities for temporary storage. Quayside warehouses.

Gas, Oil & Chemicals Harbour: Quays Nos. 20, 23, 41 and 42 for tankers.

Quay No. 20, 15 m. depth in berth. Hydraulically operated hose handling gear for discharging petrol and oil products. 10 in. and 12 in. ASA. Connection range between + 0.4 and 18.5 m. above MWL.

Quay No. 23, 7.5 m. depth in berth. Equipped for discharging oil products, liquid chemical products in 4 in. DIN hoses, liquid carbon dioxide.

Quay No. 41, 10 m. depth in berth. Equipped for loading and discharging petrol and oil products.

Quay No. 42, 15 m. depth in berth. Equipped for loading and discharging petrol, oil products and crude oil.

West Harbour: Quays Nos. 13 to 18, length 590 m., 7 m. – 10 m. depth in berth.

Facilities for container traffic, Ro/Ro traffic. 25 ton gantry crane with hook and grab, max. capacity: 300 t.p.h. 6 ton gantry crane with hook and grab, max. capacity: 150 t.p.h. 2 mobile cranes, capacity 60 tons and 52 tons. Suction plant* available for discharging feedstuffs – max. capacity: 80 t.p.h. Rail tracks. Facilities for temporary storage of goods. Bulk terminal for loading feedstuff max. capacity 300 t.p.h.

Modern quayside freezing and storage facilities.

Shipyard Harbour: Quays Nos. 8 to 12, length 500 m., 5.0 m. – 6.5 m. depth in berth. Modern repair and equipment piers with workshops. Slipways available for 75 ton and 1,000 ton light displacement. Floating dock 227 m. × 35 m. max. capacity: 22,000 ton light displacement. Floating dock 150 m. × 23.05 m. max. capacity: 8,000 tons light displacement. Dry dock facilities 110 m. × 22 m., 5.1 m. access depth. Average docking/sailing time: 45 mins.

Old Harbour: Quays Nos. 6 & 7, length 200 m., 5.6 m. – 7.5 m. depth in berth. Mobile crane, capacity 60 tons. Suction plant* available for discharging grain – max. capacity 60 t.p.h. Facilities for loading liquid chemical products. Rail tracks. Facilities for temporary storage of goods.

Kastels Harbour: Quays Nos. 1, 2 and 3, length 450 m., 12 m. depth in berth. Mobile crane, capacity 60 tons. Loading facilities for bulk fertiliser* – max. capacity: 400 t.p.h. Grab crane* – max. capacity: 300 t.p.h. Siwertell worm conveyor – max. capacity: 600 t.p.h. Facilities for loading and discharging liquid chemical products and ammonia. Rail tracks. Facilities for temporary storage of goods. Preference for vessels destined for the Kemira Company.

* Private.

CARGO HANDLING FACILITIES: The Port possesses all types of modern facilities for loading and discharging. Crane facilities include a 40 ton gantry crane, 7 grab cranes with a max. capacity of 300 – 450 t.p.h. and a number of grab and hook cranes and mobile cranes with capacities ranging from 52 tons to 60 tons. There are ample facilities for container and Ro/Ro traffic. The suction plant* is capable of handling up to 80 t.p.h. and the Siwertell worm conveyor equipment* has a max. capacity of 600 t.p.h. In addition, there are modern facilities for handling liquid chemicals, gas, petrol and oil products and bitumen. There are also facilities for handling fertiliser* – max. 400 t.p.h. The Port has a rail network freeze/cold stores*, approximately 6,000 sq.m. modern warehouse space and ample facilities for temporary quayside storage.

* Private.

STEVEDORES: Ordinary working hours Monday to Thursday: 0700 – 0830 hrs., 0900 – 1200 hrs., 1230 – 1530 hrs. Night gangs on week days must be ordered no later than 1230 hrs. the same day. Working overtime weekends is possible, but gangs must be ordered no later than Friday 1230 hrs. Average output per 8-hour day, loading or unloading mixed general cargo, is 200 tons per gang.

MEDICAL: Hospitals available.

TANKERS:

	Berth 20	*Berth 23 (Chemicals)*
Max length acceptable (approx.)	275 m.	150 m.

Jetty I/Berth 41 – Chicksan arms – for vessels discharging bitumen and other special products, and for loading fuel-oil, gas-oil, gasoline, diesel fuel, and LPG.

Jetty II/Berth 42 – Curacao hosehandling gear – for vessels discharging and loading crude, fuel-oil-handling subject to size of vessel.

Pilotage: Pilotage is compulsory for all ships for Quay No. 23 and for tankers carrying chemicals or LPG, and for all other tankers above 1,500 d.w.t.

Dirty Ballast Reception: Oily ballast reception facilities available – maximum quantity 5,500 cu.m.

Restrictions: Height from normal water level to hose connections must not exceed 14.80 m. during discharging and ballasting.

Communication: The port is equipped with VHF station – Channels 16, 12, 13 and 71.

FRESH WATER: Available ex wharf. Rate 10–50 t.p.h.

FUEL: Available.

CONSULS: Finland, France, Great Britain, Iceland, Netherlands, Norway and Sweden.

REPAIRS: All repairs undertaken with modern equipment. Also see "Berthing – Shipyard Harbour".

DRY DOCKS: Length 110 m., breadth 22 m. Access depth 5.1 m. Slipway available for ships up to 1,000 tons, light displacement (divers available). Also see "Berthing – Shipyard Harbour".

GANGWAY/DECK WATCHMEN: Available upon request.

OPENING/CLOSING HATCHES: Stevedores or crew.

CERTIFICATES:

Ship's Register.
International Tonnage Certificate.
Load Line Certificate.
Radio Safety Certificate.
International Safety Certificate.
Derat Certificate.

CUSTOMS ALLOWANCES: See "General" before first port.

AIRPORT: At Billund and Beldringe 35 miles from Fredericia.

REPATRIATION: All facilities exist.

TIME: GMT plus 1 hour in Winter and GMT plus 2 hours in Summer (late March – late September).

HOLIDAYS: See "Copenhagen".

POLICE/FIRE/AMBULANCE: Police 75912300; Ambulance 75822244; Fire 75921166; Emergency 112.

TELEPHONES: Both oil piers have telephones in the watchmen's room but for local calls only.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: Galley garbage containers located on the piers. Can also be arranged through the Harbour Master's office. Galley garbage in larger quantities can be collected.

WASTE OIL DISPOSAL: With 24 hours notice to the Harbour Master's office, ships loading/discharging are entitled to free disposal of waste oil in reasonable quantities.

SEAMAN'S CLUBS: Somandshjemmet (Missions to Seamen), Gothers Gate 40, Fredericia. Tel: 75-920190. Facilities: Beds, meals, snacks, football, money exchange and international telephone.

CURRENCY: Danish Kroner.

AUTHORITY: Port of Fredericia, Vesthavnsvej 33, Post Box 242, DK-7000 Fredericia, Denmark. *Tel:* 75-920255. *FAX:* 75-925104. *Contact:* P.E. Skoett, Port Director. Bo T. Nielsen, Harbour Master.

FREDERIKSHAVN: 57.28 N. 10.33 E. (See Plan)

PORT LIMITS: See "Plan".

DOCUMENTS: Ship's papers, 2 Crew Lists, 1 Passenger List, 2 Bills of Lading, 1 Manifest, 1 Customs Declaration of tobacco and spirits for Officers and crew, 1 Customs Declaration (TOLDPAS) if arrived from port in EEC or Scandinavia.

PILOTAGE: Call the Pilot through Lyngby Radio (Call Sign OXZ), or Skaw Pilot Station (VHF Channel 16 or Tel: 98445566). Pilot boards outside the harbour at the buoy 1.7 miles S.E. of the harbour entrance. ETA required as soon as possible.

ANCHORAGE: In the roads South of the red leading lights in 10 m. water depth. Good holding ground.

Anchoring is prohibited within 20 m. of ferry berth (Quay No. 2 and 3).

RESTRICTIONS: Vessels coming from or entering the naval base and the fishing harbour must wait for ships entering or leaving the commercial harbour. Maximum speed Frederikshavn L/B – to harbour 12 knots, in outer basin – 7 knots, Harbour – 3 knots. Entering the Naval Base without special permission prohibited. Ships entering the harbour must if necessary wait outside for ships leaving the harbour. Also see "General" before first port.

MAX. SIZE: Max. length about 200 m., depth in harbour 8 m. Tide about 0.3 m.

HEALTH: Use international quarantine signals. If suspected disease or fever on board cable the Agent to arrange everything to obtain pratique as soon as possible.

RADIO: Lyngby Radio.

VHF: The harbour office is fitted with VHF Channels 16, 12 and 13. Watch kept day and night. Vessels must call the Harbour Office before entry and leaving.

TUGS: Tugs join vessel outside the harbour between the buoy and the harbour entrance. Only the ship's line to be used.

BERTHING: No special requirement for berthing in the harbour, but several big ferries are running in and out during day and night and sailing after a time schedule. Vessels must call the harbour office, VHF Channel 16, for permission to enter and before leaving the berth.

BULK HANDLING FACILITIES: Ferry berths in Harbour, depth 6.4 m. to 8 m., equipped for handling containers and Roll-on/Roll-off traffic.

STEVEDORES: ETA advices are required before 0900 hrs. in order to arrange gangs for discharge/loading the same day.

MEDICAL: No special requirement is necessary for medical attention. The town has all ordinary medical and hospital facilities.

TANKERS: Oil quay max. depth 8 m., Hoses 8 in. diameter. Reducing pieces may be necessary. Slop water discharging and cleaning can be done by oil-separator. Tankers max. draft 8 m.

DENSITY: 1,020 (approx.).

FRESH WATER: Supplied by water hydrants on all quays.

FUEL: All kinds of fuel are available and no advance notice is necessary.

FIRE PRECAUTIONS: No smoking and no open fire if discharging oil.

Fire watchman from the Harbour Authority required if loading/discharging gas, dangerous chemicals and ammunition, or if not gas-free. Besides the watchman, the Harbour Authority will require restricted access to vessel.

CONSULS:

Finland	Tel. 98 421488	Norway	Tel. 99 204060
France	" 98 422155	Sweden	" 96 200200
Germany	" 98 125633	Iceland	" 98 429111

REPAIRS: Two steel shipyards and one wood shipyard doing all types of repairs.

SURVEYORS: Cargo Inspector – B. K. Mortensen, Ahaven 17. Tel: 98-425064.

DRY DOCKS: Two dry docks, two floating docks and two small slips. Dimensions of largest dry dock: length 212 m., breadth 32.2 m. and depth 7 m. Largest floating dock: length 129 m., breadth 28 m., depth 6.5 m., capacity 7,500 tons.

GANGWAY/DECK WATCHMEN: Not compulsory but available if required.

OPENING/CLOSING HATCHES: Ship's crew open and close the hatches. If necessary the longshoremen can do it for extra pay.

CUSTOMS ALLOWANCES: See "General" before first port.

REPATRIATION: Agent will arrange repatriation. All facilities for changing crew.

AIRPORT: Aalborg Airport, 60 km. from port, several daily flights to Copenhagen.

TIME: Local time GMT plus 1 hour.

HOLIDAYS: Weekends, Easter, Whitsun, Christmas, New Year and two Danish holidays in the Spring.

POLICE/AMBULANCE/FIRE: Police, Tel: 98-421444; Ambulance, Tel: 70-102030; Fire, Tel: 98-420801; in emergency dial 112.

SERVICES: Separating of slop water, compass adjusting, oil bunkering, repairing all kinds of navigation instruments and provisions.

BANKS: National and local.

STORING: (See "Prelims"). All stores available. Fork lift trucks can assist. Trucks can proceed alongside at berth. Local riggers can be employed. No difficulties with paperwork (Customs).

SHORE LEAVE: After clearing inwards, crew members are allowed ashore without special permission.

GARBAGE DISPOSAL: Containers alongside. No charge if harbour dues are paid. Otherwise on ship's account. Collection on request. Telephone: 98421988.

WASTE OIL DISPOSAL: Collection alongside with tanker trucks. Charges as mentioned above. All requests through the Harbour Office (Tel: 98421988. Fax: 96200988).

SEAMAN'S CLUBS: Somandshjemmet, Tordenskjoldsgade 15B. Tel: 98420977. Fax: 98431899.

The Danish Seamen's Home is run by the Domestic Seamen's Mission, within the Danish National Church. The reception desk at the Seamen's Home is at your service around the clock with telephone service, both local calls and calls out of the country, dispatch of post, and safekeeping of money and valuables.

Good restaurant with really good and well-prepared meals at reasonable prices.

Lounge with colour TV – also billiards and table tennis for your enjoyment.

42 comfortable rooms, most of them with private bath and toilet, telephone and colour TV.

Frederikshavn Somandshjem is centrally situated only 200 m. from the railway station and bus terminal, and just 100 m. from the town's charming pedestrian street.

From the large ferry harbour there are daily departures to Sweden and Norway, and there is a direct bus connection by Fly-Bus Nord to the airport at Aalborg.

CURRENCY: Danish Kroner.

RULES/REGULATIONS: *Harbour Area:* The harbour area is shown on plan (See "Harbour Limits" Plan).

(a) To the North, the area is bounded by the everyday waterline for the filled-up area.

(b) South of this and until 300 m. North of the green outer jetty lighthouse, the area is limited by the everyday waterline for the outside of the outer jetty.

(c) The harbour's sea area is to the North bounded by a line radiating from a point on the outer jetty 300 m. North of the green outer jetty lighthouse and to the South by a line starting 110 m. S.W. of the red outer jetty lighthouse.

(d) The location of the endpoints of the lines mentioned under (c) are shown on the plan.

(e) From a point 110 m. S.W. of the red outer jetty lighthouse, the limit of the area is the everyday waterline for the Northern side of the jetty goes between the outer harbour and the naval station via the approach to the naval station to the fence S.E. of Ferry Berth IV.

(f) From here on, the area is bounded by the naval station fence.

From the outer harbour, there is an approach to the ferry harbour/freight harbour, to the fishing harbour and to the naval station.

The rules and regulations below do not apply to the naval station, apart from the section – Navigation Rules.

For the harbour area, the Ministry of Public Works has today laid down the following Rules and Regulations pursuant to Act No. 239 of 12th May 1976 on Public Harbours:

Navigation Rules: Regarded as the harbour's main thoroughfare is the section from the Frederikshavn Light Buoy to the mouth of the harbour, and from there onwards through the outer harbour up to and including the approachway between Ferry Berth III and the Northern cross pier.

Traffic from the Fishing Harbour, Ferry Berth IV and the naval station shall in the outer harbour yield to traffic taking place in the longitudinal direction of the harbour's main thoroughfare.

For navigation inside the harbour area, the special rules valid at any time for navigation in certain Danish waters shall apply.

Regulations: For the maintenance of law and order, the "Standard Rules and Regulations Governing Law and Order, etc. in (at) Danish Harbours (Bridges)" shall apply.

Maximum speeds are the following:

Within the harbour's sea area	12 knots
In the outer harbour	7 knots
In the remaining harbour	3 knots

In adverse weather, greater speeds may be used, if considered necessary for safe manoeuvring of the vessel.

Calls may not be made by pleasure craft and small boats without previous permission from the Harbour Superintendency.

The present Rules and Regulations will enter into force on 1st December 1985.

The "Rules and Regulations Governing the Maintenance of Law and Order in Frederikshavn Harbour" confirmed by the Ministry of Public Works on 13th December 1977 will at the same time be rescinded.

Signed: Ministry of Public Works, 31st October 1985.

AUTHORITY: Havnekontoret, Oliepieren 7, Postbox 129, DK-9900 Frederikshavn, Denmark. *Tel:* 98-421988. *FAX:* 96-200988. *Contact:* Captain B.K. Mortensen, Port Manager. J.G. Thomsen, Harbour Master.

GEDSER: 54.34 N. 11.56 E. (See Plan)

LOCATION: Gedser is situated on the Southern extremity of the island of Falster.

PORT LIMITS: A line drawn between the two outer pier heads defines the limit of the harbour.

DOCUMENTS: Customs Declaration, Crew Lists, Passenger Lists, Ship's Log and Safety Certificates.

APPROACHES: Three entrance channels lead to the harbour, the main channel (Rodsand Rende) has a width of 150 m. and a depth of 6.2 m. (20.3 ft.). The harbour can be entered by day and night.

PILOTAGE: It is recommended that all vessels over 500 tons use a Pilot. Requests for a Pilot must be made at least 6 hours before arrival to Guldborgsund Pilot Office in Nykobing (Falster) over Lyngby Radio or VHF Channel 16.

RADIO: Lyngby Radio.

BERTHING: Gedser Harbour is considered a ferry harbour where De Danske Statsbaner (Danish State Railways) and Deutsche Bundesbahn (German Railways), have first priority to the harbour and Rodsand Rende.

MEDICAL: Full hospital facilities in Nykobing (Falster). Doctor in Gedser. Tel: (38) 53879440.

DENSITY: 1010 – 1014.

FRESH WATER: Available.

CUSTOMS ALLOWANCES: EEC Rules apply.

REPATRIATION: Hourly bus connections to Nykobing (Falster) with daily train connections from Nykobing (Falster) to Copenhagen.
AIRPORT: Kastrup Airport at Copenhagen.
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police in Gedser. Tel: (46) 53879021. Ambulance and Fire Brigade in Nykobing (Falster). Tel: (47) 54851744.
TELEPHONES: There are no arrangements for placing telephones on board.There is a post and telegraph office close by the harbour.
SHORE LEAVE: Possible for crew members with valid passport or visa. There is no need for identity cards.
GARBAGE DISPOSAL: Service available using containers, max. capacity 20 cu.m.. Charges are 400DKK per container. Contact Tel: 53877244 for further information.
WASTE OIL DISPOSAL: Tanker truck available, capacity 13 cu.m.. Charges 600DKK per hour. Contact Tel: 53877614 for further information.
SEAMAN'S CLUBS: None.
CURRENCY: Danish Kroner(DKK).
GENERAL: *Tides and Currents:* Tidal range 0.3 m. Winds from N.E. can raise water level by 1.8 m.; winds from S.W. can lower water level by 1.5 m.
Lifeboat Station: A lifeboat is stationed by the harbour.
AUTHORITY: Havnekontoret Gedser, Postbox 16, 4874 Gedser, Denmark. *Contact:* Tel: Gedser (57) 53879145, ext. 130.

GRENAA: 56.25 N. 10.56 E. (See Plan)

PORT LIMITS: A Line drawn between the outer breakwater heads.
DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
1 Crew Personal Effects List.
1 Ship's Bonded Stores List.
1 Stores List.
1 Animal/Pets List.
1 Health Certificate.
Ship's Log.
Last Port Clearance.
1 Bill of Lading.
1 Cargo Manifest.

Safety Certificates: Construction, Equipment, Load Line, Radio and Oil Pollution Prevention.
PILOTAGE: Pilotage is not compulsory except for laden tankers with hazardous liquid chemicals or tankers with uncleaned tanks which have carried hazardous liquid chemicals.

The pilotage regulations do not apply to Masters who have been to Grenaa Harbour at least 5 times in the last 6 months.

Ships approaching Grenaa Harbour should be aware of the "Kalkgrunden", a limestone reef just outside the harbour entrance, stretching Easterly for approximately 7 cables and with 1 m. depth.

Notice of ETA and request for Pilot must be made to the Agent and/or to the Pilot Station with 24 hours and 12 hours notice.

There are telex facilities. VHF Channel 16 is continuously watched and ETA may be confirmed or adjusted on this frequency.

Pilot boat is 8 m. LOA, orange upperwork and orange hull with the word "Pilot" on each side.

The usual international signals may be displayed by vessels requiring a Pilot.

The usual pilot boarding point is 2.3 miles E.N.E. of harbour entrance.
BUOYAGE: IALA "System A".
ANCHORAGE: Anchorage is best North of the harbour with depth of 7 m. to 9 m. The holding ground is fine hard sand.
RESTRICTIONS: No restrictions, except that larger vessels should not approach the Easterly breakwater head closer than 80 m. in the area East and Southeast of this.

Also be aware of the "Kalkgrunden" (See "Pilotage").
MAX. SIZE: Vessels up to 165 m. LOA, 23 m. breadth and draft 9.0 m.
HEALTH: Normally Free Radio Pratique will be granted.
RADIO: Lyngby Radio (OXZ) is the long range area station.
VHF: At the harbour office, open for communications on Channel 16 from 0800 hrs. – 1600 hrs. (Monday to Wednesday) and 0800 hrs. – 1500 hrs. (Thursday and Friday).

A continuous watch is maintained at the Pilot Station on Channel 16.
RADAR: There is no Port Radar but the pilot boats are radar equipped.
TUGS: One tug available.
BERTHING: There are 7 general cargo berths.

Nos. 31, 32 and 33: Length 210 m., depth 6.5 m.
No. 34: Length 110 m., depth 6.5 m.
No. 41: Length 80 m., depth 7.2 m.
No. 42, 43 and 44: Length 308 m., depth 7.2 m.
No. 45: Length 180 m., depth 7.1 m.
No. 51: Length 210 m., depth 10.1 m.
Sydhamn: Length 176 m., depth 4.5 m.

Bulk and general cargo is handled at Nos. 31, 32, 33, 41, 42, 43 and 51, whereas container and Ro-Ro handled at No. 34, 44 and 45.
CRANES: There are 2 mobile cranes of 32 tonnes and 63 tonnes respectively and 2 container forklifts of 25 tonnes and 42 tonnes.
BRIDGES: There are no bridges or other restrictions to prevent access to the port.
STEVEDORES: Working hours from 0700 – 1600 hrs., Monday to Friday. Evening and night shift as well as week-end labour can be arranged.
MEDICAL: Full hospital facilities available without prior notice.
TANKERS: *Oil Pier:*

North Side: Length 140 m., depth 6.50 m.
South Side: Length 140 m., depth 6.50 m.
Slop discharge facilities in accordance with the Helsinki Convention.

DENSITY: 1018 (average).
FRESH WATER: Good potable water available in unlimited quantities at a rate of 10 t.p.h.
FUEL: All kinds of fuel can be delivered by road. Longest possible notice is desirable.
CONSULS: Vice-Consulates for Norway and Sweden.
REPAIRS: There is one shipyard as well as an engine building factory with repair facilities.
DRY DOCKS: No dry docks, but 4 slipways, where up to 500 tonnes deadweight is available.
SURVEYORS: Lloyd's sub-agent. Agents from other Classification Societies and Surveyors can be brought from Aarhus at short notice.
GANGWAY/DECK WATCHMEN: Gangway and deck watchmen not necessary, but can be arranged.
OPENING/CLOSING HATCHES: Normally handled by ship's crew.
CUSTOMS ALLOWANCES: See "General" before first port.
CARGO GEAR: Ship's gear or mobile cranes/conveyors from shore.
REPATRIATION: 25 km. to Tirstrup Airport with international flights to London, Oslo and Stavanger (Norway) and domestic scheduled flights to Copenhagen with international connections.

Railway connection to Aarhus.

Ferry connection to Zealand (Hundested) and Sweden (Varberg and Halmstad).

All facilities exist for changing of crew and repatriation of seamen.

Repatriation and change of crew can be arranged on the Roads for ships passing Grenaa en route to and from the Baltic. See "Ship Supply Service".
TIME: Local time is European Standard Time, GMT plus 1 hour. Summertime is used.
HOLIDAYS: *Official Holidays:* New Year's Eve (half day), New Year's Day, Maundy Day, Good Friday, Easter, Whitsun, Labour Day (half day), Ascension Day, Constitution Day (5th June, half day), Christmas Eve (half day) Christmas Day.

Work can be arranged except Christmas Day and Good Friday.
POLICE/AMBULANCE/FIRE: Emergency 112; Police 86-321011; Ambulance 86-322222; Fire 86-320812.
EMERGENCY CO-ORDINATION CENTRE: Danish Coast Guard, S.O.K. Kystvaernsvej, Aarhus. *Tel:* 86-131822. Outside office hours – 123099.
TELEPHONES: No arrangements for placing telephones on board.
SERVICES: A Compass Adjuster resides at the Port. Decca and Radio repairs possible.

Facilities for reception of Oil, oily mixtures, sewage, garbage, etc., exist in accordance with the Helsinki Convention.
BANKS: All major Danish banks are present in Grenaa.
STORING: Vessel can be stored by truck alongside. Local Riggers can be employed to assist with storing.
SHIP SUPPLY SERVICES: Storing possible on Roads at Buoy No. 4 in position: Lat. 56° 25' N., Long. 11° 06' E. Contact: Shipbroker G. Ostergaard I/S. Telex: 63489 Broker Dk. Tel: (86) 32.02.44. *FAX:* (86) 320026.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: No identification cards required.
GARBAGE DISPOSAL: 24 hours advance notice to Harbour Office.

Normal working hours for reception facilities are 0700 – 1600 (Monday – Wednesday) and 0700 – 1500 (Thursday and Friday).

Ensure that garbage is properly packed and secured in bags or similar. Galley garbage is to be placed in closed containers. Ensure that there are no spills.
WASTE OIL DISPOSAL: See above for hours of reception. Ships using reception facilities should be prepared to provide information on:

(a) Oily wastes:
- The type of oily waste.
- Whether the waste contains contaminants (e.g. solvents, detergent, lube oil, etc.).
- The quantity of each type of oily waste to be discharged.
- The ship's minimum and maximum pumping rate for waste to be discharged.

(b) Ensure that drums or other forms of portable containers being landed from the ship are free from defects that may cause leakage, are tightly closed and clearly marked to indicate contents and ship's name.

Capacity: 40 cu.m. – 100 cu.m., depending on type of waste. Receiving rate: 10 cu.m./hr. – 25 cu.m./hr.
Services are free of charge when:
1. Harbour dues have been paid.
2. Delivery takes place during normal working hours of reception facilities – except vessels with short calls.
3. Advanced notice of 24 hours before arrival/delivery.
4. Only reasonable quantities of garbage and oily wastes are delivered compared with the vessel's size and normal trading.
5. Oily wastes only contain water and oil.

SEAMAN'S CLUBS: The Seamen's Club at Grenaa has been closed. Various services to seamen (football, etc.) can be arranged through the Harbour Master's Office or the Tourist Office at Grenaa.
CURRENCY: Danish Kroner. No restrictions to seamen.
REGULATIONS: No unusual regulations for the port.
DELAYS: No delays can normally be expected.
DEVELOPMENT: An extension of Quay No. 51 will commence in 1998. The quay will be extended by 140 m., with a depth of 10.0 m.
AUTHORITY: Harbour Master, Grenaa Harbour, Nordhavnsvej 1, DK-8500 Grenaa, Denmark. *Tel:* 86-321204, 86-324766. *Cables:* Harbourmaster, Grenaa. *FAX:* 86-324371. *Contact:* D.Y. Christensen, Chief Executive. E. Stein Laursen, Harbour Master.

GULFHAVN: 55.12 N. 11.16 E. (See Plan)

DOCUMENTS:

Ship's Register.
Load Line Certificate.
Safety Radio-telephone Certificate.
Derat Certificate or Exemption Certificate.
Exact list of tobacco, cigarettes and spirits showing the vessel's and the crew's supply on arrival.
Bill of Lading (if vessel is carrying cargo).
Copy of the Crew List is required by Kuwait Petroleum Refining (Denmark) A/S.

PILOTAGE: 3 Pilots and pilot vessel available. Pilotage is compulsory for all vessels over 4,500 b.r.t. Pilot acts as Berthing Master. The Pilot may be requested to board vessels at any place in the proximity of Gulfhavn.

Pilot vessel equipped with VHF Channels 6, 10, 12, 16 of which Channel No. 6 used for ship-to-ship communication. Pilot station also equipped with VHF Channels 12, 13 and 16. Pilot can be contacted at the station on Channel 16.

A vessel's ETA should be communicated by Master to Agent, 48 and 24 hours prior to arrival. Agent will keep Refinery advised and make necessary arrangement with Pilot.

Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to "Danpilot, Region Skagen", at least 12 hours in advance. Danpilot listening on VHF Channel 16.

ANCHORAGES: Korsor Roads: Depth 20 m. (65.6 ft.). Bottom sand, good holding ground. Width of area about 2 square nautical miles. Gulfhavn Roads: Depth 30 m. (98.4 ft.). Bottom clay. Good holding ground. Width 0.5 nautical miles. Length 1.5 nautical miles.

Power cables running between Zealand and Agersoe Island (marked on charts) must be avoided.

RESTRICTIONS: See "General" before first port.

MAX. SIZE: See "Berthing".

RADIO: *Arrival Advice:* A vessel's ETA should be communicated by the Master to his Agent 48 hours and 24 hours prior to the arrival, and as soon as possible if changes in ETA are foreseen. The Agent will keep the Refinery informed and make the necessary arrangements for the attendance of tug(s) for berthing operations.

VHF: Call sign "Gulfhavn" Channels 12, 14 and 16. Port on Channel 16, 24 hours a day.

The ferries crossing the Great Belt from Korsor to Nyborg can be contacted on Channel 10.

TUGS: None available locally. If required 12 hours' notice must be given. Pilot will advise if weather conditions demand use of tugs (in good time).

BERTHING: The port of Gulfhavn is a "T" shaped structure, situated in position Lat. 55° 12.1' N., Long. 11° 15.9' E., at the Cape of Stigsnaes, and comprises an approach which extends 306 m. from shore, and a pier head which is 500 m. long, including the outer mooring caisson.

Depths alongside:		
	Berth 1	16.0 m. (52.5 ft.)
	Berth 2	12.0 m. (39.4 ft.)
	Berth 3	7.5 m. (24.6 ft.)
	Berth 4	4.5 m. (14.8 ft.)

Berth No. 1:

Max. Draft : 15.5 m.
Max. LOA: 280 m.
Max. Displacement: 144,000 tonnes.
Min. Vessel Size: 10,000 d.w.t.
Max. Speed of Approach: 10 cm./sec.

Berth No. 1 can accommodate fully laden ships having a capacity up to 120,000 d.w.t.

Berth No. 1 can also accommodate partially loaded ships up to 170,000 d.w.t., subject to a maximum displacement of 144,000 metric tons. Such ships always require special approval by Gulfhavn and more restrictive berthing regulations may be dictated.

Berth No. 1 is equipped with mechanically operated Woodfield hose-handling structure. The booms are 12.2 m. (40 ft.) long. Berth is primarily equipped for handling incoming crude, but can be used for other purposes (gasoils, intermediate and heavy fuels) when not being occupied by crude vessels.

The booms are arranged in the following sequence of product handling:

Boom No.	*Size of booms and contents*
1	10 in. Mogas Blendstock/Jet Fuel
2	12 in. Crude/Gasoil Blendstock
3	12 in. Mogas Blendstock/Jet Fuel
4	12 in. Crude/Gasoil Blendstock Crude
5	8 in. Heavy fuel oil

The sequence is from South to North or from right to left as you face the shore.

The max. distance from Danish Mean Sea Level to the highest position of centre line of manifold is 17.0 m. (55.8 ft.).

In addition to the oil products handled on Berth No. 1 there are the following other connections on the pier:

Size of connection	*Contents*
6 in.	Ballast water
6 in.	Gas oil
6 in.	Intermediate and heavy fuel
4 in.	Tetra methyl lead

Berth No. 2:

Max. Draft: 11.5 m.
Max. LOA: 180 m.
Max. Speed of Approach: 10 cm./sec.
Max. Size (arrival – fully laden): 18,000 d.w.t.
(arrival – partly laden): 30,000 d.w.t.
Max. Displacement (arrival – fully laden): 23,000 tonnes
(arrival – partly laden): 22,000 tonnes.
Max. d.w.t. (departure – fully laden): 30,000 d.w.t.

Berth No. 2 is equipped with mechanically operated hose-handling structure (Woodfield). The booms are 9.1 m. (30 ft.) long.

The booms are arranged in the following sequence of product handling:

Boom No.	*Size of booms and contents*
1	10 in. Ballast water
2	10 in. Fuels
3	12 in. Fuels
4	10 in. Gas Oil/Jet Fuel
5	10 in. Gas Oil
6	10 in. Gasoline
7	10 in. Gasoline

The sequence is similar to Berth No. 1, i.e., South to North.

The max. distance from Danish Mean Sea Level to the highest position of centre line of manifold is 15 m. (49.2 ft.).

In addition to the oil products handled on Berth No. 2, there are the following other connections on the pier:

Size of connection	*Contents*
6 in.	Intermediate and heavy fuel
6 in.	Gas oil
6 in.	Ballast water
6 in.	Kero and Jet fuel
6 in.	Naphtha
6 in.	Light virgin naphtha
6 in.	Gasoline
6 in.	Gasoline – MTBE

Berth No. 3:

Max. Draft: 7.0 m.
Max. LOA: 135 m.
Max. Size: 7,000 d.w.t. (approx.)

There are the following connections on the pier:

Size of connection	*Contents*
6 in.	Intermediate and heavy fuel
6 in.	Gas oil
6 in.	Ballast water
6 in.	Kero and Jet fuel
6 in.	Naphtha
6 in.	LVN
6 in.	Gasoline
6 in.	MTBE/Naphtha

In addition the berth also handles LPG.

Berth No. 4:

Max. Draft: 4.0 m.
Max. LOA: 75 m.
Max. Size: 700 d.w.t.

The berth cannot be used for any deliveries or receipts of hydrocarbons or water.

Mooring: If wires are used for mooring, polypropylene tails are required.

General: On arrival, the vessel will be boarded by one of the Refinery's representatives, who will discuss the discharging/loading operation with the Master or his delegate, acquaint him with up to date information concerning the cargo, and verify that the vessel is ready in all respects for the discharging/loading operation.

Adequate lifting facilities to assist in hose connecting and handling of necessary hose equipment should be ready on arrival. Ships crews are expected to assist with hose handling.

A Safety Check List must be completed and signed for all vessels calling at Gulthavn, prior to commencement of cargo operations. Additionally, product vessels must complete a Vessel Information Sheet before loading.

It is essential for the vessels to use their own gangways, and to arrange them in such a way that there is a safe passage from ship to shore. A lifebuoy with not less than 30 m. of lifeline attached shall be positioned on the vessel near the gangway.

The hydraulically operated gangway installed on Berth No. 1 must be used when berthing alongside Berth No. 1.

Safe mooring is the responsibility of the vessel's Master. KPRD will, if mooring of vessels is considered unsatisfactory, have the right to request improvement. For large vessels on Berth No. 1 and Berth No. 2, the Refinery requires a mooring pattern as shown in the "Plan Section".

BALLAST: Ballast containing chemicals or lube oils will not be received, and ballast will only be received if the vessel has other business at Gulfhavn.

MEDICAL: Hospital at Slagelse. Tel: Slagelse (03) 52 19 00.

DENSITY: Ranges between 1023 and 1007, dependent on season and weather conditions.

FRESH WATER: Available at all 4 berths. Supplied at a pumping rate of 15 t.p.h. Requests for fresh water to be made 24 hours in advance.

FUEL: Bunker fuel available at all 4 berths. 24 hours' notice required.

FIRE PRECAUTIONS: The harbour is not equipped with fire-fighting vessel. Fire-fighting equipment is stationed on quay.

CONSULS:

Finnish Consulate: (Mr. Sv. Mogensen) 10 Oernumvej, DK-4220 Korsoer, Tel. (53) 57 00 13.

Norwegian Consulate: (Mr. Sulow Rasmussen) Caspar Brandsplads 9, DK-4220 Korsoer, Tel. (53) 57 15 15.

German Consulate: (Mrs. K. Poulsen) Batterivej 7, Korsoer, DK-4220. Tel. (53) 57 05 86.

All other consulates are situated in the Copenhagen area.

REPAIRS: Small deck and engine repairs can be carried out on request with permission.

GANGWAY/DECK WATCHMEN: Available if required.

REPATRIATION: Facilities exist via Agent.

AIRPORT: Copenhagen 120 km. away.

TIME: GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: Police (Scagelse) 53 52 14 48; Ambulance 53 53 22 22; Fire Refinery 222.

TELEPHONES: A public telephone box situated at the foot of the jetty.

SHORE LEAVE: Passes for ship's personnel leaving and entering the Refinery area will be placed on board by the Agent, and issued as authorised by the Master of the vessel. At the Refinery's entrance gate, all passes must be shown to the guard. Ship's personnel will not be allowed to walk through the Refinery area. Transportation between ships and the Refinery's entrance gate should be arranged by the ship's Agent, or as otherwise specified.
IDENTIFICATION CARDS: Required by crew.
WEATHER: *Wind/Tide/Current:* Prevailing winds are from South West to North West. Wind velocities exceeding 15 m./sec. occur on an average of about 18 hours per year from South West, 15 hours from West and 39 hours from North West.

The pier is protected by the island of Agerso against swells coming from West and North West and the mean wave height, for a wind velocity of 15 m./sec. from these directions, will only be about 0.15 m.

The greatest waves will come from South West as per following data:

Wind Velocity (m./sec.)	5	10	15	20
Mean Wave Height H (m.)	0.17	0.35	0.50	0.60
Wave Length (m.)	10	20	30	35
Wave Period (sec.)	2.5	3.7	4.5	5

The mean water level is 0.0 m. The average tidal range is 0.30 m. Extreme high water level is plus 1.2 m., whereas the extreme low water level is minus 1.2 m.

The current is a maximum of 2 knots (1 m./sec.).
GENERAL: No ship's stores or provisions can be supplied by the Refinery. Such requirements, as well as other matters pertaining to the husbanding of a vessel, such as inward and outward clearance, medical assistance, transportation of ship's personnel, etc., should be arranged with the ship's Agent.

Facilities for disposal of ordinary household rubbish are provided. Other wastes, such as empty drums, etc., will not be received.
AUTHORITY: Korsoer Toldkontrol.

Kuwait Petroleum Refining (Danmark) A/S, Gulfhavn, Post Box 49, 4230 Skaelskor, Denmark. *Tel:* (53) 59 49 00. *Telex:* 40033. *FAX:* (53) 59 09 59. *Cables:* Kupdanref. *Contact:* Leif von Gersdorff, Refinery Manager.

HADERSLEV: 55.15 N. 09.29 E. (See Plan)

DOCUMENTS: See "Copenhagen".
PILOTAGE: Aarosund Pilot station.
ANCHORAGES: Aarosund.
RESTRICTIONS: No lights in the fjord or harbour. Also see "General" before first port.
MAX. SIZE: Length 110 m.; width 17 m.; depth 6.0 m.
HEALTH: See "Copenhagen".
RADIO: Lyngby Radio.
VHF: Haderslev Harbour Office. Channels 16, 12 and 13.
TUGS: No tugs available at the port. Tugs can be arranged from a nearby port.
MEDICAL: Hospital facilities available.
FRESH WATER: Fresh water from quay.
FUEL: Available by truck.
CONSULS: Swedish, French, Belgian.
REPAIRS: Small repairs available.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Carried out by the crew.
CUSTOMS ALLOWANCES: See "General" before first port.
REPATRIATION: No facilities.
AIRPORT: 15 km. from Haderslev.
TIME: GMT plus 1 hour.
HOLIDAYS: Discharging/loading can be arranged on holidays.
POLICE/AMBULANCE/FIRE: Police, 74522525; Ambulance, 112; Fire, 112.
TELEPHONES: No facilities.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Container provided on the quay.
WASTE OIL DISPOSAL: Can be arranged through the Harbour Office.
SEAMAN'S CLUBS: None.
CURRENCY: Danish Kroner(DKK).
AUTHORITY: J. C. Hansen, Honnorkajen 3, Box 11, 6100 Haderslev, Denmark. *Tel:* (74) 522404/522405. *Telex:* 51596. *Cables:* Maltsand. *FAX:* (74) 525639. *Contact:* F. Guldbrandt, Harbour Master.

HADSUND: 56.42 N. 10.06 E.

PILOTAGE: Available. Tel: +45-98-541955.
MAX. SIZE: LOA 120 m., beam 14 m. and draft 5.10 m.
TUGS: Available.
CRANES: Mobile cranes and conveyor belts available.
FRESH WATER: Available.
FUEL: Available.
AUTHORITY: Harbour Master. Tel: +45-98-57-1558.
AGENT: P. Rudbeck Larsen's Eftf. ApS., Daniavej 19, DK-9550 Mariager, Denmark. *Tel:* +8-58-31-88.

HANSTHOLM: 57.07 N. 08.36 E. (See Plan)

PILOTAGE: The pilotage duty at the Hanstholm Harbour is attended to by a local Harbour Pilot. According to Provision No. 301 of 10th May 1991 by "Sofartsstyrelsen" (the Danish Maritime Authority), vessels of more than 450 g.r.t. must carry a Pilot upon arrival and departure from Hanstholm Harbour. Vessels registered locally are, however, exempted from this provision.

Skippers of vessels of less than 450 g.r.t. who are not familiar with the conditions, are recommended to carry a Pilot or, before arrival or departure, to collect information from the port guard about the immediate conditions.

Masters should be especially aware that East-going winds can cause up to 1.5 m. low tide, and therefore it is very important under such weather conditions to carry a Pilot, or to collect information from the harbour guard about the immediate conditions.

Such requests can be made by calling the port guard either on the VHF Channel 16 or via Skagen Radio.

An order for pilotage should be given to the Pilot Office 6 hours before expected arrival.
RESTRICTIONS: Max. speed in port is 3 knots.
MAX. SIZE: LOA 130 m., beam 25 m. and draft 6.5 m.
BERTHING: See "Plan".
Harbour Area: The harbour area consists of the harbour itself, the Roshagemolen Jetty East of the harbour, and the adjoining land West, South and East of the harbour.

Furthermore, the following areas belong to the harbour area:
(a) The expanse of water inside the outer jetties of the harbour.
(b) A 200 m. wide expanse of water outside the outer jetties of the harbour.
(c) A 200 m. expanse of water around the Roshagemolen Jetty.
(d) A 200 m. expanse of water off the harbour's land area.
CRANES: Mobile cranes available.
FRESH WATER: Available.
FUEL: Available by tanker truck at certain berths.
REPAIRS: Facilities available.
DRY DOCK: Floating dock for vessels up to 1,500 tons.
GENERAL: It is prohibited to place a vessel anywhere except at those stretches of quay allocated for the particular size and type of the vessel. Vessels not registered locally are obliged to contact the port guard to have a berth assigned to them.
Rules for Sailing: "Regler for sejlads m.m. i visse danske farvande" (Rules for Sailing, etc. in Certain Danish Waters) apply to sailing within the harbour area, with the exceptions that;
the outward bound ship should wait;
in the dock, the maximum speed is 3 knots.
Regulations: To maintain law and order, the "Standardreglement for overholdelse at orden m.v. i (ved) danske havne (broer)" (Standard Rules for the Observation of Order etc. in Danish Harbours (Bridges)) is in force, including the following amendments:

Delivery of fuel from a tank lorry to a vessel in the harbour may only take place along certain quays pointed out by the harbour officials.

A vessel which is moored on the outer side of another vessel must use fenders between the two vessels.
AUTHORITY: Port of Hanstholm, Harbour Office, Auktionsgade 39, DK-7730 Hanstholm, Denmark. *Tel:* +45 97 96 1833. *FAX:* +45 97 96 2494.

HELSINGOR (Elsinore): 56.02 N. 12.37 E. (See Plan)

DOCUMENTS:
1 Cargo Manifest.
2 Crew and Passenger Lists.
2 Tobacco Lists.
2 Stores Lists.
Measurement Certificate or Registry Certificate.
PILOTAGE: Cable address: "Soundpilot". Telex: 27515 Sundet Dk. Tel: 31-386700. VHF: Channels 16, 13 and 12. Address: The Sound Pilot Station, Marmorvej 1, Frihavnen, DK-2100 Copenhagen, Denmark.

For vessels entering The Sound from Kattegat, Pilots can be ordered from "Soundpilot" via coast radio.

The following details are to be given:
1. Name and call sign.
2. ETA position from where pilotage is required.
3. Gross tonnage and draft.
4. Sea speed.
5. Pilotage requirements.

Pilots perform pilotage duties to all ports in The Sound, through The Sound and to any Baltic port. There are some exceptions to ports of Russia.

Pilots should be ordered 6 hours prior to ETA Buoy "M1" and the message should be confirmed or corrected 1 hour prior to ETA "M1".

Pilot cutter, orange hull and superstructure, "Pilot" painted on superstructure.

Boarding by Buoy "M1".
ANCHORAGE: South of the port, in the roads of Helsingor, depths from 19 m. to 25 m. with sand or loose clay bottom.
RESTRICTIONS: The Port Authority must be informed 15 minutes before arrival/departure/shifting on VHF Channel 16. Ship departing waits for ship entering. When a vessel gives signal to enter (1 long whistle or blast) it is regarded as an entering vessel.
MAX. SIZE: Up to 21 ft. 06 in. draft. Also see "General" before first port.
VHF: Harbour Office of Helsingor call VHF Channel 12.
TUGS: Tugs come from Copenhagen at 2-3 hours notice or Helsingborg in Sweden.
BERTHING: Vessels berthed in order of arrival.
MEDICAL: Hospital and medical facilities available.

FRESH WATER: Approx. 15 tons of fresh water per hour delivered through 1.5 in. hoses at the berths.
FUEL: Available by lorry or barge from Copenhagen.
WATCHMEN: Not required.
CUSTOMS ALLOWANCES: See "General" before first port.
DRY DOCKS: No facilities available.
AIRPORT: 1 hour by car to Copenhagen International Airport.
TIME: GMT plus 1 hour.
HOLIDAYS: Work can be performed all the year round.
POLICE/FIRE/AMBULANCE: Police Tel: 49.211448; Ambulance/Fire Tel: 112.
TELEPHONES: Telephones are only available on board in particular circumstances.
SHORE LEAVE: Crew are free to go ashore.
IDENTIFICATION CARDS: Crew need passports.
GARBAGE DISPOSAL: There are drums and containers provided alongside ships, and charges are included in the port charges according to Baltic Convention. Service is available every morning, except Saturday and Sunday. Telephone 49210515 for service.
WASTE OIL DISPOSAL: Waste oil disposal is available by mobile truck. Koster Enterprise, Roskildevej 167, 3400 Hillerod. Tel: 42260200.
SEAMAN'S CLUBS: None.
CURRENCY: Danish Kroner. Banks available.
AUTHORITY: Helsingor Havnekontor, Sophie Brahesgade 1, DK-3000 Helsingor, Denmark. *Tel:* 49-210515. *FAX:* 49-217299. *Contact:* John Christensen, Harbour Master.

HIRTSHALS: 57.35 N. 09.57 E. (See Plan)

DOCUMENTS:
1 copy Crew List.
1 copy General Declaration.
1 copy Ship Stores.
1 copy Crew Declaration.
1 copy Cargo Manifest.
1 copy Dangerous Cargo List.
PILOTAGE: Not compulsory, but available through Harbour Office.
ANCHORAGES: No anchorage in the vicinity.
MAX. SIZE: LOA 150 m., beam 25 m., max. draft 7.5 m.
HEALTH: Free Pratique on arrival.
RADIO/VHF: Lyngby Radio – 2181 kHz or VHF Channel 16. Hirtshals Harbour Radio VHF Channel 16.
TUGS: 1×7 ton bollard pull tug available to assist with berthing.
BERTHING: 5,000 m. of wharves with depth up to 7.5 m.
CRANES: Mobile cranes can be hired.
SPECIALISED CARGO HANDLING FACILITIES: One Ro/Ro ramp. Two ferry berths. 70,300 cu.m. storage for refrigerated and frozen cargo.
STEVEDORES: Firm ETA to Agent required, if possible before 1200 hrs. on day before arrival.
MEDICAL: No advance notice necessary for medical treatment, as doctors and hospital facilities are available.
TANKERS: No facilities.
DENSITY: 1025.
FRESH WATER: Available at all berths by hose.
FUEL: All grades available.
CONSULS: Iceland and Sweden.
REPAIRS: Shipyard facilities, machine shops, slips for vessels up to 1,200 tons.
DRY DOCKS: Floating dock for vessels up to 1,500 tons and 1 covered dock for vessels up to 2,300 tons.
SURVEYORS: Classification society and cargo surveyors available.
GANGWAY/DECK WATCHMEN: The employment of watchmen from shore is not compulsory.
HATCHES: Normally opened and closed by ship's crew.
REPATRIATION: All facilities exist for dealing with crew and passenger repatriation.
AIRPORT: Alborg Airport (60 km.) served by regular airlines to Copenhagen.
TIME: GMT plus 1 hour. Summertime GMT plus 2 hours.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Prayer Day; Ascension Day; Whit Monday; Christmas Day; Boxing Day.
POLICE/AMBULANCE/FIRE: Police Tel: 98941922; Medical Services Tel: 98941177; Emergency Tel: 112.
TELEPHONES: Public telephones available.
BANKS: All major Danish banks have branches in the area.
GARBAGE DISPOSAL: In dock, collection service available alongside vessel for galley waste. Contact Harbour Office.
WASTE OIL DISPOSAL: In dock, connection service to vessel alongside by tanker trucks. Contact Harbour Office.
CURRENCY: Danske Kroner (DKK).
AUTHORITY: Hirtshals Havn, Norgeskajen 11, (P. O. Box 3), 9850 Hirtshals, Denmark. *Tel:* 98941422. *FAX:* 98944293. *Contact:* E. Sondrup, Port Manager. F. Brinch Hansen, Harbour Master.

HOLBAEK: 55.43 N., 11.43 E. (See Plan)

PILOTAGE: Pilot boards at Hundested. Sound Pilot Station on VHF Channel 13.
MAX. SIZE: Max. draft at present when passing Hundested 6.30 m. Port dredged to 6.60 m.
VHF: Channel 16.
TUGS: Available.
CRANES: 1×140 ton and 1×40 ton SWL cranes available.
STEVEDORES: Working hours: 0700 1530 Monday to Friday. Overtime possible if required.
MEDICAL: Services available.
FRESH WATER: Available.
FUEL: Available.
CONSULS: At Copenhagen.
REPAIRS: Possible.
DRY DOCKS: No facilities.
CUSTOMS ALLOWANCES: Kalundborg Custom House is the authority.
REPATRIATION: Facilities available.
AIRPORT: Nearest airport at Copenhagen (Kastrup) – 70 km.
GARBAGE DISPOSAL: Reasonable amounts are collected free of charge, during normal working hours, if normal ship's dues are paid. Otherwise ship is to pay actual cost. Notice to Port Authority.
WASTE OIL DISPOSAL: Reasonable amounts are collected by truck free of charge, provided proper notice to port and during normal working hours. Normal ship's dues to be paid otherwise ship is to pay actual cost.
SEAMAN'S CLUBS: None.
CURRENCY: No restrictions. Money can be changed at local banks.
AUTHORITY: Holbaek Port Authority, P.O. Box 120, 4300 Holbaek, Denmark. *Tel:* 53-430161. *FAX:* 53-433913. *Contact:* Lenart Andersson, Harbour Master (After hours Tel: 59-443028).

HORSENS: 55.52 N. 09.52 E. (See Plan)

DOCUMENTS:
Crew List
List of Tobacco.
Manifest (for Agents and Stevedores).
Bills of Lading (for Agent's use).
Ship's papers:
International Load Line Certificate.
Certificate of Register (international letter of measurement).
Derat Certificate.
Radio Safety Certificate.
PILOTAGE: Pilot station is situated at Juelsminde. Normally pilot boat will be located South of Lillegrund.
VHF: Channels 6, 12 and 16. Advance notice of 2 hours required.
ANCHORAGE: No special anchorages at the firth; vessels may anchor where safe navigation permits – attention is called to cable area at Hjarno Sound.
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Max. length, approx. 500 ft.; max. breadth, approx. 70 ft.; max. draft, approx. 22 ft. A dredged channel 32 m. wide and 6.9 m. deep leads to the harbour.
HEALTH: Inform Agent or Port Authorities in advance in event of any suspected disease or fever on board. Normally no necessary procedure to obtain pratique. Pratique is automatic after calling at another Danish port.
RADIO: VHF at Harbour office, Channels 9, 12, 13 and 16.
TUGS: Tug "Vitus", 1,000 h.p., stationed in the harbour.
STEVEDORES: For working Monday morning ETA must be given Friday during office hours. Otherwise ETA must be given the day before work to commence. One suction apparatus for discharging grain. Normally the cargo is handled by shore cranes. There are 6 piece-goods cranes available.
MEDICAL: No advance notice required. Hospital facilities available.
TANKERS: Discharge lines diameter: 6 in. and 8 in. Four berths for tankers, 1 at Gropa with 5.6 m. of water alongside, 1 at DAK with 6.9 m. of water, 1 at KH with 6.9 m. of water and 1 at Nynas Johnson.
FRESH WATER: Delivered alongside from shore connections.
FUEL: All types of light fuel available.
CONSULS: Finland, 75-623433; Norway, 75-624666; Iceland 75-624811.
REPAIRS: No shipyard – only small repairs can be carried out.
GANGWAY/DECK WATCHMEN: No service of watchmen necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew, but can be done by stevedores.
CUSTOMS ALLOWANCES: See "General" before first port.
REPATRIATION: No special facilities for effecting crew changes exist.
AIRPORT: Distance from airport about 50 km., with regular airlines.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summertime from last Sunday in March to last Sunday in September.
POLICE/AMBULANCE/FIRE: Dial 112. Fire alarms placed around the port.
TELEPHONES: Not available on board vessels.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not needed.
DELAYS: No delays can normally be expected. Larger ships with big draft may expect delay during nights with poor visibility. They have to wait for daylight in order to enter port through dredged channel.
AUTHORITY: Havnemesteren, Havnen 5, 8700 Horsens. *Tel:* 75-621014, 75-621433. *FAX:* 75-621457. *Contact:* Jorgen M. Olsen, Harbour Master.

KALUNDBORG: 55.41 N. 11.06 E. (See Plan)

Also see Port of Asnaes.

(A) KALUNDBORG HARBOUR.
(B) STATOIL A/S OIL TERMINAL.

(A) KALUNDBORG HARBOUR.

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Derat Certificate or exemption.
Bill of Lading (if cargo).
Crew List.

Customs need a Tobacco and Spirit List, showing the vessel's and the crew's supply by arrival.

PILOTAGE: Not compulsory. Pilot station situated at Kalundborg, telegram: Kalundborg Pilot, Tel: Kalundborg 5351-0200. Green vessel carrying international signal flag or lights for Pilot. Contact by VHF Channels 16, 12 and 6. Pilot is taken on board at the entrance of Kalundborg Fjord.

Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to "Danpilot, Region Skagen", at least 12 hours in advance, Danpilot listening on VHF Channel 16.

ANCHORAGE: Large vessels anchor in 42 ft. of water outside between Rosnaes and Asnaes; S.W. to N.W. winds cause swell but holding ground is good. Small vessels anchor between Gisselore Point and Harbour, from where channel leads to harbour.

Tankers: The anchorage is approximately 4 – 5 miles W.N.W. of the Oil Pier. Particulars regarding the anchorage will be given by the Pilot.

RESTRICTIONS: *Tankers:* Depth in channel and at entrance 39 ft. 4 in., entrance width 131 ft. Also see "General" before first port and "Section B".

Kalundborg Harbour: Depth of Entrance Canal: 12.0 m. Bottom width of Entrance Canal: 100 m.

MAX. SIZE: See "Berthing" and "Section B".

HEALTH: Pratique granted by Customs Officers who bring Health Declaration for Masters to complete. In event of suspected disease or fever on board radio details to Agent before arrival.

RADIO: *Arrival Message:* The Masters of deep-sea vessels are requested to advise their Agents of their ETA 72 hours in advance, and again 24 hours before ETA. For other vessels operating in Scandinavian waters, a 24 hours ETA notice will be required. For coastal traffic in Danish waters, ETA is required when departing for Kalundborg. If there should be any significant change in the ETA over 2 hours, additional advice is required.

VHF: Harbour office on Channel 16 (0700 – 1600 hrs.).

TUGS: Available, normally join vessel off harbour, often using vessel's lines. If tug's lines are used, an extra charge will be made.

Tankers: See "Section B".

BERTHING:

Kalundborg Harbour:

West Harbour: Length 400 m., width 60 m., depth 6 m. Quay I: Length 250 m., depth 6.0 m. Quay II: Length 125 m., depth 6.0 m. Quay III: Length 80 m., depth 6.0 m.

East Harbour: Length 260 m., width 130 m., depth 7 m. – 8 m. Quay VI: Length 240 m., depth 8.0 m. Quay VII: Length 170 m., depth 10.0 m. Quay VIII: Length 70 m., depth 7.0 m. Quay IX: Length 280 m., depth 7.0 m. Quay X: Length 245 m., depth 8.0 m.

South Harbour: Oil Quay: Length 170 m., depth 8.5 m. Quay XII: Oil and General Cargo, length 450 m., depth 10 m. – 12 m.

Quay Nos. II-X and XII equipped with ramps.

Railway on quays in the East and the South Harbour.

STEVEDORES: Available, ordered by Agent, no ETA to stevedores necessary.

CRANES: The following cranes are available from the Port Authorities:

1. One mobile crane (lattice crane).
   Capacity: Radius 11 m. – 25 tons – lift height 25 m.
   Radius 29 m. – 12 tons – lift height 25 m.
   The crane can be mounted with a 5,500 litre prehensile scoop to unload grain, gravel, fertiliser, etc.
2. One P.P.M. 23.09 mobile crane (telescope).
   Carrying capacity with 4 m. jib: 15.2 tons. Lift height 14.5 m.
   Carrying capacity with 6 m. jib: 8.7 tons. Lift height 20.0 m.
   Carrying capacity with 15 m. jib: 2.3 tons. Lift height 21.5 m.
3. One 12-ton 14/25 tons gantry rocker crane.
   Lift height above trails 25 m. in hook operation.
   Carrying capacity with 28 m. jib (18.5 m. from quayside): 14 tons.
   Carrying capacity with 18 m. jib (14.5 m. from quayside): 25 tons.
   Mounted with 6,000 litre prehensile scoop: 7 tons excluding weight of scoop with 28 m. jib (18.5 m. from quayside).

Also see "Berthing".

MEDICAL: Hospital and doctors available.

TANKERS: See "Section B".

DENSITY: 1011.

FRESH WATER: Available, supplied from shore by hose, about 15 t.p.h. 25 t.p.h. in Oil Harbour.

FUEL: All grades available, 24 hours ETA required by truck or barge (Statoil, BP).

FIRE PRECAUTIONS: No smoking allowed.

CONSULS: Norway: Mr. Jorgen Moller, Consul. Tel: (53) 51.19.01.
Sweden: Mr. H. Meredin Petersen, Vice-Consul. Tel: (53) 51.00.51.

REPAIRS: All types of repairs available.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: See "General" before first port.

REPATRIATION: All facilities exist.

AIRPORT: Nearest at Copenhagen about 80 miles from Kalundborg. Served by regular airlines.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day; Easter Thursday; Good Friday; Easter Monday; Ascension Day; 1st May; Whit Monday; Prayer Day; 5th June; Christmas Day; 2nd Christmas Day. No work can be carried out.

POLICE/AMBULANCE/FIRE: Police (53) 51.14.48. Hospital: (53) 51.10.01.

BANK: Den Danske Bank, Kordilgade 18, DK – 4400 Kalundborg. Tel: (53) 51.08.00. Open 9.30 a.m. – 4.00 p.m. (closed Saturday and Sunday).

SHORE LEAVE: Allowed.

SHIP SUPPLY SERVICES: Schierbeck's Supply Service, Njalsgade 21, 2300 Copenhagen S. Tel: (31) 57.00.66 (day and night). Cables: Schierbeck Copenhagen. Telex: 31143. Maximum cargo 8 and 40 tons. Maximum 12 passengers.

Kalundborg Supply Service, Ulshojvej 25, 4400 Kalundborg. Tel: (53) 51.20.42 and 51.69.17. Maximum cargo 10 tons. Maximum 12 passengers.

Service: 24 hours.
Rendezvous position for deep draft vessels:
Lat. 55° 43.5' N. Long. 10° 47.8' E.
Notice: 6 hours' notice required through Agent.

Supply vessel: "Kalundborg Supply" is an ultra modern supply boat equipped to the standards approved by the Danish Government Inspection of Ships.

She was built and delivered in 1982 and has 2×150 h.p. engines with twin screw which delivers a service speed of 16.5 knots. Her loading capacity is 10 tons with a deck space of 5 m.× 3 m.

Wulff's Eftf. I/S Skibshandel, 8 Skibbrogade, DK-4400 Kalundborg. *Tel:* (53) 510345. After office hours (53) 513706 and (53) 508720. *Telex:* 44359. *Cable Address:* Wulffsef Kalundborg Territory: Kalundborg, Kalundborg Roads, Great Belt and Stigsnaes. Can also deliver provision, bonded stores, deck and engine stores.

IDENTIFICATION CARDS: Not required.

DELAYS: Due to ice between 15th December and 31st March.

GARBAGE DISPOSAL: Skip provided free of charge on pier for disposal of garbage from last sea passage. For garbage collected during stay, skips can be ordered through agent at a cost of approx U.S.$200.

WASTE OIL DISPOSAL: Mineral oil, *free of chemical additives,* is received free of charge by the refinery. Used lub oil, either in drums or up to 10 cu.m. by tanker truck, is also received free of charge. Contact ship's agent for information.

SEAMAN'S CLUBS: None.

CURRENCY: Danish Kroner.

AUTHORITY: Kalundborg Port Authority, P.O. Box 50, Vester Havneplads 7, DK-4400 Kalundborg, Denmark. *Tel:* Harbour Board (51) 51.01.88. Harbour Master (53) 51.01.88. *FAX:* (53) 510089.

(B) STATOIL A/S OIL TERMINAL:

LOCATION: Statoil A/S's refinery is situated at the bottom of Kalundborg Fjord in the island of Zealand, at Lat. 55° 40.6' N., Long. 11° 5.5' E. Largest chart of Kalundborg Fjord: B.A. No. 2596/D.A. No. 145.

DOCUMENTS: The following documents are required on arrival and for clearance:
Ship's Registration.
Load Line Certificate.
Safety, Radio and Telephony Certificates.
Safety Equipment Certificate.
Derat Certificate.
Crew List.
Construction Certificate.
Tobacco and Spirits List.
Oil Pollution Certificate.
B/L (if carrying cargo).
Certificate of Origin (T2L.EUR1).

In addition, a list of tobacco and spirits must be presented to the Customs service, showing the ship's and crew's supply on arrival.

PILOTAGE: For vessels over 5,000 d.w.t., a Harbour Pilot must always be used. In case of special reasons, an exemption from this rule can be granted by the Pier Master.

A Harbour Pilot must be used for vessels under 5,000 d.w.t. unless the Master has called at the port with the same ship for more than 5 times within the last 6 month.

Pilot Office: Tel: 53510200, 59565300. Fax: 59561700.

ANCHORAGE: The anchorage is 4 – 5 nautical miles W.N.W. of the Oil Pier. Closer information concerning the anchorage will be given by the Pilot.

RESTRICTIONS: The pier is open to navigation day and night, apart from restrictions under special weather conditions.

Navigation Restrictions: The harbour is closed to traffic when the wind force exceeds 23 m./sec. (Force 9), or when the visibility is less than one ship's length.

Pier A and B: If the wind direction is between S.W. and N.N.W., and the wind force is between 15 m./sec. (Force 7) and 23 m./sec. (Force 9), the Loading Master together with the Master/Pilot will in every case evaluate whether arrival/departure can take place safely, if tugs shall be used or vessel must wait for an improvement in the weather conditions.

Pier C: If the wind direction is between S.W. and North, and the speed is between 15 m./sec. (Force 7) and 23 m./sec. (Force 9), the Loading Master together with the Master/Pilot will in every case evaluate whether arrival/departure can take place safely, if tugs shall be used or vessel must wait for an improvement in the weather conditions.

MAX. SIZE: See "Berthing".

HEALTH: See "Section A".

RADIO: *Arrival Advice:* For crude and ocean-going vessels the Master is requested, through the ship's Agent, to inform the Refinery of the ETA 72 hours before arrival, and again 24 hours before arrival.

For vessels which operate in Northern waters, ETA is to be given 24 hours before arrival. For local traffic, ETA is to be given on departure for Kalundborg. If there should be changes in ETA, in excess of 2 hours, this has to be reported to the Refinery via the Agent or over VHF and mobile telephone.

VHF: Calls to the pier are made on VHF Channel 16. The working frequencies of the pier are Channels 9, 10, 12 and 14.

About 5 nautical miles before arrival, the pier is called on VHF, and the vessel informs the Pier Foreman of the precise time of arrival.

TUGS: Tugs are to be ordered through the Agent according to the scheme below. The minimum requirements for tug assistance under normal weather conditions (wind force below 10 m./sec.) are as follows:

	Vessel's Size (k.d.w.t.)	*Number of Tugs*	*Total Min. h.p.*	*Min. Bollard Pull* (tonnes)
Pier A	16-26	2	3,500	36
Arrival	26-56	3	5,000	75
	56-70	3	7,500	85
	70-90	4	9,500	120
	90-120	4	11,000	130
Pier A	10-16	1	1,800	17
Departure	16-56	2	3,500	36
	56-120	2	5,000	60
Pier B	16-	2	3,500	36
Arr./Dep.				

For vessels over 16 k.d.w.t. equipped with bow thruster the number of tugs is reduced by 1, however, by not more than 1,500 h.p.

If the wind force exceeds 10 m./sec. then with due regard to the expected weather situation for the area, the Shipmaster, the Pilot of the watch and the Refinery must come to an agreement on whether the vessel shall wait for a weather improvement, or whether the tugboat capacity shall be increased.

Mooring Boats: Mooring boats and men must be used, and are available from Kalundborg Boat Service.

Speed: Ships, which call at the pier without tugboat assistance, must reduce their speed to an absolute minimum before passing the outer dolphins. Prior to this, a realistic astern movement must have been made in order to ensure that the reversing functions satisfactorily.

BERTHING:

PIER A:

Max.vessel size 130,000 d.w.t.

Max.vessel LOA – 262 m. (870 ft.).

Max.freeboard 46 ft.

Max.draft for vessels up to 70,000 d.w.t. 12.50 m. (41 ft.) in brackish water (1010) at normal water level.

Max. draft for vessels over 70,000 d.w.t. 12.19 m. (40 ft.) in brackish water (1010) at normal water level.

Discharge of crude oil takes place via 2×12 in. cargo hoses fitted with 12 in. ASA flanges for a 30 in. pipeline to the Refinery. The 30 in. crude oil line to the Refinery is about 2 km. long. Discharge rate for crude oil is about 5,500 cu.m.p.h. at maximum pressure. Max. loading/discharge pressure on the product and crude oil line is 7 bar.

During discharging through the crude oil line, the line pressure will be monitored at the Pier Office.

The following products are available at Pier A:

JP1, JP8	loading/discharge	6 in. ASA flange
Naphtha	loading/discharge	6 in. ASA flange
Gasoline	loading	2×6 in. ASA flange
Gasoline	loading	2×6 in. ASA flange
Autodiesel	loading/discharge	2×6 in. ASA flange
Gas oil	loading/discharge	2×6 in. ASA flange
Marine gas oil/motor gas oil	bunkering	
Various fuel oil grades	loading/discharge	2×6 in. ASA flange
Crude oil	discharging	6 in. ASA flange

PIER B:

Max.vessel size 16,000 d.w.t.

Max.vessel LOA 171 m. (560 ft.).

Max.draft 10.50 m. in brackish water (1010) at normal water level.

Max.loading/discharge pressure on crude oil and product lines is 7 bar.

The following products are available at Pier B:

JP1, JP8	loading/discharge	6 in. ASA flange
Naphtha	loading/discharge	6 in. ASA flange
Gasoline	loading	2×6 in. ASA flange
Gasoline	loading	2×6 in. ASA flange
Autodiesel	loading/discharge	2×6 in. ASA flange
Gas oil	loading/discharge	2×6 in. ASA flange
Marine gas oil/motor gas oil	bunkering	
Various fuel grades	loading/discharge	6 in. ASA flange
Crude oil	discharge	6 in. ASA flange

PIER C:

Max.vessel size 5,000 d.w.t.

Max.vessel LOA 110 m. (360 ft.).

Max.draft 7.5 m. in brackish water (1010) at normal water level.

Max.loading/discharge pressure on the product line is 7 bar, however, max. pressure on the LPG system is 19 bar.

The following products are available at Pier C:

Gasoline	loading	2×6 in. ASA flange
Gasoline	loading	2×6 in. ASA flange
Autodiesel	loading/discharge	2×6 in. ASA flange
Gas oil	loading/discharge	2×6 in. ASA flange
Marine diesel	bunkering	
Marine gas oil/motor gas oil	bunkering	
HFO	loading	6 in. ASA flange
LPG	loading	6 in. ASA flange
Crude oil	discharge	6 in. ASA flange
JP 1, JP 8	loading	6 in. ASA flange

CARGO HANDLING: On any receipt of cargo, a representative of Statoil A/S will come on board on arrival of the ship, and together with the ship's Chief Officer make a complete cargo calculation, and also take out an average sample of all the ship's tanks intended for Statoil A/S.

Any measurement of free water on arrival, and also Remaining On Board (ROB) after discharging, will be corrected for possible trim.

If the quantity of ROB is more than 0.1% of the B/L, samples will be taken of the ship's tanks that contain relatively large ROB, for later reference, but in this connection it is important to point out that Statoil expect that the ship does its utmost to drain both ship's tanks and pipe systems satisfactorily.

If the ship is not furnished with a satisfactory "Vessel Experience Factor", then this is calculated in concert with a Representative of Statoil A/S, and this factor is used for cargo calculation. About 1 hour after finishing the discharge, a Representative of Statoil A/S will come on board and present a preliminary statement of the discharged quantity, as compared with B/L and sea transport.

The following shipping documents are to be handed over to Statoil A/S:

Tank Condition Certificate – Prior Loading.
Bill of Lading.
Quantity Certificate.
Quality Certificate (Laboratory Report of Tests).
Copy of any Protest issued to Loading Terminal.
Vessel Ullage Report – Loading/Discharging.
Dry Certificate or Post Discharge Vessel Ullage Report.
Sealed Samples from Loading Port, if available.

Working Procedure for LPG-Arm:

1. On arrival, attempts are to be made to position the ship in such a way that the Loading Arm gets the greatest possible freedom of motion when mounted on the manifold.
2. During cargo handling, the ship shall always lie within the operating range of the Loading Arm.
3. If one of the Loading Arm's limits is reached, an alarm consisting of a yellow quick flash signal, on a mast behind the Loading Arm will be activated. At the same time, an alarm will be activated at the pier office.
4. When the loading operation is complete, and the Loading Arm is drained empty, this is purged with nitrogen from ashore.
5. In case of a critical situation, the shore valve and pump are closed by using the yellow actuator box placed onboard.

There is no danger connected with the closing of this valve, as there are expansion systems at the pier.

IMPORTANT: The Loading Arm must only be operated when it is empty of liquid, as otherwise it will be out of balance.

BALLAST: Ballast shall be discharged to a ballast tank ashore, with the exception of pure ballast water from clean permanent ballast tanks.

The ballast tank ashore can hold 4,500 cu.m.; there is usually about 2,000 cu.m. available.

It is important that all ships, which are to pump ballast water, as early as possible inform the Pier Foreman over VHF about the quantity of ballast water to be pumped ashore. Tankers of 7,000 d.w.t. and more, that wish to use the ballast facilities, shall as early as possible advise the pier via the ship's Agent of the quantity of ballast/purified water, which can be expected on arrival, as well as of the last cargo type.

The Refinery will only accept ballast water from ship's tanks, which on the previous voyage have contained mineral oil products. Ballast water, containing any kind of chemicals, cannot be accepted. While the ship is alongside the pier, all sea and overboard discharge valves in connection with the cargo system, must be kept closed and sealed. The sealing must only be broken in concert with the Pier Foreman.

On taking in ballast alongside the pier, sea valves must not be opened until the pump is working, and the other valves are open. Ballast tanks must not be filled higher than ullage 7 ft.

It is important in this connection to emphasise the danger of ballasting in tanks not free from gas. Watch out for gas concentrations both on the ship and at the pier, and reduce the ballast intake, if necessary.

Tank Inspection: Prior to loading, the tanks are to be inspected for water, impurities, and foreign matter by the pier personnel.

During the inspection, the loading valves must remain open so that there is no liquid in the pipes.

The inspection is to be done from the deck through the hatches or sounding holes by using torches or mirror.

The pier personnel are not allowed to enter ship's tanks without special permission.

Before entering a ship's tank, a permit must be obtained from the Pier Foreman, and only after having made sure personally and in concert with the Ship's Officer on duty that the situation is such that entering the tank is justifiable.

Inert Gas System and Tank Cleaning with Crude Oil: The Refinery does not make additional demands on Inert Gas Systems and tank cleaning with crude oil than those described in international regulations (IMO) and VIM 020-040-005.

It is the Master's direct responsibility to ensure that the inert gas plant is operated according to instructions, and that tank cleaning with crude oil is carried out safely and efficiently, and that the officers, who are responsible for the cargo handling, are familiar with all rules and procedures for controlling the system.

The Refinery will normally require a 100% COW of all cargo tanks designated for discharging in Kalundborg, for crude oil with a density higher than 0.8600.

If the ship is unable to maintain a positive pressure in the cargo tanks, or cannot maintain less than 8% oxygen in the tank atmosphere, the Shipmaster will be requested to shift to anchor until the inert gas plant is operative again, allowing for the risk of self-ignitable iron sulphides.

Prior to cargo handling, the responsible officer will be requested in concert with the Pier Foreman, to fill in Safety Check Lists and a Check List for COW so that the ship as well as the Refinery may be sure that cargo handling can be commenced within the existing minimum safety regulations for the operation.

MEDICAL: Medical and dental treatment are arranged by the ship's Agent.

FRESH WATER: The ship can be provided with fresh water at a delivery rate of approximately 25 t.p.h. Cost U.S.$ 3.00 per ton.

FUEL: Bunkers and lubricating oils can be supplied through the Agent. Orders should be given in good time through the Agent before arrival.

CONSULS: Norway and Sweden.

SURVEYORS: Marine Surveyors representing Lloyd's, Caleb Brett, S.G.S. and Saybolt available at the port. Further information can be obtained from the ship's Agent.

POLICE/AMBULANCE/FIRE: Tel: 53511448 or 112.

TELEPHONE: A pay phone for international calls is installed in the Pier Office building.

BANKS: Unibank. Tel: 53511111. Fax: 53512311.

Den Danske Bank. Tel: 53510063. Fax: 53515776.

SHIP SUPPLY SERVICE: Kalundborg Boat Service. Tel: 53510200. Fax: 59561700.

The company operates a craft on Kalundborg Roads for transfer of crew, stores, etc. Charge rate is U.S.$ 140.00 per hour.

GARBAGE DISPOSAL: Skip provided on pier, where garbage collected from last port can be placed, free of charge.

Skip can be ordered in advance through Agent. Charge: About U.S.$ 200.00.

WASTE OIL DISPOSAL: Mineral oil without chemicals is received free of charge by the Refinery. Collection service is available for waste oil containing lub oil and chemicals. The charge is about U.S.$ 60.00 per ton. The ship's Agent has to be notified in advance to make arrangements with the contractor and the Port Captain.

SAFETY: *Mooring:* The ship shall be moored satisfactorily, and the ropes held taut during the entire stay at the pier. Steel wires must not be used for mooring unless they have rope tails and these are fastened on quick-release hooks. Wires and fibre ropes shall not be used together in the same direction.

Anchors not being used shall be secured.

Fire Wires: Fire wires shall be placed correctly fore and aft. Wire eyes shall be placed directly below the waterline, and adjusted regularly during cargo handling. The ends shall be properly secured to the ship's bollards, and have sufficient slack on deck. The slack of these wires shall be so secured that it can easily be broken by tugboats.

Access between Ship and Pier: Immediately after completing mooring, the ship shall land a gangway ashore. The landing may consist of an adequately mounted gangway or accommodation ladder.

At Pier A, larger ships have a gangway from the shore. Special consideration has to be given to the difference in height between ship and pier which may grow large.

Emergency escape: In connection with the normal gangway/accommodation ladder described above, a safe and fast emergency escape possibility shall be readily accessible on both ship and pier.

On the ship, this can consist of a lifeboat ready for immediate use, placed aft.

GENERAL: *Duc d'Alba:* Ships must only moor at the pier, and not at the duc d'Alba.

Traffic at the pier: There is lively ferry traffic in the harbour. About 15 times in 24 hours, a ferry passes by the pier at a distance of 100 m. – 300 m. from the pier head.

Dry cargo ships up to 60,000 d.w.t. call at Kalundborg Harbour at a distance of approximately 500 m. from the pier head. Sailing is done at reduced speed. Tankers and bulk carriers call at Asnaesvaerket in varying sizes up to about 160,000 d.w.t.

Sailing: As soon as loading/discharge is finished, all ships have to leave the pier on request.

Lightening: According to Order No. 472 of 21st September, 1978, by the Ministry of Commerce, lightening of tankers must only take place in position 55° 42.0' N., 10° 59.8' E., and within a radius of 0.3 nautical miles. When tankers lighten in Kalundborg Fjord, other vessels must pass the area with caution and at slow speed.

Lay-time: To expedite the turn-round of vessels, the Master is requested to co-operate with the personnel ashore in order to minimise the lay-time. Any delay arising, and which can be expected to drag on, must be reported to the Pier Office so that it can contribute to solving possible problems.

Portable Receiver: On arrival of the ship, the Officer on duty is handed a portable receiver. This radio must be turned on, and be carried during the entire stay at the pier. The radio is to be tested at regular intervals.

Storing: Barges and boats are not permitted alongside any ships berthed at the piers.

Trucks with supplies are only granted permission to go alongside if no cargo handling of Class 1 products is underway.

It may be possible to unload heavy loads at the berth before the vessel arrives. Also, trucks can unload at the gate, approx. 150 m. from berth. Hand trollies are available.

Tide and Current: The difference between the average high tide and average low tide is about 0.3 m. A gale from N.W. can give a rise of 1.3 m. above the daily level, while a gale from S.E. can give a fall of 0.9 m. below the daily level. There is almost no current at the pier.

Winds: The predominant wind direction is West, but most of the gales come from N.W. Wind velocities which exceed 15 m./sec. (force 7) usually occur for about 20 hours a year from S.W., about 15 hours from West, 40 hours from N.W. and 25 hours from North.

Repair of Nautical Equipment and Instruments: Repairs can be arranged through the Agent. It is recommended that the Agent receives such requests in good time.

Sanitary Measures: Standard regulations for Danish harbours regarding sanitary conditions apply at the Oil Pier. Waste must not be thrown overboard. Special waste containers are placed at the pier. Special consideration to avoid pollution of the pier from flushing of toilet, bathroom, etc., must be taken. If the ship wishes to pump sewage ashore, facilities are available at the pier, but a minimum notice of 6 hours is required. This is given via the Agent.

Mail: The Agent delivers and receives mail from the ship.

Visitors to the Ships: Only persons doing business may come to the pier. Visitors, such as guests of the Master, can get permission to come on board, on condition that the Master has made a request to the Pier Office. Further details on permission for visitors are available on application to the Pier Office.

On arrival of the ship, magnetic cards are handed out which give access to the gate into the pier area. It is the Master's responsibility together with the ship's Agent to ensure that cards are handed out to relevant members of the crew.

Oil Spillage: Attention is drawn to the fact that there have been bad experiences with regard to oil spillage, caused by opening sea valves before having started the ballast pumps, and by tanks overflowing during loading. Very small quantities of oil that get into the water have to be removed and this can become rather costly.

In order to spare the shipping company unnecessary expenses, the responsible persons are enjoined to have their attention directed to all conditions that can cause even small oil spillages. Oil spillage comes under the authorities' sphere, and that matters of dispute as to guilt can be referred to the police.

Air Pollution: The Master must take precautions against emitting large quantities of smoke from the funnel. Use of soot blowers whilst the ship is in port is not allowed.

Inspection: The Pier Master or his deputy must at any time be admitted to all ships to see that all directions are complied with.

Agent: Immediately after arrival of the ship, the ship's Agent goes on board so that the Master can inform him of the ship's necessities. Ships which are requested to anchor outside the harbour to wait for mooring space can possibly get an Agent on board at the anchorage.

OPERATOR: Statoil A/S, Refinery, DK-4400 Kalundborg, Denmark. *Tel:* (59) 574521. *Telex:* 44343. *Cables:* Stara. *FAX:* (53) 516298, 517081. *Contact:* M.H. Thyssen, Pier Master.

KOGE: 55.27 N. 12.12 E. (See Plan)

DOCUMENTS: For Customs, vessels require:

Vessels of 150 ton and upwards, Load Line Cert.

Vessels of 300 ton and upwards, Load Line Cert., Radio Safety Cert.

Vessels of 500 ton and upwards, Load Line Cert., Radio Safety Cert., Equipment Safety Cert.

For all passenger vessels also Safety Cert.

For stevedores vessel shall have Bills of Lading, Manifests and Loading plans.

PILOTAGE: Pilotage compulsory for all tankers and vessels over 1,000 d.w.t. Vessel to call Pilot 2 hours before arrival. VHF on Pilot Station and pilot boat. Watch on Channel 16. Normal international light and sound signals used. Pilot boat located about 2 nautical miles East of port. No difference in bad weather.

ANCHORAGES: 1–2 nautical miles East of port with good bottom conditions.

RESTRICTIONS: See "General" before first port.

MAX. SIZE: Max.permissible length 150 m. Depth in harbour is 7.0 m. at datum.

HEALTH: Normal quarantine rules.

RADIO: Lyngby Radio or any other radio station in Denmark.

TUGS: 1 tug of 300 h.p. Additional tugs can be obtained from Copenhagen.

CRANES: *Port Authority:* 1 × 25 ton and 1 × 36 ton mobile cranes with hook, grab and container equipment.

Private: 1 × 12 ton mobile crane and 2 coal cranes.

STEVEDORES: Normal ETA and description of vessel required.

MEDICAL: Doctor and hospital assistance available; other facilities to be obtained from Copenhagen.

TANKERS: One tanker berth, no specific requirements. LPG also handled.

FRESH WATER: Water from wharf.

FUEL: Products are delivered in Koge, others from Copenhagen.

FIRE PRECAUTIONS: Normal fire precautions. Tankers cannot request to go to berth before loading/discharging. 2 fire watchmen from the fire department.

CONSULS: Nearest at Copenhagen.

REPAIRS: Small repairs.

DRY DOCKS: 2 small slipways for vessels up to 200 tons.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: See "General" before first port.

REPATRIATION: No facilities exist.

AIRPORT: Nearest in Kastrup Lufthavn; Copenhagen about 40 km. away.

TIME: GMT plus 1 hour.

HOLIDAYS: Normal Danish holidays, change from year to year. Normally work can be arranged.

POLICE/AMBULANCE/FIRE: Ambulance and Fire (46) 322222; Police 112 or use alarm 112.

TELEPHONE: No arrangements exist for placing on board.

WIND: Wind between N.E. and S.E. can give up to 1.6 m. HW and West wind up to 0.9 m. LW.

SERVICES: Pilot makes compass adjustments.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Garbage containers on all quays, free of charge.
WASTE OIL DISPOSAL: Waste oil is collected by tanker truck, according to MARPOL Convention.
SEAMAN'S CLUBS: None.
CURRENCY: Danish Kroner (DKr.).
GENERAL: The North Port of Koge, "Nordhavn", Lat. 55° 27' 4" N., Long. 12° 11' 7" E. Length of quayage 300 m. Depth 5.5 m.
DEVELOPMENT: Extensive developments underway. See "Plan".
AUTHORITY: Koge Havnekontor, Havnen 39, 4600 Koege, Denmark. *Tel:* 56-636113. *FAX:* 56-637400. *Contact:* Torben Jensen, Harbour Master.

KOLDING: 55.29 N. 09.30 E. (See Plan)

DOCUMENTS:

3 copies Crew List.
3 copies Crew Declaration (Tobacco, Spirits, etc.).
1 copy Tobacco List.
1 copy Stores List.

PILOTAGE: Not compulsory. Pilot station (Call: Little Belt Pilot Station – VHF Channel 16, 24 hours) at Fredericia. Serving all ports in the area of Little Belt. Tel: 75920888/75920959. Fax: 75928822.

Harbour Office to be advised of ETA/ETD one hour in advance during office hours.
ANCHORAGES: At Skaerbaek.
RESTRICTIONS: See "General" before first port. Max. speed in port is 4 knots.
MAX. SIZE: Maximum permissible length 200 m. Max. beam 25 m. Max. depth in channel is 7.0 m. at mean water.
RADIO: Lyngby Radio.
VHF: During office hours the Harbour Office is on Channel 16, working on Channels 12 and 13.
TUGS: Available (Icebreaker, 7 tons bollard pull).
BERTHING:

Sweden: Ove Gronborg, Osterbrogade 14, Kolding. Tel. (75) 522711

REPAIRS: Only small repairs can be carried out.
GANGWAY/DECK WATCHMEN: Gangway watchman not required.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: See "General" before first port.
AIRPORT: Distance from Billund Airport 40 km. Billund Airport is served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (March – September).
HOLIDAYS: See "Copenhagen".
POLICE/AMBULANCE/FIRE: Police, Tel. (75) 522800; Ambulance, Tel. (75) 522222; Fire, Tel. (75) 522222, Help, Tel. 112; Emergency, Tel: 112.
TELEPHONES: Telephones obtainable on board.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Small containers for ship's galley-waste only are placed along the piers. The port will collect drums containing waste oil, rags, etc. from ships. All kinds of waste must be sealed.
WASTE OIL DISPOSAL: The port will only accept the quantity of waste oil produced on the voyage from the last port of call, and only if the vessel is able to pump by own gear to tanker truck alongside berth. 24 hours notice is required. Above must be advised in advance to ship's local Agent.
SEAMAN'S CLUBS: Located in Fredericia (bus obtainable).
CURRENCY: Danish Kroner.
GENERAL: *Charts:* Danish Charts No. 156 and 158. British Admiralty Chart No. 3465.
Garbage: All waste to be placed in containers on the quay.
Cleaning: The discharge of any kind of garbage, waste water or rubbish from deck, holds or tanks into the harbour is forbidden.
AUTHORITY: Kolding Havn, Jens Holmsvej 1, DK-6000 Kolding, Denmark. *Tel:* 75-502066 (24 hour service). *FAX:* (75) 502058. *Contact:* Per Bendix Jensen, Harbour Master. Office hours: 0800-1530 (Monday to Thursday) and 0800-1500 (Friday). VHF: Channel 16 (12/13).

KORSOR: 55.20 N. 11.08 E. (See Plan)

DOCUMENTS: See "Copenhagen".
PILOTAGE: Not compulsory. ETA and request for Pilot must be made to Belt Pilot 4 hours before arrival via VHF Channel 16.
ANCHORAGES: 0.5 miles S.W. of buoy "Nygrund". It is prohibited to anchor inside the outer pier.
MAX. SIZE: LOA 225 m., and 7.5 m. draft. Tidal variation 0.3 m.
RADIO: Lyngby Radio OXZ.
VHF: Korsor Harbour on Channels 16, 13 and 12. Tugs are worked on Channel 12.
RADAR: Pilot boats are radar equipped. There is no Port Control Radar.
TUGS: Available. 24 hours notice to Agents, via Lyngby Radio, must be given.
CRANES: 1 mobile crane of 24 tons, 4 cranes with grabs. Further equipment may be obtained at short notice.
BULK CARGO FACILITIES: Grain elevator with three pneumatic dischargers.
SPECIALISED CARGO-HANDLING FACILITIES: At present, 2 berths for Ro/Ro traffic.
BRIDGES: There are bridges between Gl.Havn and Inderhavn. Max. LOA 100 m., beam 25 m., draft 5.7 m., allowed to pass under these bridges.
STEVEDORES: Working hours 0700 – 1600 hrs. (1 shift), Monday to Friday. Night shifts by arrangement.
MEDICAL: Hospital at Slagelse, 15 km. away.
FRESH WATER: Available.
FUEL: Available by tank truck, if sufficient notice given.
CONSULS: Norwegian, German, Swedish and Finnish.
DRY DOCKS: None. One slipway of 600 tons displacement.
SERVICES: Compass adjuster available.
GANGWAY/DECK WATCHMEN: Not necessary.
HATCHES: Opening/closing normally done by ship's crew.
AIRPORT: Nearest at Copenhagen, 1 hour 10 minutes by rail.
TIME: GMT plus 1 hour. Summertime GMT plus 2 hours from March to September.
HOLIDAYS: Usual Danish holidays.
GENERAL:

Chart: Danish Chart No. 143, Storebaelt between Langeland – Sprogoe, covers this port, which lies 3 miles East of Route T.

Ferry Traffic: Attention is drawn to the intense ferry traffic between Korsor and Nyborg.
GARBAGE DISPOSAL: Service is available alongside from 0700 hrs. to 1530 hrs. There are no charges made for this service. Tel: 53-570085.
WASTE OIL DISPOSAL: Tanker trucks of 10 cu.m. capacity available. Standard Danish regulations apply.
SEAMAN'S CLUBS: None.
CURRENCY: Danish Kroner (DKr.).
AUTHORITY: Havnemesteren, Korsor Havn, Amerikakajen 2, DK-4220 Korsor, Denmark. *Tel:* 53-570085. *FAX:* 53-571485. *Contact:* A. Skjold Hansen, Harbour Master.

KYNDBY (Kyndby Power Station): 55.49 N. 11.53 E. (See Plan)

PORT LIMITS: Vessel is considered to be an "arrived ship" when alongside the quay or at anchorage waiting for berth.

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Radio Safety Certificate.
Safety Equipment Certificate.
Derat Certificate or exemption.
2 Crew Lists.
Cargo Manifest or Bills of Lading.
Construction Certificate.
Certificate of Insurance or other financial security in respect of civil liabilities for oil pollution damage.
Tobacco and Spirit List, covering all goods on board belonging to crew, officers, Master, ship's bar or passengers.

PILOTAGE: Pilotage not compulsory. Pilot boards at the entrance of Isefjord and takes the vessel to the port and berths her. Pilots listening on VHF Channel 16.

Pilots to be ordered by ETA telegram to Agent at least 24 hours in advance.

ANCHORAGES: Larger vessels anchor in 15 m. – 20 m. of water either in the Isefjord or outside the entrance to the Isefjord. Holding ground good.

RESTRICTIONS: Arrival only by daylight. No tide under normal conditions. Vessel's draft entering Isefjord not to exceed 22 ft.

Also see "General" before first port.

HEALTH: No special restrictions as to Free Pratique, which will be granted by authorities on arrival. Suspected disease or fever must be telegraphed to Agents before arrival.

RADIO: Lyngby Radio.

VHF: Channel 16 to Pilot Station (also Skaw Pilot).

RADAR: No installation.

TUGS: Available. Join at Isefjord, outside the entrance to the Port of Kyndby, ship's lines to be used.

BERTHING: One oil berth: Length 570 ft., draft 21 ft. 6 in.

One coal berth: 530 ft. long, draft 22 ft. Water brackish.

CRANES: No cranes available.

STEVEDORES: Private stevedores to be ordered through receivers.

MEDICAL: All medical and hospital facilities available, no advance notice necessary.

TANKERS: 2 discharge hoses, one of 12 in. and one of 16 in.

No slop facilities.

One tanker berth, safe arrival draft: 21 ft. 6 in. Average discharge rate: 1,000 t.p.h.

DENSITY: Brackish.

FRESH WATER: By hose from quay – 10 t.p.h., D. Kr. 2.50 per ton.

FUEL: Available from all bigger companies by trucks or barge from Copenhagen – about 40 miles from Kyndby.

FIRE PRECAUTIONS: No specific precautions.

CONSULS: Nearest Copenhagen about 40 miles from Kyndby.

REPAIRS: All types of smaller repairs can be carried out.

DRY DOCKS: No dry dock available.

SURVEYORS: All large Classification Societies represented in Copenhagen about 40 miles from Kyndby.

GANGWAY/DECK WATCHMEN: Watchmen not necessary but available.

OPENING/CLOSING HATCHES: To be carried out by crew.

CUSTOMS ALLOWANCES: See "General" before first port.

REPATRIATION: Can be arranged normally via Copenhagen about 40 miles from Kyndby.

AIRPORT: About 40 miles to Airport in Copenhagen.

TIME: GMT plus 1 hour (from late September – late March). GMT plus 2 hours (from late March – late September).

HOLIDAYS: Saturday/Sunday normally no work, and further no work on holidays declared as official Danish holidays.

POLICE/AMBULANCE/FIRE: 112 all alarms.

TELEPHONES: No telephone connection on board.

SERVICES: No tank-cleaning facilities; all other services to ships can be arranged through specialists from Copenhagen.

SHORE LEAVE: No restrictions.

IDENTIFICATION: No shore passes necessary.

REGULATIONS: None.

DELAYS: None.

DEVELOPMENTS: None at the present time.

AUTHORITY: Private port owned by: Sjaellandske Kraftvaerker I/S, Strandvejen 102, 2900 Hellerup, Denmark. *Tel:* 39473947. *Telex:* 35158. *FAX:* 39473529.

Local office: Kyndby Power Station, DK-3630 Jaegerspris, Denmark. *Tel:* 45-42-321101. *FAX:* 45-42-321166. *Contact:* Poul Elmerkjaer.

LEMVIG: 56.33 N. 08.19 E. (See Plan)

PILOTAGE: Compulsory for vessels over 200 g.r.t. Pilot available day and night.

ANCHORAGES: Available off the harbour in a depth of 4.0 m.

RESTRICTIONS: *Entrance Channel:* Length 2.5 miles, depth 4.0 m.

MAX. SIZE: LOA 90 m., draft 4.0 m.

TUGS: None available. Fishing boats will assist.

BERTHING:

Berth	*Berthing Length* (m.)	*Depth* (m.)	*Remarks*
East Harbour	100	4.2	Cargo vessels.
West Harbour	350	3.0 – 3.5	Fishing vessels.
Middle Harbour	200	3.0	Small craft.

CRANES: 1×5 tons, 2×3.5 tonnes (mobile), 1×15 tons and 1×30 tons.

STEVEDORES: *Working Hours:* 0700 hrs. – 1630 hrs. Overtime can be arranged.

MEDICAL: Hospital, doctors and dentist available.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: All types of repairs possible.

AIRPORT: Small airport at Rom for private planes. Call 97-88-88-88 for airport taxi service.

POLICE/AMBULANCE/FIRE: Emergency: Dial 112. Emergency medical assistance: Dial 97-84-18-00. Police: Dial 97-82-14-44.

AUTHORITY: Lemvig Havn, Havnegade 14, 7620 Lemvig, Denmark. *Tel:* 97-82-01-06.

MASNEDOEVAERKET: 55.00 N. 11.53 E.

LOCATION: Masnedoevaerket is situated on the island of Masnedoe, which is connected to Sjaelland by a bridge 150 m. East of the harbour.

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Derat Certificate or Exemption.
Bill of Lading.
Crew List.

Customs need a Tobacco and Spirit List, showing the vessel's and the crew's supply on arrival. Nearest Customs at Naestved.

APPROACHES: From West via Smalandsfarvandet depth of water 24 ft. From South East via Gronsund, max. draft permitted 16 ft. 6 in. From Pilot boarding ground, there is a buoyed channel, dredged to 7 m., with leading lights.

PILOTAGE: Pilot boarding ground off Masnedo N.W. flak. Sea Pilots available from Spodsbjerg, Korsor or Gronsund.

ANCHORAGES: Off the entrance channel.

MAX. SIZE: LOA 100 m., beam 17 m. and draft 6.7 m.

TUGS: Available on request, not normally used by vessels less than 4,500 d.w.t.

BERTHING: Power Station Quay 270 m. long, depth alongside 7 m.

CRANES: None.

BRIDGES: Storstromsbroen has a vertical clearance of 26 m. A new bridge was opened in 1985 across the Storstrom with a vertical clearance of 21 m. Power lines with 36 m. vertical clearance lie to the West of the harbour.

FRESH WATER: Available from hose on the quay.

FUEL: Available by tank truck.

REPAIRS: Minor repairs can be carried out at nearby machine shops.

AIRPORT: Copenhagen, 60 miles distant.

AUTHORITY: Sjaellandske Kraftvaerker, Masnedoevaerket, 4760 Vordingborg, Denmark. *Tel:* 45-53770777. *FAX:* 45-53777474. *Contact:* Leif Holst Hansen.

MIDDELFART: 55.30 N. 09.44 E. (See Plan)

DOCUMENTS: See "Copenhagen".

PILOTAGE: Not compulsory. Middelfart Pilot Station operates on Channel 16.

MAX. SIZE: 5,000 d.w.t. – 6,000 d.w.t., 6.5 m. draft.

TUGS: Available at short notice.

BERTHING: New Harbour: 2 quays, one of 190 m. length, depth 6.5 m., the other of 100 m. length, depth 5.7 m.

Old Harbour: 2 quays, one of 100 m. length, the other of 80 m. length, depth 6.5 m. at both quays. Ro-Ro ramp.

Private Wharves: A. C. Hansens Quay, length 65 m. max., draft 4.6 m. Open to public traffic.

Nordiske Kabel & Trpdfabrikkers Quay, max. length 100 m., depth 7 m.

CRANES: One 3 tonne crane at A.C.Hansens Quay. Mobile cranes of all sizes available at short notice.

BULK CARGO FACILITIES: Cranes and forklifts of 2 – 15 tonnes. Crane at A.C.Hansens Quay for bulk stores.

STEVEDORES: Working hours: 0700 – 1530 (overtime possible). *Rates of Work:* Bulk Cargo: 200 t.p.h. Iron, etc.: 180 t.ph.
MEDICAL: Local hospital available.
FRESH WATER: Available.
FUEL: All grades of fuels and lubricants available at short notice.
DRY DOCKS: One slip for vessels up to 100 tonnes.
CUSTOMS REGULATIONS: See "General" before first port.
AIRPORT: At Billund and Beldringe, 45 km. and 45 km. away respectively.
TELEPHONES: This service is available aboard ships at all berths by prior arrangement through the Agent. Standard rates apply.
AUTHORITY: Middelfart Havnekontor, Havnegade 79, DK-5550 Middelfart, Denmark. *Tel:* 64-410253. *FAX:* 64-410253. *Contact:* Bent Ostergaard-Poulsen, Harbour Master. Office hours 1100 – 1200 hrs.
AGENT: Middelfart Shipping, Havnegade 18, DK-5500 Middelfart. Tel: 64-410072. Telex: 58240 "Miship DK". Cable: Midship.

NAESTVED: 55.13 N. 11.45 E. (See Plan)

DOCUMENTS:
1 copy Passenger List.
1 copy Crew List.
1 copy Stowaway List.
1 copy Crew Personal Effects List.
1 copy Stores List.
1 copy Arms and Ammunition List.
Vessel's Certificates.

PILOTAGE: Compulsory between the entrance to Karrebaeksminde and Naestved for all ships over 500 d.w.t. VHF Channel 16. Tel. 53-727366 and 55-442397. Pilot boards 0.5 miles S.W. of breakwater heads.
ANCHORAGES: 1.5 miles S.W. of Karrebaeksminde Light in 8 m. 11 m. depth. Holding ground is good, but anchorage is exposed to strong winds from S.W.
APPROACHES: *Entrance:* An artificial channel, dredged to a depth of 6.0 m. (19 ft. 09 in.) over a bottom width of maximum 20.0 m. and minimum 16.0 m. (52 ft. 6 in.), marked by spar buoys, perches and leading beacons, leads from the entrance at Karrebaeksminde to the harbour.

Regulations for narrow channels in Danish waters are in force, with certain exceptions as stated in a Government Notice of 30th May 1980 which, among other things, includes a speed limit of 6 knots in the buoyed channel and prescribes that a vessel proceeding against the stream must give way to a vessel proceeding with the stream.

Also see "Bridges".
RESTRICTIONS: Only navigable from half hour before sunrise to half hour after sunset, and according to tides. Also see "General" before first port.
MAX. SIZE: Max. length 116 m. Max. draft 5.60 m. with breadth 12.20 m. or max. breadth 14.40 m. with draft 4.80 m.
HEALTH: Pratique granted on arrival by boarding Customs Officers.
See "Kalundborg".
RADIO: Lyngby Radio (OXZ).
ETA: Send ETA message to Agent as early as possible.
VHF: Pilot Station and Bridge Control at Karrebaeksminde are equipped with VHF.
TUGS: The port operates an icebreaking harbour tug of 350 h.p. Vessels over 5.0 m. draft may not pass through the bridge without tug assistance. Some exemptions can be made by the Harbour Master, in accordance to ship's draft, beam and length.
BERTHING: No berthing in Karrebaeksminde.

There is 1,100 m. of quays with depth of 6.0 m., of which 370 m. is occupied by the paper mill.

There are 2 berths with a depth of 5.2 m.
Bulk Handling Facilities: 1×35 t.p.h. grain suction unit and 1×60 t.p.h. loading pipe.
CRANES: Paper Mill: 1×8 tons.
West Quay: 2×4 tons.
East Quay: 1×3 tons (fixed).
Mobile cranes also available.
BRIDGES: A bascule road bridge spans the canal 650 m. above the breakwater heads. The navigable width of the passage is 22.0 m., and there is a vertical free side height of 20 m. with the opening span in raised position. Passage through the bridge is free from 30 minutes before to 30 minutes after sunset within the period from 0500 hrs. to 2100 hrs., 7 days a week.

A power cable with 33.0 m. (108 ft.) headroom spans the canal 1.5 miles below Naestved Harbour.
MEDICAL: Hospital available.
FRESH WATER: Available from quay, 10 t.p.h.
FUEL: All grades. Deliveries by lorry only.
REPAIRS: Minor repairs possible.
AIRPORT: Kastrup Airport, Copenhagen 100 km. away.
TIME: GMT plus 1 hour.
SHORE LEAVE: No restrictions.
GARBAGE DISPOSAL: Garbage collected daily by Port Authority from alongside vessel. No extra charges made.
WASTE OIL DISPOSAL: Oily water mix and waste oil collected free of charge by tanker truck, up to a maximum of one tonne per day's steaming from last port of call.
SEAMAN'S CLUBS: None.
CURRENCY: Danish Kroner (DKr.).
AUTHORITY: Naestved Havnekontor, Toldbodgade 4, 4700 Naestved, Denmark. *Tel:* 53-720056. *FAX:* 53-720026. *Contact:* E. Andersen, Harbour Master.

NAKSKOV: 54.50 N. 11.08 E. (See Plan)

DOCUMENTS:
Tonnage Certificate.
Load Line Certificate.
Valid Derat Certificate.
Crew Declaration.
3 Crew Lists.

PILOTAGE: At Albuen at the entrance of the firth. The Pilot Station named "Belt Pilot". VHF Channel 16. Notice of ETA to be given as early as possible and not later than 4 hours before arrival.
ANCHORAGES: Safe anchorage in port area for smaller vessels or outside on the Roads in Langelandsbaelt. The Pilot Station will advise best position depending on wind and current.
RESTRICTIONS: Sailing to and in the harbour at night-time with help of projector and with good visibility only. Also see "General" before first port.
MAX. SIZE: D.w.t.: Approx. 3,500 tons. Draft: 19 ft. Length: 660 ft. Breadth: 70 ft. Height: None – no bridges to pass.
RADIO: Lyngby Radio.
VHF: Operated by Harbour Office during daytime only on Channel 16.
Also communication via the Pilot Station on VHF Channel 16.
All movements to be reported to the Agent only.
TUGS: Tug available with 24 hours notice.
BERTHING: Protected from all winds. Depth up to 20 ft. 6 in. (6.3 m.) 7,500 ft. of quay. In the fairway leading up to the harbour there is a depth of 20 ft. 6 in. (6.3 m.), distance about 6 miles. Max. draft in Fairway 19 ft.
CARGO HANDLING FACILITIES: Tracks along the quays in connection with the railway station and all Danish Railways. Also good road connections.

3 grain silos: 4,000, 12,000 and 15,000 tons. 3 grain elevators loading rate 120 t.p.h., 80 t.p.h. and 50 t.p.h. respectively. 1 grain elevator discharging rate 40 t.p.h.

4 mobile belt conveyors loading up to 110 t.p.h.
1 mobile crane (32 tons capacity) – also grab and polygrab.
3 forklifts 2.0 – 3.5 tons available. Up to 4.5 tons on request.
3 mini-loaders (Bobcats) for discharging of bulk cargoes.
BRIDGES: No bridges to pass. Airdraft unlimited.
STEVEDORES: Arranging gangs for work after noon, notice to be given to the stevedores latest 0900 hrs. For work in the morning, notice to be given to the stevedores the day before latest noon.
MEDICAL: Treatment all kinds possible, including hospital. Medical attention at dentist, eye and ear specialist normally requires 24 hours notice if possible.
DENSITY: Fresh water.
FRESH WATER: Available from quay or by truck.
FUEL: Available.
CONSULS: Dutch, Finnish, French, Norwegian and Swedish.
REPAIRS: Blacksmith and electrical workshops available to carry out some repairs on deck and engine.
DRY DOCKS: Shipyard provided with 2 dry docks up to 32,000 d.w.t., building slips up to 35,000 d.w.t. Cranes to lift up to 100 tons.
SURVEYORS: At present no surveyors at Nakskov. Must be ordered from Copenhagen.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Always carried out by crew.
CUSTOMS ALLOWANCES: 40 cigarettes or 40 grams tobacco, 0.25 litre spirits and 0.25 litre wine per man per day.
CARGO GEAR: Loading/discharging always effected by shore gear, unless otherwise agreed in C/P.
REPATRIATION: Facilities available.
AIRPORT: Small airport for taxi flights close to the port. About 160 km. to the nearest airport served by regular world-wide airlines.
TIME: GMT plus 1 hour. March-September, Summertime GMT plus 2 hours.
POLICE/AMBULANCE/FIRE: Police Tel: 921448. Ambulance Tel: 921744. Fire Tel: 923041. Emergency Tel: 112.
EMERGENCY CO-ORDINATION CENTRE: Soevaernets Operative Kommando (SOK), Aarhus. Call via Radio Stations Lyngby, Roenne, Skaw or Blaavand.
BANKS:
Lollands Bank A/S, DK-4900 Nakskov. Telex: 47542.
Den Danske Bank A/S, DK-4900 Nakskov. No telex.
STORING: See "Prelims".
1. Vessel can be stored by truck.
2. Trucks can proceed alongside ship.
3. Forklift can be used.
4. Customs documents from supplier to be shown at the Customs House before loading the stores. In case of bonded stores the loading will be supervised by Customs Officer.

SHORE LEAVE: The crew are allowed ashore, but depending of nationality not allowed to leave the town without permission.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
GENERAL: Provisions to be supplied from a supermarket. If bonded stores are required this has to be delivered by a ship Chandler at another port – transportation fee then to be paid – usually about DKR 300 – depending on distance and order given.
AUTHORITY: Nakskov Havn, Havnegade 2, DK-4900 Nakskov, Denmark. *Tel:* 53-920313. *FAX:* 53-925113. *Contact:* Peter Norre, Harbour-Master.

NYBORG: 55.19 N. 10.49 E. (See Plan)

DOCUMENTS:
2 copies Crew List.
2 copies Ship's Declaration.
1 copy Health Declaration.
1 copy Customs Declaration.
Bills of Lading.

PILOTAGE: Required notice ETA 6 hours. Pilot boat VHF Channel 16. Belt Pilot Station, Spodsbjerg Tel: (62)-501535, Office Nyborg (62)-310089. Pilot compulsory for loaded tankers over 1,500 tonnes d.w.t.

ANCHORAGE: South of Knudshoved Lighthouse. Depth 16 m. (52 ft.). Small vessels anchor S.W. of Avernakke Pynt.

RESTRICTIONS: See "General" before first port.

MAX. SIZE: Avernakke Pynt Bro (Oilpier) draft 32 ft. length about 600 ft. Vesterhavn draft 24 ft., length about 650 ft. Lindholm draft 23 ft., length 1,575 ft.

RADIO: Lyngby Radio.

VHF: Harbour office of Nyborg, call Channel 16, shift to Channels 12 or 13 for working.

TUGS: One tugboat normally stationed in the port. Tugs required notice of 6 hours.

BERTHING: *Lindholm Terminal:* The Terminal totals 31 ha. (77 acres) and has 580 m. (1,903 ft.) of quay space. Depth at the Terminal ranges from 5.0 m. (16 ft.) to 11.0 m. (36 ft.). The Terminal has facilities for general cargo, including warehouse capacity of 14,000 sq.m. The Terminal is equipped with a bulk terminal with 2 conveyor belts, each with a capacity of 650 tons/hr. The Terminal has 2 Ro-Ro berths.

Quay	*Length*	*Depth*
No. 20	250 m. (820 ft.)	8.5 m. (28 ft.)
No. 21	90 m. (295 ft.)	5.0 m. (16 ft.)
No. 25	240 m. (787 ft.)	11.0 m. (36 ft.)

Nyborg Harbour: Also referred to as the inner harbour, it is divided into the East and the West Harbour. The East Harbour connects directly with the outer Lindholm Terminal. The quays of the West Harbour total 550 m. (1,800 ft.) with depths of 7.5 m. (25 ft.). There are 2 Ro-Ro berths, each with 5,000 sq.m. of storage space.

Quay	*Length*	*Depth*
No. 4	100 m. (328 ft.)	7 m. (23 ft.)
No. 5	90 m. (295 ft.)	7 m. (23 ft.)
No. 6	120 m. (394 ft.)	7.5 m. (25 ft.)
No. 7	180 m. (591 ft.)	7.5 m. (25 ft.)

Avernakke Pier: This Terminal is located between Nyborg Harbour and the Lindholm Terminal and is mainly used for handling of tankers with tar products and additives for lubricants, and has 3 quays.

Quay	*Length*	*Depth*
No. 14	100 m. (328 ft.)	5.3 m. (17 ft.)
No. 15	65 m. (213 ft.)	10.0 m. (33 ft.)
No. 16	65 m. (213 ft.)	5.3 m. (17 ft.)

Vessels up to 170 m. (558 ft.) can be handled at Quay No. 15.

Facilities: The port is capable of handling bulk, general cargo and containers. The port has 4 Ro-Ro berths. The port also has adequate, modern terminal equipment. There are 17 cold stores totalling 162,000 cu.m.

CRANES: 6 mobile cranes with capacity up to 32 tons with grab.

STEVEDORES: Ordered by Agent.
Working Hours: Monday to Friday 0700 hrs. – 1600 hrs., or any time upon request.

MEDICAL: Hospital facilities available.

TANKERS: Discharge at Avernakke. Discharge lines 8 in. and 10 in.

DENSITY: About 1005.

FRESH WATER: Supply by pipeline to berths.

FUEL: All grades available.

CONSULS: Finland 65-311646, Sweden 65-310106.
In Odense (near Nyborg);

France	66-115515	Iceland	66-131809

SHIP SUPPLY SERVICE: Supplies/crew changes, etc., for ships passing Great Belt. Contact: Thomas Wang A/S. Tel.: (65) 310057. Telex: 50304. Fax: (65) 310016. Cables: Wang.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Garbage containers available alongside. No charges if reasonable quantities.

WASTE OIL DISPOSAL: Collection by tanker trucks. Operators: Kommune Kemi. Tel: 65313001. Fax: 65317182. Charges depend on products.

SEAMAN'S CLUBS: None.

CURRENCY: Danish Kroner.

AUTHORITY: Nyborg Havn, Lindholm Havnevej 27, DK-5800 Nyborg, Denmark. *Tel:* (65) 310587. *FAX:* (65) 311580. *Contact:* Poul Kildelund Poulsen, Port Manager. Henning Mortensen, Port Captain. Ole Haugsted Jorgensen, Sales and Marketing Manager.

NYKOBING (Falster): 54.46 N. 11.52 E. (See Plan)

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Derat Certificate.
Crew List stating quantity of cigarettes, cigars, tobacco, cigarette paper, spirits, wine and guns.
Cargo List.

PILOTAGE: Pilot ordered through Agents or VHF Channel 16 (Guldborg Pilot) and will board at Skellerev or Argus Ground (both outside Guldborg Bridge).

ANCHORAGE: (Sand) By Skellerev, S.E. of Argus is safe ground.

RESTRICTIONS: Port only accessible by daylight, max. draft 19 ft. 6 in., max. breadth for passing Guldborg Bridge 25 m. Entrance from South (Gedser) not recommended, as depth of water in the Southern part of Guldborgsund only amounts to 8 ft. Also see "General" before first port.

RADIO: For vessels coming through the Kiel Canal, Kiel Radio could be used, otherwise nearest station Lyngby Radio.

TUGS: Available on request.

BRIDGES: Vessels calling Nykobing Falster have to pass Guldborg Bridge about 8 miles North of harbour. Bridge, breadth 25 m., opens by request after sunrise and half an hour after sunset (from 1st Nov. to 1st March from half an hour before sunrise). When requesting passage use international flag "N" on half foremast and give one long and one short blast.

STEVEDORES: Ordered by Agents on receiving vessel's ETA.

MEDICAL: No advance notice required for medical attention.

FRESH WATER: Supplied from quay installations.

FUEL: All grades obtainable – delivered by tank lorry.

CONSULS: Finland, Germany, Netherlands, Norway and Sweden.

REPAIRS: Small deck and engine repairs possible.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: See "General" before first port.

AIRPORT: Nearest at Copenhagen (2 hours by train).

TIME: GMT plus 1 hour.

HOLIDAYS: New Year; Maundy Thursday; Good Friday; Easter Monday; Prayer Day; 1st May (Labour Day, half only); Ascension Day; Whit Monday; Constitution Day (5th June, half only); Christmas and Second Christmas Day.

POLICE/AMBULANCE/FIRE: Dial 112 and ask for police, ambulance or fire service.

SHORE LEAVE: Crew members may go ashore without any restrictions.

IDENTIFICATION CARDS: Not necessary.

GARBAGE DISPOSAL: Solid waste should be put in sacks on the quay or in the containers provided. Ship's sewage system waste can be pumped directly into pipeline on quay or into shore tank. Contact Harbour Office for details.

WASTE OIL DISPOSAL: This can be made either using closed drums, or in the case of oily water mixture, into tanker trucks. Other waste disposal should be arranged through Harbour Office.

SEAMAN'S CLUBS: None.

CURRENCY: Danish Kroner.

AUTHORITY: Nykobing Falster Havn, Havnekontoret, Toldbodgade 29, DK-4800 Nykobing Falster, Denmark. *Tel:* (54) 850563. *FAX:* (54) 820564. *Contact:* L. Mortensen, Harbour Master.

NYKOBING (Mors): 56.48 N. 08.52 E.

PORT LIMITS: A line drawn between Orodde Point in a S.W.'ly direction to Refshammer Point defines the seaward limits of the port.

DOCUMENTS: See "Copenhagen".

PILOTAGE: Pilotage is compulsory for vessels more than 200 b.r.t. when passing the Oddesund-bridge, and for vessels with a draft more than 2.8 m. when passing Logstor. Vessels arriving from the West (North Sea) shall contact Thyboron Pilot 3 hours before arrival Thyboron Canal. Vessels arriving from the East (Kattegat) shall contact Hals Barre Pilot 3 hours before arrival Hals Barre Lighthouse. Both stations listen on VHF Channels 16 and 12. When passing Logstor, the Pilots there will take over; also working Channels 16 and 12.

ANCHORAGES: Anchoring is prohibited in the buoyed channel to Nykobing (Mors) Harbour and in the white sector from Glyngoere Lighthouse. Good sand holding ground North and East of Orodde Pt.

RESTRICTIONS: None, tankers can be moved during the hours of darkness.

MAX. SIZE: Vessels up to LOA 105 m., beam 25 m. and 4.3 m. draft (SW).

HEALTH: Danish rules apply.

RADIO: Blaavand, Skagen or Lyngby Radio are working on VHF, MF and HF.

VHF: See "Pilotage" and "Radio".

RADAR: None.
TUGS: Available if necessary.
BERTHING: General and bulk cargo can be handled at two berths. The East Pier is 70 m. long but vessels up to 105 m. LOA can be berthed. The South Pier is 57 m. long. Least depth at the inside berth is 4.3 m.
CRANES: 1 mobile crane 25 tonnes without advance notice and 1 mobile crane 15 tonnes with short notice.
BRIDGES: (a) "Sallingsundbroen" connecting the island of Mors to Salling is situated 1 nautical mile S.E. of Nykobing Mors Harbour. Max. vertical clearance is 26 m.

(b) "Oddesundbroen" connecting Thyholm and Struer is situated between Nykobing and Thyboron.

(c) When coming from Kattegat 2 bridges are to be passed. Firstly "Limfjordsbroen" connecting Aalborg and Norresundby, then "Aggersundbroen" N.E. of Logstor.
STEVEDORES: Working hours Monday-Friday 0700 – 1630.
MEDICAL: Full hospital facilities available without prior notice.
TANKERS: No facilities – pipeline dismantled.
DENSITY: 1027.
FRESH WATER: Available, rate 2.5 t.p.h.
FUEL: Available, delivered by trucks.
CONSULS: None.
REPAIRS/DRY DOCKS: Soeren Larsen & Soenner Shipyard, 7900 Nykobing Mors. Tel: 97-721544. Telex: 66698 SLS – DK. Cables: SLS – Yard. Patent slipway up to 350 t., light ship. All kinds of deck and engine repairs. Shipbuilding up to 499 b.r.t.
SURVEYORS: Lloyd's Agents, P. H. Hoejgaard Jensen Aps., 8 Asmusvaenget, DK 8530 Hjortshoej, Aarhus. Tel: 06-196500. Aalborg Survey Association, 4 Vesteraa, DK 9000, Aalborg. Tel: 08-166022.
GANGWAY/DECK WATCHMEN: Not necessary.
HATCHES: Opening/closing carried out by crew.
CARGO GEAR: Loading/discharging normally done by shore gear.
REPATRIATION: All facilities exist for crew changes and repatriation.
AIRPORT: At Thisted (45 km.) and Karup (70 km.). Several departures daily to Copenhagen.
TIME: GMT plus 1 hour. Summertime from March to September (GMT plus 2 hours).
HOLIDAYS: No cargo work on all Danish local holidays.
POLICE/FIRE/AMBULANCE: In emergency dial 000. Otherwise Police: 721800, Ambulance and Fire: Falck 721222.
TELEPHONES: Available onboard for naval vessels only.
SERVICES: Compass adjusting.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not necessary.
DELAYS: Normally no berthing delays.
DEVELOPMENTS: None.
AUTHORITY: Morsoe Kommune, Jernbanevej 7, 7900 Nykobing Mors. *Tel:* 97-721488. *Contact:* B. F. Nielsen, Harbour Master, Havnekontoret, 7900 Nykobing Mors. Tel: 97-720049. Fax: 97-722918.

ODENSE: 55.25 N. 10.23 E. (See Plan)

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Radio Safety Certificate.
Safety Equipment Certificate.
Derat Certificate or Exemption.
1 Crew List.
1 Passenger List.
1 Stowaway List.
1 Arms and Ammunition List.
1 Stores List.
1 Crew Personal Effects List.
1 Cargo Manifest or Bills of Lading.

PILOTAGE: Compulsory for merchant vessels as follows:
1. Vessels of and over 1,500 d.w.t.
2. All tankers carrying oil, petrol, LPG or dangerous liquid chemicals or with uncleaned tanks, which have last carried such cargoes.
3. Vessels of and over 100 d.w.t. which are not equipped with VHF.

Odense Pilot boards just North of light-buoy 2A outside of Gabet. In bad weather the Pilot will board inside of Gabet between light-buoys No. 2 and No. 4.

ETA: Send ETA message to Agent earliest possible and request for Pilot at least 6 hours in advance. Confirm ETA at the Fairway Buoy 1 hour prior to arrival.
ANCHORAGE: Vessels with a draft of 6.0 m. or more should anchor about 3 miles North of Gabet in depths of 10 m. – 14 m. (6 – 8 fathoms). The holding ground is good. Sheltered anchorage obtainable inside Gabet in depths of 4.0 m. – 7.5 m. (2 – 4 fathoms).
RESTRICTIONS: A 12 mile long entrance channel, maintained at a depth of 7.5 m. (24 ft. 06 in.) MSL over a bottom width of minimum 35 m. and marked by light buoys, spar-buoys, and light-beacons, leads through the shallow Odense Fjord. The lower part consists of a winding, narrow, natural channel and the upper part passes through the 4 mile long Odense Canal.

The Lindoe Terminal situated 3 miles from the entrance. Depth of water is 9.2 m. Minimum width of bottom 60 m.

Maximum speed in Odense Canal is 6 knots.

Regulations for narrow channels in Danish water are enforced, both in the channel through the fjord and in Odense Canal with the addition that any ship of and over 100 d.w.t. intending to transit the channel, should contact the Pilot Station at Gabet from a position 5 miles North of Odense Fjord light and whistle buoy or, if outward bound, 30 minutes before departure.

Ice: Under normal conditions the port is open all the year round. During the period January – March, ice may occur in the fjord, but an ice-breaking tug and transitting ships will maintain an open ice-channel.

Obstructions: Odense Canal is spanned by overhead power cables with vertical clearances of minimum 45 m. (147 ft.).

Tides and Currents: The tidal range is 0.4 m. (15 ft.). Gales from between East and S.W. may lower the water level by up to 1.5 m. (5 ft.), and those from between West and N.E. may raise it by up to 1.8 m. (6 ft.).
MAX. SIZE: Inner Port: 6,000 d.w.t. Max. draft 7.0 m. fresh water, max. length 160 m., controlled by swinging basin and draft. Permissible draft for vessels over 100 m. in length to be obtained from Agent.

Lindoe Terminal: Max. draft 8.4 m.
HEALTH: Pratique granted by Customs Officers who bring Health Declaration for Masters to complete. In event of suspected disease or fever on board radio details to Agent before arrival.
RADIO: Lyngby Radio. Also see "Pilotage".
VHF: Port Authority and tug communicate on Channel 12. Odense Pilot on Channels 16 and 12.

Reporting system compulsory. All ships have to call the Pilot Station 30 minutes before entry or departure and comply with instructions from the Pilot Station to ensure safe navigation.
TUGS: Tug is available (600 h.p.). Not compulsory but necessary for large vessels. Tug normally joins vessels in port. Large vessels at Gabet. Ship's line.
BERTHING: Inner Port: Three harbour basins including 4,200 m. of quays with depth of 7.5 m. alongside. Coal quays at Fynsvaerket, depth 7.5 m. alongside.

The Lindoe Terminal: 280 m. quay, depth alongside 9.2 m.
CARGO HANDLING FACILITIES: All principal wharves are rail served and have road access. There are 34,000 sq.m. of open asphalted storage areas, warehouses of 70,000 sq.m. floor space, cold storage of 55,000 cu.m. and a tank storage capacity of 67,000 cu.m. Three grain suction units with capacities of 50 t.p.h. – 120 t.p.h.
Inner Port: The port operates 4 electric cranes of 3.5 tons to 15 tons with hooks and 3.5 tons to 6 tons with grabs. The port operates a grain loading terminal with a capacity up to 320 cu.m./hr. There is one private grab crane and a number of fork-lift trucks up to 16 ton lifting capacity.

Lindoe Terminal: The port operates 2 electric portal cranes of 14 tons to 34 tons with hooks and 12 tons with grabs. 2 warehouses of 1,000 sq.m. each, one for general cargo and one for bulk cargo.

Fyensvaerket Power Station has 2 continuous unloaders and 2 cranes.
Cargo Handling Capacity:
Bulk cargo 120 t.p.h. – 270 t.p.h.
General cargo 100 t.p.h. – 230 t.p.h.

Trade and Shipping: Export of agricultural produce, general cargo, machinery, meal and flour.

Imports include cereals, coal, feeding stuffs, fertilisers, general cargo, gravel, iron, kaolin, LPG, paper reels, petroleum products, salt and timber.
SPECIAL CARGO FACILITIES: Berths available for handling of containers and Ro/Ro traffic. 1 × 16 ton truck.
BRIDGES: See "Restrictions" – "Obstructions".
STEVEDORES: To be arranged through Agent.
MEDICAL: Doctors and hospital facilities anytime. Arrange through Agent.
TANKERS: One berth length 160 m., depth 7.5 m., also one jetty, depth 6 m.
DENSITY: 1010.
FRESH WATER: Available by pipeline at all berths. Rate: 10 cu.m./hr. – 15 cu.m./hr.
FUEL: All grades available by road transport.
FIRE PRECAUTIONS: In addition to the usual precautions a firefighter is posted at the vessel while in the port when the cargo is petrol, kerosene, etc.
CONSULS: All European countries represented.
REPAIRS: Local workshops can undertake various kinds of repairs to boilers, machinery and electrical installations. The shipyard at Lindoe has three building docks, of which the largest is suitable for vessels up to 500,000 d.w.t.
DRY DOCKS: One 500,000 d.w.t. and two 100,000 d.w.t. dry docks in Lindoe Shipyard. Vessels up to 400 m. × 70 m. × 6.5 m. draft can be accommodated.
SURVEYORS: N.V. and Lloyd's.
HATCHES: Normally opened by ship's crew.
CUSTOMS ALLOWANCES: See "General" before first port.
REPATRIATION: Can be arranged.
AIRPORT: Beldringe Domestic Airport, 9 km. to the North, has scheduled daily flights to and from Copenhagen International Airport.
TIME: GMT plus 1 hour. Summertime GMT plus 2 hours.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Prayer Day; Ascension Day; Whit Monday; Christmas Day; Boxing Day.

Half-holidays: May 1st, June 5th and December 24th. Work can be arranged.
POLICE/FIRE/AMBULANCE: Dial 000 and ask for service required.
TELEPHONES: No telephones on board.
SERVICES: Compass adjustment can be arranged.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not necessary.
GARBAGE DISPOSAL: Garbage containers available at all piers. Contact Port Authority for service.
WASTE OIL DISPOSAL: Service available by tanker truck. Contact Port Authority 24 hours in advance for service.
SEAMAN'S CLUBS: None.
CURRENCY: Danish Kroner.
REGULATIONS: Nothing unusual.
DELAYS: None.
AUTHORITY: Odense Port Authority, Londongade 1, DK-5000 Odense C, Denmark. *Tel:* 66-120792. *FAX:* 65-914774. *Contact:* Finn Vinther, Harbour Master. Tel: 66-120025. Fax: 65-914774.

OREHOVED: 54.57 N. 11.51 E. (See Plan)

PILOTAGE: Pilots may be ordered through Masnedo Pilot on VHF Channel 16 or through the Harbour Authorities.

ANCHORAGE: West of Bredegrund with depths of 9.0 m. – 10.0 m.

MAX. SIZE: Max. LOA 150 m., Max. draft 6.5 m.

VHF: Harbour Office on Channel 16 during office hours and when vessel expected. Working on Channels 13 and 12.

TUGS: To be ordered 12 hours in advance.

BERTHING: Length of quay 165 m. Depth alongside 5.0 m. – 7.0 m. Depth in basin 7.0 m.

CRANES: 1×20 ton travelling crane.

FRESH WATER: Available

GARBAGE DISPOSAL: Contact Orehoved Shipping and Stevedoring ApS.

WASTE OIL DISPOSAL: Contact Orehoved Shipping and Stevedoring ApS.

CURRENCY: Danish Kroner (DKr.).

AUTHORITY: Orehoved Shipping and Stevedoring Aps., Orehoved Havn, DK-4840 Noerre Alslev, Denmark. *Tel:* (53) 84 61 58. After Hours: (53) 84 63 61, (53) 83 47 42. *Telex:* 40104. *FAX:* (53) 846447. *Cables:* Shipohoj. *Contact:* M. Stang, Harbour Master/General Manager.

RANDERS: 56.29 N. 10.04 E. (See Plan)

DOCUMENTS:

2 Crew Lists.
2 Lists with statement of each crew member's cigarettes, tobacco and spirits.

PILOTAGE: Apply for Pilot 6 hours before arrival. Call on VHF Channel 16 one hour before at pilot station.

ANCHORAGE: Outside Entrance buoy in 8 m.

RESTRICTIONS: Vessels with good searchlights can enter at night.

MAX. SIZE: Max. length, 475 ft.; breadth, 57 ft.; draft, 19 ft.

HEALTH: No special requirements.

RADIO: Lyngby Radio and Skaw Radio.

VHF: VHF service from Harbour Office, Channel 16, icebreaking 16.

TUGS: 900 h.p. tugs available – use ship's lines.

BERTHING: 80 berths available. Depth alongside 5 m. – 7 m.

STEVEDORES: Ordered by Agents. Working periods: Monday to Friday 0730 – 1130 hrs., 1200 – 1530 hrs. Saturday no work.

MEDICAL: Hospital facilities available.

TANKERS: Molasses only.

DENSITY: Brackish in port area. No tide.

FRESH WATER: Shore installations.

FUEL: All grades. Deliveries by lorry only.

CONSULS: Norway (86) 42 61 00, Finland (86) 42 77 11, France (86) 42 35 83, Sweden (86) 43 46 74, Iceland (86) 42 55 55.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: By crew.

CERTIFICATES: Tonnage Certificate, Derat Certificate, Load Line Certificate.

CUSTOMS ALLOWANCES: See "General" before first port.

REPATRIATION: Several hotels available.

REPAIRS: Engine repairs and minor repairs.

SURVEYORS: Arranged by Agent.

AIRPORT: Tirstrup Airport 40 km. from Randers, 5 – 7 daily connections with Copenhagen.

TIME: GMT plus 1 hour in Winter. Summertime from March-September.

HOLIDAYS: 1st January (New Year); Maundy Thursday, Good Friday, Easter Monday; 1st May from 1200 hrs. (Labour Day); Whit Monday from 1200 hrs.; 24th December from 1200 hrs.; 25-26th December (Christmas).

POLICE/AMBULANCE/FIRE: Tel. 112.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Available.

WASTE OIL DISPOSAL: Available.

CURRENCY: Danish Kroner.

AUTHORITY: Randers Havn, Kulholmsvej 1, 8900 Randers, Denmark. *Tel:* 86421057, 30817586. *FAX:* 86407181. *Contact:* J. Morgen, Harbour Master.

RODBY: 54.42 N. 11.24 E. (See Plan)

DOCUMENTS:

1 Crew List.
1 Passenger List.
1 Stores List.
1 Manifest or Bill of Lading.

PILOTAGE: As the harbour is so easily accessible there is no Pilot. A person with local knowledge may be engaged by calling ferry "Danmark" VHF 16.

ANCHORAGES: At a distance of 1.5 – 2 miles, bearing S.E. – S.S.E. of approaching buoy, depth of water 10 m.

RESTRICTIONS: See "General" before first port.

REGULATIONS: Ferries owned by D.S.B. or D.B. (Train ferries) have priority using the entrance.

MAX. SIZE: Largest vessel: Length 80 m. Draft 4.5 m. Depth of water in North and West Basin: 5 m. N.E. Storm can give rise of up to 1.5 m. S.W. Storm can give fall of 1.2 m. on daily depth.

HEALTH: No Certificates required.

RADIO/VHF: All messages via "Lyngby Radio" and Port Radio, VHF Channel 16, working Channels, 8, 10 and 11. Harbour office and ferry station listen on Channel 74. Ferries listen on Channels 16 and 74.

TUGS: None.

BERTHING: Quay length 518 m. equipped with 1 mobile crane 32 tons capacity. Two grain silos, loading capacity 60 – 90 t.p.h.

STEVEDORES: Provided by "LF Shipping" Tel: 54605522. Telex: 40022; Shipbroker A. Hovmand, Tel: 53888011, Telex: 40256; Shipbroker H. Kristiansens Eftf, Sakskobing, Tel: 54702000.

MEDICAL: 2 hospitals available.

FRESH WATER: Can be supplied alongside the quay.

FUEL: Obtainable alongside the quay.

OPENING/CLOSING HATCHES: By crew or stevedores, ship's option.

CERTIFICATES: On arrival, ship's register only.

CUSTOMS ALLOWANCES: See "General" before first port.

AIRPORT: Maribo Airport, 14 km.

SHORE LEAVE: After clearing inwards, Crew members are allowed to go ashore without special permission.

IDENTIFICATION CARDS: Not required.

AUTHORITY: DSB Havnekontoret, Ostre Kaj 3, 4970 Rodby, Denmark. *Tel:* 54605722. *FAX:* 54605722. *Contact:* Captain J.H. Roer, Port Captain, Tel: 54605322.

RONNE: 55.06 N. 14.42 E. (See Plan)

DOCUMENTS:

1 Crew List.
1 Passenger List.
1 Customs Declaration.
1 Declaration for crew's tobacco, spirits, etc.
1 Declaration of Health.
1 Declaration to Police, number of crew, passengers, etc.
1 Bill of Lading (or Manifest).

PILOTAGE: Apply for Pilot via Ronne or Lyngby Radio, advance notice not less than 2 hours. Pilot listens continuously on VHF. Call Ronne Pilot or Ronne Harbour. Area where Pilot to be taken on board is by Ronne Light Buoy, 2 miles S.W. of the harbour; if weather bad pilot boat guides the ship inside the breakwater and then Pilot boards.

ANCHORAGE: No safe anchorages outside the harbour.

RESTRICTIONS: See "General" before first port.

MAX. SIZE: Max. length 600 ft. – 650 ft., draft 26 ft. There is no tide.

HEALTH: No special procedure necessary, but if there is suspected disease or fever on board or ship comes from area with fever, etc., call for quarantine doctor. If ship's last call was Danish port Pratique automatic.

RADIO: Ronne Radio, call-sign OYE; or Lyngby Radio, call-sign OXZ.

VHF: Listens on Channel 16. Working Channels 12 and 13. Same in tug and Pilot boat. Mainly traffic concerning pilotage and harbour operations.

RADAR: Located at Pilot Station, mostly look-out aid, but advice on entering can be given.

TUGS: Normally join the vessel inside breakwater; ship's lines to be used.

BERTHING: 3 berths equipped with hydraulic ramps for Roll-on/Roll-off traffic via stern or head only, one of which is suitable for ships up to 550 ft. length, 70 ft. beam, draft 22 ft.

1 berth for sand loading 400 – 600 t.p.h., for vessels up to 350 ft. length, 21 ft. draft.

2 berths for macadam loading 400 t.p.h., for vessels up to 300 ft. length, 21 ft. draft.

3 mobile cranes with capacities up to 60 tons are available for both hook and grab operations.

Also berths for handling coal and grain.

STEVEDORES: To arrange gangs Monday morning, advices have to be given Friday before 1100 hrs. To arrange work other days, notice must be given before 1700 hrs. the day before.

MEDICAL: Hospital facilities are available. It is not necessary to give advance notice.

TANKERS: One berth for coastal tankers, draft up to 22 ft., length up to 300 ft. For tankers of 1,500 d.w.t. and upwards, Pilot is compulsory when entering and leaving the port.

DENSITY: 1005.

FRESH WATER: Available alongside, rate 10 t.p.h.– 12 t.p.h.

FUEL: Light fuel, Redwood 200 sec. Heavy fuel 3500 sec., also 1000 and 1500 sec. Notice 6 hours ETA.

CONSULS: The following countries are represented in Ronne: Germany, Finland, France, Latvia, Netherlands, Norway, Poland, Sweden and United Kingdom.

REPAIRS: All kinds of repairs can be carried out.

SURVEYORS: Available from Copenhagen. The Harbour Master has from time to time been appointed by insurance companies and surveyors to carry out hull and cargo surveys.

DRY DOCKS: Only small ships up to 350 tons.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Carried out by crew.

CERTIFICATES: Nationality Certificate, Derat Certificate, Load Line Certificate, Radio Certificate. (Safety Certificate for passenger ships only).

CUSTOMS ALLOWANCES: see "General" before first port.

REPATRIATION: Possible.

AIRPORT: 3 miles, served 3 – 5 times per day by Maersk to Copenhagen.
TIME: GMT plus 1 hour. Summertime GMT plus 2 hours from last Sunday in March to last Sunday in September.
HOLIDAYS: New Year's Day; Easter, 3 days: Thursday, Friday, Easter Day (Monday); May 1st; Whit Monday; June 5th; Christmas Eve; Christmas Day; 2nd Christmas Day. Cargo work only possible for foodstuff, etc.
POLICE/AMBULANCE/FIRE: In emergency cases dial 112 or call by Ronne Radio.

In ordinary cases: Police 56951448. Ambulance 56951808. Fire 56951247.
EMERGENCY CO-ORDINATION CENTRE: Emergency operations in Danish waters are co-ordinated by the Royal Danish Navy. Emergency operations in the area around Bornholm are co-ordinated and guided by the Royal Danish Navy Surface Rescue Centre. Tel: 56952011. No telex number is available, but on request by telephone the rescue centre can answer by telex.
SERVICES: Supply of charts, nautical publications, sounding paper, etc. Radio and Radar repairs carried out. Compass adjustment is carried out by means of transportable Gyro compass.
BANKS: No American or European banks in this area, most Danish banks have connections with the major international banks.

Den Danske Bank. Tel: 56952211. Fax: 56954211.
Bikuben, Ronne. Tel: 56950061. Fax: 56950570.
Unibank. Tel: 56951420. Fax: 56957381.

STORING: See "Prelims".

1. Vessels can be stored both by truck and by barge, but as all loading and discharging is taking place alongside piers, barges are never used for storing ships. Furthermore, no special barges are available for that purpose.
2. There are no special regulations concerning the storing of ships.
3. Trucks can proceed alongside ships on all piers except on Pier 12 (oil pier), where the truck must remain about 80 yards from the ship.
4. Likewise fork lifts can be used on all piers except Pier 12.
5. Customs regulations regarding bonded stores only.
6. Normally only the ship's crew employed.

SHIP SUPPLY SERVICE: None. Pilot boat is normally used for transferring stores, crew and sick personnel. Ships are normally served in the roadstead outside the harbour.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not needed.
DELAYS: None.
GARBAGE DISPOSAL: Contact Harbour Office.
WASTE OIL DISPOSAL: Contact Harbour Office. Tanker trucks available.
SEAMAN'S CLUBS: None.
CURRENCY: Danish Kroner.
AUTHORITY: Ronne Havnevaesen, Havnekontoret, Munch-Petersensvej 2, 3700 Ronne, Denmark. *Tel:* 56950678. *FAX:* 56950631. *Contact:* Hans Kumler, Harbour Master. Niels Lundberg, Assistant Harbour Master.
Harbour Board (Municipal): Ronne Kommunes Havneudvalg, Landemaerket 26, 3700 Ronne, Denmark.

SKAELSKOR: 55.15 N. 11.18 E. (See Plan)

Admiralty Charts 2597 and 2118 cover the approaches to and the port of Skaelskor. Depth at the entrance to port is 4.5 m.
DOCUMENTS: See "Copenhagen".
PILOTAGE: Not compulsory. Pilot to be ordered via Agents with minimum 6 hrs. notice. Pilot vessel is equipped with VHF; Channels 16, 12, 10 and 6.
ANCHORAGES: Available outside Skaelskor Fjord.
RESTRICTIONS: Entering the port at night is permitted only by vessels equipped with a searchlight.
MAX. SIZE: Max. draft 4.2 m., max. length 60 m., max. beam 10 m.
HEALTH: Usual Danish regulations apply.
RADIO: Lyngby Radio.
VHF: See "Pilotage".
TUGS: None.
BERTHING: Outer harbour: Depth 4.5 m., 200 m. quayage. Inner Harbour: Depth 3.8 m., 120 m. quayage.
CRANES: 1 mobile crane with 7 tons lifting capacity.
BULK CARGO FACILITIES: 1 belt conveyor available for loading grain.
MEDICAL: Facilities available.
TANKERS: No dirty ballast facilities available.
DENSITY: Varies from 1007 to 1023.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Can be undertaken.
DRY DOCKS: None.
SURVEYORS: Available.
REPATRIATION: Can be arranged.
AIRPORT: Nearest at Copenhagen.
TIME: GMT plus 1 hour; Summertime (March – September) GMT plus 2 hours.
TELEPHONES: No facilities for placing telephones on board vessels exist.
GARBAGE DISPOSAL: Available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Danish Kroner.
AUTHORITY: Skaelskor Havnekontoret, Naestvedvej 15, DK-4230, Skaelskor. *Tel:* (53) 590100. *FAX:* (53) 590357. *Contact:* F. Christensen.
AGENT: Aage C. Frederiksen I/S, P.O.Box 4, DK. 4230 Skaelskor. Tel: 453 594002. Cables: "Shipbroker". Telex: 40222 (ACF DK). Fax: 453-590544.

SKAERBAEK: 55.31 N. 09.37 E. (See Plan)

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Radio Safety Certificate.
Safety Equipment Certificate.
Derat Certificate or Exemption.
Crew List.
Stores List.
Crew Personal Effects List.
Cargo Manifest or Bills of Lading.

PILOTAGE: Not compulsory. Pilot joins at mouth of Kolding Fjord. Can be contacted by VHF Channel 16.

Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to "Danpilot, Region Skagen", at least 12 hours in advance. "Danpilot" listening on VHF Channel 16.
ANCHORAGE: Off Skaerbaek in depths of 39 ft.

A dredged channel, 200 m. long, 49 m. (160 ft.) wide and 7.0 m. (23 ft.) deep leads to the Coal Harbour. Another channel, 500 m. long, 80 m. (262 ft.) wide and 11.9 m. (39 ft.) deep leads to the Oil Berth.
RESTRICTIONS: See "Tankers" and "General" before first port.
MAX. SIZE: LOA 250 m. Max. draft 38 ft.
RADIO: Lyngby Radio.
TUGS: Tugs of 1,400 h.p. – 4,500 h.p. available at short notice.
BERTHING: Power Station Wharf: 253 m. length; depth 7.0 m.
Oil Jetty: Depth 39 ft.
CRANES: 2×15 ton coal cranes.
BRIDGES: 2 road bridges span the North Lillebaelt. Vertical clearance 33 m. (108 ft.).
STEVEDORES: Working hours: Monday to Friday 0700 – 1530 hrs.
MEDICAL: Medical attention available, nearest hospitals at Kolding and Fredericia.
TANKERS: One berth, depth 39 ft. (11.9 m.). Max. length between bow/stern and manifold 127 m. (417 ft.). 3×12 in. discharge arms, rate 4,000 t.p.h.
DENSITY: 1017 (approx.).
CONSULS: Nearest at Kolding. Distance 15 km.
REPAIRS: Local machine shops can manage small repair jobs.
DRY DOCKS: None.
FRESH WATER: Obtainable from quay.
FUEL: Available by barge from Fredericia.
REPATRIATION: Possible.
CUSTOMS ALLOWANCES: See "General" before first port.
AIRPORT: Billund or Odense, both approximately 50 km. distant, and with daily flights to Copenhagen.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Prayer Day; Ascension Day; Whit Monday; Christmas Day; Boxing Day. Half holidays: May 1st, June 5th and December 24th.
AIRPORT: Billund Airport, 40 km. distant.
AUTHORITY: I/S Skaerbaekvaerket, DK-7000 Fredericia, Denmark. *Tel:* 75562466 or 75924805. *Telex:* 51116. *Cables:* Mortensen Fredericia. *FAX:* 75924272.

SKAGEN: 57.43 N. 10.36 E. (See Plan)

DOCUMENTS: Crew List, Tobacco List, Stores List, Derat Certificate, Health, Tonnage, Nationality and Cargo documents.
APPROACHES: The entrance between the outer moleheads is 75 m. wide and facing S.E. Approaching vessels should – when 400 m. from the entrance – keep the leading lights in line bearing 334°. Entering vessels have right of way over departing vessels. Maximum speed inside the outer harbour is 3 knots.
Tides and Current: Tidal range 0.3 m. Gale from W. may raise the sea level by 1.4 m. and from E. lower it by 0.9 m. Winds from S.S.W. – W. cause N.E. going current and those from N. – E. – S.E. cause S.W. going current. The prevailing current runs N.E., up to 2 knots.
PILOTAGE: Local Harbour Pilot available on request to the Harbour Office. Sea Pilot ("Danpilot") may take vessels to all harbours on the East coast of Jutland, to the Sound, and through the Great Belt to the Baltic Sea. Tel: 98445566 or VHF Channel 16.
ANCHORAGES: Off the harbour entrance.
MAX. SIZE: Largest vessels which can enter Skagen Harbour: Length 125 m., beam 18 m., draft 6.7 m.
VHF: Day and night watch on Channel 16 by Port Captain's Office.
BERTHING: The harbour consists of 6 basins. Depths: Outer Harbour 7.0 m.; East Basins I & II 6.5 m. – 7.0 m.; Auction Basin 5.0 m. – 7.0 m.; Middle Basin 5.0 m.; West Basin 5.0 m.; Pound Net Basin 3.5 m.
FRESH WATER: Available.
FUEL: Available by barge.

DRY DOCKS: Yards with slips for vessels up to 50 m. length and 600 tonnes displacement.
GARBAGE DISPOSAL: For service call 98-441346. No charge for service.
WASTE OIL DISPOSAL: Trucks of 3,000 ltr. available. Call 98-441346 for service.
SEAMAN'S CLUBS: None.
CURRENCY: Danish Kroner (DKr.).
GENERAL: Imports: Oil. Exports: Fishmeal and other fish products.
AUTHORITY: Skagen Havn, Havnekontoret, P.O.Box 140, Havnevagtsvej 30, DK-9990 Skagen, Denmark. *Tel:* No. 98-441060, 98-441466, 98-441346. *FAX:* 98-450338. *Contact:* B.Christensen, Harbour Master.

SONDERBORG: 54.55 N. 09.47 E. (See Plan)

DOCUMENTS:
Ship's Register.
Crew List.
Radio Safety Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Customs Declaration.

PILOTAGE: Vessels exceeding 6.5 m. in draft or 4,000 gross tonnage use Northern entrance where Pilot boards vessels North of Snogbaek Hage, or further North if required.

Vessels coming from South, Pilot boards off the Middelgrund.

RESTRICTIONS: No restrictions on night entry. No tide. Current mostly North-going with a maximum speed of 3 knots. N.E. to Easterly winds raise water level up to 1 m. West to North-Westerly winds lower the water level by the same amount.

MAX. SIZE: From South passing through the harbour bridge, 4,000 g.r.t., draft 6.5 m.

From North 30,000 g.r.t., draft 9.5 m., air draft 33 m., LOA 200 m.

VHF: Radio on Pilot Station, Channel 16, 12 and 13. For Pilot and Harbour Master tel: 74-422765.
TUGS: Small harbour tug available; larger tugs available at 6 hours' notice.
BERTHING: *South Harbour:* Mainly used by passenger vessels and fishing boats. Concrete quay about 500 m. long, max. depth alongside 8.0 m.

North Harbour: Concrete quay about 800 m. long, depth alongside 7.5 m. Plywood factory, dolphin moorings with depth of 9.0 m.

Mooring facilities at heavy dolphins over 650 m., 25 m. from shore and along paved road, water depth 9.0 m. Generally used for laying up.

CARGO GEAR: Discharging and loading by ship's own gear or by mobile cranes of which the harbour have three, with a max. lifting capacity of 30 tons (60 ton crane).
BRIDGES: King Chr. X's Bridge divides Sonderborg port into South Harbour and North Harbour. The bridge is a double wing bascule bridge with an opening width of 30 m. For passage call "Sonderborg Bridge" on VHF Channel 16 regarding opening times.

North of the harbour, the Alssundbridge crosses the sound. The bridge has a horizontal clearance of 150 m., and a vertical clearance of 33 m.

MEDICAL: Full hospital facilities available without prior notice.
FRESH WATER: Supplied by pipeline to berths.
FUEL: Available day and night.
CONSULS: Finland, Netherlands and Norway.
REPAIRS: Routine maintenance and smaller engine repairs can be carried out.
AIRPORT: In Sonderborg, with regular flights to Copenhagen.
TIME: GMT plus 1 hour.
STORING: Vessel may be stored by truck or barge. Trucks may proceed alongside, fork lift trucks and riggers may be used.
AUTHORITY: Sonderborg Havnekontor, Norrebro 1, 6400 – Sonderborg, Denmark. *Tel:* 74-422765. *FAX:* 74-433019. *Contact:* Lass Andersen, Harbour Master and Pilot.

STEGE: 54.59 N. 12.17 E. (See Plan)

LOCATION: Stege is situated in a sheltered bay on the N.W. coast of Moen.
DOCUMENTS:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Derat Certificate or Exemption.
Bill of Lading (if cargo).
Crew List.

Customs need a Tobacco and Spirit List, showing the vessel's and the crew's supply on arrival. Customs clearance effected at Naestved.

APPROACHES: From the West, Stege is approached via Masnedsund. From the Baltic via Bogestrom Channel (2.1 m. depth). There is an entrance channel, 5 miles long and dredged to 4.1 m., leading to the port.
PILOTAGE: Local Pilots from Masnedoe, meet the vessel off the entrance channel. Sea Pilots can be taken from Spodsbjerg, Korsor or Gronsund.
ANCHORAGES: In Ulvsund, off the entrance channel.
RESTRICTIONS: Daylight navigation only. During winter, harbour may close due to ice.
MAX. SIZE: LOA 80 m. and 3.8 m. draft. Tidal range 0.3m.
VHF: Pilots can be contacted by VHF.
BERTHING: 800 m. of quayage in a series of basins.
Depths: (i) N. Harbour 3.7 m. – 4.2 m.
(ii) Outer Harbour up to 4.3 m.
(iii) Sugar Factory Harbour 4.0 m.
(iv) Inner Harbour 3.7 m.

CRANES: 1 × 5.0 ton stationary crane at the Outer Harbour.
BRIDGES: Storstromsbroen has a vertical clearance of 26 m. A new bridge has been constructed across the Storstrom with a vertical clearance of 21 m. Power lines with 36 m. vertical clearance lie to the West of Masnedoevaerket. To the East of Masnedoevaerket, there is a bascule bridge with 25 m. horizontal clearance. Dronning Alexandrines Bridge has a vertical clearance of 26 m. across Ulvsund.
STEVEDORES: Working hours: 0700 – 1600.
MEDICAL: Local hospital available.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Machine shop available.
DRY DOCKS: None. 1 slip for vessels up to 150 tons.
AIRPORT: Copenhagen, 110 km. distant.
AUTHORITY: Stege Havn, Langelinie 1, DK-4780 Stege, Denmark. *Tel:* 55-815525. *Contact:* Harbour Master.

STIGNAESVAERKETS: 55.12 N. 11.15 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
2 Crew Declarations.
2 Ship's Stores Lists.
Usual Ship's Documents.

PILOTAGE: Vessels to apply for a Pilot through their Agent. ETA to be given 48, 24 and 12 hours prior to arrival.

Pilot boat equipped with VHF Channels 16, 13 and 12. It is painted orange on hull and wheelhouse and is stationed at Agersoe.

For vessels coming from the North, Pilots board at Korsoer. For vessels coming from the South, Pilots board at Egholm Flak.

ANCHORAGES: Korsoer Roads, depth 20 m., bottom sand, good holding ground. With area of about 2 nautical square miles.

Gulfhavn Roads, depth 30 m., bottom clay, good holding ground. Area – 1.5 nautical miles long and 0.5 nautical miles wide.

RESTRICTIONS: None.
MAX. SIZE: Coal Berth: Length 300 m. Max. beam 43 m. Max. draft 17 m.
Oil Pier: Draft 15 m.
Ash Berth: Max. draft 7.5 m.
Discharge Berth: Max. draft 8.5 m.

HEALTH: Usual regulations.
RADIO: Skagen Radio or Lyngby Radio.
VHF: Stigsnaesvaerkets Havn, Channels 16, 14 and 12.
RADAR: None.
TUGS: No tugs stationed at Stigsnaes, ship's lines to be used. Minimum of 12 hours to arrange tugs.
BERTHING: Coal Berth: Length 300 m., depth 18 m., max. draft 17 m. – discharging by shore equipment.

Oil Pier: Length no restrictions, depth 16 m., max. draft 15 m., discharge by shore equipment.

Ash Berth: Depth 8.0 m.

Discharge Berth: Length 135 m., max. beam 16.5 m., max. draft 8.5 m. Discharge rate 2,000 t.p.h.

CRANES: 2×20 tonne cranes at coal berth, travel 245 m., height from water 22 m. Outlay 31.5 m. Designed average discharging about 850 tonnes/p.h.
BULK CARGO FACILITIES: See "Berthing" and "Cranes".
SPECIALISED CARGO/HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: None.
MEDICAL: If not urgent, no notice required. Doctor, dentist and hospital available.
TANKERS: 1 Berth, depth 16 m., max. draft 15 m. Average discharge 60,000 tonnes/24 hour.

1×12 in. and 2×16 in. booms. The 12 in. boom can hydraulically connect to 8 in., 10 in. and 12 in. flanges, all standards. The 16 in. boom can hydraulically connect 12 in., 14 in. and 16 in. flanges, all standards.

DENSITY: 1007 – 1023.
FRESH WATER: By hose, 15 tonnes/p.h. 10 dkr/tonne.
FUEL: Not available.
FIRE PRECAUTIONS: No special precautions.
CONSULS: Norwegian and Finnish Consuls nearby, others in Copenhagen (120 km.).
REPAIRS: Small repairs can be carried out.
DRY DOCK: None.
SURVEYORS: 1. Caleb Brett and S.G.S. have local representatives.

2. Lloyd's Register, American Bureau and Bureau Veritas must be requested from Copenhagen (120 km.).

GANGWAY/DECK WATCHMAN: None.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCES: 1 bottle of spirits, 1 bottle of wine, 200 gm. tobacco or 200 cigarettes.
CARGO GEAR: Coal Berth, Oil Pier and Ash Berth, all by shore gear.
REPATRIATION: Possible.
AIRPORT: Distance to Copenhagen airport 120 km. Served regularly by all international airlines.
TIME: GMT plus 1 hour. Summertime (from end March to end September) GMT plus 2 hours.

HOLIDAYS: Depending on situation.
POLICE/AMBULANCE/FIRE: Tel: 000.
EMERGENCY CO-ORDINATION CENTRE: None.
TELEPHONES: None.
SERVICES: Most services can be ordered through Agent.
BANKS: Skaelskoer Bank a/s. Tel: (03) 596070. Telex: 40139.
STORING: See "Prelims".

1. By truck.
2. Yes.
3. Yes.
4. Yes.
5. None.
6. Yes.

SHIP SUPPLY SERVICE: See "Kalundborg".
SHORE LEAVE: Crew can always leave vessel and go ashore.
IDENTIFICATION CARDS: Seaman's Book sufficient.
REGULATIONS: None.
DELAYS: None.
AUTHORITY: S.K.Energi, Sjaellandske Kraftvaerker, Stigsnaesvaerket, DK-4230 Skaelskoer, Denmark. *Tel:* (53) 596011. *FAX:* (53) 595940. *Contact:* John Slangerup.

STUDSTRUP: 56.15 N. 10.21 E. (See Plan)

LOCATION: The harbour is located in Aarhus Bay in Kalo Inlet.

The harbour of Studstrupvaerket is a private harbour owned by I/S Midtkraft, Aarhus, and is run by Studstrupvaerket.

APPROACHES:
Leading Marks: On the harbour territory: 2 red fixed lights on bearing 304° 45' 40" (T). lead into the harbour.
Rear Light: On boilerhouse: Red triangle with down-turned apex.
Front Light: On the berth: Trellis mast with triangle with upturned apex.
PILOTAGE: Pilot assistance is imperative for navigation through the prohibited zone on entering Kalo Vig (inlet).

Pilot station: State Pilot Station, Udbyhoj. Tel: 86 48 50 24.

ANCHORAGE: Ships can anchor in the inlet outside the channel.
RESTRICTIONS: The harbour is not accessible without special permission from the works management, and it must only be used for purposes concerning operation of the power stations under I/S Midtkraft, and, for the delivery and shipping of fuel to or from the power stations of the companies within Elsam, co-operating with I/S Midtkraft.

The harbour is navigable day and night. The anchor can be used on arrival as well as on departure.

Depth of Water: On entering: 11.3 m. (37 ft.). At the Eastern 405 m. of the quay: 11.3 m. (37 ft.). At the innermost 90 m. of the quay: 7.7 m. (25 ft.).
Water Level: The difference between MHW and MLW is 0.15 m.

Western and Northwestern wind may give HW up to 1.25 m.

Eastern and Southeastern wind may give LW up to 0.9 m.

MAX. SIZE: *Largest Vessels:* Coal: LOA 245 m., beam 33 m. and draft 36 ft. Tankers: LOA 245 m., beam 33 m. and draft 33 ft.
TUGS: Tugs not available locally. An agreement on tug assistance has been made with Svitzer to whom applications can be made. Cable address: Svitzersalvage. Tel: 33-155195. Telex: 15983.

Tug assistance is normally not required for vessels up to 16,000 d.w.t. capacity.

The harbour supplies a mooring boat for assistance on entering.

BERTHING: Length of quay 495 m. Depth alongside 7.7 m. – 11.3 m.
CRANES: *Discharging of Coal:* 3 travelling cranes with a capacity of 12 tons.
MEDICAL: First-Aid Station: Falck, Hornslet.

Nearest Hospital: Aarhus K/H (Municipal Hospital).

Nearest Doctor: Laegehuset, Skoodstrup.

TANKERS: 1×12 in. discharge line for oil. Capacity 1,500 t.p.h. (approx.).

Connections available for 8 in., 10 in. and 12 in. hoses.

FRESH WATER: Available. Rate 14 cu.m.p.h.
FUEL: The port has no stock of bunker oil. If ordered through a broker, bunker oil may be loaded from a tank truck alongside the quay.
REPAIRS: No facilities, however, assistance can be ordered from the repair shop of the power station.
TELEPHONES: See "General".
IDENTIFICATION CARDS: For passing through the main gate a harbour pass is required.

Blank harbour passes for filling in by the ship's personel will be handed over by plant representative upon arrival.

GARBAGE DISPOSAL: Service available.
WASTE OIL DISPOSAL: Service available.
SEAMAN'S CLUBS: None.
GENERAL: *Clearance:* Nearest Custom House at Aarhus.
Supplies: The nearest towns are Skoodstrup (3 km.) and Logten (4 km.).
Telephone: Telephone calls can be made from the main gate. Payment will be collected by the gatekeeper.

The telephone on quay is for plant purposes and emergency calls only.

Special Regulations: Traffic to and from the port takes place through the gate of the main driveway of the plant by using the direct route from the quay.

Traffic is not permitted to stay or drive in the port.

Instructions from the gatekeeper or from factory employees must be obeyed.

Relatives of ship's crew are permitted to visit the ship provided that the above regulations are observed.

Dealing in commodities of any kind is prohibited in the area of the power station.

Safety Precautions: The port has no special personnel or equipment for fire fighting or life-saving. There is, however, a plant protection unit who handle limited fire fighting and life-saving equipment. There are a number of men trained in first-aid.
In Case of Fire or Accidents: Use the quay telephone. Dial extension 52 (Control Room of the station) and make your report. The Control Room is the alarm centre of the station, and can send for fire fighting assistance, ambulances, and medical attention along with first-aid.
AUTHORITY: I/S Midtkraft – Studstrupvaerket, DK-8541 Skoodstrup, Denmark. *Tel:* 86-991700. *FAX:* 86-993720. *Contact:* Flemming Plovmand.

SVENDBORG: 55.03 N. 10.38 E. (See Plan)

DOCUMENTS:

- 1 copy Crew List.
- 1 copy Passenger List.
- 1 copy Stowaway List.
- 1 copy Crew Personal Effects List.
- 1 copy Stores List.
- 1 copy Arms and Ammunition List.
- All vessel's certificates and documents.

PILOTAGE: Telegraphic address, "Belt Pilot, Rudkoebing". For contacting pilot boat on VHF, use Channel 16. International signals for Pilot. In Eastern entrance Pilot boards at Thuro Rev. In Western entrance Pilot boards at Lehnskov, or if ordered at, Skrams Flak.
ANCHORAGES: At Lunkebugt (Eastern entrance) and by Lehnskov (Western entrance).
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Max. LOA 180 m. Max. draft for passage through the Sound is 22 ft. 4 in.
HEALTH: Pratique granted on arrival by Customs Officers.
RADIO: All Danish coast stations can be used. (See "Horsens".)
TUGS: Normally tugs stationed in Svendborg, ships wanting tugs order through Agent before arrival.
BERTHING: The total length of quays is about 1,900 m., and depth alongside ranges from 4.3 m. to 7.5 m.

There are 3 cruise ship berths with lengths 250 m., 110 m. and 100 m. Max. draft 6.8 m.

BRIDGES: 1 mile West of harbour a bridge crosses the sound. Free height 33 m.
STEVEDORES: Ordered by Agent.
MEDICAL: Doctors and hospital service always available.
DENSITY: Approx. 1016.
FRESH WATER: Available at all piers. 20 t.p.h.
FUEL: No bunker lines. Diesel can be delivered by tank lorries.
CONSULS: Vice-Consulates: Norway, Tel: 62213117; Sweden, Tel: 62211410; Finland, Tel: 62212221; Germany, Tel: 62211515; Iceland, Tel: 62131800.
REPAIRS: All repairs to deck and machinery carried out by shipyard.
DRY DOCKS: Floating docks for ships up to 10,000 tons weight.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: See "General" before first port.
REPATRIATION: Facilities exist.
AIRPORT: Beldringe Airport (domestic flights), 50 km. by road.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; the day before Good Friday; Good Friday; Easter Monday; May 1st; Ascension Day; May 5th; Prayer Day; Whit Monday; June 5th; 25th and 26th of December.
FIRE/AMBULANCE/POLICE: Call 112.
TELEPHONE: No telephone for ships.
SERVICES: Compass adjusting.
SHORE LEAVE: No restrictions concerning shore leave for crew.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: All garbage is collected from the wharf without charge.
WASTE OIL DISPOSAL: Waste oil is collected from the wharf without charge, capacity 3 tons to 20 tons, 24 hours notice required. For service telephone Harbour Office 62210657.
SEAMAN'S CLUBS: There is no Seaman's Club, but football matches can be arranged.
CURRENCY: Danish Kroner.
AUTHORITY: Port Authority of Svendborg, Jessens Mole 9, 5700 Svendborg, Denmark. *Tel:* 62210657. *FAX:* 62220679. *Contact:* Kurt Hansen, Harbour Master.

TUBORG HAVN: 55.44 N. 12.35 E. (See Plan)

DOCUMENTS: Same as Copenhagen.
PILOTAGE: Not compulsory except for tankers loading with petrol. For Pilot call Copenhagen Pilot (See Pilot Information for Copenhagen).
ANCHORAGES: See "Copenhagen".
MAX. SIZE: Max. draft 6.0 m., 4,000 d.w.t.
HEALTH: See "Copenhagen".
RADIO: Lyngby Radio: OXZ. VHF Channel 16 to all installations. ETA cables to Agents and receivers preferably by Lyngby Radio.
TUGS: Can be obtained from Copenhagen.

CRANES: Mobile cranes up to 110 tons can be obtained from Copenhagen.
SPECIALISED CARGO-HANDLING FACILITIES: Shore ramp for Ro-Ro traffic. Modern container-handling equipment available.
MEDICAL: No advance notice necessary. Hospitals available.
FRESH WATER: From water boat.
FUEL: All grades available by lighter. 10 hours notice preferred.
CONSULS: See "Copenhagen".
REPAIRS: All forms of deck and engine repairs can be effected.
GANGWAY/DECK WATCHMEN: Not necessary.
HATCHES: Opening and closing carried out by ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes. 1 bottle wine, 1 bottle spirits.
REPATRIATION: See "Copenhagen".
AIRPORT: Copenhagen airport 14 miles (23 km.) from Tuborg port. Connections to all parts of the world.
TIME: GMT plus 1 hour. Summertime is kept.
HOLIDAYS: See "Copenhagen".
POLICE/AMBULANCE/FIRE: Dial 000.
TELEPHONES: Not available on board.
SERVICES: Services available for compass adjusting, radio and radar repairs.
SHORE LEAVE: No restrictions.
AUTHORITY: Tuborg Harbour, Tuborg Havnevej 11, DK-2900 Hellerup, Denmark. *Tel:* (1) 29 59 25. *Telex:* 16347 Tuborg DK. *Cables:* Tuborg Copenhagen. *Contact:* K. Guldberg Mikkelsen, Harbour Master – Tuborg Havn.

VEJLE: 55.42 N. 09.33 E. (See Plan)

DOCUMENTS: Required on arrival:
2 Crew Lists.
2 Passenger Lists.
1 Tobacco List.
1 National Reg. Certificate.
1 Load Line Certificate.
1 Tonnage Certificate.
1 Manifest.
1 Bill of Lading.
1 Derat Certificate.
1 Radio Safety Certificate.
1 Clearance inward and outward.
1 Safety Certificate.
PILOTAGE: Pilot station now at Juelsminde, radio Pilot Vejle VHF Channel 16 – 3 hours notice of ETA. The Pilot will embark and disembark at Rosenvold Hage on the N-side of the fjord.
ANCHORAGES: (1) At Rosenvold Hage, (2) at Traeskohage.
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Max. length 550 ft., max. draft 22 ft. 4 in.
HEALTH: Pratique procedure is carried out by Customs dept.
RADIO: Lyngby Radio, OXZ, Blaavand Radio OXB.
TUGS: Available inside port, ship's lines.
BERTHING: 18 berths. Total quayside in excess of 1,600 m. Depth 5.0 m. – 7.0 m.

Facilities include grain silos and a grain elevator, oil storage, 5 quay cranes and 1×35 ton mobile crane.
BRIDGES: A highway-bridge has been built over the fjord over the entrance-channel about 1 mile outside the harbour entrance.

Max. height over the channel is 40 m.
STEVEDORES: Available. 0700 hrs. start must be informed 24 hours in advance.
MEDICAL: Hospital facilities available day and night with doctors available 24 hours per day.
TANKERS: 2 tanker berths, max. draft 23 ft. No slop tank available. Diameter of discharge lines 8 in. and 6 in.
DENSITY: Average density 1020.
FRESH WATER: Delivered from lines on piers. Rate 14 t.p.h. Cost 16.00 Kr./ton.
FUEL: All grades available. No advance notice required.
CONSULS: Vice-Consuls: Greece, 821929; Norway, 829122; Spain, 820233; Germany, 820011.
REPAIRS: Deck and engine repairs can be undertaken.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: See "General" before first port.
REPATRIATION: No facilities.
AIRPORT: Billund 32 km.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; Easter; 1st May, Whit Sunday, Christmas holidays. Cargo work can be done on overtime except 1st May (Labour Day).
POLICE/AMBULANCE/FIRE: Police, tel. 821744; Ambulance, 822244; Fire, 822244.
TELEPHONES: No arrangements exist for placing on board.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Drums provided alongside and arranged by Agent.
WASTE OIL DISPOSAL: Service available by tanker trucks, to be arranged through Agent.
SEAMAN'S CLUBS: None.
AUTHORITY: Vejle Havn, Havnepladsen 5, 7100 Vejle, Denmark. *Tel:* 75-820466. *FAX:* 75-838754. *Contact:* Peter Barsoee Bohsen, Harbour Master.

VORDINGBORG (South Harbour – formerly Masnedsund): 54.59 N. 11.54 E. (See Plan)

DOCUMENTS: See "Copenhagen".
PILOTAGE: Available from Masnedoe Pilot Station, Tel: 03-772170.
ANCHORAGE: Vordingborg Roads.
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Draft 19 ft. max., breadth 25 m. (depending on vessel's height) owing to passage of bridge before entering harbour. Width of bridge opening 25 m. At a height of 25 m., width of opening 22 m. due to angle of raised bridge.
RADIO: Lyngby Radio.
VHF: Port on Channel 16.
TUGS: Available from Nakskov, Korsoer, Copenhagen. Notice for towage about 6 – 8 hours.
BERTHING: Berths equipped for handling grain, ore, coal and LPG carriers.
Masnedoe Power Station: See "Port of Masnedoevaerket."
BRIDGES: Passage of bridge 25 m. wide, with height of 18.0 m. over waterline, decreasing to width 20.5 m. with height of 33 m. over waterline, opening day and night. Bridge normally in radio contact with Pilot Station. Fully lighted. Approach to power station from the West – pier situated just to the West of opening bridge, and therefore no passage.

In the approach to Vordingborg and power station passage are overhead power cables, max. air draft 36 m.
STEVEDORES: Local stevedores ordered by Agent.

Working hours: 0700 hrs. – 1600 hrs.
MEDICAL: Hospital available.
FRESH WATER: Supplied by pipeline to berths.
FUEL: All common fuels available.
CONSULS: At Copenhagen.
REPAIRS: Most repairs, engine and equipment available. Electronic service only available from Copenhagen.
DRY DOCK: No local dry dock. Nakskov/Copenhagen nearest.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close, otherwise as per C/P.
CERTIFICATES:
Registered Certificate of Tonnage.
Derat Certificate.
Construction Certificate.
Load Line, and Equipment Certificate on first call.
CUSTOMS ALLOWANCES: See "General" before first port.
CARGO GEAR: One mobile crane, one grain elevator.
AIRPORT: Kastrup, 96 km.
HOLIDAYS: See "Copenhagen".
POLICE/AMBULANCE/FIRE: Police 03-771448; Ambulance, Fire Brigade 0-0-0.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Vordingborg Havnevesen, Sydhavnsuy 19, 4760 Vordingborg, Denmark. *Tel:* 53-770425. *FAX:* 53-773743. *Contact:* Arne Martins, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Djibouti

DJIBOUTI: 11.36 N. 43.08 E. (See Plan)

PORT LIMITS: *Maritime Limits:* The reference data for the delimitation of the maritime zone coming under the Port of Djibouti are as follows:

Point A:	Lat. 11° 35.70' N.,	Long. 43° 04.35' E.
Point B:	Lat. 11° 41.00' N.,	Long. 43° 04.35' E.
Point C:	Lat. 11° 41.00' N.,	Long. 43° 14.00' E.
Point D:	Lat. 11° 38.00' N.,	Long. 43° 14.00' E.
Point E:	Lat. 11° 37.39' N.,	Long. 43° 09.00' E.

DOCUMENTS: Crew List for ship's Agent. Crew Manifests and Manifests of Passengers in Transit or for disembarkation, for whom disembarkation cards are to be completed. Presentation of Health Declaration and verification of compulsory immunisations by the health representative.

The following documents are required, preferably prior to the arrival of the vessel.

	Cargo Manifest	*Freight Manifest*	*Danger-ous Cargo List*	*Stowage Plan*	*Hatch List*
For Djibouti Port Authorities	6	—	2	—	1
For Stevedores	3	—	—	1	1
For Agent	1	2	—	—	—
If transhipment, additional	2	—	—	—	—
To be despatched by airmail or airfreight in due time, prior ship's arrival at Djibouti	3	1	1	1	1
On board vessel and if impossible by airmail or airfreight	7	1	1	—	—

Derat Certificate: At the present time Derat cannot be carried out at Djibouti, but the Port Health Authority, after inspection, are empowered to extend expired certificates by one month.

APPROACHES: Djibouti Bay can be reached from 2 channels – North and East. Only the Northern one is marked.

The Traditional Channel – The "North" Pass: The port, which has easy access by day or night, is normally entered by the North Channel, vessel after rounding Ras Bir, passing to the Northwards of Musha and Maskali Islands until the transit towers situated to the Westward of the town are sighted. The two transit towers, when in line, bear 184° (T) from seaward. Both towers exhibit quick flashing lights which at night time may be easily seen at a distance of 9 miles. In daytime the two towers may be located by first sighting Mount Direction, a distinctive conical hill to the Southward. The nearest transit tower is a white rectangular building with a single wide vertical black stripe while the further tower is a white rectangular building with two broad horizontal stripes.

When on the leading line proceed to Buoy No. 2 on the Heron Bank, where the Pilot will board; the Master is advised to await the Pilot slightly North of Buoy No. 2.

The "South" or "East" Channel: The Southern or Eastern approach for vessels entering passes South of Musha and the Maskali Islands after clearing the Arab Bank. Vessels using this approach must keep at least 1 mile North of the Heron Bank until they reach the transit line described above. The Pinqouin Bank Buoy situated West of the transit line makes a good check point.

The Northern channel is usually used for vessels proceeding in a N.N.E. direction.

The Eastern channel is not marked, and is not recommended for vessels approaching the port. Approaching from the East of the island of Musha by day can be dangerous if visibility is poor.

PILOTAGE: Pilotage is compulsory for all vessels with a nett tonnage in excess of 300 tons and is available 24 hours a day, throughout the year.

Pilots board inward bound vessels between No. 1 Buoy and No. 2 Buoy. Outward bound vessels normally disembark their Pilot between No. 2 Buoy and No. 4 Buoy. Pilot boats are painted white and carry the flag "H" by day and the usual lights by night.

An internationally approved pilot ladder on the lee side with man-ropes, and suitably illuminated at night time, must be available.

Vessels calling for Pilots at departure if unable to contact the Pilot Station on VHF should sound 3 long blasts on whistle or siren half an hour prior to sailing, this signal also calls the tug and mooring gang.

ANCHORAGE: Anchorage zone is within following limits:

1. Eastern limit: a line parallel to and 0.25 miles West of the North passage.
2. Southern limit: Latitude 11° 37' N.
3. Western limit: a bearing with the Western extremities of Penguin and Ambouli Banks in alignment.

It is forbidden to anchor 1.5 cables on each side of the alignment of Ambouli and d'Ayabele Lights.

Average depth is of 15 m. to 20 m. Anchor holding is excellent, even with a strong S.W. monsoon when there is often a heavy swell.

It should be noted that anchorages within a quarter of a mile of either side of the entry transit line is strictly prohibited.

RESTRICTIONS: Entry during the day or night. Highest tide 2.90 m. Mean tide is approximately 1.60 m., and lowest are 0.20 m. Tidal currents are very weak in bay and rarely exceed 1 knot.

MAX. SIZE: Entrance to inner roads dredged to 11 m. depth.

Max. Draft: Cargo vessels 10.3 m. Container vessels 11.3 m. Vessels bunkering and Tankers 12.0 m.

HEALTH: Generally Free Pratique by radio can be granted to all ships applying through Coast Station Djibouti Radio. Ships must radio in plain or international code, a maximum of 12 hours and a minimum of 4 hours prior to arrival in port. In all cases, when Pilot boards vessel he gives Master a copy of Maritime Health Declaration which must be filled in by Master and countersigned by ship's doctor, if the crew includes one. An examining official comes on board when vessel arrives to receive the Maritime Health Declaration. Cholera and Yellow Fever Certificates required from all travellers coming from an infected area, excepting children of under 6 months of age.

RADIO: *Via the Harbour Master's Office:* For short distance communications, ships can link up with the Harbour Master's Office, by VHF radio-phone: the Harbour Master's traffic unit is equipped with a VHF station for broadcasting and receiving on Channel 12 (156.6 MHz) and Channel 16 (156.8 MHz). These links are solely for the exchange of nautical information between the Harbour Master's Office and vessels (confirmation of ETA; ship's draft; and orders concerning the boarding time of the Pilot and dropping the anchor to wait for Pilot.)

Via Djibouti Coastal Station: For medium or long distance communications, ships can link up with the shore through the coast station at Djibouti, by radio telephone or telegraph. This station can meet all requirements from ships using the port of Djibouti. It handles official and private communications and is permanently on watch.

Call sign J2A maintains a continuous 24 hours listening watch on 500 kHz and replies on 464 kHz.

For long distance communication using the call sign "J2A8", the station maintains listening watches between 0400 hrs. and 1000 hrs. GMT and 1200 hrs. to 1715 hrs. GMT on 8682 kHz. Traffic lists are transmitted at 0400 hrs., 0600 hrs., 0800 hrs., 1200 hrs., 1400 hrs. and 1600 hrs. GMT.

In the 12 megacycle band using the call sign "J2A9", the station works on the frequency 12,782 kHz between 1000 hrs. and 1200 hrs. GMT. Traffic lists are transmitted at 1000 hrs. and 1100 hrs. GMT.

Radio-telephony: Djibouti Radio (J2A) service covers the following:

(a) The station can cover medium distances through radio-telephone, from 1605 kHz to 2850 kHz.

Call sign: Djibouti Radio/J2A.
Call frequency: 2182 kHz.
Working frequency: 2586 kHz.
Power: 1 Kw.
It is open for the international calls (2182 kHz) at the following times: From 0500 – 0900 hrs., and from 1300 – 1500 hrs. GMT.

(b) VHF

Listening Channel 16 (156.8 MHz).
Working Channel 20 and 24 (24 hours).

Vessels can link up with subscribers of the automatic telephone system in Djibouti.

Radio telegrams sent to ships at sea must be delivered to the telegraphic section at the post office, Ave. de la Republique, during office hours.

TUGS: In Winter (slight Easterly monsoon), a single tug is generally sufficient for manoeuvring. In Summer during the Khamsin period, berthing or sailing often requires 2 tugs. There is a 1,500 h.p. diesel tug *Aboubaker Pacha;* a 1,800 h.p. tug, *A. Rimbaud;* a 1,400 h.p. diesel tug *Henri Lambert;* a 2,200 h.p. tug *Bab-El-Mandeb* and 1 auxiliary 600 h.p. tug. All tugs equipped with fire fighting equipment.

BERTHING:

Quay	*Length* (m.)	*Depth* (m.)	*Usage**
No. 1	180	9.50	L, D, B, Containers.
No. 2	220	12.00	L, D, B, Containers.
No. 5	230	7.30	L, D
No. 6	180	7.90	L, D, Ro-Ro.
No. 7	250	7.90	L, D, B
No. 8	208	9.45	L, D, B
No. 9 (dolphins)	200	9.00	L, D, B, Refrig.
No. 10 (dolphins)	270	11.00	B, Lay-by Berth.
No. 11	170	11.00	B, Discharge Black and White Oils.
No. 12	270	12.00	B, Discharging Black and White Products.
No. 13	210	9.45	L, D, B, Discharge of Liquid Gas and Loading of Molasses in bulk.
No. 14	290	12.00	L, D, B
No. 15	106	12.00	L, D, B

*KEY: L = Loading D = Discharging B = Bunkering

CRANES: There are no cranes on quays, but the port has 2 mobile cranes of 15 tons and 40 tons capacity plus a floating crane for the handling of heavy-lifts of 80 tons capacity.

BULK CARGO FACILITIES: Molasses can be handled. Flour storage facilities (Private) with capacity of 4,000 tons.

SPECIALISED CARGO HANDLING FACILITIES: Open ground and shedded areas for containers, Roll-on/Roll-off traffic and Quay for the traffic of lighters.

Container Terminal: 2×35 ton Paceco gantry cranes, 4×40 ton Hyster lift trucks, 2×12 ton Hyster lift trucks, 8 Mafi tractors and 12 Gaussin low trailers. 24 × 220 volt reefer points.

BRIDGES: None.

STEVEDORES: Four companies available, office hours from 0700 to 1730 hrs. Stevedoring 24 hours.

Working Hours: Normal working hours are 0700 – 1200 hrs. and 1300 – 1800 hrs. Overtime can be worked between 1900 – 2400 hrs., and if necessary to finish a vessel, between 0100 – 0600 hrs. It should be noted that Friday is the normal day of rest and all work on this day is at overtime rates.

MEDICAL: Port Medical Service directed by medical practitioner specialised in industrial medicine is situated in a building neighbouring the port offices. It operates a dispensary. Passengers and sailors in transit are treated by private doctors from town who may visit the ships. Serious cases can be hospitalised in Djibouti's civil or military hospitals.

TANKERS: Reception lines: Berth Nos. 12 to 13 specially equipped for reception of bunkering products are linked with installations of the petroleum companies by a 16 in. dock-line and 12 in. (FO) and another of 12 in. (DO). Pier No. 10 is connected to the installation with a dock-line of 12 in. Rate of discharging can reach between 2,000 and 2,500 t.p.h. Reception of white products is assured from Quay No. 13 by an 8 in. line; for gas there is a 4 in. line.

Max. draft for loaded tankers is 12.0 m.

FRESH WATER: Each quay provided with 3 – 5 (200 mm.) water-hydrants. Delivery of 40 cu.m. of water per hour. Regardless of the season, there is never any shortage of fresh water.

FUEL: Available at oil berths and commercial berths (not Berths No. 5 and 6). A complete range of different viscosities and products is available. Meets all the usual requirement of bunkering vessels. Ample supplies of fuel and diesel oil are always available. Normal rate 200 – 300 t.p.h.

Suppliers: Mobil, Shell and Total.

Commercial Bank of Ethiopia, Head Office, Addis Ababa (Ethiopia), Djibouti Branch: rue de Marseille, Djibouti B.P.187. Tel: 352101, 352102. Telex: Ethio Bank 5835 DJ.

Commercial and Savings Bank of Somalia, Head Office, B.P.203 Mogadisho. Branch of the Commercial and Savings Bank of Somalia. Office: Place Lagarde, Tel: 353666, 351282. Telex: Savcom 5879 DJ.

STORING: In the Port of Djibouti, vessels are bunkered at all the quays, and are supplied with fresh water (without limitation as to the amount requested), whilst they are carrying out their commercial operations of loading or discharge of cargo).

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

GENERAL:

Tides: The highest tides reach 2.9 m., the average tide is around 1.6 m., and the lowest drop to 0.20 m.

Tidal currents are very weak in the bay, only rarely exceeding one knot. They usually move Eastwards during the ebb tide, and Westwards during the flood tide.

Winds: From October to the beginning of May moderate Easterly winds dominate. During the S.W. monsoon, from the middle of June to early September, there are frequent gales from the West (Khamsin), when the sea becomes rough or very rough. There is little or no wind in May and September.

Swell: The sea is usually very calm in the outside roadstead, in the anchoring zone protected in the East by the Heron Bank. In normal weather the swell does not exceed 1 m. During the Khamsin period, it can reach 2.0 m. – 2.5 m. However, there is no undertow inside the port.

DEVELOPMENTS: The Port of Djibouti will undertake a 2nd development project.

1. Storage shed No. 1 and 2 to be dismantled.
2. Construction of maintenance facilities in the vicinity of the C.F.S.
3. Container yard modifications and extension of the Free Trade Area.
4. Extension of the container terminal area.
5. Rehabilitation of Berth No. 10.
6. Quay No.1 to be dredged to 12.0 m.

SHIPMASTER'S REPORT: September, 1979.

Approaches: After passing Muskali Beacon on approaching, the leading lights, during daytime (183.5° True) are often not visible due to the sun's glare. At night these make an excellent approach.

Pilotage: Do not proceed beyond No. 2 Heron Bank Buoy. Pilot boat 12 m., blue hull, white top and displaying Pilot signals.

Radar/VHF: Channel 12 for calling and operations. No Port radar.

Hatches: Opening/Closing normally carried out by ship's crew.

General: Provisions both fresh and dry available, but expensive.

AUTHORITY: Port Autonome International de Djibouti, P.O.Box 2107, Djibouti, Republique de Djibouti. *Tel:* 35 23 31, 35 10 31; 35 32 66 (Container terminal). *Telex:* 5836 DJ; 5853 DJ (Container terminal). *FAX:* 356187. *Cables:* Dirport Djibouti and Comport Djibouti. *Contact:* Aden Ahmed Douale, Port Director. Mohamed Moussa Abar, Harbour Master.

NOTES

Commonwealth of Dominica

PORTSMOUTH: 15.32 N. 61.29 W. (See Plan)

DOCUMENTS: See "Roseau".
PILOTAGE: Pilotage is not compulsory, and if required must be obtained at the Roseau Pilot Station.
ANCHORAGE: With lighter jetty bearing 100° at a distance of 4 cables, the depth of water is 70 ft.
BERTHING: Portsmouth is an anchorage port principally engaged in the export of agricultural produce by small inter-island vessels.

No alongside facilities. 1×3 tonne forklift is available.

A steel piled/concrete decked "L" shaped pier 225 ft. long, 40 ft. wide with 12 ft. of water at the head provides lighterage berthing and accommodates inter-island sloops, schooners and motor vessels. One transit shed available.

Cabrits Cruise Ship Berth: The Cabrits Cruise Ship Berth is a dedicated cruise facility uniquely situated within the Cabrits National Park Area, Portsmouth, in a non-commercial environment and close to the restored ruins of the historic Fort Shirley.

The Cabrits Cruise Ship Berth is located 32 road miles North of Roseau, at Lat. 15° 34.95' N., and Long. 61° 28' W.

This dedicated cruise ship facility was opened in 1992, to accommodate cruise ships arriving in the North of the island, and is a timber wharf running parallel to the coast with a pedestrian walkway in a "T" configuration.

The facility also includes a 12,000 sq.ft. passenger reception centre constructed to provide passengers with modern conveniences, including an auditorium where passengers can watch live entertainment and/or professionally prepared videos on Dominica, offices, craft shop and cafeteria.

Length of Timber Wharf	300 ft. (91.44 m.).
Width of Wharf	16 ft. (4.88 m.).
Length of Walkway from Wharf to Reception Centre	156 ft. (47.55 m.).
Width of Walkway	16 ft. (4.88 m.).
Depth of Water alongside Wharf	35-49 ft. (10.67-14.94 m.).
Height of Wharf above Mean Water Level	8 ft. (2.44 m.).
Tidal Range	1.6 ft. (0.49 m.).
Maximum Swell (October to April)	3 ft. (0.91 m.).

All enquiries in the respect of the use of the port of Portsmouth should be addressed to the Port Authority, Roseau.
MEDICAL: A cottage hospital and doctor are available.
FRESH WATER: Available at Cabrits Cruise Ship Berth.
FUEL: Not available.
SURVEYORS: See "Roseau".
AIRPORT: Available.
POLICE/AMBULANCE/FIRE: Police Tel. 5222. Ambulance Tel. 5237 (Hospital). Fire Tel. 5215. Custom House Tel. 5255.
EMERGENCY CO-ORDINATION CENTRE: See "Roseau".
BANKS: See "Roseau".
STORING: See "Roseau".
GARBAGE DISPOSAL: Collection service is available. Skips can be provided alongside upon request by Agent. Tel: (809) 448-2401, Ext. 466, for service. Charges and collection time can be arranged by Agent.
WASTE OIL DISPOSAL: No facilities available.
SEAMAN'S CLUBS: None.
CURRENCY: Eastern Caribbean Dollar. Exchange rate against the U.S.$ 2.7169 (fixed).
AUTHORITY: Dominica Port Authority, Woodbridge Bay, P.O.Box 243, Fond Cole, Commonwealth of Dominica. *Tel:* (809-44) 84431/2/3. *Cables:* Domport. *FAX:* (809-44) 86131. *Contact:* M.A. Green, Office Manager (Home Tel: (809-44) 84500).

ROSEAU: 15.17 N. 61.24 W. (See Plan)

PORT LIMITS:
Lat. 15° 19' 00" N., Long. 61° 24' 29" W.;
Lat. 15° 21' 00" N., Long. 61° 24' 29" W.;
Lat. 15° 21' 00" N., Long. 61° 23' 09" W.
DOCUMENTS: Port Authority requires before commencement of discharge, 2 copies of the vessel's manifest, and 1 stowage plan or hatch block sheet. Masters are advised that these should be airmailed ahead of the arrival. On arrival, documents required are:

Port Authority:
- Ship's Register to sight.
- International Health Declaration.
- 1 Crew List.
- 1 Passenger List.
- 1 Hazardous Cargo List.

Customs:
- Clearance from last port.
- 1 Stores List.
- 2 Personal Effects Declaration.
- 1 Manifest.
- 1 Crew List.
- 1 Passenger List.
- 1 Arms and Ammunition List.
- 1 Narcotics List.

Immigration:
- 1 Crew List.
- 1 Passenger List.

PILOTAGE: Pilotage is compulsory for berthing all vessels in excess of 100 g.r.t. Pilotage is available for anchorage on request. Pilots will board in approx. position Lat. 15° 17' 54" N., Long. 61° 24' 50" W. The pilot boat will display International code "H" by day and a white light over red light by night. Requests for Pilots should be made 24 hours in advance either through the vessel's Agent or by cable to "Domport". Vessels may contact the Port Authority through Dominica Port Radio on VHF Channel 16 from 0800 – 1600 hrs., and for 2 hours in advance of the vessel's ETA.
ANCHORAGES: A restricted area exists in Woodbridge Bay between:
Lat. 15° 19' 00" N., Long. 61° 24' 15" W.,
Lat. 15° 18' 00" N., Long. 61° 24' 15" W.,
Lat. 15° 18' 00" N., Long. 61° 24' 00" W.
and vessels may not anchor therein, except under General Manager's instructions. Anchorage may be taken South of this area and in Roseau Roadstead 1.5 – 2 cables offshore in 15 – 30 fathoms depending on the vessel's size. All anchorages are steep-to and care should be exercised so as not to drag off the bank when anchoring.
MAX. SIZE: See "Berthing".
HEALTH: International Declaration of Health. In addition any death, fever or suspected contagious disease should be notified in advance to Agents or Port Authority by cable or radio.
RADIO: HF/SSB. 8281.2 – Monday – Friday 1200 – 2000 hrs. Also see "Pilotage".
TUGS: None.
BERTHING: *Woodbridge Bay:* The Woodbridge Bay Port is located on the South West coastline of the island, 1 mile North of the capital Roseau, at Lat. 15° 19' N., Long. 61° 24' W.

Main Wharf:

Length:	800 ft. (243.86 m.).
Minimum depth alongside:	32 ft. (10 m.).
Wharf level:	10 ft. (3.1 m.).
Width of Wharf:	60 ft. (18.3 m.) up to 300 ft. (91.44 m.) and 40 ft. (12 m.) up to 500 ft. (152.4 m.).

The Wharf is constructed on open-ended 18 in. seamless piles designed for an allowable load of 100 tons in compression and 70 tons for the approach trestle.

Roseau Ferry Terminal: The Roseau Ferry Terminal is situated in Roseau, at Lat. 15° 18' 28" N., Long. 61° 23' 56" W.

The facility was constructed in 1995 to accommodate ferry passengers from Guadeloupe and Martinique. At the Terminal, there are offices for Customs, Port Authority, Ship Agents and Immigration.

Depth alongside is 12 ft. (3.66 m.).

Roseau Cruise Ship Berth:

The Roseau Cruise Ship Berth is situated in Roseau, at Lat. 15° 17' 25" N., Long. 61° 23' 32" W., within walking distance of the business and shopping areas in Roseau.

The facility was constructed to berth large cruise ships, and in the future small cruise ships when appropriate fenders are placed against the concrete portion of the platform.

Length of the Platform	160 ft. (49 m.).
Width of the Platform	37 ft. (11.30 m.).
Access Walkway	28 ft.×11 ft. (8.8 m.×3.3 m.).
Depth of Water alongside	40 ft. (12.2 m.).

The highest level of the sea along the berthing line is 31.66 ft. (9.65 m.) C.D.

Ships with a draft between 28 ft. and 30 ft. could call at the Roseau Cruise Ship Berth with no swell condition, with care.

Traction on bollard: 80 tons.

Berthing dolphins: There are 3 berthing dolphins.

Mooring dolphins: Thre are 4 mooring dolphins.

CARGO HANDLING FACILITIES:
Mechanised Cargo Handling: Breakbulk cargo is handled palletised on ships/shippers/port pallets. Adequate forklift trucks, trailers, and tractors are available to work all berths, Small inter-island vessels can be discharged by 15 ton Lorain crane. One 55 ton American crane and one 27.5 ton Lorain crane are also available. 1×27 tonne and 1×40 tonne container lifter available. Containers up to 40 d.w.t. can be handled ashore if placed on port trailers by ship's gear. Ro-Ro barges capable of trimming to ramp height of +10 ft. are accommodated on the South end of Woodbridge Bay Pier.
STEVEDORES: Stevedores and longshoremen arranged by Dominica Stevedores Ltd.
MEDICAL: One Government general hospital, one private group medical clinic and one private dental clinic are available.

On board visits by a doctor can be arranged.

Where possible advance notice should be given.

TANKERS: Petroleum products are presently handled at 5 different anchorages on the West coast.
L.P.G.: Woodbridge Bay (2) max. draft 12 ft. Floating hose from vessel.
Mogas – Gasoil (Dieselene), Kerosene, Spray oils:
Rockaway (2), 1 mile North of Woodbridge Bay, draft 18 ft., 800/900 ft. floating hose from ship.
Boiler Fuel (Bunker C): Belfast, 2 miles North of Rockaway, max. draft 18 ft. (up to 25 ft., if vessel equipped for stern discharge) 4 in. submarine line.
Bulk Edible Oils and Soap Chemicals: Belfast, max. draft 14 ft., 4 in. floating hose (200 ft.) from shore.

The above are single anchor, stern-to berths with stern lines to shore posts. Vessels should have at least 4 ropes available aft and provision to bend 2 lines together.

The above are private facilities but pilotage is available. In the case of Woodbridge Bay (L.P.G.) pilotage is compulsory. Tankers in their ETA advice should include their cargo by products and their draft.

Also see "Developments".

DENSITY: Approx. 1025.
FRESH WATER: Available alongside all berths at a cost of EC $ 30.00 for 1,000 gals.
FUEL: Dieselene (Gas oil) available in limited quantities ex-tank wagon at all berths. Other grades not available.

GANGWAY/DECKWATCHMEN: Available if required.
OPENING/CLOSING HATCHES: Beam and board hatches, crew or stevedores; Ship's option. Patent Hatches; ship's crew.
CERTIFICATES: Previous Port Clearance; Ship's Register, to sight.
CUSTOMS ALLOWANCES: 200 cigarettes, or 0.5 lb. tobacco or 25 cigars, 26 ounces of spirits per crew member.
CONSULS: (Or Consular Agents).

		Business	*Residence*
France	C. A. Butler	Tel. 2033	Tel. 1146
Netherlands	W. A. Astaphan	3221	2524
Belgium	Achille L. Pinard	2781	2756

REPAIRS: Minor and emergency repairs can be arranged. Engines and deck gear cannot be put out of service without permission of the Port Manager.
SURVEYORS: Lloyd's Agent available for cargo survey. A non- assigned Hull Surveyor is available.
REPATRIATION: Limited inter-island flight capacity to nearest international airports – Guadeloupe, Martinique, Antigua, Barbados.
AIRPORT: Melville Hall 37 miles. Inter-island services only. Canefield Airstrip 2 miles – Charter aircraft and Air Guadaloupe.
TIME: GMT minus 4 hours.
HOLIDAYS: New Year's Day, Carnival (Mardi Gras) 2 days. Good Friday, Easter Monday, Labour Day, Whit Monday, August Monday, National Day (Nov. 3rd – 4th), Union Conference Day (A Sunday in November), Christmas Day, Boxing Day.
Minimum working: Can be arranged on these days, but it is not advised over the Carnival or National Day Holidays.
POLICE/AMBULANCE/FIRE: Police Tel. 2222 or call on 2182 kHz., Fire Tel. 2888, Ambulance Tel. 2321.

At anchor or away from a telephone, blow 3 short and 1 prolonged blast at frequent intervals until acknowledged on VHF Channel 16 or by lamp.
EMERGENCY CO-ORDINATION CENTRE: Port Authority connected with other Regional Port Authorities and U.S.C.G. VHF Channel 16, HF, S.S.B. Standby 2182 and 8281.2. Working 4136.3, 4139.5, 8284.4, 12421.0, 12424.5, 16565.0 and 16568.5.
TELEPHONES: On board service can be provided at the Ocean Wharf, Woodbridge Bay (discontinued at present due to hurricane damage).
SERVICES: Assistance can be given for emergency repairs to electronic equipment, compass adjusting and D/F calibration subject to advance notice. Provisions can be obtained, but advance notice should be given especially for fruit and vegetables of high quality.
BANKS: Barclays Bank International Ltd., Royal Bank of Canada, Bank of Nova Scotia, Banque Antilles Francais. The National Commercial & Development Bank of Dominica has international correspondents.
STORING: Vessel can store by truck. No facilities to store by barge. Trucks may proceed alongside for direct delivery/discharge, subject to Port Authority agreement. Fork lift trucks may be used. Vessels must be cleared outward for duty free concessions. Riggers available to assist with storing.
SHORE LEAVE: After Inward Clearance, there are no restrictions on shore leave. Masters are advised to note that immigration law holds the vessel/owner/agent, financially reponsible for any crew member or intransit passenger left behind (for whatever cause). Vessel's having no accredited Agent will be required to satisfy Immigration Authorities before outward clearance is granted.
IDENTIFICATION CARDS: Dock passes for crew members will be issued through the vessel's Agents.
GARBAGE DISPOSAL: Collection service is available. Skips can be provided alongside upon request by Agent. Tel: (809) 448-2401, Ext. 466, for service. Charges and collection time can be arranged by Agent.
WASTE OIL DISPOSAL: No facilities available.
SEAMAN'S CLUBS: None.
CURRENCY: Eastern Caribbean Dollar. Exchange rate against the U.S.$ 2.7169 (fixed).
DEVELOPMENTS: A new oil terminal is in operation at Rockaway Bay. It is operated by Trinidad National Petroleum and has a mooring buoy for tankers mooring stern to the shore with floating hoses.

SHIPMASTER'S REPORT: 1979 (Updated 1996).
Pilotage: Compulsory. Pilot boards 0.5 miles off the quay and requires two hours notice of vessel's arrival.
Restrictions: Vessel is able to enter or leave at any stage of the tide day or night.
Max. Size: M.V. "Oriana". LOA – 804 ft., draft 30 ft.
VHF: Channel 16.
Tugs: Not available. Vessels able to dock and undock without the aid of tugs.
Berthing: One berth only available with wooden fenders. A heavy swell may be experienced whilst alongside berth as it is very exposed. Loading rate for bananas is 16 t.p.h. per gang. There is ample mechanised equipment for loading palletised cargoes. There is also storage space for breakbulk and palletised cargoes. The quality of the labour was good. Containers can be handled ex- ship's gear at about 10 units per hour. Accommodation ladder required.
Services Available: Fresh water, fresh provisions, airport, hospital and doctor (no fuel, repair facilities or other services available).

SHIPMASTER'S REPORT: November 1989.
Chart: BA. Charts No. 728 and 697.
Berth: Woodbridge Bay/Fond Cole.
Location: Lat. 15° 18.6' N., Long. 61° 23.95' W.
Documents:
1 copy Dominica General Declaration (hand to pilot).
3 copies Crew List.
2 copies Crew Manifest.
1 copy Ship's Bonded Stores List.
1 copy Unmanifested Cargo.
2 copies Customs Boarding Form.

The Agent and a Customs Officer board on arrival. The bond was not sealed.

Clearance on departure is given by Shell.
Pilotage: Pilotage is not compulsory but it is usual to take a Pilot inwards. Pilot not normally taken outward. Pilot is arranged by the Agent and the first contact made was through the Coast Guard Radio Station on VHF Channels 16 and 6.

The Pilot boards from the blue hulled launch with "Pilot" on the side in white letters or from a fast semi-inflatable owned by the Coast Guard. The Pilot boards just South of the General Cargo Wharf.

It is possible to sail at night without a Pilot.
Approaches: The berth at Woodbridge Bay is 8 cables North of the town of Roseau.

From the South, pass abeam of the town and make for the General Cargo Wharf.

When approaching from the North, the berth is about 1.5 miles South of the silo, which is conspicuous and is 2 miles South of the airfield.

The Island of Dominica is very conspicuous by its mountains.
Anchorage: The best anchorage can be found N.W. of the town in a depth of 60 fathoms with the General Cargo Wharf bearing 030° at a distance of 0.6 miles. Occasionally, there is a swell at the anchorage, but it is generally sheltered. When approaching the anchorage keep a careful lookout for fishermen's pots.
Berthing: The Shell Berth is 100 m. North of the General Cargo Wharf. The vessel approaches from the South West, passing very close to the wharf, before turning to port and mooring to one head buoy with 2 lines through the centre fairlead and one line from each quarter to bollards on the shore. The port quarter bollard is painted silver and the starboard quarter bollard is painted yellow. When in the correctly moored position the vessel is 70 m. from the shore line. The distance from the stern to the bollards, when in the moored position, is approximately 120 m., so 2 lines will have to be joined together for each quarter rope. Also when in the moored position the vessel must be close to the head buoy, otherwise there will be very little water under the stern. Our vessel went astern a few metres when moored and only had 0.5 m. under the rudder. The nature of the bottom is soft shingle.

The mooring/hose boat is in constant attendance and runs personnel ashore from the stern when required.
Cargo Operations: The connection on the shore can be seen between black and yellow railings beside the main road. The ship's floating hose of approximately 100 m. length is run to the shore and connected with a quick release coupling.

A Surveyor attends at the commencement and completion of operations and accepts the ship's figures. The shore facility provides the vessel with a Motorola radio.

On previous occasions the pumping rate to the shore was 160 bbls. per hour with a back pressure of 13 Bar. On this visit the shore tanks were nearly empty and we discharged an LPG mix at 300 bbls. per hour. The total storage capacity ashore is 100 tonnes (2 cylinders of 50 tonnes each). The hoses can be rigged on either side of the vessel. We rigged our hoses on the starboard side. Night pumping is not permitted at the berth. On completion, the usual vapour plug is required.
General: Fresh water is available from the General Cargo Wharf, which also handles cruise vessels.

A catamaran ferry also uses the wharf and provides a service to Martinique and Guadeloupe.

The islanders are very pleasant people and there is very little crime.

The island airport is situated at the South end of Rockaway Bay, in position Lat. 15° 20' N., Long. 61° 19.3' W., and is served by LIAT with an Islander sized aircraft. An international airport is planned.

AUTHORITY: Dominica Port Authority, Woodbridge Bay, P.O. Box 243, Fond Cole, Commonwealth of Dominica. *Tel:* (809-44) 84431/2/3. *FAX:* (809-44) 86131. *Cables:* Domport. *Contact:* M.A. Green, Office Manager (Home Tel. (809-44) 84500).

Dominican Republic

GENERAL (See Plan)

DOCUMENTS:

As per Dominican law, vessels calling at Dominican ports require a complete Dominican consular despatch from each loading port, as well as from the last foreign port of call. In theory, these documents should be at the discharging port before the arrival of the vessel, as they are required for inbound Customs Clearance. In practice, this is not the case, and it does not present any problem for the vessel if the consularised documents are not received prior to the ship's arrival. If there is no Dominican Consulate at the loading port, the Agent should give a certificate to this effect, and the Agent in the Dominican Republic will attend to all the local formalities. The consular fees charged by the Dominican Consulates are sometimes quite steep and will depend on the quantity and value of the cargo loaded. Contact Agent if you have any questions.

The following are the papers required for the Port Authorities which the Master should have ready on arrival for Inward Clearance:

Port Doctor:
1 copy Derat Certificate.
1 copy Crew Vaccination List.
1 copy Health Declaration.
1 copy Crew List.
1 copy Landing/Transit Passenger List.

Harbour Master/Port Authority:
Port clearance from last port of call.
4 copies Crew List.
4 copies Landing/Transit Passenger List.
4 copies Negative Passenger List (if none landing).
4 copies Arms List.
6 copies Cargo Manifest.
5 copies Bills of Lading.
2 copies Stowage Plan.

Customs:
2 copies Crew List.
2 copies Arms List.
2 copies Landing/Transit Passenger List.
2 copies Negative Passenger List (if none landing).
2 copies Stores List.
2 copies Crew Personal Effects List.
4 copies Cargo Manifest.

Immigration:
2 copies Crew List.
2 copies Landing/Transit Passenger List.

Police:
1 copy Crew List.
1 copy Landing/Transit Passenger List.

Department of Agriculture:
1 copy Stores List.
2 copies Crew Personal Effects List.
2 copies Cargo Manifest.

Agency:
1 copy Crew List.
1 copy Landing/Transit Passenger List.
4 copies Manifest (if not couriered or faxed).
2 copies each B/L (if not couriered or faxed).
1 copy Crew Personal Effects List.
2 copies Stowage Plan.
Additional required for distribution by the agent:
10 Crew Lists.
10 Landing/Transit Passenger Lists.
5 Negative Passenger Lists (if none landing).
5 Arms Lists.
3 Stores Lists.
9 tallybooks.
4 copies Cargo Manifest (if not previously airmailed).
2 copies B/L (if not previously airmailed).

Boarding Party: The boarding party that meets the vessel once alongside is usually quite numerous and includes two or three armed Dominican Navy men. Once Free Pratique and Customs Clearance are granted, one or two uniformed Customs guards are posted onboard near the vessel's gangway, and they are rotated until the vessel sails. They are responsible for making sure nothing that is not authorised comes off or goes on board. Usually these Customs guards eat their meals onboard the vessel.

HOLIDAYS: New Year's Day (January 1st); Epiphany (January 6th); Our Lady of High Grace (January 21st); Duarte's Day (January 26th); Independence Day (February 27th); Good Friday (Variable); Labour Day (May 1st); Corpus Christi (Variable); Restoration of Independence (August 16th); Our Lady of Mercy (September 24th); Christmas Day (December 25th).

Note: Holidays falling on a Sunday are not observed on the following Monday as in other countries. Saturday is officially half a working day, unless an official holiday falls on a Saturday, in which case Saturday is observed as a full holiday. Although December 24th, December 31st and the Thursday before Good Friday are not legal holidays, there are frequent Government decrees declaring these days as non-working days, and offices are usually closed at least in the afternoons.

Usually, however, stevedores will work until 1800 hrs. on these days.

Overtime on holidays is 100% over straight time rates, whereas overtime after regular working hours on normal days is 50% over straight time.

CURRENCY: The Dominican Peso (RD$) is the legal currency of the Dominican Republic. The Central Bank of the Dominican Republic issues and controls the currency, and establishes the rate of convertibility of the Dominican Peso against the major foreign currencies. The Central Bank frequently uses multiple exchange rates for different commercial transactions, generally giving the most favourable rate to the tourist industry. The rate of exchange for foreign vessel expenses in Dominican ports is also set by the Central Bank.

Because of these controls, Shipowners' requests for deliveries of cash to Master in United States Dollars should be consulted with the Agency on a case-by-case basis, as it is not always possible to arrange for such deliveries when the amounts requested are very large. Cash to Master in local currency is not limited, however. Crew members should only exchange currency at official bank outlets, as dealings on the black market are punishable by law.

BILLS OF LADING: According to Dominican Republic law, all cargo is discharged from a vessel into the custody of Customs. Original Bills of Lading (or in lieu thereof an adequate bank guarantee) are required by Customs from the consignee before the cargo may be removed from the Customs controlled port areas. Hence, neither the Master nor the Agent may demand presentation of the Original Bills of Lading prior to discharging, as the ultimate destination of the Original Bills of Lading is the Dominican Customs office. As this is frequently a source of confusion, it is of great importance to clear up this matter prior to the vessel's arrival, in order to avoid costly delays and/or disputes.

PILOTAGE: Pilotage is compulsory in all Dominican ports. Pilots are ordered for the vessel from the respective Harbour Master's office based on the vessel's ETA at the pilot station. Refer to each port for more specific information on the matter.

TOWAGE: Towage is compulsory for all vessels in those ports where tugs are available. Vessels will be billed for towage according to the tariff, even if tugs are not required or used. In many Dominican ports, the tugs available are not very powerful, and sometimes, due to breakdowns, may not be available. Refer to the information on the specific port in question and for the most updated information, contact Agent.

SHIFTING: Vessels are sometimes forced to shift to another berth within the port or to anchorage, giving preference to other vessels. With a few exceptions, the costs for these shiftings are paid by the vessel given preference.

HARBOUR DUES: Most Dominican ports are subject to basically the same charges, with the notable exception of Cabo Rojo and Punta Palenque, which are exempt from harbour fees. The vessel and Agents are always responsible for payment to the Port Authority and adequate arrangements should be made to avoid misunderstandings.

STEVEDORES: Basically all ships are discharged by ship's gear. In all Dominican ports, stevedore gangs are hired from the Union Hall (Sindicato de Estibadores) and the first gang consists of 13 men plus 4 additionals (time keeper, water carrier, foreman, tally man). The second and subsequent gangs consist of 13 men plus 2 additionals (foreman, tally man).

There has never been any shortage of gangs in Dominican ports.

The "Sindicato de Estibadores" is not covered by liability insurance, and stevedore damage claims are all but impossible to collect. Owners, Charterers and Operators should cover this potential liability through P&I Club.

The stevedores' wages depend on the type of commodity and work method. Some cargoes are paid for with hourly wages and others on a per metric ton basis. Social security, Christmas fund and accident insurance is also included. Overtime compensation depends also on commodity and work method. Contact Agent for rates and further details.

INSPECTIONS: *Phytosanitary Inspections:* Cargoes consisting of agricultural commodities such as grain and grain products, forest products, etc., are subject to strict phytosanitary inspections by the local agricultural authorities, often resulting in the requirement to have the cargo fumigated in the holds prior to discharging. One step, recommended in order to try to avoid this problem, is to have available copies of the phytosanitary inspection and/or fumigation certificates, if any, on hand at the time the cargo is inspected. These can be sent by telefax to Agent if not available on board the vessel.

STOWAWAYS: One of the greatest problems that has intensified greatly in recent times in all Dominican ports is the growing number of people stowing away on cargo vessels thought to be sailing to Puerto Rico or the United States. Although Agents try in every way to induce the Harbour Master's office and the Port Authority to tighten security measures, there has been little improvement in the situation. A search is conducted by a party of Dominican Navy officers and enlisted men, prior to sailing which may sometimes take several hours, yet after the vessel has sailed sometimes large numbers of stowaways are discovered onboard. Warning is hereby given to all Masters to take the appropriate security measures onboard to avoid this costly problem.

SPARES: Spares may be shipped in transit to the vessel and are thereby exempted from heavy Customs duties levied on imports into the Dominican Republic. Clearance for "Spares-in-Transit" can usually be arranged within 24 – 48 working hours after arrival, if previously notified. Airway Bill and the shipping documents should be consigned c/o Agent and clearly labelled "Ships Spares in Transit". Please contact Agent for any further information including preferable routing, etc.

CREW REPATRIATION/JOINING: Agent can arrange for arriving/departing crew members of most nationalities to join the vessel without a Dominican Republic visa, given proper pre-advice and all the information about the crew members. If the vessel is not in port when the crew member arrives, however, an Immigration officer must be in attendance, increasing the expenses. For specific information regarding distances from the airports to the different ports and other details, please refer to the individual ports or contact Agent.

OPENING/CLOSING HATCHES: The crew is allowed by local regulations to open and close the hatchcovers, and it is customary for the crew to do so.

TIME: GMT minus 4 hours all year round.

SPARES: Same can be withdrawn same day of arrival via air express. No Customs duties assessed as brought under Customs custody on board vessel. Airwaybill should be addressed to Agent, with clear indication that it covers spares for such and such a vessel.
SECURITY: Stevedores board vessel with special passes issued for vessel in question. Any other visitors must obtain pass from Harbour Master's Office. Nevertheless it is definitely recommended that all cabins be kept locked. This also applies to hatches that are not being worked.
POLLUTION: No garbage, refuse, etc., can be thrown overboard. Vessels liable to heavy fines for oil pollution, etc.
PLAGUE CONTROL: All lines leading to shore must be protected by ratguards. Non-compliance subject to Customs fines.
AGENCY: Maritima Dominicana, S.A., P.O.Box 1301, Carretera Sanchez Km. 12 1/2, Santo Domingo, Dominican Republic. Tel: (809) 539-6000. Telex: ITT 3460323, 3460701 Maritim. RCA: 3264244 Mardom DR. Fax: (809) 539-7200, 539-7300. Cables: Maritima.

AZUA (Puerto Viejo): 18.30 N. 70.40 W.

See "General" before first port.

The port of Azua is also known as Puerto Viejo de Azua and is located about 15 km. S.W. of the town of Azua. It was built in the 1950's, but has rarely been used. However, recently a large, modern LPG terminal was completed.
PILOTAGE: Contact can be established with the Pilot and Harbour Master on VHF Channel 16. The Pilot will board the vessel about 0.5 miles from the seabuoy. Pilot Tel: (809) 521-3246.
ANCHORAGES: Deep water anchorage available off the port.
RESTRICTIONS: Berthing and departure strictly during daylight hours.
MAX. SIZE: LOA 500 ft., beam 80 ft. and draft 30 ft.
HEALTH: Pratique is obtained by Agent. In case of infectious illness the whole crew is put in quarantine.
TUGS: Not available.
BERTHING: There is a concrete finger pier 185 m. (600 ft.) long and 38 m. (125 ft.) wide, which has a ramp for Ro-Ro vessels on the Western side. This port is almost exclusively used by LPG tankers, hence there is no congestion.
Storage facilities: There are 2 sheds which have not been used in the recent time, and hence may require repairs. There is a new (1988-1989) LPG terminal with complete storage facilities for several thousand tons.
STEVEDORES: *Working Hours:* Straight time working hours are 0800 – 1200 hrs. and 1400 – 1800 hrs. Mondays through Fridays, and Saturdays 0800 – 1200 hrs. Except on major holidays (New Year, Easter and Christmas), overtime may be ordered around the clock and on weekends.
MEDICAL: Emergency and minor medical care available in Azua, about 15 km. from the port.

Hospitalisation and more complex cases must be treated at Santo Domingo, about 130 km. East of the port.
DENSITY: 1025.
FRESH WATER: Sometimes available by pipeline at LPG pier.
FUEL: Available by truck from Santo Domingo.
CONSULS: All consular affairs for this port are handled at Santo Domingo.
REPAIRS: Only available in Santo Domingo.
GANGWAY/DECK WATCHMEN: Required.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: Bonded stores are sealed.
REPATRIATION: Facilities available.
AIRPORT: Very inconvenient for repatriation, as Las Americas International Airport (Santo Domingo) is more than 120 km. away and more than 3 hours drive by car.
POLICE/AMBULANCE/FIRE: Tel: 175.
TELEPHONES: None available on board.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Harbour Master – Tel: (809) 521-3283.
Operator: Opuvisa. Tel: (809) 567-6510.
AGENT: See "General" before first port.

BARAHONA: 18.10 N. 71.10 W.

See "General" before first port.

The port of Barahona is mainly used as a port for loading bulk cargoes. The two main exports are sugar in bulk, which is loaded manually in bags onto the vessels where they are bled through the ship's hatches into the cargo holds, and gypsum, which is loaded mechanically by conveyor belt. Of the 4 berths in the port, only the sugar and gypsum facilities are used regularly to handle cargo; the other two are used mainly as lay-berths for vessels undergoing repairs or fishing vessels awaiting orders. The sugar mill also exports some bulk molasses from its facilities.
PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Harbour Master can be contacted by radio-telephone on 2738 kHz., as well as on VHF Channel 16. The Pilot boards approximately 1.5 miles outside the port. There is only one buoy left marking the channel (an old drum), and there are no lights.
ANCHORAGES: Deep water anchorage available just outside port entrance. Pilot will indicate best location on request.
RESTRICTIONS: No entry or departure at night. Sometimes in the late afternoon, strong winds make docking of large vessels in ballast very difficult.
MAX. SIZE: LOA 600 ft., beam 100 ft., draft 27 ft.
HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.
RADIO: When within range, Santo Domingo Radio may be contacted on VHF Channel 16.
TUGS: There is one small tug, "Tanac V", which is owned by the local sugar mill, and has a nominal 350 h.p. Towage is compulsory. Ship's lines used.
BERTHING:
Berth No. 1: This berth, consisting of the Northern side of a 12 m. (40 ft.) wide finger pier, is 216 m. (710 ft.) long and about 1.0 m. above the waterline at high tide. The berth was previously used to load sugar in bags, and in theory could still be used for this purpose because there are railroad tracks connecting it to the sugar mill. However, due to the slowdown in sugar exports, this berth is no longer used for cargo handling, and is usually occupied by small Dominican Navy vessels and fishing vessels.

Storage Facilities: None available.
Equipment: None available.
Berth No. 2: This berth, consisting of the Southern side of a 12.0 m. wide finger pier, is 137 m. (450 ft.) long and is about 1.0 m. above the waterline. It is not very frequently used, except sometimes as a lay-bye berth, and it is mostly occupied by Dominican Navy vessels and small fishing boats.

Maximum Draft: 27 ft. (salt water).
Storage Facilities: None.
Equipment: None available.
Berth No. 3: This berth is 160 m. (525 ft.) long and is about 1.0 m. above the water level at high tide. This berth is the most frequently used in Barahona, because alongside are the mechanical installations for loading gypsum in bulk.

Maximum Draft: 27 ft. (salt water).

Storage: The Salt and Gypsum Mines Co. maintains a gypsum export terminal at this pier, and they usually have about 20,000 tons of rock gypsum on site awaiting shipment.

Equipment: The system for loading gypsum in bulk consists of a large crane which feeds a hopper and conveyor belt system to load the vessel. No ship's gear is required. This equipment loads gypsum at an average rate of approximately 400 – 500 tonnes/hr.
Berth No. 4: This berth is 146 m. (479 ft.) long and about 1.5 m. above the waterline at high tide. However, this berth frequently accommodates vessels of up to 550 ft. LOA, because vessels are turned in the basin and docked with the bridge beyond the pier. This berth is used exclusively by the sugar mill for exports of sugar and blackstrap molasses.

Maximum Draft: 27 ft. (salt water).

Storage Facilities: The sugar mill has large warehouses for storing sugar in bulk and in bags and also tanks for molasses.

Equipment: Rail flatbed trucks are used to bring the sugar in bags alongside the vessel. Ship's gear is used to load the bags with slings into the vessel. These are then "bled" into the ship's holds and the empty bags returned ashore. The usual loading rate is about 15 – 20 tons per gang per hour. Pipeline and accessories available for loading blackstrap molasses in bulk.
Note: The finger pier (Berths No. 1 and 2) and the gypsum berth (No. 3) have deteriorated to the point where trucks are no longer permitted to enter, as the concrete top can no longer support their weight.
STEVEDORES: ETA's required 24 and 12 hours before arrival to arrange gangs.
Working Hours: Berths No. 1, 2 and 4: Normal working hours for stevedores are 0800 – 1200 hrs. and 1400 – 1800 hrs. Mondays through Fridays, and 0800 – 1200 hrs. on Saturdays. Some overtime may be worked according to the availability of sugar and other factors. Please contact Agent for further details.

Berth No. 3: At this installation, the shippers usually work 24 hours around the clock, on weekends and holidays (except New Year, Christmas, Easter) at their own expense.
MEDICAL: Medical attention can be arranged after vessel is cleared, preferably ashore. Minor cases are dealt with locally, more serious cases are transported to Santo Domingo.
TANKERS: Discharge at Berth No. 4.
DENSITY: Salt water inside harbour.
FRESH WATER: *Berths No. 1, 2 and 3:* There is a 3 in. pipeline at the head of the pier, but it requires a long hose, and usually there is very little pressure. The local fire department has a tank truck which can be hired in case of an emergency requirement.
Berth No. 4: There is a pipeline available alongside, but due to low pressure, a portable pump is required. Otherwise, potable water must be delivered by tank truck.
FUEL: By truck from Santo Domingo.
CONSULS: All Consuls at Santo Domingo.
REPAIRS: Minor repairs only.
GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.
OPENING/CLOSING HATCHES: Can be performed by crew or stevedores.
CUSTOMS ALLOWANCES: Bond is sealed, but can be opened at Master's request.
REPATRIATION: Can be arranged.
AIRPORT: Las Americas International Airport is approximately 150 km. from Barahona or 3.5 hours by car.
POLICE/FIRE/AMBULANCE: Police, Tel: 417; Ambulance, Tel: 441; Fire, Tel: 348 or 398.

TELEPHONES: Shore telephone alongside ship connected to Sugar Mill.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.
GENERAL: No boats to be lowered without official permission.
AUTHORITY: Harbour Master. Tel: (809) 524-2384.

AGENT: See "General" before first port.

BOCA CHICA: 18.27 N. 69.35 W.

See "General" before first port.

The port of Boca Chica is one of three ports serving the capital city of Santo Domingo, and is situated about 20 miles East of the city, but scarcely 5 miles East of the international airport. Although this port was built in the 1950's to serve the Boca Chica sugar mill, and was meant to be used to export sugar, it is now almost exclusively used for import cargoes, mainly trailers, containers and some lumber, newsprint, and homogeneous cargoes.
PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Harbour Master can be contacted by radio telephone on 2738 kHz. Contact may also be established on VHF Channel 16. Pilot will board about 1 mile outside the first seabuoy.
ANCHORAGES: Deep water anchorage available outside port. Pilot will advise best location.
RESTRICTIONS: No entry or departure at night.
MAX. SIZE: LOA 400 ft., beam 70 ft., draft 25 ft. (S.W.).
HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.
RADIO: When within range, Santo Domingo Radio can be contacted on VHF Channel 16.
TUGS: Not available locally. Small boat available to run lines.
BERTHING: L-shaped pier 615 m. (2,018 ft.) in length and 12.0 m. (39 ft.) width, about 1.0 m. above the water level at high tide. Two or more vessels may occupy the berth, depending on their size and characteristics; but not more than 400 ft. LOA.

Maximum Draft: 25 ft. (S.W.).

Storage Facilities: One enclosed shed 240 m. × 35 m. with approximately 2,200 sq.m. storage capacity for general cargo. Also container and trailer yard, and open space available for lumber, etc.

Equipment: Forklifts of 4.5 tons, 6 tons and 10 tons available on site. Motor cranes, if required, must be transported from Santo Domingo.
STEVEDORES: ETA's required 24 and 12 hours before arrival to arrange gangs.
Working Hours: Straight time working hours are 0800 – 1200 hrs. and 1400 – 1800 hrs. Mondays through Fridays, and Saturdays 0800 – 1200 hrs. Except on major holidays (New Year, Easter and Christmas), overtime may be ordered on all days, and work may be done around the clock and on weekends.
MEDICAL: Minor cases are dealt with locally, more serious cases are transported to Santo Domingo.
TANKERS: Only small propane gas tankers can be accommodated.
DENSITY: Salt water inside harbour.
FRESH WATER: Pipeline alongside has very low pressure. Potable water can also be supplied by tank truck, which is more expensive, but more dependable.
FUEL: Fuel and diesel oil are available by tank truck from Santo Domingo. Arrangements to be made in advance through the Agent. Trucks carry either 5,000 or 10,000 American gallons.
CONSULS: All Consuls at Santo Domingo.
REPAIRS: Minor repairs only. Major repair shops in Santo Domingo.
GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.
OPENING/CLOSING HATCHES: Can be performed by crew or stevedores.
CUSTOMS ALLOWANCES: Bond is sealed, but can be opened at Master's request.
REPATRIATION: Can be arranged.
AIRPORT: Las Americas International, the major airport in the Dominican Republic, is about 5 miles away and may be conveniently used for repatriation and crew joining a vessel at Boca Chica.
POLICE/FIRE/AMBULANCE: At Santo Domingo.
TELEPHONES: No connection to vessels.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.
AUTHORITY: Harbour Master. Tel: (809) 523-4262.
Port Manager. Tel: (809) 523-4669.

AGENT: See "General" before first port.

CABO ROJO: 17.55 N. 71.39 W.

See "General" before first port.

The port of Cabo Rojo is a one berth private installation, built by the Alcoa Exploration Co. for its bauxite and limestone mining operations near the Haitian border in the S.W. corner of the Dominican Republic. This mining operation is now controlled by another company, Ideal Dominicana S.A., and the port facilities are still used for the shipments of limestone and bauxite.
PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Harbour Master can be contacted by radio telephone on 2738 kHz. Contact may also be established on VHF Channel 16. The Pilot boards about 2 miles off the port. Accurate ETA is important, as Pilot must come from Barahona (about 2 hours away by car).
ANCHORAGES: Deep water anchorage available immediately outside port. Pilot will advise best location.
RESTRICTIONS: Entry and departure permitted daylight only.
MAX. SIZE: LOA 700 ft., beam 120 ft. and draft 36 ft.
HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.
RADIO: When within range, Santo Domingo Radio can be contacted on VHF Channel 16.
TUGS: No tugs available.
BERTHING: *Ideal Dominicana:* This berth is about 100 m. long and the apron is about 8.0 m. wide. There are 2 mooring dolphins, which allow vessels of up to 700 ft. LOA to dock safely alongside. A mechanical conveyor belt and spout system is used for loading limestone and bauxite into the vessel's cargo holds, one at a time. This equipment is in a fixed position and can only shift sufficiently to trim the holds. Hence, the vessel must be warped with her own lines to position each hold to be loaded. On arrival, the vessel's No. 2 hatch coaming must be no more than 36 ft. above the waterline, in order to be able to commence loading.

Storage Facilities: The shippers keep several tens of thousands of tonnes of bauxite and limestone in storage at the loading facilities, in order to expedite the loading of vessels. Ideal Dominicana has other storage facilities for their occasional import cargoes.

Equipment: Ideal Dominicana has all the shore equipment necessary for loading gearless vessels with limestone and/or bauxite in bulk at a rate of about 15,000 tons/day. Exact loading rate will depend on vessel's size, configuration, cargo to be loaded, etc.

Working Hours: The shippers load cargo 24 hours around the clock, including Saturday, Sundays and holidays. Accurate updates of ETA are important at this berth, in order to arrange for the required loading personnel, particularly when arriving on a weekend or holiday.
MEDICAL: Minor cases are dealt with locally, more serious cases are transported to Santo Domingo.
TANKERS: One tanker at a time could be accommodated.
DENSITY: Salt water inside harbour.
FRESH WATER: Only in case of emergency, fresh water can sometimes be arranged for locally. Please consult Agent.
FUEL: Not available.
CONSULS: All Consuls at Santo Domingo.
REPAIRS: Not possible.
GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.
OPENING/CLOSING HATCHES: Performed by crew.
CUSTOMS ALLOWANCES: Bond is sealed, but can be opened at Master's request.
REPATRIATION: See "Airport".
AIRPORT: Las Americas International is a very long and difficult drive (360 km.) from Cabo Rojo. For crews to join or be repatriated is very inconvenient and expensive, therefore not recommended, but feasible in case of emergency.
POLICE/FIRE/AMBULANCE: Contact Port Authority.
TELEPHONES: Telephone on dock connected to Alcoa office.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.
GENERAL: This port is exempt from most harbour fees and dues, because it is privately operated. Hence, port expenses are very low. Please contact Agent for further details.
AUTHORITY: *Operator:* Ideal Dominicana S.A.

AGENT: See "General" before first port.

LA ROMANA: 18.27 N. 69.01 W. (See Plan)

See "General" before first port.

The port of La Romana is situated on the Romana River and is primarily a sugar and molasses (also furfural) loading port for the Central Romana sugar mill. It is also used for handling various import cargoes (fuel, lumber, steel and general cargo) for the sugar mill, and more recently some containers are handled in and out for the industrial free zone manufacturers established in La Romana.
PILOTAGE: Compulsory. Ordered by Agents on receipt of vessel's ETA, 72, 48 and 24 hours before arrival. Pilot and Harbour Master can be contacted on 2638 kHz and 2738 kHz. Contact may also be established on VHF Channel 16. Pilot will board vessel from white launch marked "LP-24" on its sides. Pilot boards about 1.5 miles from port entrance (N.E. of Catalina Island). Pilots: Tel. (809) 550-1494.
ANCHORAGES: Best anchorage is West of Catalina Island in depths of 15 to 18 fathoms. There is no protected anchorage immediately outside the port. Authorisation to anchor must be applied for to the Harbour Master through the Agent.
RESTRICTIONS: No entry or sailing in hours of darkness.
MAX. SIZE: LOA 600 ft., beam 90 ft., draft 28 ft. on sailing, but only 26 ft. for arrival.

Maximum draft is strictly enforced by Pilot and other authorities, as a greater draft is dangerous because of obstructions at the entrance channel.

HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.
RADIO: Santo Domingo Radio, HIX2, frequency 2738 kHz. Near the port, use Centromana Radio on same frequency.
TUGS: One tug of 620 h.p. available and compulsory. Extra charge for use of tugs line.
BERTHING: The pier is 220 m. (720 ft.) long and the apron is approximately 20 m. (65 ft.) wide; the wharf is about 2.5 m. above the water line.
Storage Facilities: The only storage facilities at this port are those of the Central Romana sugar mill, which has warehouses for bulk sugar, and tanks for molasses and furfural.
Cargo Handling Equipment: Sugar is loaded mechanically by conveyor belts directly from the warehouse to the ship using 3 spouts. Average loading rate 400 – 500 tons/hr., depending on vessel size and configuration. There are no forklifts available for general cargo. Small motor cranes may be hired for handling general cargo, which must be loaded directly onto railroad flat cars and be removed from ship's side.
STEVEDORES: *Working Hours:* General cargo is worked on straight time 0800 – 1200 hrs. and 1400 – 1800 hrs. Mondays through Fridays, and 0800 – 1200 hrs. on Saturdays. Overtime rates for all other times and holidays may be ordered, except major holidays (New Year, Easter, Christmas, etc.).

Sugar is always loaded around the clock and on holidays, as well as with the liquid bulk operations, the shippers usually paying any additional expenses for overtime.
MEDICAL: Doctors and hospital facilities available.
TANKERS: See "Berthing".

2×10 in. connections for discharge of fuel and diesel oil.
DENSITY: 1025.
FRESH WATER: Available from 2 in. pipeline on pier at 8 t.p.h. – 10 t.p.h.
FUEL: Fuel and diesel are available by truck only, and in limited quantities, due to the logistics of delivering from the Refinery in Haina in trucks of either 5,000 or 10,000 gallons. Delivery is also subject to permission from the Central Romana. Contact Agent for further information.
CONSULS: All consuls in Santo Domingo.
REPAIRS: Only minor repairs can be effected.
WATCHMEN: To be provided by vessel. Compulsory gangway watch kept by Customs Guards.
OPENING/CLOSING HATCHES: Generally by ship's crew.
CUSTOMS ALLOWANCES: Seamen may take ashore only 2 packets of cigarettes and no alcohol.
REPATRIATION: Arranged via Santo Domingo.
AIRPORT: La Romana has a small airport, but the only commercial flights are to San Juan, Puerto Rico, from where connections to all the world; however, more frequent flights from Las Americas International Airport, which is only about 45 miles away or about an hour by car.
POLICE/FIRE/AMBULANCE: Police, 235; Ambulance, 455; Fire, 455.
TELEPHONES: In dock office, ask Sugar Mill for number required.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes issued by Immigration Officer.

SHIPMASTER'S REPORT: March 1989.
Chart: BA. Chart No. 467 – Bayajibe to Haina and La Romana – Plan.
Sailing Directions: No. 70. West Indies Pilot, Volume 1, page 120.
Approaches: No difficulties. La Romana is easily identified by large quantities of black and white smoke issuing from the Central Romana Corporation plant close to the West of the dock.

No berthing or unberthing is attempted at night and no response is received to calls on the VHF until about 0630 hrs. As Santo Domingo, Haina and La Romana start at that time and all use Channel 16 exclusively, it is a little noisy for a while.

Agent and Pilot were contacted on VHF Channel 16 and instructions given.
Berthing: Pilot boarded less than 1 mile off from a 15 ft. boat with a small outboard. Ship is best stopped altogether.

As a shoal patch extends Eastwards from the West side of Rio Romana there is a dog-leg in the short channel immediately before the entrance, and as the port is little more than a 100 m. wide slot in the coast, there is no room for mistakes or uncertain engine starts.

Ship is swung to starboard as the entrance is passed and then the starboard anchor is let go and held at 1 shackle just off the berth. Judged correctly, vessel can be stopped just off the berth and pushed alongside by the tug.

On departure, the tug is made fast on a bridle aft and the ship is towed out stern-first, using engines for steering.

There is deep water within 2 cables of the shore so ship can be swung very soon after leaving the channel.

Two buoys mark the channel, both are still to be changed to the IALA system.
Berth: (See "Plan"). Wharf is solid and well fendered. Length of wharf is 720 ft., with 3 sugar loading arms at the North end and several liquid cargo loading points set into the dock for molasses (blackstrap and edible) and furfural. Wharf is kept tidy and clean.
Loading: 4,200 tonnes of furfural loaded in 19 hours (221 tonnes/hr.) through a 6 in. hose. Hose was connected to a 4 in. line on dock so this was a respectable rate.

On completion of loading, shore labour disconnected the hose after a sloppy line blow. They did not bother putting a blank on the hose so furfural was spilled all over the deck; after which they tossed the hose over the side where it drained down the ship's side and into the dock.
Port/Berth Information:
Density: Salt water.
Distance from Pilot to berth: 1 mile.
Bridges: None.
Controlling depth in approaches: 33 ft.
Max. draft in approaches and alongside: 28 ft.
Max. LOA: Vessels with greater length than this vessel (LOA 170 m.) would have difficulty entering.
Fresh water: Available.
Fuel: Not available.
Tugs: One tug available and should be used.
Anchorage: None.
Loading/discharge hoses: 1 × 6 in. furfural.
1× 10 in. molasses.
Other points available.
Slop facilities: None.
Repair facilities: None.
Officials: Cabins searched on arrival and before departure. Berth was well guarded, so ship was free of unwelcome visitors.
Agent/Berth Operator: Central Romana Corporation. Office on the wharf. Helpful and efficient. Telephone communication with outside world easy and quick.
General: Many tourists in evidence. Passenger ships moored further upriver and charter boats entering and leaving throughout the day.

AUTHORITY: Harbour Master. Tel: (809) 556-3285.
Operator: Central Romana Corp. Tel: (809) 556-4534.
AGENT: See "General" before first port.

MANZANILLO: 19.43 N. 71.45 W.

See "General" before first port.

Manzanillo was built by an American banana exporting company in the 1950's, but was abandoned many years ago. The pier has undergone extensive repairs, completed 1994. This port has about 5 sailings per month for export of fresh fruit, mainly bananas.
APPROACHES: Coast Guard Service recommend that a ship, entering Manzanillo Bay from the East, should stay well out until it has rounded shoals surrounding Seven Brothers Islands. At approximately Lat. 19° 58′ N. a course of 127° will bring it into the bay near the wharf. A ship arriving from the West should stay about 6 miles off Cape Haitian Light. When abreast the light a course of 111° will lead into the Bay a short distance North of the pier.
PILOTAGE: Compulsory. Pilot boards incoming vessels about 1 mile from the dock. Pilot and Harbour Master's office can be contacted on radiotelephone 2638 kHz and 2738 kHz as well as on VHF Channel 16. The Pilot must come from Puerto Plata, about 2 hours drive away, hence adequate advance notice is required.
ANCHORAGES: Vessels that cannot be docked on arrival will find safe anchorage to the East of the dock where there is plenty of swinging room, in about 20 fathoms of water, with good holding ground of mud and sand.
RESTRICTIONS: Entry and departure during daylight only.
MAX. SIZE: LOA 700 ft., beam 120 m. and draft 35 ft.
RADIO: Radio Station HIL31.

Vessels bound for Manzanillo, should radio their ETA to Santo Domingo Pilot Station and Agent daily, from 0600 hrs. to 1800 hrs.

Vessels having single sideband equipment may also contact Radio Instituto Agriario Dominicano at Manzanillo, at wavelength 2670 and 2638 kHz from 0700 to 1200 hrs. and 1400 to 1700 hrs. EST.
TUGS: No tugs available.
BERTHING: Prevailing winds are Easterly and sometimes interfere with docking or undocking. On the East side vessels should dock bow in, since there is not enough room to swing vessels safely around for a port docking.

On the West side vessels can dock either side to the pier, depending on the direction and force of the wind.

In general, banana vessels will be docked on West side of the pier and cargo vessels on the East side. Pier has a concrete deck 750 ft. long, 88 ft. wide. Both sides of the pier are protected with a pine fender system. The water depth at land end of pier is 18 ft. and at the seaward end 38 ft.
Storage Facilities: The banana company has its own facilities for packing and storing fruit ready for shipment.
Equipment: Conveyor belt loaders for loading bananas. No other equipment available.
STEVEDORES: *Working Hours:* Straight time working hours are 0800 – 1200 hrs. and 1400 – 1800 hrs. Mondays through Fridays, and 0800 – 1200 hrs. on Saturdays. Overtime may be worked at overtime rates at night, on weekends and on most holidays.
MEDICAL: Emergency first aid only. The town of Montecristi is 30 km. away, where further medical attention is available und full hospitalisation in Santiago, approximately 100 km. away.
DENSITY: 1025.
FRESH WATER: Sometimes available by pipeline in limited quantities and at varying pressures. Contact Agent.
FUEL: Available by tank truck from Santo Domingo. Contact Agent for further details.
CONSULS: At Santo Domingo.
REPAIRS: No facilities.
GANGWAY/DECK WATCHMEN: Carried out by crew.
OPENING/CLOSING HATCHES: Crew or stevedores.
CUSTOMS ALLOWANCES: Each crew member will be allowed to take ashore one only opened package of cigarettes.

REPATRIATION: Facilities available.
AIRPORT: La Union International Airport is about 130 km. away, near Puerto Plata, with regularly scheduled flights to Puerto Rico and the United States.
SHORE LEAVE: Members of crew are allowed to go ashore at this port, but Masters should caution them not to take on their persons any dutiable articles, as the Customs will search such men upon landing and should any such articles be found on their persons, this will be treated as an attempt to smuggle; severely punishable offence.
CREW IDENTIFICATION CARDS: Required.
AUTHORITY: Harbour Master. Tel: (809) 579-9410. Port Manager. Tel: (809) 579-9615.

AGENT: See "General" before first port.

PALENQUE: 18.12 N. 70.11 W.

SHIPMASTER'S REPORT (1976). Updated 1988.

The vessel called at Punta Palenque to discharge a cargo of feedstock from Venezuela. SBM is located in position 18° 12.2' N., 70° 11.3' W. and operated by Refineria Dominicana de Petroleo, S.A.

DOCUMENTS:
- 7 Crew Lists.
- 2 Stores Lists.
- 1 Crew Effects List.
- 2 Passenger Lists.
- 2 Lists of Arms & Ammunition.
- 2 Lists of Narcotics.
- 1 Health Declaration.
- Clearance last Port.

PILOTAGE: Pilotage is compulsory. Mooring and unmooring 24 hours a day. Pilot boards about 1 mile Southwest of SBM.

Pilot boat, a small tug with black hull and white superstructure, is equipped with VHF Channels 16 & 14, call sign Punta Palenque Pilot. Pilot moors the vessel with the assistance of the Loading Master who gives directions on the focs'le. The tug delivers the mooring gear consisting of 2 nylon tails put on vessel's bits and shackles. The nylon tail will be shackled to SBM mooring lines. These mooring lines consist of about 100 ft. nylon rope and 10 ft. chain. The chain is heaved inboards by means of 1 wire and 1 nylon or polyprop messenger and connected to nylon tails on vessel's bits.
MAX. SIZE: Vessels up to 260 m. in length with max. draft of 14.6 m. A circle of 2,000 ft. around the buoy with a min. depth of 50 ft.
HEALTH: Radio Pratique not available.
RADIO: Crude predominantly supplied from Pemex (Pajaritos,Mexico) and Maraven (Cardon/Miranda,Venezuela). Masters to send ETA Punta Palenque before sailing from loading ports, handing the message to local agents.

Messages should include draft on arrival, number of crew, whether any sickness on board. Messages to be sent to Refidomsa, Santo Domingo and copy to Agent (B & R, S.A., see "General" – "Agency").
TUGS: Not available for mooring. Messengers to and from SBM are handled by a small work boat.
BERTHING: Single Buoy Mooring, property of Refineria Dominicana S.A. (Telegraphic Address: Refidomsa), located about 2,500 m. offshore, or 2.5 miles S.W. of Punta Palenque light. Nature of bottom: sand over coral. Buoy fitted with Radar Reflector and flashing red light.

Loading Master plus 3 men remain on board.

Connection amidships, port side.

LOADING: Shore Line System: From shore to ship:
- 1×28 in. line from tank farm to shore 750 m.
- 1×28 in. submarine line 2,550 m.
- 2×16 in. underwater hose systems from seabed to buoy.
- 2×16 in. floating hoses, about 165 m. long.
- 2×12 in. hoses to ship's manifold 27.5 m. long.
- Maximum rate of discharge: 4,800 cu.m./hr.
- Maximum back pressure: 150 p.s.i.
- Product: Crude oil discharge.
- Storage: 525,000 barrels.

REPAIRS: None available.
GENERAL: No navigational hazards approaching Punta Palenque from the South. SBM shows on radar at a distance of about 11 miles.
Reference: B.A. charts 3689, 471; West Indies Pilot Volume 1, Supplement No. 3 1975.
Weather: Wind: N.E. Trades
Current: Predominating from East to West but sometimes shifting to opposite direction for short periods. Velocity about 1.5 knots.
Services: Fresh water, provisions, fuel oil and diesel oil not available. No medical assistance. Shore leave not permitted, repatriation not possible.
Master's Remarks: When approaching from the South, the coast of Dominican Republic gives a good radar target. SBM could be picked up at about 11 miles distance. Punta Palenque Pilot could be contacted at a distance of 30 miles.
Authorities: After vessel is moored Pilot acts as Agent together with a senior Custom Officer who came on board with the Pilot. Two junior Custom Officers will stay on board during the stay in port, also Loading Master and/or his assistant. Pilot delivers Outward Clearance.

SHIPMASTER'S REPORT: (1977). Updated 1988.

DOCUMENTS: Last Port Clearance.
- 8 Crew Lists.
- 6 Passenger Lists (nil).
- 3 Stores Lists.
- 5 Firearms Declarations.
- 1 Vaccination List.

To be legitimised by Dominican Consulate if possible, otherwise notarised by the Chamber of Commerce at sailing port or pay local requirements fee.
PILOTAGE: Pilotage compulsory. Pilot boards 1 mile S.W. of S.B.M. which is the waiting area. ETA required by Pilot at least 6 hours before arrival. The vessel cannot under any circumstances dock without the Pilot as the Loading Master is stationed on the forecastle head and advises Pilot of helm and engine requirements when approaching S.B.M.
ANCHORAGES: Temporary anchorage on the coastal bank to the West of S.B.M. to suit vessel's draft.
RESTRICTIONS: A vessel may enter and leave the port during hours of darkness and at any stage of the tide.
MAX. SIZE: Max. length 854 ft. Max. draft 48 ft.
TUGS: No tug assistance required. Mooring launch attends on arrival and departure bringing to and removing from the vessel all the gear required for mooring (Snotters, Strops, etc.). At night the launch also illuminates the hose string.
RADAR: The radar reflector on the S.B.M. is excellent and gives out a good echo at 10 miles.
BERTHING: Position of S.B.M. 18° 12' N., 70° 11.4' W.
Terminal Operator: Refineria Dominicana De Petroleo S.A. (Refidom SA).

At the time of berthing depth of water under the keel by echo sounder was 45 ft., the nature of the bottom at the berth was sand and coral.

As stated above the vessel is able to dock and un-dock at any stage of the tide day or night.

When 1 mile from the S.B.M. (waiting area) vessel approaches the buoy on a N.E. heading parallel to the hose strings and then turns the vessel to stem the current flow.
Moorings: Plaited ropes with cable chafing lengths shackled between the two plaited ropes. Snotters to the bitts from the central Panama lead.

The port derrick to be rigged in advance to accept mooring gear from the tug and lift hoses (2×12 in. string).
Hoses: S.B.M. hoses connected to the ship's manifold (2×12 in.). Distance from the S.B.M. to the shore tanks is 1.5 miles. Shore booster pump not available, steam jacket or similar facilities not available. Max. pressure on line 125 p.s.i., max. weight to be lifted 5 tons.
Product Handled: Crude Oil. Ship's accommodation ladder not required.
DENSITY: 1025.
SERVICES: None of the following are available; fresh water, provisions, repairs, airport, fuel oil, doctor, hospital, laundry.

All cargo handling surveyed by independent inspector nominated by Refidomsa. Slop discharge possible upon request and after agreement. Under no condition is pure water to be discharged via the hoses.
TIME: Pilot advises time is GMT minus 4 hours (throughout the year).
SHORE LEAVE: Not possible.
GENERAL: Vessel's ETA by telex to be given to Santo Domingo from the last port of call, any changes should be passed to the Agent through 'Curacao Radio' as at no time whilst on passage from Punta Cardon could traffic be passed through 'Santo Domingo Radio'. The Pilot acts for Agent. Customs and Immigration are in attendance, leaving with papers, cables and telex, consignees documents etc., after the vessel is all fast. The ship's official documents were not examined. 2 Customs guards and the Loading Master remain on board and should be provided with cabins and meals.

Cargo surveying is carried out by an independent surveyor, he also maintains VHF contact with the Agent in Santo Domingo through the refinery.

The Loading Master, Berthing Master and Sailing Pilot all speak English. VHF contact made with the refinery when 45 miles from the S.B.M. who then passed our amended ETA to the Pilot.
AUTHORITY: Refineria Dominicana de Petroleo, S.A., Apartado 1439, Santo Domingo, Republica Dominicana. *Tel:* (809) 542-2700. *Telex:* 3460342 (ITT), 3264320 (RCA). *Cables:* Refidom. *Contact:* Ronald Storrer, Superintendent.

AGENT'S REPORT: May 1996.

Palenque or Punta Palenque is a Single Buoy Mooring facility, located at Lat. 18° 12.2' N., Long. 70° 11.3' W., and is operated by the Refineria Dominicana de Petroleo. They receive reconstituted crude oil, mostly from Venezuela and Mexico, at this facaility, and it is pumped by pipeline to the Refinery in Haina (Itabo). This facility is about 2.5 miles off Punta Palenque, and a small tug is used for transportation to/from shore.
PILOTAGE: Pilotage is compulsory and can be arranged 24 hours a day. Pilot boards about 1 mile S.W. of SBM from a small tug with black hull and white superstructure. Pilot can be contacted on VHF Channel 16 and 14.
RESTRICTIONS: None, except in the case of extreme weather conditions.
MAX. SIZE: LOA 1,000 ft., draft 45 ft.
VHF: See "Pilotage".
TUGS: Available and compulsory. Also a small tug carries crew and gear required, etc.
MEDICAL: Not available, except for extreme emergencies, which must be taken to Santo Domingo.
CONSULS: All consular affairs must be handled at Santo Domingo.
REPAIRS: Not available.
AIRPORT: Las Americas International Airport is about 100 km. away, and has frequent flights to the United States, Europe, Caribbean and South America.
GENERAL: Because of the nature of this installation, there are no facilities for supplying bunkers, fresh water or other services.

PUERTO PLATA: 19.49 N. 70.41 W.

See "General" before first port.

The port of Puerto Plata is the main commercial port on the North coast of the Dominican Republic, and is the only one in this area receiving both general and bulk cargoes, and also exporting tobacco, agricultural commodities, etc.

PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Harbour Master can be contacted by radio telephone, frequency 2738 and 2638. Pilot boards 0.5 miles from the sea buoy. Pilot also on VHF Channel 16.

ANCHORAGE: Deep water anchorage available outside port. Pilot will advise best location. In rough weather, the anchorage is dangerous.

RESTRICTIONS: No entry or departure at night.

Depth at entrance 42 ft., depth on bar 37 ft. HW and 34 ft. LW, depth in harbour 30 ft.

MAX. SIZE: LOA 700 ft., beam 100 ft. and draft 30 ft. (S.W.).

HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.

RADIO: When within range, Santo Domingo Radio.

TUGS: Tugs not available.

BERTHING:

Berth No. 1 (New): This berth is the Eastern side of the "New" finger pier, built in the 1970's, and which is 984 ft. (300 m.) long and 144 ft. (44 m.) wide. Two or more vessels may occupy this berth, which is usually very busy with deep-draft vessels, including cruise ships which have preferential berthing rights. The pier is approximately 10 ft. above the water line.

Maximum Draft: 29 ft. (outer), 20 ft. (inner), (S.W.).

Storage Facilities: There is a shed managed by the Port Authority with 6,000 sq.m. capacity, and which is divided into 3 sections for different import and export cargoes.

Equipment: Forklifts of various capacities are available for the handling of general cargoes. For the handling of bulk cargoes, there are hoppers, grab buckets and payloaders, but the ship's gear is used in most cases. There is also pneumatic discharging equipment or vacuvator available for heavy grain, but its capacity is only about 40 – 50 tonnes/hr.

Berth No. 2 (New): This berth is on the Western side of the "New" finger pier, built in the 1970's, and which is 984 ft. (300 m.) long and 144 ft. (44 m.) wide. Two or more vessels may occupy this berth, depending on their length. This berth is used by several container vessels with regular service to the U.S.A. ports.

Maximum Draft: 24 ft. (S.W.) (outer), 16 ft. (S.W.) (inner), shallow away from dock to as little as 14 ft. – 15 ft. at about 100 ft. from and parallel to the dock.

Storage Facilities: See Berth No. 1 (New).

Equipment: See Berth No. 1 (New).

Berth No. 3 (New): This berth is located at the tip of the "New" finger pier, built in the 1970's, and can accommodate a vessel of up to 250 ft. LOA.

Maximum Draft: 24 ft. (S.W.).

Storage Facilities: See Berth No. 1 (New).

Equipment: See Berth No. 1 (New).

Berth No. 1 (Old): This berth is on the Western side of the "Old" finger pier. It is about 360 ft. (110 m.) long. The pier is about 2.75 m. above the water line at high tide. It is not presently being used except as a lay-by berth, due to its state of disrepair.

Maximum Draft: 26 ft. (S.W.).

Storage Facilities: There is a small shed of approximately 2,000 sq.m., operated by the Port Authority. There is also a pipeline for fuel and diesel oil that leads to the utility company's shore tank nearby.

Equipment: See Berth No. 1 (New) for information. However, please note that this berth is not presently being used for general and bulk cargo operations, due to its poor condition.

Berth No. 2 (Old): This berth is located on the Eastern side of the "Old" finger pier and is about 360 ft. (110 m.) long. The pier is about 2.75 m. above the water line at high tide. Because the pier is in poor structural condition, it is rarely used, except by tankers discharging fuel and diesel oil for the local utility company, and as a lay-by berth.

Maximum Draft: Depth alongside 29 ft. 6 in. (S.W.).

Storage Facilities: See Berth No. 1 (Old).

Equipment: See Berth No. 1 (Old).

CRANES: Not available.

STEVEDORES: ETAs required 24 hours and 12 hours before arrival to arrange gangs.

Working Hours: Straight time working hours are 0800 – 1200 hrs. and 1400 – 1800 hrs. Mondays through Fridays, and Saturdays 0800 – 1200 hrs. Except on major holidays (New Year, Easter and Christmas), work may be ordered at overtime rates around the clock and on weekends.

MEDICAL: Full medical attention is available in Puerto Plata, and further facilities available in Santiago and Santo Domingo.

TANKERS: Berth at molasses/petroleum berth.

DENSITY: Salt water inside harbour.

FRESH WATER: Pipeline at wharves. Ship's hoses used.

FUEL: Diesel and fuel oil available by truck from Santo Domingo.

CONSULS: All consular affairs for this port are generally handled in Santo Domingo.

REPAIRS: Minor repairs only.

GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.

OPENING/CLOSING HATCHES: Can be performed by crew or stevedores.

CUSTOMS ALLOWANCES: Bond is sealed, but can be opened at Master's request.

REPATRIATION: Can be arranged.

AIRPORT: La Union International Airport is located about 20 km. East of Puerto Plata and has daily flights to/from San Juan, Miami and New York.

POLICE/FIRE/AMBULANCE: At Santo Domingo.

TELEPHONES: Nearest in Customs House alongside wharves.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.

GENERAL: No boats to be lowered without official permission.

SHIPMASTER'S REPORT: March 1989.

Approaches: BA. Chart 463.

Owen Rock and the wreck, partly above water, are conspicuous, also the chimney S.E. of Punta Fortaleza which has a conspicuous plume of smoke giving a good indication of wind direction and strength.

The light S.E. of Pta. Fortaleza is sometimes working but is very weak.

The leading lights are fixed red and are conspicuous on the leading line and appear to be in the charted positions. They are displayed from white square towers with red tops.

These lights are unreliable and although usually on throughout the day are often out at night.

The buoys are not as charted, Buoy No. 1 and Buoy No. 6 are missing, Buoy No. 3 is close to its charted position, Buoy No. 2 has been moved closer in shore and Buoy No. 4 into the harbour.

Approximate positions of the buoys obtained by radar (bearings and distances from Pta. Fortaleza light):

No. 2	352°	0.465 miles
No. 3	334°	0.265 miles.
No. 4	328°	0.355 miles.

None of the buoys are lit and all are of the same rust colour.

The chart shows the shelf off Pta. Fortaleza extending into the buoyed channel but with the movement of the buoys this is no longer the case.

The leading lights give a line slightly to the East of the centre of the buoyed channel.

Pilots: The ETA will be passed to the Pilots by the Agents.

There is VHF communication with the pilot office but once he leaves the office to come to the vessel there is no further communication.

Channel 16 is used exclusively for communications.

There have been a number of changes recently in the pilots and in March 1989 Pilot Domingo proved competent both entering and leaving.

The Pilot boards from a small fibreglass boat as close to the buoys as the vessel is willing to come.

Wait until the boat is seen crossing the harbour before approaching too close as it can take a long time from the Pilot advising that he is on his way until the boat reaches the channel buoys.

Tugs: There is no tug available at this port.

Current: There is usually a strong set to the West when approaching on to the wreck and Owen Rock but on occasions this can be reversed and an Easterly or Southerly set experienced.

Entry and Departure at Night: Not recommended, none of the lights are reliable and the buoys are often not clear on radar due to clutter.

There are no lights on the old pier and vessels berthed there are usually in darkness.

The lights on the new pier are confined to the walls of the cargo shed which is at the landward end of the pier.

There were 2 floodlight towers on the new pier, both are damaged and not working, the closest one to the end has now been demolished.

The Pilot advised that entry and departure is in daylight only.

Berths: The Eastern, "Old Pier", is in poor condition with the end corner bollards either missing or damaged.

The length of this pier is approximately 115 m.

The Eastern side of this pier has a line of steel pilings approximately 2 m. from the side of the pier, these pilings are in very poor condition due to corrosion and damage. An attempt has been made to fender the tops of the pilings with tyres but most have slipped and afford little protection.

The chart shows some 5.1 m. alongside this pier but the Pilot has advised that there is 29 ft. (8.8 m.) there, and no problems were experienced berthing there with a draft of 7.75 m. on one occasion.

The Western, "New Pier", is in fairly good condition with fendering on the East and West sides.

The usual grain and feed berth is the outer end of the East side of this pier, but on Mondays this is reserved for the passenger vessel 'Caribe' which arrives at about 0800 hrs. and sails around 1700 hrs. Any vessels on this berth are moved off either to another berth if available or out to sea.

There is about 31 ft. 6 in. of water alongside at this berth (9.6 m.) as a vessel of this draft was seen struggling to get alongside and eventually managed.

The alternative berth is the West side of the New Pier, and the Pilot reports that there is 23 ft. of water alongside (7.01 m.), this was the berth used on this occasion and no problems were experienced berthing with drafts of 5.01 m. forward and 6.12 m. aft, the echo sounder showing clearance under the keel.

There is much less water at the landward end of this pier.

The outer 30 m. of this berth is used by small container vessels and there is timber strengthening for their mobile crane over this area, making it useless for any other discharging operations.

Depths: The depths are not as charted and the water gets shallow to the West of the leading line. The bottom is soft mud and the harbour appears to be silting up from the Rio San Marcos. Depths, particularly to the West side of the harbour, are doubtful.

General Weather: Early morning it is usually calm with the wind increasing from the East throughout the morning becoming strongest in the late afternoon.

There is sometimes a swell in the port, but this usually doesn't affect vessels berthed alongside.

Expect rain at all seasons, usually in very heavy downpours.

Fresh Water: This is available from the dock, although sometimes difficult to get, especially at weekends, even though the hydrants on the dock are continuously running and stevedores open up the hydrants to wash.

Provisions: Available and of reasonable quality and price.

General chandlery and working stores are almost impossible to obtain.

Courtesy Flag: This must be the plain flag, not defaced with the Coat of Arms.

Load Line Zone: Puerto Plata is just inside the Tropical Zone but from 16th July to 31st October the Summer Zone is entered after 16 miles (Northbound).

Port Authorities: The authorities will board on arrival with the Agent, usually 7 to 10 people. A search of the vessel and accommodation is carried out for contraband and stowaways before the vessel is cleared inwards.

A further search is carried out before departure and before the clearance is issued. These searches are usually only formalities at this port.

Documents: Ship's standard forms are accepted.

1 copy Maritime Declaration of Health.
8 copies Crew List.
8 copies Passenger List (Nil declaration required).
8 copies Arms and Ammunition List (Nil declaration required).
5 copies Stores List.
5 copies Crew Effects List.
8 copies of a Stowaway List are required if vessel has any on board.

Stowaways: Stowaways are a problem in spite of the patrolling guards. The port security fence has been removed over a distance of a few hundred metres, although the gate is always closed and guarded, potential stowaways will swim out to ships from the beaches.

Communications: All arrival messages are sent to Santo Domingo office and relayed whether by telephone or public telex to Puerto Plata.

The telex and telephone system in the Dominican Republic is often out of order.

Casual Labour: Available at negotiable rates, about U S.$12.00 per day, but before any work is started permission must be obtained from the Comandante del Puerto. The request for permission must contain the names of the prospective employees and is stamped by the Official and issued to the dock guard.

Syndicate employees are charged at about U.S.$25.00 per day.

Search the vessel well after they finish work and before sailing as casual workers could be potential stowaways.

Cargo Work: Discharging of ground nut pellets is by grabs on ship's cranes into hoppers on the dock and taken away by lorries.

The holdups are all due to lorries and although it is possible to work around the clock there are usually no lorries available and work ceases about 2100 hrs. each night, starting again at around 0800 hrs.

The tonnage discharged is checked by truck weights.

Total discharged 3,300 tonnes.

Gross gang hours	155.75	Gross rate	21.19 t.p.h.
Net gang hours	66.6	Net rate	49.55 t.p.h.

Time lost:	Lack of trucks	49.5 hours
	Rain	37.8 hours
	Breakdown	1.8 hours

The trucks used are small general purpose vehicles carrying about 15 – 20 tonnes each and on some occasions only one truck was available to serve the two gangs working. The Agents are the stevedores but they do not supply the trucks.

Shore Passes: Shore passes are issued by Immigration on arrival and should be carried, but generally they are not asked for by the gate guards.

Repatriation: There is an international airport close to Puerto Plata used mainly to fly tourists into the hotel complex some 20 km. out of town.

Baggage and personal effects are cleared by Customs at the dock and it can take up to 8 hours to complete formalities.

Local agents have difficulty in obtaining flights, and on one occasion a Chief Engineer after waiting for 5 days caught the next managed vessel back to the U.S.A. for repatriation. On another occasion, a crane engineer discharged here was lost to his Company for two days.

AUTHORITY: Harbour Master. Tel: (809) 586-2576.
Port Manager. Tel: (809) 586-6566.

AGENT: See "General" before first port.

RIO HAINA: 18.25 N. 70.01 W. (See Plan)

See "General" before first port.

PILOTAGE: Pilot boards from small boat flying a flag with a white "P" on a black background, about 1.0 mile from harbour entrance. Contact Pilot on 2738 or 2638 and Channel 16 VHF. Tel: (809) 542-3550.

ANCHORAGE: It is suggested that vessels anchor off the port of Santo Domingo, which is only 4 miles away. Anchorage at Haina is considered unsafe and only to be used in case of emergency.

RESTRICTIONS: Night-time entry and sailing is restricted, but depending on circumstances, weather conditions and vessel characteristics, the Pilot can be induced to move the vessel at night.

MAX. SIZE: LOA 700 ft., beam 100 ft. and draft 32 ft.

TUGS: 2 tugs, 1,200 h.p. and 850 h.p. Use of tugs is compulsory.

BERTHING: 12 berths available. Vessels going to load sugar swing inside the harbour with the aid of a tug, and berth starboard side to the quay. Ship's gangway is recommended. There is sometimes quite a swell running inside the harbour. The port anchor is used for berthing and unberthing.

Berth No. 1 West (Sugar Berth): This is the berth nearest to the breakwater. It is 190 m. (623 ft.) long. This berth has a mechanical bulk sugar loading facility, consisting of a continuous conveyor belt system from the Rio Haina Sugar Mill directly to the spout-thrower that loads and trims the cargo. This berth is also frequently used by tankers discharging fuel and/or diesel oil to shore tanks.

Maximum draft: 30 ft. (brackish water).

Storage facilities: The sugar mill has 2 bulk sugar warehouses with a total capacity of more than 150,000 tons.

Equipment: The mechanical bulk sugar loading system loads at about 200-250 tonnes/hr.

Bunkers: Fuel and diesel oil are available by tank trucks of either 5,000 or 10,000 American gallons.

Note: Presently there are no bunkers available for ships because of a local shortage of fuels.

Fresh water: Fresh water must be delivered by tank truck only, as there is no pipeline alongside.

Working hours: Sugar is usually loaded 24 hours around the clock by the sugar mill, as well as on Saturdays, Sundays and holidays with all overtime for the shippers' account. The average loading rate is 4,000 – 5,000 tons during 24 hours.

Berth No. 2 West: This berth is 113 m. (370 ft.) long, and is used for the discharge of general breakbulk and containerised cargo. Liquid petroleum tankers also use this berth to discharge distillate to shore tanks belonging to the local Refinery, and have preferential berthing rights. This berth is not very well protected, and hence may be dangerous when there is a heavy swell.

Maximum draft: 30 ft. (brackish water).

Storage facilities: There are 2 sheds, each with 2,100 sq.m. storage space available. These sheds were originally built to store bagged sugar awaiting shipment, but are now primarily used for various import cargoes requiring covered storage.

Equipment: Forklifts of 4.5, 6 and 10 ton capacity are available for handling cargo. Motor cranes if required may be used at this berth.

Bunkers: See "Berth No. 1 West".

Fresh water: See "Berth No. 1 West".

Working hours: Straight time working hours for general breakbulk and containerised cargoes are 0800 hrs. – 1200 hrs. and 1400 hrs. – 1800 hrs. Mondays through Fridays, and 0800 hrs. – 1200 hrs. on Saturdays. Overtime may be worked around the clock and on weekends, excepting major holidays. Please contact Agent for further information.

Berth No. 3 West: This berth is 181 m. (593 ft.) long, of which only 110 m. can presently be used for berthing, due to the state of disrepair; the apron is also in a damaged condition; the pavement is cracked and the supporting structure weak. Hence, this berth is presently used by small general cargo vessels handling light cargoes such as plywood, lumber, etc., and only rarely for containers directly onto flatbeds.

Maximum draft: 24 ft. (brackish water).

Storage facilities: See "Berth No. 1 West".

Equipment: See "Berth No. 1 West".

Bunkers: See "Berth No. 1 West".

Fresh water: See "Berth No. 1 West".

Working hours: See "Berth No. 1 West".

Berth No. 4 West (Molasses Berth): This berth is 264 m. (866 ft.) long, and is used by molasses tankers loading from the shore storage tanks belonging to the Rio Haina Sugar Mill, and is therefore frequently referred to as the Molasses Berth. Since 1983/1984, this berth has also been used for discharging coal in bulk for the electric utility Company into hoppers owned by Maritima Dominicana. Early 1994, Sealand installed a new container (gantry) crane, and was granted preference at this dock. When not occupied by these vessels, the berth is used for other bulk cargoes (soda ash, bulk fertilisers, mineral sand, etc.) and for homogeneous breakbulk and containers.

Maximum draft: Maximum draft alongside is 30 ft. (brackish water).

Storage facilities: Molasses storage tanks connected by pipeline hold approximately 5 million gallons and are used for exporting molasses; there is no shed available for cargo, and limited space for lumber and other homogeneous breakbulk cargoes. Coal and other bulk cargoes must be hauled away immediately by trucks.

Equipment: Forklifts of 4.5, 6 and 10 tons are available to handle general breakbulk. Coal is usually discharged by ship's gear into hoppers, and front-end loaders are used in the ship's holds.

Bunkers: See "Berth No. 1 West".

Fresh water: See "Berth No. 1 West".

Working hours: See "Berth No. 1 West".

Berth No. 5 West (Sealand): This berth is called the Sealand Berth, because this company has a portainer crane and leases a 3,800 sq.m. warehouse and open container terminal from the Port Authority, and by contract has preferential berthing at this pier for its own vessels. Because of the volume of its operations, this berth is rarely used by any other vessels. The berth is 171 m. (580 ft.) long.

Maximum draft: 26 ft. (brackish water).

Storage facilities: 3,800 sq.m. container stripping terminal warehouse and open storage for containers.

Equipment: Sealand has a private portainer and ancillary container handling equipment for its operations.

Bunkers: See "Berth No. 1 West".

Fresh water: See "Berth No. 1 West".

Working hours: See "Berth No. 2 West".

Berth No. 6 West: This berth is 177 m. (580 ft.) long, and is used by tankers for discharging LPG, lubricants and liquid paraffin to shore tanks. However, LPG operations are increasingly rare at this berth, because the local Refinery has completed an off-shore buoy installation for receiving LPG by pipeline which is used by most vessels.

Maximum draft: 22 ft. (brackish water).

Storage facilities: Storage tanks are available for lubricants, liquid chemicals, LPG and liquid paraffin. No other storage facilities available at this berth.

Equipment: Only shore facilities are pipelines for above-mentioned liquid cargoes from the vessel to the storage tanks.

Bunkers: See "Berth No. 1 West".
Fresh water: See "Berth No. 1 West".
Working hours: See "Berth No. 2 West".

Berth No. 1 East (Proteinas): This berth is privately owned by Sociedad Industrial Dominicana (S.I.D.), a large importer of corn and soybeans in bulk, and is used to discharge feed grain and meal in bulk as well as vegetable oils and fats in bulk. The berth consists of a central platform supporting a shore crane on rails and hoppers for discharging and three dolphins for securing the vessel's lines.

Two of the hoppers feed directly into trucks and the third onto a conveyor leading to the silos. Each dolphin has one bollard at its centre and the central platform has 3 bollards over a distance of about 28 m. The total length of the berth, between the outer dolphins, is 153 m. (500 ft.). Vessels normally berth starboard side alongside utilising the bollard at the end of Berth No. 2 (Fersan) for its head lines. There is a bollard on the breakwater, about 100 m. from the Southern dolphin, and 180 m. from the central platform, which cannot presently be used due to the on-going works restoring and rebuilding the breakwater.

As vessels have to shift back and forth in order to position the hatch openings within reach of the crane, it is advisable for larger vessels to place a mooring line, leading astern, from its spring or breast fairlead to the Southern dolphin.

Maximum LOA permissible is about 700 ft.

Maximum draft: 31 ft. (salt water).

Storage facilities: S.I.D. has 6 silos, each with a capacity for approximately 1,200 tonnes of heavy grain. There are also 6 storage tanks for vegetable oils and fats, with a total capacity for 6,000 tonnes.

Equipment: Grain is discharged with a shore crane into hoppers at an average rate of 150-200 tonnes/hr., depending on the type of vessel and cargo. Meal is slower, averaging about 100-125 tonnes/hr. Stevedores also use a large front-end loader to clean the holds. Actual discharging rate is sometimes slower than capacity, due to the slow take-away by trucks.

Bunkers: Fuel and diesel oil are delivered by tank truck. Arrangements must be made in advance of arrival through the Agent, in order to coordinate timely delivery, because delivery cannot be made during the discharging operations. Trucks carry either 5,000 or 10,000 American gallons.

Fresh water: See "Berth No. 1 West".

Working hours: See "Berth No. 2 West". However, receivers frequently work overtime at this berth for their own account, usually at night on weekdays, during weekends and on most holidays. Otherwise for overtime rates please contact Agent.

Berth No. 2 East (Fersan): This facility is called the Fersan Berth, because it is controlled by the fertiliser company Fertilizantes Santo Domingo (Fersan) and used primarily for their own bulk discharging operations, exporting fertilisers in bags, and also for bulk liquid chemicals. Occasionally, the berth is used for discharging bulk grain. This pier is 185 m. (600 ft.) long.

Maximum draft: 30 ft. (brackish water).

Storage facilities: The fertiliser company has storage space available for both bulk and bagged fertilisers. Total capacity exceeds 30,000 tons.

Equipment: Fersan has one crane mounted on rails which is used for all bulk discharging, and occasionally for assisting in the loading of bagged fertiliser for export. This crane discharges fertiliser at about 100-125 tons/hr. on average, directly into a stationary hopper which feeds a conveyor to the Fersan mixing plant. Fersan also has front-end loaders for the cleaning of ship's holds, and forklifts for handling bagged cargoes. When bulk grain is discharged at this berth, small hoppers are used and the cargo is hauled away in trucks. This limits the discharge rate to about 80 tons/hr. for this type of cargo.

Bunkers: See "Berth No. East (Proteinas)".
Fresh water: See "Berth No. 1 East".
Working hours: See "Berth No. 1 East".

Berth No. 3 East (Falconbridge): This berth is 215 m. (700 ft.) long. The Falconbridge Dominicana Terminal is located alongside, and vessels carrying cargo for this company have preference in the use of this berth. Falconbridge receives fuel oil in bulk frequently; exports ferro-nickel products on pallets and in crates as well as in containers, and imports general breakbulk and containerised cargoes on a regular basis. This berth may also be used by other vessels, when Falconbridge vessels are not occupying it.

Maximum draft: 30 ft. (brackish water).

Storage facilities: Falconbridge has a Terminal, which is basically an open yard for containers, palletised ferro-nickel ingots, ferro-nickel cones in wooden crates and import cargoes such as electrodes, lumber, etc.

Equipment: Forklifts are available for handling the cargo on the pier and in the vessel's holds. Motor cranes can be hired if required due to breakdown of vessel's gear or for gearless ships.

Bunkers: See "Berth No. 1 East (Proteinas)".
Fresh water: See "Berth No. 1 East".
Working hours: See "Berth No. 2 West".

Berth No. 4 East: This berth is 215 m. (700 ft.) long, and is used frequently by Ro-Ro vessels. There are ramps available, one at each end and one in the centre. When not in use by one of the regularly scheduled Ro-Ro liner services, the berth is used to discharge general breakbulk or homogeneous cargoes.

Maximum draft: 27 ft. (brackish water).

Storage facilities: The Port Authority's Shed No. 4 with approximately 3,600 sq.m. is available nearby for general cargo requiring enclosed storage. The open yard is available for trailers, containers and breakbulk cargo not requiring covered storage.

Equipment: 3 ramps allow Ro-Ro vessels to discharge at this berth. Forklifts of various capacities are available, and the stevedoring companies have other equipment (mules, etc.).

Bunkers: See "Berth No. 1 East (Proteinas)".
Fresh water: See "Berth No. 1 East".
Working hours: See "Berth No. 2 West".

Berth No. 5 East: This berth is 214 m. (702 ft.) long, and is used primarily fo the handling of containers and general breakbulk cargo.

Maximum draft: 31 ft. (brackish water).

Storage facilities: The Port Authority's Shed No. 1 with 2,855 sq.m. capacity is located nearby and can accommodate general cargo, and is used for stripping containers, etc. Open yard can accommodate containers and trailers.

Equipment: Motor cranes, spreaders, forklifts and other equipment may be hired for operations, although most vessels using this berth are self-sustaining.

Bunkers: See "Berth No. 1 East (Proteinas)".
Fresh water: See "Berth No. 1 East".
Working hours: See "Berth No. 2 West".

Berth No. 6 East (Container Terminal): This berth is 765 m. (3,280 ft.) long, and was intended for handling containers, but due to the frequent congestion of other berths, this pier is sometimes used for bulk cargoes, steel, scrap, etc., and almost any other vessels with deep drafts, including passenger cruise ships. Due to its length, the pier is divided into sections A, B, C and D.

Maximum draft: Section A of the pier (down-river), the end nearest to the port entrance, has a draft of 29 ft. (brackish water). This draft gradually diminishes as you go up-river, and Section D, which measures about 150 m., only has a maximum draft of 14 ft.

Storage facilities: A large open yard for containers and trailers with modern lighting and other facilities is presently nearing completion of construction. The nearest warehouse is the Port Authority's Shed No. 1, with 2,855 sq.m. storage capacity.

Equipment: The Port Authority owns and the Shipping Association operates a large overhead gantry crane on rails that can handle containers. However, many vessels use their own gear. There are also several large hoppers on the pier which are used to discharge bulk cargoes (coal, clinker and grain) into trucks. Other equipment, such as payloaders, forklifts, motor cranes, etc., are also available for hire.

Bunkers: See "Berth No. 1 West".
Fresh water: See "Berth No. 1 East".
Working hours: See "Berth No. 2 West".

SPECIALISED CARGO HANDLING FACILITIES: See "Berthing".

STEVEDORES: See individual berths.

MEDICAL: All facilities in Santo Domingo.

TANKERS: CBM operated by Refineria Dominicana de Petroleo, S.A.

Before Boarding the Tanker: An inspection of the berth area must be made from the mooring launch for wind and swell conditions. If these conditions exceed the working limitations of the mooring launch, then the operation must be delayed until the weather improves.

A decision to abort the berthing operation can be made under the following circumstances:

(a) When swell measured on the graduations of the PLEM marker is estimated to be in excess of 2.0 m.
(b) When wind speed is in excess of 25 knots.
(c) When the approach to the berth is likely to be hindered by poor visibility caused by an approaching rain front or by the onset of darkness. It is estimated that a normal approach will take 45 minutes to 1 hour, and that visibility towards the shore is drastically reduced within a few minutes after sunset. As a general rule, approaches to the berth should not be considered after 1730 hrs.
(d) If the draft of the tanker is in excess of 9.5 m.

The Approach to the Berth: The tanker should be instructed to proceed to a point 1 nautical mile South of the CBM, and have a lee prepared for boarding the Pilot on the portside and with all way taken off the ship.

The initial approach is in a Northwesterly direction with a gradual turn to starboard (See "Plan"). Speed must not be allowed to build up to an extent where engines have to be used to reduce it to a safe entry into the buoy area. Speed should therefore be kept to a minimum, consistent with steerage.

At no point during the approach must the vessel be allowed to cross the 10 m. contour, and on the final approach, the PLEM marker must always be on the port bow. To assist in these requirements, the Power Station chimney and the Refidomsa flare must never be allowed to close, and Buoy No. 2 should be used as a point of reference when entering the berth.

As an additional precaution, speed at entering the berth should be as low as possible. With minimum way on the vessel, the starboard anchor can be dropped and the engines used to assist in turning the vessel into the berth. Excessive speed at this point may require the use of stern movements to reduce headway, and this may impart a sideways drift into the berth and the possibility of running over the hose and PLEM markers.

The Mooring Operation: The starboard anchor should be dropped when the bow of the tanker is just within the boundaries of the buoys and run out to 2 shackles. The vessel should at this stage be turning to starboard under engines and rudder. By holding on to the starboard anchor, this swing will be accelerated and allowed to continue until the bow has cleared Buoy No. 5. When the bow is clear of Buoy No. 5, and to seaward of it, the port anchor should be dropped and allowed to run out whilst a stern movement is instigated.

At this point, the tug should be ordered to push on the starboard quarter, if so required. With an offshore wind, the assistance of this tug is essential and attempts at mooring without it should be avoided. At the same time, the mooring launch should be instructed to run mooring lines to Buoy No. 4. When these lines are secure and slack taken up, the tug should be instructed to stand-by whilst the remainder of the lines are run out, with the weather lines having priority. If conditions permit, it is better to manoeuvre the ship to the PLEM marker, using the ship's mooring lines rather than the tug.

When lines to the weather buoys have been secured, the starboard anchor should be recovered and the port anchor allowed to run out until the vessel is in position. On no account should the port anchor be recovered whilst the vessel is in the berth, as it provides the only security, should the vessel break out of the moorings.

Provisions: Available and of reasonable quality and price.

General chandlery and working stores are almost impossible to obtain.

Courtesy Flag: This must be the plain flag, not defaced with the Coat of Arms.

Load Line Zone: Puerto Plata is just inside the Tropical Zone but from 16th July to 31st October the Summer Zone is entered after 16 miles (Northbound).

Port Authorities: The authorities will board on arrival with the Agent, usually 7 to 10 people. A search of the vessel and accommodation is carried out for contraband and stowaways before the vessel is cleared inwards.

A further search is carried out before departure and before the clearance is issued. These searches are usually only formalities at this port.

Documents: Ship's standard forms are accepted.

1 copy Maritime Declaration of Health.
8 copies Crew List.
8 copies Passenger List (Nil declaration required).
8 copies Arms and Ammunition List (Nil declaration required).
5 copies Stores List.
5 copies Crew Effects List.
8 copies of a Stowaway List are required if vessel has any on board.

Stowaways: Stowaways are a problem in spite of the patrolling guards. The port security fence has been removed over a distance of a few hundred metres, although the gate is always closed and guarded, potential stowaways will swim out to ships from the beaches.

Communications: All arrival messages are sent to Santo Domingo office and relayed whether by telephone or public telex to Puerto Plata.

The telex and telephone system in the Dominican Republic is often out of order.

Casual Labour: Available at negotiable rates, about U S.$12.00 per day, but before any work is started permission must be obtained from the Comandante del Puerto. The request for permission must contain the names of the prospective employees and is stamped by the Official and issued to the dock guard.

Syndicate employees are charged at about U.S.$25.00 per day.

Search the vessel well after they finish work and before sailing as casual workers could be potential stowaways.

Cargo Work: Discharging of ground nut pellets is by grabs on ship's cranes into hoppers on the dock and taken away by lorries.

The holdups are all due to lorries and although it is possible to work around the clock there are usually no lorries available and work ceases about 2100 hrs. each night, starting again at around 0800 hrs.

The tonnage discharged is checked by truck weights.

Total discharged 3,300 tonnes.

Gross gang hours	155.75	Gross rate	21.19 t.p.h.
Net gang hours	66.6	Net rate	49.55 t.p.h.

Time lost:	Lack of trucks	49.5 hours
	Rain	37.8 hours
	Breakdown	1.8 hours

The trucks used are small general purpose vehicles carrying about 15 – 20 tonnes each and on some occasions only one truck was available to serve the two gangs working. The Agents are the stevedores but they do not supply the trucks.

Shore Passes: Shore passes are issued by Immigration on arrival and should be carried, but generally they are not asked for by the gate guards.

Repatriation: There is an international airport close to Puerto Plata used mainly to fly tourists into the hotel complex some 20 km. out of town.

Baggage and personal effects are cleared by Customs at the dock and it can take up to 8 hours to complete formalities.

Local agents have difficulty in obtaining flights, and on one occasion a Chief Engineer after waiting for 5 days caught the next managed vessel back to the U.S.A. for repatriation. On another occasion, a crane engineer discharged here was lost to his Company for two days.

AUTHORITY: Harbour Master. Tel: (809) 586-2576.
Port Manager. Tel: (809) 586-6566.

AGENT: See "General" before first port.

RIO HAINA: 18.25 N. 70.01 W. (See Plan)

See "General" before first port.

PILOTAGE: Pilot boards from small boat flying a flag with a white "P" on a black background, about 1.0 mile from harbour entrance. Contact Pilot on 2738 or 2638 and Channel 16 VHF. Tel: (809) 542-3550.

ANCHORAGE: It is suggested that vessels anchor off the port of Santo Domingo, which is only 4 miles away. Anchorage at Haina is considered unsafe and only to be used in case of emergency.

RESTRICTIONS: Night-time entry and sailing is restricted, but depending on circumstances, weather conditions and vessel characteristics, the Pilot can be induced to move the vessel at night.

MAX. SIZE: LOA 700 ft., beam 100 ft. and draft 32 ft.

TUGS: 2 tugs, 1,200 h.p. and 850 h.p. Use of tugs is compulsory.

BERTHING: 12 berths available. Vessels going to load sugar swing inside the harbour with the aid of a tug, and berth starboard side to the quay. Ship's gangway is recommended. There is sometimes quite a swell running inside the harbour. The port anchor is used for berthing and unberthing.

Berth No. 1 West (Sugar Berth): This is the berth nearest to the breakwater. It is 190 m. (623 ft.) long. This berth has a mechanical bulk sugar loading facility, consisting of a continuous conveyor belt system from the Rio Haina Sugar Mill directly to the spout-thrower that loads and trims the cargo. This berth is also frequently used by tankers discharging fuel and/or diesel oil to shore tanks.

Maximum draft: 30 ft. (brackish water).

Storage facilities: The sugar mill has 2 bulk sugar warehouses with a total capacity of more than 150,000 tons.

Equipment: The mechanical bulk sugar loading system loads at about 200-250 tonnes/hr.

Bunkers: Fuel and diesel oil are available by tank trucks of either 5,000 or 10,000 American gallons.

Note: Presently there are no bunkers available for ships because of a local shortage of fuels.

Fresh water: Fresh water must be delivered by tank truck only, as there is no pipeline alongside.

Working hours: Sugar is usually loaded 24 hours around the clock by the sugar mill, as well as on Saturdays, Sundays and holidays with all overtime for the shippers' account. The average loading rate is 4,000 – 5,000 tons during 24 hours.

Berth No. 2 West: This berth is 113 m. (370 ft.) long, and is used for the discharge of general breakbulk and containerised cargo. Liquid petroleum tankers also use this berth to discharge distillate to shore tanks belonging to the local Refinery, and have preferential berthing rights. This berth is not very well protected, and hence may be dangerous when there is a heavy swell.

Maximum draft: 30 ft. (brackish water).

Storage facilities: There are 2 sheds, each with 2,100 sq.m. storage space available. These sheds were originally built to store bagged sugar awaiting shipment, but are now primarily used for various import cargoes requiring covered storage.

Equipment: Forklifts of 4.5, 6 and 10 ton capacity are available for handling cargo. Motor cranes if required may be used at this berth.

Bunkers: See "Berth No. 1 West".

Fresh water: See "Berth No. 1 West".

Working hours: Straight time working hours for general breakbulk and containerised cargoes are 0800 hrs. – 1200 hrs. and 1400 hrs. – 1800 hrs. Mondays through Fridays, and 0800 hrs. – 1200 hrs. on Saturdays. Overtime may be worked around the clock and on weekends, excepting major holidays. Please contact Agent for further information.

Berth No. 3 West: This berth is 181 m. (593 ft.) long, of which only 110 m. can presently be used for berthing, due to the state of disrepair; the apron is also in a damaged condition; the pavement is cracked and the supporting structure weak. Hence, this berth is presently used by small general cargo vessels handling light cargoes such as plywood, lumber, etc., and only rarely for containers directly onto flatbeds.

Maximum draft: 24 ft. (brackish water).

Storage facilities: See "Berth No. 1 West".

Equipment: See "Berth No. 1 West".

Bunkers: See "Berth No. 1 West".

Fresh water: See "Berth No. 1 West".

Working hours: See "Berth No. 1 West".

Berth No. 4 West (Molasses Berth): This berth is 264 m. (866 ft.) long, and is used by molasses tankers loading from the shore storage tanks belonging to the Rio Haina Sugar Mill, and is therefore frequently referred to as the Molasses Berth. Since 1983/1984, this berth has also been used for discharging coal in bulk for the electric utility Company into hoppers owned by Maritima Dominicana. Early 1994, Sealand installed a new container (gantry) crane, and was granted preference at this dock. When not occupied by these vessels, the berth is used for other bulk cargoes (soda ash, bulk fertilisers, mineral sand, etc.) and for homogeneous breakbulk and containers.

Maximum draft: Maximum draft alongside is 30 ft. (brackish water).

Storage facilities: Molasses storage tanks connected by pipeline hold approximately 5 million gallons and are used for exporting molasses; there is no shed available for cargo, and limited space for lumber and other homogeneous breakbulk cargoes. Coal and other bulk cargoes must be hauled away immediately by trucks.

Equipment: Forklifts of 4.5, 6 and 10 tons are available to handle general breakbulk. Coal is usually discharged by ship's gear into hoppers, and front-end loaders are used in the ship's holds.

Bunkers: See "Berth No. 1 West".

Fresh water: See "Berth No. 1 West".

Working hours: See "Berth No. 1 West".

Berth No. 5 West (Sealand): This berth is called the Sealand Berth, because this company has a portainer crane and leases a 3,800 sq.m. warehouse and open container terminal from the Port Authority, and by contract has preferential berthing at this pier for its own vessels. Because of the volume of its operations, this berth is rarely used by any other vessels. The berth is 171 m. (580 ft.) long.

Maximum draft: 26 ft. (brackish water).

Storage facilities: 3,800 sq.m. container stripping terminal warehouse and open storage for containers.

Equipment: Sealand has a private portainer and ancillary container handling equipment for its operations.

Bunkers: See "Berth No. 1 West".

Fresh water: See "Berth No. 1 West".

Working hours: See "Berth No. 2 West".

Berth No. 6 West: This berth is 177 m. (580 ft.) long, and is used by tankers for discharging LPG, lubricants and liquid paraffin to shore tanks. However, LPG operations are increasingly rare at this berth, because the local Refinery has completed an off-shore buoy installation for receiving LPG by pipeline which is used by most vessels.

Maximum draft: 22 ft. (brackish water).

Storage facilities: Storage tanks are available for lubricants, liquid chemicals, LPG and liquid paraffin. No other storage facilities available at this berth.

Equipment: Only shore facilities are pipelines for above-mentioned liquid cargoes from the vessel to the storage tanks.

Bunkers: See "Berth No. 1 West".
Fresh water: See "Berth No. 1 West".
Working hours: See "Berth No. 2 West".

Berth No. 1 East (Proteinas): This berth is privately owned by Sociedad Industrial Dominicana (S.I.D.), a large importer of corn and soybeans in bulk, and is used to discharge feed grain and meal in bulk as well as vegetable oils and fats in bulk. The berth consists of a central platform supporting a shore crane on rails and hoppers for discharging and three dolphins for securing the vessel's lines.

Two of the hoppers feed directly into trucks and the third onto a conveyor leading to the silos. Each dolphin has one bollard at its centre and the central platform has 3 bollards over a distance of about 28 m. The total length of the berth, between the outer dolphins, is 153 m. (500 ft.). Vessels normally berth starboard side alongside utilising the bollard at the end of Berth No. 2 (Fersan) for its head lines. There is a bollard on the breakwater, about 100 m. from the Southern dolphin, and 180 m. from the central platform, which cannot presently be used due to the on-going works restoring and rebuilding the breakwater.

As vessels have to shift back and forth in order to position the hatch openings within reach of the crane, it is advisable for larger vessels to place a mooring line, leading astern, from its spring or breast fairlead to the Southern dolphin.

Maximum LOA permissible is about 700 ft.

Maximum draft: 31 ft. (salt water).

Storage facilities: S.I.D. has 6 silos, each with a capacity for approximately 1,200 tonnes of heavy grain. There are also 6 storage tanks for vegetable oils and fats, with a total capacity for 6,000 tonnes.

Equipment: Grain is discharged with a shore crane into hoppers at an average rate of 150-200 tonnes/hr., depending on the type of vessel and cargo. Meal is slower, averaging about 100-125 tonnes/hr. Stevedores also use a large front-end loader to clean the holds. Actual discharging rate is sometimes slower than capacity, due to the slow take-away by trucks.

Bunkers: Fuel and diesel oil are delivered by tank truck. Arrangements must be made in advance of arrival through the Agent, in order to coordinate timely delivery, because delivery cannot be made during the discharging operations. Trucks carry either 5,000 or 10,000 American gallons.

Fresh water: See "Berth No. 1 West".

Working hours: See "Berth No. 2 West". However, receivers frequently work overtime at this berth for their own account, usually at night on weekdays, during weekends and on most holidays. Otherwise for overtime rates please contact Agent.

Berth No. 2 East (Fersan): This facility is called the Fersan Berth, because it is controlled by the fertiliser company Fertilizantes Santo Domingo (Fersan) and used primarily for their own bulk discharging operations, exporting fertilisers in bags, and also for bulk liquid chemicals. Occasionally, the berth is used for discharging bulk grain. This pier is 185 m. (600 ft.) long.

Maximum draft: 30 ft. (brackish water).

Storage facilities: The fertiliser company has storage space available for both bulk and bagged fertilisers. Total capacity exceeds 30,000 tons.

Equipment: Fersan has one crane mounted on rails which is used for all bulk discharging, and occasionally for assisting in the loading of bagged fertiliser for export. This crane discharges fertiliser at about 100-125 tons/hr. on average, directly into a stationary hopper which feeds a conveyor to the Fersan mixing plant. Fersan also has front-end loaders for the cleaning of ship's holds, and forklifts for handling bagged cargoes. When bulk grain is discharged at this berth, small hoppers are used and the cargo is hauled away in trucks. This limits the discharge rate to about 80 tons/hr. for this type of cargo.

Bunkers: See "Berth No. East (Proteinas)".
Fresh water: See "Berth No. 1 East".
Working hours: See "Berth No. 1 East".

Berth No. 3 East (Falconbridge): This berth is 215 m. (700 ft.) long. The Falconbridge Dominicana Terminal is located alongside, and vessels carrying cargo for this company have preference in the use of this berth. Falconbridge receives fuel oil in bulk frequently; exports ferro-nickel products on pallets and in crates as well as in containers, and imports general breakbulk and containerised cargoes on a regular basis. This berth may also be used by other vessels, when Falconbridge vessels are not occupying it.

Maximum draft: 30 ft. (brackish water).

Storage facilities: Falconbridge has a Terminal, which is basically an open yard for containers, palletised ferro-nickel ingots, ferro-nickel cones in wooden crates and import cargoes such as electrodes, lumber, etc.

Equipment: Forklifts are available for handling the cargo on the pier and in the vessel's holds. Motor cranes can be hired if required due to breakdown of vessel's gear or for gearless ships.

Bunkers: See "Berth No. 1 East (Proteinas)".
Fresh water: See "Berth No. 1 East".
Working hours: See "Berth No. 2 West".

Berth No. 4 East: This berth is 215 m. (700 ft.) long, and is used frequently by Ro-Ro vessels. There are ramps available, one at each end and one in the centre. When not in use by one of the regularly scheduled Ro-Ro liner services, the berth is used to discharge general breakbulk or homogeneous cargoes.

Maximum draft: 27 ft. (brackish water).

Storage facilities: The Port Authority's Shed No. 4 with approximately 3,600 sq.m. is available nearby for general cargo requiring enclosed storage. The open yard is available for trailers, containers and breakbulk cargo not requiring covered storage.

Equipment: 3 ramps allow Ro-Ro vessels to discharge at this berth. Forklifts of various capacities are available, and the stevedoring companies have other equipment (mules, etc.).

Bunkers: See "Berth No. 1 East (Proteinas)".
Fresh water: See "Berth No. 1 East".
Working hours: See "Berth No. 2 West".

Berth No. 5 East: This berth is 214 m. (702 ft.) long, and is used primarily fo the handling of containers and general breakbulk cargo.

Maximum draft: 31 ft. (brackish water).

Storage facilities: The Port Authority's Shed No. 1 with 2,855 sq.m. capacity is located nearby and can accommodate general cargo, and is used for stripping containers, etc. Open yard can accommodate containers and trailers.

Equipment: Motor cranes, spreaders, forklifts and other equipment may be hired for operations, although most vessels using this berth are self-sustaining.

Bunkers: See "Berth No. 1 East (Proteinas)".
Fresh water: See "Berth No. 1 East".
Working hours: See "Berth No. 2 West".

Berth No. 6 East (Container Terminal): This berth is 765 m. (3,280 ft.) long, and was intended for handling containers, but due to the frequent congestion of other berths, this pier is sometimes used for bulk cargoes, steel, scrap, etc., and almost any other vessels with deep drafts, including passenger cruise ships. Due to its length, the pier is divided into sections A, B, C and D.

Maximum draft: Section A of the pier (down-river), the end nearest to the port entrance, has a draft of 29 ft. (brackish water). This draft gradually diminishes as you go up-river, and Section D, which measures about 150 m., only has a maximum draft of 14 ft.

Storage facilities: A large open yard for containers and trailers with modern lighting and other facilities is presently nearing completion of construction. The nearest warehouse is the Port Authority's Shed No. 1, with 2,855 sq.m. storage capacity.

Equipment: The Port Authority owns and the Shipping Association operates a large overhead gantry crane on rails that can handle containers. However, many vessels use their own gear. There are also several large hoppers on the pier which are used to discharge bulk cargoes (coal, clinker and grain) into trucks. Other equipment, such as payloaders, forklifts, motor cranes, etc., are also available for hire.

Bunkers: See "Berth No. 1 West".
Fresh water: See "Berth No. 1 East".
Working hours: See "Berth No. 2 West".

SPECIALISED CARGO HANDLING FACILITIES: See "Berthing".

STEVEDORES: See individual berths.

MEDICAL: All facilities in Santo Domingo.

TANKERS: CBM operated by Refineria Dominicana de Petroleo, S.A.

Before Boarding the Tanker: An inspection of the berth area must be made from the mooring launch for wind and swell conditions. If these conditions exceed the working limitations of the mooring launch, then the operation must be delayed until the weather improves.

A decision to abort the berthing operation can be made under the following circumstances:

(a) When swell measured on the graduations of the PLEM marker is estimated to be in excess of 2.0 m.
(b) When wind speed is in excess of 25 knots.
(c) When the approach to the berth is likely to be hindered by poor visibility caused by an approaching rain front or by the onset of darkness. It is estimated that a normal approach will take 45 minutes to 1 hour, and that visibility towards the shore is drastically reduced within a few minutes after sunset. As a general rule, approaches to the berth should not be considered after 1730 hrs.
(d) If the draft of the tanker is in excess of 9.5 m.

The Approach to the Berth: The tanker should be instructed to proceed to a point 1 nautical mile South of the CBM, and have a lee prepared for boarding the Pilot on the portside and with all way taken off the ship.

The initial approach is in a Northwesterly direction with a gradual turn to starboard (See "Plan"). Speed must not be allowed to build up to an extent where engines have to be used to reduce it to a safe entry into the buoy area. Speed should therefore be kept to a minimum, consistent with steerage.

At no point during the approach must the vessel be allowed to cross the 10 m. contour, and on the final approach, the PLEM marker must always be on the port bow. To assist in these requirements, the Power Station chimney and the Refidomsa flare must never be allowed to close, and Buoy No. 2 should be used as a point of reference when entering the berth.

As an additional precaution, speed at entering the berth should be as low as possible. With minimum way on the vessel, the starboard anchor can be dropped and the engines used to assist in turning the vessel into the berth. Excessive speed at this point may require the use of stern movements to reduce headway, and this may impart a sideways drift into the berth and the possibility of running over the hose and PLEM markers.

The Mooring Operation: The starboard anchor should be dropped when the bow of the tanker is just within the boundaries of the buoys and run out to 2 shackles. The vessel should at this stage be turning to starboard under engines and rudder. By holding on to the starboard anchor, this swing will be accelerated and allowed to continue until the bow has cleared Buoy No. 5. When the bow is clear of Buoy No. 5, and to seaward of it, the port anchor should be dropped and allowed to run out whilst a stern movement is instigated.

At this point, the tug should be ordered to push on the starboard quarter, if so required. With an offshore wind, the assistance of this tug is essential and attempts at mooring without it should be avoided. At the same time, the mooring launch should be instructed to run mooring lines to Buoy No. 4. When these lines are secure and slack taken up, the tug should be instructed to stand-by whilst the remainder of the lines are run out, with the weather lines having priority. If conditions permit, it is better to manoeuvre the ship to the PLEM marker, using the ship's mooring lines rather than the tug.

When lines to the weather buoys have been secured, the starboard anchor should be recovered and the port anchor allowed to run out until the vessel is in position. On no account should the port anchor be recovered whilst the vessel is in the berth, as it provides the only security, should the vessel break out of the moorings.

On completion of mooring, it is essential that all mooring lines are taut and that the winch brakes are fully secure.

The Unmooring Operation: The vessel should single up to either one or two lines to Buoy No. 4 and the remainder let go in the following order: No. 1, No. 2, No. 5 and finally the remaining lines on Buoy No. 4. After the lines from Buoy No. 5 have been recovered, the port anchor should be put in gear and heaving commenced as soon as the lines from Buoy No. 4 have been released. It may be necessary to use the rudder and engines to keep the vessel clear of the seaward buoys whilst the anchor is being recovered, but care should be exercised so that the vessel does not over-run the anchor. If necessary, the mooring launch could be used to nudge the buoys clear of the vessel's stern.

Also see "Shipmaster's Report" dated September 1994 and "Berthing".

Operator's Report: November 1995.

Berth	*LOA* (m.)	*Beam* (m.)	*Draft* (m.)	*Product Handled/ Remarks*
CDE Wharf	180	27.4	7.31	Black, fuel, LPG.
Falconbridge	180	26.2	8.53	Fuel oil.
Refidomsa (CBM)	170	–	9.50	White, LPG. Max. size 32,000 d.w.t. No vapour return.
Sugar Terminal	182	27.4	8.53	Black, Gas oil, Mogas.
Lubridom/CDE	170	26.0	8.83*	Lube oil.

* Draft if 15 ft. – 20 ft. off Quay. If alongside, max. draft is 21 ft.

Report: March 1996.

Refidomsa Buoy Moorings: The approximate position of this facility is Lat. 18° 24' N., Long. 70° 01.5' W.

This installation, consisting of 4 mooring buoys and 2 cargo hose pick-up buoys, off the port of Haina, is used for discharging LPG and refined petroleum products such as gasoline, diesel fuel, etc., to the shore installations of the Refineria Dominicana de Petroleo. Vessels must have a boom to handle a hose weighing about 3 tons. The moorings can accommodate vessels up to 570 ft. LOA. Vessels are docked during daylight hours only, and pilotage and mooring crew are compulsory. The Pilot boards about 1 mile South of the moorings. A tug assists on arrival, mooring vessels bow pointing towards the sea. Departure is normally without tug assistance.

Maximum draft: 31 ft. (9.5 m.) S.W.

Equipment: For discharging there is one hose to the port side, 8 in. diameter, 300 ASA for LPG. For discharging clean petroleum products, the diameter of the hose is 8 in. Ship's port crane or boom to be ready on arrival and manifold reducer fitted. Ship's crew performs connection with supervision from Terminal personnel.

Storage facilities: The storage tanks of the Refineria Dominicana de Petroleo hold LPG, gasoline and diesel oil pumped ashore by vessels from the Refidomsa Mooring Buoy.

Note: Because of the nature of this installation, there are no facilities for supplying bunkers, fresh water and other port services. Five persons from the shore remain on board for the duration of the discharge operations, and accommodation for them should be provided by the vessel.

FRESH WATER: Fresh water available by truck.

FUEL: Fuel oil, diesel and intermediate fuels available by truck. Also see "Berthing".

CONSULS: In Santo Domingo.

REPAIRS: Minor repairs in Santo Domingo.

AIRPORT: Las Americas International Airport in Santo Domingo is only 25 miles away and is served by major international airlines.

REPATRIATION: Possible.

DEVELOPMENTS: Berth under construction. On completion there will be 750 m. of berthing space for 3 Ro/Ro vessels.

Container berth under construction, length 520 m.

SHIPMASTER'S REPORT: March 1984.

Four Buoys have been installed in front of the entrance to the port and are not in line with the leading lights when entering. On the starboard side there are 2 red buoys (Fl. red) and on the port side 2 black buoys (Fl. green).

SHIPMASTER'S REPORT: March 1989.

Approaches: BA. Chart No. 471.

The approaches are as shown on the chart and in the sailing directions.

Both breakwaters are in ruins.

The buoys are unlit white drums, 3 to the East side of the channel and 3 and one half to the West side (the inner buoy on the West side has been partly destroyed), the buoy positions are not as charted.

Vessel approaches from the South on a course of 349°, with a group of 4 chimneys just to the port side of the mast. With the wind in the right direction, the smoke from these chimneys will hide the buoys until quite close.

The leading lights are in position but are difficult to see, especially the rear one, it is just as well not to use these as the leading line they give goes over the end of the Easterly breakwater.

When the buoys can be clearly seen, adjust course to line them up on each bow.

Pilots: Pilot boards from a large launch as close to the buoys as vessel is willing to come. They have VHF with working on Channel 12 and will advise when to approach. The pilots employed on this occasion were efficient.

Night Navigation: The port is closed from 1900 hrs. to 0700 hrs. as most of the lights are not working, also the buoys are unlit and are very poor radar targets.

Delays: Movements start at 0700 hrs., and depending on the number of vessels arriving and sailing, delays of 3 to 4 hours can be experienced awaiting turn for pilot.

The Agent seemed either unable or unwilling to say how vessels are given priority for movements.

Tugs: There are good tugs available in the port and the Pilot will advise on their use.

Berth: The berth used on this occasion was just inside the breakwaters on the East side and consists of 2 piers and 3 dolphins, overall length approximately 160 m. There is good fendering on all except one of the dolphins (See "Plan").

Vessel berthed starboard side to and worked Hatch No. 1 first, so it was necessary to run lines from the stern to a bollard on the breakwater.

The breakwater is in poor condition along its inside face and the bollard is hidden behind a jumble of boulders but on inspection appears to be well secured although displaced.

Long lines are needed to reach this bollard and it is possible that 2 lines may have to be joined, although they can remain in place when working Hatch No. 3 it is better to move them up to the Southern dolphin.

A dredger is working in the harbour with a floating pipeline going ashore just to the North of the Northern dolphin (See "Plan"), this pipeline and dredger seem to be a permanent fixture and to work Hatch No. 4 starboard side to, the pipeline would have to be moved.

Working Hatches No. 1, 2 and 3 starboard side to, causes no problems if the headlines are taken to the bollard ashore when working No. 3, but working Hatch No. 4 would require good weather conditions as all head lines would be leading astern.

Port side to working Hatches No. 3 and 4 would not be difficult but to work Hatches No. 1 and 2 the pipeline would have to be removed for safety of the rudder.

Preferable if using this berth to use Hatches No. 1, 2 and 3 only, although No. 4 can be worked with the vessel starboard side to.

When working Hatch No. 3 starboard side to, have fenders rigged for the fenderless dolphin.

The crane works from the dolphin at the end of the curved pier but is left in the charted position when not working.

Crane S.W.L. is 6.3 tons at 25 m. radius.

Vessel is positioned alongside with the Southern edge of the crane dolphin about 2 m. forward of the aft hatch coaming. Instructions from the dock are only that the vessel is required ahead or astern, no estimate of distance is ever given. Work is in progress on the corner of the dock, breaking down the face to insert new piles and reface the dock, if the dockside bollard is removed only Hatches No. 1 and 2 could be worked starboard side to and the vessel turned round for Hatches No. 3 and 4.

Cargo Working: The shore crane discharges using clamshell grabs into a hopper situated on the other pier. This is a three section hopper, two sections for trucks and one direct to a conveyor belt to the grain silo.

Discharging rate is good, provided trucks are available and a net rate of 177.42 t.p.h. was achieved for 3,300 tonnes of ground nut pellets discharged from 2 hatches.

Fresh Water: Available. Delivered alongside in tank trucks.

Port Officials: See "Puerto Plata".

The bond locker is not sealed.

On the first evening after berthing, a gentleman appeared requesting the Vaccination List, as one hadn't been prepared he was asked to return next day. The lists were prepared but he never returned.

Departure Clearance: A search of the vessel, including accommodation and engine room is made by 6 port guards, each of which requires a crewman to accompany him.

This search is thorough and worthwhile as stowaways can easily get on board from the beach without having to enter the docks through the gate.

When the search is complete, clearance is issued.

SHIPMASTER'S REPORT: September 1994.

Vessel (On arrival):

LOA: 226.25 m.
Breadth: 32.2 m.
Depth: 19.6 m.
Cargo onboard: 24,995 tonnes of fuel oil.
D.w.t.: 31,749 tonnes.
Displacement: 45,905 tonnes.
Draft: Forward 26 ft. 9 in., aft 27 ft. 2 in.

Restrictions for Rio Haina:

(AA) Max. draft: 29 ft. Fresh water and even-keel.
(BB) No max. length given. When asked, Pilots/Port did not have a dedicated figure. Pilots/Port said vessel was OK for berthing.
(CC) Tankers only berth/unberth in daylight.

Vessel arrived on 1st September at 0230 hrs. Pre-arrival ETA's and messages to Agents had not been acknowledged by them. Called Pilots/Port on VHF prior to arrival, and after arrival, but no reply until 0530 hrs., when we were advised that the Pilot would board at 0700 hrs. at the Pilot Station, which is about 3 nautical miles South of the port.

Pilot boarded at 0724 hrs. His knowledge of English was limited, but sufficient.

We entered the harbour through the entrance (buoyed channel), came astern on the engines, dropped starboard anchor, and the tugs manoeuvred vessel alongside.

As per plan, our berth was just inside the entrance. Sufficient speed is required to pass through the narrow entrance channel (the tugs wait inside for the ship) followed by the need to stop as quickly as possible (There was about 10 m. clearance either side of the ship when passing the entrance buoys). Therefore as soon as we were inside the harbour, it was engines up to full astern and drop the starboard anchor. The 2 tugs (3,000 h.p. each) then attended to assist in working us alongside, although neither made fast. Ship's engines and anchor were utilised in conjunction with the tugs to bring the ship alongside.

The jetty was of solid concrete construction, fitted with large tyre fenders only. It was important to bring the vessel slowly and squarely in to the jetty to prevent any part of the ship falling in between the fenders and contacting the jetty.

Approaching the berth, a mooring boat attended to assist in running lines. The first lines were head lines.

Final moorings were as per plan.

Once in position, the forward part of the vessel was ahead of the forward end of the jetty, and the head lines really were more like breast lines. All line handling ashore was by "hand power", but there was sufficient manpower to enable the job to be done in a reasonable time.

Once alongside, the anchor was slacked until there was no weight on the cable. At this time, there were 4 shackles on deck. We expressed our concern that the anchor itself was stuck out in the middle of the harbour with ships passing over it. Pilot said all was OK and no other deep draft vessels would be passing over it during our stay.

Wind was N.N.E. to East during our stay, which kept vessel nicely alongside in conjunction with the moorings.

1×8 in. hose was connected.

The ship's accommodation ladder was lowered to the jetty for access.

Ratguards were fitted to all moorings, and hawse pipe guards were in place.

Agents, Authorities, surveyors, etc., were all friendly, and no problems were encountered.

The Agents advised they could be contacted via VHF, or could be telephoned from the Pilot's office, which was about 200 m. from the ship.

Two shore police officers were arranged by the Agent for security. These turned out to be useful, as during the first night alongside there were 2 separate instances of thieves climbing the mooring ropes and gaining access to the main deck. Fortunately on both occasions they were spotted by ship's staff and shore security, and they quickly fled, once they realised they had been discovered.

Shore maximum back pressure allowed was 10 kg. Average discharge rate was 4,800 bbls./hr. The shore line was 10 in. and discharge was into 2 shore tanks. The tanks were 0.6 km. away and at a height of 42 ft. above sea level. Communications with the shore were verbally across the dock.

Prior to departure, shore police boarded the vessel to carry out a stowaway search. The Pilot did not board until they had completed this search and cleared the ship. Ship's staff also carried out their own search.

On departure, all lines were let go and the anchor heaved in, which pulled the ship off the berth. The Pilot taking us out was the son of the Pilot who had brought us in. His English was very good. To prevent the stern swinging in to the jetty, engines and rudder were also used. The two 3,000 h.p. tugs attended but did not make fast. The vessel went ahead to the widest part of the harbour (See "Plan") and turned to port, with one tug forward and one tug aft pushing. Engines were utilised to keep the vessel positioned during the turn. The bow of the ship passed approximately 20 m. clear of the adjacent jetty, although there was some more room to play with aft. Once turned around, the tugs stood-off and the ship gathered speed to transit the channel. Once clear, the Pilot disembarked.

AUTHORITY: Autoridad Portuaria Dominicana, Margen Oriental, Puerto de Haina. *Tel:* (809) 537-7201. *FAX:* (809) 535-8926. *Contact:* Port Manager.

AGENT: See "General" before first port.

SAMANA (Puerto Duarte or Arroyo Barril): 19.12 N. 69.26 W.

See "General" before first port.

The port Samana is known by several other names. It is sometimes called Puerto Duarte, at other times El Botado, and occasionally Arroyo Barril, because there is a landing strip of this name nearby.

PILOTAGE: The Pilot and Harbour Master can be contacted by VHF Channel 16. The Pilot will board at Punta Balandra. The entrance channel is marked with 8 buoys. Pilot Tel: (809) 538-2283.

ANCHORAGE: Deep water anchorage is available at several places in Samana Bay, but it is highly recommended that the local Pilot be consulted before anchoring.

RESTRICTIONS: Day and night entry is possible.

MAX. SIZE: LOA 700 ft., beam 120 ft. and draft 34 ft.

TUGS: None available locally. Tugs must come from Puerto Plata or Santo Domingo, if required.

BERTHING: *Arroyo Barril Berth:* This finger pier is 230 m. (755 ft.) long and approximately 25.5 m. (84 ft.) wide and was built in the mid-1970's, primarily as a passenger terminal for the development of Samana Bay as a tourist destination. The pier can accommodate vessels on each side. Access ramp connecting the pier to the shore is 350 m. long and 13.5 m. wide. Mostly refrigerated and dry cargo containers handled now at this facility, although occasionally some palletised and loose cargo moved.

Maximum draft: 34 ft. (salt water).

Storage facilities: An enclosed shed of 2,200 sq.m.

Equipment available: Forklifts, mobile crane and some other equipment available. Contact Agent for details.

STEVEDORES: *Working Hours:* Straight time working hours are 0800 – 1200 hrs. and 1400 – 1800 hrs. Mondays through Fridays, and 0800 – 1200 hrs. on Saturdays, except official holidays. Work may be ordered at overtime rates on holidays and around the clock, except on major holidays (New Year, Easter, Christmas, etc.). For ordering of gangs and stevedoring rates, contact Agent.

MEDICAL: First aid and emergency treatment only. Further treatment available in San Francisco de Macoris, about 1 hour's drive by car.

DENSITY: 1025.

FRESH WATER: Available on pier. Rate 6 t.p.h.

FUEL: Available by tank truck from Santo Domingo. For prices and conditions, contact Agent.

CONSULS: At Santo Domingo.

REPAIRS: No facilities for repairs.

AIRPORT/REPATRIATION: Las Americas International and La Union International in Santo Domingo and Puerto Plata respectively are approximately a 4-5 hours' drive by car.

GENERAL: *Chart:* No. 917.

AUTHORITY: Harbour Master. *Tel:* (809) 538-2214.

Port Manager. *Tel:* (809) 223-0071.

SAN PEDRO DE MACORIS: 18.26 N. 69.18 W.

See "General" before first port.

PILOTAGE: ETA required 24 hours before arrival. Pilot meets vessels 0.5 miles from buoy. Pilot Radio Station frequency is 2738 and 2638 also VHF Channel 16. In the event of bad weather vessel should remain 3 miles South of the buoy. Pilot boards from small unmarked motor boat.

ANCHORAGES: One mile South of the lighthouse; depth 60 ft. Pilot will advise best location if requested.

RESTRICTIONS: Channel depth 28 ft. Up to 480 ft. length, no restrictions. Arrival and departure in daylight hours only.

MAX. SIZE: LOA 650 ft., beam 100 ft. and draft 24 ft.

Larger vessels leaving port after loading may require to use port anchor to manoeuvre around sharp bend in buoyed channels just inside harbour entrance.

HEALTH: In case of illness or death on board, send a cable before arrival; doctors available.

RADIO: Radio Station, frequency 2738, call Radio Pilot de San Pedro de Macoris.

TUGS: Compulsory. Tug joins vessel inside the port – 150 ft. from the quay. One tug 500 hp.

BERTHING: *Berth No. 1:* This pier is 260 m. (850 ft.) long. However, about 100 m. – 150 m. of its length is occupied by a floating dry dock, Dominican Navy vessels and other equipment. This pier can accommodate several vessels simultaneously, and is used primarily to load sugar for export; it is also used by vessels loading molasses in bulk and for discharging bulk liquid petroleum products.

Maximum draft: 25 ft. (brackish water) about 6.0 m. from the pier, and 23 ft., about 3.0 m., from the pier. Alongside there is 18 ft. of water only, due to sedimentation by the river.

Storage facilities: There is a general cargo shed alongside, but it is not presently in use.

Equipment: Because of the limited operations at this port, most equipment must be transported from other ports.

Berth No. 2: This berth is 183 m. (600 ft.) long, and is used to export molasses, but primarily bulk clinker and coal are discharged into 2 movable hoppers by self-discharging vessels. The berth can also be used for general cargoes.

Maximum draft: Recently dredged to 26 ft. (brackish water). However, experience shows maximum safe draft to be about 24 ft.

Storage facilities: None, except the pier itself is used for discharging bulk coal and clinkers as described above.

Equipment: See "Berth No. 1".

Berth No. 3 (Ferquido): This berth is 262 m. (860 ft.) long. Ferquido has 4 small hoppers on the pier for discharging bulk fertiliser, and these are connected by conveyor belts to their fertiliser mixing and bagging plant. This berth is almost exclusively used for discharging bulk fertiliser and loading in bags, although it can be used for general cargoes.

Maximum draft: 22 ft. (brackish water). Bottom is soft mud.

Storage facilities: Ferquido has its own large warehouse for both bulk and bagged fertilisers.

Equipment: Ferquido uses small grabs at the end of ship's gear, and can work up to 4 gangs. Depending on the number and capacity of the vessel's gear, they achieve an average discharging rate of between 1,000 – 2,000 tonnes/day.

Large vessels arriving to load swing inside the harbour using starboard anchor and berth port side to quay. At a later date barges are placed between the ship and quay, to permit greater draft, and Pilot receives extra payment for doing so. Use of gangway is recommended.

LOADING: Vessels loading sugar use ship's gear and ship has to supply rope slings. The chains on the centre sections of MacGregor hatches are broken, and a gap of about 2 ft. made, through which the bags of sugar are bled into the holds at the rate of about 220 tons per gang per day. Only 6 bags per sling are lifted at a time. Stevedores cover hatch openings with tarpaulins when loading is completed for the day. They will make up any extra slings that are required if ship supplies rope.

STEVEDORES: *Working Hours:* Straight time working hours are 0800 hrs. – 1200 hrs. and 1400 hrs. – 1800 hrs. Mondays through Fridays. On Saturdays, half-day is worked from 0800 hrs. – 1200 hrs. Except on major holidays (New Year's, Easter and Christmas), overtime may be ordered on all days and work can be done around the clock and on weekends.

MEDICAL: Full medical facilities available.

TANKERS: Oil line diameter 8 in. Max. pressure 60 p.s.i.

FRESH WATER: Due to low water pressure and limited extension of pipeline, a pump and long water hose are required. This can sometimes be hired locally. Alternatively, fresh water can be supplied by tank truck.

FUEL: Fuel and diesel oil must be transported by tank truck from Santo Domingo. The trucks carry either 5,000 or 10,000 American gallons. For information and prices contact Agent.

Note: Presently not available for ships, due to local shortage.

CONSULS: In Santo Domingo.

REPAIRS: Minor repairs only.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Crew.

CUSTOMS ALLOWANCES: Only sufficient for port consumption. Allowed take only 2 open packets cigarettes ashore.

REPATRIATION: Can be arranged.
AIRPORT: Las Americas International Airport (Santo Domingo) 30 km. (30 minutes by car).
TELEPHONES: No telephones on board.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required.
REGULATIONS: Rat guards to be fitted on all ropes. No boats to be lowered without official permission.
AUTHORITY: Comandante de Puerto. Tel: (809) 529-3383.
Port Manager. Tel: (809) 529-2093.

AGENT: See "General" before first port.

SANTO DOMINGO: 18.28 N. 69.53 W. (See Plan)

See "General" before first port.
PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Agents can be contacted by radio telephone, frequency 2738, 2182, and 2638 kHz. Pilot boards 1.5 miles off breakwaters. Pilot also on VHF Channels 12 and 16.
ANCHORAGES: Deep water anchorage available outside port. Pilot will advise best location.
RESTRICTIONS: Limited entry and departure during night-time at Pilot's discretion and usually requiring bonus to Pilot. Vessels with deep draft or other special conditions usually not handled after dark.
MAX. SIZE: LOA 750 ft., beam 100 ft., draft 29 ft.
Also see "Berthing".
HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.
RADIO: When within range, Santo Domingo Radio.
TUGS: Tugs are available and compulsory for docking und undocking inside the harbour. They will also join vessel outside for an additional fee, if required. Two tugs are usually available with maximum 1,200 h.p. A tug of 2,000 h.p. can be brought from Rio Haina, upon request and minimum 36 hours prior notice.
BERTHING: *General Cargo Berth No. 1:* 280 m. (910 ft.) in length. Containers, trailers and general cargo are mostly discharged at this berth.
Maximum draft: 27 ft. (bracking water, but nearly salt water).
Storage facilities: Enclosed Shed No. 1, operated by the Port Authority, 243 m. × 37 m. with approximately 9,000 sq.m. storage capacity. Also open container and trailer yard and space for motor vehicles.
Equipment: Forklifts of 4.5 tons, 6 tons and 10 tons. Motor cranes and other heavy equipment may not be used at this berth, due to the poor structural condition of the pier.
General Cargo Berth No. 2: 77 m. (253 ft.) in length. Containers and general cargo are handled at this berth.
Maximum draft: 16 ft. (brackish water about 1020).
Storage facilities: Enclosed Shed No. 2, operated by the Port Authority, is 140 m. × 24 m. with approximately 3,360 sq.m. storage capacity. Limited space in open yard for containers.
Equipment: See "Berth No. 1".
General Cargo Berth No. 3: The berth is 167 m. (548 ft.) long. This berth is used for loading and discharging containers and breakbulk general cargo.
Maximum draft: 19 ft. (brackish water).
Storage facilities: Shed No. 3, operated by the Port Authority, is 155 m. × 19 m. with approximately 2,900 sq.m. storage capacity. Open yard for containers, trailers, vehicles and breakbulk cargo not requiring warehousing.
Equipment: Motor cranes may be used for cargo handling.
Forklifts of 4.5, 6 and 10 tons capacity are available.
General Cargo Berth No. 4: This berth is 290 m. (951 ft.) long. The berth is used for trailers, containers and general breakbulk cargo.
Maximum draft: 19 ft. (brackish water).
Storage facilities: No shed available at this berth. At additional cost and with some delays, one of the nearby sheds may be used for covered storage. Open storage available for trailers, containers, etc.
Equipment: See "General Cargo Berth No. 3".
General Cargo Berth No. 5: This berth is 379 m. (1,243 ft.) long, and is being converted for passenger cruise vessels only, and is not available for any cargo vessels.
Maximum draft: 13 ft. (brackish water).
General Cargo Berth No. 6: This berth is 125 m. (410 ft.) long, and is used by tankers to discharge petroleum products for the electric utility company.
Maximum draft: 19 ft. (brackish water).
Storage facilities: None.
Equipment: See "General Cargo Berth No. 3".
General Cargo Berth No. 7: This berth is 150 m. (492 ft.) long, and is used by yachts and other small craft.
Maximum draft: 16 ft. (brackish water).
Sans Souci Passenger Terminal: This berth is 300 m. (984 ft.) long. It is located on the Eastern bank of the Ozama River, and passengers are transported by bus or taxi to the Colonial Centre of Santo Domingo, which is about 3 km. from Sans Souci.
Maximum draft: 28 ft. (brackish water).
Facilities: The Sans Souci Terminal was built in the mid-1970's and is operated by the Port Authority. Arrangements can be made for arriving/departing passengers.

BULK HANDLING FACILITIES: *Molinos Dominicanos:* A private berth belonging to the local flour mill of the same name located on the Eastern bank of the Ozama River. It is a berth used exclusively for bulk cargoes, mostly wheat, but occasionally corn and other grain and grain products. Maximum vessel size is about 700 ft. LOA and 100 ft. beam. This berth consists of dolphins with the stationary pneumatic discharging equipment and conveyor system in the middle on a tower platform.
Maximum draft: 27 ft. (brackish water).
Storage facilities: Molinos Dominicanos has silo storage for about 90,000 tonnes of grain which are fed by a conveyor belt directly from the vessel alongside.
Discharging Equipment: Vessels are discharged with stationary pneumatic equipment (3 suckers), and the ship must be warped by the crew to position each hoid which must be discharged. Average discharging between 75-88 tonnes per hour worked, depending on configuration of the vessel, etc. Ship's gear is not used, nor any other equipment. Power failures frequently affect the number of hours worked, and hence the discharging rate.
Bunkers: No delivery of bunkers at this berth, because tank trucks cannot reach the vessel alongside. If emergency bunkers are required, an appropriate layberth must be arranged.
Working hours: The flour mill works 24 hours a day, on weekends and most holidays (excepting New Year's, Easter, Christmas) receivers paying for all overtime expenses. Most common interruptions are power failures and when shifting (warping by ship's lines) from one hold to another.
Pronalba Bulk Cargo Berth: This facility is a private installation owned by the Lavador Group of companies, and used for discharging their own dry and liquid bulk cargoes. It is used for handling tallow, caustic soda, liquid fat, etc., as well as feed grain ingredients such as corn, soybeans, soybean meal, peanut meal, etc. The berth is designed to accommodate vessels of up to 400 ft. LOA, and has a small central pier of approximately 25 m. length and 12 m. width and 3 dolphins for tying up the vessel. The vessel is warped alongside in order to shift discharging from one hold to another. This berth is on the Eastern bank of the Ozama River, about 2 miles from the entrance to the port. There is an air draft restriction of 100 ft. due to bridges en-route upriver.
Maximum draft: 16 ft. (fresh water).
Storage facilities: Pronalba and Industrias Lavador have their own silos, warehouses and tanks for about 10,000 tonnes of dry bulk cargoes, and 5,000 tonnes of liquid bulk cargoes on the premises.
Equipment: Pipeline from the berth to the tanks for the liquid bulk cargoes. Dry bulk cargoes are discharged with a portable SKT conveyor which is attached either to the ship's gear (if of sufficient capacity, i.e. 10 tons) or handled by a motor crane hired for the purpose. Average rate of discharge with this equipment from 20-50 tonnes/hr., depending on the type of grain or meal being handled.
Working hours: Tankers may pump 24 hours around the clock, including Sundays and holidays without restrictions. Dry bulk cargoes are usually worked 24 hours around the clock including Sunday and holidays, with receivers paying the overtime differential.
Granja Mora Bulk Cargo Berth: This private installation is located on the East bank of the Ozama River, a little over one mile from the entrance to the port. The berth is 130 m. long, composed of a central platform 15 m. × 12 m., and 2 dolphins. Maximum LOA 350 ft. and beam of 60 ft. is permissible. The channel has about 20 ft. depth, brackish water. Air draft restricton is 100 ft. due to bridges encounted en-route.
Maximum draft: 16 ft. (brackish water).
Storage facilities: Granja Mora has grain silos on the premises holding approximately 6,000 tonnes of corn; these, however, must be fed by trucks, as there is no conveyor belt system from ship's side to the silos. There is also a tank farm for bulk liquids. Vessel needs about 60 ft. of hose. Granja Mora's intake is 4 in. diameter.
Equipment: Due to the difficulty of access, it is very difficult to bring motor cranes or other large equipment to this berth. Discharging is ideally with ship's gear. Small grab buckets may be hired for this purpose as well as small payloaders. There is no hopper available at this facility.
Working hours: See "Pronalba Bulk Cargo Berth".
Agrotech Bulk Cargo Berth: This private facility is located on the Isabela River (a tributary of the Ozama) about 4 miles from the entrance to the port of Santo Domingo. It is used for the discharging of bulk cargoes only. The berth has a central platform of about 10 m. in length with dolphins used to tie up the vessel. Maximum LOA is 300 ft. and beam 50 ft. Air draft restriction is 100 ft. due to bridges en-route to the berth.
Maximum draft: 12 ft. (fresh water).
Storage facilities: Small private silos for storage of corn and soybean meal holding about 6,000 tonnes.
Equipment: Receivers hire a small motor crane with grab bucket for discharging, as well as small payloaders for handling the cargo in the vesssel's holds. Discharging is into a hopper on the pier, which feeds a conveyor belt to the silos.
Working hours: See "Pronalba Bulk Cargo Berth".
General: This berth is not being used very frequently due to the draft restriction and difficulty of access. Usually no tugs are available here. This berth is sometimes used, as well as several others nearby, either for topside repairs to small vessels or for cutting up hulls.

BRIDGES: Vessels proceeding up river, height limited to 95 ft. above waterline.

STEVEDORES: ETA's required 24 and 12 hours before arrival to arrange gangs.
Working Hours: Straight time working hours are 0800 hrs. – 1200 hrs. and 1400 hrs. – 1800 hrs. Mondays through Fridays, and 0800 hrs. – 1200 hrs. on Saturdays, excepting official holidays. Work may be ordered at overtime rates on holidays and around the clock, except on major holidays (New Year's, Easter, Christmas). For ordering gangs contact Agent.

MEDICAL: Medical attention can be arranged after vessel is cleared, preferably ashore.

TANKERS: *Sans Souci Liquid Bulk Cargo Berth:* This berth, sometimes referred to as Punta Torrecilla, is located in Sans Souci on the Eastern bank of the Ozama River nearest to the harbour entrance. It is approximately 300 m. (984 ft.) long and fendered by 3 floating (10 m. × 10 m.) pontoons. This berth is used exclusively for discharging liquid bulk cargoes to several tank farms located at Punta Torrecilla, about 1 km. East. Mostly tankers call here to discharge petroleum products, including fuel and diesel oil, lubricating oils, asphalt products, etc. Access to this area is restricted, because a small Dominican Naval Base and officers' club are located at the Eastern tip, and all traffic must pass through these installations.

Maximum draft: 29 ft. (brackish water).

Storage facilities: Tanks for petroleum products located at Punta Torrecilla owned by the major oil companies with various capacities.

Equipment: 5 in. pipeline with connecting valves and accessories is used by tankers to pump liquid petroleum products ashore to Punta Torrecilla. No other shore equipment available.

Also see "Bulk Handling Facilities".

DENSITY: Brackish inside harbour. Effect of tide negligible.

FRESH WATER: Available by pipeline or trucks.

FUEL: Available by truck at most berths.

CONSULS: All Consuls at Santo Domingo.

REPAIRS: Minor repairs only.

DRY DOCK: Can accept vessels up to 400 ft. long, 50 ft. beam and 20 ft. draft.

GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.

OPENING/CLOSING HATCHES: Performed by crew or stevedores.

CUSTOMS ALLOWANCES: Bond stores are sealed.

REPATRIATION: Can be arranged.

AIRPORT: Las Americas International Airport is 18 miles from port; served by regular airlines with numerous flights daily.

POLICE/FIRE/AMBULANCE: Police, San Domingo 682-3000; Ambulance, San Domingo 682-4288; Fire, San Domingo 682-2000.

TELEPHONES: No connection to vessels.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.

GENERAL: No boats to be lowered without official permission.

DEVELOPMENTS: Santo Domingo's Sans Souci Tourism Wharf, phase 1, is now under construction on the Eastern side of Santo Domingo harbour.

Phase 1 of the project comprises the construction of a dock with a platform measuring 250 m. in length by 31.40 m. in width. Totally made out of precast prestressed concrete members, it is designed to accommodate simultaneously two 20,000 metric ton displacement passenger ships or one of 50,000 metric tons. Besides the dock itself, there is a 20,000 sq. ft. passenger terminal building to be built which will be equipped with all the services and facilities necessary to allow cruises to originate in the new port.

Also under construction is a 1,000 metric ton potable water reservoir with a 50,000 g.p.h. pumping station.

The site selected, the Eastern shore of Ozama River, is 15 minutes by car from Santo Domingo's Las Americas International Airport.

The entire harbour will be dredged to a minimum depth of 35 ft. below mean sea level.

The Sans Souci Tourism Wharf completed. Depth 28 ft.

Phase 2 and Phase 3 consist of berthing facilities for one 20,000 metric ton displacement passenger ship each; construction of these additional berths has not yet been ordered by the Government.

AUTHORITY: Capitania de Puertos. Tel: (809) 593-5904.
Port Commandant. Tel: (809) 682-5260.
Port Manager. Tel: (809) 682-8792.

AGENT: See "General" before first port.

Ecuador

GENERAL (See Plan)

REPORTING:

Shipmaster's Report: January 1989.

The following telex was received whilst on passage to Ecuador.

REPORTING SYSTEM IN ECUADORIAN WATERS

Re: Resolution 088-87 – Comando de Guardacostas (COGUAR).

As per 1st July 1987, all vessels have to comply with Resolution 088-87, published Registro Oficial 8/6, i.e.:

– to report to Coast Guard (COGUAR) via coastal station "Guayaquil Radio" (HCG) on international frequencies MF and HF:

Arrival (FR), Position (PR), Sailing (SP), Passing (Paso Inocente) (WP) with following formats:

ARRIVAL:

Shiprep

(a) FR (for arrival).
(b) Vessel's Name/Flag/Call Sign.
(c) Date + Local Hour. (6 figures)
(d) Last port.
(e) ——
(f) Actual course. (3 figures)
(g) Speed in knots. (2 figures)
(h) Next port. (Ecuador)
(i) ETA Ecuadorian Port. (Day/Hour/Min. – 6 figures)

SAILING:

Shiprep

(a) SP. (for sailing)
(b) Vessel's Name/Flag/Call Sign.
(c) Date + Local Hour. (6 figures)
(d) Next port.
(e) 4 figures for Lat. (N or S) + 5 figures for Long. (E or W).
(f) Actual course. (3 figures)
(g) Speed in knots. (2 figures)
(h) Last port.
(i) ETA next port.

POSITION:

Shiprep

(a) PR. (for position)
(b) Vessel's Name/Flag/Call Sign.
(c) Date + Local Hour (6 figures)
(d)
(e) 4 figures for Lat. (N or S) + 5 figures for Long. (E or W).
(f) Actual course. (3 figures)
(g) Speed in knots. 2 figures)
(h)
(i)

PASO INOCENTE:

Shiprep

(a) WP. (for paso inocente)
(b) Vessel's Name/Flag/Call Sign.
(c) Date + Local Hour. (6 figures)
(d) Last port.
(e) 4 figures for Lat. (N or S) + 5 figures for Long. (E or W).
(f) Actual course. (3 figures)
(g) Speed in knots. (2 figures)
(h) Next port.
(i) ETA next port.

The timing for the messages has to be done as follows:

FR – Entering the national waters, latest 12 hours before arrival at the port.
SP – Immediately after sailing.
PR – Twice daily, at 0800 hrs. and 2000 hrs.
WP – 3 hours before entering and 3 hours before leaving Ecuadorian waters.

Scope/area involved according Resolution 088-87:

Entering the 200 miles of territorial seas and the waters between the mainland and the Galapagos Islands.

Shipmaster's Report: June 1995.

Ecuador has a compulsory Ship Reporting Scheme, details as per A.L.R.S. Vol. 1, Part 2 (NP281(2)). Reports required 3 hours before entry, and departure from Ecuador waters, boundaries are Lat. 01° 25' N., and Lat. 03° 25' S. All messages addressed to "Coastguard (COGUAR)" via telex No. 00 308 43325. All messages went through first time.

NON-COMPLIANCE WILL PROVOKE FINES

DOCUMENTS:

Consular Documents:

In the port of origin of the voyage to Ecuador or in the last foreign port where there is a Consulate before the vessel's arrival in the country, the following documents are to be submitted to the Consul for approval on model forms DIMERC 100 to 107, in 5 copies:

(a) Cargo Manifest.
(b) Crew List.
(c) Passenger List or "No Passenger" Declaration.
(d) In-transit Passenger List or "No In-Transit Passenger" Declaration.
(e) Ship's Stores List.
(f) Crew's Effects Declaration.
(g) Maritime Health Declaration.
(h) Mail List.

The original set of these documents remains on board the vessel, the duplicate and triplicate are submitted to the Customs Administration, if they refer to cargo, and to the Captain of the Port, if they refer to the crew or passengers. The quadruplicate is sent to the Ministry of Foreign Affairs, and the quintuplicate remains in the Consul's files.

Prior to Arrival:

Arrival Notice: 72 hours before the vessel's arrival in the pilot waiting area, the shipping agency shall submit to the Port Authority the arrival notice form, on a special port format or its own format, containing basic data on the vessel and the request for services (pilotage, towage, berthing, etc.).

The vessel's arrival time should be communicated to the following authorities 24 hours in advance: Captain of the Port, Customs, Customs Police, Migration and Maritime Health.

Information on cargo for the port: The agency shall submit to the Port Authority the following documents by the deadlines indicated:

(a) General Import Cargo Manifest, in triplicate	24 hours before start of operations
(b) Import Bill of Lading, complete set	At the time operations start
(c) Cargo Stowage Plan by hatch	24 hours before start of operations
(d) Cargo List (breakdown of cargo)	24 hours before start of operations
(e) Container Contents List	24 hours before start of operations
(f) Dangerous Cargo List	48 hours before vessel's arrival in the pilot waiting area
(g) Tally books, 15 copies (must be true copy of Bills of Lading and have an alphabetical index)	6 hours before start of operations.

On Arrival:

On entrance of the vessel, the following documents should be submitted on DIMERC forms 100 to 107, which, although they follow LAFTA/OAS forms 1 to 6, differ from them in that they bear the seal of Ecuador and must satisfy the following requirements:

Type of Documents	*Number and Distribution of Documents*					
Basic Forms:	*Captain of Port*	*Customs Police*	*DIMERC*	*Migration*	*Maritime Health*	*Total*
1. General Declaration	1	1	–	–	–	2
2. Cargo Manifest	1	2	1	–	–	4
3. Crew Roll	1	2	–	1	1	5
4. Passenger List (a)	1	2	–	1	1	5
5. Ship's Stores (b)	1	2	–	–	–	3
6. Crew's Effects Declaration (c)	–	2	–	–	–	2
7. Maritime Health Declaration (e)	–	–	–	–	1	1
8. Mail List	–	2(d)	–	–	–	2
Additional Documents:						
9. Clearance Permit from Last Port	1	–	–	–	–	1
10. In-transit Cargo Manifest	1	1	1	–	–	3
11. "No Passenger" Declaration	1	2	–	1	1	5
12. "No Passenger" Declaration or In-transit Passenger List	1	2	–	1	1	5
13. Cargo Manifest (e)	–	2	–	–	–	2
14. Crew List (e)	2	–	–	–	–	2
15. Passenger List (e)	2	–	–	–	–	2
16. Ship's Stores (b)	–	2	–	–	–	2
17. Crew's Effects Declaration (c)	–	2	–	–	–	2
18. Maritime Health Declaration	–	2	–	–	–	2
19. Mail List (e)	–	2	–	–	–	2
20. Cargo Bill of Lading	–	–	1 set	–	–	1 set
21. Passengers' Baggage List	1	2	–	–	–	3
22. List of Unaccompanied Baggage or "no baggage list"	1	2	–	–	–	3

(a) Does not indicate sex.
(b) Has additional column for storage place.
(c) Omit crew signature column.
(d) One copy for the Postal Service.
(e) With Consular visa.

Prior to Departure:

Before departure, a complete set of the general export cargo manifests and a complete set of the export loading bills of lading are submitted to the Port Authority.

Clearance of vessel shall be requested from the Captain of the Port on a special form, which is submitted in 2 copies, each of which is to be accompanied by the following documents:

General Declaration	1
Crew List	1
List of Passengers or "No Passenger" Declaration	1
Stores List	1

The Captain of the Port returns to the ship the original clearance permit, duly certified, and retains one copy for his file.

In addition, 2 hours before departure, a clearance form must be submitted to the Customs Police, and a list of embarked passengers or a "No Passenger" declaration and a list of crew changes is to be submitted to Migration.

PRATIQUE: Radio Pratique is not normally granted. Notice of arrival should be given at least 24 hours prior to arrival to Radio Naval Guayaquil, call sign HCG. Listens on 500 kHz, 8,385 kHz and 8,320 kHz. Answers back on 8,472 kHz and 8,475 kHz.

The message should read as follows:

CAPUERTO
MEDICO SANIDAD
ADMINISTRADOR ADUANA followed by name of port
IMMIGRATION

"vapor . . . 1 . . . 2 . . . procedente . . . 3 . . . no enfermos abordo, no explosivos, no pasajeros para . . . 4 . . . pasajeros en transito . . . 5 . . . tons carga para descargar . . . 6 . . . sacos correo para descargar eta boya . . . 7 . . . agencia . . . 8 . . . 9 . . . Capitan. or in translation (original must be sent in Spanish).

SS . . . 1 . . . 2 . . . from . . . 3 . . . no sick on board, no explosives, no passengers for Guayaquil (or name of port) . . . 4 . . . passengers in transit . . . 5 . . . tons cargo to discharge . . . 6 . . . bags of mail to unload ETA Sea Buoy . . . 7 . . . Agency . . . 8 . . . 9 . . . Captain.

1. Name of the vessel.
2. Nationality of the vessel.
3. Last port and port of call.
4. Number of passengers in transit (logically, if there are passengers for the port call, instead of saying (no pasajeros para . . . the correct number would be indicated).
5. Number of weight tons of cargo for the port.
6. Number of bags of mail.
7. Estimated hour of arrival at Sea Buoy, or Buoy No. 1 off Data.
8. Agent's name.
9. Master's name.

The same message should be sent to the ship's Agent.

When quoting arrival times use GMT or Ecuadorian Time (GMT minus 5 hours). Summer time is not kept.

The boarding party usually arrives on berthing.

The Vaccination Certificates should be ready in the same order as the Crew Lists.

FLAG: The national flag has yellow, blue and red horizontal stripes. The yellow is twice the width of the others. Government vessels show the National Arms in the centre of the flag.

All foreign vessels will fly the flag from the highest mast.

PILOTAGE: Pilotage is compulsory for all vessels over 500 tons gross. Vessels should await the Pilot off the Sea Buoy at all ports unless instructed to the contrary. The Pilot must be requested by the Agent at least 12 hours in advance. They are available 24 hours a day, every day of the year.

STEVEDORES: The stevedores are drawn from the 4 respective unions in rota. The foremen are generally selected by the Agent. The same gang will work the ship until completion, working around the clock if necessary. Gangs will start work at virtually any hour.

Opening and closing of ship's hatches is undertaken by the stevedores and also the rigging of gear. Even though the stevedores receive payment for rigging anyway, it is advisable to use the ship's crew.

Cold fresh water and lavatories must be made available to the stevedores.

Tally clerks are selected in a similiar way to the stevedores.

WATCHMEN: 1 or 2 Customs guards will remain on duty, nevertheless the use of watchmen is advised.

GARBAGE: Before docking all vessels should cover all discharge points to prevent material or water being deposited on the quayside. The dumping of any waste is strictly forbidden except in an emergency. No oil may be dumped within 50 miles of the coast, and Ecuador strictly enforces the Anti-Pollution laws.

RAT GUARDS: These must be placed on all mooring lines while the vessel is in port. This rule is strictly enforced.

FIRE DRILL: Periodical fire drills are held. The signal is 6 short blasts. Smoking on dock is prohibited, and cigarettes must not be thrown through port holes.

CREW: Shore leave is permitted except at the tanker berths. Each man must carry an identity card. It is difficult to sign on a foreign crew member in Ecuador, unless he has been left behind by another company vessel. A visa is not required for replacements arriving from abroad, but the crew member must have a Passport or Seaman's Book, together with a letter from the ship operator stating name of vessel to be joined.

In declaring personal effects, all new purchases must be listed, as well as electrical devices, typewriters, sextants, etc.

The Master has the right to issue or annul boarding passes if he has the approval of the Port Authority.

As a rule visitors are not allowed entry to the Port Area, although special permits are given to certain vendors. They may come on board solely at the discretion of the Master.

PIRACY: Acts of piracy have taken place on vessels alongside in the Port of Quayaquil.

BALAO TERMINAL : 01.02 N. 79.44 W. (See Plan)

LOCATION: The Terminal Petrolero de Balao is comprised of the area between the following geographical co-ordinates:

Lat. 00° 55' 00" N, Long. 79° 40' 00" W.
Lat. 01° 04' 00" N, Long. 79° 40' 00" W.
Lat. 00° 55' 00" N, Long. 79° 46' 00" W.
Lat. 01° 04' 00" N, Long. 79° 46' 00" W.

The Terminal Petrolero de Balao consists of 2 mooring areas: The SBM area for loading crude oil; and the TEPRE area for loading refined products.

The terminal has a storage area for crude oil situated on a hill 180 m. above sea level made up of 9 storage tanks that constitute the final leg of the Trans-Ecuadorian Oil pipeline.

Each of the tanks has a 332,000 barrel capacity (or 13,524,000 gallons, 42 gallons per barrel). The tanks are 18 m. high and 60 m. in diameter.

Manifolded to each tank are 2 pipes that gravity feed the SBM's. One is 42 in. in diameter and the other 36 in.

The Offshore Terminal at Balao is made up of 2 SBMs nominated "X" and "Y" Buoys and a terminal for refined products (TEPRE).

Relative Location: "X" Buoy (SBM – West) designed for ships up to 100,000 d.w.t., is located 4.5 miles N.W. of the mouth of the Esmeraldas River (Rio Esmeraldas). "Y" Buoy (SBM – East), designed for ships up to 100,000 d.w.t., is situated 3.3 miles from the coast at its closest point and 1 mile on True bearing 081° from "X" Buoy. Both are at a minimum depth of 120 ft. LWS.

Tankers with a maximum of 1,000 ft. between perpendiculars, a maximum beam of 135 ft., and a maximum draft of 52 ft., can moor at the buoys. There should be between 400 ft. and 525 ft. between the bow of the tanker and the underwater manifold.

The TEPRE area is composed of a Conventional Buoy Mooring System (CBM), and forms a parallelogram with an East-West axis.

The mooring facility can receive ships between 6,000 d.w.t. and 40,000 d.w.t. A tolerance of 10% less for ships in the lower range is provided for. The minimum depth of available water is 16 m. DLWS and the greatest admissible draft that will not cause damage to the underwater installations is 12 m.

Geographical Location:

SBMs:
Buoy "X" (SBM – West) Lat. 01° 02' 03" N., Long. 79° 42' 57" W.
Buoy "Y" (SBM – East) Lat. 01° 02' 12" N., Long. 79° 41' 52" W.

Terminal for Refined Products (CBM):
Buoy A – Lat. 01° 01' 5" N., Long. 79° 40' 7" W.
Buoy B – Lat. 01° 01' 5" N., Long. 79° 40' 5" W.
Buoy C – Lat. 01° 01' 3" N., Long. 79° 40' 5" W.
Buoy D – Lat. 01° 01' 3" N., Long. 79° 40' 5" W.

DOCUMENTS: For the official reception of the vessel, the Port Authorities, presided over by the Superintendent and Shipping Agent, will come aboard immediately upon arrival of the ship. In order to be declared in Free Pratique, the tanker must have the following documents ready:

Sailing documents from the last port of call.
Crew List (4 copies).
Declaration of Stores.
Declaration of Personal Effects of Crew Members (2 copies).
List of Passengers (6 copies).
Cargo Manifest (4 copies).
Bill of Lading (2 copies).
General Declaration (5 copies).
Ship's Register.
TOVALOP or P&I Insurance.

PILOTAGE: Pilotage is compulsory. The ship will approach to a distance of 1.5 miles North of Buoy "X".

According to Ecuadorian law pilotage is mandatory and Masters must obey all Statutory Laws and Regulations such as: The Code of Maritime Police; the Pilotage Regulations; and the Operations Regulations for Oil Terminals.

The following dispositions must also be followed:

(a) The officer responsible for boarding and putting ashore the Pilot is the officer on duty.
(b) The vessel must have an accommodation ladder and/or a pilot ladder.
(c) The length of the ladder must not exceed 30 ft. If the distance between the water level and the access point to the main deck is greater than 30 ft., a combination of one section of pilot ladder and another of accommodation ladder must be used.
(d) The pilot ladder must be properly secured and placed on both sides of the vessel.
(e) At night the pilot ladder and its immediate vicinity must be adequately illuminated.
(f) The top of the ladder must be so arranged that the Pilot can safely pass on to the deck of the vessel.
(g) The ladder must be maintained in good condition and its rungs must remain horizontal upon boarding and going ashore. The surface of the rungs must be rough.
(h) The ladder must be stable in such a way that each step rests on the side of the vessel and with spacers placed at least every 10 ft. in order to prevent the ladder from turning.
(i) Nylon ladders must not be used.

Pilotage Area: This area is within the following co-ordinates:

(a) Lat. 01° 00' 00" N., Long. 79° 40' 00" W.
(b) Lat. 01° 00' 00" N., Long. 79° 46' 00" W.
(c) Lat. 01° 04' 00" N., Long. 79° 40' 00" W.
(d) Lat. 01° 04' 00" N., Long. 79° 46' 00" W.

The waiting area, the anchorage area and the berthing area are included in this zone.

The Waiting Area: The area to wait for the Pilot is 1 mile North of Buoy "X".

The Anchorage Area: The vessels that must anchor upon arrival will proceed to the waiting area 1.5 miles North of Buoy "X" (SBM – West) and with the Pilot on board will navigate to the anchorage area between:

(a) Lat. 01° 00' 30" N., Long. 79° 44' 00" W.
(b) Lat. 01° 00' 30" N., Long. 79° 46' 00" W.
(c) Lat. 01° 02' 00" N., Long. 79° 44' 00" W.
(d) Lat. 01° 02' 00" N., Long. 79° 46' 00" W.

Operation Area for Tankers: This area, where mooring Buoys "X" and "Y" are found, is located between:

(a) Lat. 01° 00' 00" N., Long. 79° 40' 00" W.
(b) Lat. 01° 00' 00" N., Long. 79° 44' 00" W.
(c) Lat. 01° 03' 00" N., Long. 79° 40' 00" W.
(d) Lat. 01° 03' 00" N., Long. 79° 44' 00" W.

LIGHTS: *SBM Lights:*

Characteristics:

Buoy "X" (SBM – West)		Buoy "Y" (SBM – East)	
Light	Amber	Light	Amber
Flash	1.2 secs.	Flash	0.7 secs.
Dark	6.8 secs.	Dark	0.3 secs.
Period	8.0 secs.	Period	1.0 sec.
Range	5.3 miles	Range	5.3 miles

Lights at the terminal for refined products:

Light	Yellow
Flash	1 sec.
Dark	3 secs.
Period	4 secs.
Range	5 miles

APPROACHING: The most outstanding sights approaching Balao are: The Coquito Lighthouse, located 2 miles West of Punta Este (entrance of Rio Esmeraldas); the crude storage tanks in Balao on a hill (186 m. above sea level) visible from approximately 20 miles; and Punta Gorda, a craggy rise situated approximately 4.4 miles S.W. of Punta Coquito. The prominent points are easily detected by radar.

From Punta Las Palmas to Punta Gorda the coast consists of cliffs and small valleys for about 5 miles in a West by S.W. direction.

Punta Gorda, a craggy rise with nearby cliffs, has a reef that extends half a mile offshore North of the point. From Punta Gorda to Punta Sua, about 9.5 miles East by S.E., the coastline is low except for the cliffs close to Punta Gorda.

ANCHORAGE: While awaiting berthing at the offshore terminal ships can anchor in the following area:

(1) Lat. 1° 00' 30" N., Long. 79° 44' 00" W.
(2) Lat. 1° 00' 30" N., Long. 79° 46' 00" W.
(3) Lat. 1° 02' 00" N., Long. 79° 44' 00" W.
(4) Lat. 1° 02' 00" N., Long. 79° 46' 00" W.

MAX. SIZE: Maximum 100,000 d.w.t., max. load 100,000 tons/730,000 bbls., max. LOA 274.3 m., max. beam 39.6 m., max. draft 15.2 m., and max. distance aft/manifold 137.1 m.

Therefore tankers up to a maximum of 100,000 d.w.t. will be moored. Acceptance of tankers' dimensions and d.w.t. must be obtained in advance.

RADIO/VHF: Vessels bound for Balao must advise their ETA to the Superintendencia and their Agents, 72 hours and 24 hours before arrival. The message must contain vessel's name, ETA, Master's name.

The Pilots listen on Channel 16 (VHF) then change to Channel 14 once contact has been established.

The Terminal maintains a 24 hour watch on VHF-FM frequency 156.800 MHz, Channel 16, with an approximate range of 40 – 60 miles, and HF radio from 0800 hrs. – 1200 hrs. on 8,291.1 kHz and from 1200 hrs. – 1800 hrs. on 12,432.1 kHz. Once contact has been made with the tanker, either Channel 14 or any other channel designated by the radio operator will be used.

TUGS: 5 tugs available, all radio equipped.

MOORINGS: *(SBM's):* The SBMs "X" and "Y" have rotating tables on which the oil handling and mooring devices are mounted. These can turn in the direction of the tanker.

The mooring ropes: Each buoy has 2 mooring ropes for securing to the bow and these are permanently attached to the buoy. Each rope is 185 ft. long and 15 in. thick and is connected to 30 ft. of 2 in. chain that is secured to the bitts of the ship with cable grommets and mooring shackles provided by the Terminal.

TEPRE CBM: The underwater manifold is located 2.3 miles from shore at the end of the product pipeline. Its function is to distribute the products from the dispatch lines to the tanker or to the product re-cycling lines, whatever the case may be. The underwater manifold does not have a deballasting line.

The tankers are loaded by underwater hoses connected to the product loading outlets on the underwater manifold. The hoses are hoisted onboard the tanker once it is properly moored to the buoy field.

How the buoy field is secured: Stud Link grade U2 0.5 in. chain.
Rupture Tension 223 tons.
Working Tension 159 tons.

Anchors: Conventional, according to design specifications recommended by R.I.N.A. (Italian National Register).

Each buoy is secured by a chain to the anchor in order to avoid displacement by wind, current, or the tension of the ship. They are anchored with enough weight to avoid drifting.

BERTHING: Mooring operations will take place during daylight hours under normal weather conditions.

The unmooring operations will take place 24 hours a day.

Mooring Turn (Arrival): Priority for tying up is determined by the ship's time of arrival in port. In any case, those that arrive first have priority if and when they have received authorisation from the Direccion General de la Marina Mercante y del Litoral to operate freely.

The port derrick must be rigged and ready for use on arrival and vessels should be warned that the weight of each hose is at least of 5 tons under favourable conditions. This will be used to lift the floating deballasting/loading hoses as well as crates of materials that will be delivered by a terminal tugboat at the anchorage before the mooring operations begin.

For the mooring operations the ship must provide the following personnel and materials, which must be ready on the foredeck:

Personnel:
- Chief Officer on deck
- Boatswain
- 2 winch operators
- 2 seamen to handle the ropes.

Materials:
- 2 winches that work
- 2 mooring lines 2.5 in. in diameter; 600 ft. long
- 2 nylon mooring lines 1 in. × 10 ft.
- 2 manila heaving lines 0.25 in. diameter × 30 ft.
- 1 nylon or polypropylene mooring line 2.5 in. in diameter and 300 ft. long centre astern.

Mooring: The approach and mooring of the tanker will take place with the aid of the Pilot from Balao and the Loading/Mooring Master from Petroecuador in accordance with the Operation and Tariff Regulations for Oil Terminals.

When the vessel is at a reasonable distance from the berth, the mooring tugboat will take 2 of the ship's warping lines. Tie these to the mooring lines which are attached to the buoy and bring them on board. As the buoy ropes come clear of the water, it will be noted that chains are attached to them. These chains are to be secured to the bitts in such a manner that the nylon is outside of the external length of the ship so the chains absorb any chafing if the buoy lines cross the bow. There are 2 buoy lines. Power must be available at all times on all deck winches and windlass while the vessel is at the berth.

A mooring line must be available aft, secured to the bitt and of sufficient length to enable a tug boat to pick up the eye and tow it off to re-position the vessel if necessary.

Mean Time For Operations At The Terminal: Subject to the differences of each ship, the following times can serve as a guide:

1. Approach to the buoy from anchorage	50 minutes
2. Approach from waiting area	30 minutes
3. Loading the equipment used for mooring and connecting the hoses	20 minutes
4. Mooring	30 minutes
5. Lifting and connecting the hoses	80 minutes
6. Disconnecting the hoses	40 minutes
7. Casting off from buoys	10 minutes
8. Unloading personnel and equipment	25 minutes

HOSES: *Buoys "X" and "Y":* Lifting, connecting, disconnecting, lowering and other operations will be performed by a special team from shore under the Loading/Mooring Master's orders with assistance of the ship's deck officer. Port derrick must be rigged and ready for use before mooring operation begins.

Members of the ship's crew will be required to operate the winch or winches. Particular care should be taken during the hose handling operation in order to avoid serious damage to the hoses, the plastic floats and buoys on the plate edges, rails, etc.

BALLAST: *Deballasting:* The Terminal is not able to receive slops on shore, therefore its discharge is prohibited at present. Tankers can deballast by "Y" Buoy.

Vessels are to be equipped with clean segregated systems which are reserved for ballast only. Vessels so equipped will be permitted to pump segregated ballast overboard after being accepted and approved by shore inspectors.

After the tanks have been inspected and approved by the Terminal, deballasting will commence under the supervision of the Loading/Mooring Master. Upon completion the tanks will be inspected again and if ready for loading, a certificate will be signed by a representative of Petroecuador.

For the water processing of ballasted tankers, the Balao Terminal has an adequate system that starts in the hoses of the buoys and passes through a submarine pipe going to a pre-separator, where it hits and separates: first the water of the hydrocarbons, then goes to a decantation pool, where it stays 48 hours and after goes to a final separator in which are collected the last traces of hydrocarbons and finally the clean water is drained to the sea.

LOADING: Loading is through SBM's which are 49.5 ft. in diameter and held, each one in position by fixed chains secured to piles sunk into the sea bed.

Buoy "X" is equipped with a 750 ft. length and 20 in. self float loading hose which is manifolded to two 105 ft. length and 12 in. tail hoses. Buoy "Y" is equipped with a 20 in. hose and is manifolded in the same fashion as Buoy "X".

1. Loading ratio. Not withstanding greater capacity, currently the loading rate has been reduced to 32,000 bbls.p.h. at both buoys with a minimum of 10,000 bbls.p.h. and maximum pressure of 100 p.s.i. on land.

2. Under no circumstances will the vessel be loaded at a rate greater than that requested by the Master. It is the Terminal's responsibility to maintain the requested loading rate.

3. The load-on-top system is accepted at this terminal and vessels are requested to arrive with slop tanks "settled out".

UNMOORING: The Loading Master will advise Balao Control the estimated time for the completion of loading and will ask for Official Pilot. Then, hose disconnecting operation is undertaken aboard ship. After the unmooring takes place, the tug boat comes alongside the ship to transfer all materials and personnel that have been used during the operation. Then the vessel will proceed to the anchorage area where anchored it will await loading and sailing documents.

TEPRE OPERATIONS: *Mooring and Unmooring at the Terminal for Refined Products:* The Pilot on duty will be in charge of mooring and this will take place according to the wind and current conditions.

Loading: Once the vessel is secured, loading will be directed by Petroecuador. For this, 1 Mooring and Loading Master, 2 divers and 3 hosemen will come to the vessel and together with the ship's crew, connect the hoses.

Description of the Operation: Once the tanker's derrick is ready, a diver will dive to the ocean floor with a hook that will be attached to the hose of the product to be loaded. Once on deck, the hose will be connected to the ship's manifold.

Loading Rates:

Product	*Designed Rate* cu.m.p.h.	*Admissable Rate* cu.m.p.h.
Gasoline	636	700
Kerosene/Diesel	477	650
Fuel Oil	800	1,400
Discharging ashore with 1 or 2 Pumps	(d.w.t.)	
Tanker	6,000	300
Tanker	12,000	400
Tanker	20,000	600

Diameter of Flexible Product Hoses:

	(in.)
Fuel Oil	10
Gasoline	10
Kerex/Diesel	10

Products: The products that are currently being loaded at the TEPRE terminal are: Gasoline, diesel, kerex and fuel oil.

MEDICAL: The city has two hospitals: Hospital Delfina Torres de Concha and Hospital Franlin Tello Mercado.

FRESH WATER: Available in limited quantities. If more than 200 tons are needed, this must be requested 72 hours in advance.

FUEL: Limited availability and only in emergencies.

CONSULS: Colombia: Calle Sucre s/n entre Piedrahita y Manuela Canizarez. Tel: 713-661.

Chile: Calle Colon y 10 de Agosto. Tel: 710-045.

France: Av. Eloy Alfaro y Salinas.

Panama: Av. Kennedy 1100, Las Palmas. Tel: 710-370 and 711-180.

REPAIRS: Only minor repairs can be carried out and this is with the exclusive authorisation of the Superintendencia. These must not jeopardise the safety of the vessel or the installations.

REPATRIATION: Only if the person has all the necessary documents (passport, certificates, etc.).

TIME: GMT minus 5 hours.

SERVICES: Yagua General Services Ltd., Semarf Cia. Ltda. and Comapac can offer the following services:

Launch services.
Water supply.
Hospital medical attention.
Shipchandler.
Crewmember exchange, etc.

They could also be appointed as protecting Agent of any particular vessel.

SHORE LEAVE: Considering local operating conditions, permission to come ashore is subject to the approval of Migracion y Extranjeria (Immigration) and must be requested by the vessel's Agent. Transportation must be provided by the Agent and subject to the rates established by the respective authorities.

REGULATIONS: (Not all Regulations printed). Due to the fact that Balao is very close to Las Palmas, Atacames, Sua, etc., any pollution will cause serious damage to the beaches and fishing grounds. Therefore, ships are obliged to avoid any possible pollution of local waters that would be caused by pumping crude oil, diesel, or other fuels or oily mixtures from the engine room bilges.

In the piloting area the traffic of small craft such as fishing vessels, coasting vessels engaged in cabotage is absolutely prohibited with the sole exception of small craft used in the reception and mooring of tankers and these must be authorised by the Superintendencia.

Masters Responsibility: While the ship is at this Terminal, the Master will continue to be responsible for the security of the vessel.

While the ship remains at the buoys, its main engines must be ready for any emergency. If they are turbines they must be in reverse.

Vessel's Obligations in Port:

1. It is the obligation of the Master of the ship, or his representative, to receive the Pilot and the Loading/Mooring Master at the gangway, and provide them with all the information they may need.
2. The Master will delegate the Chief Officer or another responsible officer to receive the Port Authorities at the gangway and provide them with the documents and other information they may request while on board.
3. The Master must present the Superintendencia with a Certificate of Pollution Insurance issued by TOVALOP, the Ship's Register and any other document that may be required.
4. Meals must be provided for Superintendencia personnel and Customs, Police, etc. that are on duty.
5. A cabin and meals must be provided for the Loading/Mooring Master on duty during the loading operation.
6. The ship must provide meals for the 4 hosemen on board.
7. Meals and cabins must be provided for the Superintendencia's Safety and Pollution Control Inspectors when necessary.
8. Meals and a cabin must be provided for the Pilot if on board at mealtime.
9. All required materials and personnel must be placed at the disposition of the Terminal's Representative so that he can adequately carry out his job especially for easy and safe access of personnel on board.
10. The ship must provide personal assistance and other facilities required by the Ministry of Natural Resources Engineers on duty, so that they can efficiently control and inspect the oil being loaded and the tanks used.

Reports to the Superintendencia: During their stay in Port, the Master of the tanker must report any problem on board concerning:

1. Breaches in safety measures during mooring, deballasting, loading and unmooring operation.
2. Oil spills produced by bad hose connections, breaks in the hoses, filtration due to improper plugging of scupper holes, or any other reason.
3. Pollution caused by bilge pumping, tank washing, or any other operation that is not permitted.
4. Any abnormal situation that might affect the operating safety of the tanks.
5. Personnel accidents during work.
6. Theft on board or discovery of commercial transactions between crew members and Terminal workers etc. (contraband)
7. A copy of the measurements on board once the vessel is loaded.

Safety Regulations: The deck officer on duty must check the list of questions one by one to make sure the vessel's safety measures are in order. Some of the points that must be observed are as follows:

11. Are the mooring lines in good condition? (TEPRE – 12 nylon or polypropylene lines according to the tonnage of the tanker. SBM – 2 nylon or polypropylene lines, 600 ft. long.)
12. Are the short lines in good condition? (TEPRE: 12 short nylon lines, 1 in. thick and 10 ft. long each one.)
13. Is the derrick in good condition and has capacity for at least 5 tons?
24. Is the hydrocarbon log up-to-date? Check it!
25. Is the Master aware of the port regulations?

Safety Precautions for Ships:

1. Verify that mooring conditions are in accordance with Terminal requirements.
2. As a safety measure during operations, ships headed for Balao to load crude oil must arrive with enough ballast to correspond to 25% to 30% of its cargo capacity and down no more than 10 ft. by the stern.
9. The red flag, BRAVO, must be raised during the day and a red light must shine at night.
10. Ashtrays in the smoking room must contain water.
11. Due to the underwater chains, pipes and hoses, it is absolutely forbidden to use anchors close to the buoys.
12. All of these rules will be enforced by the Safety and Pollution Control Inspectors, along with the Loading and Mooring Masters.

GENERAL: *Flags:* The quarantine flag must be flown by the vessel when approaching the Balao Terminal. It must be lowered once the ship has been declared in Free Pratique.

The National Flag of Ecuador will be permanently flown while the ship is at the Terminal.

Contraband: Ecuadorian Law is rigorous in reference to contraband. The Master must instruct his subordinates to avoid taking cigarettes, cigars, tobacco, alcoholic beverages, drugs, etc. to the shore.

These articles must be reported before arriving at the Terminal and with their respective lists put under the Master's custody during the ship's stay.

In no way will commercial transactions between crew members and Terminal employees or third parties be tolerated.

Visitors: With the exception of Terminal personnel and other employees whose duties require them to board (Port Authorities, Ministry of Natural Resources Inspectors etc.), all visitors are strictly forbidden. Exceptions to this rule will require the authorisation of the Superintendencia.

Watches: Permanent watches must be maintained on board; on deck as well as in the engine room. These watches must have sufficient crew members to move the ship in case of emergency.

Charts: National charts: I.O.A. 1002 Port of Esmeraldas. Ed. December 20, 1982. Foreign charts: N. 021033 (HO-1176).

Wind and Currents: The predominant wind and marine currents throughout the year are S.W. During the rainy season (December – May), however, the wind and current suffer a slight change and at times come from the N.E. and North.

In the berthing area the currents often vary and will oppose the direction of the wind and cause the ship to yaw strongly.

Tide: The tide in syzygy comes up 13 ft., in quadrature 11.5 ft. The tidal currents have been reported (1956) at a rate of 1.5 knots, a little stronger during low tide.

AUTHORITY: Superintendencia del Terminal Petrolero de Balao, Casilla 286, Esmeraldas, Ecuador. *Tel:* 711-100, 712-200. *Telex:* 7579. *FAX:* 711100, 712200. *Contact:* Dr. Vinicio Reyes E., Superintendent, Captain Victor H. Morales P., Chief of Operations.

AGENT: *Main Office:* Yagua Ltd., Shipping Agency, P.O.Box No. 69, Quito, Ecuador. Victor Hugo 114e, Isla Pinzon, (Jipijapa), Quito, (Ecuador). Cable: Yagua Quito (Ecuador). Telex: 022220 Yagua Ed (Monday through Friday. See Operations Office for Saturdays and Sundays). Tel: 554-484, 554-485, 543-429.

Operations Office: Avenida Kennedy 1100 (Las Palmas). Cable: Yagua Esmeraldas (Ecuador). Tel: 710-370, 711-180 (available 24 hours a day). Telex: 7589 Yagua Ed.

Also on VHF Channels 16, 6, 12 and 71.

ESMERALDAS: 01.00 N. 79.39 W. (See Plan)

PORT LIMITS: Between the meridians 79° 38' W. and 79° 39' W. and the parallels 00° 59' N. and 01° 02' N.

NAVIGATION AIDS: The port complex of Esmeraldas has navigational aids consisting of the installation of 6 lighted buoys which mark the access channel to the port; 1 landfall buoy in the waiting area for Pilots; 4 lights located at the head of quays, 2 on the 2 breakwaters (principal and secondary) which limit the commercial quay and in the accesses to the dock of the Fishing Port and 2 pairs of leading lights – one pair at the top of Coquito Hill to the S.W. of the port and another pair near to the residential area of Tachina towards the S.E. of the port.

DOCUMENTS: The documents required by the Port Authorities on arrival of vessels are as follows:

Clearance From Last Port.
4 General Declarations.
1 Health Declaration.
5 Lists of Crew Members.
5 Lists of Passengers.
6 Sets of Cargo Manifests.
4 Sets of Bills of Lading.
1 Stevedoring Plan.
Certificates of Tonnage and Radio to be checked.

PILOTAGE: Pilotage is compulsory.

Prior to commencement of manoeuvring and navigation, the Pilot will require from the Master the following information: conditions of steering, conditions of ship machinery, condition of the aids to navigation, conditions which may limit the manoeuvres which are about to be effected, the draft forward and aft, nature of the cargo, availability of mooring lines and the system of anchorage.

The Pilot will require the presence of the Master of the vessel on the bridge at all times during manoeuvres.

ANCHORAGE: The area for awaiting the Pilot and quarantine is located between meridians 79° 39' 15" W. and 79° 40' 00" W. and the parallels 01° 01' 00" N. and 01° 01' 50" N.

MAX. SIZE: The port is limited to receiving vessels not greater than 200 m. LOA and 35 ft. max. draft.

RADIO: The Port of Esmeraldas currently has no radio service, but the Terminal of Balao: Lat. 01° 02' N., Long. 79° 44' W., which is relatively close, has a radio service.

To communicate through Balao, vessels arriving at Esmeraldas must advise or communicate their ETA to the Naval Superintendency of Esmeraldas, 72 and 24 hours prior to arrival. Messages must contain the names of the vessel, ETA and name of the Master.

24 hours listening out is maintained on HF-SSB-2182 – 2136.3 kHz call-up frequency and 4139 – 6210 kHz working frequency and on Channel 16. Generally vessels will have contact with this channel at a distance of 20 to 30 miles from the port. Channel 14 will be used for contact between the vessel and the Naval Superintendency before arrival in port.

BERTHING: All systems of maritime transport of general cargo (Ro/Ro LASH, USO multiple and containers with own crane equipment) can be used in the Port of Esmeraldas, since there is:

An ample dock of some 35 hectares with direct access. The port is not affected by winds, tides or undertow.

A marginal quay, 350 m. long and 26 m. wide at its forward part, giving facilities for handling and transfer of any kind of cargo.

Areas of free spaces for the storage of containers, semi-trailers and other types of cargo with an area of 66,000 sq.m. A closed warehouse of some 6,000 sq.m. area, and areas reserved for future usage of 110,000 sq.m.

A ramp for Ro/Ro vessels whose position is perpendicular to the quay designed so that vessels operating in loading and unloading are not interrupted by tidal differences.

Equipment for handling containers, semi-trailers, palletised cargo and others. Mobile cranes 2×60 tons, 2×35 tons, 2×15 tons, 20 loaders of 7.5, 6 and 3 tons and 8 trucks with platforms.

STEVEDORES: The port offers services to vessels without any restrictions and uninterrupted during all days of the year, 24 hours a day, with the exception of the 24th December when work is interrupted from 1700 hrs. until 0800 hrs. on the 26th December and the 31st December from 1700 hrs. until 0800 hrs. on the 2nd January.

MEDICAL: Doctors available.

FRESH WATER: Available.

FUEL: Available.

DEVELOPMENTS: The second stage of port works which have been projected, comprise:

Construction of a container quay 210 m. long with a storage area of 8 hectares.

A marginal quay 140 m. long with the same characteristics as the quay of 350 m. long and is a continuation of it, which will permit the berthing of 3 deep-sea vessels at one time.

Two additional warehouses of 6,000 sq.m. each.

Open air storage surface areas covering 3.5 hectares.

Extension of electric and sanitary services to the new areas.

SHIPMASTER'S REPORT: June 1979.

Navigation: Two orange coloured beacons on the land to the East side of the river, act as leading marks (bearing 166°T) from approx. 4 miles to seaward, right up to the entrance of the port. They are not lit. Depths along this line were not less than 100 m.

Off the entrance to the port, two orange coloured beacons on the West side near Coquitos Point Lighthouse, are the leading marks into the harbour. They are not lit. Entering the harbour, the deep water shoals rapidly to about 12 m., but at no time were echo soundings of less than 11.5 m. MLWS encountered either in the entrance, or in the manoeuvring area inside, or alongside. Beacons mark the extremities of the breakwaters but they are not lit.

Two buoys mark the East and West edges of the deep water channel outside of the breakwater. They are lit. Further buoyage is planned to mark the deep water area.

Pilots: 2 Pilots on board, 1 to communicate with each tug. Only 1 Pilot and 1 tug equipped with 'walkie-talkie' radios.

Tugs: 2 square bowed American type river-barge pusher tugs are available and they have adequate power to assist in manoeuvring on and off the berths. Unfortunately, the 2 vertical posts on their bows are likely to cause sharp indentations in vessels' bow and stern plating when the tugs are used for pushing. They should only push against the flat vertical surfaces of the hull.

Berthing/Facilities: There are 2 berths and a Ro/Ro facility, but only 2 large vessels can be accommodated alongside at any one time. A large cargo shed is under construction opposite Berth No. 2, and the container and open cargo areas have been surfaced. Both berths are to be supplied with bunkering and fresh water facilities, but these are not operative at present time. No actual assessment of cargo handling equipment could be made, but it was noted that there were 2×30 ton mobile cranes and 5×7.5 ton forklift vehicles in the parking area in the compound. The Agent reported that low-loaders and trailers were available for the movement of containers and that forklifts could be hired for use in the hatches.

The loading of bundles of balsawood was carried out directly from lorries which brought the cargo alongside and the rate of loading was about 165 bundles (20,600 board feet) per gang hour.

At present the harbour is somewhat obstructed by anchored fishing boats and small craft, but these are to be shifted to the new fishing port being constructed to the South of the main harbour.

Passenger List.

Passenger List in Transit.

Harbour Master's Office:

Voyage Report.

Clearance from last port.

Crew Roll with original visa from Ecuador Consul in first port of voyage (3 copies).

Passenger List with original visa from Ecuador Consul in embarking port, or declaration that they have no visa, signed by Master (2 copies).

Passenger List in transit signed by Master or declaration that they have no passengers in transit (2 copies).

Provisions List, Stock and Medicines on ship (3 copies).

Cargo Manifest in transit (1 copy).

Combustible or inflammable Cargo (1 copy).

Customs:

8 copies of Manifest.

Sealed envelope of Manifests, consular and commercial invoices and non negotiable vouchers.

Cargo index and copy of Cargo Manifest in direct transit (8 copies).

A Register (8 copies) of spare parts for vessel and provisions.

Crew Roll and detailed list (8 copies) of personal belongings of officers and crew.

Passenger List, with indication of their suitcases and list of suitcases that travel without their owners; in this case should be specified the port where they were put on board and personal declaration of each passenger (8 copies).

If the vessel with ballast, Master will be obliged to produce (besides the ballast certificate) documents already mentioned in each respect. Master or Maritime Agency will produce a written statement to Customs within 12 hours from arrival of vessel whether they decide to take any cargo for exporting. If not loading vessel must leave within the following 24 hours.

Immigration:

Crew List signed by Master.

Passenger List of those who disembark there or a declaration of none for this port, signed by Master.

Passenger List in transit, or a negative declaration signed by Master.

In case of having passengers to disembark in this port, Master should produce passports and visas.

Crew identification cards or similar documents.

Inspection of ship by Authorities will be done (compulsory) within 3 hours of arrival, usually as soon as ship berths, or in quarantine.

PILOTAGE: Vessels approaching port to notify their arrival by Naval Radio Station HCG, 24-hour service, frequency 8476 kHz and 500 kHz. Traffic list broadcast every hour on 8476 kHz.

Advance notice of not less than 12 hours required, addressed to Capuerto Aportuaria Agencia in either English or Spanish with the following details: date, and time of ETA, destination (whether Buoy No. 1 or Puna), maximum draft, cargo details, details of passengers or mail, and if Pilot required.

Pilot Station for Puerto Maritime: Situated in position Lat. 02° 43' 18" S., Long. 80° 17' 30" W. Pilot boat needs 1 hour to go from Pilot Station to Buoy No. 1. Contact by VHF Channel 16, 24-hour service. Pilot boat is wooden, 45 ft. long, black hull, white cabin, with letter "P" on sides. During day carries blue flag with letter "P" and by night has regulation pilot lights.

Pilot Station for River Guayas: Situated in village of Puna. Pilot boat requires a minimum of 30 minutes to move from Pilot Station to vessel. Vessels requiring Pilot signal Morse letter "X" by lamp or sound.

Pilot boat has grey iron hull, white cabin with Lancha de Practicos written on both sides. By day carries blue flag with letter "P". By night regulation pilot lights.

ANCHORAGES: *Puerto Maritime:* 1 mile South and 2 miles West of Sea Buoy in position Lat. 2° 44' 26" S., Long. 80° 24' 44" W. Min. depth in the area is 35 ft.

Guayas River: Inside area between bearings 180° and 135° from the lighthouse of Punta Mandinga at Puna, 1 mile from the lighthouse.

MAX. SIZE: Max. length for ships entering Puerto Maritimo is 650 ft., with a max. draft of 32 ft. at H.W. Springs. Vessels of deepest draft should begin to enter 1 hour before high tide. For Guayas River max. length 600 ft., max. draft 23 ft. 6 in.

Chief Pilot's Report: May 1993.

With a draft of less than 27 ft., vessels can enter at any state of tide. With a draft between 27 ft. and 29 ft., vessels require a half tide. From 29 ft. to 32 ft., vessels require at least one high tide when entering (your information about entering one hour before high water is correct). However, when sailing vessel requires two tides, which necessitates anchoring by the Posorja fishing village, near to Buoy No. 17.

HEALTH: Procedure to obtain Free Pratique is to produce health certificates to port doctor upon arrival. To get Free Pratique by radio, ship must radio to port doctor any changes in health situation on board since leaving last port.

TUGS: Normally join vessel beyond Buoy No. 80. Tugs are compulsory, also use of their lines is compulsory. Cost of both services is included in total cost of port duties.

BRIDGES: No bridges that restrict traffic either in Estero Salado nor in Guayas River, but ships that are to berth in village of Eloy Alfaro (Duran) should take into consideration height of telephone lines between Guayaquil and El Islote, minimum height 48 ft.

STEVEDORES: Radio message to ship's Agent will give agency enough data to make all arrangements required for operations of loading/discharging. In Maritime Terminal an average discharge/loading rate of 25 tonnes/p.h. per hook.

BERTHING:

Berth	*Length* (m.)	*Depth* (ft.)	*Remarks*
Marginal Pier	960	31	5 berths
New Port			
Berth 1A	185	33	Bananas,
1B	185	33	General,
1C	185	33	Containers.
1D	151	33	Bulk, sugar, grain, vegetable oil.

MEDICAL: If ship requires medical attention, a notice of 12 hours should be given to Agents. Guayaquil Hospital and clinics are available.
TANKERS: Discharge asphalt in Guayas River at a special quay, max. draft 23 ft. 6 in. Discharge of petrol for aviation in Puerto Maritime is to lighters, max. draft permitted is 33 ft.
DENSITY: 1012.
FRESH WATER: Available. Three pipes at each berth delivering at a rate of about 20 tonnes/p.h. each.
FUEL: Not available.
CONSULS:
Argentina, Belgium, Bolivia, Brazil, Chile, Colombia, Costa Rica, Denmark, Dominican Republic, Finland, France, Germany, Greece, Guatemala, Haiti, Honduras, Israel, Italy, Japan, Lebanon, Mexico, Netherlands, Nicaragua, Norway, Panama, Paraguay, Peru, Philippines, Portugal, Salvador, Spain, Sweden, Taiwan, United Kingdom, U.S.A., Uruguay, Venezuela.
REPAIRS: All types of deck and engine repairs are possible.
DRY DOCKS: Dry dock with capacity of 3,600 tonnes.
GANGWAY/DECK WATCHMEN: Capitania del Puerto provides members of the Policia Maritima. Ships to supply watchmen with food.
Piracy: Acts of piracy have taken place alongside. The pirates boarded from a speedboat and threatened crew with knives.

In May 1992 and June 1992 armed gangs boarded vessels as they were leaving the port and stole cargo from containers.
OPENING/CLOSING HATCHES: Carried out by crew.
CERTIFICATES: All ship's certificates required.
CUSTOMS ALLOWANCES: Each member of crew allowed 600 cigarettes. Each Crew member or passenger allowed 1 litre of wine and 1 litre of spirits.
REPATRIATION: Facilities for effecting crew changes and arranging any necessary repatriation.
AIRPORT: Airport is 8 miles from Maritime Terminal and has scheduled international flights.
TIME: Local time is GMT minus 5 hours. There are no alterations during year.
HOLIDAYS: 1st January; Good Friday, 1st and 24th May; 24th and 25th July; 10th August; 9th and 12th October; 2nd and 3rd November; 25th December. Only on the 1st January and 25th December is there no working in port.
POLICE/AMBULANCE/FIRE: For any of these services call 211 (interno del Puerto).
TELEPHONES: Arrangements for placing telephone on board ships on request.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.

PURSER'S REPORT: (March 1975)
The government have now issued their own set of papers. These must be made out in sets of 7 i.e.: 7 Crew Lists. 7 Passenger Lists, 7 Crew Customs Declaration Forms, 7 Cargo Manifests, 7 Dangerous Cargo Manifests (if carried), 7 Lists of Mail (if none – nil returns on sheet), 7 General Declarations, 1 Maritime Health Form, 7 Stores Lists.

All Forms should be certified by Ecuadorian Consul or friendly Nation at Port of departure.

AUTHORITY: Capitan del Puerto de Guayaquil, Puerto Maritimo.
AGENT: Ian Taylor - Ecuador, Edificio Absalon Guevara, Of.201, Calle Los Rios 810 y. Av. 9 de Octobre, Guayaquil, Ecuador. Tel: 593-4-690310. Telex: 43221 A Taylo. Fax: 593-4-451114.

LA LIBERTAD: 02.12 S. 80.55 W. (See Plan)

DOCUMENTS: Port clearance is effected at La Libertad.
The following papers must be ready for presentation to the authorities on arrival:

1 Bill of Health signed by the Master and visaed by the Ecuadorian Consul at port of departure.
1 Ballast Certificate visaed by Ecuadorian Consul at port of departure.
6 copies of Cargo Manifest (if any cargo for the port).
6 copies Bills of Lading.
9 Crew Lists (original visaed by Ecuadorian Consul at port of departure).
9 Passenger Lists for the port (if no passengers state "without passengers"). If applicable, the list should show names, sex, age, nationality, port of embarkation, occupation and whether married or single. Passengers must make a declaration of their luggage on Ecuadorian Form No. 94.
9 Stores Lists.
5 Lists of Crew's Personal Effects (new articles only).
4 Lists of Unaccompanied Baggage (if none, state "without them").
4 Lists of Encomiendas (list of small private parcels to be landed in Ecuador – if none, state "without them").
4 Lists of Mail (if none, state "without them").

If there is no Ecuadorian Consul at the port of departure, the documents must be visaed by the Consul of a friendly nation.

PILOTAGE: Compulsory. Pilots boarding in position Lat. 2° 08' S. – Lat. 2° 10' S. and Long. 80° 55' W. – Long. 80° 56' W. ETA should be given to port 12 hours before arrival. Open roadstead.
ANCHORAGE: No limitations except depth 36 ft.

Vessels proceeding to oil terminal should anchor about 1 mile N.N.E. of the mooring buoys (which are about 15,000 ft. off-shore) where the Port Authorities and Mooring Master board. The anchorage is an open roadstead with sandy bottom.
RESTRICTIONS: *Tankers:* Daylight berthing only.
MAX. SIZE: *Tankers* – LOA 650 ft.
Beam 84 ft.
Max. loaded draft 34 ft. 6 in.
Depth MLWS at mooring is 43 ft.
HEALTH: Vessels arriving from foreign ports should fly appropriate International Code signals to advise state of health and request Free Pratique. Vessels put in quarantine required to fly signal "QL" all the time they are in port until Port Health Authority advises to the contrary.
RADIO: ETA messages may be sent by radio to Radio Naval, HCG Guayaquil Radio, 8476 kHz, 500 kHz. Radio Naval would then repeat the message to the Naval Station in Salinas, or to the Telegraph Office. Radio Naval has VHF/RT and Telex.
TUGS: Only tankers require tugs to berth at the buoys. Other vessels work cargo at anchor.
BERTHING: No wharves for large vessels, only for coasters.
STEVEDORES: Arranged by Agent; separate ETA not required.
MEDICAL: If urgent medical attention required, Master should radio details in advance. All facilities available.
TANKERS: The Anglo-Ecuadorian Oil Fields Terminal is located in Santa Elena Bay. Four small marker buoys indicate the seaward end of the submarine pipeline. An Easterly current usually prevails, rate being from 0.5 to 1.5 knots. There is 1×14 in. submarine pipeline fitted with 2×10 in. flexible hoses for connecting to ship. Max. loading rate is about 450 t.p.h, and max. pressure is about 150 p.s.i.

Mooring Master assists in berthing vessels. Vessels are moored port side to, using starboard anchor off the starboard bow and mooring buoys for lines to the port bow and astern. Vessels moored during daylight hours only; however, they may unmoor at any hour of the day or night. Recommended that at least 1 tank of clean ballast be retained on board vessels until mooring has been completed. Ballast will then be pumped overboard. Vessels should be equipped with three 9.5 in. or 10 in. (circ.) – 200 fathom hawsers for use in mooring and 7 rope stoppers each at least 3 fathoms long. The following signals are used in connection with the loading of cargo.
By Day: Start loading 2 long blasts of vessel's whistle or siren, 1 red flag hoisted; stop loading 4 long blasts of vessel's whistle or siren, flag hauled down.
By Night: Start loading, 2 long blasts of vessel's whistle or siren, 1 red light hoisted; stop loading, 4 long blasts of vessel's whistle or siren, 1 red light hauled down.

To summon the launch, 3 long blasts are to be blown on the vessel's whistle.
DENSITY: 1028
FRESH WATER: Not available.
FUEL: Bunkers available, but have to be requested 72 hours prior to arrival in order to make transport arrangements.
CONSULS: There is no consular representation of any country at La Libertad. The nearest are at Guayaquil.
REPAIRS: Anglo-Ecuadorian Oil Fields Company can effect small repairs.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
OPENING/CLOSING HATCHES: Can be done by the crew or stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits per man.
REPATRIATION: Can be effected from port of Guayaquil.
AIRPORT: At Guayaquil, 130 km. away, served by regular airlines.
TIME: GMT minus 5 hours.
HOLIDAYS: January 1st; Carnival; Good Thursday; Good Friday; May 1st; May 24th; July 24th; August 10th; October 9th; October 12th; November 2nd; November 3rd; December 25th.
TELEPHONES: No connections to vessels possible, except at tanker moorings which is direct to loading installation only.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Required.
GENERAL: Dirty ballast or slops not admissible at La Libertad.
AUTHORITY: Terminal Superintendence La Libertad.
AGENT: See "Guayaquil".

MANTA: 00.56 S. 80.43 W. (See Plan)

DOCUMENTS:
A. List of Documents, 1 copy.
B. Sailing Permit from last port. Original to Captain of Port.
C. General Declaration, 5 copies – Health Department 1, Captain of Port 1, Immigration 1, Custom House 1, and Port Authority 1. (See Note No. 2 below):
  1. Health Declaration.
  2. Stores Declaration.
D. List of Passengers destination Manta, including list of their baggage, 2 copies – Customs 1, Immigration 1.
E. List of Passengers in transit, 2 copies – Immigration 1, Port Authority 1.
F. Crew List (including and indicating any members leaving vessel at Manta), 4 copies – Customs 1, Immigration 1, Captain of Port 1, Port Authority 1.

G. Manifest of Cargo for discharge at Manta including transhipment 4 copies – Customs original and copy, Port Authority 2.
H. Checking Books, 5 copies, plus 1 copy for each point of possible discharge of cargo from vessels for Port Authority.
I. Bills of Lading, 1 complete set for Port Authority.
J. List of vessel supplies including liquors, cigars, cigarettes, other tobacco products, matches, lighters, clothes, novelties, and provisions will be maintained in Purser's Office for review by Custom House.
K. Tissue Manifest, Hatch List and Cargo Plan. 1 copy of each for Port Authority prior to arrival of vessels. These papers to be sent by air mail as per regulations.
M. General Manifest. This manifest will include all cargo loaded during voyage which will include all cargo in transit – 1 copy. General manifest will be maintained in Purser's Office for review by Custom House, and be accessible for Customs at all times.

Note No. 1: Port Authority reserves the right to refuse berthing facilities until all documents received. Of course, this authority will be handled with discretion to avoid unnecessary or unwarranted delay to vessels, passengers, and cargo.

Note No. 2: General Declaration should contain the following:
A. Name of vessel, length and registered tonnage.
B. Owners.
C. Voyage number and ports of call on voyage.
D. Total number of passengers aboard.
E. Total tonnage (of 1,000 kilos) of cargo aboard.
F. Total number of passengers for Manta.
G. Total tonnage (of 1,000 kilos) of cargo for Manta.
N. Health Declaration.
O. Stores Declaration that ship's consumable foodstuffs and consumable supplies are under lock and key; that the slop chest, shop, and store-rooms containing liquors, cigars, cigarettes, other tobaccos, matches, lighters, clothes, novelties, sports material, toilet articles, cosmetics, medicines, etc. have been locked and sealed with metallic non re-usable seals with serial numbers. The seals are identifiable by their non-repeat numbers.

All vessels should have these seals aboard and should equip doors and door frames with suitable secure hardware through which seals can be passed. (Model of the form for the above document may be obtained from the Port Authority).

PILOTAGE: Compulsory. Pilot boat by day will show Pilot flag at mast head; by night red light 2 ft. 6 in. below mast head light, both visible around the horizon.

Pilot will board at point located at distance of 1 mile, 000° from Manta Breakwater Light (Lat. 00° 56' 20" S., Long. 80° 43' 02" W.). He will immediately proceed to conduct ship to inner harbour and dock at assigned pier or anchor in assigned anchorage.

Vessels will not have to anchor, but will reduce speed to steerageway and stop propeller. Lower pilot ladder so Pilot may board safely on port side of vessel. Pilot will act as Representative of Port Authority. Other Officials and Representative of steamship Agency will embark once ship has tied up.

Pilotage compulsory for all foreign vessels over 500 tons, with following exceptions:

(1) Fishing craft, yachts, tugs, barges and other craft of less than 500 tons total displacement whose handlers are suitably licensed by Captain of the Port of Manta.

(2) Vessels of the Ecuadorian Navy.

Note: Masters of large vessels and handlers of small craft who do not follow all rules of safety, including Rules of the Road may lose their right to navigate within jurisdiction of the Port Authority and may be subject to additional sanctions.

ANCHORAGES: Free anchorage area located around a point 1 mile from Manta Lighthouse (Lat. 00° 56' 03" S., Long. 80° 43' 01" W.). Depth 45 ft. Anchorage inside breakwater will be assigned by Pilot.

RESTRICTIONS: No restrictions upon entry. Vessels up to 33 ft. draft may enter at any time of day or night.

MAX. SIZE: Max. permissible length 600 ft., breadth 60 ft., draft 33 ft.

HEALTH: Radio Pratique granted all ships in accordance with International Sanitary Regulations. Health documents will be delivered to boarding officer of Port Authority. When Pratique granted by radio, not necessary for port doctor to board vessel.

In request by radio for Pratique, vessels should give following data 12 to 24 hours before arrival.
A. Date and hour of expected arrival.
B. Number of Ecuadorian Passengers.
C. Number of Alien Passengers.
D. Statement regarding existence or non-existence of communicable diseases aboard.

RADIO/VHF: Manta HCM 8372 kHz. Radio telephone 2182 kHz. VHF Channels 10 and 16 (Costera Manta).

TUGS: 2 tugs. 1×1,300 h.p. and 1×1,800 h.p. Tugs join vessel in vicinity of pier. Ship's lines usually used. Use of tug for docking and undocking is at discretion of Port Authority.

BERTHING: Berth will be assigned by Pilot at boarding time.

Berthing Facilities:

2 Piers Length 200 m. for vessels with draft up to 10 m. 2 Roll-on/Roll-off ramps, facilities at 2 piers., depth 22 ft.
Marginal Quay, length 150 m., for vessels with draft up to 7.5 m.
Marginal Quay, length 150 m., for vessels with draft up to 5.7 m.
Marginal Quay, length 150 m., for vessels with draft up to 3.8 m.

Cranes: Mobiles cranes with capacity 12 – 35 tons.

Storage Area: 100,000 sq.m. of open storage available.

STEVEDORES: Arrangement for stevedores made by ship's Agent prior arrival.

FRESH WATER: Fresh water available in small quantities.

FUEL: Diesel oil available in small quantities by truck.

FIRE PRECAUTIONS: Regular fire precautions should be taken by all ships. Smoking should be prohibited in any section of the ship used for cargo. No smoking on the weather deck, cargo decks, and the ship's holds, whether cargo being worked or not. Smoking around hatches or at cargo winches must be prevented.

Smoking should be restricted to the passenger section of vessels, and to officers' and crew's quarters where suitable receptacles are available.

Persons including officials can be fined or refused entrance to terminal at discretion of Port Authority for careless or intentional disregard of reasonable fire prevention precautions.

Port Authority reserves right to inspect cargo working sections of vessel, to check precautions against fire, and to determine whether there are any undue accumulations of combustible materials.

Pumps and other fire fighting equipment aboard should be maintained in a state of readiness as long as vessels are in the terminal.

CONSULS:
Panama: Mr. Jorge Alava, Banco del Pichincha, Tel: 612411 – 611089.
Germany: Mr. Wolf Harten, Tel: 610740.
Spain: Mrs. Pilar Quilez de De Genna, Tel: 613548.

REPAIRS: Minor repair facilities available.

GANGWAY/DECK WATCHMEN: Custom police keep watch at the gangway.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco, small amounts for personal use while in port. Wine and/or Spirits, wines and liquors by the glass for consumption on board while in port.

CARGO GEAR: Ship should have cargo nets, but Port Authority can provide cargo nets at extra cost.

REPATRIATION: Repatriation of crew members through Port of Guayaquil.

AIRPORT: Airport with 2,500 m. runway. Flights to Quito at 0915 hrs. on Monday to Saturday. From Portoviejo (36 km.) flights to Quito on Monday to Friday at 1700 hrs. Air taxis on request.

TIME: Local time GMT minus 5 hours.

HOLIDAYS: No movement of cargo within the terminal on 1st May, Christmas Day, or after 2000 hrs. on the 31st December, or on New Year's Day.

POLICE/AMBULANCE/FIRE: Police 610900; Ambulance 612014; Fire 610100.

TELEPHONES: Telephone service can be obtained at Terminal Office, at same rate as public telephones.

SHORE LEAVE: Crew members are welcome ashore.

IDENTIFICATION CARDS: Crew members should have identification cards while ashore at all times.

DELAYS: In rainy season, from January to April, irregular swell is present in the Manta Bay (3 days before and after full moon), also at new moon tides.

AUTHORITY: Autoridad Portuaria de Manta, Apartado 4768, Manta, Manabi, Ecuador. *Tel:* 613111, 620993. *Cables:* Aportuaria. *FAX:* 621861. *Contact:* Hugo Almeida Gonzalez, General Manager. Captain Maruricio Saona, Port Captain.

AGENT: See "Guayaquil".

PUERTO BOLIVAR: 03.14 S. 80.01 W.

DOCUMENTS:
3 Voyage Memorandums.
2 Maritime Health Declarations.
1 Consular Despatch.
1 Port of Origin Certificate.
10 Crew Lists.
8 Stores Lists.
3 Individual Declaration List for each member of the crew.
8 Lists Passengers Disembarking at this port.
8 Lists Passengers in transit.
4 Luggage, Mail and Commissions Lists.
4 Manifest of Cargo Lists.

Documents for Port's Authority should be supplied by Agents:
1. General Cargo Manifest in complete sets (Importation in triplicate, Exportation one set).
2. Bill of Lading, complete sets: Importation (one set), Exportation (one set) at time of sailing.
3. Export Customs House Clearance Document (one set). This document is replaced by the Bill of Lading.
4. Certificate of Ballasting.
5. Request for Mooring Berth.
6. Stevedore's cargo plan per hatch.
7. Muster-roll of cargo.
8. Tally books: 15 copies in Spanish. These must be in accordance with the current Tally Law.

PILOTAGE: Send ETA through Radio Naval of Guayaquil 24 hours before arrival. Pilot will board vessel on the port side 1 mile from the Sea Buoy on arrival and disembark on the starboard side. In case Pilot not available it is recommended to anchor 1 mile from "Punta Jambeli" between the buoy and the lighthouse of Lambeli. Pilot boat is steel, black hull and white cabin, it carries pilot signals in accordance with International Regulations. Service available 24 hours a day. Pilotage is compulsory.

ANCHORAGES: Pilot will indicate recommended anchorage.

RESTRICTIONS: Depths 30 ft. at LW, from 0600 hrs. to 1800 hrs. draft allowable 30 ft. From 1800 hrs. to 0600 hrs. draft allowable 27 ft.

MAX. SIZE: At Espigon Quay depths alongside 30 ft. inner end to 36 ft. at quay head.

HEALTH: On the arrival of vessel the authorities come on board. If there are no illnesses aboard, the doctor gives Free Pratique. In case of any illness, Master should advise by radio and the vessel waits in quarantine for the visit of Port Health Doctor.

RADIO: Radio Naval of Guayaquil, Radio Naval of Puerto Bolivar VHF available call Pilot Station on Channel 16, effective reception 30 miles.
TUGS: 2 tugs available one at 1,200 h.p. and one of 500 h.p. Usually, ship's lines are used. This service is free.
BERTHING: At Espigon Quay should be carried out within 1 hour before or after slack water. Tidal currents of 1 – 3 knots in dry season and 3 – 5 knots in Winter are at right angles to berthing face of the quay.
Wind: From 000° in the morning, speed 3 – 5 knots. From 210° in the afternoon and night, speed 3 – 5 knots.
STEVEDORES: Agents take charge of gangs.
MEDICAL: Hospitals, clinics and dental surgery in Machala, 6 km. from the port. There is also a medical service for vaccination.
DENSITY: Salt water.
FRESH WATER: Only available by tanker truck, capacity 7 tons.
FUEL: No fuel in this port. In case required one has to contact Guayaquil and they send it by small tankers.
CONSULS: Consul of Peru, Tel: 920608.
REPAIRS: There are no facilities in this port.
GANGWAY/DECK WATCHMEN: The Agent names 1 or 2 watchmen for the vessel besides the Maritime Police and Coast Guard.
OPENING/CLOSING HATCHES: Carried out by shore gang supervised by someone on board.
CERTIFICATES: Vessel's Register and Tonnage Declaration required.
CUSTOMS ALLOWANCES: 100 cigarettes per person and 1 bottle wine or spirits per person.
REPATRIATIONS: The Immigration Office can arrange.
AIRPORT: Distance to the airport is 6 km. It has 6 daily flights in connection with Guayaquil.
TIME: GMT minus 5 hours; there is no change.
HOLIDAYS: No work from 1700 hrs. on 24th December till 0800 hrs. on 26th December, and 1700 hrs. on 31st December till 0800 hrs. on 2nd January; Carnival; Maundy Thursday; Good Friday and Saturday; 1st May; 24th and 25th July; 9th October.
POLICE/AMBULANCE/FIRE: There are services.
TELEPHONES: Can be connected to the vessel.
IDENTIFICATION CARDS: Not necessary.
SHORE LEAVE: Passengers or crew do not need any special permit to land.
GENERAL: When the vessel is anchored, landing service is done by launches. They are called by 1 long whistle and 2 short ones. This service works 24 hours a day.
At Night: A flashing light is to be used to call launches and not the whistle.
DEVELOPMENTS: A marginal pier for general cargo is being built. Length of pier 360 m.

SHIPMASTER'S REPORT: 1978
Fresh Water: Water is available at anchorage by a barge of 48 ton capacity. For ships berthed alongside, water is delivered by modern trucks of 7 or 8 ton capacity.
Surveyor: A non-exclusive surveyor acting for Lloyd's, Det Norske Veritas, and the Japanese Classification Society, is based at Guayaquil. Loadline survey and engine survey work done. He travels by air from Guayaquil (45 minutes).
Watchmen: One Customs and one Naval guard are obligatory, and should be fed and provided with room to sleep. Ship's crew should be employed day and night, one as accommodation watchman and one as deck watchman. Store-rooms should be locked up, and all loose equipment and lifeboat equipment stowed in lockers or accommodation. Only one accommodation door should be left unlocked, and a ship's watchman posted there, day and night.
Banana Cargoes: Loaded through side doors from the quay or from barges, or both together. No cranes, derricks or mechanised equipment used. About 400 men employed at one time. Very fast.
Casual Labour: This is freely available for painting hull, cleaning engine room, etc.

PURSER'S REPORT: See "Guayaquil".

AUTHORITY: Port Captain.

NOTES

Arab Republic of Egypt

GENERAL (See Plan)

NAVIGATION REGULATIONS:

The following rules for ships navigating in the Gulf of Suez have been approved by IMO.

1.1 Ships should take into account that crossing traffic may be encountered in the traffic junction Eastward of Ain Sukhna and in the precautionary area off Ras Shukheir, and should be in a high state of readiness to manoeuvre in these areas.

1.2 Exceptional care is needed, when overtaking another ship within a lane, not to enter the separation zone or force the overtaken ship to do so.

1.3 Ships navigating in the Gulf of Suez are requested to keep continuous listening watch on the Suez Gulf Traffic Information Broadcasts and report any aids to navigation which are malfunctioning or are out of position and which are not already included in the Suez Gulf Traffic Information Broadcasts.

2.1 All ocean-going ships should have their radar in effective use by day and night throughout the passage between Shaker Island and Suez Port as an aid to achieving maximum feasible lane conformity and avoiding risk of collision. Particular care is required for strict adherence to the confines of relevant traffic lanes.

2.2 Ships proceeding South from Suez should be alert for tankers heading for the Sumed Oil Terminal off Ain Sukhna.

2.3 Northbound tankers heading for Sumed Oil Terminal should report their intention of using the traffic junction off Ain Sukhna on the appropriate frequencies.

2.4 All ships North and Southbound when navigating through the precautionary area off Ras Shukheir or in the vicinity of the July Oilfield should avoid overtaking in the traffic lanes in these areas.

2.5 All ships including service and supply craft serving the oil workings in July, Ramadan and Morgan Oilfields proceeding in and out of Ras Shukheir Oil Terminal, should only cross the South and Northbound traffic flow through the precautionary area off Ras Shukheir. Within the precautionary area local rules relating to crossing traffic apply.

2.6 Tankers leaving the Ras Shukheir Oil Terminal and intending to join the Northbound traffic lane should only do so when no through Southbound traffic is in the vicinity and should always report their movements to other ships beforehand on VHF.

2.7 Ships anchored in the designated waiting area for Ras Shukheir should ensure that they are never less than 0.25 miles from the edge of the Southbound traffic lane and should pay special regard to their correct light signals for ships at anchor. They should also show their deck lights.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer from 1st May till late September.

AIN SUKHNA: 29.32 N. 32.24 E. (See Plan)

Also see "General" before first Port.

LOCATION: Ain Sukhna Sea Terminal is situated in the Northern end of the Gulf of Suez.

The position of the sea terminal is: Lat. 29° 32' N., Long. 32° 24' E. Ain Sukhna Lighthouse position: Lat. 29° 35.9' N., Long. 32° 20.3' E. The Lighthouse Specifications are: A white daymark on framework tower 44 m. high over sea level, flashing white every 5 seconds. Range 22 miles. The lighthouse also covers the approaching and departure sectors at 40 m. height and 15 miles range. OC. Green from 260° to 273°. OC. White from 273° to 298°. OC. Red from 298° to 306°.

As a reference point, there is a light which is exhibited from a metal structure standing close to the seaward side of an old abandoned lighthouse on Ras Abou Daraq, flashing white every 2 seconds.

DOCUMENTS: All vessels calling at Ain Sukhna have to deliver directly their official documents, as indicated below, to SUMED's Port Authority:

Certificate of Registry.
Load Line Certificate.
Safety Certificate.
Derat Certificate.
Radio Certificate.
Suez Canal Tonnage Certificate when applicable.
Panama Canal Tonnage Certificate when applicable.

Vessel's official documents, after being reviewed, will be handed to the vessel's Master after discharging and before vessel departs from SUMED's port.

LOCATION OF BUOYS: (SBMs)

S1: Lat. 29° 35' 16" N., Long. 32° 23' 35" E.
S2: Lat. 29° 34' 12" N., Long. 32° 22' 42" E.
S3: Lat. 29° 35' 17" N., Long. 32° 22' 16" E.
S4: Lat. 29° 34' 12" N., Long. 32° 24' 24" E.

The 4 SBMs are painted orange and have the following characteristics:

Lights: A flashing light, activated by an electric photo-cell switch.

Light frequencies are as follows:

SBM No. 1	Morse Code A
SBM No. 2	Morse Code B
SBM No. 3	Morse Code C
SBM No. 4	Morse Code D

Fog Horn: An acoustic signal with an approximate range of 2 miles.

Radar Reflector: Each buoy is provided with an octahedral radar reflector constructed in stainless steel with a diameter of 0.5 m. installed on top of the rope guard.

PILOTAGE: SUMED's Mooring Master and his assistant board the tanker 2 miles S.E. of Buoy "S4".

Notifications: ETA messages should be sent by cable via Alexandria/Port Said Radio on leaving previous port. Cables should be prefixed "For urgent delivery send via Telex 54108 or 54033 SUMED UN" and be confirmed 72, 48 and 24 hours prior to arrival. (Day and Night berthing and operation). Arrival draft should be indicated.

ANCHORAGES: Tankers can anchor to the S.E. of the buoyfield, 2 miles S.E. from Buoy No. 4.

RESTRICTIONS: *Maximum Weather Conditions for Occupying SBMs:*

The SBMs are designed to accommodate tankers up to the following weather conditions.

Wind velocity (knots)	35 (65 km./hr.)
Maximum tidal range	2.0 m.
Maximum wave height	3.4 m.
Maximum surge/seiche conditions	0.5 m.
Current: Surface	2.0 knots.
Seabed	1.0 knot.

The above conditions are not relevant to the safety of the ship but to the safety of the buoys. Consequently the Mooring Master shall have the authority to decide whether the ship should remain moored or vacate the buoy due to adverse weather conditions.

MAX. SIZE: The four berths are spaced one from the other so that each has:

Mooring Area Radius: 410 m. for S1 and S2 (accommodates vessels up to 350,000 d.w.t.); 320 m. for S3 (accommodates vessels up to 150,000 d.w.t.); 410 m. for S4 (accommodates vessels up to 500,000 d.w.t.). Manoeuvring Area Radius: For S1, S2 and S4, 1,220 m.; for S3, 915 m.

Water Depth and Draft Limitations:

For S1 and S2:	85 ft. minimum water depth 75 ft. maximum draft
For S3:	65 ft. minimum water depth 55 ft. maximum draft
For S4:	135 ft. (40.9 m.) minimum water depth. Maximum acceptable draft unlimited.

Minimum Size: 70,000 d.w.t. ±5% with minimum cargo discharge of 50,000 metric tons of any one type of crude oil.

HEALTH: Vessels proceeding to Ain Sukhna must be in possession of the following documents:

(a) International Maritime Declaration of Health.
(b) Valid Derat or Derat Exemption Certificate.
(c) Valid Vaccination Certificates for all passengers and crew members.
(d) Certificates of inoculation against any communicable diseases prevailing at the Ports of departure.

Masters are required to immediately notify SUMED by cable in the manner outlined in "Radio – ETA" in case of any epidemic diseases or illness onboard while the vessel is bound for Ain Sukhna. The same message is to be conveyed to the terminal as soon as an HF or VHF contact is established, at least 6 hours before arrival.

RADIO: *ETA:* In order to avoid undue delays it is essential that Masters of vessels proceeding to Ain Sukhna Terminal cable their ETAs to "SUMED" Alexandria.

The cable to be prefixed quote "to be conveyed via telex (54108) or (54033) SUMED UN Operations Office-Oil Movement" unquote.

ETA notifications to be sent as follows:

Immediately upon sailing from loading port/s
In case of a change in ETA exceeding 6 hours
72, 48 and 24 hours prior to arrival.

Confirmation of ETA: An additional contact can be made with the Ain Sukhna Terminal on HF 2182 kHz and 4139.5 kHz, 24 hours before arrival.

Moreover, Masters are required to contact the terminal on VHF 6 hours before arrival on Channel 16 (or preferably Channels 78 and 79 if available).

Information from the Vessel: All vessels proceeding to unload their cargoes at Ain Sukhna are required to convey the following information to SUMED.

(a) Immediately upon sailing from loading port/s vessel is to cable, in the manner outlined in "Radio – ETA" the following information:

(i) ETA (in GMT) and expected arrival draft at Ain Sukhna, vessels are requested to arrive even keel.
(ii) All B/L data and ship's figures at loading port/s, stating quantity of free water on board after loading.
(iii) Whether the vessel loaded on top of slops stating grades of crude that were commingled with residues, quantity and API of contents of slop tank/s.
(iv) If the vessel is loaded with more than one grade of oil, Master is requested to confirm ability to unload according to the sequence agreed upon with the shipper (vessel's owner or charterer as the case may be).
(v) SUMED is to be immediately notified in the case any repairs are required that could delay commencement of discharging.
(vi) Estimated time for unloading the cargo if no restrictions are imposed by shore.

(b) On arrival at Ain Sukhna the following written information is to be handed to SUMED's Mooring Master:

(i) Whether vessel equipped with inert gas system. Vessels arriving with gas inerting blankets should, on arrival, depressurise their system sufficiently to allow visual sampling and ullaging of cargo tanks. Upon completion of ullaging, pressurisation of inerting system shall be resumed and maintained throughout discharge.
(ii) Whether the vessel has external impressed cathodic protection.
(iii) Vessel's readiness to connect 2×16 in. hoses ASA 150.
(iv) The pressure which the vessel expects to maintain at the ship's rail and which is required to be a minimum of 100 p.s.i. unless otherwise specifically requested in writing by shore.
(v) Whether vessel requests to perform crude washing and in the affirmative the relevant check list should be filled in by the Master. See "Crude Oil Washing" under "Discharging".

(vi) Full names and addresses of Owners, Managers and Charterers of the vessel and their Agents in Egypt if any.
(vii) Whether the tanker's Owners/Bareboat Charterers are members of a P & I Club stating name and address of such club, if available.

Information from Terminal:

The following information will be given to the vessel upon arrival at the anchorage area or when SUMED's Pilot boards the vessel:
(i) Any expected pre-mooring delays and their likely duration.
(ii) Any special mooring instructions.
(iii) Details of any restrictions on discharging rate.

All such restrictions and their duration will be confirmed in writing by SUMED.

VHF: Channels 16, 78 and 79.

TUGS: Tug "Sukhna" 3,200 h.p. with fire fighting and with anti-pollution equipment is available as required.

Supply Vessels and Tugs: "Sukhna (2)" 6,000 h.p. with firefighting and anti-pollution equipment available as required.

Mooring Launches: 6×500 h.p. mooring launches assist in mooring and hose operations with firefighting and anti-pollution equipment are available as required.

BERTHING: Ain Sukhna Sea Terminal consists of 4 sea berths all of which are single point mooring buoys (SBMs).

2 buoys for vessels up to 350,000 d.w.t., 1 large buoy for vessels up to 500,000 d.w.t. and one small buoy for vessels up to 150,000 d.w.t..

Subject to SUMED's prior approval and acceptance in each case, the buoys can accommodate vessels larger than those specified above within the following limits:

Buoy (S2) up to 400,000 d.w.t.
Buoy (S3) up to 200,000 d.w.t.
Maintaining all other length and draft limitations.

Each of the 2 buoys (S1 and S2) are connected to shore by a submarine line 48 in. (1.22 m.) in diameter and approximately 8 km. in length.

The small buoy is connected to shore by a submarine line 42 in. (1.067 m.) in diameter and approximately 5 km. in length.

Buoy S4 is connected to the shore by a submarine line of 52 in. (1.2458 m.) diameter and approximately 9 km. in length.

Ropes: Buoys S1 and S2 are equipped with twin 18 in. circumference nylon ropes each 180 ft. long ending with a 20 ft. chafing chain 2.75 in. diameter. A support buoy is connected to the chain.

The port side mooring rope has a 350 ft. polypropylene 10 in. pick-up rope with a 3 ft. soft eye at the end.

The starboard side is the same but the pick-up rope is only 150 ft.

Buoy S3 is equipped with a 15 in. diameter grommet 180 ft. long, ending with 20 ft. chafing chain 2.75 in. A support buoy is connected to the chain, the mooring rope is 350 ft. long polypropylene, 10 in. diameter, with a 3 ft. soft eye at the end.

Buoy S4 is equipped with a 16 in. diameter grommet 180 ft. long, ending with a 20 ft. chafing chain 3.1875 in. A support buoy is connected to the chain. The mooring rope has 350 ft. long polypropylene, 10 in. diameter with a 3 ft. soft eye at the end.

In case the ship is not equipped with chain stopper, a pair of 12 ft. or 20 ft. snotters with shackles will be supplied for connecting the chafing chain to ship's bollards.

Mooring Master Duties: When the Mooring Master boards he will advise the ship's Master or officer in charge of the bridge on the approach to the berth, arrangements for mooring and unmooring, connecting and disconnecting of the hoses, and all other operations within the berthing area. The Mooring Master will submit and receive from the Master all forms, documents and papers required, to be filled and signed or received by the Master.

Adequate Lighting: There must be adequate search lights rigged on both wings of the bridge when mooring at night to facilitate running lines to the buoys.

VHF: The Mooring Master will be in direct charge of the portable VHF ship to shore radio telephone communications on Channels 78 and 79.

Mooring: Pick-up from the mooring boat:

2 wire rope snotters of 12 ft. or 20 ft. length (to suit tanker bollard location).

Weight of 12 ft. – 80 kg	23 in. diameter
Weight of 20 ft. – 135 kg.	23.8 in. diameter

2 bow shackles 55 tons SWL (weight of shackle = 43 kg.) or 2 bow shackles 75 tons SWL (weight of shackle = 68 kg.) for tankers over 130,000 d.w.t.

Move these items to bow.

Tool box.

Slip the soft eye of the snotter onto bollard having a good lead to forward fairlead. The forward winches should be tested, drained and be in good working order.

Ensure that both anchors are secured by stoppers in the hawse pipe. Anchors must not be dropped at the berth.

Prepare messenger line, (about 10 in. circumference × 500 ft. length polypropylene), and pass through the forward fairlead or chain stopper and lower as directed by Mooring Master, starting at the port side.

The mooring boat will fasten this messenger to the 10 in. × 350 ft. polypropylene pick-up line on the buoy mooring system.

Upon the Mooring Master's signal, heave away until the chafing chain is in the fairlead or Panama lead with the support buoy close outside.

Shackle the free end of the wire snotter to the open end link of the chafing chain.

Ease back on the pick-up line until the weight falls on the bollard wire snotter.

Should the vessel have a "Smit" type towing bracket, release the pin, install the open link and lead the pick-up so that the end link of chain is directly fastened to the open link with the bow shackle. If the ship is equipped with chain stopper, pass the ship's messenger and buoy pick-up rope through the chain stopper and heave away until you can lock one of the big opened links (the vertical one).

Same procedure will be adopted to the starboard polypropylene pick-up rope of 150 ft. length connected to the buoy mooring system.

Mooring Sequence:

Prompt Berthing: SUMED will make every effort to moor ships arriving according to agreed schedules as promptly as operational circumstances permit.

Notice of Readiness: To be tendered when vessel arrives at Ain Sukhna anchorage area provided that vessel is ready in all respects to unload her cargo. NOR will be accepted according to SUMED's agreement with the relevant shipper.

Arrival Time: Arrival time will be considered at the time the vessel anchors.

Cargo Operations: Vessel moored to the SBMs must limit their stay to the allowed berth occupancy time stipulated in the transportation agreement between SUMED and the relevant shipper.

Unless vessel sizes are otherwise classified in the said agreement, the allowed berth occupancy time is as follows:

D.W.T. tonnes	*Buoy Occupancy* hours	*Lay Time* hours
More than 320,000	52	62
250,000 to 320,000	42	52
200,000 to 250,000	36	46
Less than 200,000	28	38

Delay due to weather: In the event that berthing delayed on account of adverse weather conditions the vessels will maintain their position in line.

Port Closure: Should vessels be requested to vacate the berth on account of adverse weather conditions closing the port, they shall keep in contact by VHF with the terminal in order to be readily available for re-entry as soon as the terminal so requires, after weather conditions permit.

Port Re-opening: When the port is re-opened discharging will recommence according to the firm schedules agreed upon with SUMED's shippers.

Vessel refusal: SUMED reserves the right to decline to berth a specific vessel should it consider that such vessel's condition or facilities are unsafe.

Unmooring: Take the weight of the moorings on the pick-up starting with the starboard side first, using windlass. Unshackle the wire snotter (or unpin the "Smit" Brackets) or unlock the chain stopper.

Slack the pick-up until the support buoy is in the water. Pay out the pick-up line (as ship clears from the berth). Return the wire snotters, bow shackles and tool box to mooring boat prior to Mooring Master's departure.

The tug and mooring launches will be in attendance.

HOSES: SBMs No. 1, 2 and 4 contain twin crude floating hose strings each 307.2 m. (1,008 ft.) in overall length consisting of:

22 hoses	24 in. × 35 ft.
1 hose	24 in./20 in. × 35 ft.
1 hose	20 in./16 in. × 35 ft.
3 hoses	16 in. × 35 ft.
1 hose	16 in. × 30 ft.

SBM No. 3 contains twin crude floating hose strings each 274.25 m. (905 ft.) in overall length.

Each consists of:

21 hoses	20 in. × 35 ft.
1 hose	20/16 in. × 35 ft.
3 hoses	16 in. × 35 ft.
1 hose	16 in. × 30 ft.

All tail hoses are 16 in. in diameter and the gear attached to each of the 16 in. crude oil hose tails consists of a lifting eye, butterfly valve, spool piece with camlock and light weight blind flange.

The camlock is suitable only for connections with tanker manifold flange of 16 in. ASA 150.

Quick Release Safety Couplings: Quick couplings (Camlock) are connected at each hose end and they will be used as follows:

In case of emergency the butterfly valve shall be immediately closed and the quick coupling immediately disconnected.

Safety breakaway coupling: To part the hose and block each part to avoid leaking into cases:

1. Excessive pulling stress on the hoses.
2. Excessive back pressure in the hoses.

Hose Connecting and Disconnecting: The connecting and disconnecting of cargo hoses shall be performed by the crew of the vessel under instructions from SUMED's Mooring Master.

Preparations: The tanker crew are required to lift 2×16 in. crude hose strings and connect them to the vessel's port side manifold.

To avoid delays the following items should be prepared prior to berthing, otherwise the vessel will not be considered ready to discharge.

2×16 in. standard 150 ASA flange connections in position on selected lines for discharging crude oil.

Port derrick with a minimum 10 ton SWL rigged for maximum height and load lifting. The derrick shall be guyed to plumb the vessel's rail-hose bolster bar at the vessel's manifold.

If possible, the topping lift of the boom shall be on its own winch. All winches shall be tested, drained and in ready running condition.

Drip trays, sand bags, dispersant and fire fighting equipment in position.

Tools, gaskets, nylon lifting slings and other equipment will be supplied on board from the mooring boat.

Equipment to be Onboard Before Berthing: In order to expedite the connection of the hoses the following equipment must be available.

2 polypropylene messenger lines
(about 10 in. circumference 500 ft. long).
Sledge hammer.
Large crowbar.
Large marlin spike.
Large flashlight.
Bags of sand.

Manifold on the port side must be used as follows:
All manifolds to be ready with 16 in. flange ASA 150.
Hose derrick rigged.
Derrick fall fitted with cargo hook 10 ton SWL.
Heaving line.
2 × 1-1-2 ton pullers.
Copper hammer.
Nylon lifting slings.

DISCHARGING:
Terminal Design: The design of the discharging terminal is based on the following flow rates with crude oil characteristics as follows:

Viscosity		= 17 cst
Specific gravity		= 0.867 kg/cu.cm.
SBMs No. 1, 2 & 4	Max.	12,500 tonnes/p.h. 200 p.s.i.
	Min.	7,400 tonnes/p.h. 100 p.s.i.
SBMs No. 3	Max.	7,400 tonnes/p.h. 120 p.s.i.
	Min.	5,900 tonnes/p.h. 100 p.s.i.

Inert Gas System: Vessels equipped with inert gas system are to depressurise tanks before berthing in order to allow for sampling and ullaging upon arrival and after completion of discharge to check remainders on board. Pressurisation of inerting system should be resumed as soon as ullaging and sampling are completed and throughout the discharge.

Crude Oil Washing: COW is usually acceptable if the ship can maintain an average flow rate of no less than 7,400 tonnes/p.h. (100 p.s.i. at ship's rail throughout discharging). However, COW is subject to the terminal's approval depending on both operational circumstance and if this operation has been previously carried out by the vessel.

When vessel requests permission to perform COW the Master must respond in writing to the "Crude Oil Wash Check-off List".

COW of slop tank is prohibited.

Crude Oil Wash (COW) – Check-off List: Vessels requesting permission to perform crude oil wash while unloading at Ain Sukhna, are requested to respond to the following check-off list:

Inert gas system is fully operational and tested.

Each tank will be positively pressurised and method of recording pressure will be available.

Each tank will be kept below 8% oxygen before and during operation.

Inert gas system flue gas oxygen content will be continuously monitored and maintained below 8% oxygen.

Oxygen alarm in cargo control room set to give visual indication when to abort crude washing.

Pressures in cargo tanks are available to vessel's control room personnel.

Washing systems have permanent steel pipework and will be pressure tested to 10 to 15 p.s.i. above expected working pressure but to minimum of 150 p.s.i. prior to use.

All tank openings are sealed and remote tank gauging system is operational.

All necessary throttling of discharge for crude spraying will be done on vessel's valves.

There is a responsible designate person in charge of operation. (Give name.)

Effective communication will be maintained between vessel and shore.

Water will not intrude into the crude wash cycle.

Washing to be commingled and discharged at the same time with the rest of the cargo.

Previous crude wash exprience of key personnel is (list).

Tanks crude washed last 2 voyages are (list).

Any additional vessel requirements or comments.

Emergency Communication: If ship-to-shore communication fails the ship's whistle shall be sounded continuously. Discharging shall be immediately stopped and will not be resumed until communications have been re-established.

Overside Lighting: During night discharging sufficient overside lighting must be provided to readily detect any oil spill so that immediate appropriate action may be taken.

International Code of Signals: During discharging operations the following signals shall be displayed:

By Day : The International Code flag "B".
By Night : A red light visible all round the horizon for distance of at least 2 miles.

Unloading Procedures: Upon being informed by the vessel's Master or responsible officer that the vessel is ready to start discharging, the Mooring Master will contact the Terminal Control Room to co-ordinate the commencement of unloading in accordance with the terminal's instructions.

The control room operator will normally give a "standby warning" by VHF approximately 10 minutes before the shore tanks are ready to receive cargo.

When the request to commence discharging is received the Mooring Master will ensure that discharging commences at slow speed. This starting procedure will always be adhered to.

Discharging will commence utilising 1 pump only with circulating system and when it has been confirmed that there is no significant rise in pressure on the discharging line which could indicate a blocked or closed valve on the shore or ship's discharging system, the crude oil will be discharged at the steady operating flow previously agreed upon.

Should there be any significant rise in pressure, discharging must be immediately stopped. The ship will be advised to check the on-board systems, take any necessary remedial steps and inform the terminal's control room.

At the same time the underwater and floating hoses should be checked to ensure that there are no obstructions.

Should the Master be requested to increase or decrease the cargo discharging rate this should be promptly implemented provided the vessel's pumps are capable of an increased rate.

SUMED may allow vessels to simultaneously ballast while unloading provided they are equipped to properly segregate the ballast and avoid any possible commingling with the cargo. Pumping ballast water into the sealine is strictly prohibited.

Any suspension and subsequent resumption of discharging of cargo must be logged both ashore and in the "Tanker Time Sheet".

All events regarding mooring, commencement, termination of unloading, stoppages, if any, and unmooring are both logged and recorded ashore at the terminal's control room as and when they are received from the Mooring Master.

These events shall jointly be logged in the Tanker Time Sheet by the vessel's Master and SUMED's Mooring Master.

Vacating Berth: Vessels shall vacate berth immediately after disconnection of hoses.

Emergency Shut-Down: In case of emergency such as fire, sudden deterioration of sea and weather conditions, failure in ship to shore communications, etc, the discharging operations must be immediately suspended at the request of the Mooring Master. The ship's discharging pumps must be stopped immediately, the butterfly valves of the floating hoses and the manifold valves must be closed.

Depending upon the reasons causing the emergency, the ship's Master and Mooring Master will decide whether or not to disconnect the hoses and vacate the berth. In case of dispute the final decision will be taken by the Mooring Master.

Sampling: Representative samples of the cargo will be taken either from the vessel's cargo tanks or from the online automatic samplers.

The samples will be divided into 3 equal portions of about 1 gallon each, one portion will be handed to the quality control laboratory, the second to the ship's Master (sealed by SUMED) and the third retained by SUMED for 60 days (sealed by the Master).

The ship's Master will sign a receipt on receiving the ship's sealed and stamped container of the sample.

MEDICAL: Neither medical nor hospital facilities are provided by SUMED. In case urgent medical assistance is required the vessel should contact SUMED's Harbour Master by VHF radio. Private doctors and facilities are available at Suez via Government Agents.

CONSULS: Consular or diplomatic representatives for most maritime nations are in Cairo.

REPAIRS: Masters of vessels discharging at Ain Sukhna Terminal are instructed that under no circumstances may engines be shutdown for repairs whilst their vessel is moored to the SBMs. There are no facilities at Ain Sukhna Terminal for repairs. Repair facilities are available at Suez.

It is emphasised that all vessels at the SBMs must be prepared to clear immediately on instructions from the Mooring Master.

REPATRIATION: Crew changes are only permitted via Government Agent.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at Terminal.

GARBAGE DISPOSAL: Not available at present, but will be available during 1993 and will be carried out by Sumed.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Egyptian Pound (LE.).

WEATHER:
Climate: The climate in the Ain Sukhna area is generally good. Summers are hot and dry and winters are relatively cool.

The visibility is usually excellent with few sand storms and infrequent fog. Sub-zero temperatures are unknown and there are very few rain squalls.

Summary of Weather Statistics (1884 – 1967):

Average rainfall year	0.8 in.
Mean maximum temperature	84°F (29°C)
Mean minimum temperature	62°F (16.7°C)
Extreme maximum temperature	111°F (44°C)
Extreme minimum temperature	35°F (1.7°C)
Average relative humidity	60%

Winds: The prevailing winds at Ain Sukhna are from the N.W. throughout the year.

Tides: The tidal range is up to a maximum of 7.4 ft.

Waves: The estimated characteristics of the 100 year extreme waves are:

Maximum height	12.0 ft. (3.7 m.)
Maximum crest elevation	11.0 ft. (3.3 m.)
Period	7.5 secs.
Length	280 ft. (85 m.)
Speed	22 knots (41 km./hr.)
Direction from	North

Tidal Streams: At Ain Sukhna the tidal streams set parallel to the coast line Northwards on the flood tide and parallel to the coast Southwards on the ebb tide. Maximum rate is 0.5 knots (0.9 km./hr.) at the surface.

Currents: There is no fixed current in this area and any flow is caused entirely by the prevailing tidal stream and winds.

Sea Salinity: The Red Sea and Gulf are extremely saline and salinity is around 40,000/50,000 parts per million.

Sea Temperature: The surface temperature of the sea ranges between 66°F (19°C) in February and 80°F (26.7°C) in August.

GENERAL:
Navigation: When entering, manoeuvering or leaving the Port Limits of Ain Sukhna, the Master has to conform with the conditions setforth in this Manual and has to adhere to the 1972 International Regulations for preventing Collisions at Sea which will be complied with at all times.

The Master guarantees that his vessel fulfils all navigational and worthiness conditions in particular those required for vessels carrying dangerous cargo, (crude oil) in accordance with the provisions setforth in the Appendix for vessels carrying Dangerous cargo annexed to Rules of Navigation of the Suez Canal Authority to the extent that such provisions are applicable.

Master should submit the respective certificates and declarations whenever required in this respect.

Helicopters (available in emergencies): Should the services of a helicopter be required by SUMED for any purposes whatsoever the vessel will be given a minimum of 30 minutes warning notice before the helicopter's approach in order that cargo operations can be stopped and all tanks and vents closed.

A responsible officer should be on deck to assist the helicopter in making the approach to the vessel. Although the safety of the helicopter remains at all times the responsibility of its pilot, helicopter services shall not be employed in any event without the express prior consent of Shipper and vessel's Master.

Supplies: Stores and supplies are available through an Agent and can be delivered from Suez to Ain Sukhna anchorage area after unloading but entirely at the vessel's own risk.

Government Officials: A.R.E. officials, such as Customs Director, Quarantine Officer and Immigration Officer are stationed at Ain Sukhna. Should Customs guards be stationed on board vessels whilst moored it is expected that vessels will extend all courtesies to them and/or other officials while on board.

Ship's Readiness: This terminal is an open roadstead and therefore, during the time a ship is moored, the engines must be ready with full power for immediate use.

Vessels at berths must clear immediately upon advice of the Mooring Master or as directed by SUMED's terminal superintendent. Ship's personnel should be at their respective stations at all times during mooring, unmooring and cargo transfer operations.

Courtesy Flag: All vessels are required to fly A.R.E. Ensign on the foremast during daylight hours.

Quarantine Regulations: The rules governing quarantine regulations are the same as for Suez.

Unauthorised Craft: The presence of unauthorised craft alongside is extremely hazardous.

SUMED prohibits the boarding of individuals other than those authorised to do so in the bona fide conduct of the vessel's operation. No unauthorised person is allowed to board the vessel whether at anchorage or while moored.

Contraband: SUMED prohibits unauthorised craft from coming alongside vessels. To avoid the possibility of undesirable items getting aboard vessels, it is requested that Masters discourage craft coming alongside whilst the vessel is in the terminal.

AGENCY SERVICES: Not required under normal circumstances.

AUTHORITY: Arab Petroleum Pipeline Company (Sumed), 431 El-Guish Avenue, Loran, Alexandria, Egypt. Postal Address: P.O.Box 158, El-Saray, Alexandria, Egypt. *Tel:* 5866723, 5866711, 5866712. *Telex:* 54033, 54108 Sumed Un. *Contact:* Captain A.Sultan, Sumed Marine Manager.

Port Authority: Ain Sukhna Terminal, Postal Address: Sumed – Suez. *Tel:* (062) 221918 – Suez. *Telex:* Headquarters Alexandria. *Contact:* Captain M.Badawi, Ain Sukhna Marine Manager.

ALEXANDRIA (Including El Dekheila): 31.09 N. 29.53 E. (See Plan)

DOCUMENTS:

4 copies of Crew List.

Complete set of Manifests covering all cargo on board showing names of Shippers and Consignees.

4 copies List of Passengers in Transit.

Landing cards for passengers landing finally in A.R.E. and for those landing in A.R.E. in transit.

4 copies List of passengers finally landing in A.R.E. (if any) together with their addresses in A.R.E.

Deck log books showing date of last call at a A.R.E. port, completed up to the time of arrival.

For Quarantine: Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

For Immigration Officer:

Arrival Immigration Form, duly completed.

1 Passenger List.

List of Passengers Finally Landing, in duplicate.

Crew List.

Valid passport with entry visa is required for landing in A.R.E. for passengers landing. Emergency visa can be granted on arrival if so required.

For Customs Use:

Bonded Stores List, in duplicate.

Crew List and Passenger List in duplicate.

PILOTAGE: Compulsory. Pilot boards off harbour entrance. International code signals used.

Vessels are not to proceed from the waiting area (Lat. 31° 12.6' N., Long. 29° 44.5' E. with radius of 1.5 miles) without a Pilot onboard.

RESTRICTIONS: Entrance channels 13.0 m. depth × 220 m. width and 9.14 m. depth × 91.4 m. width. Arriving vessels should keep 50 miles offshore between sunset and sunrise.

MAX. SIZE: Up to 32 ft. draft at general cargo berths in Alexandria.

Anchorage: Alexandria Inner Anchorage in Western port can accommodate vessels up to:

Length: 229 m. (750 ft.).

Draft: 38 ft.

Such vessels can discharge into barges on condition that kind of cargo is allowed to be unloaded into barges instead of at berth.

Vessels with length/draft exceeding the above can be accommodated at Dekheila Harbour.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor. The Quarantine Doctor meets ships whilst entering the port and ships are boarded in turn.

In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at an A.R.E. port, the vessel is put under compulsory quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

1. The vessel must be a regular liner known to the Quarantine Authorities and have a doctor on board.
2. Details shown on the Quarantine Statement should be wirelessed to the Quarantine Authorities 24 hours prior to ship's arrival.
3. Masters of vessels must declare before their arrival any accidents, which might have taken place on board prior to the arrival in port.
4. The ship must not have called at any infected port.

RADIO: Alexandria Radio, call sign SUH, operating 24 hours daily on 444, 500 and 8578 kHz and between 0600 to 1800 GMT on 12,974 kHz. Also harbour VHF Channel 16.

TUGS: 5 tugs available up to 1,200 h.p.

BERTHING: Alongside quays in depths up to 39 ft.

Refrigerated store with capacity of 6,000 tons.

Ro/Ro facilities available.

Cement to silos and bagged in heavy cloth (no paper bags permitted).

Coal: Discharged at Berths No. 63 and 64. Max. draft 33 ft. 4×25 ton cranes. Rate 10,000 tonnes per day.

Cranes: Capacity 5 tons-50 tons. Floating cranes of 70 tons, 100 tons and 120 tons capacity.

Fertiliser Terminal: Length of quay 447 m. Depth alongside 10.0 m.

Timber: Handled at 3 quays. Depths 7.0 m. – 9.0 m.

Grain: 2 silos, 1×48,000 tonnes and 1×100,000 tonnes. Depth alongside 10.0 m. Max. size 40,000 d.w.t.

El Dekheila: Located 7 km. West of Alexandria and managed by Alexandria Port Authority.

Industrial Port: Access channel: Length 3.5 km. and depth 20.0 m. Turning circle: 750 m. diameter and 20.0 depth. Approach channel: Width 250 m., depth 20.0 m. One jetty (2 berths). Length 640 m. Depth alongside: Inner Berth 16.0 m. Outer Berth 20.0 m. Max. Size: 60,000 d.w.t. and 160,000 d.w.t. respectively, max.draft 18.0 m. An additional berth to handle vessels up to 250,000 d.w.t. may be constructed later. 2×30 ton capacity grab cranes and 2 belt conveyors for handling iron ore pellet at 1,000 t.p.h. each (average daily 11,000 tons)(900 t.p.h. for coal).

Commercial Port: Access channel 1.2 km. in length is a branch off the access channel to the industrial port. Depth of channel 14.0 m. Width 210 m. – 150 m. Commercial port will have over 1,500 m. of berthing space with 15.0 m. of water alongside. Cargoes to be handled will include containers, general cargo, timber, chemicals and Ro/Ro vessels. Available: 300 m. of berthing space with depth 15.0 m. and max.draft 13.0 m.

CONTAINER FACILITIES: Length 700 m., depth alongside 14.0 m. 3×32 tonne container gantry cranes, 2×32 tonne transtainers and 4×42 tonne forklifts.

MEDICAL: All facilities available. International Vaccination Certificates required.

TANKERS: Petroleum Basin: in West part of Outer Harbour, Berth Nos. 3 and 4, depth alongside 38 ft., max. length 700 ft., draft 35 ft. Berth Nos. 3 and 4: in East part of Outer Harbour. Stern to moorings.

It has been reported that tankers are required to take on ballast in excess of that deemed to be necessary by the Master, even in fine weather. One Master was ordered to bring his forward draft to 21 ft. Once the vessel was alongside a charge was made for deballasting the vessel.

LNG/LPG: Max. LOA 122 m. Max. draft 28 ft.

FRESH WATER: Available by barge, and alongside most quays.

FUEL: Available by barge.

REPAIRS:

Alexandria Shipyard: Builds vessels up to 40,000 tons. One drydock capacity 85,000 d.w.t., cranes with up to 30 tons capacity. One drydock capacity 20,000 d.w.t., cranes with capacity up to 30 tons. Fully equipped engineering workshops capable of carrying out extensive repairs alongside quays length 1,200 m. Depth alongside 11 m.

Alexandria Ship Repair Co.: Ship repairs including engine repairs and boiler repair. Fully equipped workshops.

The Egyptian Shipbuilding and Repairs Co.: Floating dock for ships up to 12,000 d.w.t. 100 ton floating crane. All types of hull and machinery repairs possible.

HOLIDAYS: See "Suez Canal".

GARBAGE DISPOSAL: Drums are provided alongside and are collected every morning by Port Authority. Contact Alexandria Port Authority. Tel: 800100.

WASTE OIL DISPOSAL: Three barges are available for waste oil disposal of 4 tons, 25 tons, and 250 tons capacity. Charges are U.S.$ 10/ton. Contact Marine Services Department of Alexandria Port Authority. Tel: 800100/807335.

SEAMAN'S CLUBS: Seaman's Club situated at Sidi-el-Metwally.

DEVELOPMENTS: Control tower with radar and VHF being constructed.

SHIPMASTER'S REPORT: October 1987.

Documents:

12 copies Crew List.

2 copies Crew Declaration.

2 copies Manifest (Ship's Stores, Bonded Stores, Currency, etc.).

1 copy Health Declaration.

8 copies Cargo Manifest.

All Passports.

Vaccination Certificates.

Port Health Officials board on arrival.

Immigration boarded with the Security Police about 3 hours after arrival. They require all passports and issue shore passes. Prior to departure they again check all passports and collect all shore passes. The Security Police seal the radio room.

Customs Officers boarded 24 hours after arrival. They sealed the bond and left the beer room open.

Clearance on departure is given by Agent and endorsed by Immigration. Pilot sights Clearance before departure.

Pilotage: Vessels always take 2 pilots. One for Great Pass and one for Inner Harbour (Berthing). Great Pass Pilot boards about 1 mile W.N.W. of Great Pass Beacon from large launch with blue hull and white superstructure (ex-naval craft).

Berthing Pilot boards inside Outer Breakwater near the Petroleum Harbour, or off New El Dekheila Mineral Jetty. On departure, Pilot leaves at the same position.

The Quarantine Flag (Q) and Pilot Flag (H) must be displayed.

Great Pass Pilot leaves at Great Pass Beacon. No night pilotage for tankers. Pilots operate in winds up to about Force 6, although swell is the important criteria.

Approaches: The coast is low and featureless. Ras El Tin Lt. observed at 20 miles. El Agami Island and El Atta Fort observed on radar at 30 miles.

Channel: Depths are as charted. The navigation marks are poor, buoys either out of position or unlit, Great Pass Beacon destroyed.

The new channel of 20 m. depth to El Dekheila Mineral Berth is reported by pilots to lie 153°, commencing just West of Great Pass Beacon to 31° 09.20' N., 29° 48.85' E.

Anchorage: As per BA. Chart No. 243 Waiting Area. Very exposed, in Winter months, can be untenable due to wind and heavy swells.

Dependent on density of ships, most small vessels anchor in S.W. corner of Waiting Area. Vessels can approach coast at night, no restrictions advised.

We tried to contact Port Control on VHF Channel 16 at 0300 hrs. without success, so sent telex on anchoring. We had previously advised Port Authority by telex of approach course and speed and ETA at Waiting Area. Only 2 ships waiting at anchor on this visit.

VHF: Channel 16 seems to be used for all Pilot and Port operations. It is difficult to raise Pilots/Port Control at night or before 0600 hrs. Port Authority has telex which is useful - 54310 APA UN.

Tugs: 8 tugs of 2,500 h.p. available.

Port Regulations: Up to 270 ft. no tugs required. 270 ft. to 400 ft., 1 tug required. Over 400 ft., 2 tugs required.

For Petroleum Harbour we had one tug fast forward, using ship's line, entering and leaving. Tugs are well handled.

Berthing: Butane for E.G.C.P. discharged at Berths No. 1 and 2 on Quarantine Breakwater in Petroleum Harbour.

Both berths in a poor state of repair, fendering also poor. Vessel berthed port side alongside. Starboard anchor let go to 2 shackles approaching berth which keeps bow off forward landing (See BA. Chart No. 3119).

Moorings: 3 head lines, 2 stern lines, 2 stern back springs and 2 head back springs from after end of main deck. This seems to work with no hull contact with unfendered concrete.

Berths exposed to N.W. winds. Ship's gangway used. Petroleum Harbour can take up to 750 ft. length and 11 m. draft. (Re-checked several times as Echo sounder and chart indicate considerably more water. With Easterly wind depth can fall about 1.0 m.)

Berths as per BA. Chart No. 3119, Berth No. 3 (Product Pier), vessels berth head in. Berths Nos. 4 and 5 (Crude Oil), vessels berth head out. Berths Nos. 85, 86 & 87 now flat faced to make stockyard for cattle ships, also used to load oil products from road tankers.

In Outer Harbour area 10 m. is generally the maximum draft, and Pilots report channel dredged to 13.4 m. and water as charted elsewhere. Pilots report greater draft handled at Container Quay (31° 10.3' N., 29° 51.9' E.)

New LPG (Ethylene) Sea Island in position 31° 08.9' N., 29° 49.13'E. Berthing on West side of Island, head out starboardside to.

One Pilot stays onboard throughout stay at Island with 1 tug on standby nearby.

Mineral Pier at El Dekheila now in full operation with berthing on west face, port side too, head in. Pilots report 20 m. depth alongside. So far, vessels up to 110,000 d.w.t. handled, for iron ore and coal serving new steel mill nearby.

Cargo Handling: Ambient temperature. Butane discharged for domestic use at Berths Nos. 1 and 2 into 3 × 3,600 cu.m. and 4 × 1,000 cu.m. pressure tanks situated 4 km. from berths. 6 in. line – 300 ASA coupling. Rubber hose, ship's derrick required.

Maximum back pressure of 10 Bar allowed. With 5 pumps we reached 8.5 Bar. With 2 pumps and a booster pump we again reached 8.5 Bar.

No Surveyor as such, Receiver's Representative is very particular over gauge readings and checking sample cocks for liquid on completion. Density in air differed substantially when compared with Bill of Lading in vacuum.

Generally maximum size of vessel handled is 3,000 cu.m. LPG imports for domestic use will probably stop next year when natural gas comes on stream. At present, there is one shipment every 10 days, mainly from Augusta, Sicily. VHF Channel 6 used to contact E.G.C.P. and Channel 74 for "Petrogas", both are butane receivers.

One Receiver's Representative onboard throughout, cabin required.

At LPG (Ethylene) Sea Island the maximum size of vessel so far handled is 2,600 cu.m. Believe product heated to minus 60°C. on platform before pumping to Chemical Plant about 1.5 km. onshore, through undersea pipeline. Sea Island opened in June 1987. I believe it is taking in feedstock over 1 year then maybe exporting.

Fresh Water: By barge at berths and inner anchorage, and in calm weather at El Dekheila area and Waiting Anchorage.

General: Difficult to contact agent in port.

Make sure "everything" locked and sealed. We kept just one door unlocked. Lifeboats half out and all fire hoses charged and 2 ship's crew on duty at night.

Not necessary to employ watchman or use garbage boat, however you will be encouraged to do so.

Rat guards are required on all lines.

Development/Changes:

1. El Dekheila Mineral Jetty now open, berthing on West face, two large grab gantries in use.
2. Container Quay under construction just south of El Agami Island.
3. Area to West of New Mineral Jetty all built up with flats and houses. Believe El Dekheila Airport no longer exists.
4. Petroleum Harbour Berths Nos. 85,86 and 87 formed into Livestock quay by extending Quarantine breakwater inshore face line 150° to shore line and infilling.
5. Signal Station Tower (Conspic.) in position 31° 09.65' N., 29° 51.10' E. just behind livestock jetty, although of modern construction with microwave dishes, Pilots report not used.
6. New Port Authority Control Tower (Conspic) with Radar Scanner on top at Coal Quay (31° 11.25' N., 29° 52.10' E.).
7. Outer breakwater S.W. Lt. in position 31° 09.92' N., 29° 50.68' E. Fl. R. 4 secs.
8. Quarantine breakwater lighthouse in position 31° 09.93' N., 29° 50.95' E. Qk. fl. 2 G. ev 3 secs.
9. Kamaria Port (works in progress 1984) completed with 2 moving discharge suckers associated with adjacent grain silo.
10. Expunge hulk in position 31° 10.12' N., 29° 51.22' E.
11. Floating Dock located in position 31° 09.10' N., 29° 48.18' E.
12. LPG Terminal located in position 31° 08.90' N., 29° 49.13' E.
13. Expunge Approach Buoy in position 31° 10.95' N., 29° 47.55' E.
14. Fairway Buoy in position 31° 10.25' N., 29° 48.15' E. is unlit.
15. Great Pass Beacon partly destroyed and unlit has been replaced by light in position 31° 10.00' N., 29° 48.45' E.
16. No. 8 Buoy in position 31° 09.70' N., 29° 49.65' E. is unlit.
17. There is a new light at Head of New Mineral Jetty (Fl. G.) in position 31° 08.38' N., 29° 48.48' E.
18. There are 2 new unlit pillar buoys (Green) in position 31° 09.40' N., 29° 49.75' E. and 31° 09.20' N., 29° 48.18' E.
19. Naval Base in position 31° 11.20' N., 29° 51.50' E. is a prohibited area.

AUTHORITY: Alexandria Port Authority, 106 El Horreya Avenue, Alexandria, Egypt. *Tel:* 4834321/24 (4 lines). *Telex:* 54310 APA UN. *Contact:* Rear-Admiral Medhat Ghanem, Chairman. Admiral Hamdy, General Manager. Admiral Mahmoud Yousef, Harbour Master.

DAMIETTA: 31.29 N. 31.45 E. (See Plan)

LOCATION: Damietta Port is located on the estuary of the River Nile, approximately 70 km. West of Port Said and 250 km. East of Alexandria. Access is via an entrance channel from the North which is 11 km. long and 300 m. wide, reducing to 250 m. when approaching the breakwaters. This channel is marked by 18 buoys. Depth is 15 m. The port is linked to the River Nile by a navigational channel which is 4.5 km. long, 90 m. wide and 5.0 m. deep.

The East breakwater extends for 540 m. and the West breakwater for 1,500 m.

DOCUMENTS:

Arrival Declaration.

Crew List.

Cargo Manifest.

Cargo Plan.

Health Certificate.

IMO Cargo.

Bills of Lading (To be presented with copies of the Manifest at time of report).

Berthing Request.

Letter illustrating vessel's ETA.

Vessel Travel Letter.

Letter from Customs Department.

Letter from Quarantine Department.

Travel Licence sealed by Marine Inspection and Control Department.

PILOTAGE: Compulsory for all vessels over 300 g.r.t. Vessels proceeding to Damietta Port are to inform Damietta Port Authority by cable 7 days and 24 hours before their arrival. On arriving at the waiting area, the Master must call the Pilot Station by VHF Channel 16 and advise time of arrival, draft, length, cargo, etc. Vessels are advised to approach through the Northwestern side of the waiting area. Vessels are not allowed to approach the Access Channel without a Pilot on board.

ANCHORAGE: The Waiting Area is located about 11 km. North of the port entrance and is marked by 5 light buoys.

APPROACHES: The Entrance Channel is 11 km. in length, 250 m. – 300 m. wide and has a depth of 15.0 m.

MAX. SIZE: The port can receive vessels up to 250 m. LOA, with draft 12.5 m. for bulk and container vessels, and draft 11.0 m. for general cargo vessels.

HEALTH: Usual international health regulations are to be observed.

RADIO/VHF: Port Authority on VHF Channel 16 throughout 24 hours, working on Channel 14.

TUGS: 4 tugs of 1,500 h.p. – 2,200 h.p. available.

Tug Requirements:

Vessels up to 122 m. require 1 tug.

Vessels over 122 m. require 2 tugs.

A third tug is available at Master's request.

Ship's lines used on departure.

BERTHING:

Berths No. 1 – 4: For container vessels – Length 250 m. each and depth 14.5 m.

Berths No. 5 – 8: For dry bulk and general cargo vessels – Length 200 m. each and depth 12 m.

Berths No. 9 – 12: For general cargo – Length 200 m. each and depth 12.5 m.

Berths No. 13 – 14: For bulk grain carriers – Length 300 m. each and depth 14.5 m.

Ro-Ro berths: At Berth No. 1 and Berth No. 8.

Loading and discharging at bulk berths by shore equipment.

For general cargo, by shore equipment or ship's own gear.

For container berths by terminal equipment.

CRANES/EQUIPMENT:

4 gantry cranes for containers of 40 tons each operated by Damietta Container and Cargo Handling Co. (DCHC).

1 × 30 ton telescopic crane.

4 × 40 ton mobile cranes.

Cargo Gear owned by DPA: 33 forklifts 3-5 tonnes capacity and one lift and transport loader. Cargo gear owned by DCHC: 13 trucks (180-210 h.p.), 19 top-lifters ranging form 15-40 tonnes and 9 forklifts 3-10 tonnes.

96 Reefer points.

BULK HANDLING FACILITIES:

Silo with total capacity of 100,000 tons of grains.

Two berths are devoted to serve the silo and can accommodate vessels up to 80,000 d.w.t.

Two automated, mobile extractors with a capacity of 700 tons/hr. each.

Means of extracting grains from the silo by trucks, cargo trains, and river barges.

5,000 sq.m. shed to pack grain in sacks at a capacity of 3,000 tons/day.

Computerised and remote control for all loading, transport, and extracting operations.

Electronic and ground scales for outgoing and incoming grains.

BRIDGES: None.

STEVEDORES: Stevedoring undertaken by Load and Discharge Co. which is affiliated to DCHC.

MEDICAL: Hospitals available at Ras el Barr (6 km.) and Damietta (8 km.). Inoculations and vaccinations can be carried out. Advance notice only required in an emergency.

DENSITY: 1015.

FRESH WATER: Available at berths.

FUEL: All grades available by barge.

CONSULS: At Port Said.

DRY DOCKS: Shiplift for up to 450 tons.

REPAIRS: Minor repairs undertaken by Damietta Port Authority.

SURVEYORS: Lloyd's and ABS.

CUSTOMS ALLOWANCES: 200 gms. tobacco or 200 cigarettes and one litre of spirits permitted for each crew member to be held out of bond per week.

AIRPORT: Port Said 60 km., Cairo International 180 km.

TIME: GMT plus 2 hours.

HOLIDAYS: Mouled el-Naby, Sham el-Nessim, Labour Day, Revolution Day, Ramadan Bairam, Armed Forces Day (October 6th), Courban Bairam, Hejra New Year.

All holidays can be worked as overtime.

POLICE/AMBULANCE/FIRE: Police 057-325934; Ambulance 057-322217; Fire 057-325967.

EMERGENCY CO-ORDINATION CENTRE: Contact Pilot Station at Damietta Port Tower by VHF Channel 16, or telephone 057-325964.

SERVICES: Firefighting tugs and trucks are available, also international telephone, post and telex services.

BANKS: The Port Authority deals with following banks: National Bank of Egypt, Damietta branch; National Investment Bank and Central Bank of Egypt, Cairo main branches.

STORING: See "Prelims".

1. Ships can be stored by trucks or barges.
2. Yes.
3. Yes.
4. Yes.
5. Yes.
6. Yes.

SHIP SUPPLY SERVICES: Available by boat in the Waiting Area or by shore facilities alongside the berths.

SHORE LEAVE: Crew members are allowed ashore within range of Damietta Town. Short/quick visits to adjacent cities can be arranged through Agent.

IDENTIFICATION CARDS: Seamen's Passports are sufficient.

GARBAGE/WASTE DISPOSAL: Following facilities available:

(1) For dirty ballast – 700 tonnes capacity sea tanker.
(2) For oily bilge water – 700 tonnes capacity sea tanker.
(3) For food waste and cargo associated waste – Garbage vehicle with 10 cu.m. capacity.
(4) For maintenance and other types of waste, two floating units for waste disposal and sediment collection.

OIL POLLUTION: Following equipment used:

(1) Purification boat for oily spots removal.
(2) Self-propelled unit for oil/waste collection.
(3) Static skimmers.
(4) Flammable gas detection devices.
(5) Disperser for unposinous chemicals.
(6) Floating oil booms to encircle oil slicks.

CURRENCY: Egyptian Pound (LE.). Approximate exchange rate in May 1996:

Currency	Exchange Rate
U.S.Dollar	3.39
Pound Sterling	5.34
French Franc	0.69
German Mark	2.40
Italian Lira (100)	22.00
Japanese Yen (100)	3.15
Australian Dollar	2.70

DELAYS: None.

DEVELOPMENTS: Following developments executed:

Establishment of 50,000 tonnes capacity grain bulk warehouse, raising total handling capacity of grain bulk at the port to 150,000 tonnes.

Construction of a new warehouse totalling 5,000 sq.m. Completion of a similar warehouse is underway.

Public utilities networks increased and upgraded to serve new areas used by investors.

Marine pollution facilities modernised and capacities boosted.

A new pilot boat purchased, also another tug is under construction and scheduled for delivery late 1996.

A Free Industrial Zone to the West of the port area inaugurated, totalling 195 acres.

Following projects are underway:

Container yard totalling 214,000 sq.m. to enhance container storing capacities, especially transit containers.

The 4 gantries are being upgrades to match Post-Panamax container motherships.

Preparation of a Commercial Free Zone to the East of the port area of 500 acres.

Extension of silo's berth by 850 m. to reach 1,450 m. in length with draft of 14.5 m.

AUTHORITY: Damietta Port Authority (DPA), P.O. Box 13, Damietta 34511, Egypt. *Tel:* 057-325940/41/42/45. *Telex:* 63024 Dampa UN. *FAX:* 057-325930. *Contact:* Rear-Admiral Ossama Kamel, Chairman. Commodore Hasan Rashid, Vice-Chairman.

EAST ZEIT TERMINAL: 27.51 N. 33.36 E.

LOCATION: The C.A.L.M. is located in position Lat. 27° 51' N., Long. 33° 36' E. and is approximately 85 km. North of Hughada.

ANCHORAGE: Tanker should call East Zeit Terminal before approaching and enquire if necessary to drop anchor in the anchorage area.

Vessel is not permitted to anchor outside the anchorage area.

Waiting Area: South of C.A.L.M. The Southern half of a circle of 1 mile radius around position: Lat. 27° 48.5' N., Long. 33° 37.0' E., depth 20 m. – 44 m. with 39 m. at centre.

RESTRICTIONS: No night berthing. Unberthing at any time.

MAX. SIZE:

Max. 85,000 tons d.w.t. fully loaded.

Min. d.w.t. of tanker 35,000 tons

Max. length 838 ft., but distance bow to manifold not greater than 450 ft.

Max. draft 60 ft. (depth 95 ft.).

Also see "Notice".

RADIO/VHF: Tankers calling at East Zeit Bay must send ETA message 72, 48 and 24 hours before arrival at the terminal to "Esso Suez Inc.", office Telex No. 21148 Esosz Un, addressed to "Exploresso" for East Zeit Terminal attention Marine Supervisor, via any coastal radio station: Port Said (Suez and Kosseir). The Notices must also be sent to the Egyptian General Petroleum Co. (Supply Sector).

ETA messages to Esso Suez Inc. should give the best estimates of ship's arrival time at the terminal. This ETA message should also include a definite statement of details of any equipment required from shore for connecting 12 in. floating hoses. Bearing in mind that such hose needs tanker to be equipped with crane classed/certified up to 10 tons capacity.

Master must call East Zeit Terminal 4 hours prior to arrival on VHF Channel 13 which is considered the calling (by the vessel's side only) and working channel, Channel 16 may be used in an emergency.

BERTHING: *Terminal Facilities:*

C.A.L.M. (Catenary Anchor Leg Mooring).

Cargo hose 16 in. type, with camlocks.

Max. loading rate for crude oil 3,000 tonnes/p.h.

Loading from port side.

Tankers must be equipped with a derrick with minimum 10 tons capacity.

If cargo hose or connection is different, Master should contact "Esso Suez Terminal Office" 72 hours prior to his arrival at East Zeit stating the tanker hose and connection type.

Mooring facilities on tankers's bow should be ready prior arrival. Tanker must be trimmed about 4 ft. by the stern and have adequate ballast for manoeuvring.

Vessels not fitted with either a Smit Bracket or chain stopper must have one set of bitts on the foc'sle head certified to S.W.L. of 100 tons.

BALLAST: *Deballasting Facilities:* Available at East Zeit Terminal. Shore facilities can accept up to 75,000 bbls. over 12 in. floating hose connected for this purpose. If Master will require deballasting of clean cargo tanks ballast while loading in operation, letter should be submitted to the terminal that all bulkheads are fully tight and no leakage to avoid any contamination. Master on behalf of Owners and/or Charterers will bear all costs and expenses for cleaning operations required to remove any pollution which might occur due to pumping ballast overboard as well as a fine of U.S.$15,000.

Note: Master advised that ballast facilities were not available in November 1992.

NOTICE: S.B.M. can accommodate tankers up to 128,000 tons d.w.t. under the following restrictions:

(a) 7 – 10 days advance notice for lifting.

(b) During loading operation, tankers to maintain 35% of its deadweight, subject to ensuring that ship's propeller is fully submerged.

(c) Maximum wind 25 knots.

(d) Tanker trim upon arrival is 4 ft. – 6 ft. by stern.

(e) Maximum wave height 6 ft.

(f) Maximum current 1.0 knots.

(g) Tanker to keep 30 ft. draft limitation during loading.

(h) Mooring shall be attempted during North to South current conditions only.

(i) Tanker shall approach the S.B.M. from South only.

(j) No mooring attempts shall be made when the prevailing wind is from S.E. and S.W. directions and is stronger than the effective current.

SHIPMASTER'S REPORT: August 1989.

Vessel: 89,000 tons d.w.t.

The Pilot for the Esso SBM prefers vessel to arrive at about 0400 hrs. (i.e. berthing at daylight), so it is not necessary to delay vessel to arrive at 0600 hrs.

Pilot will board between the 2 SBMs. The N'ly SBM (red) is for Esso cargoes, and the S'ly SBM (yellow) for SUCO cargoes.

While mooring to SBM, 2 seamen are required to standby aft with a heaving line, ready to give a mooring line to towing tender if necessary.

Papers arrive on board about 4 hours after completion of loading. Once loading finished, ullages taken and ship's figure obtained. Vessel can unmoor and anchor in waiting area, where cargo sampling may be carried out.

OPERATOR: Esso Suez Inc.

GEISUM MARINE TERMINAL: 27.38 N. 33.43 E.

NOTE: Terminal closed in July 1993.

The loading point for Geisum Crude is the Suco SBM at Zeit Bay (27° 50' N., 33° 36' E.).

HAMRAWEIN: 26.15 N. 34.12 E. (See Plan)

APPROACHES: *Daytime Leading Marks:*

Front mark: Lat. 26° 15' 05.984" N., Long. 34° 12' 01.622" E.

Rear mark: Lat. 26° 15' 01.46" N., Long. 34° 11' 54.95" E.

BERTHING: Length of quay 67 m. Max. draft 33 ft. Conveyor belt and mechanical apparatus available. Daily average loading rate 4,000 tons. In addition to mooring bollard on the quay there are 4 mooring buoys.

SHIPMASTER'S REPORT: April 1988.

As berthing is carried out during daylight hours only, vessel should adjust ETA accordingly. The nearest anchorage is at Quseir, about 8 miles to the South, where good anchorage is obtained about 2 miles offshore (See B.A. Chart No. 3043).

Radio: Quseir Radio – SUK.

Health: Quarantine inspection for Pratique can be done at berth or at anchorage at Quseir.

Pilotage: Arranged by Agent or Misr Phosphate Co. There is no VHF communication with berth or pilot boat. Pilot boards about one mile East of the breakwater by a motor launch displaying flag 'H'. Vessel may give a few blasts on the whistle to attract attention. Pilot is unlicensed and does not speak English. It is advisable to discuss mooring plans with him prior to approaching the berth. It is further recommended that the Master should con the vessel himself to avoid confusion due to difficulty in communication. Vessel should have good long ropes ready to be sent out to the mooring buoys from quite a distance away. There are no tugs available and the vessel is turned around by warping. Vessel should be prepared to join 2 ropes together if length of one is insufficient. Extreme care is advised as windshifts can be quite abrupt and this vessel had to abandon attempts to berth mid-way through approach and put to sea and wait for the wind to subside.

Tugs: No tugs available.

Berth Facilities: The berth is exclusively operated by the Misr Phosphate Co. for loading rock phosphate in bulk. There is a mechanical loader with 2 loading chutes about 50 m. apart. They are stationary and only one is used at a time. The vessel has to be warped forward and aft to bring the appropriate hatch under the chute.

General: Limited quantities of fresh provisions are available. Watchmen and garbage disposal services were provided by the same supplier. Masters are advised to scrutinise all bills thoroughly prior to signing as attempts are made to obtain signature on blank bills on the pretext that they are requisition slips.

SHIPMASTER'S REPORT: January 1989.

Location: Lat. 26° 15.5' N., Long. 34° 12.2' E.

Hamrawein Phosphate Terminal has a single jetty of 67 m. length and belongs to Misr Phosphate Company, Hamrawein. There are 2 mooring buoys. There are no leading beacons as mentioned in NP.64. All mooring operations and pilot are arranged by the shippers (Misr Phosphate).

Port Limits: 4 nautical miles off the coast.

Documents: Register, Safety Construction Certificate, Load Line Certificate, I.O.P.P., Safety Equipment and Safety Radio Certificates. 4 copies Crew List. 2 copies Stores List. 2 copies Crew Declaration. 2 copies Currency Declaration.

Free Pratique is usually granted after berthing when vessel boarded by Quarantine Officials.

Pilotage: Pilot is compulsory and boards 2-3 cables North of the North Mooring Buoy. The vessel is then turned around and re-approaches the North Mooring Buoy.

Approaches: Vessel should approach from sea, heading for the North Mooring Buoy. Vessel sets South towards the dangerous reefs which can be visually seen or picked-up on radar when at close range. The reefs are not marked by buoys, etc., but can be recognised by change in water colour.

Anchorage: The only anchorage available is one mile East of Kossier, as marked on B.A. Chart 3043.

Maximum Size: Vessels drawing 33 ft. can be accommodated.

Radio: Kossier Radio, call sign SUK, is recommended for all communications with agents, shippers, etc.

There is no VHF or WT station at the Terminal. There is no contact with pilot as pilot boat is not equipped with a radio. The pilot boarded from a rowing mooring boat with the pilot flag hoisted. The pilot boat was out of order.

Tugs: Not available.

Berthing: Vessel heads for the North end of the breakwater, keeping close to the North Mooring Buoy on the starboard side. When 30 m. off the breakwater, starboard anchor is let go to 4 shackles in water and vessel is swung around to make fast port side alongside. Mooring boat is used for sending lines ashore. A line is also made fast to the South Mooring Buoy. This assists when leaving the berth.

Loading: Two chutes are available with a good outreach, but only one can be used at a time. Vessel has to be shifted fore and aft frequently to place holds in position for the fore and aft chutes. Loading rate is high and a maximum rate of 7,000 tonnes per day can easily be achieved.

Medical: Seamen can be sent to doctor at Kossier or Safaga, after special permission granted by Immigration. Advance notice required.

Density: Average 1029.

Fresh Water: Not available at berth. Water has to be ordered from Safaga by barge. Rate U.S.$22.00 per tonne, with minimum supply of 200 tonnes.

Fuel: Not available locally. Any requirements to be obtained from Safaga.

Repairs: No facilities available.

Customs Allowance: 200 cigarettes. Beer allowed. No liquor except wines allowed.

Watches, clocks, radios, cassette recorders, cameras, T.V. and videos are placed under seal by Customs.

Repatriation: Facilities exist for repatriation and for crew changes.

Airport: Nearest airport at Hurghada, which has regular flights to Cairo.

Shore Leave: Generally no shore leave allowed. If permitted, shore passes required.

Provisions: Fresh provisions and meat available and supplied by ship chandler from Kossier. No bonded items available.

Authority: Misr Phosphate Company, Hamrawein (Red Sea), Egypt. Tel: (Kossier) 39. Cables: Hamerpho, Kossier.

Agent: Damanhour, Safaga. Cables: Canal Shipping Safaga.

MARSA AL HAMRA (El Alamein): 30.59 N. 28.52 E.

WEPCO Terminal:

The Mono Mooring Buoy is in an open and unsheltered roadstead. The mooring buoy is located at Lat. 30° 58' 07.5" N., Long. 28° 52.2' E. It is 53 miles on a bearing of 255° from Ras-el-Tin Lighthouse, Alexandria, and 3 miles offshore in approximately 66 ft. of water.

DOCUMENTS:

4 copies Crew List.

Deck log books showing date of last call at a A.R.E. port, completed up to the time of arrival.

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

Bonded Store List, in duplicate.

Crew List and Passenger List in duplicate.

PILOTAGE: The S.-S.W.-W. quadrant from the buoy is a Prohibited Anchorage Area. Gebisa Reef is at Lat. 30° 58' 30" N., Long. 28° 49' 10" E., at 2.7 miles on a bearing of 260° from the buoy.

The mooring buoy carries a light, flashing red 6 times per minute, and visible all round to a distance of 4.5 – 5 miles in clear tropical weather. It also has a fog horn, sounding "U" and a radar reflector.

Surface current sets East at 10 miles offshore at the rate of 1 knot. Maximum rise and fall of tide in the mooring area is 2 ft.

Vessel arriving should approach to within 2 miles North of the buoy, where they will be met by the Harbour Master or Pilot who will advise the ship's Master on approaches to the mooring buoy, mooring and unmooring.

ANCHORAGE: 15 miles N.E. of SBM.

RESTRICTIONS: Normally vessels are moored during daylight hours only, but permission can be obtained to sail at night.

MAX. SIZE: 100,000 d.w.t. Max. draft 38 ft.

HEALTH: Hoist International Code Quarantine Signals when entering. Any sickness must be reported to local authorities.

RADIO: The commercial radio station at Alexandria will handle WEPCO radio traffic. Alexandria Coast Radio Station (call sign SUH) operates 24 hours a day on 444, 500 and 8,578 kHz, and between 0600 hrs. and 1800 hrs. GMT on 12,974 kHz.

Ships nearing Al Hamra Terminal may contact the terminal by FM/VHF radio on 156.70 MHz or 2182 kHz.

While at the mooring, ship-to-shore communication is by portable VHF radio-telephone units, under the direct charge of the Mooring Master. The terminal uses Channel 10 VHF for all communications.

TUGS: Not available and not required.

BERTHING: 2 good lines must be ready on the forecastle to be sent to the buoy plus a further 2 lines for use as messengers. Ship's lifting gear must be ready near the port manifold for lifting and connecting 2×12 in. hoses, with proper reducers if the manifold does not fit 12 in. hose with 150 ASA standard flanges. The total weight per hose assembly is approximately 5 tons. Maximum loading rate is 3,700 t.p.h.

A pilot ladder must be safely rigged for immediate use and long enough to reach the Mooring Master's launch. At night adequate lighting must be rigged overside to enable the Mooring Master to approach and board the ship safely, and searchlights should be rigged on both sides of the bridge to assist in running lines to the buoy.

BALLAST: No dirty ballast may be pumped overboard, and it is the ship's Master's responsibility to ensure that no oil – whether crude, diesel, bunker or bilge – is pumped or spilled into the waters of and surrounding the Terminal. Ballast can be pumped ashore through one or both of the floating hoses direct to disposal facilities on shore.

MEDICAL: Nearest hospital facilities are at Alexandria, at least 90 minutes drive from the terminal.

First Aid could be provided and if necessary, transportation to hospital in Alexandria.

CUSTOMS ALLOWANCES: Present regulations at El Alamein allow each seaman to retain in his possession a maximum of 50 cigarettes or 1 ounce of tobacco or 5 cigars. All other smoking items must be collected and listed before arrival. The list will be checked by Customs before sealing the locker, and any discrepancies will be subject to fines.

FRESH WATER: Not available.

FUEL: Not available.

AUTHORITY: Western Desert Operating Petroleum Company – (WEPCO), Borg El Saghr Building, Safia Zaghloul Street, P.O.Box 412, Alexandria, Egypt. *Tel:* 28710/17/18/19. *Telex:* 54075 Un. *FAX:* 4934016. *Cables:* Wepoil Alexandria. *Contact:* A. Abou Ouf, Operations Manager.

RAS BUDRAN: 28.56 N. 33.08 E. (See Plan)

Ras Budran is an open area, unsheltered roadstead. There are presently 5 large storage tanks with a total capacity of 120,000 cu.m., painted a pale yellow colour. To the North of the tank farm is the production area with ballast receiving and treatment facilities. There is a flare structure S.E. of the storage tanks and another small flare on the production platform in position: Lat. 28° 58.2' N., Long. 33° 07.8' E. located 2.3 miles North of SBM.

Vessel will moor to a single mooring buoy located 2.3 miles off Ras Budran Lighthouse on a bearing of 260°.

The yellow painted SBM is located in a water depth 34 m. in position: Lat. 28° 56' 05" N., Long. 33° 07' 49" E.

The SBM has an orange light, visible 5 miles.

Cargo vessels can be loaded and/or discharged alongside the jetty at Ras Budran. The length of the jetty is 120 m. and the depth of the water is 6 m.

PILOTAGE: SUCO (Suez Oil Company) Pilot/Mooring Master boards approximately 2.5 miles S.S.W. of SBM with mooring gangs. Pilot will normally meet and embark incoming vessels at Lat. 28° 51' N., Long. 33° 06' E. Vessel provides leeside on a course away from the shore.

Pilot ladder and/or accommodation ladder should be kept in good order, cleaned and should be of adequate length and strength. Ladder should be provided with a safety line. A light shall be provided at night so that the pilot ladder is adquately lit.

When Mooring Master boards, he will advise the Ship's Master, on the approach to the SBM, arrangements for mooring and unmooring, connecting of the hoses and all other operations within the mooring area. The Mooring Master will submit and receive from the Master all forms, documents and papers required, to be filled in and signed or received by the Master.

ANCHORAGES: SUCO will make every effort to moor ships arriving according to the agreed schedules as promptly as operational circumstances permit.

If mooring is not possible, vessel will anchor in Anchorage Area in position: Lat. 28° 52.5' N., Long. 33° 06.9' E.,

Area within 1 mile radius of this area has been surveyed and is considered clear of any obstruction. Anchoring outside the area is strictly prohibited.

The ground at Anchorage Area is sandy mud.

RESTRICTIONS: Weather conditions may prevent berthing. This is the case when wind speed exceeds 25 knots. Vessel will then remain in the anchorage until weather improves. Daylight berthing only. Unberthing anytime.

MAX. SIZE: 35,000 tons (s.d.w.t) to 250,000 tons (s.d.w.t) with a max. permissible draft up to 18.0 m. and LOA 500 ft. – 1,130 ft.

HEALTH: Masters are to indicate in their ETA, notification of any sickness on board. SUCO will arrange with Health Authorities if so required.

RADIO/VHF: Advise E.G.P.C. (Supply Sector) and terminal of ETA, 72 hours, 48 hours and 24 hours prior to arrival.

SUCO installation is to be supplied with relevant information on lifting gear, connections, ballast/segregated/dirty and quantity.

On the berth (SBM) communications by VHF Channels 12 (24 hours listening) and 74 (Marine Office, 0700 – 1800 hrs.). SSB 2638 kHz to be used during office hours.

TUGS: 2 mooring boats (1×500 h.p. and 1×1,100 h.p.), available to assist with mooring and hose connection. The boats are equipped for anti-pollution operations.

1 fire fighting tug is available on a standby basis whilst loading operations are in progress.

BERTHING: All mooring equipment is available and will be placed onboard the vessel when Mooring Master boards.

A vessel can make the final approach and moor to buoy from any direction bearing in mind prevailing weather and tidal conditions. The approach shall be made from the direction which is consistent with a safe approach and speed shall be subject to the prevailing forces (i.e. wind, current and tidal stream) at the location at the time of berthing with the assistance from mooring boats stationed at the buoy.

Once moored the vessel is free to turn through 360° under the influence of the prevailing forces.

HOSE CONNECTION: 16 in. standard 150 ASA flange connection for crude oil and ballast hoses. Port derrick with minimum 10 tons SWL rigged for max. height and load lifting.

Ship's crew shall be responsible for connecting and disconnecting hoses, with assistance of shore crew.

A quick release coupling (camlock) is connected to each hose end and is to be used as follows:

1. In case of emergency the butterfly valve shall be immediately closed and quick release coupling immediately disconnected.
2. Do not hammer but try to use the camlock wrench supplied or use copper hammer only.
3. Tanker should be ready with reducer if it's manifold is not 16 in.
4. Bags of sand to be available.
5. Weight of the hose is approximately 6 tons.

LOADING: Upon being informed by the vessel's responsible officer that vessel is ready to start loading, Mooring Master will normally advise the Control Room and ensure that the loading commences at a low rate (by gravity).

When it has been confirmed that there is no significant rise in pressure on the loading line, the crude oil will be loaded, pumping with a maximum rate of 6,000 tonnes/p.h.

Crude oil is delivered through the submarine pipeline to the buoy and thence via a floating hose to the vessel's port side midship manifold. Hose diameter is generally 24 in., changing at the ship's end to 16 in.

It is forbidden to close any valve onboard the tanker against the flow of the crude oil until the butterfly valve of the loading hose has been closed.

If ship-to-shore communications fail during loading operations the emergency whistle signal is a continuous blast on the tanker's whistle.

Loading shall immediately be stopped and will not be resumed until communications have been re-established.

Before loading, cargo tanks are dipped by an independent Inspector and a Terminal Inspector. If dirty ballast is retained on board until the next discharge port then amount of water and oil on top will be checked.

Density of Ras Budran Crude is approximately 0.900/15°C. Temperature when received on board approximately 31°C.

Immobilisation of engines at SBM not permitted.

BALLAST/POLLUTION: *Deballasting System:* It is preferable that vessels load crude oil while discharging ballast, but Master or officer-in-charge must be sure that no contamination or pollution takes place.

If the vessel is not equipped with 2 lines in order to load and deballast at the same time, a quantity of crude should be loaded prior to deballasting to ensure proper segregation.

Dirty ballast must not be in the emulsion form and is not to contain chemicals or detergents.

Deballasting will be effected by ship's pumps delivering the ballast water to the dedicated submarine ballast line.

The floating hose is normally 20 in. diameter, and the ship's end connection is 16 in. diameter. Deballasting rate 3,000 t.p.h.

It is strictly forbidden to discharge dirty ballast overboard.

Pollution: The Master has to comply with all regulations and instructions prohibiting pollution under A.R.E. laws and under any pertinent instructions issued by SUCO when conveyed to Master.

Also the provisions for International Convention for Prevention of Pollution from Vessels 1973 and the Protocol of 1978, relating to this connection will be applied to the extent that such Convention and Protocol are in force in A.R.E. Owner/operator shall be liable for any damage resulting from the pollution caused by the vessel and shall pay for all the expenses incurred for its removal and elimination.

Oil Spill: In the event of a spill or its detection, SUCO Mooring Master must be notified instantly for the necessary action to be taken.

MEDICAL: In case urgent medical assistance is required the vessel should contact SUCO Marine Manager by VHF radio. A doctor and facilities are available but no hospital in the area.

DENSITY: 1030.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not available.

REPATRIATION: Possible in an emergency only.

HOLIDAYS: Ras Budran Terminal will never be closed due to religious holidays.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at the terminal.

HELICOPTER: Should the services of a helicopter be required in emergency or for any purpose whatsoever, the vessel will be given a minimum of 30 minutes' notice.

WEATHER: Gales can be expected from a North-Westerly direction from October through May.

Maximum weather condition for keeping the vessel on SBM is 40 knots.

The above conditions are only for guidance and are not relevant to the safety of the vessel but the safety of the buoy.

The Mooring Master shall have the authority to decide whether the ship should remain or vacate the buoy.

Climate: The climate in the Gulf of Suez is generally good. The visibility is usually excellent with few dust storms and infrequent fog. There are a few rain squalls.

Winds: The general flow of the wind over this part of the Gulf of Suez is predominatly from the N.N.W. Winds are steadier in the Summer months (May-October) and almost nil from June to September. Gales can mainly be expected from a North-Westerly direction from October through May.

The maximum velocity is approximately 45 knots, whilst the mean wind speed is approximately 20 knots and is prevalent for some 98% of the year. There are occasional light Southerly winds.

Tides: The tidal range is between 3 ft and 4 ft.

Sea Condition: The surface temperature of the sea ranges from 18°C to 27°C depending on the season.

Seas and swells are usually from the N.N.W. and wave height can reach 18 ft. but average is about 6 ft. During the Summer months (May/August) there are many day's of 12 ft. – 15 ft. seas.

Currents are generally located in mid-channel and set North when the tide is rising in Suez and South when the tide is falling. The rate is about 1.5 knots at Springs and 0.5 knots at Neaps.

AUTHORITY: Suez Oil Company (SUCO), 21 Ahmad Orabi Street, El Mohandessin, P.O.Box 2622, Cairo, Arab Republic of Egypt. *Tel:* 650723, 650544, 807922, 813554, 807854. *Telex:* 93455 Suco Un, 92300 Suco Un. *Cables:* Dexgulf. *FAX:* 3422734. *Contact:* A. Nassef, Planning and Follow-up Manager.

RAS GHARIB: 28.21 N. 33.06 E. (See Plan)

A natural port at the Western side of Suez Gulf sheltered by the Cape and a chain of reefs.

DOCUMENTS:

4 copies Crew List.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate.

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

PILOTAGE: Compulsory. International Pilot flag must be hoisted and Pilot will board vessel on arrival. Vessels should approach the anchorage from South-eastward and wait Southward of the Prohibited Anchorage until boarded by the Harbour Master who will pilot them either to moorings or to an anchorage clear of the prohibited area of the pipelines.

2 pairs of leading beacons stand about 4 and 5.5 cables, beside 3 others that stand about 12 cables Southward of Ras Gharib light-structure. About 2 cables further Southward are 2 leading beacons. All the above beacons are difficult to identify until close inshore.

Waiting Area: Within 1 miles radius of Lat. 28° 20' N., Long. 33° 08' E.

ANCHORAGES: Ras Gharib Anchorage, South-westward of the Cape, affords some shelter, but a moderate swell round the Cape is experienced on most days. Vessels can obtain anchorage in depths of about 5 fathoms.

During most of the year there are Northerly winds, Force 3 – 5, but in December and January there are occasionally calms. On very rare occasions, there are Southerly gales of short duration which make the anchorage untenable.

The Northerly wind causes some swell in the anchorage, but it is not normally severe enough to interfere with the working of lighters or boats of moderate size. It is, however, unpleasant for small boats, except alongside the piers, which are well protected.

N.N.W. winds of 20 m./sec (40 knots) are experienced in Summer but it is mostly calm in Winter. Care should be taken if wind changes to West and even more care should be taken if wind shifts to South.

Except in the vicinity of the piers, there is usually some swell on the beaches. There is practically no rainfall and sand storms occur only very occasionally and they do not interfere with work in the anchorage.

Anchorage is prohibited, owing to the existence of pipelines, within an area indicated by pecked lines on the chart.

RESTRICTIONS: Berthing and unberthing in daylight only.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor, specially when it is presumed that the sick will be hospitalised.

The vessel's personnel should carry international vaccination and/or inoculation certificates.

RADIO: E.G.P.C. (Supply Sector) and terminal require 72 hours, 48 hours and 24 hours notice of arrival.

VHF: General Petroleum Co. on Channel 16.

TUGS: 2 tugs, 400 h.p. and 80 h.p. available.

BERTHING: There is an ore pier where vessels may berth with max. draft of 11 ft. without any restrictions in length. Vessels with deeper draft may discharge whilst at anchorage on to supply boats.

Two cranes are available with capacities of 30 tons and 35 tons. Towage is also available.

TANKERS:

	Sea Berth No. 1	*Sea Berth No. 2*	*Sea Berth No. 3*
Depth at the berth	27 ft.	36 ft.	78 ft.
Max. permissible draft	20 ft.	27 ft.	55 ft.
Max. length for tanker	400 ft.	500 ft.	980 ft.
Min. length for tanker	350 ft.	500 ft.	600 ft.
Diameter of crude hose	8 in.	10 in.	12 in.
Diameter of water hose	8 in.	10 in.	12 in.
Min. capacity of tanker's derrick	5 tons	5 tons	5 tons
Loading capacity (t.p.h.)	650	1,200	2,000
Max. permissible load (tons)	8,000	20,000	130,000

Cargo: Ras Gharib Blend: API 21.0. Loading temperature 92°F/33°C.

Moorings: Vessels require 20 mooring ropes of 220 m. length for sending to 6 buoys, and 4 spare ropes.

Ballast: Discharge rate 1,500 t.p.h. through 12 in. hose and 16 in. line.

SUPPLIES: Transit and fresh provisions as well as deck and engine stores provided by the United Arab Contracting and Marine Supply Company (Cunsup).

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain in his possession a max. of 50 cigarettes or 1 ounce of tobacco or 5 cigars. All other smoking items must be collected and listed before arrival. The list will be checked by Customs before sealing the locker, and any discrepancies will be subject to fines.

AGENCY: See "Suez Canal"

AUTHORITY: Egyptian General Petroleum Company, Ras Gharib, Egypt. *Tel:* 20-65-446315. *Telex:* 92998 Petgn Un. *Cables:* Petrogen. *Contact:* Captain Mohamed El Sayed Fattoutt.

RAS SHUKHEIR: 28.08 N. 33.17 E. (See Plan)

Also see "General" before first Port.

ADVICE OF ARRIVAL: It is important that ships establish radio contact with "GUPCO" (Gulf of Suez Petroleum Co.) when 3 days distant from Terminal and maintain this contact until just previous to arrival at the Terminal. All ships should send a 72 hour ETA message to "Panintoil Cairo" giving the best estimate of ship's arrival time at the Terminal. This ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. All ETA messages should be sent to appointed Suez Agent (with copies to "Gupco Cairo") when the vessel is 24 hours and 12 hours distant from Ras Shukheir and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding ship's readiness to load on arrival and the number of hours that will be required to discharge ballast after ship is berthed in mooring.

–6 hours before arrival, tankers should call Ras Shukheir on VHF Channel 16 to be advised if berthing is available or not, also to be advised of the approximate time for berthing.

DOCUMENTS:
4 copies Crew List.
List of Ports of Call.
Derat Certificate should be handy for inspection.
Clearance from Last Port.
Bonded Store List, in duplicate.
Crew List and Passenger List in duplicate.

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival. Quarantine officials board with Agent. No Customs formalities. Bond not sealed.

ESSENTIAL REQUIREMENTS: *Most Essential Requirements to be met by Tankers Lifting Oil at Ras Shukheir Terminal:*

1. Disposal of Ballast: No dirty ballast will be pumped overboard. Separate ballast disposal lines are available at Terminal to pump ballast to pit onshore, where oil and water can be separated and disposal made (24 in. at Berth No. 1 and 18 in. at Berth No. 2). The maximum pressure allowed on the ballast line is 150 p.s.i., which should not be exceeded.
2. Notice of Arrival: Incoming tankers must send ETA at least 72 hours before arrival at Ras Shukheir. Local time is Greenwich Mean Time plus 2 hours. All time reports must be stated in local time.
3. Anchorage: All vessels are prohibited to anchor outside the anchorage area and if necessary anchor inside it. The anchorage area is a circle one mile diameter. The centre is 4.4 miles from El Tor Lighthouse on a bearing of N.W. from it.
Anchorage co-ordinates are Lat. 28° 16' 25" N., Long. 33° 33' 00" E.
4. Tankers to have ready:
(a) Windlass and both power anchors, each with not less than 150 fathoms of chain.
(b) At least 10 good nylon, synthetic, or wire mooring lines, each not less than 200 fathoms in length with efficient stoppers for each line.
(c) On port side opposite ship's manifold, there must be equipment capable of lifting submarine hoses safely and efficiently. Weight of lift is 5 tons per hose.
(d) Pumps for deballasting prior to or simultaneously with taking on oil. Pressure drop in ballast line is approximately 150 p.s.i. at flow rate of 12,000 barrels per hour.
5. Crew Duties: The tanker's crew will perform all operations aboard tanker under supervision of Gupco's crew.
6. Tanker's Valves: Tanker's valves must not be closed against incoming oil stream. Rate should be reduced by half, at least 15 minutes before stop loading. At least 3 minutes are required to close shore valves to stop flow of oil.
7. Emergency Communications: If ship-to-shore communications fail, the emergency whistle signal is a continuous blast on tanker's whistle. Steam or air should never be shut off from the whistle during loading.
8. Responsibility: The tanker's Master is responsible at all times for the safety of all the ship's operations. The Company Mooring Master will advise the Master in respect to loading pressure and hazard, but will not direct the loading except as may be necessary to protect the Terminal facilities. Ras Shukheir Terminal rules and regulations do not contravene International Safety Rules such as SOLAS (Safety of Life at Sea) or other maritime regulations, such as those of appropriate classification societies. In case of any conflict, the latter shall apply.

PILOTAGE: Compulsory. International Pilot Flag must be hoisted and Pilot will board vessel on arrival. Ras Shukheir Lighthouse is located in Lat. 28° 08' 15" N., Long. 33° 16' 20" E. It is a white flashing light, flashing every 3 seconds and visible for 10 miles.

Gebal Gharib, situated about 18 miles South-westward, 5,742 ft. high. It makes a nearly perfect equilateral triangle with Ras Shukheir and Ras Gharib Lighthouse. Ras Gharib Lighthouse is an excellent landmark whether by day or night for vessels approaching from North, but caution should be exercised since this Light is obscured from 308° to the Westward. The sea-berth buoys are unlit.

The Company's Mooring Master will meet all incoming tankers about 2 miles from Ras Shukheir Terminal on a bearing of 290/300° from Ras Shukheir Lighthouse and will advise ship's personnel in mooring and unmooring, raising and lowering of hoses.

Vessels are requested to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Mooring Master's launch. If at night, adequate lighting must be rigged overside for the Mooring Master to approach the side and climb the ladder safely.

Shipmaster's Report: February 1993.

The Pilot/Mooring Master boarded 1.5 miles abeam of berth. He remains on board until the vessel leaves the berth.

ANCHORAGES: There are a number of oil well installations, structures and submarine pipelines located in the Gulf of Suez opposite Ras Shukheir Terminal and approaching vessels are warned of these obstacles in manoeuvring and anchoring.

Never anchor North of the sea berth.

Shipmaster's Report: March 1991.

Tankers should only anchor in Ras Shukheir Anchorage Area, 4.4 miles N.W. of El Lighthouse (See B.A.Chart No. 2374), in position Lat. 28° 16' 25" N., Long. 33° 30' E.

RESTRICTIONS: The Ras Shukheir Terminal operates 24 hours per day, 7 days a week. Ships are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, however, an exception may be made at the discretion of the Terminal.

MAX. SIZE: See "Berthing".

HEALTH: The vessel's personnel should carry international vaccination and/or inoculation certificates.

RADIO: E.G.P.C. (Supply Sector) require 72 hours, 48 hours and 24 hours notice of arrival.

The Alexandria or Port Said coast radio stations will handle GUPCO radio traffic. Ships may contact GUPCO through their cable address "Gupcoil Cairo". The message will be received on their Cairo Radio Telegraph Office local teleprinter circuit, tape perforated and relayed to the Ras Shukheir Terminal.

Cables from Ras Shukheir Terminal to the ships would be handled in the same manner. The Alexandria or Port Said coast radio stations transmit traffic lists at regular intervals listing the call signs of all ships for which they have traffic on hand. Thus any ship hearing its call sign in the traffic list of the coast station would call the coast station immediately after the traffic list.

VHF: When ships are near Ras Shukheir Terminal, they may use their FM/VHF radios to contact the Terminal using Channel 16.

BERTHING: One pier where vessels with max. length of 76 m. are alllowed to berth alongside with a max. draft of 16.5 ft. Vessels may discharge whilst at anchorage and propeller type lighters are available for such cargo operations.

Four cranes with capacities of 15, 30, 40 and 50 tons respectively are available together with floating crane with capacity up to 200 tons. Towage is also available.

TANKERS:

	Seaberth No. 1	*Seaberth No. 2*
Depth	95 ft.	95 ft.
Max. permissible draft	64 ft.	56 ft.
Max. length for Tankers	1,000 ft.	1,000 ft.
Min. length for Tankers	750 ft.	750 ft.
Numbers of Crude hoses	3	3
Diameter of Crude hoses	12 in.	12 in.
Diameter of Ballast hose	12 in.	12 in.
Min. capacity of –Tanker's derrick	5 tons	5 tons
Loading capacity (t.p.h.)	6,000	4,000
Max. permissible load (tons)	150,000	270,000

Cargo: Gulf of Suez Mix Crude Oil is approximately 0.875/15°C. Temperature when received on board is approximately 32°C (March).

LPG: In addition to the 2 Sea Berths, there is Sea Berth No. 4 for loading L.P.G. tankers which is located 6 miles South of Ras Shukheir lighthouse.

The specifications are as follows:-

The Channel Entrance is marked by one radar reflecting (turning buoy), 6 pontoon guiding light buoys with radar reflectors, 3 green lights located on the starboard side of the channel, and 3 red lights on the port side of the channel. Flashing characteristic of the signal is "U" with 3.6 second intervals. The max. water depth in the channel and the berth is 24 ft. The berth consists of 4 mooring buoys, 8 loading hoses and 6 vapour hoses.

The max. capacity of vessels using this berth is 1,600 tons with a length no greater than 330 ft. Max. draft after loading is 17 ft.

SUPPLIES: Transit and fresh provisions as well as deck and engine stores provided by United Arab Contracting and Marine Supply Co.

SUBMARINE HOSE LOADING BERTH: Tanker is loaded by means of submarine pipelines to which are attached 2 or 3 hoses for loading and 1 hose for discharging ballast. A 36 in. pipeline transports the oil and a 24 in. line in No. 1 Seaberth, or 16 in. line in No. 2 Seaberth transports the dirty ballast to a ballast pit ashore. The loading berths are located approximately 3,580 ft. offshore in a water depth of approximately 95 ft. The loading and ballast lines are laid in the same trench and run in a direction 055°. The mooring buoys are numbered 1, 2, 3, 4, 5, 6, 7 and 8 (on the port bow) and running consecutively in a clockwise direction.

LOADING READINESS AND ARRIVAL TIME: The company will make every effort to load vessels upon arrival or as promptly as berth is available, weather permitting. Notice of Readiness will not be accepted as at time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered as the time the Mooring Master boards the vessel or the time that vessel anchors, whichever occurs first.

FRESH WATER: Not available.

FUEL: Not available.

REPATRIATION: Not recommended.

HOLIDAYS: The Terminal will never be closed due to Religious Holidays.

SHIPMASTER'S REPORT: February 1993.

Anchorage: Ras Shukheir Anchorage Area is designated on B.A. Chart No. 2374 (Lat. 28° 16' 25" N., Long. 33° 33' 00" E.).

The holding ground is mud and very good.

The anchorage can be approached from North of Morgan Oilfield or from South past Felix Jones Patches and between the oilfield and the shore.

Tankers: Seaberth No. 1: Max. draft 19.5 m.
Seaberth No. 2: Max. draft 19.2 m.

Ballast: All ballast from cargo oil tanks must be discharged ashore through the ballast line at a cost of U.S.$ 0.25 per metric ton.

Moorings: All wires to have rope tails. The winch serving Buoy No. 1 should have an extra wire married on. The winch serving Buoy No. 7 should have a mooring rope married on.

Supplies: Fresh provisions are brought from Suez at a transportation charge of U.S.$ 50.00. They are of good quality.

Shipchandler: The Egyptian Marine Supply and Contracting Co. Telex: 66132 Consup Un.

AUTHORITY: *Operator:* Gulf of Suez Petroleum Co. – GUPCO, (P.O. Box 2400) Palestine Street, 4th Sector, New Maadi, Cairo, Egypt. *Tel:* 3522846, 3521365. *Telex:* 92248 Gupco Un. *Cables:* Gupcooil, Cairo. *Contact:* Captain Hassan Hafez, Marine Division Manager.

AGENCY: See "Suez Canal".

BALLAST/POLLUTION: *Deballasting System:* It is preferable that vessels load crude oil while discharging ballast, but Master or officer-in-charge must be sure that no contamination or pollution takes place.

If the vessel is not equipped with 2 lines in order to load and deballast at the same time, a quantity of crude should be loaded prior to deballasting to ensure proper segregation.

Dirty ballast must not be in the emulsion form and is not to contain chemicals or detergents.

Deballasting will be effected by ship's pumps delivering the ballast water to the dedicated submarine ballast line.

The floating hose is normally 20 in. diameter, and the ship's end connection is 16 in. diameter. Deballasting rate 3,000 t.p.h.

It is strictly forbidden to discharge dirty ballast overboard.

Pollution: The Master has to comply with all regulations and instructions prohibiting pollution under A.R.E. laws and under any pertinent instructions issued by SUCO when conveyed to Master.

Also the provisions for International Convention for Prevention of Pollution from Vessels 1973 and the Protocol of 1978 relating to this connection will be applied to the extent that such Convention and Protocol are in force in A.R.E. Owner/operator shall be liable for any damage resulting from the pollution caused by the vessel and shall pay for all the expenses incurred for its removal and elimination.

Oil Spill: In the event of a spill or its detection, SUCO Mooring Master must be notified instantly for the necessary action to be taken.

MEDICAL: In case urgent medical assistance is required the vessel should contact SUCO Marine Manager by VHF radio. A doctor and facilities are available but no hospital in the area.

DENSITY: 1030.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not available.

REPATRIATION: Possible in an emergency only.

HOLIDAYS: Ras Budran Terminal will never be closed due to religious holidays.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at the terminal.

HELICOPTER: Should the services of a helicopter be required in emergency or for any purpose whatsoever, the vessel will be given a minimum of 30 minutes' notice.

WEATHER: Gales can be expected from a North-Westerly direction from October through May.

Maximum weather condition for keeping the vessel on SBM is 40 knots.

The above conditions are only for guidance and are not relevant to the safety of the vessel but the safety of the buoy.

The Mooring Master shall have the authority to decide whether the ship should remain or vacate the buoy.

Climate: The climate in the Gulf of Suez is generally good. The visibility is usually excellent with few dust storms and infrequent fog. There are a few rain squalls.

Winds: The general flow of the wind over this part of the Gulf of Suez is predominatly from the N.N.W. Winds are steadier in the Summer months (May-October) and almost nil from June to September. Gales can mainly be expected from a North-Westerly direction from October through May.

The maximum velocity is approximately 45 knots, whilst the mean wind speed is approximately 20 knots and is prevalent for some 98% of the year. There are occasional light Southerly winds.

Tides: The tidal range is between 3 ft and 4 ft.

Sea Condition: The surface temperature of the sea ranges from 18°C to 27°C depending on the season.

Seas and swells are usually from the N.N.W. and wave height can reach 18 ft. but average is about 6 ft. During the Summer months (May/August) there are many day's of 12 ft. – 15 ft. seas.

Currents are generally located in mid-channel and set North when the tide is rising in Suez and South when the tide is falling, The rate is about 1.5 knots at Springs and 0.5 knots at Neaps.

AUTHORITY: Suez Oil Company (SUCO), 21 Ahmad Orabi Street, El Mohandessin, P.O.Box 2622, Cairo, Arab Republic of Egypt. *Tel:* 650723, 650544, 807922, 813554, 807854. *Telex:* 93455 Suco Un, 92300 Suco Un. *Cables:* Dexgulf. *FAX:* 3422734. *Contact:* A. Nassef, Planning and Follow-up Manager.

RAS GHARIB: 28.21 N. 33.06 E. (See Plan)

A natural port at the Western side of Suez Gulf sheltered by the Cape and a chain of reefs.

DOCUMENTS:

4 copies Crew List.
Derat Certificate should be handy for inspection.
Clearance from Last Port.
Bonded Store List, in duplicate.
Crew List and Passengers' List in duplicate.

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

PILOTAGE: Compulsory. International Pilot flag must be hoisted and Pilot will board vessel on arrival. Vessels should approach the anchorage from South-eastward and wait Southward of the Prohibited Anchorage until boarded by the Harbour Master who will pilot them either to moorings or to an anchorage clear of the prohibited area of the pipelines.

2 pairs of leading beacons stand about 4 and 5.5 cables, beside 3 others that stand about 12 cables Southward of Ras Gharib light-structure. About 2 cables further Southward are 2 leading beacons. All the above beacons are difficult to identify until close inshore.

Waiting Area: Within 1 miles radius of Lat. 28° 20' N., Long. 33° 08' E.

ANCHORAGES: Ras Gharib Anchorage, South-westward of the Cape, affords some shelter, but a moderate swell round the Cape is experienced on most days. Vessels can obtain anchorage in depths of about 5 fathoms.

During most of the year there are Northerly winds, Force 3 – 5, but in December and January there are occasionally calms. On very rare occasions, there are Southerly gales of short duration which make the anchorage untenable.

The Northerly wind causes some swell in the anchorage, but it is not normally severe enough to interfere with the working of lighters or boats of moderate size. It is, however, unpleasant for small boats, except alongside the piers, which are well protected.

N.N.W. winds of 20 m./sec (40 knots) are experienced in Summer but it is mostly calm in Winter. Care should be taken if wind changes to West and even more care should be taken if wind shifts to South.

Except in the vicinity of the piers, there is usually some swell on the beaches. There is practically no rainfall and sand storms occur only very occasionally and they do not interfere with work in the anchorage.

Anchorage is prohibited, owing to the existence of pipelines, within an area indicated by pecked lines on the chart.

RESTRICTIONS: Berthing and unberthing in daylight only.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor, specially when it is presumed that the sick will be hospitalised.

The vessel's personnel should carry international vaccination and/or inoculation certificates.

RADIO: E.G.P.C. (Supply Sector) and terminal require 72 hours, 48 hours and 24 hours notice of arrival.

VHF: General Petroleum Co. on Channel 16.

TUGS: 2 tugs, 400 h.p. and 80 h.p. available.

BERTHING: There is an ore pier where vessels may berth with max. draft of 11 ft. without any restrictions in length. Vessels with deeper draft may discharge whilst at anchorage on to supply boats.

Two cranes are available with capacities of 30 tons and 35 tons. Towage is also available.

TANKERS:

	Sea Berth No. 1	*Sea Berth No. 2*	*Sea Berth No. 3*
Depth at the berth	27 ft.	36 ft.	78 ft.
Max. permissible draft	20 ft.	27 ft.	55 ft.
Max. length for tanker	400 ft.	500 ft.	980 ft.
Min. length for tanker	350 ft.	500 ft.	600 ft.
Diameter of crude hose	8 in.	10 in.	12 in.
Diameter of water hose	8 in.	10 in.	12 in.
Min. capacity of tanker's derrick	5 tons	5 tons	5 tons
Loading capacity (t.p.h.)	650	1,200	2,000
Max. permissible load (tons)	8,000	20,000	130,000

Cargo: Ras Gharib Blend: API 21.0. Loading temperature 92°F/33°C.

Moorings: Vessels require 20 mooring ropes of 220 m. length for sending to 6 buoys, and 4 spare ropes.

Ballast: Discharge rate 1,500 t.p.h. through 12 in. hose and 16 in. line.

SUPPLIES: Transit and fresh provisions as well as deck and engine stores provided by the United Arab Contracting and Marine Supply Company (Cunsup).

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain in his possession a max. of 50 cigarettes or 1 ounce of tobacco or 5 cigars. All other smoking items must be collected and listed before arrival. The list will be checked by Customs before sealing the locker, and any discrepancies will be subject to fines.

AGENCY: See "Suez Canal".

AUTHORITY: Egyptian General Petroleum Company, Ras Gharib, Egypt. *Tel:* 20-65-446315. *Telex:* 92998 Petgn Un. *Cables:* Petrogen. *Contact:* Captain Mohamed El Sayed Fattoutt.

RAS SHUKHEIR: 28.08 N. 33.17 E. (See Plan)

Also see "General" before first Port.

ADVICE OF ARRIVAL: It is important that ships establish radio contact with "GUPCO" (Gulf of Suez Petroleum Co.) when 3 days distant from Terminal and maintain this contact until just previous to arrival at the Terminal. All ships should send a 72 hour ETA message to "Panintoil Cairo" giving the best estimate of ship's arrival time at the Terminal. This ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. All ETA messages should be sent to appointed Suez Agent (with copies to "Gupco Cairo") when the vessel is 24 hours and 12 hours distant from Ras Shukheir and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding ship's readiness to load on arrival and the number of hours that will be required to discharge ballast after ship is berthed in mooring.

–6 hours before arrival, tankers should call Ras Shukheir on VHF Channel 16 to be advised if berthing is available or not, also to be advised of the approximate time for berthing.

DOCUMENTS:
4 copies Crew List.
List of Ports of Call.
Derat Certificate should be handy for inspection.
Clearance from Last Port.
Bonded Store List, in duplicate.
Crew List and Passenger List in duplicate.

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival. Quarantine officials board with Agent. No Customs formalities. Bond not sealed.

ESSENTIAL REQUIREMENTS: *Most Essential Requirements to be met by Tankers Lifting Oil at Ras Shukheir Terminal:*

1. Disposal of Ballast: No dirty ballast will be pumped overboard. Separate ballast disposal lines are available at Terminal to pump ballast to pit onshore, where oil and water can be separated and disposal made (24 in. at Berth No. 1 and 18 in. at Berth No. 2). The maximum pressure allowed on the ballast line is 150 p.s.i., which should not be exceeded.
2. Notice of Arrival: Incoming tankers must send ETA at least 72 hours before arrival at Ras Shukheir. Local time is Greenwich Mean Time plus 2 hours. All time reports must be stated in local time.
3. Anchorage: All vessels are prohibited to anchor outside the anchorage area and if necessary anchor inside it. The anchorage area is a circle one mile diameter. The centre is 4.4 miles from El Tor Lighthouse on a bearing of N.W. from it. Anchorage co-ordinates are Lat. 28° 16' 25" N., Long. 33° 33' 00" E.

4. Tankers to have ready:
(a) Windlass and both power anchors, each with not less than 150 fathoms of chain.
(b) At least 10 good nylon, synthetic, or wire mooring lines, each not less than 200 fathoms in length with efficient stoppers for each line.
(c) On port side opposite ship's manifold, there must be equipment capable of lifting submarine hoses safely and efficiently. Weight of lift is 5 tons per hose.
(d) Pumps for deballasting prior to or simultaneously with taking on oil. Pressure drop in ballast line is approximately 150 p.s.i. at flow rate of 12,000 barrels per hour.

5. Crew Duties: The tanker's crew will perform all operations aboard tanker under supervision of Gupco's crew.
6. Tanker's Valves: Tanker's valves must not be closed against incoming oil stream. Rate should be reduced by half, at least 15 minutes before stop loading. At least 3 minutes are required to close shore valves to stop flow of oil.
7. Emergency Communications: If ship-to-shore communications fail, the emergency whistle signal is a continuous blast on tanker's whistle. Steam or air should never be shut off from the whistle during loading.
8. Responsibility: The tanker's Master is responsible at all times for the safety of all the ship's operations. The Company Mooring Master will advise the Master in respect to loading pressure and hazard, but will not direct the loading except as may be necessary to protect the Terminal facilities. Ras Shukheir Terminal rules and regulations do not contravene International Safety Rules such as SOLAS (Safety of Life at Sea) or other maritime regulations, such as those of appropriate classification societies. In case of any conflict, the latter shall apply.

PILOTAGE: Compulsory. International Pilot Flag must be hoisted and Pilot will board vessel on arrival. Ras Shukheir Lighthouse is located in Lat. 28° 08' 15" N., Long. 33° 16' 20" E. It is a white flashing light, flashing every 3 seconds and visible for 10 miles.

Gebal Gharib, situated about 18 miles South-westward, 5,742 ft. high. It makes a nearly perfect equilateral triangle with Ras Shukheir and Ras Gharib Lighthouse. Ras Gharib Lighthouse is an excellent landmark whether by day or night for vessels approaching from North, but caution should be exercised since this Light is obscured from 308° to the Westward. The sea-berth buoys are unlit.

The Company's Mooring Master will meet all incoming tankers about 2 miles from Ras Shukheir Terminal on a bearing of 290/300° from Ras Shukheir Lighthouse and will advise ship's personnel in mooring and unmooring, raising and lowering of hoses.

Vessels are requested to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Mooring Master's launch. If at night, adequate lighting must be rigged overside for the Mooring Master to approach the side and climb the ladder safely.

Shipmaster's Report: February 1993.

The Pilot/Mooring Master boarded 1.5 miles abeam of berth. He remains on board until the vessel leaves the berth.

ANCHORAGES: There are a number of oil well installations, structures and submarine pipelines located in the Gulf of Suez opposite Ras Shukheir Terminal and approaching vessels are warned of these obstacles in manoeuvring and anchoring.

Never anchor North of the sea berth.

Shipmaster's Report: March 1991.

Tankers should only anchor in Ras Shukheir Anchorage Area, 4.4 miles N.W. of El Lighthouse (See B.A.Chart No. 2374), in position Lat. 28° 16' 25" N., Long. 33° 30' E.

RESTRICTIONS: The Ras Shukheir Terminal operates 24 hours per day, 7 days a week. Ships are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, however, an exception may be made at the discretion of the Terminal.

MAX. SIZE: See "Berthing".

HEALTH: The vessel's personnel should carry international vaccination and/or inoculation certificates.

RADIO: E.G.P.C. (Supply Sector) require 72 hours, 48 hours and 24 hours notice of arrival.

The Alexandria or Port Said coast radio stations will handle GUPCO radio traffic. Ships may contact GUPCO through their cable address "Gupcoil Cairo". The message will be received on their Cairo Radio Telegraph Office local teleprinter circuit, tape perforated and relayed to the Ras Shukheir Terminal.

Cables from Ras Shukheir Terminal to the ships would be handled in the same manner. The Alexandria or Port Said coast radio stations transmit traffic lists at regular intervals listing the call signs of all ships for which they have traffic on hand. Thus any ship hearing its call sign in the traffic list of the coast station would call the coast station immediately after the traffic list.

VHF: When ships are near Ras Shukheir Terminal, they may use their FM/VHF radios to contact the Terminal using Channel 16.

BERTHING: One pier where vessels with max. length of 76 m. are alllowed to berth alongside with a max. draft of 16.5 ft. Vessels may discharge whilst at anchorage and propeller type lighters are available for such cargo operations.

Four cranes with capacities of 15, 30, 40 and 50 tons respectively are available together with floating crane with capacity up to 200 tons. Towage is also available.

TANKERS:

	Seaberth No. 1	*Seaberth No. 2*
Depth	95 ft.	95 ft.
Max. permissible draft	64 ft.	56 ft.
Max. length for Tankers	1,000 ft.	1,000 ft.
Min. length for Tankers	750 ft.	750 ft.
Numbers of Crude hoses	3	3
Diameter of Crude hoses	12 in.	12 in.
Diameter of Ballast hose	12 in.	12 in.
Min. capacity of –Tanker's derrick	5 tons	5 tons
Loading capacity (t.p.h.)	6,000	4,000
Max. permissible load (tons)	150,000	270,000

Cargo: Gulf of Suez Mix Crude Oil is approximately 0.875/15°C. Temperature when received on board is approximately 32°C (March).

LPG: In addition to the 2 Sea Berths, there is Sea Berth No. 4 for loading L.P.G. tankers which is located 6 miles South of Ras Shukheir lighthouse.

The specifications are as follows:-

The Channel Entrance is marked by one radar reflecting (turning buoy), 6 pontoon guiding light buoys with radar reflectors, 3 green lights located on the starboard side of the channel, and 3 red lights on the port side of the channel. Flashing characteristic of the signal is "U" with 3.6 second intervals. The max. water depth in the channel and the berth is 24 ft. The berth consists of 4 mooring buoys, 8 loading hoses and 6 vapour hoses.

The max. capacity of vessels using this berth is 1,600 tons with a length no greater than 330 ft. Max. draft after loading is 17 ft.

SUPPLIES: Transit and fresh provisions as well as deck and engine stores provided by United Arab Contracting and Marine Supply Co.

SUBMARINE HOSE LOADING BERTH: Tanker is loaded by means of submarine pipelines to which are attached 2 or 3 hoses for loading and 1 hose for discharging ballast. A 36 in. pipeline transports the oil and a 24 in. line in No. 1 Seaberth, or 16 in. line in No. 2 Seaberth transports the dirty ballast to a ballast pit ashore. The loading berths are located approximately 3,580 ft. offshore in a water depth of approximately 95 ft. The loading and ballast lines are laid in the same trench and run in a direction 055°. The mooring buoys are numbered 1, 2, 3, 4, 5, 6, 7 and 8 (on the port bow) and running consecutively in a clockwise direction.

LOADING READINESS AND ARRIVAL TIME: The company will make every effort to load vessels upon arrival or as promptly as berth is available, weather permitting. Notice of Readiness will not be accepted as at time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered as the time the Mooring Master boards the vessel or the time that vessel anchors, whichever occurs first.

FRESH WATER: Not available.

FUEL: Not available.

REPATRIATION: Not recommended.

HOLIDAYS: The Terminal will never be closed due to Religious Holidays.

SHIPMASTER'S REPORT: February 1993.

Anchorage: Ras Shukheir Anchorage Area is designated on B.A. Chart No. 2374 (Lat. 28° 16' 25" N., Long. 33° 33' 00" E.).

The holding ground is mud and very good.

The anchorage can be approached from North of Morgan Oilfield or from South past Felix Jones Patches and between the oilfield and the shore.

Tankers: Seaberth No. 1: Max. draft 19.5 m.
Seaberth No. 2: Max. draft 19.2 m.

Ballast: All ballast from cargo oil tanks must be discharged ashore through the ballast line at a cost of U.S.$ 0.25 per metric ton.

Moorings: All wires to have rope tails. The winch serving Buoy No. 1 should have an extra wire married on. The winch serving Buoy No. 7 should have a mooring rope married on.

Supplies: Fresh provisions are brought from Suez at a transportation charge of U.S.$ 50.00. They are of good quality.

Shipchandler: The Egyptian Marine Supply and Contracting Co. Telex: 66132 Consup Un.

AUTHORITY: *Operator:* Gulf of Suez Petroleum Co. – GUPCO, (P.O. Box 2400) Palestine Street, 4th Sector, New Maadi, Cairo, Egypt. *Tel:* 3522846, 3521365. *Telex:* 92248 Gupco Un. *Cables:* Gupcooil, Cairo. *Contact:* Captain Hassan Hafez, Marine Division Manager.

AGENCY: See "Suez Canal".

SAFAGA: 26.46 N. 34.00 E. (See Plan)

DOCUMENTS: The following documents are required on arrival:

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

Complete set of Manifests covering all cargo on board showing names of shippers and consignees.

4 copies List of Passengers in Transit.

4 copies Crew List.

Deck log books showing date of last call at an A.R.E. port, completed up to the time of arrival at Port Said or Suez.

PILOTAGE: Compulsory. International pilot flag must be hoisted and Pilot will board vessel on arrival. Vessel should endeavour to arrive at the N. end of the island by sunrise, at Safaga Port by early morning; the light behind them will show up the reefs clearly. Wind, light in the morning, gains strength during the day, making tying-up more difficult. A beacon (Morewood Beacon), visible a mile off, is erected on the Southern spit of the island. After rounding the spit, Masters keep 5 cables clear of visible reefs and enter the harbour keeping the 2 large beacons to the North of the pier in line. The Manager, or his representative, of the Safaga Phosphate Company will meet ships in launch with instructions on berthing.

MAX. SIZE: See "Berthing".

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor especially when it is presumed that the sick will be hospitalised.

The vessel's personnel should carry international vaccination and/or inoculation certificates.

BERTHING: *Phosphate:* There are 2 mooring buoys marked B and C and 2 mooring posts marked A and D.

(1) The anchor position is marked by a small red or white flag. When mooring, manila ropes only should be used, as wire ropes can be run out afterwards when ship is alongside.

(2) Due to rocky nature of sea bottom, it is very desirable that ship in coming into berth, does not override her anchor, as, if this happens, chain is apt to foul coral bottom and cause trouble later on.

(3) Endeavour to have all way off ship when anchor position is reached. Drop anchor as close to flag as convenient and go astern. If necessary check cable when 2 shackles have been paid out.

(4) Run rope to Buoy C, run rope to Buoy B, run rope to Post D, then run rope to Post A. Run Spring to S1, S2, S3, and pull alongside. Company's launches will run all ropes.

(5) If wind is blowing strongly off shore, a Spring may be run to S3, immediately a good rope to Buoy B is made fast.

(6) The best way to reach the anchor position is to steer straight for same, keeping Buoy C on port side. This will keep vessel clear of Buoy C and when anchor is dropped, the stern should swing clear of this Buoy. If it does not, a rope can be run to S3 and the stern pulled in before falling back on pier.

(7) With anchor dropped as shown, 6 shackles should see No. 1 hatch at the pier, but if chain is slackened carelessly, it may foul bottom and be insufficient to reach pier.

If visibility is very good, a course can be made between the Hyndman and Cannon Reefs, and altered to bring the beacons referred to into line.

Rock phosphate and ground phosphate are loaded at this port for shipment all over the world. The mines are situated some 30 km. away and are connected by company's own railway. Rock phosphate loaded (1,000 metric tons per day) from elevator and phosphate in bags by ship's gear. Max LOA 70 m. Max. draft 27 ft.

General Cargo: Cargo vessels can berth alongside a quay of 443 m. with a draft of 30 ft. – 32 ft. Quay used for loading and discharging general cargo. It can accommodate 2 medium size vessels and one large vessel.

Grain: LOA 220 m. Max. draft 36 ft. 06 in., however vessels can berth with draft 42 ft. Discharge rate 8,000 - 10,000 tons per day

Aluminium: Max. LOA 285 m. Max. draft 33 ft. Discharge rate 8,000 - 9,000 tons.

STEVEDORES: Canal Stevedoring Co.

SERVICES: Water, deck and engine stores and provisions provided by Egyptian Contracting and Marine Supply Co.

HOLIDAYS: See "Suez Canal".

SHIPMASTER'S REPORT: January 1981.

Pilotage: Pilotage for berthing is compulsory, and the Harbour Master acts as Pilot.

Entry or departure at night is forbidden, without special permission from the Naval Authorities.

Anchorages: Vessels are allocated an anchor berth in the inner harbour by the Harbour Master. Vessel anchored in the Northern part of the anchorage, with Morewood Beacon bearing 135.5° × 2.8 miles, in 30 m. of water, with 6 shackles of cable out, and no difficulties were experienced, despite a period when wind from the North of Force 5, gusting 6, occurred when the ship had a 3,000 tonne coaster alongside.

Approaches: Vessel arrived off Safaga Island at approximately 2130 hrs. and no difficulty was experienced in anchoring with Morewood Beacon bearing 334° × 11 cables. The N.E. point of Safaga Island, and the headland near Bir Safaga showed up well on radar, as did Morewood Beacon, once identified.

Upon entering harbour the next morning at first light, a little difficulty was experienced in locating the leading beacons. From outside the harbour, the most prominent object visible is the alumina silo and elevator, and this uncharted feature being mistaken initially for the charted phosphate transporter, we were looking in the wrong place. Once sighted, however, the beacons were found to show up well in the early morning light. (These leading beacons are fitted with Fixed Red lights, but these are only turned on when Naval Vessels are entering or leaving port by night). A can shaped mooring buoy situated in the middle of the inner anchorage just North of the leading line is of assistance, but the buoys marking the dredged channel are non-existent. This mooring buoy is a handy turning point for ships proceeding to the Northern part of the anchorage.

A partly ruined beacon is visible on the sand spit at the Southern end of Safaga Island approximately 3 cables from Morewood Beacon.

Of the two stranded wrecks charted on the S.W. shore of the inner anchorage, the Northern one (marked PA) has been salvaged. The Southern one is conspicuous, and afloat at high water. It is reported that this one may well be salvaged soon.

There appeared to be little or no tidal stream or current to speak of in the inner anchorage, vessel lying to the wind most of the time.

Max. Size: The largest size of ship handled is about 50,000 tonnes d.w.t., with a max. draft of about 11 m.

Radio: There is no radio station at Safaga, and telephone/telex links are minimal. Harbour authorities wishing to communicate with ships entering use VHF sets of ships alongside. We maintained a normal sea watch (1 Radio Officer) both at anchor and alongside, and good communications were obtained with Portishead Radio.

Tugs: There are no tugs available.

Berthing: Commercial Wharf: Approximately 500 m. in length.

This has 3 berths at present. No. 1 Berth is the one at the N.E. end, Berth No. 2 in the middle, and the alumina berth at the S.W. end.

Berths No. 1 and 2 are kept exclusively for the discharge of wheat; cement ships use the alumina berth by private arrangement. Depth alongside Berth No. 2 is officially 9.1 m., but reported deeper. (We berthed drawing 9.6 m.) and at Berth No. 1 the depth is stated to be 9.7 m. alongside, but 11.0 m. if barges are placed between the ship and the quay. Works are in progress to extend the commercial wharf Northeastwards from Berth No. 1 almost up to the Naval Wharf, which extends as marked on the chart.

The Oil Jetty charted to the South of the town is reported to be part of the Naval Base.

Cargo Handling: Bulk wheat is discharged by portable pneumatic conveyors (vac-u-vators) into hoppers on the quay, where it is bagged and taken away by lorry. (Discharge rate for this vessel approximately 1,900 tonnes/day).

Alumina is discharged direct to the silo by fixed elevator.

Cranes: There are no cranes on the wharves. It was reported that there is a mobile floating crane, of 15 tonnes SWL at 35 m. radius, although this was not seen by us. A small floating crane is in use for the extension works.

Medical: A doctor is available, and will visit ships at the inner anchorage. Cholera Vaccination Certificates are required, and the doctor will do vaccinations.

Density: 1030.

Fresh Water: There is a limited supply of fresh water, the quota being 500 tonnes a month for all ships, but this is expensive.

Fuel: No fuel oil of any kind available.

Consuls: None locally.

Repairs: The nearest repair facilities are at Suez.

Gangway/Deck Watchmen: Employment by the ship of shore watchmen is compulsory, and they have to be accommodated on board both alongside and at the inner anchorage. Whilst shore labour is onboard, a policeman is placed on board to guard the ship's accommodation.

Shore Leave: Permitted, passes being issued when ships are alongside, although apart from one hotel there is very little to do in Safaga. Agents can arrange trips to the River Nile, Valley of the Kings, etc., but special passes are required.

General: Provisions: Fresh provisions are available in season, and a chandler will visit ships without prior appointment.

Cargo Handled:

The principal activities of the port are:

(i) Import of wheat: approximately 100,000 tonnes/month.

(ii) Import of alumina: 60 – 75,000 tonnes/month. (3 – 4 ships).

(iii) Import of cement: 13 – 15,000 tonnes/month. (1 – 2 ships).

(iv) Export of phosphates: approximately 20,000 tonnes/month. (1 – 2 ships).

(i), (ii) and (iv) are all under the control of the Egyptian Government, (iii) is carried out privately.

SHIPMASTER'S REPORT: September 1982

1. Pilot does not board on arrival.

There are very good visible leading markers (red and white), also 5 buoys have been laid out marking the dredged canal. They are ordinary unlit mooring buoys. Pass between these buoys with the leading beacons 310° True and vessel is clear of dangers. On the 5th buoy, which is (single) on vessel's starboard side vessel can turn out of the channel and proceed to any place outside the 310° lead.

2. Discharging grain, draft limit 36 ft. 6 in. With 30 ft., vessel shifts to Berth No. 2 to finish. Daily rate of discharge is about 3,600 tonnes.

3. Water comes by pipeline from Nile River not by barge from Suez.

4. Berthing: Use starboard anchor. A motorboat takes first 2 headropes then 2 stern ropes ashore and then heave the ship alongside. Pilots are careful.

Mooring: Have 3 headropes, 2 breastlines and 1 spring ready (same aft).

When shifting from Berth No. 1 to No. 2 ship does not shift along the berth but makes a new berthing due to anchor.

SHIPMASTER'S REPORT: January 1983.

Pilotage: The Harbour Master has ceased allocating anchorage and ships now anchor wherever they like inside bay. Our vessel is 610 ft. long and drawing 36 ft. 6 in. and like your earlier report arrived and anchored half a mile South of Morewood Beacon at 2140 hrs. and moved up to anchor four cables from grain berth in the morning. Passage over reef crossing bay (apart from clearly shown leads) is now marked by four mooring buoys and channel is 13 m. depth.

Berthing: There is now a 900 h.p. tug to assist. The new berth towards the Naval Wharf is nearing completion. We berthed at No. 1 drawing 11.13 m. with barges between ship and quay.

Fresh Water: Service is prompt when needed.

SHIPMASTER'S REPORT: March 1988.

Approaches: (B.A. Chart 3043). Vessels approaching from the South should keep on Ras Abu Soma which shows up well on Radar at about 24 miles. Panorama Reef Beacon shows up well on Radar at about 10 miles. Safaga Beacon bearing 265° gives a good echo on Radar at 24 miles.

After coming abeam of Panorama Reef Beacon at a distance of 2 miles to the North, steer 211° passing abeam of Morewood Beacon at a distance of about 9 cables. Morewood Beacon shows up well on Radar at about 14 miles. Cnsult soundings continuously as vessel has to anchor 1 mile South of Morewood Beacon. This is on the instructions of the Pilot (VHF Channel 16), who always boards in the roads from a tug. Entering the harbour with Pilot is compulsory. There are no difficulties and no significant current was experienced. The tide is considerable. The roads have good holding ground.

Weather conditions are mostly good. Visibility also good. No rain, drizzle on no more than a few days a year.

If approach is adjusted for dawn the reefs show up clearly. A conspicuous white cubiform building lies to the South of Safaga Island at approximate position 26° 42.7' N., 33° 59.7' E.

Entering and leaving the Harbour is only possible during daylight hours.

The 4 buoys marking the dredged channel of about 14 m. depth, found to be in the charted position. They are "can-shaped" unlit mooring buoys with the colour of rust (unpainted). There is another (fifth) buoy on the North side, of same characteristics (uncharted), at approximate position 25° 43.32' N., 33° 57.55' E. The tug is usually made fast to the buoy.

The leading beacons can easily be located. There is a conspicuous sharp mountain summit far behind (see picture in Pilot Book), in line with the leading beacons. Vessels sailing from the Harbour disembark the Pilot inside the Harbour, West of the fifth buoy. Pilot is picked up by a pilot boat. Accommodation ladder is usually used.

Anchoring inside the Harbour (7 shackles in the water), is always with the assistance of the Pilot. Good holding ground.

Restrictions: Vessels have to arrive with a max. draft of 36 ft. 6 in. (11.13 m.) which is the maximum according to local regulations. However,
1.0 cm. – 2.0 cm. by head or by stern is not a problem, but if over 2 cm. vessel is in trouble. If she is not covered by Charterer's orders and instructions, a big problem could arise against the vessel. Receivers will not accept N.O.R. and Charterer puts vessel "off-hire" for the time she takes to discharge the quantity corresponding to the said 2 cm. overdraft and the vessel has also to pay about U.S.$ 10.0 per tonne of the quantity discharged up to 11.13 m. alongside berth. This happened to us, but as vessel proved that it was not responsible, the Egyptian Charterers accepted the entire liability for time and expenses. Since both Charterers and Receivers are government companies, I did not understand the problem.

Grain Berth: The new grain berth, close to the Naval Wharf, was completed in March 1987. Depth alongside berth is 39 ft., and 36 ft. reported at the South West end of the berth. Vessels of 225 m. in length are warped ahead when the draft reaches 10.0 m. or less. Berthing is as described in "Shipmaster's Report" September 1982, paragraph No. 4.

One tug assists when berthing.

The grain silo has 100,000 tonnes capacity. Trucks continuously load from the silo. The 2 movable modern "Buhler Miag" unloaders with two pipes each, work continuously from 0730 hrs. to 2345 hrs., 7 days a week. When other ships are waiting at the anchorage they may work overtime up to 0200 hrs. next morning. Discharging is fast, average rate about 8,800 t.p.d.

There is a plan to accommodate a special 100,000 tonne grain vessel.

Repatriation: Possible by air from Luxor or Harghada Airport via Cairo or by car to Cairo via Suez (10 to 12 hours). Repatriation can only be arranged through state agents' head office in Suez.

Density: 1030.

Fuel: Not available in Safaga but large quantities can be arranged and come from Suez by bunker barge (small tanker). Fuel and gasoil of very good quality.

Fresh Water: Limited supply and expensive. Quality may be poor.

Provisions: Fish available in Safaga. Other provisions could also be supplied from Suez, transportation cost is U.S.$125.00, including Customs formalities.

Communications: Harbour Master/Pilot and Agent have VHF. There is a telephone station in Safaga. It is easier to call overseas in the afternoon. From Luxor it is very easy and clear with automatic telephone in telephone station or in hotels.

Telexes: For vessels with INMARSAT telex on board, the following telex numbers are very useful as Egyptian Charterers do not provide telex numbers.

Martrans Cairo: 00 91 92909/92243; Arabnavi Alex: 00 91 54131/54509/54311; Estram Cairo: 00 91 93472/92062; Egyptalum Alex: 00 91 94131; Silo Cairo: 00 91 23154; Maramon Alex: 00 91 54507/54127; Minship Port Said 00 91 63263/63034; Minship Suez: 00 91 66042; Memship Alex: 00 91 54162/54502; Mishipco Alex: 00 91 54193.

General: Pilot Book No. 64S/1986 shows phosphate silo.

In addition fo cargo ships (phosphate, grain, cement), cruise ships call at Safaga and anchor in the inner anchorage and passengers visit Luxor which is 3 hours away from Safaga (about 220 km.). Crew are able to visit River Nile, ancient Kings' and Queens' tombs and the museum in Luxor. Permission from Immigration is required but could easily be arranged by state Agent who also arranges the transportation. A visit to the nearby tourist village of Harghada is also possible (20 minutes from Safaga by car) where there are very good hotels and tourist shops. Permission can again be obtained through state Agent. Crew interested in diving can hire divers suits, etc. from special companies (Rate 80 Egyptian pounds for 2 hours, including transportation).

AUTHORITY: Ports and Lights Administration.
AGENCY: See "Suez Canal".

SIDI KERIR: 31.06 N. 29.37 E. (See Plan)

LOCATION: Sidi Kerir Sea Terminal is situated about 27 km. West of Alexandria.

The position of the Sea Terminal is Lat. 31° 06' N., Long. 29° 37' E.

As a reference point, there is a conspicuous pylon 4.5 miles S.W. of Fort Abbassia. A tall radio mast, marked by red lights, stands near a large tank farm, 4.5 miles W.S.W. of the above-mentioned pylon. The tank farm shows up well on radar at 20 miles.

The Terminal operates day and night.

Charts: Vessel's Master should keep on board Admiralty Chart No. 3325 "Approaches to Mersa El-Hamra and Sidi Kerir".

DOCUMENTS: Free zone area, no entry documents to the offshore terminal are required.

PILOTAGE: SUMED's Mooring Master and his assistant board the tanker 2 miles North of Buoy A1.

Notifications: ETA messages should be sent by cable via Alexandria/Port Said Radio on leaving previous port. Cables should be prefixed "For urgent delivery send via Telex 54108 or 54033 SUMED UN" and be confirmed 72, 48 and 24 hours prior to arrival. (Day and night berthing and operation). Arrival draft should be indicated. Vessels should arrive with a trim of 8 ft. by the stern and appropriate ballast to ensure that propeller is completely submerged.

LOCATION OF BUOYFIELD: (SBMs)

A1: Lat. 31° 06' 26" N., Long. 29° 36' 46" E.
A2: Lat. 31° 05' 32" N., Long. 29° 35' 38" E.
A3: Lat. 31° 04' 24" N., Long. 29° 35' 37" E.
A4: Lat. 31° 04' 54" N., Long. 29° 37' 39" E.
A5: Lat. 31° 05' 40" N., Long. 29° 38' 24" E.
A6: Lat. 31° 07' 30.4" N., Long. 29° 37' 58.3" E.

ANCHORAGES: Tankers can anchor to the North and N.W. of the buoyfield.

MAX. SIZE: The six berths are spaced one from the other so that each has:

Mooring Area Radius: 410 m. for A1, A2 and A6 (accommodate vessels up to 350,000 d.w.t., 400,000 d.w.t. with Sumed's prior approval); 320 m. for A3, A4 and A5 (accommodate vessels up to 250,000 d.w.t.); Manoeuvring Area Radius: For A1, A2 and A6, 1,220 m.; For A3, A4 and A5, 915 m.

Water Depth and Draft Limitations:

For A1, A2 and A6:	85 ft. maximum water depth
	75 ft. maximum draft
For A3, A4 and A5:	60 ft. mimimum water depth
	54 ft. maximum draft

Minimum Size: 50,000 d.w.t. ±5%. Minimum cargo loading is 40,000 metric tons of any one type of crude oil.

TUGS: 2 tugs × 2,200 h.p. and 2 supply boats × 4,000 h.p. with fire fighting and anti-pollution equipment is available as required.

Mooring Launches: 500 h.p. mooring launches assist in mooring and hose operations.

RADIO: All messages to be sent via Alexandria/Port Said Radio. Sidi Kerir has a HF long range radio working on 2182 kHz and 4142.5 kHz.

VHF: Channels 16, 78 and 3.

BERTHING: *Ship's Derrick:* The ship's derrick should be capable of lifting 10 tons and rigged on the port side ready on arrival to take the gear on board for berthing the ship and connecting the hoses.

Mooring: Buoys A1, A2 and A6 are equipped with twin nylon ropes of 18 in. circumference and 180 ft. long, ending with a 26 in. chafing chain 2.75 in. diameter. A support buoy is connected to the chain.

The port side mooring rope has a 350 ft. polypropylene pick-up rope of 10 in. circumference. The starboard side is the same but the pick-up rope is only 180 ft. in length. Two bow stoppers are required.

Buoys A3, A4 and A5 are equipped with one gromet rope of 15 in. circumference and 180 ft. long, ending with a 26 ft. chafing chain. One bow stopper is required.

Hoses: Each berth has two cargo hoses with a 16 in. connection (ASA 150). There is a ballast unloading facility with 16 in. connection. Connection of hoses to be performed by the vessel under the supervision of SUMED's Mooring Master.

Loading/Deballasting Rates:

Buoys A1, A2 & A6	Loading	Max. 12,000 tonnes per hour
	Deballasting	5,000 tonnes per hour
Buoys A3, A4 & A5	Loading	Max. 10,000 tonnes per hour
	Deballasting	3,000 tonnes per hour

Shipmaster's Report: January 1986.

Dirty ballast reception: 1×16 in. floating hose. Hose to be connected by ship's crew together with cargo hoses. Maximum discharge pressure 100 p.s.i. according to Loading Master there is no limit on quantity.

SUPPLIES: No bunkers or supplies are available or permitted.

MEDICAL: Private doctors and hospitals are available in Alexandria.

SHORE LEAVE: There is no shore leave for personnel of vessels loading at Sidi Kerir Terminal (disembarkment from vessels is strictly forbidden except in emergencies).

GARBAGE DISPOSAL: Collection service available. Plastic bags are provided.

WASTE OIL DISPOSAL: Collection service not available. All buoys are equipped with deballasting sealines.
SEAMAN'S CLUBS: No shore leave from Sidi Kerir.
CURRENCY: Egyptian Pound.
AGENCY SERVICES: Not required under normal circumstances.

SHIPMASTER'S REPORT: *General:* Sidi Kerir is the Northern end of the pipeline from Ain Sukhna in the Gulf of Suez. The pipeline is owned by the Arab Petroleum Pipeline Co. and operated by SUMED Co. (Suez – Mediterranean).

The Sidi Kerir Terminal (Tank farm) position is at Lat. 31° 03' N., Long. 29° 40' E. There are at the moment 5 SBMs for loading vessels, more are planned for the future. The buoy field is marked by the following points: "A" Lat. 31° 08' N., Long. 29° 37' E., "B" Lat. 31° 04' N., Long. 29° 31' E., "C" Lat. 31° 01' N., Long. 29° 35' E., "D" Lat. 31° 05' N., Long. 29° 41' E.

The area within ABCD is a prohibited anchorage area and may not be entered without a Pilot.

The position of the 5 SBMs is within the area:

1. Lat. 31° 06.7' N., Long. 29° 35.7' E. For loading Arabian Light & Kirkuk Crude.
2. Lat. 31° 05.9' N., Long. 29° 36.9' E. For loading Arabian Light & Kirkuk Crude.
3. Lat. 31° 04.6' N., Long. 29° 36.9' E. For loading Arabian Light & Kirkuk Crude.
4. Lat. 31° 05.0' N., Long. 29° 37.9' E. For loading Arabian Light & Kirkuk Crude.
5. Lat. 31° 05.1' N., Long. 29° 38.6' E. For loading Basrah Crude.

(a) The current sets usually from N.W. at about 0.5 knots but may increase during Summer to 1 knot; there is no considerable tide.

(b) References: BA Chart 3356; BA Pilot Book 49, 6th edition 1976.

Documents: One crew list, one ship's stores list and clearance from last port.

Pilotage: Pilot also acts as Loading Master and boards vessel at the anchorage. A pilot ladder/accommodation ladder combination is to be rigged on the starboard side. Vessels must give a lee for the pilot launch. Pilots work preferably during daylight hours.

Anchorage: The anchorage is one to two miles North of the buoyfield in 20 to 40 fathoms of water. There is good holding ground on sandy bottom; no shelter during Northerly winds or swell. The port closes during strong winds and swell. An open sea approach; no dangers on the way to the anchorage. The coastline is low desert and gives a poor echo, the best radar echo during the approach was the tankfarm and the pipeline.

Max. Size: Max. draft 75 ft. Max.size 400,000 d.w.t.

Radio: ETA information to be given preferably via Alexandria Radio to telex number 54108 attention "SUMED operations – Alexandria" at 72, 48, 24 hours prior to arrival. Initial message should give call sign; Summer deadweight; Summer draft; cargo requirements with name of crude and approximate quantity required in cubic metres and long tons, also maximum loading rate required in cubic metres; last port; whether vessel carries 2 × 16 in. reducers.

Health: Free Pratique is given by the Pilot/Loading Master.

Tugs: One tugboat, 2,200 h.p., is on standby at the buoyfield and will assist on request.

Berthing: The vessel moors to a SBM. The mooring equipment, 2 wire slings, 2 shackles and a toolbox, are taken from the launch.

SBM Loading Berth: The hoses are connected by the ship's crew under the supervision of the Loading Master. The (2×16 in.) hoses are of a floatable type with a Camlock connection.

The maximum loading rate is given as 15,000 cu.m./h. or as requested by vessel. Before completion of cargo the pumps are stopped and the balance loaded by gravity. At the present time the dirty ballast facilities are under construction.

Repairs/Drydocks: At Alexandria about 12 miles to the East. No facilities at Sidi Kerir.

Density: 1026.

Supplies/Services: None.

Authority: The Pilot/Mooring Master acts as Government Representative.

SHIPMASTER'S REPORT: November 1987.

Pilotage: The Pilot/Loading Master and the surveyor boarded by helicopter. No Notice of Arrival was given.

Documents: The pilot takes the vessel's Register, Load Line Certificate, Safety Construction Certificate, Derat Certificate and Safety Radio Certificate for clearance. Various local forms are supplied by the pilot for completion.

Anchorage: Vessel used B.A. Chart No. 3356 (New edition March 1976).

Vessel anchored with the radio mast bearing 113° (True) and the water tower bearing 141.5° (True). The distance from the stern to the shore by radar was 2.6 miles and the distance from the stern to the buoy was 1.2 cables.

Notice: The following notice was handed to the Master on arrival:
QUOTE

Ship's Alertness.

This Terminal is on an open roadstead, therefore, during the time a ship is moored at the Terminal, the ship's engines and gear must be ready with full power for immediate use.

A vessel in a submarine berth must be able to clear and shall clear immediately upon advice of the Mooring Master or as directed by Sumed's Terminal Superintendent.

Ship's personnel should be at their stations and alert at all times during mooring, unmooring, and during cargo transfer operations.

Watchman must be stationed forward to watch the buoy, ropes and floating hoses.

Watchman must be stationed beside the manifold to watch the connection.

The vessel must stand-by on the VHF (Channel 78) at all times during the loading operations.
UNQUOTE

SHIPMASTER'S REPORT: September 1989.

Vessel: VLCC, 268,000 d.w.t.

Charts: BA. Chart No. 3323 is somewhat out of date in the information it contains, according to local sources. This is probably because the Admiralty has not been advised of the latest information by local officials. It appears that the strictures about old surveys no longer apply to the area of approach, but which parts have been surveyed, and when, I was not able to discover. Suffice it to say that about 50 vessels per month use the terminal, ranging from fairly small ships up to and including those of the same size or larger than this vessel, having a loaded draft in the region of 21.0 m., and all have managed to arrive and leave without mishaps.

The Pilot Station and Waiting Area to the S.W. and West of the SBMs is the original one which was in use when terminal was first started. Nowadays this is only used by vessels which arrive for the first time and have no alternative information.

The preferred waiting area is now to the N.E. of the SBMs and this is used by the majority of vessels, especially those which trade regularly to the terminal.

Pilots: Pilots now prefer to board by a small helicopter and if possible during daylight hours only. If movements are performed after dark, the more conventional method of boarding from a launch is used.

The Pilot boats come from a depot near Alexandria, which is another reason why the area N.E. of the terminal is preferred, being that much nearer.

Pilot Boarding Position: We were requested to come to a position 1.5 miles East of the buoy, to which we were to moor, and similar instructions were heard being given to other vessels which were berthed, although the helicopter can go to any position.

Helicopter prefers vessel to be heading into wind for landing.

Cargo documents are delivered by helicopter and pilot leaves in same way, except as stated above, when night-time movements are made and a launch is used.

Documents: The SUMED Loading Master/Pilot acts on behalf of the relevant Government Departments and requires 4 copies of Crew List, 2 copies of Vaccination List and 2 copies of Stores List. Also required, were the following Ship's Documents, which are taken ashore for verification and returned with cargo documents prior to sailing:

Certificate of Registry.
Load Line Certificate.
Safety Equipment Certificate.
Derat Certificate.
Safety Radio Certificate.
Suez Canal Tonnage Certificate (if applicable).
Panama Canal Tonnage Certificate (if applicable).

Communications: We used telex communication throughout without problem, the numbers for the SUMED office are 54108 and 54033. No information was received from them, and on arrival, the same information was requested on VHF Channel 78.

Ballast: Vessels are preferred with clean ballast, but reception facilities, for which a charge is made, do exist. Another hose is connected for dirty ballast discharge to reception ashore. This can sometimes be a slow process if the system has been heavily used and is near the limit of its capacity.

Loading: This vessel loaded 2 grades, a maximum rate of 10,000 cu.m.p.h. being available on each. The grades were loaded one after another, two hoses being used. A "short stop" of 10,000 cu.m. was necessary, as the second grade then follows the first down the pipeline.

AUTHORITY: Arab Petroleum Pipeline Company (Sumed), 431 El-Guish Avenue, Loran, Alexandria, Egypt. Postal Address: P.O.Box 158, Alsaraya, Alexandria, Egypt. *Tel:* 5864138, 5864139, 5877818. *Telex:* 54108 Sumed Un. *FAX:* 5866713, 5878397, 5871295, 5871297. *Contact:* Moussa Abdel Motagaly, Sidi Kerir Terminal – General Manager.

SUEZ CANAL (including Port Said and Suez): (See Plan)

Also see "Rules of Navigation".

DOCUMENTS:

The following documents are required on arrival:
The last Classification Certificate issued.
Information concerning a vessel transiting the canal.
4 copies Crew List.
*Ship's Register and Suez Canal Special Tonnage Certificate.
General arrangement and capacity plans of the vessel, if transiting the Suez Canal for the first time, or, undergone any alterations.
Suez Canal Authority's double bottom tanks capacity form.
Navigability form.
Complete set of Manifests covering all cargo on board showing names of shippers and consignees.
4 copies List of Passengers in Transit.
Landing cards for passengers landing finally in the A.R.E. and for those landing in the A.R.E. in transit.
4 copies List of Passengers finally landing in the A.R.E. (if any) together with their addresses in the A.R.E.
Deck Log Books showing date of last call at an A.R.E. port, completed up to the time of arrival at Port Said or Suez.
Mail Waybills for ports beyond Suez Canal ports and alternatively, a document from the Master is required (cargo and passenger ships only).
Quantity of bunkers, water and cargo on board.
Free Pratique Certificates issued by the local Quarantine Doctor.

In case of a Northbound vessel loading or discharging alongside quay staying more than 24 hours in Suez, the following documents should also be presented.

(1) Load Line Certificate.
(2) Safety Equipment Certificate.
(3) Radio Safety Certificate.
(4) Documents covering names and ratings of ship's officers and their certificates.

* It is essential, to have amongst ship's documents, on board the vessel valid National Ship's Registry Certificate showing latest ship's name and her present Owners.

The above procedure is requested by the Suez Canal Authority, Traffic Control, to avoid delay for ships in joining the first convoy, or being liable to be stopped in the Canal in case of direct transit from Roads.

Advance notice to both Suez Canal Authority's Traffic Control and Measurage, with minimum period of 48 hours prior arrival.

For Pilot's Use:

(1) Arrival form of the Suez Canal Authority.
(2) Declaration "E" form for dangerous cargo on board in transit.
(3) Any other documents relating to shipments of dangerous cargo, radio-active or fissile.

N.B. Plain Suez Canal Forms are normally handed to Master by Pilots or ship's Agents, to be filled on arrival and also for use on consequent voyages.

Quarantine Authorities:

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List
1 Passenger List.
Derat Certificate should be handy for inspection.
Clearance from last port.

Passports:

For Immigration Officer the following documents are required on arrival:

Arrival Immigration form, duly completed.
1 Passenger List.
List of Passengers finally landing, in duplicate.
Crew List.
Valid passport with entry visa is required for landing in A.R.E. for passengers landing. Emergency visa can be granted on arrival if so required.

For Customs Use:

(1) Bonded Store List, in duplicate.
(2) Crew List and Passenger List in duplicate, showing rate of consumption of each.

Arrival Formalities - Documentation:

Upon arrival at Port Said or Suez for transiting the Suez Canal, Master will be presented with the following documents by the local authorities:

1. Maritime Declaration of Health	4 pages
2. Ship's Report	1 page
3. Notice for Port Officer	1 page
4. Declaration for Ships in Ballast	1 page
5. Statistical Declaration	1 page
6. Information Concerning a Ship	1 page
7. Information Concerning a Vessel Transiting the Canal	1 page
8. Declaration of State of Navigability	1 page
9. Declaration Concerning Use of Double Bottom Tanks and Lower Parts of High Tanks	2 pages
10 Passport Control Office Declaration on Arrival	2 pages
11. Requisition for Canal Projector Apparatus	1 page
12. Canal Mooring and Lights Co. (receipt)	1 page
13. Passport Control Office - Declaration on Arrival and Departure	1 page
14. Declaration on Departure	1 page

Note: Shipmasters should pay special attention to Document No. 9, being the Declaration Concerning Use of Double Bottom Tanks and Lower Parts of High Tanks, which document will assist the Suez Canal Authorities in assessing the Canal tolls. The schedule on the reverse side of the form must be filled thus avoiding any over-assessment of the Canal tolls.

Moreover, and when Shipmasters are requested to sign 2 copies or more of the same document, they should ensure that the first page is marked/stamped as "original" and all other copies to be marked/stamped as "copy".

Shipmaster's Report: January 1984.

Crew Personal Effects Declaration, Bonded Stores Declaration and Stores List are not required.

The Bonded Store is not sealed.

The Ship's Log Books are not taken ashore but the Certificate of Registry is taken in Port Said and returned at Suez.

Shipmaster's Report: October 1988.

The following documents are required for Suez Canal transit:

Agent: 1 copy Crew List.
State Agent: 1 copy Vessel Information Form.
5 copies Crew List.
1 copy Navigability Form.
1 copy Cargo List.
1 copy Shipping Agency Inward/Outward Form.
1 copy Liferaft Certificate.
1 copy CO2 Certificates.
Vessel's Safety Certificates.
Customs: Free Zone Certificate.
Quarantine: Quarantine Questionnaire.
1 copy Crew List.
1 copy Clearance from Last Port.
1 copy Vaccination List.
Suez Canal Authority: 1 copy Crew List.
1 copy Vessel Information Form.
1 copy Double Bottoms Tank Capacity Form.

The following documents are required for vessels berthing at Port Said:

Agent: 1 copy Crew List.
Immigration: 2 copies Crew List. (Shore passes and Passports obligatory).
Quarantine: 1 copy Clearance from Last Port.
1 copy Quarantine Questionnaire.

Circulars: Issued by Canal Shipping Agencies Company, Port Said:

Also see "Radio Officer's Report".

Circular No. 42/81: To all Shipowners and Masters.

We append hereunder free translation of Circular No. 2004/T81 received from the Deputy Manager, Transit Section, Suez Canal Authority, Port Said:

"It has been noticed that the necessary notification which should be given before the ship's entry in harbour in case of carrying dangerous cargo on board is neglected by Masters who also fail to fulfil the relative declarations, as stipulated in the Suez Canal Authority's Rules of Navigation Appendix for Vessels Carrying Dangerous Cargo (Edition 1977), which may expose both the vessel and the port to risks arising from the goods in question.

Kindly, therefore, draw the attention of Owners and Masters to the necessity of adhering to the said rules, noting that the Master will be entirely responsible navigably and criminally for any occurrence which may arise from failure to give the required notification, inaccuracy of details or omitting to take the necessary precautions on board".

Circular No. 23/82: To all Shipowners and Masters.

We once again should like to draw your kind attention to the fact that some Owners abroad do not provide the Protection Centre, Nuclear Research Centre of the Atomic Energy Establishment, Cairo with sufficient information in respect of such shipment on board their vessels.

In this connection, we would refer to our Circular No. 3/79 dated 6th January, 1979, text of which is quoted hereunder for your easy reference.

"According to Circular No. 4/3BA-406012, dated 1st September, 1964 and the amending Circulars issued by the Transit Section of the Suez Canal Authority and also the Suez Canal Authority's Rules of Navigation Appendix for Vessels Carrying Dangerous Cargo, the transport of radioactive substances carried by vessels transiting the canal are subject to protective conditions concerning transportation and transit, as specified therein, with the object of ensuring the safety of the said water channel and its environment.

However, it has lately been noticed that due attention is not given by Shipowners and Shippers abroad to forwarding the relative complete data which must reach the Atomic Energy Establishment before each shipment with regard to substances of Group 1 or on shipment with regard to substances of Group 2, this being in accordance with Item 3 of the aforesaid circulars and also Chapter 3 of the Appendix in question.

Kindly, therefore, advise Shipowners and Shippers that all the said conditions should be fulfilled, especially regarding the complete information relating to radioactive substances which should be sent immediately upon its receipt to: Head of the Protection Section, Nuclear Research Centre, Atomic Energy Establishment, Atomic Energy Post Office, Cairo.

This will enable us to take the necessary action to safeguard public interest.

We add that it is of vital importance that you also supply your Agents with all the required relative information and documents sufficiently in advance, to enable them to take the necessary action with both the Suez Canal Authority and the Atomic Energy Establishment in Cairo.

MAX. SIZE: 1st April 1996: LOA – No restriction. Max. beam 245 m. (aft draft 36 ft.) but in ballast. Max. draft 58 ft. (beam 158 ft.) or max. draft 41 ft. 09 in. (beam 200 ft.).

Also see "Suez Canal – Rules of Navigation" – Article 52.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor specially when it is presumed that the sick will be hospitalised. The Quarantine doctor meets the ships whilst entering the port and the ships are boarded in turn. To get a quick clearance and not to be left for later attendance, Masters are requested to receive the doctors as soon as they board and to have the following documents ready:

Quarantine Forms in Duplicate: When inserting the ship's register net tonnage special care should be taken in indicating same on the 2 quarantine forms (Form No. 15 Q.A.) as the dues are calculated on that tonnage, as incorrect information may cause complications.

Derat Certificate should be handy for inspection.
Clearance from Last Port should also be handy.
All ports at which the vessel has called as well as dates of sailings for the last 30 days should be inserted in the form.

Quarantine Signals:

By day: "Q" flag (signifying vessel healthy). *"Q" Over first substitute (QQ).* (Vessels have cases of infectious diseases more than 5 days ago, and there have been unusual mortality among the ratings or crew on board.) *"Q" over L flag (QL)* signifying (vessel is infected and has cases of infectious diseases less than 5 days ago.)

By night: red light over white: The flags and lights must remain hoisted until Free Pratique is granted. Ships in transit under Quarantine through the Suez Canal will use the same signals until they clear the other end of the Canal.

Important: In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at an A.R.E. port the vessel is put under compulsory Quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless, the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under Quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique Granted by Radio: Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

(1) The vessel must be a regular liner known to the Quarantine Authorities and has a doctor on board.
(2) Details shown on the Quarantine Statement should be radioed to the Quarantine Authorities 24 hours prior to ship's arrival.
(3) Masters of vessels must declare before their arrival any accidents which might have taken place on board prior to the arrival in port.
(4) The ship must not have called at any infected port.

RADIO: *Authorised Personnel Checks:* Masters of vessels are requested to contact the Suez Canal Authority via its wireless station "SUQ" (watch frequencies 425 kHz, 454 kHz and 468 kHz) whenever they want to make sure of the identity of any Suez Canal personnel embarking their vessels, either in the approaches or in the harbours or in the Canal waters. Also in case of any urgent complaints which may need quick investigation.

Radio Officer's Report: May 1990.

"SUQ" receives on 425 kHz, 454 kHz, 468 kHz and transmits on 421 kHz. The station comes on watch at 0900 hrs. (L.T.), with CQ general call, till 1300 hrs., only for messages regarding convoy. It will not accept public correspondence, but will accept messages for Port Authorities regarding joining or missing convoy, etc.

General messages are sent and accepted at 1500 hrs. (L.T.).

VTS: Vessel Traffic Management System in operation.

TUGS: Highly qualified crew are available on board several tugs owned by the Suez Canal Authority in Port Said, Suez and in all Suez Canal stations. These tugs assist vessels to berth in Port Said harbour as well as in Canal if a case arises. It is left solely to the Canal Authority to decide whether more than 1 tug is needed (free of charge) to assist any ship to moor in the Port Said harbour, but if a Master of a vessel finds it necessary to employ an extra tug for berthing or if he needs a tug for any other reason, such an operation will then be charged to the vessel.

Salvage Tug Boats:

(1) 3,200 h.p. *Mounir, Moawen 1, Moawen 2.*
(2) From 3,500 to 5,000 h.p. *Antar, Bassel, Barei, Fahd.*
(3) 6,400 h.p. *Mared, Shahm.*

Harbour Tug Boats:

1,600 h.p. *Bori, Wakar, Chadid, Hout, Kirsh, Morgan, Shabar.*

Quays at Port Said: The Suez Canal Authority has quays to enable vessels to berth alongside at Cheriff and Abbas Basins. Length about 1,300 m. Height about 2 m. from sea level. Also 14 cranes of 3 tons lifting capacity each, running on rails have been installed. Maximum draft allowed is 27 ft. The best part of these quays is ready and vessels with full cargo for discharge are now berthing alongside. Vessels drawing more than 27 ft. have to lighten their cargo into lighters to that draft before berthing.

The distance between Bollards 23 and 24 South of deep Abbas Quay (30 m.) has been reserved for the berthing of one Ro/Ro vessel by the stern, within the present allowed draft (27 ft.).

Height of quay from sea level: 2 m.
Average tide all year: from 40 to 50 cm.
Thickness of fender: about 50 cm.
Breadth of quay edge: from 50 to 60 cm.

Containers: Container quay with length 350 m. and depth 45 ft. 2×45 ton cranes are installed. An additional 250 m. multi-purpose quay has been built adjacent to it. Maximum draft at Container Quay and Multi-Purpose Quay is 42 ft.

Grain: Grain vessels of 45,000 d.w.t. (Draft 38 ft. – 42 ft.) can berth alongside a 100 m. length hulk with 2 barges as spacers. Rate of discharge 400 t.p.h. (7,000 – 8,000 tons per day). Storage capacity: 10×400 ton silos and 1×20,000 silo.

Suez:

Port Ibrahim: Port Ibrahim is the Port of Suez. It consists of North and South Basins. Depth 26 ft.

North Quay: The North Basin has, on the North side, a quay length of 2,415 ft. a total breadth of 975 ft. and depth of 26 ft. at high tide. Quay can accommodate 4 large ships.

Berths 4 and 5, where stores are available, are suitable for general cargo.

Khedivial Quay: Berths No. 9, 10 and 11, length 119 ft., depth 24 ft. at high tide.

Mobile cranes available; 5 tons, 15 tons and 30 tons capacity.

Pilgrim's Quay: (Pontoon Berth) No. 6, 1 berth, length 1,000 ft., draft 26 ft.

Adabiya Port: This port is situated on the Western shore of the Suez Bay, and is under the control of the Naval Authorities.

Berth	*Length* (ft.)	*Depth* (ft.)
Main Quay	1,400	38 - 40
	470	24 - 27
	450	36
Grain Quay	650	40
Cement Quay		33

Discharge Rate at Cement Quay (Budr Jetty) is 6,000 - 8,000 tons daily.

Marakib Quay: Situated at the entrance of the Canal depth 28 ft.; can accommodate passenger and cargo vessels.

Storage Capacity at Suez:

North Quay	40,150 sq.ft.
Pilgrims Quay	20,952 sq.ft.
Khedivial Quay	8,448 sq.ft.
	69,550 sq. ft.

While stacking spaces on the quays are: 332,050 sq.ft.

STEVEDORES: As stated in the ETA messages, Masters are advised to include in their messages details of cargo to be discharged in either Port Said or Suez, hatch by hatch and gangways required, if possible. All loading and discharging operations in Port Said Harbour and Suez Roads are effected by lighters. There are steel lighters, and self-propelled barges available for this purpose that will allow rapid work to be carried out. At Port Said several reefer ships are provided with flat floating pontoons to facilitate discharge of cargo. At Port Said the draft of water does not allow ships to be berthed alongside quays to carry out cargo operations except in Cherif and Abbas Quays which accommodate vessels up to 27 ft. and consequently same are carried out also from and into lighters which are brought alongside the vessels whilst at anchor.

MEDICAL: It is very essential for Agent to receive advance notice of required medical attendance at least 24 hours prior to ship's arrival. All ordinary medical supplies are available and prescriptions are executed at any time at moderate prices and delivered during ship's stay in port. Medical assistance at Port Said and Suez is available. Consultations on board could be arranged through ship's Agent at any time by day or night. Reliable dentists are available at Port Said and could be consulted on board, if necessary, and during the following period at their clinics: From 0900 to 1300 hrs. and from 1600 to 1900 hrs.

Oculists are available for consultations at town clinics in Port Said during usual working hours. Opticians are also available at Port Said. The following hospitals are available with ample first, second and third class accommodation, accepting patients irrespective of nationality at reasonable charges:

At Port Said	*At Suez*
Al Mabarra Hospital	Al Mabarra Hospital
Notre Dame de la Deliverande Hospital	Abou El-Azayem Hospital
Two General Government Hospitals	General Government Hospital
T.B. Hospital	Isolation Hospital
Isolation Hospital	Ophthalmic Hospital
Ophthalmic Hospital	

Ship's personnel should carry international vaccination and/or inoculation certificates if a vessel is arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of arrival.

Note: In good weather the length on buoys may be increased from 3 m. to 9 m. according to the length of the berth and height of the vessel.

TANKERS: There is a bunkering station at Port Said harbour which can accommodate 4 tankers with not more than 38 ft. draft for the purpose of discharging their cargo of fuel or diesel oil to the different oil bunkering companies.

Tankers in Suez discharging bunkers and changing crew do so in the New Suez Terminal or the Suez Petroleum Basin. Tankers in Port Said discharge bunkers only.

Oil Storage: There is ample tank storage for bulk petroleum products.

New Suez Terminal: The terminal is situated in Suez Roads.

(1) Presently one berth has been reconstructed and is used by tankers chartered by EGPC.
(2) Minimum depth of water at LWOST in the approach Channel is 38 ft.
(3) Minimum depth of water at LWOST alongside each berth is 38 ft.
(4) Maximum safe length of tanker applicable 750 ft.
(5) Six pipe lines each berth:–
4 lines × 20 in.
2 lines × 16 in.
1 line × 4 in. (fresh water)
(6) All types of oil products can be handled at this berth.
(7) Facilities are available for reception of ballast. There is a charge for the service.

Suez Petroleum Basin:

Jetty No. 4 can take tanker length 500 ft. with 26 ft.draft.
Jetty No. 5 Max. length 530 ft. Max. draft 26 ft.
Jetty No. 7 Max. length 570 ft. Max. draft 26 ft.

There are sufficient pipes for discharge.

FRESH WATER: Available for supply ex self-propelled barges to any quantities required at all times with minimum supply of 50 tonnes for vessels exceeding 500 tonnes gross provided vessels inside the harbours, vessels at anchorage areas minimum supply quantity is 200 tonnes.

Canal Shipping Agencies Company – Circular No. 123/84:

Fresh water supply for Southbound vessels in Bitter Lakes and Ballah West Branch:

Owners and Masters are hereby notified that Southbound vessels entering the Canal direct from sea, will be able to have their fresh water supply while at anchor in the Bitter Lakes or in Ballah berths as from 20th November, 1984.

The Suez Canal Authority has its lightening vessel "Nagda I" stationed at Ismailia and ready for this purpose.

The vessel "Nagda I" is 3,200 d.w.t., 85 m. long, 15 m. breadth and her fresh water tanks capacity is 1,200 tons.

Demands for fresh water should be made through the Agent representing the vessel, 24 hours pre-arrival, to Port Said Harbour, price per ton of fresh water is the same as in Port Said harbour against receipts signed by Masters for the quantities received (minimum quantity is 200 tons).

FUEL: Different grades of fuel oil are available from different firms. It is customary that the Master should advise in his ETA message of the vessel's requirements, fuel or diesel oil, at least 24 hours prior to ship's arrival into port. Bunkering is by contract between the Owners and the different bunkering firms, and nominations should be arranged for each vessel separately between the Owners and Head Office of the bunkering firm abroad, and for which payment is also effected abroad. Only the Compagnie Orientale des Petroles accepts payment in cash out of Shipping Account No. 2 for supplies effected by them and in which case a nomination is not required. Vessels can be berthed in the oil installation and thus can effect their bunkering requirements through pipelines. Tankers which are not gas-free, cargo vessels carrying dangerous materials and passenger vessels, which are moored opposite the town, can be supplied with requirements of fuel and diesel oil ex self-propelled barges with max. capacity of 700 tons.

Port Said: Vessels can also be supplied at the anchorage areas and in Port Berths by means of supply tankers and self-propelled barges respectively.

Suez: Bunkering always done ex-barges.

FIRE PRECAUTIONS: In accordance with the Suez Canal Authority's regulations, tankers and vessels carrying dangerous materials must comply with their requirements, concerning fire regulations.

CONSULS: The following countries have Consulates or Consular Agencies in Port Said:

China (Rep. of)
Denmark
Finland
France
Germany
Greece
India
Italy
Netherlands
Norway
Panama
Russia
Spain
Sweden
U.K.
U.S.A.

The following countries have Consular Agencies in Suez:

Denmark
Finland
Norway
Sweden

REPAIRS: Most types of repairs whether temporary or permanent can be carried out here by the Suez Canal Authority's shipyard or its subsidiary companies, under the supervision of the appropriate surveyors, if necessary. Suez workshops are well equipped for undertaking all kinds of marine repairs to hull, main and auxiliary engines, boilers, navigation aids, radar and cooling, and installations.

Vessels carrying explosives are not allowed to carry out repairs. Tankers loaded or in ballast but not gas free are not allowed to carry out repairs, except in cases of force majeure of which the Canal Authority is sole judge. Gas-free tankers must present Gas-free Certificate before they are allowed to carry out any repairs. If unavailable, a chemist approved by the Suez Canal Authority can be appointed for testing the tanks and issuing the Gas-free Certificate. The aforementioned restrictions are applicable at Port Said only and not at Suez where vessels anchor at roads and are of no danger.

Other Repair Facilities: Exist at Port Said for air conditioning, wireless telegraphy, radar, course and rudder recorder, refrigerators, and refrigerating units.

All kinds of repairs to echo sounding devices are carried out at Port Said and Suez by experienced specialists at reasonable charge. In Port Said different types are dealt with by the Port Said Engineering Works and Eastern Electronics. The electrical repair workshop in Suez is operated by Suez Electronics.

DRY DOCKS: A floating dock of 25,000 tons, capable of docking vessels up to 50,000 d.w.t., is available at Port Said as well as a dry dock at Suez. Sufficient notice is required to book the date for either the floating or the dry dock.

Repair facilities are available at Suez, where a dry dock is suitable to accommodate vessels up to 8,000 d.w.t.

Dimensions:

Extreme length to inner sill	464 ft.
Breadth at entrance	73 ft.
Height of water over keel blocks:	
at Spring tide	22 ft. fore, 26 ft. 3 in. aft
at Neap tide	19 ft. fore, 23 ft. 3 in. aft

The max. draft at which a vessel can use the dry dock is 17 ft. fore and 20 ft. aft. Deeper drafts may be arranged with the management.

The Suez Canal Authority's Floating Dock and Shipyard is situated at the Northern entrance of the Suez Canal, opposite to Port Said lighthouse.

Ships up to 50,000 d.w.t. may undergo all kind of repairs in the shortest possible time. Tankers, by gas-freeing during their voyage from their home harbour to Port Said, will save at least 4 days if they carry out their repairs in our dock.

Port Said Shipyard has 3 floating cranes, 1×40 ton, 1×100 ton and 1×200 ton capacity available for hire.

GANGWAY/DECK WATCHMEN: In both basins Cherif and Abbas at Port Said, where cargo vessels are normally berthed, ships' gangways can be used for disembarkation and embarkation. Passenger vessels are moored in special berths, i.e. Red Buoys, opposite the town, and can be supplied with 1 or 2 floating bridges (snake pontoon) which can connect the ship with the shore to enable the transit passengers and members of crew to proceed ashore. Cargo ships and other vessels mooring at the different buoys must lower their gangway to facilitate disembarkation and embarkation of ship's personnel as well as different officials. As far as Suez is concerned, all vessels must lower their gangway for the same purpose stated above. A deck watchman is recommended.

Also see "Police/Ambulance/Fire".

Circular No. 1/87:

1. Each vessel, tanker and/or floating unit of any type which berths in Port Said and/or Suez either to transit the Suez Canal and/or to carry out operations has to engage watchmen in the following procedure:

Gross Tonnage of Floating Unit	*Minimum No. of Watchmen to be engaged per Unit*
(a) up to 999 tons	1 watchman
(b) from 1,000 tons to 2,999 tons	2 watchmen
(c) from 3,000 tons and over	3 watchmen
(d) passenger ships	According to Master's requirements with a minimum of 3 watchmen.
(e) Large cargo ships	

2. Each Contractor has to submit to the Master a list showing names of watchmen engaged and their serial numbers.

3. The vessel has to ascertain that each watchman is in possession of an identity card and/or badge bearing a serial number, photo and name of the marine contractor through whom he has been engaged.

4. Masters are kindly requested not to sign blank receipts as it is recommended to keep a copy of same onboard for perusal in case of need.

5. Any incident concerning watchman's attitude on board has to be reported immediately to the Agents so that necessary steps can be accomplished on the spot for the safeguard of ship's interests.

Circular No. 86/84:

On the occasion of the current security precaution measures adopted at present, kindly advise Owners and Masters to the following steps:

1. Upon ship's arrival in Canal waters, security personnel may board vessels with at least two persons with certified identity cards issued by the Suez Canal Security Directorate. The above procedure is a part of security plan to safeguard ships' transit in the Canal due to the prevailing circumstances.

2. Utmost care and accuracy to be taken in relaying information about ship's tonnage and all particulars concerning cargoes onboard, thus complying with manifests, avoiding ship's delay or checking.

3. Special attention to be given on passing information for expected vessels either from the North or the South, and immediate notice for any alteration to be relayed to concerned parties with a minimum period of 6 hours before arrival at Anchorage Area to avoid being delayed.

OPENING/CLOSING HATCHES: In accordance with Charter Parties, the opening and closing of hatches are dealt with as instructed in this Agreement, but for vessels carrying out minor cargo operations, it is customary that stevedores open and close ships' hatches against ships' account. To expedite vessel's transit, it is always recommended that ship's crew, during vessel's entering into the harbour should open the hatches and rig ship's derricks in order that they may be ready for cargo operations immediately upon ship's arrival at either Port Said or Suez.

CUSTOMS ALLOWANCES: Every member of crew is entitled to have 1 carton of cigarettes, 8 ounces of tobacco, and 1 bottle of spirits for his own consumption during ship's stay in Port Said, Suez Canal transit, until vessel exits the Canal or vice-versa. Same applies to passengers, and a limited quantity of bonded stores can be permitted in public rooms and bars on passenger ships. Crew and passenger list, in duplicate, showing the amount in possession of each must be ready on vessel's arrival for submission to the Customs Representatives who normally proceed on board on arrival to seal up the Bonded Stores.

CARGO GEAR: These are normally supplied by the stevedores to comply with the nature of cargo discharged or loaded from cargo ships. Rope lengths and other cargo gear may be additionally required to expedite ship's discharge.

CREW CHANGES:

By law, only the official State Agents are permitted to handle reception or repatriation of crew in Egypt.

Crew members arriving at Cairo Airport to join a vessel must have a letter of introduction addressed to the Manager of Cairo Shipping Agency, 7 Abdel Khalek Tharwat Street, P.O.Box 468, Cairo, telephone number 745755 or 745863. This introductory letter is to be produced immediately upon arrival to the representative attending at the airport. *Note:* A representative is usually in attendance when the crew member steps off the bus and passes through the doors at the entrance hall. Distance from the bus about 20 m. – 25 m. – just in front of the banks.

Visas can be obtained at the airport.

The Suez Canal Authorities have also stipulated the following requirements for arriving crew members:

(a) Be of same nationality as the vessel's flag.

(b) Be in possession of a contract signed and stamped by the shipowners.

(c) Be holding a valid Seaman's Book.

Note: Crew members joining vessels at Suez Canal are not permitted to bring with them spare parts, equipment, electrical apparatus, etc., for vessels unless the goods in question are accompanied by an air waybill which must indicate the words "in transit", together with an invoice from the suppliers stating description and value of the goods.

Principals are requested to telex their Agent giving full details of crew changes including names, flight numbers, dates and times of arrival.

Agent's Notice: This is to bring to your kind attention due to the fact that Owners are sending the return tickets for repatriation of crew members by PTA which procedure entails delay in reserving a place on board the aircraft in addition to the delay that results in tracing the whereabouts of the PTA. This in turn causes extra hotel expenses and we are therefore requesting that Owners leave the ticketing to us in order to cut hotel expenses. Please note the usual crew discount is obtained.

AIRFREIGHT: The Official State Agents are the only Agents legally entitled to handle airfreighted consignments such as parcels, spares, etc. and the following procedure should always be followed:

All parcels should indicate:

(a) Name of vessel to which consignment is intended and port of delivery.

(b) Name of Official State Agent.

(c) The wording . . . . "delivery at Cairo Airport to Cairo Shipping Agency only, on behalf of (insert name of Official State Agent)".

(d) All parcels to be encircled with a wide self-adhesive tape, coloured red. In addition a self-adhesive label to be affixed bearing the name of Cairo Shipping Agency and also the name of the Official State Agent in large capital letters.

(e) The parcel and air waybill must indicate the words "In Transit for M/V......".

(f) Suppliers of the spare parts must always be instructed to enclose with the parcel, copy of their invoice stating description of the contents and value and to ensure that the commodity of the cargo can be indicated precisely on the relative Bill of Lading.

Note: Crew members joining vessels at Suez Canal are not permitted to bring with them spare parts, equipment, electrical apparatus, etc., for vessels unless they are accompanied by an air waybill and an invoice duly completed as instructed above. Please note that any goods for vessels arriving with embarking crew members must also follow precisely points (e) and (f) as indicated above otherwise the Customs Authorities will refuse to release such goods "In Transit".

In order to enable check upon airfreighted consignments, Principals are requested to telex advise their Agent giving full details of flight number, date, air waybill number, etc.

Circular No. 19/83: Dated 8th February, 1983.

Parcels of spare parts, equipment and electrical apparatus arriving care of crew members without transit shipping documents.

Reference is made to our previous circulars, dealing with the above subject, ending with No. 101/82, dated 31st October, 1982, requesting you to kindly ascertain that the air waybill covering a parcel of spare parts must show that same is "In Transit for M/V......".

The object of the present circular is to bring to your kind attention that, considering that, according to Regulations, a crew member is allowed to be accompanied only by his personal effects, the Customs Authorities refuse to release "In Transit" other goods, such as spare parts, various equipment, electric apparatus of high value (T.V., video etc.) arriving care of crew members. As already explained, the goods in question should be accompanied by an air waybill and an invoice duly completed as described previously.

Kindly, therefore, arrange for parcels of spare parts, equipment, apparatus etc. not to be forwarded care of crew members unless they are accompanied with complete shipping documents, otherwise it will not be possible to have them released "In Transit".

Circular No. 114/1983:

We would refer to our various Circulars ending with No. 19/1983 (see above), dated 8.2.1983, dealing with the necessity of instructing Suppliers of spare parts to ensure that:

(a) the parcels be accompanied by copies of invoices showing description of their contents and its value.

(b) that the relative Bills of Lading should point out the commodity of the cargo precisely.

Moreover, you are also kindly requested to make certain that the respective Air Waybill should clearly show that the parcel is "In Transit for M/V......", indicating the vessel's name to enable the Customs to avoid dealing with the parcels as "Import Cargo", which irregularity causes much complication and delay.

In this respect, it is also recommended that parcels be airfreighted to Cairo four days before ship's arrival, taking into consideration the weekends and official holidays.

Circular No. 121/84: Arrival of ship's stores consignments by airfreight to Cairo Airport: Notice is hereby drawn to the urgency of notifying all concerned as regards the arrival of airfreighted ship's stores consignments in ample time before reaching Cairo Airport, prior ship's arrival at one of the Suez Canal ports, with a minimum period of four days before ship's arrival. This will enable our Cairo branch to complete the necessary Customs formalities, and ensuring delivery to respective vessels.

Kindly be guided accordingly.

AIRPORT: The distance between the international airport at Cairo and Port Said or Suez is normally 2.5 hours. International airlines serve this airport. Cairo Shipping Agency is on constant contact with Agent for the necessary instructions.

In the interest of all and in order not to lose any time and to avoid any restrictions when sending crew members by plane to join their respective vessels, it is essential that the Agent concerned should notify by cable in good time the flight number as well as the time and date of the arrival in Cairo, thus enabling the Agent to notify Cairo Shipping Agency for the necessary clearance and as to whether they should be sent to join their vessels.

HOLIDAYS: *General Holidays.*

February 22nd	Unity Day
May 1st	Labour Day
May 9th	Sham El Nessim (Spring Holiday)
June 18th	Evacuation Day
July 10th – 13th	Ramadan Bairam (End Of Ramadan)*
July 23rd	Revolution Day (National Day)
September 16th – 20th	Courban Bairam (Pilgrimage Feast)**
October 6th	Armed Forces Day
October 7th	Islamic New Year***
October 24th	Suez Day
December 16th	Mouled El Nabi (Birth of the Prophet)

*Possibly observed July 11th – 14th

**Possibly observed September 17th – 21st

***Possibly observed following day.

The Dates of the Islamic holidays are stated approximately. Working hours: 0600–1800 hrs. Overtime: 1800–0600 hrs. Friday is the weekly day of rest but it does not affect labour.

If a holiday falls on a Friday it is possible that the following working day will be decreed a holiday also.

Ramadan: Thirty days' fast and how it affects labour; Cargo operations can be carried out at night and on Fridays and General Holidays against payment of overtime rates. Arrangements should be made on the previous working day to enable Customs to delegate the necessary personnel in time.

Local Holiday

Port Said:

December 23rd – Port Said Day

POLICE/AMBULANCE/FIRE: Vessels which are moored in the harbour either in Port Said or Suez requiring assistance from the Port Police, should hoist the International Code Signal (YM). There is always a police guard appointed by these Authorities on each ship in either Port Said or Suez harbour. First-aid assistance can provide ambulances at a request through the Agent. In case of fire on board when in port, the Master must inform the Port Authorities (the Suez Canal Authority) immediately and at the same time give a general warning by means of a long blast of whistle or siren and be prepared to move his ship to another berth if so required. The Suez Canal Authority own 7 tugs and other craft distributed in various points of the Canal with individual output from 10 t.p.h. to 950 t.p.h. well equipped with fire-fighting appliances, ready for use at any moment.

Police guards are placed onboard vessels in Suez Roads for vessels' protection.

TELEPHONES: There are no telephone facilities available in Port Said except at Berth No. 4 Red where passenger ships are normally berthed, and this can be connected when snake pontoon is fixed with ship's gangway.

SERVICES: Port Said and Suez being situated at a middle point between the East and the West, have become an ideal centre for replenishing stores and provisions which can be obtained in bond or from town.

Delivery of provisions and stores is effected 24 hours a day at Port Said and Suez.

It is recommended that Masters should order their requirements prior to their arrival with a view to avoiding any delay specially for ships joining the 0700 hrs. convoy Southbound.

Deck and engine stores are ample and are also available and sold at (in bond) prices.

Paints: All kinds (bottom, boot-top, topside, enamel, engine ready mixed, heat resisting, varnishes) are also available at "in bond" prices. Painting of ships or undertaking any maintenance work on board is permitted while ship is in port waiting to join the North or the Southbound convoys as well as while transiting the Suez Canal.

The following companies are represented here:

International Marine Paint	Sole agent in Egypt: International Shipping Enterprise.
Hemples Marine Paint Camrex Marine Paint	Represented by The Egyptian Marine Supply and Contracting Co. (cable address: "Consup")

Chemicals: The following chemical firms are represented in Port Said and Suez:

Gamlen & Co.	Represented by The Egyptian Marine Supply and Contracting Co. (cable address: "Consup")
Bird Archer/Norus (Tommons & Chartes) Chemicals.	Represented by The International Marine Services Co. (cable address: "Marinco")
Drew Chemicals Cameroid Products.	
Paroline Chemicals Cameroid Products.	
Walker Bow.	
Houseman Marine Chemicals	International Shipping Enterprise

Grease and lubrication oils. Available from:

Esso Petroleum Co.
Misr Petroleum Co. (ex Shell)
Mobil Oil Co.
Caltex Oil Co.
Ocean Oil Co.
Wisure Oil Co.
Fina Oil Co.
Gulf Oil Co.
Castrol Oil.

An advance notice of 48 hours is necessary to arrange for lubricating oils and/or bunkers required.

Charts: Admiralty Charts are available at Port Said from the Egyptian Marine Supply and Contracting Co. If any order has to be supplied at Suez, arrangements can be made for the required charts to be sent there.

Defense Mapping Agency, Washington and British Admiralty Charts available from International Shipping Enterprise, who also act as distributor for Pains-Wessex Marine distress signals and line-throwing equipment.

Cigarettes: American and British cigarettes are available "in bond".

Technical Gases: Technical gases are also available at Port Said and Suez, and empty containers can be exchanged.

Fish: Bream, prawns, crab, rock fish available throughout the year; Mullet available June/February; Slip soles available November/March.

Vegetables: Beans, beetroots, cauliflower, cabbages, carrots, eggplant, endive, garlic, herbs, lettuce, marrows, parsley, radishes, spinach, tomatoes, turnips, escarole, onions, potatoes: *Available throughout the year.*

Green peas, celery, pumpkins: *Available January/March.*
Artichokes: *Available October/April.*
Parsnips, spring onions: *Available November/May.*
Green pepper, mint, lady's finger: *Available June/September.*
Capsicum: *Available May/December.*
Cucumber: *Available February/December.*
Lemons, limes: *Available throughout the year.*
Fresh figs, fresh dates: *Available August/October.*
Bananas: *Available October/June.*
Grapefruits, oranges, tangerines: *Available October/May.* (When out of season import citrus are Available).
Apricots: *Available May/June.*
Water melons, sweet melons: *Available May/October.*
Grapes: *Available June/October.*
Plums, peaches: *Available June/October.*
Mangoes: *Available August/September.*
Pears: *Available August/October.*
Apples: *Available November/February* (also imported the whole year).

Eggs: Eggs are available throughout the year.

Meat: Fresh meat is only supplied to vessels having a Mohammedan Crew after permission is obtained from the Customs. Other vessels are supplied with "frozen" in bond.

Laundry: Well equipped, reliable and fast services are available at Port Said, through the ship's contractor. Ship's laundry is usually delivered within 24 hours. For vessels remaining a few hours in Port Said and transiting the Canal, their laundry could be collected, washed and ironed and then transported to Suez by special car or lorry for delivery to them there.

Garbage: No refuse or ashes are allowed to be thrown whilst ships are moored in Port Said, transiting the Canal or in Suez Roads. Small barges are available in Port Said and Suez for disposal of garbage or ashes, which craft can be obtained at a reasonable hire.

Divers: Suez Canal Authority's Divers as well as other Contractors' experienced divers are available, capable of carrying out any kind of underwater repairs including welding and fees are subject to the kind of job to be performed. Anchors and other articles left behind by any ship in Canal waters are retrieved on no cure no pay basis.

SHORE LEAVE: Crew members are allowed ashore provided that they obtain a shore leave pass issued by the Immigration Authorities through the local Agent. They can proceed ashore by means of motor launches or rowing boats at their own expense. For vessels mooring opposite the town and connected with the shore by snake pontoon, crew, together with passengers, can proceed ashore free of charge.

IDENTIFICATION CARDS: Every member of crew must have a Seaman's Book deposited with the Officer in charge for inspection, if so required by the Immigration Authorities. If a vessel is stopping in Port Said or Suez for a lengthy time, these Seamen's Books are normally taken off the ship by the said Authorities and kept in their departing office pending ship's sailing day when they are placed on board by the proper officer on a previous advice. Identity cards are also needed if a crew member wishes to proceed ashore for a short visit to the town or for proceeding to any excursion inland.

DEVELOPMENTS: There is a modernisation plan underway at Suez.

When the modernisation is complete, cargo handling will be largely mechanised, resulting in a great increase in the port's capacity. The first stage of the expansion will provide 3 multi-purpose berths, shoreside installation, container-handling facilities, and grain storage facilities. An offshore grain pier connected to onshore storage silos is expected to be built during the next phase.

Plans for draft 68 ft. – 70 ft. are being studied.

Also see "Berthing – Port Said".

RADIO OFFICER'S REPORT: September 1990.

Documents: When vessel Southbound:
State Agent:
1 copy Information concerning a vessel transiting the Canal.
1 copy Navigability Form.
1 copy Information concerning a ship extracted from its official documents.
1 copy Double Bottom Tank Form.
1 copy Statistical Declaration.
4 copies Crew List.
4 copies Shipping Agency out/home.
Register and Suez Canal Tonnage Certificate (returned at Suez).
Protecting Agent:
1 copy Crew List.
Quarantine:
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
1 copy Port Clearance.
Suez Canal Authorities:
2 copies Information concerning a vessel transiting the Canal.
2 copies Double Bottom Tank Forms.
1 copy Crew List.
When on the buoys at Port Said, Immigration require one copy of Crew List.
When vessel Northbound:
Same documents required as Southbound.
Port Said Loading/Discharging:
Immigration:
2 copies Crew List.
1 copy Declaration of Arrival and Departure.
Passports for Shore Leave Passes.
List of People going ashore.
Shore Leave Passes (leave one half with policeman on board and take the other half together with your Passport ashore).

Radio: During transit, listen to SUQ on 421 kHz, and reply on 425, 454, or 468 kHz. Pilot will advise you when.

SHIPMASTER'S REPORT: February 1992.
NORTHBOUND:

1. As per Admiralty List of Lights and Radio Signals (ALRS), vessels should book convoy time 4 days in advance through telex to SUCANAL (Telex No. 63543/63238 or 63528).
2. Call Suez Harbour Office on VHF Channel 16 and change to Channel 11 on reaching Lat. 29° 35′ N. (North AS Buoy) for anchoring instructions.

   Information is required as per ALRS.
3. Vessels anchor in marked "Waiting Area", North of Conry Rock. This anchorage is for all vessels under 38 ft. draft. When in the waiting area, use VHF Channel 14.

   Vessels over 38 ft. draft anchor in 'V' areas, South of Conry Rock.
4. Vessel's arrival time is the actual time of letting go the anchor, North of line Conry Rock to Buoy No. 2 (unless over 38 ft.) If time is of great importance, authorities advise vessel to drop anchor anywhere North of the line, even if vessel has to leave the anchor again immediately and move to a new location.
5. Vessels proceed to Inner Anchorage in Suez Bay to marked areas once a pilot is available. Vessels do not generally proceed inwards from the Waiting Area whilst Southbound convoy is transitting the Newport Rock Channel, so between the hours of 1800 and 2400, the waiting area can become full.
6. Latest arrival times for same day transit:

   0100 hrs.: Tankers (All types carrying dangerous cargoes) and large container ships. 0300 hrs. on payment of a surcharge and with prior arrival information.

   0300 hrs.: General cargo and tankers carrying non-dangerous cargoes. No extra time allowed.
7. Convoy times and turn numbers are given out on the radio (VHF Channel 14) at approximately 0300 hrs., so listen carefully.
8. Northbound Times: Large tankers start at 0600 hrs., they leave the Waiting Area at 0530 hrs. from North or South of Conry Rock, depending on size. The last ship generally gets underway at approximately 1000 hrs.
9. Convoy Notes: The average convoy consists of 26 vessels. The first vessels are large tankers with tug escort and 2 pilots. The next vessels are container ships and LPG ships. They are followed by small tankers. The last part of the convoy is made up of cargo vessels, Ro/Ro vessels, tankers in ballast and tankers carrying non-dangerous products.

   Depending on the size of the Southbound convoy, Northbound vessels can go straight through to Bitter Lake without anchoring.

   Transit speed is about 7.5 knots.

   Northbound vessels do not go through Port Said Harbour unless stopping for cargo or bunkers. They usually use the Eastern Cut.

   Our vessel carrying vegetable oils and latex got under way twice at 0930 hrs. and left the Canal at Port Said through the Eastern Cut at 2030 hrs.

   The searchlight is not always now used and it is suggested that it be removed as early as possible, especially during the Winter months, due to possible weather damage outside of Port Said.

   Pilots change when both North and Southbound at Ismalia. There is now no Port Said sea pilot outward-bound. The Canal pilot leaves at Beacon KM 4.

   Boats: If vessel only has one crane, one Canal boat will suffice as long as ship's lifeboats are open.

   The vessel still carried 4 boatmen and an electrician. A cabin is required for the electrician.

   When passing through the Port Said area, the boat is lowered, the pilot departs and the Agent conducts any business. This can cause a bunching up of vessels.

   Vessels should be aware of the strong East going cross currents when leaving the Canal at Port Said.
10. Signals: The black ball over 'G' or the 3 white vertical lights which indicate that the vessel requires a pilot must be shown on anchoring outside and inside.

    'Q' Flag (Not 'ZS') or the red over white lights to be shown until Pratique has been granted.
11. Formalities: The Agent boards in the Waiting Area and requires:
    3 copies Crew List.
    1 copy Customs Declaration.
    1 copy Effects List.
    Register (Takes Register away, it is returned at Port Said).
    1 copy Canal Ship Information.

CREW CHANGES:

By law, only the official State Agents are permitted to handle reception or repatriation of crew in Egypt.

Crew members arriving at Cairo Airport to join a vessel must have a letter of introduction addressed to the Manager of Cairo Shipping Agency, 7 Abdel Khalek Tharwat Street, P.O.Box 468, Cairo, telephone number 745755 or 745863. This introductory letter is to be produced immediately upon arrival to the representative attending at the airport.

Note: A representative is usually in attendance when the crew member steps off the bus and passes through the doors at the entrance hall. Distance from the bus about 20 m. – 25 m. – just in front of the banks.

Visas can be obtained at the airport.

The Suez Canal Authorities have also stipulated the following requirements for arriving crew members:

(a) Be of same nationality as the vessel's flag.

(b) Be in possession of a contract signed and stamped by the shipowners.

(c) Be holding a valid Seaman's Book.

Note: Crew members joining vessels at Suez Canal are not permitted to bring with them spare parts, equipment, electrical apparatus, etc., for vessels unless the goods in question are accompanied by an air waybill which must indicate the words "in transit", together with an invoice from the suppliers stating description and value of the goods.

Principals are requested to telex their Agent giving full details of crew changes including names, flight numbers, dates and times of arrival.

Agent's Notice: This is to bring to your kind attention due to the fact that Owners are sending the return tickets for repatriation of crew members by PTA which procedure entails delay in reserving a place on board the aircraft in addition to the delay that results in tracing the whereabouts of the PTA. This in turn causes extra hotel expenses and we are therefore requesting that Owners leave the ticketing to us in order to cut hotel expenses. Please note the usual crew discount is obtained.

AIRFREIGHT: The Official State Agents are the only Agents legally entitled to handle airfreighted consignments such as parcels, spares, etc., and the following procedure should always be followed:

All parcels should indicate:

(a) Name of vessel to which consignment is intended and port of delivery.

(b) Name of Official State Agent.

(c) The wording . . . . "delivery at Cairo Airport to Cairo Shipping Agency only, on behalf of (insert name of Official State Agent)".

(d) All parcels to be encircled with a wide self-adhesive tape, coloured red. In addition a self-adhesive label to be affixed bearing the name of Cairo Shipping Agency and also the name of the Official State Agent in large capital letters.

(e) The parcel and air waybill must indicate the words "In Transit for M/V......".

(f) Suppliers of the spare parts must always be instructed to enclose with the parcel, copy of their invoice stating description of the contents and value and to ensure that the commodity of the cargo can be indicated precisely on the relative Bill of Lading.

Note: Crew members joining vessels at Suez Canal are not permitted to bring with them spare parts, equipment, electrical apparatus, etc., for vessels unless they are accompanied by an air waybill and an invoice duly completed as instructed above. Please note that any goods for vessels arriving with embarking crew members must also follow precisely points (e) and (f) as indicated above otherwise the Customs Authorities will refuse to release such goods "In Transit".

In order to enable check upon airfreighted consignments, Principals are requested to telex advise their Agent giving full details of flight number, date, air waybill number, etc.

Circular No. 19/83: Dated 8th February, 1983.

Parcels of spare parts, equipment and electrical apparatus arriving care of crew members without transit shipping documents.

Reference is made to our previous circulars, dealing with the above subject, ending with No. 101/82, dated 31st October, 1982, requesting you to kindly ascertain that the air waybill covering a parcel of spare parts must show that same is "In Transit for M/V......".

The object of the present circular is to bring to your kind attention that, considering that, according to Regulations, a crew member is allowed to be accompanied only by his personal effects, the Customs Authorities refuse to release "In Transit" other goods, such as spare parts, various equipment, electric apparatus of high value (T.V., video etc.) arriving care of crew members. As already explained, the goods in question should be accompanied by an air waybill and an invoice duly completed as described previously.

Kindly, therefore, arrange for parcels of spare parts, equipment, apparatus etc. not to be forwarded care of crew members unless they are accompanied with complete shipping documents, otherwise it will not be possible to have them released "In Transit".

Circular No. 114/1983:

We would refer to our various Circulars ending with No. 19/1983 (see above), dated 8.2.1983, dealing with the necessity of instructing Suppliers of spare parts to ensure that:

(a) the parcels be accompanied by copies of invoices showing description of their contents and its value.

(b) that the relative Bills of Lading should point out the commodity of the cargo precisely.

Moreover, you are also kindly requested to make certain that the respective Air Waybill should clearly show that the parcel is "In Transit for M/V......", indicating the vessel's name to enable the Customs to avoid dealing with the parcels as "Import Cargo", which irregularity causes much complication and delay.

In this respect, it is also recommended that parcels be airfreighted to Cairo four days before ship's arrival, taking into consideration the weekends and official holidays.

Circular No. 121/84: Arrival of ship's stores consignments by airfreight to Cairo Airport: Notice is hereby drawn to the urgency of notifying all concerned as regards the arrival of airfreighted ship's stores consignments in ample time before reaching Cairo Airport, prior ship's arrival at one of the Suez Canal ports, with a minimum period of four days before ship's arrival. This will enable our Cairo branch to complete the necessary Customs formalities, and ensuring delivery to respective vessels.

Kindly be guided accordingly.

AIRPORT: The distance between the international airport at Cairo and Port Said or Suez is normally 2.5 hours. International airlines serve this airport. Cairo Shipping Agency is on constant contact with Agent for the necessary instructions.

In the interest of all and in order not to lose any time and to avoid any restrictions when sending crew members by plane to join their respective vessels, it is essential that the Agent concerned should notify by cable in good time the flight number as well as the time and date of the arrival in Cairo, thus enabling the Agent to notify Cairo Shipping Agency for the necessary clearance and as to whether they should be sent to join their vessels.

HOLIDAYS: *General Holidays.*

February 22nd	Unity Day
May 1st	Labour Day
May 9th	Sham El Nessim (Spring Holiday)

October 24th	Suez Day
December 16th	Mouled El Nabi (Birth of the Prophet)

*Possibly observed July 11th – 14th

**Possibly observed September 17th – 21st

***Possibly observed following day.

The Dates of the Islamic holidays are stated approximately. Working hours: 0600–1800 hrs. Overtime: 1800–0600 hrs. Friday is the weekly day of rest but it does not affect labour.

If a holiday falls on a Friday it is possible that the following working day will be decreed a holiday also.

Ramadan: Thirty days' fast and how it affects labour; Cargo operations can be carried out at night and on Fridays and General Holidays against payment of overtime rates. Arrangements should be made on the previous working day to enable Customs to delegate the necessary personnel in time.

Local Holiday

Port Said:

December 23rd – Port Said Day

POLICE/AMBULANCE/FIRE: Vessels which are moored in the harbour either in Port Said or Suez requiring assistance from the Port Police, should hoist the International Code Signal (YM). There is always a police guard appointed by these Authorities on each ship in either Port Said or Suez harbour. First-aid assistance can provide ambulances at a request through the Agent. In case of fire on board when in port, the Master must inform the Port Authorities (the Suez Canal Authority) immediately and at the same time give a general warning by means of a long blast of whistle or siren and be prepared to move his ship to another berth if so required. The Suez Canal Authority own 7 tugs and other craft distributed in various points of the Canal with individual output from 10 t.p.h. to 950 t.p.h. well equipped with fire-fighting appliances, ready for use at any moment.

Police guards are placed onboard vessels in Suez Roads for vessels' protection.

TELEPHONES: There are no telephone facilities available in Port Said except at Berth No. 4 Red where passenger ships are normally berthed, and this can be connected when snake pontoon is fixed with ship's gangway.

SERVICES: Port Said and Suez being situated at a middle point between the East and the West, have become an ideal centre for replenishing stores and provisions which can be obtained in bond or from town.

Delivery of provisions and stores is effected 24 hours a day at Port Said and Suez.

It is recommended that Masters should order their requirements prior to their arrival with a view to avoiding any delay specially for ships joining the 0700 hrs. convoy Southbound.

Deck and engine stores are ample and are also available and sold at (in bond) prices.

Paints: All kinds (bottom, boot-top, topside, enamel, engine ready mixed, heat resisting, varnishes) are also available at "in bond" prices. Painting of ships or undertaking any maintenance work on board is permitted while ship is in port waiting to join the North or the Southbound convoys as well as while transiting the Suez Canal.

The following companies are represented here:

International Marine Paint	Sole agent in Egypt: International Shipping Enterprise.
Hemples Marine Paint Camrex Marine Paint	Represented by The Egyptian Marine Supply and Contracting Co. (cable address: "Consup")

Chemicals: The following chemical firms are represented in Port Said and Suez:

Gamlen & Co.	Represented by The Egyptian Marine Supply and Contracting Co. (cable address: "Consup")
Bird Archer/Norus (Tommons & Chartes) Chemicals. Drew Chemicals Cameroid Products. Paroline Chemicals Cameroid Products. Walker Bow.	Represented by The International Marine Services Co. (cable address: "Marinco")
Houseman Marine Chemicals	International Shipping Enterprise

Grease and lubrication oils. Available from:

Esso Petroleum Co.
Misr Petroleum Co. (ex Shell)
Mobil Oil Co.
Caltex Oil Co.
Ocean Oil Co.
Wisure Oil Co.
Fina Oil Co.
Gulf Oil Co.
Castrol Oil.

An advance notice of 48 hours is necessary to arrange for lubricating oils and/or bunkers required.

Charts: Admiralty Charts are available at Port Said from the Egyptian Marine Supply and Contracting Co. If any order has to be supplied at Suez, arrangements can be made for the required charts to be sent there.

Defense Mapping Agency, Washington and British Admiralty Charts available from International Shipping Enterprise, who also act as distributor for Pains-Wessex Marine distress signals and line-throwing equipment.

Cigarettes: American and British cigarettes are available "in bond".

Technical Gases: Technical gases are also available at Port Said and Suez, and empty containers can be exchanged.

Fish: Bream, prawns, crab, rock fish available throughout the year; Mullet available June/February; Slip soles available November/March.

Vegetables: Beans, beetroots, cauliflower, cabbages, carrots, eggplant, endive, garlic, herbs, lettuce, marrows, parsley, radishes, spinach, tomatoes, turnips, escarole, onions, potatoes: *Available throughout the year.*

Green peas, celery, pumpkins: *Available January/March.*
Artichokes: *Available October/April.*
Parsnips, spring onions: *Available November/May.*
Green pepper, mint, lady's finger: *Available June/September.*
Capsicum: *Available May/December.*
Cucumber: *Available February/December.*
Lemons, limes: *Available throughout the year.*
Fresh figs, fresh dates: *Available August/October.*
Bananas: *Available October/June.*
Grapefruits, oranges, tangerines: *Available October/May.* (When out of season import citrus are Available).
Apricots: *Available May/June.*
Water melons, sweet melons: *Available May/October.*
Grapes: *Available June/October.*
Plums, peaches: *Available June/October.*
Mangoes: *Available August/September.*
Pears: *Available August/October.*
Apples: *Available November/February* (also imported the whole year).

Eggs: Eggs are available throughout the year.

Meat: Fresh meat is only supplied to vessels having a Mohammedan Crew after permission is obtained from the Customs. Other vessels are supplied with "frozen" in bond.

Laundry: Well equipped, reliable and fast services are available at Port Said, through the ship's contractor. Ship's laundry is usually delivered within 24 hours. For vessels remaining a few hours in Port Said and transiting the Canal, their laundry could be collected, washed and ironed and then transported to Suez by special car or lorry for delivery to them there.

Garbage: No refuse or ashes are allowed to be thrown whilst ships are moored in Port Said, transiting the Canal or in Suez Roads. Small barges are available in Port Said and Suez for disposal of garbage or ashes, which craft can be obtained at a reasonable hire.

Divers: Suez Canal Authority's Divers as well as other Contractors' experienced divers are available, capable of carrying out any kind of underwater repairs including welding and fees are subject to the kind of job to be performed. Anchors and other articles left behind by any ship in Canal waters are retrieved on no cure no pay basis.

SHORE LEAVE: Crew members are allowed ashore provided that they obtain a shore leave pass issued by the Immigration Authorities through the local Agent. They can proceed ashore by means of motor launches or rowing boats at their own expense. For vessels mooring opposite the town and connected with the shore by snake pontoon, crew, together with passengers, can proceed ashore free of charge.

IDENTIFICATION CARDS: Every member of crew must have a Seaman's Book deposited with the Officer in charge for inspection, if so required by the Immigration Authorities. If a vessel is stopping in Port Said or Suez for a lengthy time, these Seamen's Books are normally taken off the ship by the said Authorities and kept in their departing office pending ship's sailing day when they are placed on board by the proper officer on a previous advice. Identity cards are also needed if a crew member wishes to proceed ashore for a short visit to the town or for proceeding to any excursion inland.

DEVELOPMENTS: There is a modernisation plan underway at Suez.

When the modernisation is complete, cargo handling will be largely mechanised, resulting in a great increase in the port's capacity. The first stage of the expansion will provide 3 multi-purpose berths, shoreside installation, container-handling facilities, and grain storage facilities. An offshore grain pier connected to onshore storage silos is expected to be built during the next phase.

Plans for draft 68 ft. – 70 ft. are being studied.

Also see "Berthing – Port Said".

RADIO OFFICER'S REPORT: September 1990.

Documents: When vessel Southbound:

State Agent:
1 copy Information concerning a vessel transiting the Canal.
1 copy Navigability Form.
1 copy Information concerning a ship extracted from its official documents.
1 copy Double Bottom Tank Form.
1 copy Statistical Declaration.
4 copies Crew List.
4 copies Shipping Agency out/home.
Register and Suez Canal Tonnage Certificate (returned at Suez).

Protecting Agent:
1 copy Crew List.

Quarantine:
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
1 copy Port Clearance.

Suez Canal Authorities:
2 copies Information concerning a vessel transiting the Canal.
2 copies Double Bottom Tank Forms.
1 copy Crew List.

When on the buoys at Port Said, Immigration require one copy of Crew List.

When vessel Northbound:
Same documents required as Southbound.

Port Said Loading/Discharging:

Immigration:
2 copies Crew List.
1 copy Declaration of Arrival and Departure.
Passports for Shore Leave Passes.
List of People going ashore.
Shore Leave Passes (leave one half with policeman on board and take the other half together with your Passport ashore).

Radio: During transit, listen to SUQ on 421 kHz, and reply on 425, 454, or 468 kHz. Pilot will advise you when.

SHIPMASTER'S REPORT: February 1992.

NORTHBOUND:

1. As per Admiralty List of Lights and Radio Signals (ALRS), vessels should book convoy time 4 days in advance through telex to SUCANAL (Telex No. 63543/63238 or 63528).
2. Call Suez Harbour Office on VHF Channel 16 and change to Channel 11 on reaching Lat. 29° 35' N. (North AS Buoy) for anchoring instructions.

   Information is required as per ALRS.
3. Vessels anchor in marked "Waiting Area", North of Conry Rock. This anchorage is for all vessels under 38 ft. draft. When in the waiting area, use VHF Channel 14.

   Vessels over 38 ft. draft anchor in 'V' areas, South of Conry Rock.
4. Vessel's arrival time is the actual time of letting go the anchor, North of line Conry Rock to Buoy No. 2 (unless over 38 ft.) If time is of great importance, authorities advise vessel to drop anchor anywhere North of the line, even if vessel has to leave the anchor again immediately and move to a new location.
5. Vessels proceed to Inner Anchorage in Suez Bay to marked areas once a pilot is available. Vessels do not generally proceed inwards from the Waiting Area whilst Southbound convoy is transitting the Newport Rock Channel, so between the hours of 1800 and 2400, the waiting area can become full.
6. Latest arrival times for same day transit:

   0100 hrs.: Tankers (All types carrying dangerous cargoes) and large container ships. 0300 hrs. on payment of a surcharge and with prior arrival information.

   0300 hrs.: General cargo and tankers carrying non-dangerous cargoes. No extra time allowed.
7. Convoy times and turn numbers are given out on the radio (VHF Channel 14) at approximately 0300 hrs., so listen carefully.
8. Northbound Times: Large tankers start at 0600 hrs., they leave the Waiting Area at 0530 hrs. from North or South of Conry Rock, depending on size. The last ship generally gets underway at approximately 1000 hrs.
9. Convoy Notes: The average convoy consists of 26 vessels. The first vessels are large tankers with tug escort and 2 pilots. The next vessels are container ships and LPG ships. They are followed by small tankers. The last part of the convoy is made up of cargo vessels, Ro/Ro vessels, tankers in ballast and tankers carrying non-dangerous products.

   Depending on the size of the Southbound convoy, Northbound vessels can go straight through to Bitter Lake without anchoring.

   Transit speed is about 7.5 knots.

   Northbound vessels do not go through Port Said Harbour unless stopping for cargo or bunkers. They usually use the Eastern Cut.

   Our vessel carrying vegetable oils and latex got under way twice at 0930 hrs. and left the Canal at Port Said through the Eastern Cut at 2030 hrs.

   The searchlight is not always now used and it is suggested that it be removed as early as possible, especially during the Winter months, due to possible weather damage outside of Port Said.

   Pilots change when both North and Southbound at Ismalia. There is now no Port Said sea pilot outward-bound. The Canal pilot leaves at Beacon KM 4.

   Boats: If vessel only has one crane, one Canal boat will suffice as long as ship's lifeboats are open.

   The vessel still carried 4 boatmen and an electrician. A cabin is required for the electrician.

   When passing through the Port Said area, the boat is lowered, the pilot departs and the Agent conducts any business. This can cause a bunching up of vessels.

   Vessels should be aware of the strong East going cross currents when leaving the Canal at Port Said.
10. Signals: The black ball over 'G' or the 3 white vertical lights which indicate that the vessel requires a pilot must be shown on anchoring outside and inside.

    'Q' Flag (Not 'ZS') or the red over white lights to be shown until Pratique has been granted.
11. Formalities: The Agent boards in the Waiting Area and requires:

    3 copies Crew List.
    1 copy Customs Declaration.
    1 copy Effects List.
    Register (Takes Register away, it is returned at Port Said).
    1 copy Canal Ship Information.

Quarantine: Officer boards at Inner Anchorage and requires:
1 copy Health Declaration.
1 copy Vaccination List.
The Canal Inspector requires:
1 copy Suez Canal Tonnage Certificate.
1 copy Double Bottom Tank Declaration Form.
1 copy Transit Form.
The Searchlight Inspector requires:
1 copy Original Manufacturers Certificate.
3 Searchlight bulbs (2 in the light, and 1 spare) to be sighted.

12. Suez Anchorage:
Bunkers: Available. Amounts supplied should be checked carefully on completion.
Water: Available by barge.
Doctor: A doctor is available to come on board the vessel if the Agent receives prior notice. We obtained a doctor's visit without any difficulties.
Mail: In most cases it is delivered in Port Said.
Chandlers: There are many chandlers touting for business.
Garbage Collectors: This is a new innovation at Suez, but collection is not required, and Masters should not sign any forms.
Watchmen: The hiring of watchmen is a 'grey' area, and we could not find out if it is compulsory or not. The Agent would not commit himself on the matter. On 3 recent visits we have hired one watchman and he was efficient with regard to sorting out those persons who were bona fide traders.

13. Weather: There are often sand storms in April and this may cause delays to convoys.
Developments: There is a buoy mooring in Suez Bay in position Lat. 29° 55.24' N., Long. 32° 29.4' E., for the discharge of vegetable oils.
There are bulk berths for grain and phosphates in Adabiya Bay with cranes.

SOUTHBOUND:

1. The new Racon Beacon 0.5 miles East of West Port Said Breakwater is useful for obtaining positions.
2. Vessel must drop anchor in the recognised Port Said anchorage by 1800 hrs. to qualify for the next day transit.
An allowance of 2 hours (2000 hrs.) is granted on payment of an extra transit fee, if information has been sent in 4 days in advance.
3. General cargo vessels and small tankers not carrying dangerous cargo are taken into Port Said Harbour (not optional) to Buoy Berth as marked on B.A. Chart No. 234.
4. Ships in Port Said Harbour form the first part of the Southbound convoy as far as the Bitter Lakes. The Southbound convoy commences when the last Northbound ship has left the Main Canal to Port Said Cut Off, which is at approximately 2100 hrs. – 2200 hrs.
5. Large tankers and container vessels enter direct from the anchorage through the Port Said Cut Off at approximately 2400 hrs.
6. When the convoy has reached the Bitter Lakes, ith is usual for the container vessels and large tankers to leave for Suez before the general cargo vessels and the small tankers not carrying dangerous cargoes.
7. The Radio Officer is to keep watch on "SUQ" in accordance with ALRS.
8. When going into the Buoy Berth in Port Said Harbour, it is very important that a good watchman is obtained as thieving is rife.
Tying up to the buoys can be difficult in high winds. The vessel should have plenty of lashings available for securing to the buoys.
9. All services are available in Port Said Harbour.
10. Formalities are same as those for the vessels Northbound.
11. The Southbound convoy starts leaving Suez between 1630 hrs. and 1700 hrs.

SHIPMASTER'S REPORT: October 1992.
Kindly effect the following changes to "Authorities":
Suez Canal Authority: Telex: 63238 and 63543 SUCAN UN. Fax: 0020-64-220785 and 0020-64-220787.
Vessel Traffic Management System:
Ismailia Radio (SUQ): Telex: 63528 SUQSC UN. Fax: 0020-64-393517.
Radio Communications: Transmits 421 kHz. Receives 425 kHz A1A A2A. Transmits 1612 kHz. Receives 2147 kHz F1B (radiotelex).
NOTE: If unable to contact by radiotelex (F1B), call may be established by a request on MF morse.
Agent: Please correct in the Branches (Suez Office – Port Tewfik) section: Damanhour Shipping Agency – Telex: 66022 AGENCY UN.
Radio: The following message was received by the vessel:
Quote:
To all ships transiting Suez Canal.
Notice to Masters of vessels transiting the Suez Canal regarding persons boarding their vessels.
The Suez Canal Authority advises you to allow only persons carrying Identity Cards issued from Suez Canal Authority to embark your vessel. These cards show the name and serial number of the person. If any of those persons ill-behaves, you have to contact Suez Canal Authority Officials, referring to the card number and the person's name through the following means:
Telex: 63238 or 63543 SUCAN UN.
Fax: 002-064-220787 or 002-064-220785.
International Telex: 63528 SUQSC UN.
Radio Telex Selective Call 20001 frequency 1612 Tx 2147 Rx.
Fax: 002-064-393517.
In addition to radio telegraphy with SUQ Station.
Regards.
Sucanal Transit via Ismailia Radio/SUQ.
Unquote.

SHIPMASTER'S REPORT: October 1993.
NORTHBOUND:

1. As per ALRS, vessels should, if possible, book Convoy Time 4 days in advance, or as soon as possible if coming from nearby port, by Telex to SUCANAL 63543/63238/63528 with copy to appointed Government Agent.

2. Two days notice of ETA required and thereafter any change in ETA. Call Suez Pilot on VHF Channel 16, working on Channel 17, when 30 minutes South of No. 2 Light-Float (Racon), for instructions. Information required as per ALRS.

3. Pilot and tug patrols attend in Waiting Area Anchorage between Conry Rock and Newport Rock. We arrived on last call at 2200 hrs. and Waiting Area was fairly clear.
Waiting Area North of Conry Rock is for all vessels under 38 ft. draft. When North of No. 2 Light-Float, Suez Pilot uses VHF Channel 14.

4. Vessel's arrival time in Waiting Area is actual time of dropping the anchor North of line Conry Rock to No. 2 Light-Float. Authorities advise vessel to drop anchor anywhere North of this line, even if vessel has to immediately heave-up and proceed further inwards.

5. Vessels proceed to Inner Anchorage in Suez Bay (as per circled areas on B.A. Chart) once Pilot available. Vessels do not generally proceed inwards from Waiting Area whilst Southbound convoy is transiting Newport Rock Channel, so between 1800 hrs. to 2300 hrs. Waiting Area Anchorage can become crowded.
We arrived for our Northbound transit at 2200 hrs. and vessels were still coming Southbound out of Newport Rock Channel, but ships from Waiting Area were being taken into Inner Anchorage between South movements. We actually waited for 2 hours to proceed into Inner Anchorage.

6. Latest arrival times for same day transit:
0100 hrs. – Tankers (all types carrying dangerous cargo and not gas free) and large container ships.
0300 hrs. – Above group on payment of extra fee and re-arrival information sent in.
0300 hrs. – General cargo ships, small container ships and small tankers carrying non-dangerous cargoes. No extension for this group.

7. Convoy Times and Turn numbers are given out on VHF Channel 14 between 0300 hrs. and 0400 hrs. (listen carefully). Vessels often have to call up Suez Pilot for information.

8. Northbound transit in two parts. Firstly large tankers and container ships leave waiting area at about 0530 hrs., then LPG ships and other tankers. After the First Group, there is a gap of about 75 minutes before Second Group, comprising general cargo vessels, bulk carriers, tankers carrying non-dangerous substances and ships with deficiencies and tows.
The last ship generally gets under way at about 1000 hrs.

9. Convoy Notes: The average convoy consists of 20 vessels.
The First Group of large tankers and container ships starts leaving Port Said through the Eastern Cut-Off Channel at about 1700 hrs. Large tankers require a tug escort and 2 Pilots. Tug rules have been relaxed for other classes of vessels, notably LPG vessels.
The last general cargo vessel presently clears the Canal around 2200 hrs. NO Northbound vessels now go through Port Said Harbour, unless calling for cargo work.
Radio Officer is still required to monitor "SUQ" when South of Bitter Lakes, as required by Pilot. Ships without a Radio Officer have to monitor VHF.
Transit speed is 13 km./hr. for large tankers/container ships and 16 km./hr. for general cargo ships (around 7.5 knots).
Our vessel, carrying vegetable oils and latex, got under way from Suez at 0930 hrs. and left the Canal at 2100 hrs., being No. 13 of a 17 ship convoy.
Searchlight rarely used nowadays, although canal electrician still carried. Twice recently we were able to stow the light before Port Said, which is helpful in Winter to avoid damage.
Pilots change once at Ismailia. First Pilot from Suez Anchorage to Ismailia and second Pilot from Ismailia to Port Said (km. 4).
Boats: If vessel has only one crane/derrick, only one boat required, this should be declared well in advance.
When passing outbound near Port Said in the Eastern Cut-Off, the boat is lowered, Agent boards with Clearance and Register, and Pilot departs at Km. 4. A somewhat chaotic situation can occur with ships bunching together.
Vessels should be aware of the strong East-going cross current, sometimes encountered across the channel outside Port Said.
A number of dredgers are now working in the Canal to deepen channel to 68 ft. (20.5 m.), which is now a third of the way through a 3 year programme.

10. Signals: "Q" flag or "red over white light" for Quarantine Clearance to be shown until vessel cleared.
"Black ball over G" or "3 vertical white lights" for Pilot, both at Waiting Area and inside Suez Bay.

11. Formalities: Agent boards in Waiting Area, and Quarantine and Canal Inspector board in Suez Bay Anchorage Area.
Agent requires:
6 copies Crew List (plus a further 3 copies at Port Said).
Register – Returned at Port Said.
3 copies Canal Information on Agent's Form.
Quarantine:
2 copies Crew List.
3 copies Vaccination List.
1 copy Canal Health Declaration.

Canal Inspector:
- 1 copy Crew List.
- 1 copy Statistical Declaration.
- 1 copy State of Navigability Form.
- 1 copy Ship in Ballast Form or "Nil".
- 1 copy Transit Form.
- 1 copy Double Bottom Tank Declaration (most important that it is compiled with correctly).

Suez Tonnage Certificate and Official General Arrangement Plan are sighted.

Pilot:
- 1 copy Quarantine Clearance.
- 1 copy Pilot Particulars.
- 1 copy North/South (or vice versa) Cargo Declaration.

Searchlight Inspection: Sometimes inspectors board at Suez Anchorage to sight 3 Suez Searchlight Bulbs (2 in searchlight) and manufacturers original certificate.

12. Suez Anchorage Facilities:

Bunkers: Normally taken on West side of Newport Rock Channel.

Water: Available in Inner or Outer Anchorages and arranged by Agent.

Doctor: Boards vessel at Inner Suez Bay Anchorage.

Stores: Many shipchandlers are looking for business – so be careful.

Garbage: Take great care – possibility of confidence tricksters who quote Marpol.

Watchmen: A grey area – sometimes they can be helpful and useful.

Repatriation: Through Cairo. Suez is nearer to Cairo than Port Said. Try to avoid staying at Suez, ask for direct transit to Cairo Hotel.

Weather: Winter weather prevails between December and April. March and April bring many sand storms.

Mail: Normally delivered to vessel by Port Said Agent with the Register and Clearance.

SHIPMASTER'S REPORT: November 1995.
NORTHBOUND:

We anchored in Suez Bay at 2000 hrs. to await the morning Northbound Convoy.

Up until 2400 hrs., Agents/Authorities came on board. Two watchmen were provided by the Agent, as compulsory during vessel's stay in port, but they showed up for only one hour and then they left (probably going to another ship and thus registering themselves on 2-3 ships for the same night).

AUTHORITIES: The Suez Canal Authority, Ismalia, Egypt. *Tel:* Ismailia (064) 20000 - 20009. *Cables:* Sucanal Ismailia. *Telex:* Sucan 92153 and 63238 (Ismailia), Scaps Un 63256 (Port Said) and 63543 Sucan. *Contact:* Director of Transit or Control of Navigation.

TRANSIT SERVICE: Gulf Agency Company operate a Suez Canal Transit Service the purpose of which is to assist Owners and Shipmasters with the numerous formalities applicable to transit of the Canal including supervising the pre-payment of Canal Dues and ensuring no delay in entering or clearing the Canal. Full details of the service are obtainable from Gulf Agency Co. Ltd., P.O.B. 61033, GR-15110 Amaroussion, Greece. Tel: (30-1) 6807070. Telex: 214548, 216344, 218687 ("GAC GR"). Fax: 6807068. Cables: "Gulf Agency" Athens.

NOTES

Please also advise Shipping Guides Ltd.

SUEZ CANAL – RULES OF NAVIGATION*

FEBRUARY 1995*

* Corrected up to Notice No. 15 of 1995 which came into effect on 1st April 1996.

Part I Navigation
Part II Canal and Lakes (Characteristics)
Part III Communications – Signals

*Not all the Rules of Navigation are printed herein. Part IV is concerned with tonnage and dues and Part V with carriage of dangerous goods.
NOTE: The present Rules are applied to normal cases. Special cases, each to be studied case by case.

GENERAL

Article 1: Transit Through the Suez Canal

(1) Transit through the Suez Canal is open to vessels of all nations, subject to their complying with the conditions stated in the present Rules of Navigation. All references and circulars which shall be issued by the Suez Canal Authority will constitute an integral part of these rules. Vessels also have to comply with the provisions of the International Regulations for Safety Of Life At Sea, and its amendments, MARPOL 73/78, as well as the provisions of the International Regulations for Preventing Collision at Sea, and all laws, orders and regulations issued by the Egyptian Government.

(2) The Suez Canal Authority reserves the right to refuse access to the Canal Waters, or order the towage or convoying of vessels considered dangerous or troublesome to navigation in the Canal (Non or erroneous declaration of dangerous cargo – See "Article 47 Bis").

(3) By the sole fact of using the Canal Waters, Masters and Owners of vessels bind themselves to accept all the conditions of the present Rules of Navigation, with which they acknowledge being acquainted, to conform with these conditions in every respect, to comply with any requisition made with a view to their being duly carried out, and to adhere to the Canal Authority's private Code of Signals as shown in Part III of these Rules.

Article 2: Agents

(1) Every vessel(1) other than navy ships intending to transit the Suez Canal or staying at Port Said or Port of Suez, or in the Suez Canal Basins or docks must have a recognised Shipping Agent.

(2) Suez Canal Authority confirms that she has no agents or representatives abroad.

(3) The Egyptian Authorities are to be notified of intended transit of navy ships in the Suez Canal : *Viz* : Ministry of Foreign Affairs, Ministry of Defence as well as Ports and Lights Administration.

(1) Vessels up to 400 g.r.t. may have a recognised private agent.

Article 3: Canal Waters

(1) Canal Waters mean the Canal proper, and the access channels thereto,(2) the waters within the Canal Authority's Concession adjacent to the Canal proper and Port Said Harbour and Port of Suez.

(2) The Canal proper, as to its length, is reckoned to run from Km. 3.710 West Branch for vessels entering from Port Said Harbour and from Km. 1.333 East Branch for vessels entering through the East Approach Channel, to Hm. 3 at Suez, including the 2 channels of the Great Bitter Lake and all Canal by-passes.

(3) As to its width the Canal is bounded by the banks when they are above water; when the banks are submerged, the width of the Canal is limited to the perpendiculars at the point of intersection of the sub-marine bank with the horizontal plane corresponding to the max. draft authorised including squat.

(2) Port Said Eastern and Western Entrance Channels, Suez Entrance Channel which includes the Port of Suez Eastern Channel leading to the Canal entrance.

Article 4: Responsibilities(1)

(1) When in Canal Waters, or at its ports or roads, any vessel or floating structure of any description is responsible for any damage and consequential loss it may cause either directly or indirectly to herself or to the Canal Authority properties or personnel or to third party.

(2) The vessel's or floating structure's Owners and/or Operators are responsible without option to release themselves from responsibility by limited liability.

(3) The words "Owners and/or Operators" for the purpose of the present article, shall be considered to mean person/persons or corporate body responsible for the vessel at the time of the navigational accident or incident.

(4) Moreover, the vessel guarantees to indemnify the Canal Authority in respect of any claim against the latter by reason of any damage whatsoever she may cause either directly or indirectly to third parties.

(5) The vessel waives the right to claim against the Suez Canal Authority for any damages caused by third parties that she may sustain while in Canal Waters.

(1) See also Art. 11 para. D, (art.16 para. A), (art.55 para. 5), (art.59 para. 3), (art.60 para 4,5) and (art.62 para. 4).

Article 5: Temporary Delaying of Vessels

(1) The Canal Authority may delay a vessel for the purpose of investigating any claim or dispute that may arise, or any formal or informal complaint, or allegation of violation of the laws of the Canal or for security reasons.

(2) A vessel may be delayed until in the opinion of the Canal Authority, its tenderness, trim, list, cargo, hull, machinery have been put into such condition as will make the vessel reasonably safe for her passage through the Canal.

(3) No claim for damages is accepted or considered because of any such temporary delaying of vessels.

Article 6: Pilotage

(1) Pilotage is compulsory for all vessels whatever their tonnage,(1) when entering, leaving, moving, changing berth or shifting in Canal Waters or Port Said and Port of Suez harbours.

(2) Any exemption must be explicitly authorised by the Suez Canal Authority (See Art. 11(d)).

(1) Except Egyptian vessels under 300 tons Suez Canal Gross Tons authorised to work in Canal Ports and Accesses, also Egyptian fishing vessels under 300 tons Suez Canal Gross Tons (At Port of Suez: 300 tons Suez Canal Gross Tons). However, if transiting Canal, the above is not applied.

Article 7: Changing Berth in Road Anchorages

Vessels in Port Said Anchorages Areas (Northern and Southern Anchorages), Suez Roads, the Bitter Lakes or Timsah Lake are not authorised to change berth or anchorage, or make fast alongside other vessels, or carry out any cargo operations without explicit authorisation from the Suez Canal Authority.

PART I – NAVIGATION

CHAPTER I: SUEZ CANAL NAVIGATION FEATURES

SECTION I: Approaches

Article 8: Port Said (See "Plan")

General: Fifteen miles before arrival to Fairway Buoy,(1)(2) all vessels arriving from seaward should contact the Harbour Office by VHF (Channel 16). If not able to, by R/T (2182 kHz) or by W/T or by radio telex and Inmarsat via Suez Canal Marine Communications Centre SUQ for instructions (See Part III – Articles 86 and 87).

Fairway Buoy: Position: Lat. 31° 21.32' N., Long. 32° 20.81' E.
Characteristic: V.Q.W.

(1) See "Plan".
(2) All buoys in the Canal and access channels may be replaced temporarily by others of smaller size.

(A) ANCHORAGE AREAS(3):

The incoming vessels have two anchorages.

(3) All vessels arriving from sea have to anchor in the berth allocated to them by the Suez Canal Port Authority.

(1) The Northern Area

Comprises two zones:

(a) Zone One: For vessels with draft over 42 ft. This zone is limited as follows:

North Limit	Latitude	31° 28.50' North
South Limit	Latitude	31° 27.00' North
East Limit	Longitude	32° 20.00' East
West Limit	Longitude	32° 18.00' East

Vessels at anchor in this area, when entering the Eastern Channel will proceed between the East and West buoys at Hm. 195 (course 194°)(1).

Hm. 195:

East:		West:	
Lat.	31° 25.06' N.	Lat.	31° 25.16' N.
Long.	32° 24.30' E.	Long.	32° 23.85' E.

Isophase (2 sec. on, 2 sec. off) (See "Plans").

(1) All buoys in the Suez Canal and its approaches are fitted with radar reflectors.

(b) Zone Two: For VLCCs, 4th Generation Container Ships, 3rd Generation Container Ships and vessels over 39 ft. draft up to 42 ft.

This zone is limited as follows:

North Limit	Latitude	31° 25.00' N.
South Limit	Latitude	31° 23.20' N.
East Limit	Longitude	32° 20.00' E.
West Limit	Longitude	32° 16.00' E.

Vessels at anchor in this area, when entering the Eastern Channel, will proceed between the East and West buoys at Hm. 135.

Hm. 135:
Lat. 31° 21.95' N., Long. 32° 23.10' E.
Characteristics: See "Plan".

The berths of this zone are called (V) berths and comprise the following:

Centre of circle (Radius 750 m.).

Berth	*Latitude*	*Longitude*
V1	31° 23.70' North	32° 19.50' East
V2	31° 24.50' North	32° 19.50' East
V3	31° 23.70' North	32° 18.50' East
V4	31° 24.50' North	32° 18.50' East
V5	31° 23.70' North	32° 17.50' East
V6	31° 24.50' North	32° 17.50' East
V7	31° 23.70' North	32° 16.50' East
V8	31° 24.50' North	32° 16.50' East

(2) The Southern Area

For all other vessels, area is limited as follows:

North Limit	Latitude	31° 23.05' North
South Limit	Latitude	31° 21.25' North
East Limit	Longitude	32° 20.50' East
West Limit	Longitude	32° 16.70' East

Vessels at anchor in this area, when entering the Port of Port Said through the West Approach Channel proceed:

(i) Take on their starboard "Fairway Buoy", No. 8, No. 7 and No. 6 Buoys.
(ii) On the port there are 3 yellow buoys showing yellow lights.
(iii) On reaching No. 5 pair of buoys at Hm. 80, showing F. Gr. and R., they will proceed through the old channel to Port (Course 217.5°).

Berths in Southern area called (C):
Centre of Circle (radius 500 m.)

Berth	*Latitude*	*Longitude*
C1	31° 21.50' North	32° 20.00' East
C2	31° 22.10' North	32° 20.10' East
C3	31° 22.70' North	32° 20.10' East
C4	31° 21.50' North	32° 19.40' East
C5	31° 22.10' North	32° 19.40' East
C6	31° 22.70' North	32° 19.40' East
C7	31° 21.50' North	32° 18.70' East
C8	31° 21.10' North	32° 18.70' East
C9	31° 22.70' North	32° 18.70' East
C10	31° 21.50' North	32° 18.00' East
C11	31° 22.10' North	32° 18.00' East
C12	31° 22.70' North	32° 18.00' East
C13	31° 21.50' North	32° 17.30' East
C14	31° 21.10' North	32° 17.30' East
C15	31° 22.70' North	32° 17.30' East

(3) **Prohibited Area for Anchorage**

The area between the East limit of the 2 anchorage areas and the approach channels is prohibited for anchorage to all vessels and floating units.

(4) **Anchorage Area for Trans-shipment Operations:**

(a) Vessels up to 60 ft. draft:

North Limit	Latitude	31° 25.00' N.
South Limit	Latitude	31° 24.00' N.
East Limit	Longitude	32° 27.00' E.
West Limit	Longitude	32° 26.00' E.

(b) Vessels over 60 ft. draft:

North Limit	Latitude	31° 27.00' N.
South Limit	Latitude	31° 26.00' N.
East Limit	Longitude	32° 28.00' E.
West Limit	Longitude	32° 27.00' E.

(5) **Dangerous Areas**

(a) Wreck: A wreck buoy is situated on the Western side of a sunken ship at Hm. 195, West of the approach channel:

Lat. 31° 25.24' North. Long. 32° 22.98' East.

Height 5 m., painted black and red horizontal bands, with day mark 2 black balls. Showing group flashing white (2) every 10 seconds. (See "Plan").

(b) Dumping Areas: The hopper dredgers, dredge underway for several months every year in the entrance channels and dump in the following areas.

3,140 m. East of the axis of the East channel at Hm. 140.

Lat. 31° 20.80' North Long. 32° 25.80' East.

4,000 m. East of the axis of the East channel at Hm. 80 approximately.

Lat. 31° 18.70' North Long. 32° 24.70' East.

(B) PORT SAID APPROACH CHANNELS

(1) **Buoyage** (See "Plan" – "Suez Canal North Entrance").

The Port Said West Approach Channel extends from the port of Port Said till Hm. 80 where it joins the East Approach Channel. Height of buoy at Hm. 80 is 10 m.

The Port Said East Approach Channel extends from the land boundary, East of Port Said, till Hm. 195.

The 2 channels are marked, on each side, by light buoys of 5 m. height (except from Hm. 195 to Hm. 135 East Channel, the height of the buoys is 10 m.). The light is red on the Eastern side and green on the Western.

(a) **East Approach Channel** (See "Plan").

The East Approach Channel is buoyed as follows:

In the West: Green. Daymark: Cone point up. Fl. Gr. Lights.

In the East: Red. Daymark: Can Fl. R. Lights.

The 2 buoys indicating the Northern end of the channel, at Hm. 195, are Isophase (2 sec. on, 2 sec. off). The distance between them is 745 m.

(b) **Junction of East and West Approach Channels**

Three yellow buoys mark the junction of the East and West Approach Channels. They are placed at Hm. 83, Hm. 95 and Hm. 105.

(i) Buoy at Hm. 83: Yellow and black in colour, is fitted with North Cardinal (2 cones point up) daymark and shows by night Q. Fl. W. (5) every 20 sec.

(ii) Buoy at Hm. 95: Yellow in colour, shows a fixed yellow light.

(iii) Buoy at Hm. 105: Yellow in colour, is fitted with a yellow St. Andrew's cross daymark and shows by night group flashing yellow (4) every 15 seconds.

(c) **West Approach Channel**

The buoyage of the West Approach Channel of Port Said Harbour, is as follows:

(i) Port Said Fairway Buoy (See "Plan").

Off Port Said, a fairway light buoy, height 10 m., painted black with yellow vertical stripes, surmounted by a daymark 2 cones point out, and showing V.Q. light.

Lat. 31° 21.32' North Long. 32° 20.81' East.

Buoy No. 8 Green. Daymark: Cone point up. F. Gr. Light.

Lat. 31° 21.13' North Long. 32° 21.04' East.

Buoy No. 7 Green. Daymark: Cone point up. F. Gr. Light.

Lat. 31° 20.52' North Long. 32° 21.31' East.

Buoy No. 6 Green. Daymark: Cone point up. F. Gr. Light.

Lat. 31° 19.09' North Long. 32° 21.58' East.

(ii) The West Approach Channel is buoyed as follows:

In the West: Green. Daymark: Cone point up. F. Gr. Light.

In the East: Red. Daymark: Can F. R. Light.

Buoy No. 5 of Hm. 80 East: Red: Daymark: Can F. R.

Lat. 31° 19.13' North Long. 32° 22.11' East.

Buoy No. 5 of Hm. 80 West: Green: Daymark: Cone F. G.

Lat. 31° 19.30' North Long. 32° 22.85' East.

(d) **El Bahar Tower**

A guidance tower in position between the East and West Approach Channels:

Lat. 31° 18.16' North Long. 32° 21.58' East.

Height 42 m., painted white with red horizontal stripes.

Characteristics:

Racon call sign Q "– – · –" range 15 miles.

Beacon light Iso. W (2) sec., range 15 miles.

(2) **Navigation**

(a) **Northbound Vessels:** (i) All Northbound vessels use the East Approach Channel. The end of the navigable channel is marked by the pair of buoys at Hm. 195. (course 014°). From Hm. 195, vessels are to steer North (000°) for 5 miles before altering to destination.

(ii) Vessels leaving Port Said harbour to sea, use the West Approach Channel (course 037.5°) till Hm. 80 (Buoys No. 5), then steer North (000°) to 5 miles North of Buoy at Hm. 195 West. (Lat. 31° 25.16' N., Long. 32° 23.85' E.) before altering to destination.

(iii) Vessels of the Northbound convoys wishing to enter Port Said Harbour may proceed through the West Channel, direct to their allocated berth in Port Said Harbour, *only if the situation of traffic permits.* Otherwise they have to proceed through the East Approach Channel till Hm. 195, then steer North (000°) for 5 miles and head for the anchorage berth allocated by the Harbour Office(1).

(1)This is to avoid crossing incoming vessels to the Northern Anchorage Area.

(b) **Southbound Vessels:** The maximum draft authorised for Southbound vessels is limited to 42 ft.(2) in accordance with the tables giving the maximum draft according to the vessel's breadth.

(2)Southbound vessels may be authorised to transit with draft from 42 ft. up to 56 ft. with special arrangement.

(i) VLCCs, in ballast or partially loaded, 4th Generation Container Ships and 3rd Generation Container Ships, LASH vessels over 35,000 Suez Canal Gross Tons, LPG and LNG (Loaded or not gas free) and vessels having a draft of more than 42 ft. and up to 56 ft. maximum, have to use the East Approach Channel, course 194°. The said vessels enter the channel between flashing green buoys of Hm. 165 and Hm. 135.

(ii) All other vessels, transiting the Canal or berthing at Port Said, have to enter through the West Approach Channel, course 180°, from the entrance, passing between the West green buoys and the East yellow buoys till Hm. 80, then alter course to 217.5°, passing between green and red buoys, till Port Said Harbour.

A fixed red light on a pylon on the North Quay of Abbas Basin in line with an occulting red light on a pylon West of the fuel oil tanks at Raswa, indicates the axis of the entrance channel to the harbour.

(D) **BREAKWATERS:**

(1) The West Approach Channel is protected by two breakwaters:

(a) The Western Breakwater protecting the West Approach Channel is situated to the West of the channel and extends from land boundary till Hm. 73 with a submerged part from Hm. 50. This part is marked by cigar shaped unlit buoys.

(b) The Eastern breakwater extends from land boundary till Hm. 21.2, and has an occulting red light at its Northern End.

(2) Two breakwaters protect the East Approach Channel. The Eastern extends 2 km. from the land boundary, and the Western extends for 0.53 km. from the land boundary. Each breakwater has a small fixed white light on its end.

Article 9: Suez (See "Plan")

Five miles before arrival at the First Separation Zone Buoy, all vessels coming from sea should contact the Suez Canal Harbour Office by VHF Channel 16. If not able to, contact by R/T (2,182 kHz) or by W/T or radio telex and Inmarsat via S.U.Q. for instructions. (See Part III, Articles 86 and 87).

(A) Separation Zone

A Separation Zone has been established. Extending 0.3 miles on each side of the line connecting the two Separation Buoys mentioned hereafter. All vessels arriving or leaving have to pass the Separation Zone Buoys(1) on their Port side.

(1)See "Plan".

The Separation Zone Buoys are:

(1) Separation Zone Buoy No. 1 (Southern Buoy):

Lat. 29° 39.49' North Long. 32° 32.12' East

Height 6 m., R. W. colour, with top mark red ball, and a foghorn. Showing L. Fl. 10 sec. and fitted with 5 mile Racon (O) 3 cm. and 10 cm.

(2) Separation Zone Buoy No. 2 (Northern Buoy):

Lat. 29° 48.55' North Long. 32° 32.12' East

Height 6 m., R. W. with top mark red ball, showing Iso. 6 sec. with 5 mile Racon (D) 3 cm. and 10 cm. Horn.

(B) Anchorage Area

The incoming vessels have two anchorages:

(1) "V" Area:

For VLCC's, 4th Generation Container Ships, 3rd Generation Container Ships, LASH ships over 35,000 Suez Canal Gross Tons, vessels over 38 ft. draft, LPG and LNG vessels (loaded or not gas free), this area is indicated by:

(a) The Conry Rock Buoy:

Lat. 29° 48.11' North Long. 32° 34.22' East.

Height 5 m., Y.B.Y. West mark, showing Q (9) 15 sec.

(b) South Shoal Buoy:

Lat. 29° 38.87' North Long. 32° 35.98' East.

Black, cone point up, showing Gr. Isophase (2 sec. on, 2 sec. off).

Berths of this area are called "V" Berths. Center of circle (radius 833 m.).

Berth	*Latitude*	*Longitude*
V1	29° 46.50' North	32° 35.00' East
V2	29° 45.50' North	32° 35.00' East
V3	29° 45.50' North	32° 36.00' East
V4	29° 45.00' North	32° 37.00' East
V5	29° 44.50' North	32° 36.00' East
V6	29° 44.50' North	32° 35.00' East
V7	29° 44.00' North	32° 37.00' East
V8	29° 43.50' North	32° 36.00' East
V9	29° 43.50' North	32° 35.00' East

(2) Waiting Area:

For other vessels:

This area is limited by the following buoys:

(a) Conry Rock:

Lat. 29° 48.11' North Long. 32° 34.22' East.

Height 5 m. Y.B.Y. West mark, showing Q (9) 15 sec.

(b) Buoy "M":

Lat. 29° 50.00' North Long. 32° 35.29' East.

Height 5 m., yellow cross, showing F.Y.

(c) Buoy "N":

Lat. 29° 50.63' North Long. 32° 35.29' East.

Height 5 m., yellow cross, showing Qk. F.Y.

(d) Buoy "D":

Lat. 29° 51.28' North Long. 32° 35.29' East.

Height 5 m., yellow cross, showing F.Y.

(e) Buoy "C":

Lat. 29° 51.93' North Long. 32° 35.29' East.

Height 5 m., yellow cross, showing Fl. Y.

(f) Buoy "B":

Lat. 29° 52.06' North Long. 32° 34.54' East.

Height 5 m., yellow cross, showing F.Y.

(g) Buoy "A":

Lat. 29° 52.17' North Long. 32° 33.86' East.

Height 5 m., yellow cross, showing F.Y.

(h) Buoy Hm. 60.00 East:

Lat. 29° 52.27' North Long. 32° 33.16' East.

Height 5 m., green, cone point up and showing Fl. Gr.

Buoy Hm. 60.00 West:

Lat. 29° 52.26' North Long. 32° 32.96' East.

Height 5 m., red can, showing Fl. R.

(i) Buoy Hm. 70.50 East:

Lat. 29° 51.70' North Long. 32° 33.26' East.

Height 5 m., green, cone point up and showing Fl. Gr.

Buoy Hm. 70.50 West:

Lat. 29° 51.69' North Long. 32° 33.05' East.

Height 5 m., red can, showing Fl. R.

(j) Buoy Hm. 80.50 East:

Lat. 29° 51.16' North Long. 32° 33.33' East.

Height 5 m. green, cone point up and showing Occ. Gr. (1) 4 sec.

(k) Position "R":

Lat. 29° 48.52' North Long. 32° 33.18' East.

(C) Anchorage Area for Trans-shipment Operations "S.T.S":

(1) "A" Area:

Lat. 29° 43' North	Long. 32° 37' East
Lat. 29° 43' North	Long. 32° 38' East
Lat. 29° 42' North	Long. 32° 37' East
Lat. 29° 42' North	Long. 32° 38' East

(2) "B" Area:

Lat. 29° 37' North	Long. 32° 37' East
Lat. 29° 37' North	Long. 32° 38' East
Lat. 29° 36' North	Long. 32° 37' East
Lat. 29° 36' North	Long. 32° 38' East

(D) – Arrival to Suez of Northbound Vessels

Vessels coming from sea to transit the Suez Canal or enter the Port of Suez, have to pass East of the Separation Zone. VLCC's, 4th Generation Container Ships, 3rd Generation Container Ships and vessels over 38 ft. draft have to anchor in the anchorage area specified for these vessels (V Berths) in the berth allocated to each vessel by the Suez Canal Authority. Other vessels have to pass East of the Separation Zone and anchor in the Waiting Area as previously indicated.

(E) – Prohibited Area for Anchorage

It is strictly forbidden for all vessels Northbound to anchor in the area limited as follows:

(1) In the North:

Two buoys marking the dredged channel position:

Western Buoy: Lat. 29° 51.15' N., Long. 32° 33.13' E.

Eastern Buoy: Lat. 29° 51.16' N., Long. 32° 33.33' E.

(2) In the West:

By the line joining the West Buoy and position "P":

"P": Lat. 29° 48.52' N., Long. 32° 30.90' E.

(3) In the East:

By the line joining the East Buoy and position "R":

"R": Lat. 29° 48.52' N., Long. 32° 33.18' E.

(4) In the South:

By the line joining position "P" and position "R".

(F) – Suez Entrance Channel

(Including the Eastern Channel leading to the Canal Entrance).

This channel is used for vessels entering or leaving Suez Canal and also by those entering Port of Suez and using its anchorages (1)

(1)The max. draft authorised for vessels using Ibrahim Basin, the Petroleum Basin or El Adabya Basin must not exceed 26 ft. at HW.

This channel is buoyed as follows:

(1) A pair of light buoys at Hm. 80.5 (entrance buoys):

(a) The Eastern Buoy, height 5 m., green, cone point up showing Oc. G. 4 sec.

(b) The Western Buoy, height 5 m., red, can daymark showing Oc. R. 4 sec.

The distance between the Eastern and Western Buoys is 340 m.

(2) Proceeding Northward, the channel is marked on both sides by light buoys, height 5 m.

(a) On the Eastern side of the channel: The buoys are green, cone point up, showing Fl. G.

They are placed in the following locations:

Hm. 70.50
Hm. 60.00
Hm. 44.40
Hm. 24.00
Hm. 14.00
Hm. 7.00
Km. 162.150 (Occ. green light)

(b) On the Western side, the buoys are red, can daymark and showing Fl. R.

They are placed in the following locations:

Hm. 70.50
Hm. 60.00
Hm. 44.40
Hm. 21.00
Hm. 17.20
Hm. 1.00 (Occ. red)

Course: From the entrance buoys (Hm. 80.50) (New Port Rock Channel) to the green light buoy of Hm. 24.00.

Northbound: 352.5°
Southbound: 172.5°

(G) – Canal South Entrance

The Canal South entrance is marked by 2 light buoys, height 7 m.

(1) The Eastern Buoy at Km. 162.150 is green, cone point up, showing occulting green light (1) every 4 seconds.

(2) The Western Buoy at Hm. 1.00 is red, can daymark and showing occulting red light (1) every 4 seconds.

(H) Port of Suez: Port of Suez is delimited by the imaginary line which extends from Ras Adabeya to Eyoun Moussa and comprises the coastal zone North of this line, up to Suez Canal entrance.

(1) Navigation:

(a) General Rules:

(i) All vessels shall conform to the International Regulations for Preventing Collision at Sea.

(ii) Navigation in the port is limited to approved channels only.

(iii) Crossing or overtaking in the channels is strictly forbidden.

(iv) Vessels must proceed in the port with caution and at reduced speed.

(v) Vessels must not let go their anchors except in the anchorage.

(b) Traffic Regulation:

(i) Vessels entering or leaving the Port:

For vessels entering the port from sea and vessels leaving the port for sea, all movements shall be effected through the Western Channel, *except* for vessels anchored in 1C, 2C, 3C, 4C, 5C, which should use the Eastern Channel.

(ii) Vessels entering the Canal:

From the Port and Zone N.W. of Green Island, they must comply with the following:

Anchorages 8C to 16C and Anchorage Groups A and B (See "Plan"):

Vessels shall pass through the Western Channel, then South of Green Island to join the Eastern Channel and then proceed to the entrance of the Canal.

From Zone North East of Green Island:

Anchorage 1C to 7C:

Vessels shall proceed directly from their anchorages to the entrance of the Canal. If the number of vessels exceeds the number of anchorages, vessels in excess shall anchor South of the Western Channel, parallel to Anchorages 2A, 4A, 6A, 4B and 7B, making sure to leave the Western Channel clear for navigation at all times.

From Zone South of Green Island:

Anchorages 1D to 6D (See "Plan"):

Vessels shall proceed directly from the anchorages to the Canal or to sea through the Eastern Channel.

(iii) Vessels leaving the Canal:

Direct to Sea:

They shall proceed through the Eastern Channel.

Anchoring in the Port:

Anchorage Groups A and B, Zone N.W. of Green Island 8C to 16C:

They shall proceed through the Eastern Channel, then the Western Channel and shall follow it till the place fixed for their anchorage.

Zone N.E. of Green Island from 1C to 7C:

Vessels shall come out of the Canal and proceed directly to this area.

(c) Priority of Movement in the port:

Priority of movement in the port shall be as follows:

(i) Vessels leaving the Canal.

(ii) Vessels proceeding to the Canal.

(iii) Vessels coming from sea must wait outside the port until the Eastern Channel is clear.

(iv) Vessels leaving the anchorages of the Port of Suez.

(v) Vessels coming out of the Basins (Ibrahim Basin – Adabeya – Petroleum Basin).

(vi) Vessels using the New Petroleum Jetty.

(d) Priority of Passage in the Eastern Channel:

(i) Vessels leaving the Canal.

(ii) Vessels in anchorages of Port of Suez, and proceeding Southward to sea, have to pass through the Eastern Channel.

Ships approaching Port of Suez from sea should wait outside until the channel is clear.

(e) When Harbour is closed for Bad Weather:

(i) Vessels coming from sea:

It is recommended not to enter the Port of Suez when it is closed due to foul weather which prevents the pilots from boarding the vessels.

However, any vessel who would like to enter on her own responsibility will have to contact the wireless station (SUQ) and ask permission for doing so, giving her draft and length in feet, by the following cable:

"I wish to enter Suez Anchorage on my own responsibility. Length ..... Draft ..... feet".

If permission is granted, the Master will receive the following cable:

"Port is closed. Entering on your own responsibility. Available anchorage ...".

(ii) Vessels leaving the Suez Canal:

In case, when the embarkation of the Roads pilot is not possible, the following cable will be sent to the ship:

"Owing to bad weather Roads pilot will not board your ship".

The following will be added in case the vessel would ask for an anchorage:

"Available anchorage ...".

(iii) Vessels anchored in the Port of Suez leaving for sea:

Vessels who would like to sail on their responsibility, will have to hoist the signal for pilot, send the following cable to SUQ and wait for orders.

"I wish to go to sea on my own responsibility. Please confirm".

They may proceed if they receive the cable:

"You may proceed to sea on your own responsibility".

(2) Buoyage of Port of Suez:

(a) Buoy 2A – 281.5° – 20.9 cables from New Port Rock Light.

(b) Buoy 3A – 278.5° – 26.9 cables from New Port Rock Light. These buoys show flashing red (1) every 5 seconds.

(c) Buoyage of Port of Suez – Position of Green Island Light:
Lat. 29° 54.59' N., Long. 32° 31.80' E.

(i) Eastern Channel (East of Green Island) is limited by the following buoys:

In the East:

Buoy	*From Green Island Light*	*Distance (m.)*
Hm. 7.00 East	062°	2440
Hm. 14.00 East	080°	1820
Hm. 24.00 East	111°	1720
Hm. 44.40 East	144°	3300
Hm. 60.00 East	153°	4720
Hm. 70.50 East	166°	5720
Hm. 80.50 East	159°	6680

In the West:

Buoy	*From Green Island Light*	*Distance (m.)*
Hm. 1.00 West	050°	2600
Hm. 17.20 West	082°	1390
Hm. 21.00 West	108°	1260
Hm. 44.40 West	150°	3110
Hm. 60.00 West	157°	4640
Hm. 70.50 West	160°	5630
Hm. 80.50 West	162°	6630

(ii) Shallow water in the Green Island Zone is limited as follows:

North Buoy bearing 000° at a distance of 1,490 m. from Green Island Light, showing flashing green light (1) every 2 seconds.

Red Buoy of Hm. 17.20.

Red Buoy of Hm. 21.00.

South-West Buoy bearing 239.5° at a distance of 780 m. from Green Island Light, showing group flashing green (3) every 7 seconds.

West Buoy bearing 308° at a distance of 820 m. from Green Island Light, showing group flashing green (2) every 5 seconds.

Oil Jetty quick flashing white light.

(3) Anchorages of Port of Suez:

Article 10: Roads and Harbour Pilot Signals:

Vessels requiring a Pilot for:

(1) Entering from sea
(2) Sailing out to sea
(3) Changing berth
(4) Entering the Canal

should hoist a black ball over G by day and 3 white lights by night in a vertical line. These signals are to be hoisted where can best be seen.

SECTION II

Article 11: Pilotage

(A) General:

All vessels entering or leaving Canal waters, must take a Pilot (Pilotage is compulsory).

However, the Suez Canal Authority reserves the right to assign a tug Master on board vessels under 1,500 tons gross and under 800 tons gross, a coxswain, instead of a Pilot.

Navy ships and any vessel carrying dangerous cargo must have a Pilot regardless of their tonnage.

Roads Pilots, on boarding vessels arriving from sea, hand over to the Master, the Declaration of State of Navigability and the Pilotage Form.

Masters are held solely responsible for all damage or accidents of whatever kind resulting from the navigation or handling of their vessels directly or indirectly by day and night.

The Pilot must inform the Movement Control Office or the Port Office immediately by W/T, and radio telex, Inmarsat and/or VHF or UHF, if his advice regarding the safety of navigation is not accepted or not respected by the vessel.

(B) Port Said:

(1) *Southbound Vessels:*

(a) VLCCs, 4th Generation Container Ships, 3rd Generation Container Ships, LASH vessels over 35,000 Suez Canal Gross tons, LPG and LNG and vessels over 42 ft. draft are piloted from Northern Anchorage Area for Canal transit through the East Approach Channel.

(b) Other vessels, either for local trade or intending to transit the Canal, are piloted from Fairway Buoy to berths in the harbour through the West Channel.

(c) Vessels are piloted between Port Said Harbour and Port of Suez by Canal Pilots who are relieved at Ismailia.

(2) *Northbound Vessels:*

(a) Through East Branch, vessels are piloted to Km. 3.000. However, on Master's request, pilotage may extend to Hm. 80.

(b) Through West Branch, vessels are piloted to Hm. 80 if weather permits. However, on Master's request, pilotage may end at Hm. 22 on Master's responsibility.

(C) Port of Suez:

(1) Northbound Vessels:

(a) VLCCs, large bulk carriers, 4th Generation Container Ships, 3rd Generation Container Ships, LASH vessels over 35,000 Suez Canal Gross tons, LPG and LNG (Loaded or not gas free) and vessels over 38 ft. draft are piloted from anchorage area South of Conry Rock for Canal transit.

(b) Other vessels are piloted from waiting area to anchorage area in the Port of Suez.

(c) Vessels are piloted from Port of Suez and Port Said Harbour by Canal Pilots who are relieved at Ismailia.

(2) Southbound Vessels:

(a) Southbound convoy and vessels in Port of Suez Anchorages sailing South are piloted to Hm. 80.50. However, on Master's request, piloting may end at Hm. 44.40 (New Port Rock).

(b) Vessels have to maintain course through the channel till the last pair of buoys, keeping the Separation Zone on the port side.

(D) Master and Pilot:

(1) Master:

When a vessel is transiting the Canal, the Master or his qualified representative should be present at all times on the bridge; he has to keep the Pilot informed concerning any individual peculiarities in the handling of the vessel so that the Pilot might be in a position to give better advice to control the navigation and movement of the vessel.

(2) Pilot:

The duties of Pilots commence and cease at the entrance buoys of Port Said and Port of Suez. He only gives advice on manoeuvring the vessel, courses to steer, etc. He puts at the disposal of the Master his experience and practical knowledge of the Canal, but as he cannot know the defects or difficulties of manoeuvring every vessel, the responsibility falls completely upon the Master. The Pilot has to ensure the execution by the vessel of:

(a) The Articles of Rules of Navigation.

(b) The orders of transit given by Movement Control.

The manoeuvre and orders are carried out under the direction of the Master who is solely responsible for the ship.

It is therefore for the Master, taking into account the indications given by the Pilot, to give the necessary orders to the helm, to the engines, and tugs. If, in the interest of quick manoeuvres the Master thinks it preferable to allow the Pilot to give orders direct, manoeuvres carried out in these circumstances shall be considered as having been carried out on the order of the Master and on his sole responsibility.

(E) Moving in Suez Canal Waters without Pilot's assistance:

(1) Unless explicitly authorised by the Suez Canal Authority, the following must be considered:

(a) Whenever a vessel moves in Canal Waters or Port Said Harbour without having a Pilot on board, she shall be charged an additional due of U.S.$21,500 (1).

(b) An additional due of U.S.$3,200 shall be charged to vessels moving in Port of Suez Anchorages, or entering or leaving Basins at Port of Suez without having a Pilot on board(2).

(c) These dispositions do not apply in the event of the Pilot being suddenly unable to carry on with his duties owing to sickness or death. In this case, the Master must:

(i) Warn the vessels astern of his intended manoeuvre by means of the visual and sound signals as well as UHF or VHF and W/T, or radio telex and/or Inmarsat via SUQ.

(ii) Reduce speed and contact Movement Office to have advice for making fast if in the Canal, or the entrance channels; or droping anchor if in the Lakes.

(iii) The Movement Office at Ismailia is to be informed at all times by UHF or VHF and confirmed by W/T or radio telex and/or Inmarsat via SUQ.

(1) Vessels under 300 Suez Canal Gross Tons are subject to Rules of Navigation for small craft.

(2)Vessels under 300 Suez Canal Gross Tons are exempted as per Law 161/59.

(2) Exceptions:

In case of bad weather to the extent of not allowing pilotage in Canal Approach channels, Masters will be authorised by notice from the Suez Canal Port Office, to sail with their vessels on their own responsibility at the following positions:

(a) For Southbound convoy, from Km. 162 to sea.

(b) For Northbound convoy, from Km. 3.000 in East Port Said Channel Northward to sea.

(c) For vessels leaving Port Said Harbour through West Approach Channel, from Hm. 22 Northward.

(d) For vessels anchoring in Port of Suez Anchorages wishing to head to sea, also for vessels in Waiting Area wishing to enter Port of Suez Anchorage Area.

(e) For vessels entering Port Said Harbour either for transiting Canal or for trade, through West Approach Channel till Hm. 50 approximately where Roads Pilot will board vessels.

(f) For vessels entering Port Said East Approach Channel, between Hm. 165 and Hm. 135 from VLCCs Anchorage Area to join Southbound convoy, Canal Pilot will board vessels at Km. 0 of East Port Said Channel.

(g) For VLCCs and other large vessels joining Northbound convoy from new anchorage area South of Conry Rock, Canal Pilots will board vessels at Km. 161 approximately.

(h) For other vessels joining Northbound convoy from Port of Suez anchorages, Canal Pilots will board vessels at Km. 161 approx.

N.B.: (1) For items c, d, e, f, g and h, the time of proceeding will be fixed by Suez Canal Port Authority.

(i) An extra pilot, for assisting the pilot in charge, may be assigned on Master's request or by the Canal Authority if deemed necessary.

(ii) A due of U.S.$300 for every additional Canal Pilot and U.S.$150 for every additional Roads Pilot is charged.

(iii) In all cases, advice will be given if necessary by shore radars to vessel's Master.

(F) Calling Pilots unnecessarily:

When a vessel signals for Pilot, and it is found when boarding that she is not ready to get underway in the limited time, the vessel is liable to be delayed and Pilot disembarked. The vessel will pay extra pilotage dues for the new Pilot as mentioned before.

(G) Extra Pilots:

(1) Extra pilots shall be assigned in the following cases:

(a) Vessels over 80,000 Suez Canal Gross Tons.

(b) 4th Generation Container Ships, 3rd Generation Container Ships and LASH vessels of 35,000 Suez Canal Gross Tons and over.

(c) Vessels having cargoes or installations impeding visibility from inside the wheelhouse (bad view).

(d) If a Pilot is disembarked and relieved by another Pilot, in case of slow speed vessels, vessels having troubles which prevent continuation of transit with same convoy, or vessels that have to transit by daylight only.

(e) If vessel has no accommodation for the Pilot to rest while anchored in Bitter Lakes or making fast in mooring places for a long period.

(f) On Master's request or by Suez Canal Authority if deemed necessary.

CHAPTER II: ARRIVAL AND PREPARATION FOR TRANSIT

SECTION I: Pre-Arrival of Vessels

Article 12: Booking for transit

(1) Vessels may book for transiting the Canal. The booking notice shall reach the Suez Canal Authority Offices not later than 4 days prior to the transit date. It must contain the name, nationality of the vessel, her type (container, Ro-Ro, etc. . . .) her draft, Suez Canal Gross Tonnage and deadweight tonnage.

(2) Vessels booking for fixed date will have priority to catch the convoy on that date, if they arrive within the time limit defined by the present Rules.

(3) Booking can be cancelled or altered by notice to the Suez Canal Authority offices at least 24 hours before the date booked for, otherwise the vessel shall be charged U.S.$100.00.

(4) In case of VLCCs and similar vessels, this charge will be U.S.$1,500.00 on account of the special arrangements made by the Suez Canal Authority.

(5) Vessels arriving without previous booking will catch the convoy if capacity of movement in the Canal permits, otherwise they may catch the following convoy.

Article 13: Notice of Arrival

Masters of vessels fitted with wireless apparatus are requested to transmit the following information to their Agents, 48 hours prior to the vessel's arrival and to the Suez Canal Authority via SUQ.

(1) The name and nationality of the vessel, her ex-name if any.

(2) Suez Canal gross tonnage and deadweight tonnage, draft and beam.

(3) Whether they intend transiting or merely stopping in the harbours and, in this case, mention the duration of stay required.

(4) The ETA.

(5) Whether they carry dangerous cargo, stating quantity(1) and class according to IMO's regulations.

(1)In case dangerous cargo is not declared or erroneous declaration, see Article 47bis.

Article 14: Contacting Port Offices on Arrival

(a) Vessels have to contact the harbour office by VHF(2).

(2)Port Said and Port of Suez on Channel 16.

(1) 15 miles before arrival at Fairway Buoy off Port Said.

(2) Five miles before arrival at Separation Zone Buoy No. 1 off Port of Suez.

(b) When in touch, give the following information:

(1) Latitude and longitude.

(2) Vessel's name and call sign.

(3) Suez Canal official number and code number.

(4) Suez Canal gross tonnage and deadweight tonnage.

(5) Draft.

(6) Loaded or not.

(7) Kind of cargo.

(8) Any defects affecting the safety of navigation.

(9) If transiting the Canal for the first time she has to send:

(a) Date of building.
Suez Canal Tonnage Certificate, if available.

(b) Call sign or official number.

(c) Length overall.

(d) Beam.

(e) Type of engines.

(f) In all cases, the Master must inform if aiming to transit the Canal or just stay in the harbour.

This information will assist the Harbour Master to identify the vessel through his radar, acquire and assign her identification "ID" tag which will follow her path until the other end.

(c) If failing to contact by the assigned Channels, Masters may use, with the consent of the Harbour Master through the International R/T (2182 kHz) or SUQ (W/T) or Radio Telex or Inmarsat and/or any of the following VHF frequencies:

(1) 156.650 (Channel 13) Port Said.

(2) 156.600 (Channel 12) Port Said.

(3) 156.550 (Channel 11) Port of Suez.

(4) 156.700 (Channel 14) Port of Suez.

(d) Any vessel who does not contact the Port offices during her approach is subject to delays in catching the convoys.

(e) When berthing, changing berth or sailing, the Master must handle the mooring ropes by mooring boats of a firm approved by the Suez Canal Authority.

Article 15: Documents and Requirements

A. Documents to be produced are:

(1) Suez Canal Special Tonnage Certificate and Calculation Sheets (3 copies if the first transit).

(2) Certificate of Registry and Ship's Drawings (Capacity Plan and General Arrangement Plan of Accommodation and Machinery).

(3) Statistical Declaration.

(4) Extract from the vessel's official documents and information concerning the vessel's type and her cargo (containers, barges etc.).

(5) Declaration concerning the use of double bottom tanks and the lower parts of the high tanks.
(6) Declaration concerning vessels in ballast.
(7) Declaration of State of Navigability.
(8) The last Classification Certificate issued.
(9) Any other information necessary for transiting the Canal.
(10) Piping Plan and General Arrangement Plan for LPG and LNG vessels.
(11) (I.O.P.P.) International Oil Pollution Prevention Certificate of Compliance and its supplement for the record of construction and equipment as amended for tanker vessels.

B. The Master of a vessel wishing to transit the Canal must register at the Canal Authority offices and pay the various dues.

He must furnish the Canal Authority's officials with all the particulars requested. He must also furnish the Canal Authority officials with all the particulars requested by her Agent.

C. The vessel must in addition comply with the requirements of the A.R.E. Government Authorities.

D. In case the Canal Authority deems it necessary to be supplied with a new Seaworthiness Certificate, the following Classification Societies are recognised to deliver same:
(1) Lloyd's Register of Shipping.
(2) Bureau Veritas Francais.
(3) American Bureau of Shipping.
(4) Registro Navale Italiano.
(5) Germanischer Lloyd.
(6) Norske Veritas.
(7) Russian Register.
(8) Nippon Kaiji Kyokai.
(9) China Classification Society.
(10) Korean Register of Shipping.

Seaworthiness Certificates are accepted by the Suez Canal Authority in Arabic or English. If written in any other language, it is to be translated in one of these two above mentioned languages and duly certified by the Embassy or Consulate of the Arab Republic of Egypt.

E. Navy ships transiting the Suez Canal Waters must be provided with a Suez Canal Special Tonnage Certificate showing the Suez Canal Gross and Net Tonnages.

If such document is not onboard, the Commanding Officer has to give, in writing, the following information:
(1) Name of Ship.
(2) Name of Commanding Officer.
(3) Call sign of the ship (Radio Call).
(4) LOA, beam overall and depth of the ship.

As long as the ship is not provided with the Suez Canal Special Tonnage Certificate, transit dues will be levied on the temporary Gross Tonnage product of the empirical formula without any allowance till the presentation of the documents required.

F. Erroneous Declarations:

If the Canal Authority Officials discover false information concerning the cargo carried(2) or the ship's situation ballast or loaded, resulting from the shipping clerk's or the Master's negligence, in documents held, the tolls difference will be doubled.

The tolls difference means the difference between the correct and the wrong amount of transit dues.

(2)e.g. The carriage of sweet water as cargo and declared as ship's water ballast; the omission of declaring the presence or quantity of containers on the weather deck or any cargo onboard, passengers, etc. . . .

Article 16: Stay in the Harbour

A. The Master is responsible for the mooring of his vessel in Port Said Harbour and Port of Suez.

B. Mooring Lashing Ropes: For the safety and quick berthing of vessels in Port Said Harbour, the only lashing ropes allowed to be used for fixing ship's ropes on the buoys are those provided by the Suez Canal Mooring and Light Company. For this purpose, the said company provides vessels making fast in the harbour with 2 in. Manilla or Sisal ropes. This service is against U.S.$ 40.00 per vessel to be added to the invoice of the Suez Canal Mooring and Light Company.

C. The Master is to pay attention to the instructions hereunder:

(1) When the vessel is moored to the buoys, the mooring ropes must be watched to ensure safe mooring. If two vessels are moored to the same buoy, when one leaves, the other must adjust her moorings.

(2) Masters must comply with the Harbour Master's advice regarding mooring ropes during the stay of their vessel in port; especially when, in case of expected bad weather, it is necessary to increase the moorings if required.

(3) When a vessel is moored with her stern to the bank, the Master must keep himself continuously informed of the depth of water aft, to avoid grounding on the submerged slope either as a result of the settling of the vessel as she loads, or her proximity to the bank.

(4) At night, the vessel, whether moored or manoeuvring, must show the lights prescribed by the International Regulations for Preventing Collisions at sea, in addition to the Suez Canal Light Signals.

(5) Unless authorised, barges alongside a vessel must not be more than two abreast.

(6) It is forbidden to try projectors, or to turn the propellers during the process of warming-up, in the absence of the Pilot, or without informing him when onboard.

(7) Vessels must not put their engines out of working order for any reason whatsoever without permission from the Canal Authority.

(8) The Master must always keep onboard sufficient crew to ensure efficient handling of the moorings, fire fighting and damage control.

(9) The Harbour Master or his delegate should have free access onboard to ensure the carrying out of the Regulations, to verify the vessel's seaworthiness, and to ascertain that dangerous cargo onboard complies with the Suez Canal Regulations.

(10) Vessels cancelling berth booking at Port Said for commercial operations, bunkering, etc., must do so 6 hours prior to arrival, otherwise, an additional due of U.S.$300.00 will be charged.

Article 17: Change of Berth

(1) If the Master wishes to change the berth of his vessel, he should notify the Harbour Office stating the desired time when the shift should take place. A tug or more will be imposed to assist in the manoeuvres.

The change of berth will take place at the time fixed by the Harbour Office. A Pilot will be sent to the vessel in due time.

(2) Shifting at the Master's request and the tugs used are charged for as per rates set down by the Suez Canal Authority.

(3) Charges for shifting due to erroneous or incomplete declarations by the Master must also be paid by the vessel.

(4) When necessary, the Harbour Master may order a vessel to shift; when so ordered, it should be made as quickly as possible. In such a case it is free of charge.

SECTION II: Preparations for Transiting the Canal

Article 18: Measures taken before entering the Canal

All vessels ready to enter the Canal must have their ladders and jib-booms run in, their boats swung in and any derricks or cranes obstructing the view forward, lowered.

Article 19: Mooring Ropes

(1) At least 6 flexible floating mooring ropes of appropriate size for the vessel, in good condition, fitted with spliced eyes, must be in readiness for any emergency, at suitable points on deck. All arrangements must be made for their quick handling.

(2) For vessels equipped with tension mooring wires, the number of floating ropes may be reduced to 4. It is to be noted, however, that any mooring lines, likely to produce sparks by their manipulation are absolutely forbidden on board petroleum tankers, LPG or LNG or any vessel carrying flammable substances.

(3) It is recommended that:

(a) One of the ropes which is selected as "first line ashore" must be of floating material to ensure quick securing to the shore.

(b) Wires should not exceed 5.5 in. circumference to facilitate handling.

(c) All vessels should have 2 fire ropes (wire) made fast, one forward and one aft, hung over the vessel's side ready for use in case of emergency.

Article 20: Mooring Boats

(1) Vessels transiting the Canal must have mooring boats as mentioned hereafter hired from the Suez Canal Mooring Company approved by the Suez Canal Authority.

In case no mooring boats from the said company are available, ship's boats if suitable for mooring (open type lifeboat) in the Canal can be used and must be manned by shore crew, hired from the Suez Canal Mooring Company. Each boat is to be manned by three men.

(2) One mooring boat or one motor boat for vessels under 2,500 tons gross, SCGT (SCGT = Suez Canal Gross Tonnage).

(3) One mooring boat for ships from 2,500 to 5,000 tons SCGT.

(4) Two motor boats or one motor boat and one mooring boat for vessels from 5,000 tons SCGT to 30,000 tons SCGT.

(5) Two motor boats for vessels over 30,000 tons SCGT.

(6) Ships may ask for additional motor boats or mooring boats according to Master's request. These mooring boats must be in constant readiness for lowering to run the ropes to the mooring posts without any delay during the transit of the vessel.

(7) Ships must be fitted with well maintained lifting appliances capable of lifting mooring boats of 4 tons weight (including crew members).

(8) Ships may carry extra mooring boats as passengers for the interest of navigation. However, LPG, LNG and Loaded Tankers are not allowed to carry any extra boats.

(9) The handling of mooring boats must be carried out well clear from the ship's propellers.

(10) Masters are requested to reduce speed during lifting or lowering operations of mooring boats. An officer must be in charge, to avoid accidents that may endanger the life of mooring men.

(11) If the vessel has no means for lifting mooring boats and ship's boats are not suitable for mooring (closed type lifeboat) in the Canal, the vessel shall not be allowed to transit the Canal.

Article 21: Spreaders (Slings)

Container ships are advised to have their own spreaders (slings) to assist unloading and reloading containers in case of necessity. Those carrying different sizes of containers must have their own spreaders.

Article 22: Indicators

There must be a rudder angle indicator and an engine RPM indicator in the wheelhouse so located and illuminated as to be easily visible by the Pilot (erroneous indicators are considered defective).

Article 23: Bow Anchors

1. Any transiting vessel must be equipped with 2 classed anchors forward of the collision bulkhead. Each anchor must be fitted with its own chain or wire cable, and be capable of being released, and raised independently by means of a windlass or capstan.
2. In lieu of 1, vessels of less than 1,000 SCGT must be equipped with one working anchor.

Article 24: Accommodation and Pilot Ladders

A. Pilot Ladder:

(1) In anchorage areas, outside the Canal, North or South, pilot ladders can be used to embark and disembark Pilots.

The ladder shall be secured in such position that each step rests firmly against the vessel's side and so that the Pilot can have safe access to the vessel. Whenever the distance from sea level to the point of access to the vessel is more than 12 ft. (or 3.65 m.), access from the pilot ladder to the vessel shall be by means of an accommodation ladder or other equally safe and convenient means.

(2) The treads of the pilot ladder shall not be less than 19 in. long, 4.5 in. wide and 1 in. in thickness. Steps shall be joined in such a manner as will provide a ladder of adequate strength with treads maintained in a horizontal position and not less than 12 in. or more than 15 in. apart.

(3) A man-rope properly secured, and a safety line shall be available and ready for use if required.

(4) Handholds are to be provided to assist the Pilot to pass safely and conveniently from the head of the ladder into the vessel or on to the vessel's deck and vice versa.

(5) If necessary, spreaders shall be provided at such distance as will prevent the ladder from twisting.

(6) Arrangements shall be such as:

(a) The rigging of the ladder, the embarkation and disembarkation of the Pilot is supervised by a responsible officer of the vessel.

(b) A self igniting life buoy is to be available at hand.

B. Accommodation Ladders

(1) Accommodation ladders are to be used in the Canal, harbours and lakes to embark and disembark Pilots.

(2) In case no accommodation ladder is available, or difficult to rig, the vessel has to inform S.C.A. before entering harbour or Canal. The change of Pilot which is originally carried out at Ismailia, will take place in the Bitter Lakes after anchoring. In such case, the vessel will be charged an extra U.S.$300.00 as pilotage dues for each relieving Pilot.

(3) Ships with freeboard of less than 10 ft. may use pilot ladder.

Article 25: Efficiency of Vessel's Equipment

(1) Before entering the Canal it must be ascertained that main engines, compasses, steering gear, engine room, telegraph, rudder angle and r.p.m. indicators, W/T, VHF and radar are in good working order.

(2) Every vessel navigating in the Suez Canal Waters under the advice of the Suez Canal Pilot, should maintain bridge and engine bell books.

(3) In the bridge bell book, each engine movement and the time of its transmission from the bridge to the engine room is to be recorded as well as in the engine room bell book.

(4) No vessel is required to maintain any bell books if equipped with an automatic device which produces a permanent legible record of every engine movement.

(5) The bell books and the automatic records must be handed, upon request, to the Suez Canal Officials for the purpose of investigation if necessary.

Article 26: Deck Cargo

(1) Deck cargo is to be stowed in a way so as to provide a clear view from the navigating bridge while transiting the Canal, as well as not to affect the vessel's stability.

(2) The deck cargo should not protrude more than half the vessel's breadth on any side, with a maximum of 15 m. on each side if breadth exceeds 30 m. (1) (2)

(3) If the protrusion exceeds the maximum allowed, each case is to be studied separately, and an additional due of 2% of the transit dues is levied on each foot or fraction of foot in excess.

Article 27: Water Ballast

Vessels in ballast must fill spaces intended to be used for carrying water ballast in such proportion as the Officials of the Suez Canal Authority may direct.

Article 28: Searchlight

Before transiting the Canal, the vessel should be provided with a searchlight (projector) complying with the following conditions and specifications.

(1) It should be placed on the bow in the axis of the vessel and show the Canal clearly.

(2) Specifications are as follows:

(a) Minimum range of radiation of single beam 1,800 m. ahead (brightness of 1 Lux approximately, at the atmospheric transmission factor T = 0.85).

(b) The power of the lamp must give a luminous intensity of single light beam not less than 3 million candela, which is equivalent to high efficiency incandescent lamp of:

(i) 2,000 Watts for vessels up to 30,000 S.C. gross tons.

(ii) 3,000 Watts for vessels over 30,000 S.C. gross tons.

(c) The drum and stand should be of high corrosion resisting material and can be operated both horizontally and vertically.

(d) The front glass must be of hardened type and can stand rapid cooling.

(e) The reflector must be in two halves of precise ground glass mirror of highest quality or of polished aluminium having at least 95% the reflective capacity of the glass mirror.

(f) The two halves of the reflector can be brought together (zero position) to make a single reflector light beam and can be parted to give two separate light beams each of 5° at least, on the horizontal level with adjustable dark sector from 0 to 10°.

(g) The searchlight drum must be watertight (presssure test 0.25 kg./sq.cm.) and gastight (according to the classification rules for the vessel's electric appliances within dangerous areas) and provided with a vent-out to which a flexible hose can be fitted on the drum to dissipate the heated air out of the searchlight in addition to a safety vent.

On vessels carrying petroleum products, LPG or LNG or inflammable substances, or vessels Not Gas Free, exit of hot air must be effectuated in a place devoid of inflammable gas.

(h) The searchlight must be equipped with 2 lamps carrier that can be turned into position to let the lamp exactly in the focus of the reflector, and the current must be switched on automatically.

(i) The electric system (switches, plug, socket and cables) must be of first class marine type. The degree of protection IP 55 or similar standards.

(j) The searchlights must have a certificate for the "Type Test" issued by one of the Classification Societies (Lloyd's Register, etc.). The original to be submitted to Suez Canal officials and thereby after test by S.C.A. inspection, the searchlight can be accepted.

(3) On all vessels of whatever type, electric cable installations for searchlight and all electrical connections leading to it must be permanently fixed, insulated and gastight.

At the end of the cables a fixed and gastight socket should be installed close to the searchlight.

(4) On board vessels electrically propelled or having electrically driven gear (steering, winches, etc.), the number of generators and their individual power output must be sufficient to ensure uninterrupted functioning of the searchlight in the event of stoppage of one of the generators.

No exception to this rule will be allowed except when there is an independent generator and circuit on board specifically set apart for the searchlight.

(5) The portable projector can be hired locally from the Canal Mooring and Light Company and weighs about 22 kg.

(6) For vessels fitted with their own projector, 2 shore electricians should operate it during the transit.

(7) Vessels with special cases:

(a) LPG and LNG vessels, without any exception, must be provided with their own searchlight.

(b) Vessels entering the Canal, direct from sea, must also be provided with their own searchlight.

(8) If electrical connections and/or searchlight do not conform, the vessel is liable to transit only in daylight and therefore subject to delay.

An additional due of U.S.$4,300 will be imposed when the searchlight and/or electrical connections do not conform for the 3rd and each following transit.

Article 29: Overhead Lights (Deck Lights)

Overhead lights visible all round the horizon with a minimum range of 200 m. (roughly 650 ft.).

Article 30: Bridge Wing Projectors

Bridge wing projectors on either side of the bridge must be fitted to show the Canal banks clearly during the transit and mooring operations, and must have the following characteristics:

Power about 4 LUX at an atmospheric transmission factor (T = 0.74) and minimum range 200 m.

Article 31: Funnels

Funnels must be lit to facilitate the identification of the vessel by night.

Article 32: Bridge and Engine Room Communications

Communication system between engine room and bridge must be in good working condition.

Article 33: Pumping – Draining Arrangements

The pumps and pumping arrangements including valves, pipes and strainers from holds as well as from the engine and boiler spaces must be in good working condition.

Article 34: Watertight Bulkheads and Doors

All watertight bulkheads and doors are required to be in good efficient condition.

Article 35: Draft Marks

All vessels shall have the draft plainly marked and painted upon the stem, amidships (including Plimsoll Mark and Deck Line) and stern post or rudder post, according to Load Line Convention.

Article 36: Whistles and/or Sirens

Whistles and sirens must be always ready for use, as prescribed in Part III, Art. 92.

Article 37: Fire Fighting Equipment on Vessels

(1) Vessels transiting the Canal should be equipped with the fire fighting equipment in accordance with the requirements of S.O.L.A.S. and its amendments. All equipment should be in a good and efficient condition.

(2) Fire hoses with suitable nozzles attached shall be connection to the outlets of fire lines at all times while in Canal waters. Sufficient hoses shall be connected to reach all parts of the vessel.

(3) When approaching Canal waters, as precautionary measures, all vessels must have fire wires hanging over the side ready for use fore and aft, before entering Canal waters.

Article 38: Side Doors

When side doors are used for boarding, and the minimum vertical distance between the waterline and the bottom of the side door is less than 6 ft., they should be closed immediately after embarking and disembarking of Pilot and during transit through the Canal.

Article 39: Manning Vessels

The crew of vessels intending to transit the Canal should have efficient and good knowledge of their vessel and be sufficient in number to permit safe handling of the vessel during transit.

Article 40: Deck Watch & Engine Room

When underway in Canal Waters the vessels shall keep a full watch on the bridge and in the engine room, as well as anchor watch.

Article 41: Special Arrangements for VLCCs

(See Article 58).

Article 42: Accommodation

(1) A suitable (Officer Class) accommodation is to be put at the Pilot's disposal while anchoring in the Bitter Lakes or made fast in mooring places alongside the Canal. In case of no suitable accommodation available, the vessel will pay extra dues of U.S.$.300.00 for each relieving Pilot. She may be delayed if no relieving Pilot is available.

(2) A sheltered place is to be provided for the mooring boatmen (3 to 6 men according to the size of the vessel) and 2 shore electricians for the projector, during transit.

Article 43: Vessels Carrying Timber

(1) The timber deck cargo shall be compactly stowed, lashed and secured in a way that it shall not hinder navigation and allow safe access on deck.

(2) The loading must not exceed the Tropical Timber Load Line (LT). The height of the deck cargo above the weather deck shall not exceed one third of the extreme breadth of the vessel.

Article 44: Life Saving Appliances

Life saving appliances for vessels navigating in the Canal Waters should meet with the requirements of SOLAS and amendments.

Article 45: Anchor Watch

An anchor watch is to be established during bad weather or poor visibility and when advised by the Pilot.

Article 46: Stoppage in Canal

When anchored in the Bitter Lakes, Lake Timsah or stopped in the Canal, the engines should always be ready for use.

---

(1) Containers on container ships are not considered as deck cargo.

(2) Specially built vessels and barges carrying drillers or bulky deck cargo to be studied each separately.

Note: In case of failure to comply with any of the previous requirements, a vessel may be delayed from joining the convoy and/or may be subject to special arrangements for her transit. This includes imposing convoying tug boats. Access to the Canal may also be refused.

SECTION III: Interdiction to Enter Canal

Article 47: Vessel not allowed to Transit

A vessel will not be allowed to transit the Canal in any of the following cases:

A. Any vessel whose Tropical Load Line is submerged, or Plimsoll Marks not plainly visible (Overloaded).

B. Any vessel considered by the Suez Canal Officials, dangerous for navigation.

C. If carrying dangerous cargo and not conforming to the Part V of these Rules or carrying prohibited cargoes.

D. If having a list more than 3 degrees.

E. If trimmed in a way causing bad manoeuvrability.

F. If having deck loads protruding from vessel's sides in a manner endangering the safety of transit (see Article 26).

G. If the vessel is so tender or loaded in a manner that dangerously affects her stability.

H. If her draft is in excess of the maximum permitted according to these Rules.

I. For VLCCs and ULCCs, if there is bad weather.

J. The Suez Canal Authority may consider delaying the entry to the Canal in cases of bad weather.

K. Any vessel without anchors.

Article 47 Bis:

(1) The Suez Canal Authority reserves the right to refuse access to Canal Waters to any vessel in case of carrying prohibited cargoes, and in case of non or erroneous declaration of the presence of dangerous cargo on board, such as ammunition, explosives, radioactive substances, etc.

(2) If the dangerous cargo mentioned in para (1) is discovered during the transit, the Suez Canal Authority reserves the right to refuse access to Canal Waters to this vessel for a period not exceeding two years. An additional due of U.S.$43,000 will be imposed for this violation.

SECTION IV: Proceeding to the Canal

Article 48: General

(1) Masters shall ask for Pilots by clearly displaying "G" flag by day and 3 white lights at night, at least two hours before the time they expect their vessel to be ready to get underway.

(2) Singling Up should not be before the Pilot is on board.

(3) When several vessels are ready to get underway at the same time, the order of their sailing will be fixed by the Canal Authority.

(4) All vessels must stop whenever the passage ahead is not clear.

(5) They must slow down passing collapsed or under repair banks, as well as when passing all vessels in sidings, hoppers, dredgers and other floating plants made fast.

(6) As soon as a vessel is made fast, she must hoist the signals pendant No. 2 by day and red light aft at night. The vessel must be ready to slack down ropes or cut them if need be. Engines must always be ready for manoeuvring.

CHAPTER III: CONVOY SYSTEM – Maximum Dimensions, Towage and Escorting

SECTION I: Convoy System

Article 49: Formation of Convoys

A 3 convoy system is applied in the Suez Canal.

(A) ***Northbound Convoy***

(1) Starts at 0600 hrs. at Km. 160 and consists of 2 groups of vessels (a third group may enter Canal from 0300 hrs. to 0430 hrs. according to traffic situation).

(a) *Group A*

(i) Navy ships, 4th Generation Container Ships, 3rd Generation Container Ships over 40,000 SCGT and similar, LASH vessels over 35,000 SCGT, LPG and LNG (Loaded or not gas free) and loaded chemical carriers (See Article 54).

(ii) Loaded VLCCs, conventional loaded tankers and heavy bulk carriers, (draft over 38 ft. or length over 950 ft. B.P.).

(b) *Group B*

Cargo and other vessels anchored in Suez Anchorages.

(2) The Northbound convoy has a free run from Port of Suez till Port Said. It passes through the East Kabrit Channel, the Eastern Dredged Channel in the Bitter Lakes, the Deversoir East Channel, the East Channel of Lake Timsah, the East Channel of Ballah Loop and the East Channel from Km. 17 Northward.

(3) In case the Northbound convoy has to stop in the Bitter Lakes due to traffic situation of Southbound convoy or any emergency, the following must be considered:

(a) Container vessels heading the convoy will drop anchor in the suitable East Anchorage Areas of the Bitter Lakes.

(b) VLCCs will anchor in the suitable East Anchorage according to their draft.

(c) All other vessels will anchor in the East Area corresponding to their draft.

(d) 3 berths are available in Kabrit East Branch, in case of emergency.

Note: For safety measures, LPG and LNG vessels in ballast or loaded, and loaded chemicals in bulk are included in the Tankers group.

(B) ***Southbound Convoy (N1)***

(1) Starts from 0000 hrs. to 0500 hrs. and consists of 3 groups of vessels:

(a) Group A: Vessels in Port Said Harbour.

(b) Group B: Vessels anchored in the Northern Anchorage Area consisting of 4th Generation Container Ships, 3rd Generation Container Ships, VLCCs in ballast, vessels over 42 ft. draft, LPG, LNG and not gas free vessels (LPG, LNG and vessels not gas free may join Group A) in ballast or loaded and LASH over 35,000 SCGT. This group will be headed by the Container Ships and the first vessel will enter through Port Said East Approach Channel in due time to join Group A at Km. 17.

(c) Group C: Vessels anchored in Southern Anchorage Area will enter through Port Said West Channel in due time to join Group B at Km. 17.

(2) This convoy has a free run to the Bitter Lakes, passes through the East Branch of Ballah By-Pass, the East Channel of Lake Timsah, the Deversoir West Channel (except for vessels with draft of more than 42 ft. will pass through East Channel), and anchors in the Western Anchorages in Bitter Lakes.

(3) The sequence of continued route from the Bitter Lakes will be warships, LPG, LNG vessels, the 4th Generation Container Ships and 3rd Generation Container Ships over 35,000 SCGT followed by VLCCs in ballast and then other vessels. The first ship of the Southbound convoy will regulate speed to cross the last Northbound vessel abeam of Kabrit Station.

(C) ***Southbound Second Convoy (N2)***

(1) Starts from 0630 hrs. to 0900 hrs. The forming and depth of this convoy is subject to situation of traffic and limit time.

(2) 3rd and 4th Generation Container Ships with more than one propeller astern shall be ahead of this convoy to anchor at Timsah Lake (maximum two vessels).

(3) Vessels will make fast in Ballah West Branch (Maximum capacity 15 vessels according to the number of berths at Ballah Loop), and continue route after the last Northbound vessel clears Km. 61.

(4) Dimensions of vessels that can make fast at Ballah West Branch should not exceed those indicated in the following table, excluding tankers over 90,000 SCGT (Subject to alteration according to Canal Developing Projects).

Beam			Draft	
(ft.)	(m.)	(cm.)	(ft.)	(in.)
135	41	15	42	–
136	41	45	41	8
137	41	76	41	5
138	42	06	41	1
139	42	37	40	9
140	42	67	40	6
141	42	98	40	3
142	43	28	39	11
143	43	59	39	8
144	43	89	39	5
145	44	20	39	1
146	44	50	38	10
147	44	80	38	7
148	45	11	38	4

(5) Vessels not allowed to join this convoy are the following:

(a) Loaded Tankers (or Bulk Carriers) carrying Petroleum Grade A or similar substances (flash point below 23°C or 73°F, ascertained by an open test or of any equal degree of accuracy).

(b) Liquified inflammable gas vessels (LPG, LNG, or similar loaded or ballasted not gas free vessels).

(c) Vessels not fitted with double bottoms carrying chemicals in bulk.

(d) Vessels carrying uncontainerised radioactive substance Group 1.

(e) Vessels carrying dangerous waste.

(f) Heavy lifters (semi-submersible) carrying heavy lift units with tonnage exceeding the lifting capacity of their individual cranes.

(g) Vessels carrying deck cargo protruding more than what is stated in Article 26 of these Rules.

(h) Vessels over 90,000 SCGT.

(i) Navy ships.

Article 50: Limit Time of Arrival to Join Convoys (Summertime may be kept)

(A) ***Southbound Convoy***

(1) 4th Generation Container Ships, 3rd Generation Container Ships, VLCCs in ballast and loaded vessels over 42 ft. draft who will anchor in the New Anchorage Area (V berths) N.W. of Port Said and declared by Agents ready for transit, have to reach the Anchorage Area within the limit time of 1900 hrs. (Ships arriving from 1900 hrs. to 2100 hrs. may join the first Southbound Convoy (N1) against an additional charge of 5% of transit dues. Ships arriving after 2100 hrs. until 2200 hrs. can also join the first Southbound Convoy (N1) against an additional charge of 10% of transit tolls).

(2) Other ships entering from Port Said harbour have to reach the Anchorage Area (C Berths) within the limit time of 1900 hrs.

(3) Ships arriving after the limit time of 1900 hrs. and not later than 0300 hrs. (Ships arriving from 0300 hrs. to 0400 hrs. may join the second Southbound Convoy (N2) against an additional charge of 5% of transit dues. Ships arriving after 0400 hrs. until 0500 hrs. can join the second Southbound Convoy (N2) against an additional charge of 10% of transit tolls), will join the second Southbound Convoy either from Port or direct from sea and be declared by Agents ready for transit, providing the capacity of the Canal permits (See Article 49 (C)).

(B) ***Northbound Convoy***

(1) Ships anchoring South of Conry Rock: 4th Generation Container Ships, 3rd Generation Container Ships, VLCCs, super tankers, heavy bulk carriers, LASH vessels over 35,000 S.C.G.T., LPG and LNG (Loaded or not gas free) and vessels over 38 ft. draft, have to reach the Anchorage Area (V Berths) and be declared by Agents ready for transit within the limit time of 0100 hrs. (Ships arriving from 0100 hrs. to 0300 hrs. may join Tanker Group against additional charge of 5% of transit dues. Ships arriving after 0300 hrs. but before 0330 hrs. can also join Tanker Group against additional charge of 10% of transit dues).

(2) Other vessels who will anchor North of Conry Rock have to reach the Waiting Area and be declared by Agents ready for transit within limit time of 0300 hrs. (Ships entitled to join the ordinary group, can arrive after 0300 hrs. up until 0330 hrs. against an additional charge of 5% of transit dues).

(C) In all cases, the documents required should be produced before the passage of the vessel to the Canal Office at Port Said or Port of Suez.

Suez Canal Authority, Circular No. 13/95: Issued by the Director of Transit.

Circular No. 3/94 is to be cancelled and replaced by the following:

In favourable navigational conditions, the limit time for arrivals from North and South is to be extended as shown below:

(1) First Southbound Convoy:

(a) Vessels arriving between 1900 hrs. and 2100 hrs. can join the first Southbound Convoy against the payment of a surcharge equal to 3% of the normal transit dues, with a maximum of SDR 7,000.

(b) Vessels arriving after 2100 hrs. and up to 2200 hrs. can join the first Southbound Convoy against the payment of a surcharge equal to 5% of the normal transit dues, with a maximum of SDR 10,500.

(2) Second Southbound Convoy:

(a) Vessels arriving between 0300 hrs. and 0400 hrs. can join the Second Southbound Convoy against the payment of a surcharge equal to 3% of the normal transit dues, with a maximum of SDR 7,000.

(b) Vessels arriving after 0400 hrs. and up to 0500 hrs. can still join the Second Southbound Convoy against the payment of a surcharge equal to 5% of the normal transit dues, with a maximum of SDR 10,500.

(3) Northbound Convoy:

1. Ships that are allowed to join the tanker group:
   (a) When arriving between 0100 hrs. and 0300 hrs. such ships can join the tanker group against the payment of a surcharge equal to 3% of the normal transit dues, with a maximum of SDR 7,000.
   (b) When arriving after 0300 hrs. and up to 0330 hrs. such ships can still join the tanker group against the payment of a surcharge equal to 5% of the normal transit dues, with a maximum of SDR 10,500.
2. Ships that are allowed to join the ordinary group can do so when arriving after 0300 hrs. and up to 0330 hrs. against the payment of a surcharge equal to 3% of the normal transit dues, with a maximum of SDR 7,000.

This Circular takes effect as of 1st January 1996.

Article 51: Courses to Keep on Leaving for Sea

(A) ***At Port Said***

Vessels of Northbound convoy have to maintain course through the East Approach Channel till Hm. 195 then alter course North (000°) for five miles before altering to destination.

(B) ***At Port of Suez***

Vessels proceeding to sea have to maintain course through the channel till the last pair of buoys, then keep the Separation Zone on the port side till the Separation Zone Buoy No. 1.

SECTION II: Maximum Dimensions (Vessel's Sizes and Drafts)

Article 52: Dimensions of Vessels Authorised to Transit

These dimensions are given hereunder: (For drilling and towed units – See Appendix).

(a) *Max. length:* No restrictions.

(b) *Max. beam:* 245 ft.

Note: (1) Vessels with beam over 210 ft. are allowed to transit in calm weather, i.e. beam wind not exceeding 10 knots.

(2) Vessels with beam over 245 ft. may transit Canal under special request.

(c) *Max. draft:* Tables I and II give the maximum draft authorised in relation to the beam of vessel according to the following:

(i) *Table "I":* For vessels in ballast transiting in either direction.

(ii) *Table "II":* For loaded vessels transiting in either direction.

See Tables below and on Page 675.

Article 53: Conditions of Transit

(1) The maximum draft for loaded vessels is according to Table II (must not exceed the Tropical Load Line). For vessels without Tropical Load Line indicated in the Load Line Certificate, the maximum draft allowed will be the Summer Load Line.

(2) Vessels allowed to transit at a draft of over 50 ft. up to 56 ft. must, for the first passage, effectuate a successful sea trial before entering the Canal either at Suez or Port Said Roads.

(3) Sisterships are not to get benefit of authorisation granted to a particular ship of the group.

(4) For safety measures, LPG, LNG in ballast or loaded, and loaded dangerous chemicals in bulk are included in the Tanker Group and they are placed ahead of the loaded tankers.

Article 54: Speed

Station	*Tanker's Group*	*Other Vessels*
Port Tewfik – Genefa, head current	11 km./hr.	13 km./hr.
Port Tewfik – Genefa, stern current	14 km./hr.	15 km./hr.
Genefa – Kabret	14 km./hr.	15 km./hr.
Kabret – Deversoir	15 km./hr.	16 km./hr.
Deversoir – Port Said	14 km./hr.	15 km./hr.

Table I

Draft for Vessels in Ballast Transiting North or Southbound (See "Notes")

Beam	*Maximum Draft* Forward	*Maximum Draft* Aft
Up to 245 ft. (74.67 m.)	32 ft. (9.75 m.)	36 ft. (11.00 m.)
Over 210 ft. (Over 64.0 m.)		

Notes: (1) Vessels of a beam over 210 ft. transit the Canal in a beam wind not exceeding 10 knots.

(2) Vessels of a beam over 245 ft. may be allowed to transit the Canal under special request.

Table II

Beam and Draft

Loaded Vessels (Southbound/Northbound):

Beam ft.	*Beam* in.	*Beam* m.	*Beam* cm.	*Draft* ft.	*Draft* in.	*Beam* ft.	*Beam* in.	*Beam* m.	*Beam* cm.	*Draft* ft.	*Draft* in.

SECTION III: Towage and Escorting

Article 55: Canal Authority Tugs

(l) At Port Said Harbour, tugs may be placed at the disposal of Masters if the Canal Authority deems it necessary. No charge is made for the assistance given by these tugs to transiting vessels for mooring and getting underway. In all other cases, a charge is levied by the Suez Canal Authority.

Vessels manoeuvring in the harbour are required to provide their own ropes. Wire tow-ropes are prohibited (Wire tow-ropes should not be confused with the fire-wire ropes made fast onboard and fitted with an eye splice or connecting shackle hanging over the side as required (See Article 19).

(2) In other cases, tugs can be hired for mooring, towing or getting a vessel afloat. Charges paid by the vessel will be according to rates set by Suez Canal Authority.

(3) In accordance with the terms of Article 57 of the present Chapter, the Officials of the Canal Authority may impose on certain defective vessels, or vessels carrying dangerous cargo, a tug or more for towing or escorting during transit of the Canal.

In such cases, charges are paid according to rates set by Suez Canal Authority.

(4) The Master of a vessel using a tug placed at his disposal has the exclusive direction and control of the manoeuvres of both the vessel and the tug.

(5) Whatever may be the conditions or circumstances under which the Canal Authority tugs are made use of by a vessel, the Master of the vessel is responsible for any damage or accidents whatsoever resulting directly or indirectly from the use of the said tugs, including damage which may occur to the tugs themselves, and to equipment.

Article 56: Use of Private Tugs

(1) In case the SCA tugs are not available, shipping companies will be allowed to tow their "towed units" by tugs to be provided by them. Such tugs must be approved by the Suez Canal Authority, prior to transit.

(2) Apart from the special towage dues, tugs belonging to private owners are subject to the strict observance of all the parts of the rules relative to vessels manoeuvring, in transit or berthing.

(3) Towing arrangement must be supervised and approved by the Suez Canal Authority personnel.

Article 57: Cases of Imposed Tugs

Chargeable tugs shall be imposed during Canal transit, at the tariff hire rate, in the following cases:

(1) The Canal Authority may require any vessel to take a tug or tugs through the Canal, when in its judgement such action is necessary to ensure safety to the vessel or to the Canal.

(2) Any vessel without mechanical power, or the machinery of which is (or becomes) disabled, or steers badly, or which is liable to become unmanageable for any reason, shall be towed through the Canal.

(3) Vessels having engine or steering gear trouble for the second time during the same passage.

(4) Bad view vessels owing to deck cargo, containers, cranes or constructions impeding the view from the wheelhouse and wings.

(5) (a) Vessels unable to use one or both of their bow anchors (ref Art. 23).

(b) Vessels over 1,000 SCGT, built with one anchor.

(c) Vessels over 1,000 SCGT, built with more than one anchor, one of them on the bow.

(6) Drilling vessels.

(7) Vessels with two engines on one propeller of which one is out of order for any reason and cannot maintain speed of 10 knots at least without current after sea trial to assure the speed and valid Sea Worthiness Certificate.

(8) Vessels with two engines on two propellers of which one is out of order.

(9) On Master's request for one tug or more.

Article 58: Escorting

The escort of VLCCs, ULCCs, LPG, LNG, large bulk carriers and other vessels (See "Notes") will be as follows:

Notes: (a) Loaded heavy lift ships are to be escorted by one or more tugs according to decision of S.C.A. after survey.

(b) Integrated units are escorted by one tug on their first transit.

(1) Loaded vessels under 130,000 d.w.t. will be escorted by 1 tug if for technical reasons the Suez Canal Authority finds it necessary, or when the vessel's draft exceeds 47 ft.

(2) Loaded vessels from 130,000 d.w.t. to 170,000 d.w.t. will be escorted by one tug.

(3) Loaded vessels over 170,000 d.w.t. will be escorted by 2 tugs.

(4) Vessels in ballast over 250,000 d.w.t. will be escorted by one tug.

(5) LPG and LNG vessels over 25,000 S.C.G.T. (except gas free)(1) will be escorted by one tug(2).

(1) (a) LPG, LNG vessels contain (tank on deck) completely separated from cargo tank with maximum tonnage of 180 tons will be considered gas free;

(b) Gas free carriers are to be treated as tankers in ballast;

(2) Masters are kindly requested to maintain safety intervals, subject not to be less than 20 minutes, not more than 25 minutes for such vessels.

(6) Vessels in ballast with beam over 218 ft. up to 233 ft. will be escorted by one tug.

(7) Vessels in ballast with beam over 233 ft. will be escorted by two tugs.

(8) Towed scrapped vessels in ballast 150,000 d.w.t. and over will be escorted by one tug.

Note (1): Reference to Article 57 and Article 58:

(1) Any vessel escorted by one tug and the situation requires another imposed tug, same tug is considered imposed needless for a second tug.

(2) Any vessel escorted by 2 tugs and the situation requires a third imposed tug, one of the 2 escorting tugs will be for escort and the second is imposed needless for a third tug.

Note (2): The prementioned vessels in Article 57 and Article 58 have to prepare 2 polypropylene ropes 16 in. circumference (For vessels under 100,000 d.w.t., if their draft is over 47 ft.) to join the stern to the tug during stopping operations.

The ropes should be eye spliced to fit in the quick release hook on the tug and with adequate length to give distance between fore of the tug and stern of vessel at about 50 m.

On the vessels, these ropes will be made fast on stern bitts port and starboard. The eyes will be hanging over the stern about 2 m. above water and lashed with rope stoppers to break loose when necessary.

Responsibility in cases mentioned above: Either imposed or escorted tug, the Master is responsible for any damage that may happen to Suez Canal tugs, directly or indirectly during the voyage, whatever the reasons of the damage may be.

CHAPTER IV: ACCIDENTS AND SAFETY PRECAUTIONS AGAINST FIRE AND POLLUTION

Article 59: Accidents

(1) Whenever a vessel underway is accidently stopped, she must, if other vessels are following, attract their attention by giving 5 or 6 short blasts on the whistle or siren. This signal is to be repeated at short intervals. It means "I am reducing speed and may have to stop and make fast".

Vessels stopped accidentally at night, must in addition, immediately replace their white light astern with a red light.

(2) In case of grounding, the Master must immediately hoist the following:

	By Day	*By Night*
Passage clear for tugs	Black Ball Pendant No. 2	Red Light
Passage not clear for tugs	Black Ball; Pendant No. 2; International Code Flag "N".	2 Red Lights.

The Master must also send also a radio message stating whether a tug is required or not, whether or not passage is clear for the tug and whether lightening is necessary, etc.

(3) When a vessel runs aground, the Canal Authority Officials are alone empowered to order and direct all operations required to get the vessel afloat and if necessary, have her unloaded and towed. Neverthless, Masters remain responsible for all damages or accidents of any kind which may be the direct or indirect consequence of the grounding.

(4) All attempts on the part of other vessels to refloat a vessel aground are strictly prohibited.

(5) When a vessel stops in the Canal itself in consequence of an accident other than a collision, engine, auxiliary and steering gear troubles, the Canal Authority, in order to clear the way with all possible speed, and to get her underway, will assist with the necessary tugs to refloat her, free of charge.

(6) If, once afloat, and the Canal Officials find it necessary to tow or escort the vessel by one tug or more, she must from that moment, pay towage charges as set down by Suez Canal Authority, moreover, it is understood that the vessel bears all expenses necessary for repairs of any damage or breakdown which might interfere with her getting underway, regardless of the time when such damage or breakdown takes place.

(7) When a vessel grounds or stops outside the Canal itself or if the grounding or stoppage is due to a collision, all charges for getting the vessel afloat, towing, unloading, etc., are payable by the vessel and must be settled as per statement drawn up by the Canal Authority before the vessel leaves Port Said or Port of Suez.

(8) Whenever a collision appears probable, vessels must not hesitate to run aground should this be necessary to avoid it.

(9) When a vessel or floating structure of any description runs aground or strands or sinks or is left abandoned, either in the Canal itself or in one of its ports, Waiting or Anchorage Areas, and the Canal Authority deems it an obstruction or a menace to navigation in Canal Waters, the Authority has the right to take of its own accord such action as may be necessary for the purpose of removing or destroying the vessel or floating structure by whatever means the Canal Authority may select and at the risk and expense of the Owner of, or the person responsible for the vessel or the floating structure. The Suez Canal Authority has – in this case – the right to sell the vessel or the floating structure or the wreck salvaged or all of them together in public auctions with a view to covering all kinds of expenses.

Article 60: Leaks

(1) In the case of leaks, when the ship in approaching channel, sea waiting area and harbour, the Master must inform the Harbour Office at once.

(2) When in Canal or anchored in lakes, he must inform immediately the Movement Office. He must at the same time make the appropriate International Signal and call attention by sounding a prolonged blast on the whistle or siren; and take all necessary measures to stop the leakage and ensure the safety of the vessel and environment.

(3) The Suez Canal Authority Officials whose decision shall be final, may order any action deemed necessary in the best interest of all concerned; change of berth or mooring, beaching, taking the vessel out to sea.

(4) The Master, the Owners and/or operators of the vessel is nevertheless responsible for all damages or accidents arising directly or indirectly from the salvage operations.

(5) The Master, the Owner and/or operators of vessel shall be liable to indemnify any damage that may occur from pollution directly or indirectly to the environment and shall pay all expenses incurred for its removal, cleaning costs and all costs and compensation for any damage to the environment.

Article 61: Fire Fighting

(1) Vessels transiting the Canal should be equipped with the fire fighting equipment in accordance with the requirements of SOLAS. All equipment should be in a good and efficient condition.

(2) Fire hoses with suitable nozzles attached shall be connected to the outlets of fire lines at all times while in Canal Waters. Sufficient hoses shall be connected to reach all parts of the vessel.

(3) Approaching Canal Waters, as precautionary measures, all vessels must have a fire wire hanging over the side ready for use fore and aft, before entering Canal Waters.

Article 62: Fire Onboard

(1) In case of fire onboard, when in harbour, the Master must inform the Harbour Office at once.

(2) When underway or in the Canal or anchored in Lakes or made fast in Canal, he must inform the Movement Office.

He must at the same time make the appropriate International Signal and call attention by sounding a prolonged blast on the whistle or siren. Also, he must make ready to get underway if required to do so.

(3) Neighbouring vessels must in such cases also be ready to change berth.

(4) Masters are responsible for the use onboard their vessels of fire fighting appliances and installations and for the stability and safety of their vessel.

(5) The Suez Canal Officials will co-operate with the Master for the purpose of directing the fire fighting operations.

(6) If in the opinion of the Canal Authority Officials, whose decision shall be final – there is a risk of fire spreading, they may order any action deemed necessary in the best interest of all concerned (change of mooring, beaching, taking vessel out to sea); it is understood that Masters are nevertheless responsible for all damage or accidents arising directly or indirectly from outbreaks of fire or salvage operations.

Article 63: Fuelling

(1) A vessel at fuel berth, or while being supplied by fuel in Waiting Areas, shall at all times be ready for immediate fire fighting. She shall keep up steam and be ready to move on short notice.

(2) The Master, the owners and/or operators of the vessel shall be liable to indemnify any damage that may occur from pollution during fuelling operations.

Article 64: Pollution

(A) Discharge of Substances Polluting Waters

Vessels must not discharge or throw into the Canal Waters any polluted water ballast, heavy slops, engine or fire room polluted bilge water, oil or any other substances that will cause pollution.

The Egyptian Environmental Protection Act No. 4, 1994, prohibits the discharge of any polluting substances into waters. The Provisions of this Act will apply for any discharge of polluting substances.

(B) Oil Pollution Notification

Whenever a vessel observes an *oil slick* or oil mixture discharge in the sea waiting areas, approach channels, Port Said Harbour, Canal Waters and anchorage areas in the lakes, she must at once inform the Suez Canal Authority with the following information if possible.

(1) The time of observation.
(2) The location and place and area covered by the slick.
(3) The directions of movement of the slick.
(4) The approximate oil thickness, if possible.
(5) If known, the name of vessel causing the slick.
(6) The meteorological and oceanagraphic conditions, if possible.
(7) Any other information.

CHAPTER V: Prohibitions, Defects and Charges

General

When a vessel is in Canal Waters, either in anchorage areas or ports or during transit, the following is prohibited:

Article 65: Use of Anchors, Thrusters, Gyropilot, Whistle or Siren

(1) Masters must avoid anchoring and using the thrusters in the Canal, except in case of absolute necessity.

(2) The use of Gyropilot (automatic steering) in the Canal is absolutely forbidden.

(3) Vessel unable to use both anchors is prohibited to transit Canal on her own power. She may transit as a towed unit after survey (See "Appendix").

(4) The sounding of a whistle or siren is prohibited, except for giving any authorised or required signal, as mentioned in Part III, Article 92.

Article 66: Firing Shots

(1) Firing shots is not allowed.

(2) An additional due of U.S.$300.00 will be imposed for violation of this rule.

Article 67: Picking up Objects from Water

(1) Whenever any object or merchandise whatsoever falls overboard, it must be immediately reported to the Canal Authority. If it is considered that the picking up cannot be effected by the vessel without impeding transit, the Canal Authority will proceed to carry it out, at the expense of the vessel.

(2) An additional due of U.S.$300.00 will be imposed for violation of this rule.

Article 68: Riveting, Welding etc.

(1) Riveting, welding, burning, metal cutting or similar operations requiring the use of heat, are not allowed unless authorised by the Suez Canal Authority.

(2) An additional due of U.S.$750.00 will be imposed for violation of this rule.

Article 69: Pollution

(1) See Article 64.

(2) In case of leakage of any polluting material from a vessel, due to any reason, the Master, the Owners and/or Operators of the vessel shall be liable to indemnify any damage that may occur from the pollution directly or indirectly to the environment and shall pay all expenses incurred for its removal and all compensations. Moreover, she shall pay for all claims regarding cleaning costs and all environmental economic losses caused by the pollution.

Article 70: Direct Lights

Under no circumstances shall the rays of any blinding lights be directed to the bridge or any other direction which would interfere with the safe navigation of other vessels.

Article 71: Embarking and Disembarking of Persons

(1) Unless authorised by the Canal Authority or Port Officials, no person shall embark or disembark from a vessel while passing through the Canal or in Ballah, Timsah Lake or the Bitter Lakes.

(2) An additional due of U.S.$300.00 will be imposed for violation of this rule.

Article 72: Boats, other than the Canal Authority's own

Not allowed to come alongside vessels underway or manoeuvring except the following at their own risk.

(1) Quarantine and police boats.

(2) Mooring boats.

(3) The ship's Agent's boats.

Article 73: Vessel Overtaking Another

(1) Vessels proceeding in the same direction are not allowed to overtake one another while underway in the Canal Waters and ports unless authorised by the Suez Canal Control Office.

(2) An additional due of U.S.$750.00 will be imposed for violation of this rule.

Article 74: Boat Drills

(1) No boat drills are allowed except after authorisation.

(2) An additional due of U.S.$300.00 will be imposed for violation of this rule.

Article 75: Venting(1)

(Tank openings to be closed through the whole transit).

(1) Venting of toxic and explosive gases is prohibited in Canal Waters.

(2) An additional due of U.S.$ 20,000 will be imposed for violation of this rule.

(1) All tank opening should be closed through the whole transit.

Article 76: Long Stay

Unless due to conditions of traffic or incidents in the Canal, transiting vessels should not remain more than 24 hours in Port Said berths, anchorages in Port Said and Port of Suez roads, Timsah Lake or Bitter Lakes.

Article 77: Vessels Having Damaged Container With Dangerous Cargo

If upon arrival of a vessel in waiting areas or port or while transiting the Canal, it is found that a container of dangerous cargo has been damaged or is leaking, the Master of the vessel has to notify the Suez Canal Port Authority at once. In cases of dangerous situations, the vessel may be ordered to leave the port or waiting area for sea.

Article 78: Declaration of State of Navigability

The Master shall hand in duly filled and signed, the declaration of State of Navigability. The form will be handed to him by the pilot on his arrival on board.

DECLARATION FORM

I, the undersigned, Master of the...

(1) Certify that my ship satisfies the conditions laid down in Part I, Articles 18 and 45 of the Navigation Regulations and that, in particular, the engines and the steering gear are in good working order.

(2) Declare that my ship has, at the present time, the following defects in engines or steering gear.........

(3) I declare, also that the wireless installations of my ship permit to transmit on the frequencies hereafter, in kHz:

Telegraphy..............kHz. Telephony..............kHz.

(4) I state also that my ship is/is not fitted with a rudder angle indicator and engine r.p.m. indicator on the bridge in such a position that the Pilot may read both without having to move away from his station and that the rudder angle indicator/engine r.p.m. indicator* is/are in good working condition.

I undertake to bring to the notice of the Suez Canal Authority, before my ship enters the Canal, any defects, not specified above, which may appear.

Made at Port..................., the......................

Signature......................

* Delete where inapplicable.

APPENDIX:

SPECIAL CASES

Transit of:

A. Drilling Rigs.
B. Heavy Lift Ships carrying Drillers, floating units or large units.
C. Vessels carrying Floating Units.
D. Navy Ships.
E. Integrated Units.
F. Towed Units.
G. Special Requests.

A. Drilling Rigs "They consist of":

(1) *Drilling vessels:* To be convoyed by a Suez Canal tug.

(2) *Drilling rigs:*

(a) Self-steering or non self-steering.

(b) *Legs that can be lifted:* No extensions under the rig's keel. To be assisted by Suez Canal tugs:
One aft and another – or more – as escort. In addition, a powerful tug forward to maintain a minimum speed of 12 km./hr.over the ground. The rigs must be in stable condition.

(c) *Legs that cannot be lifted* and a part remains under the rig's keel:
Each case is to be studied separately to decide whether or not the unit is allowed to transit the Canal.

B. Heavy Lift Ships carrying Drillers, Floating Units or large Units(1), are submitted to the following conditions:

(1) Be able if needed, to reduce, easily and safely, the draft by 1.0 m. (3 ft. 03 in.) by way of discharging clean ballast water.

(2) Be escorted by one or more tugs according to the decision of the Suez Canal Representatives, after survey on arrival (6,600 SDR, per tug).

(3) The following additional dues are levied to cover special precautionary measures for the safety of navigation and vessels:

(a) 125% of the transit dues and in addition,

(b) 2% of the transit dues, for each foot, or fraction of a foot in excess of the maximum breadth prescribed by Article 26.

(1) "Large Units" refer to any one block unit of 250 metric tonnes or more carried by heavy lift ships whether individually or as part of the whole cargo.

C. Self Steering Vessels carrying Floating Units(1):

(1) Vessels carrying onboard floating units must within an adequate period, before vessels transit introduce the following documents of their floating units:

(a) S.C.T. Certificate and calculation sheets.

(b) Recommended plans.

(c) A detailed statement of the floating units loaded onboard.

(d) Cargo weight statement specifying its location on board and the way of its loading as per cargo manifest.

(2) In case of absence of the prementioned documents in Para. (1), the gross tonnage will be calculated according to Linear dimensions, length, beam and depth.

(3) Self steering vessels carrying onboard floating units of 300 tons or more S.C.G.T. are subject to the following additional dues:

(a) 300% of transit dues of the floating units S.C.G.T.

(b) 2% of transit dues for each foot or fraction of a foot in excess of the maximum breadth authorised by Article 26.

(4) Such vessels will be able to join the 2nd Southbound Convoy if their dimensions allow.

(1) Valid Lashing Certificate is required.

D. Navy Ships:

Navy and auxiliary ships belonging to different countries, an addition of 25% of transit dues is to be added owing to special arrangements.

E. Integrated Units:

Integrated units may transit Suez Canal and berth in its harbours on the following conditions:

(1) A valid Seaworthiness Certificate issued by one of the I.A.C.S. recognised by the Suez Canal Authority.

(2) Additional dues of 25% of the transit dues will be charged.

(3) Vessels to be escorted by a Suez Canal tug, on the first transit (experimental) against 6,600 SDR.

(4) If unable to maintain convoy's speed, additional dues for slow speed vessels are applied.

(5) If the integrated tug is disconnected and the unit towed by normal tugs, this unit will be considered as towed vessel and dues for towed vessels will be applied.

(6) *In Harbours:* Berthing, loading and discharging operations are possible, after getting Harbour Authority authorisation.

F. Towed Units:

(1) All enquiries concerning the possibility and/or approval of transit of towed units, drilling rigs, dredgers, etc., are to be submitted by the owners of the units or their officially recognised representatives in Egypt or one of the Suez Shipping Agency Companies accompanied by a General Arrangement Plan and all particulars of the unit: Name, LOA, beam, draft, height, self-steering, etc. The application must reach Suez Canal Authority (Transit Department, Ismailia, Egypt) not less than 2 weeks before the sailing of the unit from its base.

(2) Towed units are not allowed to transit the Suez Canal, unless they are towed by a tug suitable to the size of the unit, and powerful enough to maintain a speed in the Canal not less than 12 km./hr. over the ground, in addition to the assisting Suez Canal tugs, whenever found necessary by Suez Canal Officials.

(3) Any towed unit must be supplied with floating mooring ropes in good condition, and suitable in number (more than six) and size according to the dimensions of the unit.

(4) A responsible person and a crew of at least 10 persons must be on board the unit during the transit.

(5) A valid Seaworthiness Certificate for the towage through the Suez Canal must be available.

(6) The unit must comply with the Suez Canal Regulations.

(7) A survey of the unit shall be made on the arrival, in order to take the definite steps, and make the final arrangements for the transit, if it complies with the Suez Canal Authority Rules.

(8) The transit is subject to the circumstances of the Navigation in the Canal, and the weather conditions.

G. Special Requests:

Owing to the request of owners for the transit of vessels with beam over 245 ft., the Suez Canal Authority undertook careful studies to comply with the said request.

In this connection above mentioned, vessels may transit the Canal under the following conditions:

(1) A pre-approval to be obtained in good time prior to transit.

(2) Transit to be effectuated in good weather (wind not exceeding 10 knots).

(3) One escorting tug against 6,600 SDR. for vessels with beam up to 233 ft.

(5) Two escorting tugs against 6,600 SDR. per tug for vessels with beam over 233 ft.

PART II – CANAL AND LAKES

CHAPTER VI: CANAL AND LAKES

Article 79: Canal and Approaches

(A) Length of the Navigable Channel

(1) East Approach Channel (Port Said).

(a) Distance from outer pair of buoys (East Branch) at Hm. 195 to Hm. 94.90 where it joins the West Approach Channel is 10.010 km.

(b) Distance from Hm. 94.90 to the pair of revolving lights at Km. 2.738 E is 12.228 km.

(2) West Approach Channel (Port Said).

(a) Distance from Fairway Buoy to Port Said Lighthouse is 11.040 km. (bearing 017°).

(b) Distance from Port Said Lighthouse (Km. 0.000) or (Km. 3 East Branch) to Ismailia is 78.5 km.

(c) Distance from Ismailia to Port Tewfik (Km. 162.250) is 83.750 km.

(d) Distance from Port Tewfik (Km. 162.250) (HM.000) to the outer pair of buoys Hm. 80.50 is 8.500 km.

(e) Total length of the navigable channel is 192.548 km.

(B) Characteristics of the Navigable Channel (Canal and Approaches).

(1) North Approaches

(a) Port Said East Approach Channel from Hm. 195 to Km. 1.000 East.

(i) Depth of water 21.00 m.

(ii) Channel width measured at 21 m. depth:

HM. 195	745 m.
HM. 80.00 E	400 m.
HM. 1.000 E	130 m.

(iii) Side Slopes

Natural land side slopes, ranging from 5/1 near shore to about 15/1 in the off-shore part.

(b) Port Said West Approach Channel from Hm. 95.00 to Port Said

(i) Depth of water 16.50 m.

(ii) Channel width measured at 16.50 m. depth:

HM. 80.00	520 m.
HM. 25.00	230 m.

(2) Canal Cross Sections (See Plan)

(a) The Canal cross sections are trapezoidal in shape, having side slopes of 4/1 in the Northern part up to Km. 61.00 and of 3/1 in the Southern part.

Toussoum Zone is the only place where the Western slopes are 2.5/1.

(b) Tables of main dimensions of cross sections all through the Canal (See below).

(c) Both sides of the Canal are provided with mooring bollards.

(3) South Approach from Hm. 0.00 (Km. 162.250) to Hm. 80.50

(a) Depth of water 23.50 m.

(b) Channel width measured at 19 m. depth, Hm. 0.000 to Hm. 80.50 is 292.00 m.

(c) Side slopes 3/1.

(C) Depth and Width of Different Parts of the Canal:

See "Table" opposite.

(D) Bends in the Canal

The bends in the navigable channel have the following characteristics:

(1) Radius of navigation line = 5,000 m.

(2) Width of channel at −11.00 m., depth = 225 m. – 242 m.

(3) Width of channel at −19.00 m. depth, North of Km. 61.000 (side slopes 4/1) = 176 m.

(4) Width of channel at −19.00 m. depth, South of Km. 61.000 (side slopes 3/1) = 177 m. – 192 m.

(5) At the ends of two bends, there is usually a funnel made to allow increasing the width of the straight part to the width of the curves (at 11.00 m. depth).

(6) Locations of beginning and end of each bend are included in the following table:

Note: At the approaches of the by-passes, bends are made with radius more than 5,000 m.

Canal Bends	*Kilometric indication of beginning point*	*Kilometric indication of end point*
Km. 51	Km. 49.510	Km. 51.480 West Km. 51.790 East
Km. 53	Km. 52.050	Km. 53.520
Km. 57	Km. 56.870	Km. 58.800
Km. 61	Km. 60.310 W. Km. 59.940 E.	Km. 63.300
"S" Curves	Km. 71.960	Km. 75.300
Timsah Curve	Km. 76.520	Km. 81.700 East
Km. 85	Km. 85.030	Km. 87.400
Km. 103	Km. 102.600	Km. 105.030
Km. 122	Km. 121.940 E. Km. 122.500 W.	Km. 125.510
Km. 130	Km. 129.500	Km. 131.980
Km. 146	Km. 145.500	Km. 146.330
Km. 154	Km. 154.700	Km. 155.720
Km. 157	Km. 156.280	Km. 160.000

(E) By-Passes and Loops

(1) Port Said By-Pass (See "Plan").

A by-pass is dredged East of Port Fouad starting at Km. 17.000 and extending straight to join the existing Port Said Roadstead at Hm. 94.90 and continuing until Hm. 195. This channel (By-Pass) will be used for the exit of Northbound ships, the entry of VLCCs in ballast, 4th Generation Container Ships and 3rd Generation Container Ships, LASH ships over 35,000 S.C.G.T., LPG, LNG tankers, and vessels with draft over 42 ft. coming from North.

Characteristics and dimensions: The kilometric marks are followed by letter "E" to distinguish them from those of the West branch. The inland part (from Km. 1.500 E. to Km. 15.465 E.) width (at 19 m. depth) is 146 m. with side slopes 4/1 and theoretical depth 20.5 m., fitted with bollards on the Western side, spaced every 100 m.

The seaward part (from Km. 1.000 E. to Hm. 94.90 E.) with width (at −21 m. depth) ranging from 130 m. at Km. 1.000 E. to 400 m. at Hm. 80.00 E. with natural side slopes (average 5/1 – 15/1).

Two revolving lights, one on each bank to indicate the entrance of Canal from East Approach Channel at Km. 2.738 E.

(2) Ballah Loop (See "Plan").

Between Km. 51 and 61 the Canal is doubled in the East, by a branch. The zone comprising the 2 branches of the Canal limited by the North and South ends where the 2 branches meet, is called "Ballah Loop".

In the East Branch the kilometric marks are followed by letter "E". The length of the East Branch is 8.490 km.

	West Branch	*East Branch*
Kilometric marking of North end	51.477	51.449 E.
Kilometric marking of South end	60.333	59.943 E.

Slope of bank 4/1.

In the West branch 15 mooring posts are situated on the Eastern bank and numbered South to North.

(3) Timsah By-Pass (See "Plan").

Between Km. 76.580 and Km. 81.700 E.

Characteristics and dimensions:

The kilometric marks are followed by letter "E". Length: 5.110 km. counted at right angle from Km. 76.578 to Km. 81.700. Width: 182 m. at a depth of 19 m. Slope: The side slope is 3/1. The radius of its axis is 4905 m. The by-pass will be used by North and Southbound vessels.

(4) Deversoir By-Pass (See "Plan").

A new branch is dredged East of the existing channel at Deversoir zone. This branch begins at Km. 95.000 and joins the main East Channel in the Great Bitter Lake at Km. 104.160. The branch will be used by Northbound vessels.

Dimensions:

Width: 142 m. at 19 m. depth. Depths: 20.500 m. from Km. 95.000 to Km. 100.670; 20.00 m. from Km. 100.670 to Km. 102.600; 19.500 m. from Km. 102.600 to Km. 104.160. Side slope: 3/1.

(5) Kabrit By-Pass (See "Plan").

The By-Pass is situated to the East of the main Canal. It begins at Km. 114.957 and ends at Km. 122.100. It is 250 m. – 152 m. wide at a depth of 19 m., the bank slope is 3/1. The By-Pass is separated from the West Branch by a submerged island at a depth between 2 m. and 6 m. The width of the island varies between 200 m. in the North and 66 m. in the South. Some mooring bollards have been installed on the submerged island to be used in case of emergency. The two extremities of the submerged island are marked at Km. 115.025 and 122.150 by a light buoy painted horizontally black and yellow and showing a flashing white light. The by-pass (East Channel) is to be used by Northbound vessels. Southbound vessels use the West Channel.

Article 80: Lakes

(A) Lake Timsah (See "Plan").

Lake Timsah extends from Km. 76.500 to Km. 80.520. In the presence of the new Timsah By-Pass, Lake Timsah will be used mainly as an anchorage area.

(B) Great Bitter Lake (See "Plan").

There are 2 dredged channels in the Great Bitter Lake. The East is the main channel about 358 m. wide at 19.00 m. depth and dredged to 19.50 m. for Northbound vessels. The West Channel 232 m. wide at 14.00 m. and dredged to 14.50 m. depth for Southbound vessels.

These channels divide the Great Bitter Lake into two anchorage areas, one to the East for Northbound convoy, and the other to the West for Southbound convoy (See B.A. Chart No.233).

Each convoy is to keep strictly to its assigned channel.

Article 81: Floating Bridges

The fixed parts of floating bridges are outside the line of navigational buoys. The bridges may be rigged day or night. Position of floating bridges – Km. 88.200, Km. 67.550 and Km. 47.200.

(C) Depth and Width of Different Parts of the Canal:

(1) *Main Canal and Bitter Lake West Channel:*

Kilometric Position Origin point of Km.		*Designation of Different Parts of the Canal Axis of Port Said Lighthouse*	*Theoretical Depth (m.)*	*Width of Canal at 19 m. Depth (m.)*	*Remarks*

* E : East kilometric Base line.

CHAPTER VII: BUOYAGE SYSTEM IN THE CANAL

Article 82: Buoyage

The navigable channel is marked by pairs of light buoys. On the East side green buoys showing Green lights. On the West side Red buoys showing Red lights.

In the straight parts, the distance between each pair is 1.5 km. in the North Section, and 1.0 km. in the South Section. In the curves the distances will be less than 1.0 km. All buoys in the Canal and its approaches are fitted with radar reflector.

Article 83: Position and Characteristics of Buoys in the Suez Canal.

See "Plan".

CHAPTER VIII: NATURAL CONDITIONS

Article 84: Tides and Currents in Suez Canal

The Suez Canal is divided in three main sectors according to the nature of tide in each.

The characteristics of each can be summarised as follows:

(A) The Northern Sector

This part is located between Port Said and the Great Bitter Lake.

(1) The height of tide at Port Said co-oscillates with the tides of the Mediterranean sea with 0.50 m. extreme tidal range (difference between highest and lowest levels) at Spring tides. This tidal range decreases gradually going South, to be about 0.20 m. at the entrance of Lake Timsah.

(2) In this sector, the peak tidal current may reach 1.0 knot (in case of no wind).

(3) Currents can be doubled by strong prevailing winds.

(4) Peak currents occur about 50 minutes after predicted HW and LW at Port Said.

(5) The duration and velocity of currents in this sector are greatly affected by the relative mean sea levels between the Mediterranean sea, the Bitter Lakes and the Red Sea as follows:

(a) *In Summer:* Between July and October, the mean sea level at Port Said is slightly higher than that of the Bitter Lakes. This difference (which reaches its maximum about 0.20 m. in September), due to the great evaporation at the Bitter Lakes, causes the *predominance of the Southward* current in duration and velocity.

(b) *In Winter:* Between December and May, the mean sea level at the Bitter Lakes is slightly higher than that of Port Said. This difference which reaches its maximum of about 0.30 m. in January, causes the *predominance of the Northward* current in duration and velocity.

(B) The Lakes (Timsah and Bitter Lakes)

(1) The Lakes along the Canal have an important role in dampening the effects of sudden meteorological changes.

(2) The Bitter Lakes with a surface of about 250 sq.km. reduce the vertical movement of the tide to a minimum between Km. 100 and Km. 130.

(3) The high Spring tidal range (MHWS) in the Great Bitter Lake may reach 0.25 m.

(4) The phase of the vertical tide in the Great Bitter Lake is about 3 hours later than that of Port Tewfik.

(5) The vertical tide in Lake Timsah is almost in phase with the tide in the Great Bitter Lake.

(C) The Southern Region

This part is located between Port of Suez and the Bitter Lakes.

(1) The height of tide at Suez co-oscillates with the tides of the Red Sea with extreme tidal range of about 1.90 m. at Spring tides. This range decreases gradually going North till the Bitter Lakes entrance where it is 0.15 m. at Genefa.

(2) The tidal volume of the Bitter Lakes is very large compared to the tidal volume of the Southern section. Consequently the currents are relatively strong and almost uniform between Port Tewfik and Genefa.

(3) In this region the Northward current is called *Flood* and the Southward current is called *Ebb*.

(4) Peak currents about 50 minutes after predicted HW and LW at Port Tewfik.

(5) At the entrance of the Canal, Km. 159, the *Flood* tide starts at an average of 3 hours after the LW at Suez. The *Ebb* tide 3 hours after HW in Suez.

(6) Generally in Summer, the duration of the *Ebb* exceeds the average of 6 hours. In Winter, the *Flood* is the predominant. The *Ebb* is prolonged by "Strong Northerly Winds". The *Flood* is prolonged by "Strong Southerly Winds".

(7) In this region the average peak current is about 1.5 knots. In Spring tides, current may reach 2.5 knots.

(8) The change of current occurs 5 to 10 minutes later on the bottom of the Canal, than on its surface.

(C) Current Buoys

In the Canal, there are current buoys indicating the direction of the current:

Head Current: Red and white horizontal bands or 1 reflector at night.
Stern Current: Black and white vertical stripes or 2 reflectors at night.

These buoys are laid in the following positions:

El Raswa	Km.	3.710 East
Port Fouad	Km.	2.750 East
Ras El Ech (E)	Km.	12.800 East
Ras El Ech (W)	Km.	14.304 East
Tineh	Km.	24.775 East
Cap	Km.	35.420 East
Kantara	Km.	45.130 East
Ballah (E & W)	Km.	54.770 East
Ferdan	Km.	64.894 East
Ismailia (E)	Km.	76.127 East
Toussom	Km.	86.780 East
Deversoir (E & W)	Km.	97.845 East
Kabrit (E & W)	Km.	120.827 East
Genefa	Km.	133.950 East
Chaloufa	Km.	146.125 East
Port Tewfik	Km.	160.300 East

Article 85: Weather Forecast

Six meteorological stations are installed on the Canal area. Information about local weather will be passed to vessels through Pilots, Ismailia Radio Station.

PART III – COMMUNICATIONS – SIGNALS.

CHAPTER IX: RADIO COMMUNICATIONS

Article 86: Wireless and Inmarsat Service

(1) General: Vessels must have their W/T and/or Radio Telephony apparatus in good working order before entering the Canal.

They must also be fitted with a VHF set easily operated from the bridge. It will have the working frequency range of the marine band (156 to 174 MHz), especially Channels 6, 8, 9, 10, 11, 12, 13, 14, 15, 16, 71, 73 and 74.

If not, they will rent one from the Suez Canal Authority for the transit.

(2) SCA Marine Communication Centre (SUQ): Suez Canal Wireless Station SUQ (Marine Communication Centre) has different communication facilities to contact vessels in the open sea or approaching areas and while transiting the Canal.

All these communication facilities are in compliance with the latest GMDSS Regulations:

I – Radio Telex:

(a) Frequency allocated to contact with vessels by Radio Telex from open sea to inform Suez Canal Authority of their expected time of arrival (ETA) to Port Said or Port Tewfik harbours.

ID No. 4820 / Hours of service: 24 hours.

Transmits	Receives	Mode	Watch hours
4250	6310 4205	FIB	H 24

Vessels are requested to send the following data 48 hours and 24 hours before arrival and when arriving in the approaches.

Vessel's name	Call sign	SCID	ETA	Draft	SCGT
....	......	....	...	.....	....

Cargo	Dangerous Cargo and Flash point
....	....

Origin	Destination	Agent's name
....	.....	......

(b) Frequencies allocated to contact vessels by Radio Telex while transiting Suez Canal or from waiting areas.

ID No. 4820 / Hours of service: 24 hours.

Transmits	Receives	Channel	Mode	Watch hours
1612	2147	211	FIB	H 24

R/T and broadcast facilities are available on the same frequencies.

II – W/T Morse:

W/T Morse will continue to contact vessels transiting the Canal and from waiting areas:

W/T (MF) Hours of service: 24 hours.

Call sign	Transmits	Receives	Channel	Mode	Watch hours
SUQ	520.5	469.5 and 454	109	A1A-A2A	H 24

III – Inmarsat Communication:

Vessels having on board Inmarsat station to contact Suez Canal Authority (SES) at Suez Canal Marine Communication Centre SUQ to send their ETA 48 hours and 24 hours before arrival and when arriving in the approaches.

The Suez Canal Authority (SES) identification numbers (ID) are as follows:

(a) Telex: 581-1622570.
(b) Voice: 871-1622570.
(c) Fax: 871-1622574.
Answerback: Suez.

IV – International Land Telex and Fax:

Suez Canal Marine Communication Centre SUQ has international Telex No. 63528 SUQ SC UN.

Also international Fax No. 002-064-393517.

V – Weather Reports:

SUQ broadcasts daily weather reports and navigational warnings (if exist) to vessels transiting the Canal or in the approaches.

Article 87: VHF – UHF Radiotelephony

(A) VHF Radiotelephony for vessels from sea

(1) *At Port Said*

(a) Port Management (listening): Call Sign: "Port Said 16" (HP-1) 156.800 MHz.

(b) Pilot Vessel and Radar Guidance:

(i) Outside the Harbour: Call Sign: "Port Said 12" (HP-2) 156.600 MHz.

(ii) Inside the Harbour: Call Sign: "Port Said 13" (HP-3) 156.650 MHz.

(c) Admeasurement Office: Call Sign: "Port Said 73" (M) 156.675 MHz.

(2) *At Port of Suez*

(a) Port Management (listening): Call Sign: "Suez 16" (HP-1) 156.800 MHz.

(b) Pilot Vessel and Radar Guidance:

(i) Outside the Harbour: Call Sign: "Suez 11" (HP-2) 156.550 MHz.

(ii) Inside the Harbour: Call Sign: "Suez 14" (HP-3) 156.700 MHz.

(c) Admeasurement Office: Call Sign: "Suez 74" (M) 156.675 MHz

(B) UHF/Radiotelephony in the Canal

(1) UHF voice communications system was built to cover all the Canal and its approaches to facilitate communication between pilots and the main Movement Office at Ismailia and the Port Management Offices.

The Canal pilot uses a special portable UHF personal transceiver which have the following frequencies.

Channel No.	Transmission Frequency MHz	Reception Frequency MHz	Function
1	415.350	412.850	V/Ls from North (SB)
2	415.600	413.100	V/Ls from South (NB)
3	415.850	413.350	Emergency (EM)
4	416.600	414.100	In Port of Suez Harbour HP (T)
5	416.350	413.850	In Port Said Harbour HP (S)
6	416.125	413.600	Emercency Critical (EMC) Critical V/Ls (out of convoy)

(2) Escort tugs-towing tugs will use special portable UHF transceiver sets which have the following frequencies.

(3) Channel 1 414.750 MHz.
Channel 2 414.775 MHz.
Channel 3 414.800 MHz.

CHAPTER X: THE SUEZ CANAL VESSEL TRAFFIC MANAGEMENT SYSTEM (SCVTMS)

Article 88: Overview

Suez Canal has upgraded its VTMS installed in 1978 to readjust some of the planning movement concepts to the new generation of vessels and technology. The new system will provide complete surveillance and tracking by radar coverage of vessels throughout the Canal and its approaches at Port Said and Port Tewfik harbours, tracking by Loran-C will be used as a back-up for the radar surveillance. The newly developed VTMS system will provide the following services:

(1) Automatic surveillance and tracking of vessels arriving at Suez Canal approaches (15 miles away) until anchorage in the waiting areas.

(2) Automatic determination of arrival times at ports.

(3) Automatic continuous tracking and monitoring of vessel's position, speed and separation distances for all vessels transiting the Suez Canal.

(4) Provide the Port Management Centres at Port Said and Port Tewfik, as well as Ismailia Main Traffic Management Centre, with sufficient instantaneous information about vessels transiting the Canal by means of displaying complete televised radar pictures of the whole Canal and very powerful information system.

(5) Provide automatic displaying system for Pilots at all signal stations (signal state board) which display his arrival time, meteorological data, and emergency information.

(6) Provide integral data base for vessel information, transit regulations, traffic flow transit pattern, Pilot assignment, vessel billing and navigation reports.

(7) Provide an efficient and quick means of communication with vessels arriving at ports and with Pilots on board of vessels transiting the Canal.

This system will add more safety values for vessels and cargo during passage through the Suez Canal. The newly adopted computerised ideal/real transit pattern will ensure optimum and safety transit passage for the benefit of her world users, Owners of vessels and the international trade.

Article 89: System Operation

(1) Transit Request: In order to assign a vessel in the system informatically, a transit request must be received from the vessel's Owners or Agent at one of the Port Management Offices.

Vessel Transit Request usually takes one of the following forms:

Booking in advance; usually 3 or 4 days prior to arrival at port.

Suez Canal Authority informed by telex or Agent that ship will arrive within 48 hours.

Suez Canal Authority advised that ship will arrive at any time.

A vessel that has previously transited the Canal will have a unique Suez Canal file number (Suez Canal Authority ID).

It is required that this ID must be provided when the request for transit is made.

If the vessel is not currently in the system information and data base, the Port Management Operator will create vessel particulars and automatically assign a unique Suez Canal Authority ID.

(2) Vessel Arrivals: A vessel approaching the Canal at either end is requested to call the Port Management Office on one of the frequencies listed in Article 88.

The vessel is requested to declare her position, her international call sign and Suez Canal Authority ID.

The vessel will be tracked automatically by the radar sub-system and displayed on the graphic display, so that the Port Management Operator will be able to infolink it with the information on the arrival list.

(3) Vessel Reaching the Anchorage Area: At both Port Said and Port Tewfik, anchorage areas are indicated on radar graphic displays.

Whenever a linked vessel reaches an anchorage area, the information will record the time the vessel reaches an anchorage area.

(4) Vessel Berth List: The Port Management Office will continue tracking the vessel until entering the assigned berth location and stop and vessel berth list is created in the information.

Each berth location will be indicated on the Port Management graphic displays, as well as Ismailia graphic displays.

The vessel berth list will be updated periodically to reflect any changes to the Port Operators.

(5) Creation of the Transit Pattern: The Main Management Centre at Ismailia will generate the optimal convoy pattern based on the vessels currently in the waiting areas or estimated to be in the waiting areas by the limit times.

The transit pattern will determine each convoy's start time and maximum time width.

(6) Convoy Creation: At Port Said and Port Tewfik, the Harbour Master will order the vessels in the convoy patterns that were generated by the Main Management Centre at Ismailia.

The official convoy list will only be comprised of vessels that have marked as eligible for transit (paid the transit fees, Performance Certificate, etc.).

(7) Assign Pilot to Vessels: The Port Management Office will assign the Roads and Canal Transit Pilots. Pilot list and pilot convoy list will be printed.

(8) Pilot Boarding Order: After the official convoy list is created, the convoy list report will be printed. After Pilot(s) have been assigned, boarding order reports will be printed.

These reports will be given to each Transit and Roads Pilot as part of their pilot boarding orders.

(9) Vessels enter the Canal: As vessels leave their berths at the port, the Port Management Office will follow and track them until entering the Canal.

As the vessel enters into the Canal, their identifiers will be automatically updated to add their ID and relative position within the convoy against their displayed picture on the display at Port Office and Main Management Office at Ismailia.

(10) Real Transit Pattern: As the convoy progresses along the Canal, the real time transit pattern is displayed and plotted.

The real time transit pattern screen will provide the capability of viewing real time information as X, Y positions, speed, kilometer positions and off-axis for each vessel, as well as the meteorological data of all signal stations, including the wind speed and direction, visibility, current speed and direction, and height of the tide.

(11) Vessel Passes Check Points: Check points are the inlets and outlets of by-passes, siding, each signal station, the Canal start and the Canal end.

The order of vessels within the convoy is re-checked at each check points. If the vessel has changed position within the convoy, this is automaticallly recorded in the transit history.

The information data base is updated to reflect the convoy and new convoy position displayed against the target.

(12) Information Displayed on the Signal Station Board: As each vessel passes a signal station, the information will then update the signal station boards to provide convoy progress, the following information (Table 1 to 5) for a vessel as it passes the station.

Information of vessels as vessel name, convoy position, Suez Canal Authority ID, call sign, speed, location and meteorological data will be displayed to the signal station operators on signal station PCs.

(13) Vessel Leaves the Canal: When vessels get out of range of radar, the information will close the vessel transit and is saved as a closed transit for historical reporting purposes.

(14) In case of emergency or radar failure, the Canal Pilot will board the vessel with Loran-C; it will be installed on board the vessel by Suez Canal Authority personnel.

By initialising command from the Canal Main Management Office at Ismailia, tracking by Loran-C chain is executed.

In some cases, tracking by both radar and Loran-C chain will be executed to monitor the progress of vessel during their transit through the Canal, in order to assure safety transit and increase Canal efficiency.

Article 90 – New Information for Vessels Transiting the Canal

(1) Each vessel has special Suez Canal Authority File number (SCA ID) in the new information system in Suez Canal.

Suez Canal Authority distributes free of charge special SCA ID card to be kept in the radio room, vessel must report SCA FILE NR on all arrival messages for transits or port calls.

Any change in vessel's characteristics should be reported to Suez Canal Authority officially, to be filled in SCA ID.

(2) Meteorological data will be displayed on signal state boards (2nd line) to inform vessels of the prevailing weather conditions, as they pass the signal station.

Also emergency or navigation instructions from the Main Management Office at Ismailia can be displayed on the same line alternatively.

(3) The CORT should be mounted on either of the two wings on entrance of the Canal, the area around should be clear of obstructions within 10 ft. radius.

A trained Suez Canal Authority technician will mount the CORT in place and operate before disembarking.

The vessel is asked to install electrical outlet 110/220 Volts AC (Hubbel socket type 2356 flanged receptacle nylon casing Hubbel catalogue No. 35-R-2B 37), on the two wings to supply the CORT with electrical power.

Before vessel exits the Canal at either end of the Canal, the CORT will be dismantled by a Suez Canal Authority technician.

CHAPTER XI: SIGNALS

Article 91: Generalities

(1) All signals used in Canal Waters are shown in the "Plan Section".

(2) All flags and pendants to be hoisted by vessels, as shown hereafter, should be those in the International Code of Signals.

(3) Night signals shall be hoisted where best seen by other vessels.

Article 92: Sound Signals

(A) Normal Manoeuvre

(1) The International Regulation for Preventing Collision at Sea Signals.

"One short blast": I am altering my course to starboard.
"Two short blasts": I am altering my course to port.
"Three short blasts": I am operating astern propulsion.

(2) The signal 5 or 6 short blasts repeated several times at short intervals to say: "I am reducing speed and may have to stop or make fast".

At night besides the blasts, four to five long flashes with the Aldis lamp or signal mast lamp.

(3) The signal one prolonged blast to attract attention.

The expression "short blast" means a blast of about 1 second duration.

The expression "prolonged blast" means a blast of 4 to 6 seconds duration.

CHAPTER VII: BUOYAGE SYSTEM IN THE CANAL

Article 82: Buoyage

The navigable channel is marked by pairs of light buoys. On the East side green buoys showing Green lights. On the West side Red buoys showing Red lights.

In the straight parts, the distance between each pair is 1.5 km. in the North Section, and 1.0 km. in the South Section. In the curves the distances will be less than 1.0 km. All buoys in the Canal and its approaches are fitted with radar reflector.

Article 83: Position and Characteristics of Buoys in the Suez Canal.

See "Plan".

CHAPTER VIII: NATURAL CONDITIONS

Article 84: Tides and Currents in Suez Canal

The Suez Canal is divided in three main sectors according to the nature of tide in each.

The characteristics of each can be summarised as follows:

(A) The Northern Sector

This part is located between Port Said and the Great Bitter Lake.

(1) The height of tide at Port Said co-oscillates with the tides of the Mediterranean sea with 0.50 m. extreme tidal range (difference between highest and lowest levels) at Spring tides. This tidal range decreases gradually going South, to be about 0.20 m. at the entrance of Lake Timsah.

(2) In this sector, the peak tidal current may reach 1.0 knot (in case of no wind).

(3) Currents can be doubled by strong prevailing winds.

(4) Peak currents occur about 50 minutes after predicted HW and LW at Port Said.

(5) The duration and velocity of currents in this sector are greatly affected by the relative mean sea levels between the Mediterranean sea, the Bitter Lakes and the Red Sea as follows:

(a) *In Summer:* Between July and October, the mean sea level at Port Said is slightly higher than that of the Bitter Lakes. This difference (which reaches its maximum about 0.20 m. in September), due to the great evaporation at the Bitter Lakes, causes the *predominance of the Southward* current in duration and velocity.

(b) *In Winter:* Between December and May, the mean sea level at the Bitter Lakes is slightly higher than that of Port Said. This difference which reaches its maximum of about 0.30 m. in January, causes the *predominance of the Northward* current in duration and velocity.

(B) The Lakes (Timsah and Bitter Lakes)

(1) The Lakes along the Canal have an important role in dampening the effects of sudden meteorological changes.

(2) The Bitter Lakes with a surface of about 250 sq.km. reduce the vertical movement of the tide to a minimum between Km. 100 and Km. 130.

(3) The high Spring tidal range (MHWS) in the Great Bitter Lake may reach 0.25 m.

(4) The phase of the vertical tide in the Great Bitter Lake is about 3 hours later than that of Port Tewfik.

(5) The vertical tide in Lake Timsah is almost in phase with the tide in the Great Bitter Lake.

(C) The Southern Region

This part is located between Port of Suez and the Bitter Lakes.

(1) The height of tide at Suez co-oscillates with the tides of the Red Sea with extreme tidal range of about 1.90 m. at Spring tides. This range decreases gradually going North till the Bitter Lakes entrance where it is 0.15 m. at Genefa.

(2) The tidal volume of the Bitter Lakes is very large compared to the tidal volume of the Southern section. Consequently the currents are relatively strong and almost uniform between Port Tewfik and Genefa.

(3) In this region the Northward current is called *Flood* and the Southward current is called *Ebb*.

(4) Peak currents about 50 minutes after predicted HW and LW at Port Tewfik.

(5) At the entrance of the Canal, Km. 159, the *Flood* tide starts at an average of 3 hours after the LW at Suez. The *Ebb* tide 3 hours after HW in Suez.

(6) Generally in Summer, the duration of the *Ebb* exceeds the average of 6 hours. In Winter, the *Flood* is the predominant. The *Ebb* is prolonged by "Strong Northerly Winds". The *Flood* is prolonged by "Strong Southerly Winds".

(7) In this region the average peak current is about 1.5 knots. In Spring tides, current may reach 2.5 knots.

(8) The change of current occurs 5 to 10 minutes later on the bottom of the Canal, than on its surface.

(C) Current Buoys

In the Canal, there are current buoys indicating the direction of the current:

Head Current: Red and white horizontal bands or 1 reflector at night.

Stern Current: Black and white vertical stripes or 2 reflectors at night.

These buoys are laid in the following positions:

El Raswa	Km.	3.710 East
Port Fouad	Km.	2.750 East
Ras El Ech (E)	Km.	12.800 East
Ras El Ech (W)	Km.	14.304 East
Tineh	Km.	24.775 East
Cap	Km.	35.420 East
Kantara	Km.	45.130 East
Ballah (E & W)	Km.	54.770 East
Ferdan	Km.	64.894 East
Ismailia (E)	Km.	76.127 East
Toussom	Km.	86.780 East
Deversoir (E & W)	Km.	97.845 East
Kabrit (E & W)	Km.	120.827 East
Genefa	Km.	133.950 East
Chaloufa	Km.	146.125 East
Port Tewfik	Km.	160.300 East

Article 85: Weather Forecast

Six meteorological stations are installed on the Canal area. Information about local weather will be passed to vessels through Pilots, Ismailia Radio Station.

PART III – COMMUNICATIONS – SIGNALS.

CHAPTER IX: RADIO COMMUNICATIONS

Article 86: Wireless and Inmarsat Service

(1) General: Vessels must have their W/T and/or Radio Telephony apparatus in good working order before entering the Canal.

They must also be fitted with a VHF set easily operated from the bridge. It will have the working frequency range of the marine band (156 to 174 MHz), especially Channels 6, 8, 9, 10, 11, 12, 13, 14, 15, 16, 71, 73 and 74.

If not, they will rent one from the Suez Canal Authority for the transit.

(2) SCA Marine Communication Centre (SUQ): Suez Canal Wireless Station SUQ (Marine Communication Centre) has different communication facilities to contact vessels in the open sea or approaching areas and while transiting the Canal.

All these communication facilities are in compliance with the latest GMDSS Regulations:

I – Radio Telex:

(a) Frequency allocated to contact with vessels by Radio Telex from open sea to inform Suez Canal Authority of their expected time of arrival (ETA) to Port Said or Port Tewfik harbours.

ID No. 4820 / Hours of service: 24 hours.

Transmits	Receives	Mode	Watch hours
4250	6310 4205	FIB	H 24

Vessels are requested to send the following data 48 hours and 24 hours before arrival and when arriving in the approaches.

Vessel's name Call sign SCID ETA Draft SCGT

....

Cargo Dangerous Cargo and Flash point

....

Origin Destination Agent's name

....

(b) Frequencies allocated to contact vessels by Radio Telex while transiting Suez Canal or from waiting areas.

ID No. 4820 / Hours of service: 24 hours.

Transmits	Receives	Channel	Mode	Watch hours
1612	2147	211	FIB	H 24

R/T and broadcast facilities are available on the same frequencies.

II – W/T Morse:

W/T Morse will continue to contact vessels transiting the Canal and from waiting areas:

W/T (MF) Hours of service: 24 hours.

Call sign	Transmits	Receives	Channel	Mode	Watch hours
SUQ	520.5	469.5 and 454	109	A1A-A2A	H 24

III – Inmarsat Communication:

Vessels having on board Inmarsat station to contact Suez Canal Authority (SES) at Suez Canal Marine Communication Centre SUQ to send their ETA 48 hours and 24 hours before arrival and when arriving in the approaches.

The Suez Canal Authority (SES) identification numbers (ID) are as follows:

(a) Telex: 581-1622570.

(b) Voice: 871-1622570.

(c) Fax: 871-1622574.

Answerback: Suez.

IV – International Land Telex and Fax:

Suez Canal Marine Communication Centre SUQ has international Telex No. 63528 SUQ SC UN.

Also international Fax No. 002-064-393517.

V – Weather Reports:

SUQ broadcasts daily weather reports and navigational warnings (if exist) to vessels transiting the Canal or in the approaches.

Article 87: VHF – UHF Radiotelephony

(A) VHF Radiotelephony for vessels from sea

(1) *At Port Said*

(a) Port Management (listening): Call Sign: "Port Said 16" (HP-1) 156.800 MHz.

(b) Pilot Vessel and Radar Guidance:

(i) Outside the Harbour: Call Sign: "Port Said 12" (HP-2) 156.600 MHz.

(ii) Inside the Harbour: Call Sign: "Port Said 13" (HP-3) 156.650 MHz.

(c) Admeasurement Office: Call Sign: "Port Said 73" (M) 156.675 MHz.

(2) *At Port of Suez*

(a) Port Management (listening): Call Sign: "Suez 16" (HP-1) 156.800 MHz.

(b) Pilot Vessel and Radar Guidance:

(i) Outside the Harbour: Call Sign: "Suez 11" (HP-2) 156.550 MHz.

(ii) Inside the Harbour: Call Sign: "Suez 14" (HP-3) 156.700 MHz.

(c) Admeasurement Office: Call Sign: "Suez 74" (M) 156.675 MHz.

(B) UHF/Radiotelephony in the Canal

(1) UHF voice communications system was built to cover all the Canal and its approaches to facilitate communication between pilots and the main Movement Office at Ismailia and the Port Management Offices.

The Canal pilot uses a special portable UHF personal transceiver which have the following frequencies.

Channel No.	*Transmission Frequency MHz*	*Reception Frequency MHz*	*Function*
1	415.350	412.850	V/Ls from North (SB)
2	415.600	413.100	V/Ls from South (NB)
3	415.850	413.350	Emergency (EM)
4	416.600	414.100	In Port of Suez Harbour HP (T)
5	416.350	413.850	In Port Said Harbour HP (S)
6	416.125	413.600	Emergency Critical (EMC) Critical V/Ls (out of convoy)

(2) Escort tugs-towing tugs will use special portable UHF transceiver sets which have the following frequencies.

(3) Channel 1 414.750 MHz.
Channel 2 414.775 MHz.
Channel 3 414.800 MHz.

CHAPTER X: THE SUEZ CANAL VESSEL TRAFFIC MANAGEMENT SYSTEM (SCVTMS)

Article 88: Overview

Suez Canal has upgraded its VTMS installed in 1978 to readjust some of the planning movement concepts to the new generation of vessels and technology. The new system will provide complete surveillance and tracking by radar coverage of vessels throughout the Canal and its approaches at Port Said and Port Tewfik harbours, tracking by Loran-C will be used as a back-up for the radar surveillance. The newly developed VTMS system will provide the following services:

(1) Automatic surveillance and tracking of vessels arriving at Suez Canal approaches (15 miles away) until anchorage in the waiting areas.

(2) Automatic determination of arrival times at ports.

(3) Automatic continuous tracking and monitoring of vessel's position, speed and separation distances for all vessels transiting the Suez Canal.

(4) Provide the Port Management Centres at Port Said and Port Tewfik, as well as Ismailia Main Traffic Management Centre, with sufficient instantaneous information about vessels transiting the Canal by means of displaying complete televised radar pictures of the whole Canal and very powerful information system.

(5) Provide automatic displaying system for Pilots at all signal stations (signal state board) which display his arrival time, meteorological data, and emergency information.

(6) Provide integral data base for vessel information, transit regulations, traffic flow transit pattern, Pilot assignment, vessel billing and navigation reports.

(7) Provide an efficient and quick means of communication with vessels arriving at ports and with Pilots on board of vessels transiting the Canal.

This system will add more safety values for vessels and cargo during passage through the Suez Canal. The newly adopted computerised ideal/real transit pattern will ensure optimum and safety transit passage for the benefit of her world users, Owners of vessels and the international trade.

Article 89: System Operation

(1) Transit Request: In order to assign a vessel in the system informatically, a transit request must be received from the vessel's Owners or Agent at one of the Port Management Offices.

Vessel Transit Request usually takes one of the following forms:

Booking in advance; usually 3 or 4 days prior to arrival at port.

Suez Canal Authority informed by telex or Agent that ship will arrive within 48 hours.

Suez Canal Authority advised that ship will arrive at any time.

A vessel that has previously transited the Canal will have a unique Suez Canal file number (Suez Canal Authority ID).

It is required that this ID must be provided when the request for transit is made.

If the vessel is not currently in the system information and data base, the Port Management Operator will create vessel particulars and automatically assign a unique Suez Canal Authority ID.

(2) Vessel Arrivals: A vessel approaching the Canal at either end is requested to call the Port Management Office on one of the frequencies listed in Article 88.

The vessel is requested to declare her position, her international call sign and Suez Canal Authority ID.

The vessel will be tracked automatically by the radar sub-system and displayed on the graphic display, so that the Port Management Operator will be able to infolink it with the information on the arrival list.

(3) Vessel Reaching the Anchorage Area: At both Port Said and Port Tewfik, anchorage areas are indicated on radar graphic displays.

Whenever a linked vessel reaches an anchorage area, the information will record the time the vessel reaches an anchorage area.

(4) Vessel Berth List: The Port Management Office will continue tracking the vessel until entering the assigned berth location and stop and vessel berth list is created in the information.

Each berth location will be indicated on the Port Management graphic displays, as well as Ismailia graphic displays.

The vessel berth list will be updated periodically to reflect any changes to the Port Operators.

(5) Creation of the Transit Pattern: The Main Management Centre at Ismailia will generate the optimal convoy pattern based on the vessels currently in the waiting areas or estimated to be in the waiting areas by the limit times.

The transit pattern will determine each convoy's start time and maximum time width.

(6) Convoy Creation: At Port Said and Port Tewfik, the Harbour Master will order the vessels in the convoy patterns that were generated by the Main Management Centre at Ismailia.

The official convoy list will only be comprised of vessels that have marked as eligible for transit (paid the transit fees, Performance Certificate, etc.).

(7) Assign Pilot to Vessels: The Port Management Office will assign the Roads and Canal Transit Pilots. Pilot list and pilot convoy list will be printed.

(8) Pilot Boarding Order: After the official convoy list is created, the convoy list report will be printed. After Pilot(s) have been assigned, boarding order reports will be printed.

These reports will be given to each Transit and Roads Pilot as part of their pilot boarding orders.

(9) Vessels enter the Canal: As vessels leave their berths at the port, the Port Management Office will follow and track them until entering the Canal.

As the vessel enters into the Canal, their identifiers will be automatically updated to add their ID and relative position within the convoy against their displayed picture on the display at Port Office and Main Management Office at Ismailia.

(10) Real Transit Pattern: As the convoy progresses along the Canal, the real time transit pattern is displayed and plotted.

The real time transit pattern screen will provide the capability of viewing real time information as X, Y positions, speed, kilometer positions and off-axis for each vessel, as well as the meteorological data of all signal stations, including the wind speed and direction, visibility, current speed and direction, and height of the tide.

(11) Vessel Passes Check Points: Check points are the inlets and outlets of by-passes, siding, each signal station, the Canal start and the Canal end.

The order of vessels within the convoy is re-checked at each check points. If the vessel has changed position within the convoy, this is automatically recorded in the transit history.

The information data base is updated to reflect the convoy and new convoy position displayed against the target.

(12) Information Displayed on the Signal Station Board: As each vessel passes a signal station, the information will then update the signal station boards to provide convoy progress, the following information (Table 1 to 5) for a vessel as it passes the station.

Information of vessels as vessel name, convoy position, Suez Canal Authority ID, call sign, speed, location and meteorological data will be displayed to the signal station operators on signal station PCs.

(13) Vessel Leaves the Canal: When vessels get out of range of radar, the information will close the vessel transit and is saved as a closed transit for historical reporting purposes.

(14) In case of emergency or radar failure, the Canal Pilot will board the vessel with Loran-C; it will be installed on board the vessel by Suez Canal Authority personnel.

By initialising command from the Canal Main Management Office at Ismailia, tracking by Loran-C chain is executed.

In some cases, tracking by both radar and Loran-C chain will be executed to monitor the progress of vessel during their transit through the Canal, in order to assure safety transit and increase Canal efficiency.

Article 90 – New Information for Vessels Transiting the Canal

(1) Each vessel has special Suez Canal Authority File number (SCA ID) in the new information system in Suez Canal.

Suez Canal Authority distributes free of charge special SCA ID card to be kept in the radio room, vessel must report SCA FILE NR on all arrival messages for transits or port calls.

Any change in vessel's characteristics should be reported to Suez Canal Authority officially, to be filled in SCA ID.

(2) Meteorological data will be displayed on signal state boards (2nd line) to inform vessels of the prevailing weather conditions, as they pass the signal station.

Also emergency or navigation instructions from the Main Management Office at Ismailia can be displayed on the same line alternatively.

(3) The CORT should be mounted on either of the two wings on entrance of the Canal, the area around should be clear of obstructions within 10 ft. radius.

A trained Suez Canal Authority technician will mount the CORT in place and operate before disembarking.

The vessel is asked to install electrical outlet 110/220 Volts AC (Hubbel socket type 2356 flanged receptacle nylon casing Hubbel catalogue No. 35-R-2B 37), on the two wings to supply the CORT with electrical power.

Before vessel exits the Canal at either end of the Canal, the CORT will be dismantled by a Suez Canal Authority technician.

CHAPTER XI: SIGNALS

Article 91: Generalities

(1) All signals used in Canal Waters are shown in the "Plan Section".

(2) All flags and pendants to be hoisted by vessels, as shown hereafter, should be those in the International Code of Signals.

(3) Night signals shall be hoisted where best seen by other vessels.

Article 92: Sound Signals

(A) Normal Manoeuvre

(1) The International Regulation for Preventing Collision at Sea Signals.

"One short blast": I am altering my course to starboard.

"Two short blasts": I am altering my course to port.

"Three short blasts": I am operating astern propulsion.

(2) The signal 5 or 6 short blasts repeated several times at short intervals to say: "I am reducing speed and may have to stop or make fast".

At night besides the blasts, four to five long flashes with the Aldis lamp or signal mast lamp.

(3) The signal one prolonged blast to attract attention.

The expression "short blast" means a blast of about 1 second duration.

The expression "prolonged blast" means a blast of 4 to 6 seconds duration.

CHAPTER VII: BUOYAGE SYSTEM IN THE CANAL

Article 82: Buoyage

The navigable channel is marked by pairs of light buoys. On the East side green buoys showing Green lights. On the West side Red buoys showing Red lights.

In the straight parts, the distance between each pair is 1.5 km. in the North Section, and 1.0 km. in the South Section. In the curves the distances will be less than 1.0 km. All buoys in the Canal and its approaches are fitted with radar reflector.

Article 83: Position and Characteristics of Buoys in the Suez Canal.

See "Plan".

CHAPTER VIII: NATURAL CONDITIONS

Article 84: Tides and Currents in Suez Canal

The Suez Canal is divided in three main sectors according to the nature of tide in each.

The characteristics of each can be summarised as follows:

(A) The Northern Sector

This part is located between Port Said and the Great Bitter Lake.

(1) The height of tide at Port Said co-oscillates with the tides of the Mediterranean sea with 0.50 m. extreme tidal range (difference between highest and lowest levels) at Spring tides. This tidal range decreases gradually going South, to be about 0.20 m. at the entrance of Lake Timsah.

(2) In this sector, the peak tidal current may reach 1.0 knot (in case of no wind).

(3) Currents can be doubled by strong prevailing winds.

(4) Peak currents occur about 50 minutes after predicted HW and LW at Port Said.

(5) The duration and velocity of currents in this sector are greatly affected by the relative mean sea levels between the Mediterranean sea, the Bitter Lakes and the Red Sea as follows:

(a) *In Summer:* Between July and October, the mean sea level at Port Said is slightly higher than that of the Bitter Lakes. This difference (which reaches its maximum about 0.20 m. in September), due to the great evaporation at the Bitter Lakes, causes the *predominance of the Southward* current in duration and velocity.

(b) *In Winter:* Between December and May, the mean sea level at the Bitter Lakes is slightly higher than that of Port Said. This difference which reaches its maximum of about 0.30 m. in January, causes the *predominance of the Northward* current in duration and velocity.

(B) The Lakes (Timsah and Bitter Lakes)

(1) The Lakes along the Canal have an important role in dampening the effects of sudden meteorological changes.

(2) The Bitter Lakes with a surface of about 250 sq.km. reduce the vertical movement of the tide to a minimum between Km. 100 and Km. 130.

(3) The high Spring tidal range (MHWS) in the Great Bitter Lake may reach 0.25 m.

(4) The phase of the vertical tide in the Great Bitter Lake is about 3 hours later than that of Port Tewfik.

(5) The vertical tide in Lake Timsah is almost in phase with the tide in the Great Bitter Lake.

(C) The Southern Region

This part is located between Port of Suez and the Bitter Lakes.

(1) The height of tide at Suez co-oscillates with the tides of the Red Sea with extreme tidal range of about 1.90 m. at Spring tides. This range decreases gradually going North till the Bitter Lakes entrance where it is 0.15 m. at Genefa.

(2) The tidal volume of the Bitter Lakes is very large compared to the tidal volume of the Southern section. Consequently the currents are relatively strong and almost uniform between Port Tewfik and Genefa.

(3) In this region the Northward current is called *Flood* and the Southward current is called *Ebb*.

(4) Peak currents about 50 minutes after predicted HW and LW at Port Tewfik.

(5) At the entrance of the Canal, Km. 159, the *Flood* tide starts at an average of 3 hours after the LW at Suez. The *Ebb* tide 3 hours after HW in Suez.

(6) Generally in Summer, the duration of the *Ebb* exceeds the average of 6 hours. In Winter, the *Flood* is the predominant. The *Ebb* is prolonged by "Strong Northerly Winds". The *Flood* is prolonged by "Strong Southerly Winds".

(7) In this region the average peak current is about 1.5 knots. In Spring tides, current may reach 2.5 knots.

(8) The change of current occurs 5 to 10 minutes later on the bottom of the Canal, than on its surface.

(C) Current Buoys

In the Canal, there are current buoys indicating the direction of the current:

Head Current: Red and white horizontal bands or 1 reflector at night.

Stern Current: Black and white vertical stripes or 2 reflectors at night.

These buoys are laid in the following positions:

El Raswa	Km.	3.710	East
Port Fouad	Km.	2.750	East
Ras El Ech (E)	Km.	12.800	East
Ras El Ech (W)	Km.	14.304	East
Tineh	Km.	24.775	East
Cap	Km.	35.420	East
Kantara	Km.	45.130	East
Ballah (E & W)	Km.	54.770	East
Ferdan	Km.	64.894	East
Ismailia (E)	Km.	76.127	East
Toussom	Km.	86.780	East
Deversoir (E & W)	Km.	97.845	East
Kabrit (E & W)	Km.	120.827	East
Genefa	Km.	133.950	East
Chaloufa	Km.	146.125	East
Port Tewfik	Km.	160.300	East

Article 85: Weather Forecast

Six meteorological stations are installed on the Canal area. Information about local weather will be passed to vessels through Pilots, Ismailia Radio Station.

PART III – COMMUNICATIONS – SIGNALS.

CHAPTER IX: RADIO COMMUNICATIONS

Article 86: Wireless and Inmarsat Service

(1) General: Vessels must have their W/T and/or Radio Telephony apparatus in good working order before entering the Canal.

They must also be fitted with a VHF set easily operated from the bridge. It will have the working frequency range of the marine band (156 to 174 MHz), especially Channels 6, 8, 9, 10, 11, 12, 13, 14, 15, 16, 71, 73 and 74.

If not, they will rent one from the Suez Canal Authority for the transit.

(2) SCA Marine Communication Centre (SUQ): Suez Canal Wireless Station SUQ (Marine Communication Centre) has different communication facilities to contact vessels in the open sea or approaching areas and while transiting the Canal.

All these communication facilities are in compliance with the latest GMDSS Regulations:

I – Radio Telex:

(a) Frequency allocated to contact with vessels by Radio Telex from open sea to inform Suez Canal Authority of their expected time of arrival (ETA) to Port Said or Port Tewfik harbours.

ID No. 4820 / Hours of service: 24 hours.

Transmits	Receives	Mode	Watch hours
4250	6310 4205	FIB	H 24

Vessels are requested to send the following data 48 hours and 24 hours before arrival and when arriving in the approaches.

Vessel's name	Call sign	SCID	ETA	Draft	SCGT
....	......	....	....	.....	....

Cargo	Dangerous Cargo and Flash point
....	....

Origin	Destination	Agent's name
....	.....	......

(b) Frequencies allocated to contact vessels by Radio Telex while transiting Suez Canal or from waiting areas.

ID No. 4820 / Hours of service: 24 hours.

Transmits	Receives	Channel	Mode	Watch hours
1612	2147	211	FIB	H 24

R/T and broadcast facilities are available on the same frequencies.

II – W/T Morse:

W/T Morse will continue to contact vessels transiting the Canal and from waiting areas:

W/T (MF) Hours of service: 24 hours.

Call sign	Transmits	Receives	Channel	Mode	Watch hours
SUQ	520.5	469.5 and 454	109	A1A-A2A	H 24

III – Inmarsat Communication:

Vessels having on board Inmarsat station to contact Suez Canal Authority (SES) at Suez Canal Marine Communication Centre SUQ to send their ETA 48 hours and 24 hours before arrival and when arriving in the approaches.

The Suez Canal Authority (SES) identification numbers (ID) are as follows:

(a) Telex: 581-1622570.
(b) Voice: 871-1622570.
(c) Fax: 871-1622574.
Answerback: Suez.

IV – International Land Telex and Fax:

Suez Canal Marine Communication Centre SUQ has international Telex No. 63528 SUQ SC UN.

Also international Fax No. 002-064-393517.

V – Weather Reports:

SUQ broadcasts daily weather reports and navigational warnings (if exist) to vessels transiting the Canal or in the approaches.

Article 87: VHF – UHF Radiotelephony

(A) VHF Radiotelephony for vessels from sea

(1) *At Port Said*

(a) Port Management (listening): Call Sign: "Port Said 16" (HP-1) 156.800 MHz.

(b) Pilot Vessel and Radar Guidance:

(i) Outside the Harbour: Call Sign: "Port Said 12" (HP-2) 156.600 MHz.

(ii) Inside the Harbour: Call Sign: "Port Said 13" (HP-3) 156.650 MHz.

(c) Admeasurement Office: Call Sign: "Port Said 73" (M) 156.675 MHz.

(2) *At Port of Suez*

(a) Port Management (listening): Call Sign: "Suez 16" (HP-1) 156.800 MHz.

(b) Pilot Vessel and Radar Guidance:

(i) Outside the Harbour: Call Sign: "Suez 11" (HP-2) 156.550 MHz.

(ii) Inside the Harbour: Call Sign: "Suez 14" (HP-3) 156.700 MHz.

(c) Admeasurement Office: Call Sign: "Suez 74" (M) 156.675 MHz.

(B) UHF/Radiotelephony in the Canal

(1) UHF voice communications system was built to cover all the Canal and its approaches to facilitate communication between pilots and the main Movement Office at Ismailia and the Port Management Offices.

The Canal pilot uses a special portable UHF personal transceiver which have the following frequencies.

Channel No.	*Transmission Frequency MHz*	*Reception Frequency MHz*	*Function*
1	415.350	412.850	V/Ls from North (SB)
2	415.600	413.100	V/Ls from South (NB)
3	415.850	413.350	Emergency (EM)
4	416.600	414.100	In Port of Suez Harbour HP (T)
5	416.350	413.850	In Port Said Harbour HP (S)
6	416.125	413.600	Emergency Critical (EMC) Critical V/Ls (out of convoy)

(2) Escort tugs-towing tugs will use special portable UHF transceiver sets which have the following frequencies.

(3) Channel 1 414.750 MHz.
Channel 2 414.775 MHz.
Channel 3 414.800 MHz.

CHAPTER X: THE SUEZ CANAL VESSEL TRAFFIC MANAGEMENT SYSTEM (SCVTMS)

Article 88: Overview

Suez Canal has upgraded its VTMS installed in 1978 to readjust some of the planning movement concepts to the new generation of vessels and technology. The new system will provide complete surveillance and tracking by radar coverage of vessels throughout the Canal and its approaches at Port Said and Port Tewfik harbours, tracking by Loran-C will be used as a back-up for the radar surveillance. The newly developed VTMS system will provide the following services:

(1) Automatic surveillance and tracking of vessels arriving at Suez Canal approaches (15 miles away) until anchorage in the waiting areas.

(2) Automatic determination of arrival times at ports.

(3) Automatic continuous tracking and monitoring of vessel's position, speed and separation distances for all vessels transiting the Suez Canal.

(4) Provide the Port Management Centres at Port Said and Port Tewfik, as well as Ismailia Main Traffic Management Centre, with sufficient instantaneous information about vessels transiting the Canal by means of displaying complete televised radar pictures of the whole Canal and very powerful information system.

(5) Provide automatic displaying system for Pilots at all signal stations (signal state board) which display his arrival time, meteorological data, and emergency information.

(6) Provide integral data base for vessel information, transit regulations, traffic flow transit pattern, Pilot assignment, vessel billing and navigation reports.

(7) Provide an efficient and quick means of communication with vessels arriving at ports and with Pilots on board of vessels transiting the Canal.

This system will add more safety values for vessels and cargo during passage through the Suez Canal. The newly adopted computerised ideal/real transit pattern will ensure optimum and safety transit passage for the benefit of her world users, Owners of vessels and the international trade.

Article 89: System Operation

(1) Transit Request: In order to assign a vessel in the system informatically, a transit request must be received from the vessel's Owners or Agent at one of the Port Management Offices.

Vessel Transit Request usually takes one of the following forms:

Booking in advance; usually 3 or 4 days prior to arrival at port.

Suez Canal Authority informed by telex or Agent that ship will arrive within 48 hours.

Suez Canal Authority advised that ship will arrive at any time.

A vessel that has previously transited the Canal will have a unique Suez Canal file number (Suez Canal Authority ID).

It is required that this ID must be provided when the request for transit is made.

If the vessel is not currently in the system information and data base, the Port Management Operator will create vessel particulars and automatically assign a unique Suez Canal Authority ID.

(2) Vessel Arrivals: A vessel approaching the Canal at either end is requested to call the Port Management Office on one of the frequencies listed in Article 88.

The vessel is requested to declare her position, her international call sign and Suez Canal Authority ID.

The vessel will be tracked automatically by the radar sub-system and displayed on the graphic display, so that the Port Management Operator will be able to infolink it with the information on the arrival list.

(3) Vessel Reaching the Anchorage Area: At both Port Said and Port Tewfik, anchorage areas are indicated on radar graphic displays.

Whenever a linked vessel reaches an anchorage area, the information will record the time the vessel reaches an anchorage area.

(4) Vessel Berth List: The Port Management Office will continue tracking the vessel until entering the assigned berth location and stop and vessel berth list is created in the information.

Each berth location will be indicated on the Port Management graphic displays, as well as Ismailia graphic displays.

The vessel berth list will be updated periodically to reflect any changes to the Port Operators.

(5) Creation of the Transit Pattern: The Main Management Centre at Ismailia will generate the optimal convoy pattern based on the vessels currently in the waiting areas or estimated to be in the waiting areas by the limit times.

The transit pattern will determine each convoy's start time and maximum time width.

(6) Convoy Creation: At Port Said and Port Tewfik, the Harbour Master will order the vessels in the convoy patterns that were generated by the Main Management Centre at Ismailia.

The official convoy list will only be comprised of vessels that have marked as eligible for transit (paid the transit fees, Performance Certificate, etc.).

(7) Assign Pilot to Vessels: The Port Management Office will assign the Roads and Canal Transit Pilots. Pilot list and pilot convoy list will be printed.

(8) Pilot Boarding Order: After the official convoy list is created, the convoy list report will be printed. After Pilot(s) have been assigned, boarding order reports will be printed.

These reports will be given to each Transit and Roads Pilot as part of their pilot boarding orders.

(9) Vessels enter the Canal: As vessels leave their berths at the port, the Port Management Office will follow and track them until entering the Canal.

As the vessel enters into the Canal, their identifiers will be automatically updated to add their ID and relative position within the convoy against their displayed picture on the display at Port Office and Main Management Office at Ismailia.

(10) Real Transit Pattern: As the convoy progresses along the Canal, the real time transit pattern is displayed and plotted.

The real time transit pattern screen will provide the capability of viewing real time information as X, Y positions, speed, kilometer positions and off-axis for each vessel, as well as the meteorological data of all signal stations, including the wind speed and direction, visibility, current speed and direction, and height of the tide.

(11) Vessel Passes Check Points: Check points are the inlets and outlets of by-passes, siding, each signal station, the Canal start and the Canal end.

The order of vessels within the convoy is re-checked at each check points. If the vessel has changed position within the convoy, this is automaticallly recorded in the transit history.

The information data base is updated to reflect the convoy and new convoy position displayed against the target.

(12) Information Displayed on the Signal Station Board: As each vessel passes a signal station, the information will then update the signal station boards to provide convoy progress, the following information (Table 1 to 5) for a vessel as it passes the station.

Information of vessels as vessel name, convoy position, Suez Canal Authority ID, call sign, speed, location and meteorological data will be displayed to the signal station operators on signal station PCs.

(13) Vessel Leaves the Canal: When vessels get out of range of radar, the information will close the vessel transit and is saved as a closed transit for historical reporting purposes.

(14) In case of emergency or radar failure, the Canal Pilot will board the vessel with Loran-C; it will be installed on board the vessel by Suez Canal Authority personnel.

By initialising command from the Canal Main Management Office at Ismailia, tracking by Loran-C chain is executed.

In some cases, tracking by both radar and Loran-C chain will be executed to monitor the progress of vessel during their transit through the Canal, in order to assure safety transit and increase Canal efficiency.

Article 90 – New Information for Vessels Transiting the Canal

(1) Each vessel has special Suez Canal Authority File number (SCA ID) in the new information system in Suez Canal.

Suez Canal Authority distributes free of charge special SCA ID card to be kept in the radio room, vessel must report SCA FILE NR on all arrival messages for transits or port calls.

Any change in vessel's characteristics should be reported to Suez Canal Authority officially, to be filled in SCA ID.

(2) Meteorological data will be displayed on signal state boards (2nd line) to inform vessels of the prevailing weather conditions, as they pass the signal station.

Also emergency or navigation instructions from the Main Management Office at Ismailia can be displayed on the same line alternatively.

(3) The CORT should be mounted on either of the two wings on entrance of the Canal, the area around should be clear of obstructions within 10 ft. radius.

A trained Suez Canal Authority technician will mount the CORT in place and operate before disembarking.

The vessel is asked to install electrical outlet 110/220 Volts AC (Hubbel socket type 2356 flanged receptacle nylon casing Hubbel catalogue No. 35-R-2B 37), on the two wings to supply the CORT with electrical power.

Before vessel exits the Canal at either end of the Canal, the CORT will be dismantled by a Suez Canal Authority technician.

CHAPTER XI: SIGNALS

Article 91: Generalities

(1) All signals used in Canal Waters are shown in the "Plan Section".

(2) All flags and pendants to be hoisted by vessels, as shown hereafter, should be those in the International Code of Signals.

(3) Night signals shall be hoisted where best seen by other vessels.

Article 92: Sound Signals

(A) Normal Manoeuvre

(1) The International Regulation for Preventing Collision at Sea Signals.

"One short blast": I am altering my course to starboard.

"Two short blasts": I am altering my course to port.

"Three short blasts": I am operating astern propulsion.

(2) The signal 5 or 6 short blasts repeated several times at short intervals to say: "I am reducing speed and may have to stop or make fast".

At night besides the blasts, four to five long flashes with the Aldis lamp or signal mast lamp.

(3) The signal one prolonged blast to attract attention.

The expression "short blast" means a blast of about 1 second duration.

The expression "prolonged blast" means a blast of 4 to 6 seconds duration.

CHAPTER VII: BUOYAGE SYSTEM IN THE CANAL

Article 82: Buoyage

The navigable channel is marked by pairs of light buoys. On the East side green buoys showing Green lights. On the West side Red buoys showing Red lights.

In the straight parts, the distance between each pair is 1.5 km. in the North Section, and 1.0 km. in the South Section. In the curves the distances will be less than 1.0 km. All buoys in the Canal and its approaches are fitted with radar reflector.

Article 83: Position and Characteristics of Buoys in the Suez Canal.

See "Plan".

CHAPTER VIII: NATURAL CONDITIONS

Article 84: Tides and Currents in Suez Canal

The Suez Canal is divided in three main sectors according to the nature of tide in each.

The characteristics of each can be summarised as follows:

(A) The Northern Sector

This part is located between Port Said and the Great Bitter Lake.

(1) The height of tide at Port Said co-oscillates with the tides of the Mediterranean sea with 0.50 m. extreme tidal range (difference between highest and lowest levels) at Spring tides. This tidal range decreases gradually going South, to be about 0.20 m. at the entrance of Lake Timsah.

(2) In this sector, the peak tidal current may reach 1.0 knot (in case of no wind).

(3) Currents can be doubled by strong prevailing winds.

(4) Peak currents occur about 50 minutes after predicted HW and LW at Port Said.

(5) The duration and velocity of currents in this sector are greatly affected by the relative mean sea levels between the Mediterranean sea, the Bitter Lakes and the Red Sea as follows:

(a) *In Summer:* Between July and October, the mean sea level at Port Said is slightly higher than that of the Bitter Lakes. This difference (which reaches its maximum about 0.20 m. in September), due to the great evaporation at the Bitter Lakes, causes the *predominance of the Southward* current in duration and velocity.

(b) *In Winter:* Between December and May, the mean sea level at the Bitter Lakes is slightly higher than that of Port Said. This difference which reaches its maximum of about 0.30 m. in January, causes the *predominance of the Northward* current in duration and velocity.

(B) The Lakes (Timsah and Bitter Lakes)

(1) The Lakes along the Canal have an important role in dampening the effects of sudden meteorological changes.

(2) The Bitter Lakes with a surface of about 250 sq.km. reduce the vertical movement of the tide to a minimum between Km. 100 and Km. 130.

(3) The high Spring tidal range (MHWS) in the Great Bitter Lake may reach 0.25 m.

(4) The phase of the vertical tide in the Great Bitter Lake is about 3 hours later than that of Port Tewfik.

(5) The vertical tide in Lake Timsah is almost in phase with the tide in the Great Bitter Lake.

(C) The Southern Region

This part is located between Port of Suez and the Bitter Lakes.

(1) The height of tide at Suez co-oscillates with the tides of the Red Sea with extreme tidal range of about 1.90 m. at Spring tides. This range decreases gradually going North till the Bitter Lakes entrance where it is 0.15 m. at Genefa.

(2) The tidal volume of the Bitter Lakes is very large compared to the tidal volume of the Southern section. Consequently the currents are relatively strong and almost uniform between Port Tewfik and Genefa.

(3) In this region the Northward current is called *Flood* and the Southward current is called *Ebb*.

(4) Peak currents about 50 minutes after predicted HW and LW at Port Tewfik.

(5) At the entrance of the Canal, Km. 159, the *Flood* tide starts at an average of 3 hours after the LW at Suez. The *Ebb* tide 3 hours after HW in Suez.

(6) Generally in Summer, the duration of the *Ebb* exceeds the average of 6 hours. In Winter, the *Flood* is the predominant. The *Ebb* is prolonged by "Strong Northerly Winds". The *Flood* is prolonged by "Strong Southerly Winds".

(7) In this region the average peak current is about 1.5 knots. In Spring tides, current may reach 2.5 knots.

(8) The change of current occurs 5 to 10 minutes later on the bottom of the Canal, than on its surface.

(C) Current Buoys

In the Canal, there are current buoys indicating the direction of the current:

Head Current: Red and white horizontal bands or 1 reflector at night.

Stern Current: Black and white vertical stripes or 2 reflectors at night.

These buoys are laid in the following positions:

El Raswa	Km.	3.710 East
Port Fouad	Km.	2.750 East
Ras El Ech (E)	Km.	12.800 East
Ras El Ech (W)	Km.	14.304 East
Tineh	Km.	24.775 East
Cap	Km.	35.420 East
Kantara	Km.	45.130 East
Ballah (E & W)	Km.	54.770 East
Ferdan	Km.	64.894 East
Ismailia (E)	Km.	76.127 East
Toussom	Km.	86.780 East
Deversoir (E & W)	Km.	97.845 East
Kabrit (E & W)	Km.	120.827 East
Genefa	Km.	133.950 East
Chaloufa	Km.	146.125 East
Port Tewfik	Km.	160.300 East

Article 85: Weather Forecast

Six meteorological stations are installed on the Canal area. Information about local weather will be passed to vessels through Pilots, Ismailia Radio Station.

PART III – COMMUNICATIONS – SIGNALS.

CHAPTER IX: RADIO COMMUNICATIONS

Article 86: Wireless and Inmarsat Service

(1) General: Vessels must have their W/T and/or Radio Telephony apparatus in good working order before entering the Canal.

They must also be fitted with a VHF set easily operated from the bridge. It will have the working frequency range of the marine band (156 to 174 MHz), especially Channels 6, 8, 9, 10, 11, 12, 13, 14, 15, 16, 71, 73 and 74.

If not, they will rent one from the Suez Canal Authority for the transit.

(2) SCA Marine Communication Centre (SUQ): Suez Canal Wireless Station SUQ (Marine Communication Centre) has different communication facilities to contact vessels in the open sea or approaching areas and while transiting the Canal.

All these communication facilities are in compliance with the latest GMDSS Regulations:

I – Radio Telex:

(a) Frequency allocated to contact with vessels by Radio Telex from open sea to inform Suez Canal Authority of their expected time of arrival (ETA) to Port Said or Port Tewfik harbours.

ID No. 4820 / Hours of service: 24 hours.

Transmits	Receives	Mode	Watch hours
4250	6310 4205	FIB	H 24

Vessels are requested to send the following data 48 hours and 24 hours before arrival and when arriving in the approaches.

Vessel's name Call sign SCID ETA Draft SCGT

....

Cargo Dangerous Cargo and Flash point

....

Origin Destination Agent's name

....

(b) Frequencies allocated to contact vessels by Radio Telex while transiting Suez Canal or from waiting areas.

ID No. 4820 / Hours of service: 24 hours.

Transmits	Receives	Channel	Mode	Watch hours
1612	2147	211	FIB	H 24

R/T and broadcast facilities are available on the same frequencies.

II – W/T Morse:

W/T Morse will continue to contact vessels transiting the Canal and from waiting areas:

W/T (MF) Hours of service: 24 hours.

Call sign	Transmits	Receives	Channel	Mode	Watch hours
SUQ	520.5	469.5 and 454	109	A1A-A2A	H 24

III – Inmarsat Communication:

Vessels having on board Inmarsat station to contact Suez Canal Authority (SES) at Suez Canal Marine Communication Centre SUQ to send their ETA 48 hours and 24 hours before arrival and when arriving in the approaches.

The Suez Canal Authority (SES) identification numbers (ID) are as follows:

(a) Telex: 581-1622570.
(b) Voice: 871-1622570.
(c) Fax: 871-1622574.
Answerback: Suez.

IV – International Land Telex and Fax:

Suez Canal Marine Communication Centre SUQ has international Telex No. 63528 SUQ SC UN.

Also international Fax No. 002-064-393517.

V – Weather Reports:

SUQ broadcasts daily weather reports and navigational warnings (if exist) to vessels transiting the Canal or in the approaches.

Article 87: VHF – UHF Radiotelephony

(A) VHF Radiotelephony for vessels from sea

(1) *At Port Said*

(a) Port Management (listening): Call Sign: "Port Said 16" (HP-1) 156.800 MHz.

(b) Pilot Vessel and Radar Guidance:

(i) Outside the Harbour: Call Sign: "Port Said 12" (HP-2) 156.600 MHz.

(ii) Inside the Harbour: Call Sign: "Port Said 13" (HP-3) 156.650 MHz.

(c) Admeasurement Office: Call Sign: "Port Said 73" (M) 156.675 MHz.

(2) *At Port of Suez*

(a) Port Management (listening): Call Sign: "Suez 16" (HP-1) 156.800 MHz.

(b) Pilot Vessel and Radar Guidance:

(i) Outside the Harbour: Call Sign: "Suez 11" (HP-2) 156.550 MHz.

(ii) Inside the Harbour: Call Sign: "Suez 14" (HP-3) 156.700 MHz.

(c) Admeasurement Office: Call Sign: "Suez 74" (M) 156.675 MHz.

(B) UHF/Radiotelephony in the Canal

(1) UHF voice communications system was built to cover all the Canal and its approaches to facilitate communication between pilots and the main Movement Office at Ismailia and the Port Management Offices.

The Canal pilot uses a special portable UHF personal transceiver which have the following frequencies.

Channel No.	*Transmission Frequency MHz*	*Reception Frequency MHz*	*Function*
1	415.350	412.850	V/Ls from North (SB)
2	415.600	413.100	V/Ls from South (NB)
3	415.850	413.350	Emergency (EM)
4	416.600	414.100	In Port of Suez Harbour HP (T)
5	416.350	413.850	In Port Said Harbour HP (S)
6	416.125	413.600	Emergency Critical (EMC) Critical V/Ls (out of convoy)

(2) Escort tugs-towing tugs will use special portable UHF transceiver sets which have the following frequencies.

(3) Channel 1 414.750 MHz.
Channel 2 414.775 MHz.
Channel 3 414.800 MHz.

CHAPTER X: THE SUEZ CANAL VESSEL TRAFFIC MANAGEMENT SYSTEM (SCVTMS)

Article 88: Overview

Suez Canal has upgraded its VTMS installed in 1978 to readjust some of the planning movement concepts to the new generation of vessels and technology. The new system will provide complete surveillance and tracking by radar coverage of vessels throughout the Canal and its approaches at Port Said and Port Tewfik harbours, tracking by Loran-C will be used as a back-up for the radar surveillance. The newly developed VTMS system will provide the following services:

(1) Automatic surveillance and tracking of vessels arriving at Suez Canal approaches (15 miles away) until anchorage in the waiting areas.

(2) Automatic determination of arrival times at ports.

(3) Automatic continuous tracking and monitoring of vessel's position, speed and separation distances for all vessels transiting the Suez Canal.

(4) Provide the Port Management Centres at Port Said and Port Tewfik, as well as Ismailia Main Traffic Management Centre, with sufficient instantaneous information about vessels transiting the Canal by means of displaying complete televised radar pictures of the whole Canal and very powerful information system.

(5) Provide automatic displaying system for Pilots at all signal stations (signal state board) which display his arrival time, meteorological data, and emergency information.

(6) Provide integral data base for vessel information, transit regulations, traffic flow transit pattern, Pilot assignment, vessel billing and navigation reports.

(7) Provide an efficient and quick means of communication with vessels arriving at ports and with Pilots on board of vessels transiting the Canal.

This system will add more safety values for vessels and cargo during passage through the Suez Canal. The newly adopted computerised ideal/real transit pattern will ensure optimum and safety transit passage for the benefit of her world users, Owners of vessels and the international trade.

Article 89: System Operation

(1) Transit Request: In order to assign a vessel in the system informatically, a transit request must be received from the vessel's Owners or Agent at one of the Port Management Offices.

Vessel Transit Request usually takes one of the following forms:

Booking in advance; usually 3 or 4 days prior to arrival at port.

Suez Canal Authority informed by telex or Agent that ship will arrive within 48 hours.

Suez Canal Authority advised that ship will arrive at any time.

A vessel that has previously transited the Canal will have a unique Suez Canal file number (Suez Canal Authority ID).

It is required that this ID must be provided when the request for transit is made.

If the vessel is not currently in the system information and data base, the Port Management Operator will create vessel particulars and automatically assign a unique Suez Canal Authority ID.

(2) Vessel Arrivals: A vessel approaching the Canal at either end is requested to call the Port Management Office on one of the frequencies listed in Article 88.

The vessel is requested to declare her position, her international call sign and Suez Canal Authority ID.

The vessel will be tracked automatically by the radar sub-system and displayed on the graphic display, so that the Port Management Operator will be able to infolink it with the information on the arrival list.

(3) Vessel Reaching the Anchorage Area: At both Port Said and Port Tewfik, anchorage areas are indicated on radar graphic displays.

Whenever a linked vessel reaches an anchorage area, the information will record the time the vessel reaches an anchorage area.

(4) Vessel Berth List: The Port Management Office will continue tracking the vessel until entering the assigned berth location and stop and vessel berth list is created in the information.

Each berth location will be indicated on the Port Management graphic displays, as well as Ismailia graphic displays.

The vessel berth list will be updated periodically to reflect any changes to the Port Operators.

(5) Creation of the Transit Pattern: The Main Management Centre at Ismailia will generate the optimal convoy pattern based on the vessels currently in the waiting areas or estimated to be in the waiting areas by the limit times.

The transit pattern will determine each convoy's start time and maximum time width.

(6) Convoy Creation: At Port Said and Port Tewfik, the Harbour Master will order the vessels in the convoy patterns that were generated by the Main Management Centre at Ismailia.

The official convoy list will only be comprised of vessels that have marked as eligible for transit (paid the transit fees, Performance Certificate, etc.).

(7) Assign Pilot to Vessels: The Port Management Office will assign the Roads and Canal Transit Pilots. Pilot list and pilot convoy list will be printed.

(8) Pilot Boarding Order: After the official convoy list is created, the convoy list report will be printed. After Pilot(s) have been assigned, boarding order reports will be printed.

These reports will be given to each Transit and Roads Pilot as part of their pilot boarding orders.

(9) Vessels enter the Canal: As vessels leave their berths at the port, the Port Management Office will follow and track them until entering the Canal.

As the vessel enters into the Canal, their identifiers will be automatically updated to add their ID and relative position within the convoy against their displayed picture on the display at Port Office and Main Management Office at Ismailia.

(10) Real Transit Pattern: As the convoy progresses along the Canal, the real time transit pattern is displayed and plotted.

The real time transit pattern screen will provide the capability of viewing real time information as X, Y positions, speed, kilometer positions and off-axis for each vessel, as well as the meteorological data of all signal stations, including the wind speed and direction, visibility, current speed and direction, and height of the tide.

(11) Vessel Passes Check Points: Check points are the inlets and outlets of by-passes, siding, each signal station, the Canal start and the Canal end.

The order of vessels within the convoy is re-checked at each check points. If the vessel has changed position within the convoy, this is automaticallly recorded in the transit history.

The information data base is updated to reflect the convoy and new convoy position displayed against the target.

(12) Information Displayed on the Signal Station Board: As each vessel passes a signal station, the information will then update the signal station boards to provide convoy progress, the following information (Table 1 to 5) for a vessel as it passes the station.

Information of vessels as vessel name, convoy position, Suez Canal Authority ID, call sign, speed, location and meteorological data will be displayed to the signal station operators on signal station PCs.

(13) Vessel Leaves the Canal: When vessels get out of range of radar, the information will close the vessel transit and is saved as a closed transit for historical reporting purposes.

(14) In case of emergency or radar failure, the Canal Pilot will board the vessel with Loran-C; it will be installed on board the vessel by Suez Canal Authority personnel.

By initialising command from the Canal Main Management Office at Ismailia, tracking by Loran-C chain is executed.

In some cases, tracking by both radar and Loran-C chain will be executed to monitor the progress of vessel during their transit through the Canal, in order to assure safety transit and increase Canal efficiency.

Article 90 – New Information for Vessels Transiting the Canal

(1) Each vessel has special Suez Canal Authority File number (SCA ID) in the new information system in Suez Canal.

Suez Canal Authority distributes free of charge special SCA ID card to be kept in the radio room, vessel must report SCA FILE NR on all arrival messages for transits or port calls.

Any change in vessel's characteristics should be reported to Suez Canal Authority officially, to be filled in SCA ID.

(2) Meteorological data will be displayed on signal state boards (2nd line) to inform vessels of the prevailing weather conditions, as they pass the signal station.

Also emergency or navigation instructions from the Main Management Office at Ismailia can be displayed on the same line alternatively.

(3) The CORT should be mounted on either of the two wings on entrance of the Canal, the area around should be clear of obstructions within 10 ft. radius.

A trained Suez Canal Authority technician will mount the CORT in place and operate before disembarking.

The vessel is asked to install electrical outlet 110/220 Volts AC (Hubbel socket type 2356 flanged receptacle nylon casing Hubbel catalogue No. 35-R-2B 37), on the two wings to supply the CORT with electrical power.

Before vessel exits the Canal at either end of the Canal, the CORT will be dismantled by a Suez Canal Authority technician.

CHAPTER XI: SIGNALS

Article 91: Generalities

(1) All signals used in Canal Waters are shown in the "Plan Section".

(2) All flags and pendants to be hoisted by vessels, as shown hereafter, should be those in the International Code of Signals.

(3) Night signals shall be hoisted where best seen by other vessels.

Article 92: Sound Signals

(A) Normal Manoeuvre

(1) The International Regulation for Preventing Collision at Sea Signals.

"One short blast": I am altering my course to starboard.

"Two short blasts": I am altering my course to port.

"Three short blasts": I am operating astern propulsion.

(2) The signal 5 or 6 short blasts repeated several times at short intervals to say: "I am reducing speed and may have to stop or make fast".

At night besides the blasts, four to five long flashes with the Aldis lamp or signal mast lamp.

(3) The signal one prolonged blast to attract attention.

The expression "short blast" means a blast of about 1 second duration.

The expression "prolonged blast" means a blast of 4 to 6 seconds duration.

CHAPTER VII: BUOYAGE SYSTEM IN THE CANAL

Article 82: Buoyage

The navigable channel is marked by pairs of light buoys. On the East side green buoys showing Green lights. On the West side Red buoys showing Red lights.

In the straight parts, the distance between each pair is 1.5 km. in the North Section, and 1.0 km. in the South Section. In the curves the distances will be less than 1.0 km. All buoys in the Canal and its approaches are fitted with radar reflector.

Article 83: Position and Characteristics of Buoys in the Suez Canal.

See "Plan".

CHAPTER VIII: NATURAL CONDITIONS

Article 84: Tides and Currents in Suez Canal

The Suez Canal is divided in three main sectors according to the nature of tide in each.

The characteristics of each can be summarised as follows:

(A) The Northern Sector

This part is located between Port Said and the Great Bitter Lake.

(1) The height of tide at Port Said co-oscillates with the tides of the Mediterranean sea with 0.50 m. extreme tidal range (difference between highest and lowest levels) at Spring tides. This tidal range decreases gradually going South, to be about 0.20 m. at the entrance of Lake Timsah.

(2) In this sector, the peak tidal current may reach 1.0 knot (in case of no wind).

(3) Currents can be doubled by strong prevailing winds.

(4) Peak currents occur about 50 minutes after predicted HW and LW at Port Said.

(5) The duration and velocity of currents in this sector are greatly affected by the relative mean sea levels between the Mediterranean sea, the Bitter Lakes and the Red Sea as follows:

(a) *In Summer:* Between July and October, the mean sea level at Port Said is slightly higher than that of the Bitter Lakes. This difference (which reaches its maximum about 0.20 m. in September), due to the great evaporation at the Bitter Lakes, causes the *predominance of the Southward* current in duration and velocity.

(b) *In Winter:* Between December and May, the mean sea level at the Bitter Lakes is slightly higher than that of Port Said. This difference which reaches its maximum of about 0.30 m. in January, causes the *predominance of the Northward* current in duration and velocity.

(B) The Lakes (Timsah and Bitter Lakes)

(1) The Lakes along the Canal have an important role in dampening the effects of sudden meteorological changes.

(2) The Bitter Lakes with a surface of about 250 sq.km. reduce the vertical movement of the tide to a minimum between Km. 100 and Km. 130.

(3) The high Spring tidal range (MHWS) in the Great Bitter Lake may reach 0.25 m.

(4) The phase of the vertical tide in the Great Bitter Lake is about 3 hours later than that of Port Tewfik.

(5) The vertical tide in Lake Timsah is almost in phase with the tide in the Great Bitter Lake.

(C) The Southern Region

This part is located between Port of Suez and the Bitter Lakes.

(1) The height of tide at Suez co-oscillates with the tides of the Red Sea with extreme tidal range of about 1.90 m. at Spring tides. This range decreases gradually going North till the Bitter Lakes entrance where it is 0.15 m. at Genefa.

(2) The tidal volume of the Bitter Lakes is very large compared to the tidal volume of the Southern section. Consequently the currents are relatively strong and almost uniform between Port Tewfik and Genefa.

(3) In this region the Northward current is called *Flood* and the Southward current is called *Ebb*.

(4) Peak currents about 50 minutes after predicted HW and LW at Port Tewfik.

(5) At the entrance of the Canal, Km. 159, the *Flood* tide starts at an average of 3 hours after the LW at Suez. The *Ebb* tide 3 hours after HW in Suez.

(6) Generally in Summer, the duration of the *Ebb* exceeds the average of 6 hours. In Winter, the *Flood* is the predominant. The *Ebb* is prolonged by "Strong Northerly Winds". The *Flood* is prolonged by "Strong Southerly Winds".

(7) In this region the average peak current is about 1.5 knots. In Spring tides, current may reach 2.5 knots.

(8) The change of current occurs 5 to 10 minutes later on the bottom of the Canal, than on its surface.

(C) Current Buoys

In the Canal, there are current buoys indicating the direction of the current:

Head Current: Red and white horizontal bands or 1 reflector at night.

Stern Current: Black and white vertical stripes or 2 reflectors at night.

These buoys are laid in the following positions:

El Raswa	Km.	3.710 East
Port Fouad	Km.	2.750 East
Ras El Ech (E)	Km.	12.800 East
Ras El Ech (W)	Km.	14.304 East
Tineh	Km.	24.775 East
Cap	Km.	35.420 East
Kantara	Km.	45.130 East
Ballah (E & W)	Km.	54.770 East
Ferdan	Km.	64.894 East
Ismailia (E)	Km.	76.127 East
Toussom	Km.	86.780 East
Deversoir (E & W)	Km.	97.845 East
Kabrit (E & W)	Km.	120.827 East
Genefa	Km.	133.950 East
Chaloufa	Km.	146.125 East
Port Tewfik	Km.	160.300 East

Article 85: Weather Forecast

Six meteorological stations are installed on the Canal area. Information about local weather will be passed to vessels through Pilots, Ismailia Radio Station.

PART III – COMMUNICATIONS – SIGNALS.

CHAPTER IX: RADIO COMMUNICATIONS

Article 86: Wireless and Inmarsat Service

(1) General: Vessels must have their W/T and/or Radio Telephony apparatus in good working order before entering the Canal.

They must also be fitted with a VHF set easily operated from the bridge. It will have the working frequency range of the marine band (156 to 174 MHz), especially Channels 6, 8, 9, 10, 11, 12, 13, 14, 15, 16, 71, 73 and 74.

If not, they will rent one from the Suez Canal Authority for the transit.

(2) SCA Marine Communication Centre (SUQ): Suez Canal Wireless Station SUQ (Marine Communication Centre) has different communication facilities to contact vessels in the open sea or approaching areas and while transiting the Canal.

All these communication facilities are in compliance with the latest GMDSS Regulations:

I – Radio Telex:

(a) Frequency allocated to contact with vessels by Radio Telex from open sea to inform Suez Canal Authority of their expected time of arrival (ETA) to Port Said or Port Tewfik harbours.

ID No. 4820 / Hours of service: 24 hours.

Transmits	Receives	Mode	Watch hours
4250	6310 4205	FIB	H 24

Vessels are requested to send the following data 48 hours and 24 hours before arrival and when arriving in the approaches.

Vessel's name	Call sign	SCID	ETA	Draft	SCGT
....	......	....	...	.....	....

Cargo	Dangerous Cargo and Flash point
....	....

Origin	Destination	Agent's name
....	.....	......

(b) Frequencies allocated to contact vessels by Radio Telex while transiting Suez Canal or from waiting areas.

ID No. 4820 / Hours of service: 24 hours.

Transmits	Receives	Channel	Mode	Watch hours
1612	2147	211	FIB	H 24

R/T and broadcast facilities are available on the same frequencies.

II – W/T Morse:

W/T Morse will continue to contact vessels transiting the Canal and from waiting areas:

W/T (MF) Hours of service: 24 hours.

Call sign	Transmits	Receives	Channel	Mode	Watch hours
SUQ	520.5	469.5 and 454	109	A1A-A2A	H 24

III – Inmarsat Communication:

Vessels having on board Inmarsat station to contact Suez Canal Authority (SES) at Suez Canal Marine Communication Centre SUQ to send their ETA 48 hours and 24 hours before arrival and when arriving in the approaches.

The Suez Canal Authority (SES) identification numbers (ID) are as follows:

(a) Telex: 581-1622570.
(b) Voice: 871-1622570.
(c) Fax: 871-1622574.
Answerback: Suez.

IV – International Land Telex and Fax:

Suez Canal Marine Communication Centre SUQ has international Telex No. 63528 SUQ SC UN.

Also international Fax No. 002-064-393517.

V – Weather Reports:

SUQ broadcasts daily weather reports and navigational warnings (if exist) to vessels transiting the Canal or in the approaches.

Article 87: VHF – UHF Radiotelephony

(A) VHF Radiotelephony for vessels from sea

(1) *At Port Said*

(a) Port Management (listening): Call Sign: "Port Said 16" (HP-1) 156.800 MHz.

(b) Pilot Vessel and Radar Guidance:

(i) Outside the Harbour: Call Sign: "Port Said 12" (HP-2) 156.600 MHz.

(ii) Inside the Harbour: Call Sign: "Port Said 13" (HP-3) 156.650 MHz.

(c) Admeasurement Office: Call Sign: "Port Said 73" (M) 156.675 MHz.

(2) *At Port of Suez*

(a) Port Management (listening): Call Sign: "Suez 16" (HP-1) 156.800 MHz.

(b) Pilot Vessel and Radar Guidance:

(i) Outside the Harbour: Call Sign: "Suez 11" (HP-2) 156.550 MHz.

(ii) Inside the Harbour: Call Sign: "Suez 14" (HP-3) 156.700 MHz.

(c) Admeasurement Office: Call Sign: "Suez 74" (M) 156.675 MHz.

(B) UHF/Radiotelephony in the Canal

(1) UHF voice communications system was built to cover all the Canal and its approaches to facilitate communication between pilots and the main Movement Office at Ismailia and the Port Management Offices.

The Canal pilot uses a special portable UHF personal transceiver which have the following frequencies.

Channel No.	Transmission Frequency MHz	Reception Frequency MHz	Function
1	415.350	412.850	V/Ls from North (SB)
2	415.600	413.100	V/Ls from South (NB)
3	415.850	413.350	Emergency (EM)
4	416.600	414.100	In Port of Suez Harbour HP (T)
5	416.350	413.850	In Port Said Harbour HP (S)
6	416.125	413.600	Emergency Critical (EMC) Critical V/Ls (out of convoy)

(2) Escort tugs-towing tugs will use special portable UHF transceiver sets which have the following frequencies.

(3) Channel 1 414.750 MHz.
Channel 2 414.775 MHz.
Channel 3 414.800 MHz.

CHAPTER X: THE SUEZ CANAL VESSEL TRAFFIC MANAGEMENT SYSTEM (SCVTMS)

Article 88: Overview

Suez Canal has upgraded its VTMS installed in 1978 to readjust some of the planning movement concepts to the new generation of vessels and technology. The new system will provide complete surveillance and tracking by radar coverage of vessels throughout the Canal and its approaches at Port Said and Port Tewfik harbours, tracking by Loran-C will be used as a back-up for the radar surveillance. The newly developed VTMS system will provide the following services:

(1) Automatic surveillance and tracking of vessels arriving at Suez Canal approaches (15 miles away) until anchorage in the waiting areas.

(2) Automatic determination of arrival times at ports.

(3) Automatic continuous tracking and monitoring of vessel's position, speed and separation distances for all vessels transiting the Suez Canal.

(4) Provide the Port Management Centres at Port Said and Port Tewfik, as well as Ismailia Main Traffic Management Centre, with sufficient instantaneous information about vessels transiting the Canal by means of displaying complete televised radar pictures of the whole Canal and very powerful information system.

(5) Provide automatic displaying system for Pilots at all signal stations (signal state board) which display his arrival time, meteorological data, and emergency information.

(6) Provide integral data base for vessel information, transit regulations, traffic flow transit pattern, Pilot assignment, vessel billing and navigation reports.

(7) Provide an efficient and quick means of communication with vessels arriving at ports and with Pilots on board of vessels transiting the Canal.

This system will add more safety values for vessels and cargo during passage through the Suez Canal. The newly adopted computerised ideal/real transit pattern will ensure optimum and safety transit passage for the benefit of her world users, Owners of vessels and the international trade.

Article 89: System Operation

(1) Transit Request: In order to assign a vessel in the system informatically, a transit request must be received from the vessel's Owners or Agent at one of the Port Management Offices.

Vessel Transit Request usually takes one of the following forms:

Booking in advance; usually 3 or 4 days prior to arrival at port.

Suez Canal Authority informed by telex or Agent that ship will arrive within 48 hours.

Suez Canal Authority advised that ship will arrive at any time.

A vessel that has previously transited the Canal will have a unique Suez Canal file number (Suez Canal Authority ID).

It is required that this ID must be provided when the request for transit is made.

If the vessel is not currently in the system information and data base, the Port Management Operator will create vessel particulars and automatically assign a unique Suez Canal Authority ID.

(2) Vessel Arrivals: A vessel approaching the Canal at either end is requested to call the Port Management Office on one of the frequencies listed in Article 88.

The vessel is requested to declare her position, her international call sign and Suez Canal Authority ID.

The vessel will be tracked automatically by the radar sub-system and displayed on the graphic display, so that the Port Management Operator will be able to infolink it with the information on the arrival list.

(3) Vessel Reaching the Anchorage Area: At both Port Said and Port Tewfik, anchorage areas are indicated on radar graphic displays.

Whenever a linked vessel reaches an anchorage area, the information will record the time the vessel reaches an anchorage area.

(4) Vessel Berth List: The Port Management Office will continue tracking the vessel until entering the assigned berth location and stop and vessel berth list is created in the information.

Each berth location will be indicated on the Port Management graphic displays, as well as Ismailia graphic displays.

The vessel berth list will be updated periodically to reflect any changes to the Port Operators.

(5) Creation of the Transit Pattern: The Main Management Centre at Ismailia will generate the optimal convoy pattern based on the vessels currently in the waiting areas or estimated to be in the waiting areas by the limit times.

The transit pattern will determine each convoy's start time and maximum time width.

(6) Convoy Creation: At Port Said and Port Tewfik, the Harbour Master will order the vessels in the convoy patterns that were generated by the Main Management Centre at Ismailia.

The official convoy list will only be comprised of vessels that have marked as eligible for transit (paid the transit fees, Performance Certificate, etc.).

(7) Assign Pilot to Vessels: The Port Management Office will assign the Roads and Canal Transit Pilots. Pilot list and pilot convoy list will be printed.

(8) Pilot Boarding Order: After the official convoy list is created, the convoy list report will be printed. After Pilot(s) have been assigned, boarding order reports will be printed.

These reports will be given to each Transit and Roads Pilot as part of their pilot boarding orders.

(9) Vessels enter the Canal: As vessels leave their berths at the port, the Port Management Office will follow and track them until entering the Canal.

As the vessel enters into the Canal, their identifiers will be automatically updated to add their ID and relative position within the convoy against their displayed picture on the display at Port Office and Main Management Office at Ismailia.

(10) Real Transit Pattern: As the convoy progresses along the Canal, the real time transit pattern is displayed and plotted.

The real time transit pattern screen will provide the capability of viewing real time information as X, Y positions, speed, kilometer positions and off-axis for each vessel, as well as the meteorological data of all signal stations, including the wind speed and direction, visibility, current speed and direction, and height of the tide.

(11) Vessel Passes Check Points: Check points are the inlets and outlets of by-passes, siding, each signal station, the Canal start and the Canal end.

The order of vessels within the convoy is re-checked at each check points. If the vessel has changed position within the convoy, this is automaticallly recorded in the transit history.

The information data base is updated to reflect the convoy and new convoy position displayed against the target.

(12) Information Displayed on the Signal Station Board: As each vessel passes a signal station, the information will then update the signal station boards to provide convoy progress, the following information (Table 1 to 5) for a vessel as it passes the station.

Information of vessels as vessel name, convoy position, Suez Canal Authority ID, call sign, speed, location and meteorological data will be displayed to the signal station operators on signal station PCs.

(13) Vessel Leaves the Canal: When vessels get out of range of radar, the information will close the vessel transit and is saved as a closed transit for historical reporting purposes.

(14) In case of emergency or radar failure, the Canal Pilot will board the vessel with Loran-C; it will be installed on board the vessel by Suez Canal Authority personnel.

By initialising command from the Canal Main Management Office at Ismailia, tracking by Loran-C chain is executed.

In some cases, tracking by both radar and Loran-C chain will be executed to monitor the progress of vessel during their transit through the Canal, in order to assure safety transit and increase Canal efficiency.

Article 90 – New Information for Vessels Transiting the Canal

(1) Each vessel has special Suez Canal Authority File number (SCA ID) in the new information system in Suez Canal.

Suez Canal Authority distributes free of charge special SCA ID card to be kept in the radio room, vessel must report SCA FILE NR on all arrival messages for transits or port calls.

Any change in vessel's characteristics should be reported to Suez Canal Authority officially, to be filled in SCA ID.

(2) Meteorological data will be displayed on signal state boards (2nd line) to inform vessels of the prevailing weather conditions, as they pass the signal station.

Also emergency or navigation instructions from the Main Management Office at Ismailia can be displayed on the same line alternatively.

(3) The CORT should be mounted on either of the two wings on entrance of the Canal, the area around should be clear of obstructions within 10 ft. radius.

A trained Suez Canal Authority technician will mount the CORT in place and operate before disembarking.

The vessel is asked to install electrical outlet 110/220 Volts AC (Hubbel socket type 2356 flanged receptacle nylon casing Hubbel catalogue No. 35-R-2B 37), on the two wings to supply the CORT with electrical power.

Before vessel exits the Canal at either end of the Canal, the CORT will be dismantled by a Suez Canal Authority technician.

CHAPTER XI: SIGNALS

Article 91: Generalities

(1) All signals used in Canal Waters are shown in the "Plan Section".

(2) All flags and pendants to be hoisted by vessels, as shown hereafter, should be those in the International Code of Signals.

(3) Night signals shall be hoisted where best seen by other vessels.

Article 92: Sound Signals

(A) Normal Manoeuvre

(1) The International Regulation for Preventing Collision at Sea Signals.

"One short blast": I am altering my course to starboard.

"Two short blasts": I am altering my course to port.

"Three short blasts": I am operating astern propulsion.

(2) The signal 5 or 6 short blasts repeated several times at short intervals to say: "I am reducing speed and may have to stop or make fast".

At night besides the blasts, four to five long flashes with the Aldis lamp or signal mast lamp.

(3) The signal one prolonged blast to attract attention.

The expression "short blast" means a blast of about 1 second duration.

The expression "prolonged blast" means a blast of 4 to 6 seconds duration.

(B) Obstruction in Channel in all Circumstances

A vessel which under any circumstances causes or finds obstruction in the channel must immediately warn the vessels in the vicinity.

That warning is given by whistle or siren:

4 long blasts meaning: "The channel is not free".

That warning must be repeated every 3 minutes until vessels concerned have answered in the same manner. As soon as they hear the signal mentioned above, the vessels take steps to stop and instruct a Radio Watch, to receive full details of the alert given by the vessel that sent the said signal. The vessel should maintain Radio Watch until otherwise advised.

(C) Ship Failure (To Dredgers)

In case of engine or steering failure making the vessel not under command, while approaching a dredger, the vessel has to give the signal one long blast followed by two short blasts (– · ·).

(D) Vessel Mooring Voluntarily for Fog or Sand Storm

During the mooring manoeuvre, the vessel sounds every 2 minutes a series of 6 short blasts.

Once made fast (Signal No. 16 "G.V." is hoisted), the vessel must rapidly ring the bell for 5 seconds at intervals not exceeding one minute. For vessels of 100 m. and over, they will have to ring the bell forward and in addition a gong aft, at intervals not exceeding one minute, (a gong or any other instrument which tone and sound will be different to that of the bell forward).

These signals are stopped when the vessel is told that all vessels concerned have been notified of her mooring.

(E) Vessel Aground or Across Canal

See Article 92 (B) Obstruction in Channel.

(F) Between Vessels and Tugs

(1) Vessel Aground in the Canal

Signals between a vessel aground in the Canal and a tug.

These signals are for manoeuvre of refloating, as long as the vessel has one of the grounding signals.

Pull slowly	(– ·)
Increase	(– · ·)
Stop	(– –)
Slack the line	(– – ·)
I am to let go	(– – · ·)

These signals are to be repeated by the tug.

(2) Vessel Towed in the Canal

Signals between a vessel towed in the Canal and a tug.

Radiotelephony is used as communication between ship and tug, besides the following signals.

		By Day (Flag)	*At Night (Sound)*
Slow speed	:	"A" hoisted above bridge	(– ·)
Half speed	:	"A" hoisted half way	(– · ·)
Normal Tow	:	"A" hoisted right up	(– · · ·)
Steady	:	"A" lowered	(– –)

(Or sound signals if considered surer).

The sound signals are to be repeated by the tug.

The flag signal remains flying as long as the tug is to give the signalled speed.

By day, every change of flag signals is followed by a long blast.

(G) Signals Between VLCCs and Escort Tugs

(1) Attention to Start Manoeuvre

Prolonged blasts given by the ship.

(2) Stern Tug

Bring my stern to starboard	(·)
Bring my stern to port	(· ·)
Keep my stern in the axis	(· · ·)
Pull my stern aft slowly	(· · · ·)
Increase pulling my stern up to half speed astern	(· · · · –) (· · · · ·)
Increase pulling my stern up to full speed astern	(· · · · · –) (· · · · · ·)
Stop pulling (very long blast)	(——)

(3) Forward Tug

Give me a push on starboard bow	(–)
Give me a push on port bow	(– –)
Stop pushing	(– – –)

Article 93: See "Plans".

WADI FIRAN: 28.44 N. 33.13 E. (See Plan)

An open anchorage on Sinai coast in the Gulf of Suez about 85 nautical miles South of Suez.

There are 12 large and conspicuous storage tanks in 2 parallel rows of 6 tanks each lined on shore near the pumping station and painted with aluminium.

DOCUMENTS:

4 Crew Lists.
2 Stores Lists.
2 Vaccination Lists.

PILOTAGE: Pilot boards each tanker at anchorage.

ANCHORAGE: Lat. 28° 44.5' N., Long. 33° 09.5' E.

RESTRICTIONS: Mooring and unmooring during daylight only.

Vessels must have 150 fathoms of chain on each anchor.

MAX. SIZE: 105,000 d.w.t. Max. draft 75 ft. at Berth No. 1.

RADIO: It is essential that vessels bound for Wadi Firan give 72 hours, 48 hours and 24 hours notice to both "Petmisr Cairo 92049 UN" and "Petbel 92449 UN", to be accepted on the berth without delay. Contact Abu Rudeis on VHF Channel 16 when in range. There is no radio station at Abu Rudeis. Pilots working on Channel 14.

VHF: VHF Channels 16 and 14 are used for communication between tanker and pumping station.

TUGS: 1×3,080 h.p. and 1×4,080 h.p. available for mooring and unmooring.

BERTHING: Tankers must approach berth from West, never from North, and must follow same track on their departure to be entirely clear of shallow water. Tankers at berth will be connected to shore pumping station by submarine hoses for pumping crude oil (12 in. hose from the starboard side).

Two mooring launches available. Both ship's anchors are used, the port anchor first, normally 9-10 shackles in the water on each. At the stern 4 wire ropes from buoys are taken on board. Special care should be taken when mooring in Southerly winds. If blowing strong, berthing may be delayed.

	Berth No. 1	*Berth No. 2*
Position:	Lat. 28° 45' N.	Lat. 28° 43.5' N.
	Long. 33° 11.5' E.	Long. 33° 11.5' E.
LOA:	900 ft.	800 ft.
Water Depth:	75 ft.	58 ft.
Max. Draft:	53 ft.	40 ft.
Max. D.W.T.	105,000	50,000
Sea Line (Crude):	24 in.	18 in.
Sea Line (Ballast):	18 in.	18 in.
Tanker's Length:	900 ft.	700 ft.
Max. loading rate:	4,000 t.p.h.	2,500 t.p.h.

Reception facilities for 30,000 cu.m. of dirty ballast.

Two tankers can moor simultaneously but only one may load.

DENSITY: 1032.

FRESH WATER: Not available.

FUEL: Not available.

AUTHORITY: Belayim Petroleum Co., 5 El Mokhayam El Dayem Street, Nasr City, Cairo, Egypt. (P.O. Box No. 7074). *Tel:* 2621738, 2621739, 2621740, 2621742, 2621743, 2621744. *Telex:* 21003 Petbl UN, 92373 Petbl UN, 92449 Petbl UN. *FAX:* 2609792 Cairo. *Contact:* Ibrahim El Shafie, Operations General Manager.

ZAAFARANA TERMINAL: 29.10 N. 32.41 E.

LOCATION: The Floating Production Storage and Offloading tanker (FPSO) "Al-Zaafarana" is located in position Lat. 29° 10' 27.93" N., Long. 32° 41' 28.56" E.

MAX. SIZE: 130,000 tonnes Summer d.w.t., LOA 850 ft. and max. draft 55 ft.

RADIO: Master to give E.G.P.C. (Supply Section) and Terminal 72 hours, 48 hours and 24 hours Notice of Arrival.

VHF: Tankers can call "Al Zaafarana" on Channels 16 and 8.

BERTHING: Vessel moors alongside the FPSO.

LOADING: Tankers must be equipped with inert gas system, have a derrick with minimum 5 tons capacity and be S.B.T. or C.B.T.

Loading rate is 3,000 t.p.h. through 3×12 in. lines with Camlock couplings.

BALLAST: Tankers are permitted to discharge clean ballast to sea as per current Marpol Regulations.

ZEIT BAY: 27.50 N. 33.36 E. (See Plan)

(A) SBM.

(B) LPG BERTH.

(A) SBM.

LOCATION: Zeit Bay Terminal is approximately 60 km. North of Hurgada.

ANCHORAGES: Waiting area centred on Lat. 27° 48.5' N., Long. 33° 37.0' E. Radius 1 mile. Depth ranges from 22 m. to 38 m., with 31 m. at centre.

Vessel is not permitted to anchor outside the anchorage area.

RESTRICTIONS: Weather conditions may prevent berthing. This is the case when wind speed exceeds 25 knots. Vessel will then remain in the anchorage until weather improves. Daylight berthing only. Unberthing any time.

MAX. SIZE: 35,000 tons (SDWT) to 250,000 tons (SDWT) with permissible max. draft up to 18.0 m. and LOA 500 ft. – 1,130 ft.

HEALTH: Masters are to indicate any sickness on board in their ETA notification. SUCO will arrange with Health Authorities if so required.

RADIO: Tankers calling at Zeit Bay must send ETA message 72, 48, 24, and 12 hours distant from the terminal to SUCO Head Office, via any coastal radio station: Alexandria, Port Said, Suez and Kosseir.

ETA messages to SUCO should give the best estimates of ship's arrival time at the terminal and relevant information on lifting gear, connections, ballast/segregated/dirty and quantity. This ETA message should also include a definite statement of details of any equipment required from shore for connecting 16 in. floating hose, bearing in mind that such hose needs tanker to be equipped with crane, classed and certified to at least 10 tons capacity.

VHF: Master must call "Zeit Bay" 4 hours prior arrival on VHF Channel 16, working Channel 12.

TUGS: Two mooring line boats, 1×500 h.p. and 1×1,000 h.p. are available to assist with mooring and hose connection. The boats are equipped for anti-pollution operations.

One fire fighting tug available on a standby basis whilst loading operations are in progress.

BERTHING: All mooring equipment is available and will be placed on board the vessel when Mooring Master boards.

A vessel can make the final approach and moor to buoy from any direction, bearing in mind prevailing weather and tidal conditions. The approach shall be made from the direction which is consistent with a safe approach, and speed shall be subject to the prevailing forces (i.e. wind, current and tidal stream) at the location at the time of berthing with assistance of mooring boats stationed at the buoy.

Once moored the vessel is free to turn through 360° under the influence of the prevailing forces.

HOSE CONNECTION: 16 in. standard 150 ASA flange connection for crude oil and ballast hoses. Port derrick with minimum 10 tons SWL to be rigged for max. height and load lifting.

Ship's crew shall be responsible for connecting and disconnecting hoses with assistance of shore crew.

A quick release coupling (Camlock) is connected to each hose end and is to be used as follows:

1. In case of emergency, the butterfly valve shall be immediately closed and quick release coupling immediately disconnected.
2. Do not hammer but try to use the Camlock wrench supplied or use copper hammer only.
3. Tanker should be ready with reducer if its manifold is not 16 in.
4. Bags of sand to be available.
5. Weight of the hose is approximately 8 tons.

LOADING: Upon being informed by the vessel's responsible officer that vessel is ready to start loading, Mooring Master will normally advise the Control Room and ensure that the loading commences at a low rate (by gravity).

When it has been confirmed that there is no significant rise in pressure on the loading line, the crude oil will be loaded, pumping with a maximum rate of 6,000 tonnes/p.h.

Crude oil is delivered through the submarine pipeline to the buoy and thence via a floating hose to the vessel's port side midship manifold. Hose diameter is generally 24 in., reducing to 16 in. at the ship's end.

It is forbidden to close any valve onboard the tanker against the flow of the crude oil until the butterfly valve of the loading hose has been closed.

If ship-to-shore communications fail during loading operations, the emergency whistle signal is a continuous blast on the tanker's whistle.

Loading shall immediately be stopped and will not be resumed until communications have been re-established.

Before loading, cargo tanks are dipped by an independent inspector and at Terminal Inspector. If dirty ballast is retained on board until the next discharge port, then the amount of water and oil on top will be checked.

Density of Zeit Bay Crude is approx. (0.854/15°C.). Temperature when received on board is approximately 34°C.

Immobilisation of engines at SBM is strictly prohibited.

BALLAST/POLLUTION: *Deballasting System:* It is preferable that vessels load crude oil while discharging ballast, but Master or officer-in-charge must be sure that no contamination or pollution takes place.

If the vessel is not equipped with 2 lines in order to load and deballast at the same time, a quantity of crude should be loaded prior to deballasting to ensure proper segregation.

Dirty ballast must not be in the emulsion form and is not to contain chemicals or detergents.

The floating hose is normally 20 in. diameter, and the ship's end connection 16 in. diameter.

It is strictly forbidden to discharge dirty ballast overboard.

Pollution: The Master has to comply with all regulations and instructions prohibiting pollution under A.R.E. laws and under any pertinent instructions issued by SUCO when conveyed to Master.

Also, the provisions for International Convention for Prevention of Pollution from vessels 1973 and the Protocol of 1978 relating to this connection will be applied to the extent that such Convention and Protocol are in force in A.R.E. Owner/operator shall be liable for any damage resulting from the pollution caused by the vessel and shall pay for all the expenses incurred for its removal and elimination.

Oil Spill: In the event of a spill or its detection, SUCO Mooring Master must be notified instantly for the necessary action to be taken.

MEDICAL: In case urgent medical assistance is required, the vessel should contact SUCO Marine Manager by VHF radio. A doctor and facilities are available but there is no hospital in the area.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No facilities.

REPATRIATION: Possible in emergency only.

HOLIDAYS: Zeit Bay Terminal never closes on religious holidays.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at the SBM.

GENERAL:

Helicopter: Should the services of a helicopter be required in emergency or for any purpose whatsoever, the vessel will be given a minimum of 30 minutes notice.

Weather: Gales can be expected from a North Westerly direction from October through May.

The above conditions are only for guidance and are not relevant to the safety of the vessel but to the safety of the buoy.

The Mooring Master shall have the authority to decide whether the ship should remain or vacate the buoy.

Climate: The climate in the Gulf of Suez is generally good. The visibility is usually excellent, with few dust storms and infrequent fog. There are a few rain squalls.

Winds: The general flow of the wind over this part of the Gulf of Suez is predominantly from the N.N.W. Winds are steadier in the Summer months (May/October) and almost nil from June to September. Gales can mainly be expected from a North-Westerly direction from October to May.

The maximum velocity is approximately 45 knots, whilst the mean wind speed is approximately 20 knots and is prevalent for some 98% of the year. There are occasional light Southerly winds.

Tides: The tidal range is between 4 ft. and 5 ft.

Sea Condition: The surface temperature of the sea ranges from 18°C. to 30°C., depending on the season.

Seas and swells are usually from the N.N.W. and wave height can reach 18 ft., but average is about 6 ft. During the Summer months (May/August) there are many days of 12 ft. – 15 ft. seas.

Currents are generally located in mid-channel and set North when the tide is rising in Suez, and South when the tide is falling. The rate is about 2.5 knots at Spring tides and 0.5 knots at Neap tides.

(B) LPG BERTH.

LOCATION: Zeit Bay is an open area and unsheltered.

LPG tankers will moor alongside a pier which is perpendicular to the shore. The pier length is 50 m. and water depth is 8 m.

Pier position: Lat. 27° 48.1' N.
Long. 33° 33.7' E.

There are 2 mooring buoys, located North and South of the pier and about 50 m. off pier's edges, to secure the tanker in its proper position while undertaking operations.

DOCUMENTS: Masters are requested to hand the following original documents to "SUCO" Mooring Master upon arrival. These documents will be returned when cargo documents are signed on departure.

Certificate of Registry.
Load Line Certificate.
Safety Certificates.

APPROACHES: *Approaching the Anchorage Area:* When an LPG vessel arrives at position Lat. 27° 50.2' N., Long. 33° 37.2' E., Master can alter vessel's course to 172°(T) for heading towards anchorage area, a sailing distance of about 2.9 nautical miles.

Below are 4 objects that can be seen by day or night that will be of assistance to vessels.

A. Two grounded ships on North of Saab's Ashrafi:
 First position: Lat. 27° 49.5' N., Long. 33° 38.7' E.
 Second position: Lat. 27° 49.3' N., Long. 33° 39.2' E.
B. On marine chart No. 2375, East Zeit Bay Terminal SBM flashing Mo(U) 15 sec.
C. Zeit Bay Terminal, located one mile S.S.E. of East Zeit Bay Terminal flashing Mo(D) 30.5 sec.
D. Lighthouse in position Lat. 27° 49.6' N., Long. 33° 34.9' E. Black and white colour with approximate height of 30 m., flashing white every 10 seconds.

Approaching Zeit Bay Channel and Shipping Lane: The vessel under her Master's command and Mooring Master's advice will navigate on a course of 155°(T) from anchorage area for about 1.5 miles.

When Ashrafi Lighthouse is observed abeam, course is to be altered to 195°(T). This course will lead toward entrance of Zeit Bay Channel. While passing through Zeit Bay Channel, true course to be 270°/090°.

Due to relationship between a vessel traversing the channel and the prevailing N.N.W.'ly wind and current, there is the possibility of a sideways drift.

When vessel arrives at the end of the West entrance of the channel, course will be altered to 335°(T). After sailing for about 2.5 miles, vessel will alter course to 310°(T) for about 1.1 miles.

Final approach to L.P.G. Pier will be on a course of 010°(T), for about 1.5 miles.

Use of anchor is forbidden from the time the vessel reaches the Western entrance of Zeit Bay until final approach to pier, because of pipelines.

Outside the shipping lane on the port side, there are 4 yellow platforms provided with navigation aids. Vessels navigating in the shipping lane will pass near Platform "C" at a safe distance.

Zeit Bay Channel and Shipping Lane: Channel is guaranteed to be 6.0 m. below L.A.T.

Channel length is about 2 nautical miles and about 200 m. width.

Channel is marked by lighted buoys, each equipped with a radar reflector. When ship is heading Westerly (270°(T)), there will be 3 green buoys on the starboard side and 3 red buoys on the port side.

The shipping lane between Ghanim and Ras Elbahar Islands is marked by red marker buoys, showing the end of shoals and reefs.

Buoys coordinates: (a) Lat. 27° 45' 39" N., Long. 33° 34' 10" E.
(b) Lat. 27° 46' 18" N., Long. 33° 33' 22" E.

All vessels should keep at least 30 m. from the buoys as a safety measure.

All marker buoys can be seen from any direction and in poor visibility, according to international specifications and regulations of port navigational aids.

PILOTAGE: SUCO Mooring Master will board the vessel in the LPG waiting area. Pilot ladder should be kept in good order, clean and should be adequate in length and strength.

When Mooring Master boards the vessel, he will advise the Master on the approaching, berthing operations and provide him with all necessary information.

Mooring Master will check all original Certificates and receive them from the Master.

ANCHORAGE: SUCO will make every effort to moor ships arriving according to the agreed schedule. If not berthing, vessel will drop anchor at the Anchorage Area in position: Lat. 27° 47.3' N., Long. 33° 37.6' E. This position is located South of the Crude Oil Carrier Waiting Area.

LPG anchorage area is half mile radius with 18 m. depth. The area is considered clear of obstructions.

Anchoring outside the waiting area or in Crude Oil Carrier Area is strictly prohibited.

(B) Obstruction in Channel in all Circumstances

A vessel which under any circumstances causes or finds obstruction in the channel must immediately warn the vessels in the vicinity.

That warning is given by whistle or siren:

4 long blasts meaning: "The channel is not free".

That warning must be repeated every 3 minutes until vessels concerned have answered in the same manner. As soon as they hear the signal mentioned above, the vessels take steps to stop and instruct a Radio Watch, to receive full details of the alert given by the vessel that sent the said signal. The vessel should maintain Radio Watch until otherwise advised.

(C) Ship Failure (To Dredgers)

In case of engine or steering failure making the vessel not under command, while approaching a dredger, the vessel has to give the signal one long blast followed by two short blasts (– · ·).

(D) Vessel Mooring Voluntarily for Fog or Sand Storm

During the mooring manoeuvre, the vessel sounds every 2 minutes a series of 6 short blasts.

Once made fast (Signal No. 16 "G.V." is hoisted), the vessel must rapidly ring the bell for 5 seconds at intervals not exceeding one minute. For vessels of 100 m. and over, they will have to ring the bell forward and in addition a gong aft, at intervals not exceeding one minute, (a gong or any other instrument which tone and sound will be different to that of the bell forward).

These signals are stopped when the vessel is told that all vessels concerned have been notified of her mooring.

(E) Vessel Aground or Across Canal

See Article 92 (B) Obstruction in Channel.

(F) Between Vessels and Tugs

(1) Vessel Aground in the Canal

Signals between a vessel aground in the Canal and a tug.

These signals are for manoeuvre of refloating, as long as the vessel has one of the grounding signals.

Pull slowly	(– ·)
Increase	(– · ·)
Stop	(– –)
Slack the line	(– – ·)
I am to let go	(– – · ·)

These signals are to be repeated by the tug.

(2) Vessel Towed in the Canal

Signals between a vessel towed in the Canal and a tug.

Radiotelephony is used as communication between ship and tug, besides the following signals.

	By Day (Flag)	*At Night (Sound)*
Slow speed	: "A" hoisted above bridge	(– ·)
Half speed	: "A" hoisted half way	(– · ·)
Normal Tow	: "A" hoisted right up	(– · · ·)
Steady	: "A" lowered	(– –)

(Or sound signals if considered surer).

The sound signals are to be repeated by the tug.

The flag signal remains flying as long as the tug is to give the signalled speed.

By day, every change of flag signals is followed by a long blast.

(G) Signals Between VLCCs and Escort Tugs

(1) Attention to Start Manoeuvre

Prolonged blasts given by the ship.

(2) Stern Tug

Bring my stern to starboard	(·)
Bring my stern to port	(· ·)
Keep my stern in the axis	(· · ·)
Pull my stern aft slowly	(· · · ·)
Increase pulling my stern up to half speed astern	(· · · · –) (· · · · ·)
Increase pulling my stern up to full speed astern	(· · · · · –) (· · · · · ·)
Stop pulling (very long blast)	(——)

(3) Forward Tug

Give me a push on starboard bow	(–)
Give me a push on port bow	(– –)
Stop pushing	(– – –)

Article 93: See "Plans".

WADI FIRAN: 28.44 N. 33.13 E. (See Plan)

An open anchorage on Sinai coast in the Gulf of Suez about 85 nautical miles South of Suez.

There are 12 large and conspicuous storage tanks in 2 parallel rows of 6 tanks each lined on shore near the pumping station and painted with aluminium.

DOCUMENTS:

4 Crew Lists.
2 Stores Lists.
2 Vaccination Lists.

PILOTAGE: Pilot boards each tanker at anchorage.

ANCHORAGE: Lat. 28° 44.5' N., Long. 33° 09.5' E.

RESTRICTIONS: Mooring and unmooring during daylight only.

Vessels must have 150 fathoms of chain on each anchor.

MAX. SIZE: 105,000 d.w.t. Max. draft 75 ft. at Berth No. 1.

RADIO: It is essential that vessels bound for Wadi Firan give 72 hours, 48 hours and 24 hours notice to both "Petmisr Cairo 92049 UN" and "Petbel 92449 UN", to be accepted on the berth without delay. Contact Abu Rudeis on VHF Channel 16 when in range. There is no radio station at Abu Rudeis. Pilots working on Channel 14.

VHF: VHF Channels 16 and 14 are used for communication between tanker and pumping station.

TUGS: 1×3,080 h.p. and 1×4,080 h.p. available for mooring and unmooring.

BERTHING: Tankers must approach berth from West, never from North, and must follow same track on their departure to be entirely clear of shallow water. Tankers at berth will be connected to shore pumping station by submarine hoses for pumping crude oil (12 in. hose from the starboard side).

Two mooring launches available. Both ship's anchors are used, the port anchor first, normally 9-10 shackles in the water on each. At the stern 4 wire ropes from buoys are taken on board. Special care should be taken when mooring in Southerly winds. If blowing strong, berthing may be delayed.

When it has been confirmed that there is no significant rise in pressure on the loading line, the crude oil will be loaded, pumping with a maximum rate of 6,000 tonnes/p.h.

Crude oil is delivered through the submarine pipeline to the buoy and thence via a floating hose to the vessel's port side midship manifold. Hose diameter is generally 24 in., reducing to 16 in. at the ship's end.

It is forbidden to close any valve onboard the tanker against the flow of the crude oil until the butterfly valve of the loading hose has been closed.

If ship-to-shore communications fail during loading operations, the emergency whistle signal is a continuous blast on the tanker's whistle.

Loading shall immediately be stopped and will not be resumed until communications have been re-established.

Before loading, cargo tanks are dipped by an independent inspector and at Terminal Inspector. If dirty ballast is retained on board until the next discharge port, then the amount of water and oil on top will be checked.

Density of Zeit Bay Crude is approx. (0.854/15°C.). Temperature when received on board is approximately 34°C.

Immobilisation of engines at SBM is strictly prohibited.

BALLAST/POLLUTION: *Deballasting System:* It is preferable that vessels load crude oil while discharging ballast, but Master or officer-in-charge must be sure that no contamination or pollution takes place.

If the vessel is not equipped with 2 lines in order to load and deballast at the same time, a quantity of crude should be loaded prior to deballasting to ensure proper segregation.

Dirty ballast must not be in the emulsion form and is not to contain chemicals or detergents.

The floating hose is normally 20 in. diameter, and the ship's end connection 16 in. diameter.

It is strictly forbidden to discharge dirty ballast overboard.

Pollution: The Master has to comply with all regulations and instructions prohibiting pollution under A.R.E. laws and under any pertinent instructions issued by SUCO when conveyed to Master.

Also, the provisions for International Convention for Prevention of Pollution from vessels 1973 and the Protocol of 1978 relating to this connection will be applied to the extent that such Convention and Protocol are in force in A.R.E. Owner/operator shall be liable for any damage resulting from the pollution caused by the vessel and shall pay for all the expenses incurred for its removal and elimination.

Oil Spill: In the event of a spill or its detection, SUCO Mooring Master must be notified instantly for the necessary action to be taken.

MEDICAL: In case urgent medical assistance is required, the vessel should contact SUCO Marine Manager by VHF radio. A doctor and facilities are available but there is no hospital in the area.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No facilities.

REPATRIATION: Possible in emergency only.

HOLIDAYS: Zeit Bay Terminal never closes on religious holidays.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at the SBM.

GENERAL:

Helicopter: Should the services of a helicopter be required in emergency or for any purpose whatsoever, the vessel will be given a minimum of 30 minutes notice.

Weather: Gales can be expected from a North Westerly direction from October through May.

The above conditions are only for guidance and are not relevant to the safety of the vessel but to the safety of the buoy.

The Mooring Master shall have the authority to decide whether the ship should remain or vacate the buoy.

Climate: The climate in the Gulf of Suez is generally good. The visibility is usually excellent, with few dust storms and infrequent fog. There are a few rain squalls.

Winds: The general flow of the wind over this part of the Gulf of Suez is predominantly from the N.N.W. Winds are steadier in the Summer months (May/October) and almost nil from June to September. Gales can mainly be expected from a North-Westerly direction from October to May.

The maximum velocity is approximately 45 knots, whilst the mean wind speed is approximately 20 knots and is prevalent for some 98% of the year. There are occasional light Southerly winds.

Tides: The tidal range is between 4 ft. and 5 ft.

Sea Condition: The surface temperature of the sea ranges from 18°C. to 30°C., depending on the season.

Seas and swells are usually from the N.N.W. and wave height can reach 18 ft., but average is about 6 ft. During the Summer months (May/August) there are many days of 12 ft. – 15 ft. seas.

Currents are generally located in mid-channel and set North when the tide is rising in Suez, and South when the tide is falling. The rate is about 2.5 knots at Spring tides and 0.5 knots at Neap tides.

(B) LPG BERTH.

LOCATION: Zeit Bay is an open area and unsheltered.

LPG tankers will moor alongside a pier which is perpendicular to the shore. The pier length is 50 m. and water depth is 8 m.

Pier position: Lat. 27° 48.1' N.
Long. 33° 33.7' E.

There are 2 mooring buoys, located North and South of the pier and about 50 m. off pier's edges, to secure the tanker in its proper position while undertaking operations.

DOCUMENTS: Masters are requested to hand the following original documents to "SUCO" Mooring Master upon arrival. These documents will be returned when cargo documents are signed on departure.

Certificate of Registry.
Load Line Certificate.
Safety Certificates.

APPROACHES: *Approaching the Anchorage Area:* When an LPG vessel arrives at position Lat. 27° 50.2' N., Long. 33° 37.2' E., Master can alter vessel's course to 172°(T) for heading towards anchorage area, a sailing distance of about 2.9 nautical miles.

Below are 4 objects that can be seen by day or night that will be of assistance to vessels.

A. Two grounded ships on North of Saab's Ashrafi:
First position: Lat. 27° 49.5' N., Long. 33° 38.7' E.
Second position: Lat. 27° 49.3' N., Long. 33° 39.2' E.

B. On marine chart No. 2375, East Zeit Bay Terminal SBM flashing Mo(U) 15 sec.

C. Zeit Bay Terminal, located one mile S.S.E. of East Zeit Bay Terminal flashing Mo(D) 30.5 sec.

D. Lighthouse in position Lat. 27° 49.6' N., Long. 33° 34.9' E. Black and white colour with approximate height of 30 m., flashing white every 10 seconds.

Approaching Zeit Bay Channel and Shipping Lane: The vessel under her Master's command and Mooring Master's advice will navigate on a course of 155°(T) from anchorage area for about 1.5 miles.

When Ashrafi Lighthouse is observed abeam, course is to be altered to 195°(T). This course will lead toward entrance of Zeit Bay Channel. While passing through Zeit Bay Channel, true course to be 270°/090°.

Due to relationship between a vessel traversing the channel and the prevailing N.N.W.'ly wind and current, there is the possibility of a sideways drift.

When vessel arrives at the end of the West entrance of the channel, course will be altered to 335°(T). After sailing for about 2.5 miles, vessel will alter course to 310°(T) for about 1.1 miles.

Final approach to L.P.G. Pier will be on a course of 010°(T), for about 1.5 miles.

Use of anchor is forbidden from the time the vessel reaches the Western entrance of Zeit Bay until final approach to pier, because of pipelines.

Outside the shipping lane on the port side, there are 4 yellow platforms provided with navigation aids. Vessels navigating in the shipping lane will pass near Platform "C" at a safe distance.

Zeit Bay Channel and Shipping Lane: Channel is guaranteed to be 6.0 m. below L.A.T.

Channel length is about 2 nautical miles and about 200 m. width.

Channel is marked by lighted buoys, each equipped with a radar reflector. When ship is heading Westerly (270°(T)), there will be 3 green buoys on the starboard side and 3 red buoys on the port side.

The shipping lane between Ghanim and Ras Elbahar Islands is marked by red marker buoys, showing the end of shoals and reefs.

Buoys coordinates: (a) Lat. 27° 45' 39" N., Long. 33° 34' 10" E.
(b) Lat. 27° 46' 18" N., Long. 33° 33' 22" E.

All vessels should keep at least 30 m. from the buoys as a safety measure.

All marker buoys can be seen from any direction and in poor visibility, according to international specifications and regulations of port navigational aids.

PILOTAGE: SUCO Mooring Master will board the vessel in the LPG waiting area. Pilot ladder should be kept in good order, clean and should be adequate in length and strength.

When Mooring Master boards the vessel, he will advise the Master on the approaching, berthing operations and provide him with all necessary information.

Mooring Master will check all original Certificates and receive them from the Master.

ANCHORAGE: SUCO will make every effort to moor ships arriving according to the agreed schedule. If not berthing, vessel will drop anchor at the Anchorage Area in position: Lat. 27° 47.3' N., Long. 33° 37.6' E. This position is located South of the Crude Oil Carrier Waiting Area.

LPG anchorage area is half mile radius with 18 m. depth. The area is considered clear of obstructions.

Anchoring outside the waiting area or in Crude Oil Carrier Area is strictly prohibited.

RESTRICTIONS: Weather conditions may prevent berthing. This is the case when wind speed exceeds 18 m.p.h. The vessel will then remain in the anchorage area until weather improves.

The decision of acceptance is subject to Master's and SUCO Mooring Master's approval.

Berthing/unberthing during daylight hours only.

Also see "Berthing".

READINESS: Arrival time will be considered to be the time the vessel arrives at the Anchorage Area.

Notice of Readiness will be accepted when vessel is in all respects ready to receive her cargo, usually after loading arms are connected.

RADIO: Incoming tankers must advise ETA 48 hours prior to arrival.

VHF: Zeit Bay radio room maintains a 24 hour listening watch on Channel 12.

Fully detailed instructions for berthing, loading, etc., will be given to vessel's Master while approaching the waiting area.

TUGS: *Mooring Boats:* Two mooring line boats are available at all times, (500 h.p. and 1,000 h.p.) The vessel will be assisted by the mooring line boats, which are deemed essential for safe operations.

BERTHING: The pier is equipped with 2 positive hydraulic fenders, in addition there are 4 bitts for mooring ropes.

Vessel's ropes will be used, and handled by the pier crew.

When vessel is completely moored and secured alongside pier, vessel's heading will be 330°/150°, depending on which side is alongside.

Mooring and Unmooring: All berthing operations and passage of the channel inward and outward, should be executed with adequate daylight. Final approach shall be made from the direction which is consistent with a safe approach. Speed shall be subject to the prevailing forces (current, tide, stream).

Mooring line boats will assist during approach to prevent drifting on to the pier. Ship's anchor can be used in case of necessity.

When ship is finally moored and properly secured, ship's crew have to hang off the towing wires (fire towing wires), forward and aft, for line boats in case of emergency.

Jetty details:

Max. Size:	Max. draft: 5.0 m.
	Max. length: 108 m.
	Max. beam: No limit.
	Max. deadweight: 2,500 tons.
Product:	LPG (butane and propane mixtures).
Loading arms:	Two. Designed for connection to 6 in. Camlock quick coupling and 3 in. vapour return line.
Loading rates:	Up to 280 t.p.h.
Nitrogen:	Available for line purging only. Vessel's tank purging only with previous agreement.
Atmospheric vent:	Not available.
Flare line:	Yes.
Fire line:	2.5 in. hose available.

LOADING: Before loading commences the LPG Check List is to be completed. Emphasis is placed on close cooperation and good communications between mutually interested parties to achieve safe operations.

Operations Meeting and Inspection: The following will take place before any operations commence:

(a) Complete the Safety Check List.
(b) Complete the LPG safety and observed Check Lists.
(c) Discuss any additional precautions required.
(d) Ensure that tanks are in a fit condition to receive cargo without any hazards or contamination.
(e) Discuss and agree tanks inspection and samples required.
(f) Discuss and agree loading programme, including quantity, loading rate, pressure, temperature, connecting and disconnecting hoses, purging requirements and any other necessary requests.

Pressure, Temperature and Loading Rates for LPG:

Product: LPG.
Pressure: Up to 10.3 bar.
Temperature: Ambient to 60°C.
Loading rate: Up to 280 t.p.h.

Recommended maximum vapour concentration in ship's tanks before loading LPG:

Previous cargo in vessel	*Recommended Maximum Concentration*
Ammonia	100 ppm.
Ethylene oxide	30 ppm.
Propylene oxide	50 ppm.
Vinyl chloride	30 ppm.
Acrylonitride	30 ppm.

The above concentrations refer to vapour concentrations considered safe for venting. They do not infer that these concentrations are acceptable from a cargo contamination point of view.

Operational Procedures: Loading will not commence until all the safety checks have been carried out to the satisfaction of the Company.

I. The Company Operators will connect the shore boom/hose to the correct ship's manifold as indicated by the Master. Under no circumstances will a ship be connected to a vapour return/vent system if oxygen content of any tank is above 0.5% volume. If any of the ship's tanks are under vacuum the ship will be connected only if prior agreement has been reached.

The boom/hose will be purged to shore vent line and pressure tested to approximately 100 p.s.i. with nitrogen. The nitrogen will then be vented and the vent closed.

II. The Jetty Supervisor and Master will agree that systems are correctly lined up for operations to begin.

Loading must now commence slowly to avoid rapid pressure build up.

Ships must check that pull-off does not cause cargo temperature to drop below tank minimum operating temperature.

III. During loading the ship's tank pressures must be checked every 30 minutes and the information logged by the Jetty Operator. The Master must inform the Jetty Supervisor of any deviation from the agreed cargo handling plan.

IV. Company Operator will remain on the jetty at all times during loading.

V. A crew member with a good command of the English language must remain on deck at all times during loading.

VI. The ship must not shut valves against the shore pumps while loading.

VII. The ship must give at least 10 minutes' notice of the requirement to stop or start pumping, except under emergency conditions.

VIII. The Company Operators will clear the boom/hose with nitrogen. A watch on ship's pressure must be maintained during this time if hose contents are cleared to ship.

IX. The ship's valves will then be shut and Company Operators will purge and depressure the boom/hose.

X. The cargo loaded will be calculated from shore dips.

XI. The Jetty Supervisor will witness ship's dips/ullage and obtain from the Master the quantity loaded according to ship's figures. The quantity entered on cargo documents will be calculated from shore figures.

Cargo Handling Requirements:

I. Chemist's Certificate: The Company reserves the right to require an independent chemist to check the condition of ship's tanks or the quality of cargo before commencing to load. Reasonable notice of this requirement will be given.

II. Emergency shutdown systems: When ship is loading and it is necessary to manually initiate an emergency shutdown, the jetty system must be used.

III. Nitrogen: Nitrogen is available at approximately 7 bars and the berth nitrogen is available for line purging only.

IV. Portable instruments: The Company reserves the right to require intrinsically safe portable instruments to be placed on board ship during loading operations.

Reasonable notice of this requirement will be given.

V. Purging: Purging from ship's tanks to atmosphere is not permitted at the jetty. The Master must ensure the ship's tanks are in a fit condition to load cargo before arrival.

VI. Third party Independent Surveyor: The Company reserves the right to instruct a third party Independent Surveyor for the sampling and measuring of cargo. Reasonable notice of this requirement will be given.

VII. Vapour return line: Vapour return lines are provided to enable ships to return compatible vapour to storage tanks to be pressured up with vapour from storage. Oxygen content of returned vapour must be less than 0.3% volume.

Under no circumstances may nitrogen or other uncondensible gases be returned along the vapour line to storage tanks.

VIII. Vent line: Vent lines are provided to enable uncondensible vapours to be vented to flare system. Permission to use the flare system will only be granted if oxygen content of ship's tanks as determined by Company analysis is less than 0.5% volume.

The ship's intention to use the vent system must be clearly specified to the Jetty Supervisor at the pre-operations meeting.

Use of ship's mast vent is not permitted without Company Authorisation.

All operations shall, in general, be conducted in accordance with the requirements of the International Chamber of Shipping Tanker Safety Guides for Liquid Petroleum Gases and the International Maritime Dangerous Goods Code.

Communications on Loading Pier:

1. The jetty will be continuously manned by company personnel while a ship is loading. All normal communications should be passed through the Jetty Operator. In emergency situations, ship's personnel may use the jetty head telephone.
2. A responsible English speaking crew member must be on duty at all times and must remain on deck during loading/discharging.

FRESH WATER: Not available at berth.

FUEL: Not available at berth.

POLICE/AMBULANCE/FIRE: Fire 3333.

GENERAL: The following should be taken into consideration when vessel is alongside:

(a) Visiting is not permitted.
(b) Smoking and/or usage of naked lights is forbidden.

In emergency cases, a special permit is to be issued by authorised SUCO personnel to cover situation.

Vessel refusal: Owing to special hazards associated with LPG and the degree of expertise required during its handling and carriage, SUCO reserves the right to refuse to load any vessel where in the Mooring Master's opinion, the condition of the ship or the conduct of her operations give rise to concern over the safety of ship, personnel, company premises, or the environment.

Fire Fighting Vessel: There is a vessel fully equipped with fire fighting equipment. The vessel will be available at all times during operations. It has 4 monitors installed on the main and upper deck, each 12,200 cu.m.p.h. and able to reach 120 m. and a height of 45 m., foam compound is available.

Towing of Ships to Hazardous Waiting Area in Inner Bay: In the event of an emergency, Jetty Superintendent will immediately stop the loading operation and will inform SUCO Mooring Master whether to wait alongside or pull the ship away with the assistance of the mooring line boats.

The following position already surveyed, with a water depth of 8.0 m. and co-ordinates Lat. 27° 47.7' N., Long. 33° 32.2' E. is reserved as a waiting area.

Climate: The climate in the area is generally good and the visibility is usually excellent, except for occasional sandy storms during Summer time. Fog can be seen in Winter time. Occasional rain during Winter time.

Wind: The direction of the wind in Summer is from N. or N.W., occasionally wind reaches 40 m.p.h.

During Winter, average wind speed is about 15 m.p.h. – 20 m.p.h.

Southerly winds are encountered occasionally, but are usually light airs and accompanied by calm sea.

Tide, Current and Sea Swell: The tidal range is between 3 ft. and 4 ft.

Current reaches 2 knots to 3 knots.

Sea swell is from N. or N.W. and/or S. or S.E., with a maximum height of 4 ft.

AUTHORITY: Suez Oil Co. (SUCO), 21 Ahmed Orabi St., El Mohandessien, P.O. 2622, Cairo, A.R.E. *Tel:* 650723, 650544, 807922, 813554, 807854. *Telex:* 93455 SUCO UN or 92300 SUCO UN. *Cables:* Dexgulf. *FAX:* 3422734. *Contact:* A. Nassef, Planning and Follow-up Manager.

NOTES

Please also advise Shipping Guides Ltd.

El Salvador

ACAJUTLA: 13.35 N. 89.50 W. (See Plan)

PORT LIMITS: Not determined.

DOCUMENTS:

Consular Documents:

Only the requirement for visa of shipments of firearms and narcotics, which must be carried out at the port of embarkation, remains in force.

Prior to Arrival:

Arrival Notice:

24 hours before the vessel's arrival, notification is submitted in writing to the Autonomous Port Executive Committee (CEPA) on the time of arrival and the number of stevedores that will be needed. The CEPA serves as a kind of single shipping agency. In that capacity, it arranges for entrance and clearance of vessels, payment to other Official Agencies and draws up the port account for the ship's Agent.

Information on Cargo for the Port:

Prior to the vessel's arrival, the following documents are to be submitted to CEPA:

16 copies of the Cargo Manifest.
1 set of the Shipper's Manifest.
1 Mail Guide.
4 copies of the cargo distribution for each hold.
1 Stowage Plan.
1 List of Container Contents.
14 to 16 Cargo Tally Books, depending on the number of stevedores.

If this information is not available before the vessel's arrival, it may be submitted at the time of the reception visit (boarding party).

On Arrival:

Type of Documents	*Number and Distribution of Documents*				
Basic Forms	*Captain of Port*	*Customs*	*Plant Health*	*CEPA*	*Total*
General Declaration	1	1	1	1	4
Cargo Manifest	1	2	1	16	20
Crew List	2	1	1	1	5
Passenger List	2	1	1	1	5
Ship's Stores List	1	1	1	1	4
Crew's Effects Declaration	–	–	–	–	–
Maritime Health Declaration	1	–	–	–	1
Mail List	–	–	–	1	1
Additional Documents:					
Clearance from Last Port	1	–	–	–	1
Consular Manifest	–	1	–	–	1
Set of Bills of Lading	–	–	–	1	1
Cargo Distribution	–	–	–	4	4
Contents of Containers	–	–	–	1	1
Stowage Plan	–	–	–	1	1
Cargo Tally Books	–	–	–	14/16	14/16

Prior to Departure: The CEPA draws up the clearance permit and has it signed by Customs before submitting it to the Captain of the Port. When loading and unloading is completed, a representative of the Captain of the Port delivers the clearance permit on board.

PILOTAGE: Compulsory. *(a)* Vessels should apply for Pilots calling VHF radio station through Channel 27 which operates on 157.36 MHz to receive and 161.95 MHz to transmit. Channel 16 operates on 156.8 MHz ships calling and safety.

Notice of ETA must be made to Port Manager not less than 48 hours before arrival at the port limits. Confirmation of ETA is required 10 hours before arrival. VHF radio station is on service 24 hours a day, so vessels may call at any time. *(b)* Pilot boards vessel between one or two km. before arrival at the port limit; where vessels should stay with engine running, Pilot ladder ready. Gangways should be raised and folded. Derricks and cranes inboard and anchors ready for berthing. Pilot is equipped with walkie talkie for communicating with tugs. *(c)* Inform radio station if cargo manifests are carried on board or if they were air mailed to vessel's Agent.

ANCHORAGE: There is no specific anchorage area. Water depth is over 15 m. Bottom nature: Sand laying over volcanic tuff.

RESTRICTIONS: Vessels can berth any time day or night. Main engines should always be on short notice, due to swell as mooring lines often break. Vessels are advised to make use of extra shore mooring lines which may be provided if Agent makes request. The least depth in the berths is 30 ft.

MAX. SIZE: "C" Pier (breakwater berth) has 12 m. of water alongside and can berth vessels of up to 40,000 d.w.t. It is well fendered. Containerised, general and bulk cargoes can be handled at this pier.

Also see "Tankers".

HEALTH: On arrival, vessel should always fly a yellow flag. If there is any suspicion of illness aboard, Master has to inform by radio 24 hours in advance, indicating nature of disease and all details.

Free Pratique will not be granted to vessels at anchor. It will be granted to tankers discharging at buoys and in emergency cases.

RADIO: Advise ETA to Agents at San Salvador 96, 48, 24 and 12 hours before arrival. Telex available at Port Facilities. Area Code 301. Telex No. 27000. Fax: 524001, 524068.

VHF: There is no special time for calling. VHF service is open 24 hours a day. Contact through Channels 16 and 27.

Business operations: Channel 27 receives on 157.36 MHz and transmits at 161.95 MHz.

Channel 16 for ship calling and safety.

RADAR: There is no port radar service.

TUGS: Tug lines are not used. If required, the tug's line will be used and the charge is included in the docking and undocking services. There are four tugs available with the following capacities: 800, 1,200, 1,400 and 1,800 h.p. Tugs meet vessels off the docks at all times.

SPECIALISED CARGO HANDLING FACILITIES: Pier "A" with liquid cargo facilities for vegetable, animal and mineral oil, as well as chemical liquids.

BERTHING: Vessels can berth in safety at any time during day or night.

In the case of cargo vessels it should be stressed that the swell experienced alongside is sometimes a serious problem and Masters would be well advised to make use of the shore lines offered on hire to save undue wear and tear on their moorings.

Berth	*Max. Draft* (m.)	*Depth at MLW* (m.)	*Vessel Length* (m.)
A–1	9	10	140
A–2	10	12	160
B–3	9	10	140
B–4	10	12	195
B–5	9	10	180
B–6	10	10	180
C–7	12	13.7	128
C–8	12	13.7	128

There are three piers. The first one "A" consists of a breakwater mole 760 m. long. The access mole in its first section from land side to pier "B" has a width of 10.50 m. and is 260 m. long. The second section from Pier "B" to Pier "A" has a width of 7 m. and is 180 m. long. The overall length of access is 450 m.

Pier "A" is 37 m. wide and 310 m. long, it consists of a mooring dock with two berths called "A–1" and "A–2", for general bulk and liquid cargoes and has a transit shed of 4,500 sq.m. At the end of Pier "A" is constructed another breakwater section in a N.W. direction, in line with the existing Pier "A", connecting this pier with the Pier "C" with a length of 35 m. Then direction of Pier "C" is changed to the North, with an angle of 30° and extended over 270 m. with a width of 18 m. This breakwater offers two berths, "C–7" and "C–8", capable of handling containerised, general and bulk cargoes.

The third pier called "B", with four berths is 348 m. long and has a free width of 28 m. This pier handles containerised (max. gross weight 20 tonnes), general and bulk cargoes.

CRANES: Two semi-portic cranes of 3 tonnes capacity are available at Pier "A". At Pier "B" there is a 25 tonnes crane for general bulk and containerised cargoes. Pier "B", berths "B–5" and "B–6" as well as Pier "C", berths "C–7" and "C–8", have no cranes available and vessels are required to use their own cranes or derricks.

BULK CARGO FACILITIES: For berthing length of quays and max. permissible draft in salt water at MLW see "Berthing".

Cargoes handled: Importation: Grains, fertiliser, soda ash, phosphoric rock sulphur, soya flour, etc.

Exportation: Raw sugar cane, cotton seed meal and flour, grains, etc.

Berth Equipment: 25 tonne cranes which operates for imports at Berth "B–3" and "B–4" and unloads vessels with clamshells of different capacities ranging from 5 cu.m. to 9 cu.m., and feeds the conveyor systems through a hopper of 85 tonnes. Maximum height of discharging gear above MWL: 19 m.

Conveyor System: Two belt conveyor systems exist for importation and exportation. Both systems interconnected with port warehouses as well as private silos and warehouse facilities. Loading/discharge rates: 500 tonnes/p.h. (Rates depend on grain thickness).

BRIDGES: None.

STEVEDORES: ETA advice required to arrange gangs, should be made 12 hours before vessel's arrival. A line handling gang is always standing by and also attends gangways without charge. Stevedores are available for nightwork.

Average load and discharge rates:

General cargo	35 tonnes/p.h.
Bulk cargo	190 tonnes/p.h.
Liquid cargo	110 tonnes/p.h.

MEDICAL: There are doctors in the port who attend normal cases and specialists and hospitals in Sonsonate City (20 km. by road) and at San Salvador, capital of the Republic, 85 km. from the port.

TANKERS: Mooring at RASA (Refineria de Acajutla Sociedad Anonima). This refinery is the property of Esso Standard Oil and Shell Petroleum Co.

Buoy berth: Depth of water is about 15 m. Diameter of buoy hoses: 2×25 cm. for clean products and one of 75 cm. for crude and fuel oil. There are no facilities for residue discharge.

DENSITY: 1027.

FRESH WATER: Delivered by hoses. Rate approximately 40 t.p.h., cost U.S.$1.60 per metric ton.

FUEL: Available from private companies.

FIRE PRECAUTIONS: Inspection of hoses; no smoking; not allowed to weld or light any kind of fire; isolation of the place of loading and discharging operations; fire equipment to be ready to use at all times.

CONSULS: Most countries have Consular representatives in San Salvador City, Capital City, at 85 km. from the port.

REPAIRS: Possible to make minor engine and deck repairs. Other repairs can be carried out at Capital City, San Salvador. Any repairs that will delay sailing of vessel cannot be made without previous and specific authorisation of the Port Manager.

DRY DOCKS: None.

SURVEYORS: At the port there is P & I representative and surveyor and independent marine surveyors. G.L. Surveyor at San Salvador City.

GANGWAY/DECK WATCHMEN: Gangway is watched by Customs Police and marine members without charge. Deck watchmen available on request.

HATCHES: The opening and closing of hatches is carried out by stevedore gangs, and its costs are included in the loading or discharging tariff rate. Whenever vessel's Master decides to carry out these operations with his crew, a stand-by charge will be debited.

CUSTOMS ALLOWANCES: Customs only allow tobacco for personal use to be taken out of the vessel. Not allowed to take any wine or spirits out of the vessel.

CARGO GEAR: Ship's gear has to be used on request. Semi-portic cranes for general cargo may be used at Berths "A-1" and "A-2". Heavy lift crane at Berths "B-3" and "B-4". This crane is also used to unload bulk cargoes to a conveyor belt system.

REPATRIATION: There are facilities for repatriation, it is also possible to effect crew changes.

AIRPORT: The "El Salvador International Airport" is 134 km. from the port (by road), which is served by regular airlines.

TIME: No alterations in time during the year; local time is GMT minus 6 hours.

HOLIDAYS: The port has the following official holidays:

(*)1st January; 2nd February; (b) Wednesday, Thursday, Friday and Saturday before Easter Sunday; (*)1st May; (c) 10th May; 3rd and 6th August; 15th September; (*)2nd November; (a) 24th; (*)25th and (a) 31st December.

(*) No work.
(a) Port operations cease at 0700 hrs.
(b) Port operations cease at 1700 hrs. on Thursday until 2300 hrs. on Saturday (Easter Week).
(c) 10th of May port operates only from 0700 hrs. until 1500 hrs.

POLICE/AMBULANCE/FIRE: National Police (Sonsonate) Tel: 51-0838; Ambulance (Sonsonate) Tel: 51-0374 – 51-0200; Fire Department (CEPA, Acajutla) Tel: 52-3200. Red Cross ambulance also available.

TELEPHONES: No possibilities of installing telephones aboard, but there are public telephones in the port and calls can also be made through the CEPA Operator.

SERVICES: No facilities to discharge tank-washings. No equipment for tank cleaning or facilities to adjust compasses. Minor electronic repairs at Agent's request.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Port Authority issue cards for going ashore in Acajutla. Passports required when going outside Acajutla.

GARBAGE DISPOSAL: Ship's agent will arrange collection by truck as required. Charges for ship's account.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Colones (C).

REGULATIONS: Port regulations only.

DELAYS: Normally there are no delays to be expected during berthing, loading, discharging or bunkering. Bunkering operates at a slower rate than normal loading and discharging.

GENERAL: Quarantine Authorities pay strict attention to garbage and any residue must be kept aboard properly covered. It is forbidden to drop garbage or any residue in the sea whilst vessel is in the port area.

In the case of swell, special hawsers and wires can be requested on hire at U.S.$ 1.50 on every 1,000 g.r.t. per day or part of a day.

SHIPMASTER'S REPORT: 1979 (Updated 1992).

Port Limits: No port limits stated.

Documents:

Clearance from last port.
5 Crew Lists.
4 Voyage Memorandums.
4 Store Lists.
4 Passenger Lists, (negative required).
1 Ship's Health Declaration.

Manifests prepared by the Agent:

2 copies for the Customs.
1 copy for the Port Captain.
1 copy for Quarantine Inspector.
16 copies for the Stevedores.

Customs seal the spirits and tobacco, but not the beer. No private declarations required.

Boarding party of about 8 persons board the vessel with the Agent who will attend to documents and other needs of Officials.

Pilotage: Pilotage is compulsory, Pilot boards vessel up to 3 miles from "A" Pier.

Restrictions: Vessels can berth any time day or night, main engines should always be on short notice, due to swell at berths, as moorings often part. Vessels are advised to make use of extra shore moorings provided, these can be requested via the Agent.

The least depth at the berths is 30 ft.

Max. Size: "C" Pier (outer berth) has 46 ft. of water alongside and can take vessels of up to 40,000 d.w.t., it is well fendered. General cargo and liquid cargo can be handled at this berth.

Health: Standard Health message to be sent to Agents who will make the necessary arrangements, every vessel coming in should fly the "Q" flag, this is to avoid fines.

Radio: Advise ETA to Agents at San Salvador 96, 48, 24 and 12 hours before arrival. For Telex messages use "WLO" Mobile. For W/T messages use "KSF" San Francisco.

For Port Control use VHF Channels 16 and 27. (Range 40 miles). Hours of operation 24 hours. Call sign: "Acajutla Tower" also R/T on 2182, 2163 and 2169 kHz. Tugs work on 2182, 2163, 2196, 2638 and 2738 kHz.

Radar: There is no Port Radar service.

Tugs: There are three tugs available with the following power: 800 h.p., 1,200 h.p. and 1,800 h.p. Tug's lines are used at no extra charge.

Berthing:

Pier	*Berth* No.	*Depth* (m.)	*Remarks*
"A"	1	9.0	General Cargo, 2×3 ton cranes. Liquid cargo (Berth No. 1)
	2	10.0	
"B"	3	9.1	General cargo, bulk cargo. 25 ton crane on Pier "B".
	4	10.0	
	5	9.1	
	6	10.0	
"C"	7	14.0	General cargo, liquid cargo. No cranes available.
	8	14.0	

Stevedores: Arranged by the Agents, and based on information passed in ETA advise, vessels arriving from New Zealand may well be at the port before the cargo plans arrive. Stevedores work round the clock.

Medical: Doctor available but nearest hospital 13 miles away, Doctor will board the vessel, advise the Agents before arrival.

Tankers: One mooring buoy for tankers.

Density: Observed density 1025.

Fresh Water: Available at about 20 t.p.h.

Fuel: Only available in emergency.

Provisions: Limited quantity available, 24 hours notice required.

Fire Precautions: Tugs have fire fighting equipment on board. As no phones on board, contact can be made on VHF with "Acajutla Tower".

Consuls: British Vice-Consul at Sansonate 14 miles away from the port.

Repairs: Minor repairs only possible.

Dry Dock: No dry dock available.

Surveyors: Arie Van-Helden (Lloyd's Agents only), San Miguel, Cutuco, La Union.

Gangway/Deck Watchmen: Shore gangway available and recommended due to swell at the port, full deck patrol necessary during night time.

Hatches: For safety it is better to open and close the hatches with the ship's crew, which is allowed at this port.

Cargo Gear: Ship's gear and shore cranes used depending on which berth the vessel at.

There are 24 Reefer points in the stacking yard. There are no tower units ashore. Containers can be landed on flats. Forklift trucks are well maintained.

Repatriation: Not advisable from this port.

Airport: El Salvador International Airport is 25 minutes from San Salvador. Daily flights to U.S.A. and other countries.

Holidays: December 25th, January 1st, also Special Holiday for this region being August 5th and 6th. (From 1500 hrs. 5th to 1900 hrs. on the 6th).

Police/Ambulance/Fire: This is covered by the Agent who remains on board all the time the vessel is in port, the Agent will require a room to live in whilst he remains on board.

Services: No special services available.

Shore Leave: Permitted.

Identification Cards: Not required, but Crew Members are advised to carry some means of identification.

Regulations: No unusual regulations.

Delays: Vessels have to leave the berth due to swell, this decision is left to the Master of the ship.

General: Vessels alongside the berth, move quite a lot, but the shore fenders are well maintained. Stevedores will unpack containers on board the vessel.

SHIPMASTER'S REPORT: August 1993.

Charts: B.A. 660 and 1049. Note: See NP 8 (1.11) for remarks on chart limitations.

Pilot Books: NP 8. (4.64, 4.67).

Approaches: Cement factory building is a conspicuous white structure visible from a great distance. Tanks to the South also conspicuous. Contact made at 45 miles on VHF Channels 16 and 10. Information promptly given.

Berthing: Pilot boarded 1 mile West of breakwater end from slow but well maintained launch with black hull, white and silver deckhouse. Ship was scheduled to berth at Berth No. 1. Approach taken very carefully, as there were ships at Berths No. 2 and 4, as well as one on the newer breakwater extension, and a swell was evident as we approached the berth.

Two tugs assisted, well handled, but of moderate power.

Ship was held in position as moorings were run and set up, initially 5 and 3 both ends.

Shore gangway was rigged immediately.

Clearance: Quick and without problems.

Swell: The swell was a constant problem. First line parted within an hour of berthing, and things became rapidly worse. Four shore moorings were requested on arrival, but because of other ship movements, it was some 5 hours before they could be set up. In the meantime, another seven breakages of mooring lines took place, and it became necessary to recall the Pilot and tugs to re-secure the ship. Order was eventually restored, but as the ship was alongside for 4 days, with serious surging all the time, chafing was a serious problem, and moorings had to be constantly attended and repaired. Shore moorings parted at regular intervals, but were replaced immediately by the shore gang who were very good. Recommendations to use shore moorings should be taken seriously, even if it appears that there is no swell, and should be arranged beforehand and set up on arrival. Cost is U.S.$ 15.00 per rope per day. A sensible order would be for one spring and one head/stern line each end. Moorings consist of heavy wires shackled onto substantial nylon or polyprop tails.

Harbours: Artificial structure, the original part (Pier A and the causeway connecting it to shore) made of large circular cross-section steel cased caissons filled with concrete and rubble. In the section between Pier A and Pier B, one of the walls of the caissons has failed, and the filling has been washed away by the constant swell breaking on the seaward side. This was not detected until the road collapsed into the caisson, and now there is a Bailey Bridge over the defective road surface, and the seaward side is being augmented with a rock and concrete protection.

The pier extension, to the North of the Berth No. 2, is an all-concrete construction. Pier B is an open pier with conveyor belt cargo handling gear. Berths are well fendered.

Lines for liquid cargo are built into Pier A and its extension. They include lines for diesel and fuel oil, edible oils and a clean line for chemicals. This was being used for receiving a cargo of alcohol and butanol.

One line is marked "Gas under pressure". I have not yet found out where this connection is, but there is a portable Chicksan-type loading arm on a wheeled trolley parked at the North end of the pier, presumably for gas.

Cargo Discharge: Our cargo of diesel oil was discharged through 1×8 in. flexible hose. Tanks were 2.5 km. away. Shore line was a mixture of different sized pipelines, the smallest being 6 in., so discharge was slow, 200 cu.m./hr. with a manifold pressure of 7.5 kg./sq.cm. 250 tonnes of fresh water was loaded into a stripped tank for providing a water plug at the end of discharge.

General: A local travel firm provided an all-day bus tour at reasonable cost for seven of the crew, which was enjoyed.

Fresh fish is plentiful and prices are reasonable. Prawns and lobsters can be obtained.

Security was no problem, and all shore people dealt with were civilised and pleasant.

Old pier is destroyed – only a few piles remain above water.

There appears to be a small stone breakwater just North of the lighthouse.

SHIPMASTER'S REPORT: September 1994.

The "Chubasco" season runs from about May to October, and is a local, very violent wind/squall which can attain 80 knots. It blows up with little warning in 15-20 minutes, and apparently rarely lasts for much more than 30 minutes. It is accompanied by heavy rain and extensive lightning. The locals are extremely wary of it, and we were required to maintain full radar watches by a deck officer for 24 hours a day. A Pilot boarded the vessel at evening twilight and departed after breakfast. Additionally, a Loading Master was on duty at all times, maintaining walkie-talkie communications with the shore. When the O.O.W. detected a squall approaching by radar, Pilot and Loading Master were informed. Discharging ceased when wind speed reached 8 knots, and hose was disconnected if wind speed reached 15 knots. A squad of 5 labourers remained on board for this period.

Due to the ferocity and abrupt arrival of "Chubascos", mooring ropes must be used as in an emergency, they may have to be cast-off to enable the vessel to vacate the berth rapidly. Mooring wires are not permitted. 3 tugs available for mooring.

Minimum depth of water (by echo-sounder) at berth and on approach is 15.0 m. There was a heavy swell running the whole time.

Due to a recent accident (June 1994), discharging was by way of 1×8 in. hose on the port side, rate about 5,000 bbls./hr., the normal crude line being damaged.

Facilities exist for repatriation.

Circular Letter:

To: Master.

From: Refineria Petrolera Acajutla, S.A. de C.V., RASA Marine Terminal, Acajutla.

Subject: Precautions against bad weather conditions at Acajutla, during "Chubasco" Season.

Dear Sir:

We would like to ensure the safe and efficient turnaround of your vessel at our Marine Terminal. There are no weather forecast facilities at or near the Acajutla Port to provide you/us with this important service. However, a local storm called "Chubasco" requires special precautions to be taken, in order to avoid the possibility of damage to the ship or to RASA's all-buoy Marine Terminal facilities, or the Ecology, and related clean-up costs.

As a result of past experience of sudden violent rainstorms called "Chubascos", which are highly likely to reach your berthing area during the rainy season, from May to October, we strongly recommend the following precautionary measures be strictly followed during your tanker operation while at our Marine Terminal.

1. Request the Pilot from the local Port Authority to remain onboard your vessel at all times during the "Chubasco" season.
2. A radar weather watch should be maintained continuously from about 2 hours before sundown to sunrise, in order to detect and plot "Chubascos".
3. During the same period, your deck crew should be prepared to run out the mooring lines off the winches or bitts, and leave the berth without tugs or mooring launches. Your engines should be ready for immediate use.
4. In case of emergency evacuation of berth unassisted by tugs, we suggest the use of your starboard anchor to aid you in leaving the berth.
5. For the safety of our Terminal underwater facilities, it is of utmost importance to have the ship moorings in good condition and well tended at all times.
6. If a storm, that may be a "Chubasco", appears at a distance of 25 miles, all cargo operations should be stopped. Our Loading Master will drop hoses as is required in his procedures.
7. In such an event, all personnel involved should be immediately advised of the change in weather conditions so that emergency procedures can be timely put into effect. RASA's shore personnel must be advised by radio immediately.
8. Radio communications should be maintained open with the Refinery Process Control Room at all times. "Chubascos" are known to interfere with radio communications. Timely advice is most important for our shore personnel to co-ordinate emergency activities.
9. In order to avoid the possibility of damage to the ship or to RASA's all-buoy Marine Terminal facilities, we hereby request you maintain a *minimum midships draft of 20 ft. at all times* during your berthing and crude discharge.
10. Kindly confirm with our Loading Master the time at which you will commence your ballasting operation. Also advise our Loading Master if the vessel cannot comply with any of the above precautionary measures.

Please sign the attached copy and return it to our representative in acknowledgement of the contents of this letter.

Signed: Process Manager.

AUTHORITY: Comision Ejecutiva Portuaria Autonoma (CEPA), Boulevard de Los Heroes, Torre Roble, Apartado Postal 2667, San Salvador, El Salvador. *Tel:* (503) 241133, Acajutla (503) 523200 or 523145 directly to the Port Manager. *Telex:* (301) 20194, Acajutla 27000. *FAX:* (503) 524101, (503) 524068. *Cables:* CEPA. *Contact:* Francisco Eduardo Portillo, Port Manager, Acajutla.

LA LIBERTAD: 13.29 N. 89.19 W.

CLOSED TO CARGO VESSELS SINCE MAY 1976.

LA UNION (Cutuco): 13.20 N. 87.50 W. (See Plan)

DOCUMENTS: *Consular Documents:*

Only the requirement for visa of shipments of firearms and narcotics, which must be carried out at the port of embarkation, remains in force.

Prior to Arrival:

Arrival Notice:

24 hours before the vessel's arrival, notification is submitted in writing to the Autonomous Port Executive Committee (CEPA) on the time of arrival and the number of stevedores that will be needed. The CEPA serves as a kind of single shipping agency. In that capacity, it arranges for entrance and clearance of vessels, payment to other Official Agencies and draws up the port account for the ship's Agent.

Information on Cargo for the Port:

Prior to the vessel's arrival, the following documents are to be submitted to CEPA:

16 copies of the Cargo Manifest.

1 set of the Shipper's Manifest.

1 Mail Guide.

4 copies of the cargo distribution for each hold.

1 Stowage Plan.

1 List of Container Contents.

14 to 16 Cargo Tally Books, depending on the number of stevedores.

If this information is not available before the vessel's arrival, it may be submitted at the time of the reception visit (boarding party).

On Arrival:

Type of Documents	*Number and Distribution of Documents*				
Basic Forms	*Captain of Port*	*Customs*	*Plant Health*	*CEPA*	*Total*
General Declaration	1	1	1	1	4
Cargo Manifest	1	2	1	16	20
Crew List	2	1	1	1	5
Passenger List	2	1	1	1	5
Ship's Stores List	1	1	1	1	4
Crew's Effects Declaration	–	–	–	–	–
Maritime Health Declaration	1	–	–	–	1
Mail List	–	–	–	1	1
Additional Documents:					
Clearance from Last Port	1	–	–	–	1
Consular Manifest	–	1	–	–	1
Set of Bills of Lading	–	–	–	1	1
Cargo Distribution	–	–	–	4	4
Contents of Containers	–	–	–	1	1
Stowage Plan	–	–	–	1	1
Cargo Tally Books	–	–	–	14/16	14/16

Prior to Departure: The CEPA draws up the clearance permit and has it signed by Customs before submitting it to the Captain of the Port. When loading and unloading is completed, a representative of the Captain of the Port delivers the clearance permit on board.

PILOTAGE: Pilot is on the staff of FENADESAL and can be requested from Port Manager at Cutuco.

ANCHORAGE: La Union Bay – up to 34 ft. Approximately 14 Class II and a large number of Class III anchorage berths are available in the harbour. 5 Class II berths are in the vicinity of the pier in depths of 33 ft. to 30 ft., and approximately 9 more, in depths of 70 ft. to 30 ft., are just Westward of Isla Zacatillo. The first area has a mud bottom; the second is sandy and rocky. The large number of Class III berths are in an area Northward of the pier and in the area between the 2 anchorages providing Class II berths. The least depth in each of the areas is 25 ft. A large number of relatively unsheltered anchorage berths of all classes are available outside the harbour in the Gulf of Fonseca.

RESTRICTIONS: Enter any time – preferable on flood tide with draft over 24 ft.

MAX. SIZE: Largest vessel that can be accommodated in harbour would occupy an anchorage berth with a min. depth of 43 ft. and a diameter of 3,300 ft. Largest vessel that can be accommodated alongside wharf would occupy a berth with least depth of 25 ft.; length is not a limiting factor, although a max. 550 ft. is recommended due to strong currents, 3 – 4 knots, and pressure on part of any vessel extending for any greater distance beyond length of wharf.

HEALTH: Disease should be reported. Pratique necessary on each occasion.

RADIO: Direct to Agents or Fenadesal, Telex: 20-194, Area 301, San Salvador. Fax: 71-5650.

TUGS: No tugs required.

BERTHING: Berthing usually carried out on slack tides due to cross currents, up to 3 – 4 knots. The estimated military port capacity is 1,800 tons of general cargo per day. Port can accommodate 2 standard-type ocean-going cargo vessels, and possibly one alternative class T/C (small ocean-type tanker under favourable conditions) alongside berths, and approximately 14 ocean-type cargo vessels, and a large number of Class III (coaster-type cargo vessels) at anchorage berths. Ro/Ro pier, depth alongside 16 ft. LW.

STEVEDORES: Prior advice preferable. Stevedore force consists of 9 gangs of up to 16 men per gang for on-board work. Similar gangs are available on pier, and up to 300 labourers, crane and fork-lift operators comprise shore gangs.

MEDICAL: Services available – no special restrictions.

TANKERS: Drafts 25/34 ft. fore and aft. Tankers of up to 550 ft. in length can be accommodated at either side of pier, where adequate connections of 6 in. – 8 in. and 10 in. pipelines are located. Largest vessel that can be accommodated alongside would occupy a berth with a least depth of 25 ft.; length is not a limiting factor, except as noted previously.

FRESH WATER: Four 2 in. connections on each side; volume estimated at 10 t.p.h

FUEL: Bunkers and diesel – can be delivered when berthed.

CONSULS: Only Honduras is represented.

REPAIRS: No facilities.

GANGWAY/DECK WATCHMEN: Not required – National Marines on guard.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: Not controlled, but restricted ashore.

REPATRIATION: Can be arranged.

AIRPORT: "El Salvador", 102 miles away in the "Comalapa's Valley".

TIME: GMT minus 6 hours. No alterations.

HOLIDAYS: Easter Thursday, Good Friday. Port not worked only on those dates.

POLICE/AMBULANCE/FIRE: In La Union – Close to the Port.

TELEPHONES: Available.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Passes for leaving ship to have Master's signature.

GARBAGE DISPOSAL: Garbage disposal not available. Garbage to be retained in drums on board.

WASTE OIL DISPOSAL: Service not available.

SEAMAN'S CLUBS: None.

CURRENCY: Local currencies are "Legos", "La Moneda", "Argoz" and "Corfinge".

AUTHORITY: Ferrocarriles Nacionales de El Salvador (FENADESAL), Cutuco-La Union, El Salvador. *Tel:* 64-4200, 64-4055. *Telex:* (301) 20-194. *Cables:* Fenadesal. *FAX:* 64-4055. *Contact:* Rafael Paniagua Santos, Port Manager.

Ferrocarriles Nacionales de El Salvador, Apartado Postal 2292, San Salvador, El Salvador C.A. *Tel:* 715632, 22-9000. *Telex:* (301) 20-194. *FAX:* 24-13-55. *Cables:* Fenadesal.

Comision Ejecutiva Portuaria Autonoma, Apartado Postal 2667, San Salvador, El Salvador. *Tel:* 98-5477. *Telex:* 20194. *FAX:* 24-13-55. *Cables:* Cepa. *Contact:* Arturo German Martinez, Manager.

NOTES

Please also advise Shipping Guides Ltd.

Equatorial Guinea

GENERAL

PIRACY/TERRITORIAL WATERS: *Shipmaster's Report:* Whilst steaming from Lagos towards Douala (passing North of the island Fernando Poo which is considered the normal route) the vessel was hailed at 0640 GMT by Equatorial Guinean Patrol Boat "LP 009" with two 20 mm. double automatic guns pointed at vessel. The vessel's position was Lat. 03° 48.4' N., Long. 09° 03.0' E. (about 10 nautical miles from the island).

An Officer with the rank of Lieutenant and 2 men boarded the vessel. They claimed that the vessel had violated Equatorial Guinean territorial waters having passed inside the 12 nautical mile limit. The Officer wished to take a crew member ashore to prove that the vessel had been boarded, but when the vessel's Master protested, the Officer claimed cases of whisky as proof. Having no alternative, the vessel's Master was forced to accept and the patrol boat departed 0745 GMT.

BATA (Including Puerto Nuevo): 01.52 N. 09.46 E.

(See Plan)

(A) BATA
(B) PUERTO NUEVO

(A) BATA

SHIPMASTER'S REPORT:

Roadstead with single point mooring buoy connected to the shore with 6 in. pipeline, 6 in. hose: (everything in a deplorable state). No tugs or Pilots available. Master should have local knowledge when approaching berth in hours of darkness. Vessels are moored with 2 anchors forward and 2 ship's lines (plus two 8 in. shore lines) to the single point mooring buoy. 5 lengths of 15 m. hose available. Preferable stern discharge connection to be used. Max. pressure: 4 kg./sq.cm. All grades through this line. Linewash of water in between the different grades. There is rubber ball for cargo separation.

ADVICE: 1. In view of the deplorable state of buoy, lines and hose, Master should be very careful in mooring his vessel – which has to be done by himself – in order not to damage same.

2. Master should have ship's motorboat ready to run ship's lines to the buoy because motor launch, which is supposed to do this is very old and liable to breakdown at a crucial moment.

3. Anchors should be dropped in a position S.W. of the buoy in order to stay well clear of the unmarked wrecks, in good holding ground with 4 to 5 lengths of chain.

4. Tidal currents move the ship relative to the mooring buoy – so it is necessary to heave anchors tight – bearing in mind that the construction, etc. of the buoy is very weak.

5. The buoy carries a light but the light does not work. Anyway mooring after dark is not advisable.

DOCUMENTS: Only a small Customs Post available here:
1 Cargo Manifest.
1 Store Manifest.
1 Crew List.

CUSTOMS ALLOWANCES: No restrictions – no sealing of bonded stores.

SHORE LEAVE: Allowed by ship's boat.

RADIO COMMUNICATION: None. Though there are officially coast radio stations in this country, they do not operate on schedule. Telegrams should be sent via coastal radio stations of other countries. No VHF.

Also see "Purser's Report", Malabo.

SUPERINTENDENT'S REPORT: August 1993.

Vessels over 150 m. LOA should utilise the outer buoy.

Vessels can berth port or starboard side to, but should proceed slowly and carefully. The Pilot only speaks Spanish.

The anchor (7 shackles) and mooring buoy are used when berthing. Prepare 2 mooring lines (minimum length 150 m.) aft to run to the buoy.

After dropping the anchor, the mooring boat (launch) runs lines to the buoy. The launch then runs a line aft to the shore. When line is ashore, slack lines on buoy and anchor chain until vessel is 3.0 m. from the wharf.

Final moorings consist of 3 head/stern lines and 2 breast lines fore and aft.

No fenders available.

Shore gangway used.

Swell makes vessel roll up to 4°, especially in late afternoon.

(B) PUERTO NUEVO: 01.49 N. 09.44 E.

Situated about 1 mile South of the mouth of the Rio Ekuku. This is quite a new jetty – developed in 1973 – shaped like the letter "L", where the long leg of this "L" is connected to the shore and 4 dry cargo vessels can moor alongside the short leg in about 14 m. of water. Every vessel has on her off-shore side 2 mooring buoys to assist in mooring and unmooring. No tugs available. Though it is stated that a Pilot is available, this information should be treated as unreliable. The pier is used for the discharge of general cargo and the loading of logs and sawn wood. According to information received this jetty will be made available to tankers for discharge of oil products.

DOCUMENTS: See "Part – A". This new jetty falls under the jurisdiction of Bata Authorities.

RADIO COMMUNICATION: See "Part – A".

SHIPMASTER'S REPORT: October 1979.

Documents:

Crew List	6 copies	(vessel's care)
Passenger List	6 copies	(vessel's care)
List of Ports of Call	6 copies	(vessel's care)
Crew Declaration	6 copies	(vessel's care)
Stores List	6 copies	(vessel's care)
Cargo Declaration	2 copies	(vessel's care)
Arms & Ammunition	2 copies	(vessel's care)
List of Narcotics	2 copies	(vessel's care)
List of Animals on Board	2 copies	(vessel's care)
Vaccination List	2 copies	(vessel's care)
Cargo Manifest for discharge cargo	6 copies	(vessel's and loading port Agent's care)

Authorities boarded the ship on the Roads.

Pilotage: Pilot is available, native, has knowledge of local currents and winds, otherwise is not skilled. Speaks only Spanish.

Anchorage: Half a mile West of the breakwater or further in depths from 12 to 25 m., sand, the holding ground is good but swell can be heavy.

Restrictions: Berthing possible only during daylight.

Berthing: The jetty can accommodate four ships, two on each side but at present all mooring buoys are removed, except Buoy No. 8. For this reason only ships equipped with stern anchor could be moored outside, to keep herself (with anchor) clear from the breakwater owing to swell, current and wind from S.W. Also the inner berth is not protected against the swell, because the breakwater was constructed of concrete piles. According to information the mooring buoys will be replaced in near future.

Loading/discharging with ship's gear, no shore cranes available. Oil products can be discharged by pipeline connected with shore storage tanks.

Stevedores: Available, arranged through Agent of shippers/receivers.

Medical: Hospital facilities available, but there is total shortage of drugs.

Fresh Water: Available from quay.

Opening/Closing Hatches: Normally done by crew.

Customs Allowance: No limit. No sealing of bonded stores.

Airport: There is an airport close to Bata with flights to the capital (Malabo) and Douala.

Time: GMT plus 1 hour.

Currency: Ekuela.

Stores: Not available.

Shore Leave: No restrictions. Identification cards not needed.

SHIPMASTER'S REPORT: June 1990.

Buoys: See "Plan".
Buoy No. 1: Missing.
Buoy No. 2: Estimated displaced 15 m. North, 120 m. off wharf.
Buoy No. 3: Estimated displaced 50 m. North.
Buoy No. 4: Missing.
Buoy No. 5: Estimated 110 m. off. Hook collapsed on a vessel's sailing manoeuvre this year.
Buoy No. 6: Missing.
Buoy No. 7: Estimated 100 m. off and 50 m. South of Jetty Head.
Buoy No. 8: Partially sunk.

General: Pilot has an assistant who boards and speaks some English.

Customs seal Bond.

Currency is C.F.A.

There are 2×25 tonne mobile cranes for working vessels and 3×23 tonne cranes with short jibs for working in the stacking area.

SHIPMASTER'S REPORT: February 1991.

Approaches: Jetty shows up well on radar, being identified some 16 miles to seaward. There is a solar powered light on the pierhead operating with a range of about 5 miles. Shoal water off the river mouth is extending and there are 2 conspicuous wrecks also off the river mouth.

Buoyage: All buoys are being landed for overhaul. The following buoys were found to be on station and have been overhauled:
No. 2 – 200 m. off wharf.
No. 5 – 200 m. off wharf.
No. 7 – 100 m. off wharf and 50 m. South of jetty head.

Jetty: Fendering in poor condition. Most wood piles are missing or have broken off under the jetty. Bollards are in good order.

Tankers berth starboard side alongside at South outer, pipelines have now been repaired and are in use.

Berthing: Outer berths: Drop offshore anchor, usually 6 shackles, and send stern line to buoy. Recommended moorings are 4 head lines and 4 stern lines with 2 backsprings each end. Two lines to buoy aft with as long a drift as possible on shore lines as the surge is sometimes considerable, especially May to September.

Inner berth: At present only the Northern one is in use. One line from both bow and stern to buoy, otherwise same as outer berths.

It must be emphasised that the mooring boat is poorly handled and sometimes takes a long time to land ropes. Early morning is the best time for berthing, before the wind gets up.

Pilotage and normal cargo hours start at 0700 hrs.

SUPERINTENDENT'S REPORT: August 1993.

Chart: B.A. Chart No. 1428.

New Port – Position: 01° 49.5' N., 09° 44.5' E.

Safe Anchorage: 01° 49.5' N., 09° 43.5' E.

Berth: A new L-shaped wharf of 320 m. length was constructed in 1990.

Pilot: Local Spanish speaking guide.

Tugs: No tugs available. One mooring launch available.

Fresh Water: Not available.

Fuel: Not available.

Provisions: Not available.
Repairs: Small workshop, but no repair facilities.
Containers: No facilities. Geared vessels only are handled.
Cargo Handled: Logs and sawn timber.
Stevedores: 4 experienced gangs available. Working hours: 0700 hrs. – 1200 hrs., 1300 hrs. – 1800 hrs. and 1800 hrs. – 2200 hrs. (overtime).

Sundays and holidays are worked at overtime rates.
Inward Clearance: National flag and "Q" flag to be flown.

Documents to include Crew List, Stores List, Arms and Ammunition List and Drugs List (6 copies of each).

All Seaman's Books are held by the Port Authorities.

At the time of Outward Clearance, all shore passes are collected and if any are lost, there is a fine of U.S.$ 60.00 for each one lost.
Medical: Poor facilities in Bata (7 km.).

Yellow Fever and Cholera Vaccination Certificates required for all crew members.
Airport: Small aeroplanes fly to Douala, Malabo and Libreville. Distance to airport 12 km.
Communications: Telegraph office in Bata. Telex, telephone and Fax available in Agent's office, but not reliable due to power cuts. Sometimes there is no means of communicating for weeks.
Loading Rates: If only one ship in port, cargo is ready, ship has good cranes, and stowage is not a problem, the rate can be 2,000 cbm (working 0800 hrs. – 2200 hrs.). On an average day, with more than one ship in port, etc., the rate is 800 cbm – 1,000 cbm.

Cargo is not usually ready, as shippers wait until vessel arrives to pay export taxes, and the documents require 19 different Government Departments' approvals.
Port Authority: Promoport. Joint venture of private Italian company and the Government, Italian manager. Promoport can be contacted on VHF Channel 16.
Agents: Promomar. Joint venture of above companies. Office in port area on VHF Channel 16 throughout 24 hours.

MALABO (formerly Santa Isabel): 03.46 N. 08.48 E.

Situated on the Island of Bioko (formerly Fernando Poo), Capital of the Republic of Equatorial Guinea.
DOCUMENTS:
9 Crew Lists.
3 Stores Manifests.
3 Crew Declarations.
2 Lists of Arms and Ammunition.
4 Lists of Ports of Call.
2 Passenger Lists or negative.
GENERAL: No tugs.
PILOTS: Effectively none. Only a locally informed inhabitant of this port comes on board to inform the Master, he is equipped with a large scale Spanish chart of this bay, but he has no nautical knowledge and he does not know how to handle a ship.
Note: 1. Masters should bear in mind that they have to manoeuvre and moor the vessel themselves.

2. In view of the continuous breakdowns (and insufficient power) of the mooring-launch it is absolutely necessary to have the ship's motor boat at stand by to run the ship's mooring-lines ashore.
ARRIVAL/DEPARTURE: Between 0600 hrs. and 1800 hrs.
TANKERS: See "Punta Europa Marine Terminal".
DRY CARGO VESSELS: Berth at a new jetty on the West side of the bay. No cranes available.
ADVICE: 1. Masters should be very careful when dropping their anchors as some vessels (Men of war) moor with their sterns to the dry cargo jetty and have their anchors in the middle of the bay. These anchors are very easily fouled by incoming vessel's anchors. A useful suggestion might be to put anchor buoys on the anchors in order to show another incoming ship their position.

2. Because it is quite difficult to manoeuvre a tanker around in this bay without any tug assistance, it should be borne in mind that when the wind is over Force 2 manoeuvring with a sizeable vessel is apt to falter, and no assistance can be expected from any quarter.
DEPARTURE: Vessels are free to leave within mentioned hours without Pilot.
RADIO COMMUNICATION: See "Bata".
CUSTOMS ALLOWANCE: No limit – no sealing of bonded stores.
SHORE LEAVE: No restrictions, but with own motor boat.
Currency: Equatorial Guinea Peseta = Spanish Peseta.
SERVICES: M.A.C. Guinea S.A. offer the following services: Agency, stevedoring, bunkering, chartering, heavy lift and liner parcel facilities, ship management and freight forwarding.

PURSER'S REPORT:
Documents:
9 Crew Lists.
9 Passenger Lists (Marked "none" if no passengers on board).
3 Customs Declarations.
3 Stores and Provisions.
4 Arms and Ammunition.
1 Vaccination List (Cholera and Yellow Fever).
9 Cargo Manifests.
Stores: No stores were purchased at this port, advise top up prior to calling at this port.
Mail: Advisable to send to next big port.

SHIPMASTER'S REPORT: May 1984.
Pilotage: There are no Pilots at Malabo. Masters are expected to berth the vessel themselves on receiving instructions from Agents via VHF to proceed to the berth. If requested an Agents' representative may board the vessel but they are not persons with nautical knowledge and can be helpful only in communicating with the mooring boat.
Berth: The general cargo berth on the S.E. side of the bay is 200 m. long and fitted with good fenders. Depths alongside vary from 6.0 m. at the extreme S.E. end to about 7.0 m. one third of the length from the end and nearly 9.0 m. at the N.W. end of the pier.

There is no definite draft restriction but a vessel with a maximum after draft of 24 ft. can safely berth alongside. Off the pier the water is deep with depths of 14 m. to 17 m.
Berthing Procedure: Vessels berth starboard to without using anchor. After passing the red buoy about 20 m. off to port swing to starboard to bring vessel as close to and as parallel to the pier as possible. Mooring boat takes the ship's lines ashore.
Unberthing Procedure: Using headline and forward springs swing vessel off pier sufficiently to drop astern to the centre of the bay. Then swing using engines to proceed out. (Note: It is advisable not to attempt berthing or unberthing if the wind is unfavourable, particularly with large vessels. There are no other craft in the port other than two mooring boats).
Cargo Handling: Vessels discharge cargo using their own gear. There is one small wooden barge fitted with outboard motor for handling small consignments. There are no lighters or towing boats or tugs in Malabo.
Radio Communications: All the radio stations in Equatorial Guinea are unreliable and mostly not operating. Messages should be sent via Douala or some other major coastal station.
Lights: None of the lights shown on the chart were functioning. At night only vessels with radar should approach close. There has been a complete breakdown of the power supply to the town of Malabo for 8 weeks. It is uncertain when the power supply will resume.
Consulates: Spanish, Belgian, French, American, Russia and Cameroon.
Fresh Water: Available, laid on to the pier, good pressure.

SHIPMASTER'S REPORT: June 1990.

Anchorage offshore: At least 7 cables clearance reduces considerably the number of sand flies at night.

All navigational lights working as per Light List, Volume "D".

Leading beacons for entrance now painted red with white bands. The Easternmost of the two prominent white advertising boards lies nearly between the two beacons.

The Pilot was competent and cautious, usually only berths vessels, normally starboard side alongside using port anchor, he speaks good English.

Fresh water available, but should always be treated.

No difficulty sailing, except if wind is strong, stern sprung off, and vessel turned round in bay. Strong winds usually moderate quickly, and less effect is felt in the bay.

The two buoys formerly marking the shoals, either side of the entrance, are stowed on the wharf. There are said to be plans to replace them.

SHIPMASTER'S REPORT: February 1991.
Entrance: When entering the port vessels should avoid going to starboard of the leading line as deeper water will be found slightly to port of the line. There is sometimes a moderate set across the entrance and the direction could be either Easterly or Westerly.

The upper leading light is not particularly distinguishable at night due to background lights, however, using a radar bearing on the mole presents no difficulties.
Pilotage: Pilot will board from 0700 hours until nightfall.
Berthing: Pilot prefers to berth starboard side to, however port side to presents no difficulties and in some cases is preferable.

Sometimes there is a moderate set out of Ensada da Venus which can render berthing at the seaward end of the wharf difficult if the vessel's bow extends beyond the end of the wharf.

The Pilot/mooring boat is reasonably reliable and efficient and can be used to push or tow, having reasonable power for the calm conditions normally found inside the bay.
Facilities: There is a 25 tonne forklift with a 20 ft. container frame for moving containers. A mobile crane, said to be of 100 tonnes capacity, should be operational early in 1991.
Departure: This is comparatively easy, however observing the trend of the current around the bay shortly before letting go is advisable as it sometimes reverses due to prevailing conditions outside the entrance.

PUNTA EUROPA MARINE TERMINAL (Isla de Bioko): 03.47 N. 08.43 E. **(See Plan)**

DOCUMENTS:
4 copies Crew List.
4 copies Passenger List.
4 copies Arms and Ammunition List.
4 copies Narcotics List.
4 copies Animals and Livestock List.
4 copies Stores List.
4 copies Ports of Call List.
4 copies Vaccination List.
4 copies Crew Declaration.
4 copies Maritime Declaration of Health.
4 copies Clearance from Last Port.

PILOTAGE: CMS Nomeco International Equatorial Guinea Inc. (N.I.E.G.) presently provides a European Pilot/Mooring Master, to assist and advise the ship's Master with the berthing and unberthing of the vessel at this Terminal. The services of this Pilot/Mooring Master are provided with the express understanding, and on the condition that, while onboard for the purpose of assisting the vessel, the Mooring Master becomes, for such purposes, the servant of the Owners and/or Charterers of the vessel, and that the ship's Master shall remain solely responsible for the safety and proper manoeuvering of the vessel. CMS Nomeco International Equatorial Inc. (N.I.E.G.) shall not be responsible for any damage or injury resulting from the advice and assistance given by such Mooring Master.

ANCHORAGE: No designated anchorage exists at present, but due to the presence of a high pressure gas pipeline in the vicinity of the berth, and due to the fact that shoal water has been reported in the bay between the berth and the port of Malabo, Masters are recommended to anchor to the North of Latitude 03° 47' N., and to the East of Longitude 08° 44' E. The bottom consists of mud and black volcanic sand with good holding in 135 ft. of water.

NAVIGATION: A 10 in. diameter 3,500 p.s.i. high pressure gas pipeline runs from a position on the shore at 03° 47.083' N., 08° 43.166' E., thence in a curve through position 03° 48.0' N., 08° 43.4' E. to an offshore production platform in position 03° 58.7' N., 08° 32.9' E. Anchoring in the vicinity of this high pressure gas line is extremely dangerous and is prohibited. This line is marked in the vicinity of the berth by a lighted red/yellow horizontal striped spar buoy, located to the Eastward of the pipeline. A 24 in. diameter export pipeline and a 6 in. diameter LPG pipeline run from the shore at 03° 47.083' N., 08° 43.166' E., thence in a straight line to a position 03° 47.1584' N., 08° 43.6288' E. The pipeline end manifold (PLEM) is marked by a yellow spar buoy close to the Westward of the manifold.

A conspicuous flare is located 260°(T) × 660 ft. from the Punta Europa Lighthouse.

RESTRICTIONS: Vessels will only be berthed and unberthed at this Terminal during daylight.

MAX. SIZE: Presently 60,000 tons d.w.t. (LOA 700 ft.), although larger vessels may be handled in the future. No restrictions on draft or beam.

HEALTH: *Malaria Precautions:* Bioko Island has a high incident of Chloroquine resistant Malaria, and full preventative measures should be taken. Mefloquine (Larium) is the prophylaxis of choice.

RADIO/VHF: *Communication Prior to Arrival:* A vessel nominated to load at this Terminal should advise its local Agent of its ETA upon sailing from its last port of call, then again 72, 48 and 24 hours prior to arrival. The Agent will keep N.I.E.G. informed accordingly. When the vessel is within about 20 miles of the Terminal, contact should be attempted on VHF Channel 16. When initial contact has been made, the Terminal will designate another secondary channel for further communication. The Terminal Gas Plant can be contacted on VHF Channel 66.

TUGS: 1×1,200 h.p. line handling tug with a 12 ton bollard pull is used for running and tripping the mooring lines from the mooring buoys. This tug will assists in the mooring of the vessel as directed by the Mooring Master, and will remain on location in close proximity to assist as required whilst the vessel is in the berth.

BERTHING: The berth consists of a Four Point Buoy Mooring located 1,500 ft. offshore in 130 ft. of water that allows vessels to be berthed heading in either a N.W'ly (295° heading), or a S.E'ly (115° heading) direction, depending upon the weather/tidal condition prevailing at the time of berthing. The vessel will be secured to 4 mooring buoys with one buoy located on each bow, and one buoy located on each quarter. These mooring buoys are designated P1, P2, S1 and S2.

The number of mooring lines/wires used to secure the vessel to each buoy will be dependent upon the size of the vessel, the prevailing weather/tidal conditions, and the type/size of mooring lines that are available onboard. Typically, 3 ship's lines will be used in securing the vessel to each buoy. All mooring wires should have synthetic tails attached to each wire, otherwise they will not be acceptable.

The vessel's offshore bower anchor may, or may not, be used in berthing. On completion of mooring, the vessel's main engines and steering gear should be kept available on standby, for use if required. No repairs to the vessel's engineering plant will be permitted, if such repairs limit the power availability in any way.

LOADING: *Responsibility:* The ship's Master shall be responsible for the vessel at all times. The Mooring Master will advise with respect to the hose connection/disconnection, loading pressures, loading rates, A.P.I. and cargo temperature. Other than this he will not direct the vessel's operation in any way, except to protect the Terminal's facilities. The Mooring Master will prohibit or suspend cargo loading operations should any danger appear to exist, or should there be any breach of the Terminal, ISGOTT or IMO Regulations.

Hose Handling: The hose may be handled on either side of the vessel, depending upon the heading of the ship in the berth. As the heading will be unknown until just prior to berthing, the vessel should arrive with both midships hose handling derricks/cranes rigged, and be prepared to handle the hose on either side. The actual heading will be advised by the Mooring Master, just prior to boarding. The vessel should be prepared to present 1×12 in. 150 ASA hose connection for mating with the Terminal's submarine hose.

The cargo derricks/cranes with associated equipment and fittings should have a S.W.L. of 7 tons or greater for handling these hoses.

The cargo is loaded through 1×12 in. submarine hose that is lifted from the sea bed, and is connected to the vessel's manifold connection by the ship's crew under the guidance of the Mooring Master. The hose tail is marked by an orange pick-up buoy, which is in turn connected to the submarine hose by 135 ft. of 1.25 in. diameter chain. The hose has a gross weight of approximately 9,000 lbs. when suspended 20 ft. above the ship's rail, and a variety of miscellaneous rigging items, such as assorted wire strops, shackles, rope slings, chain falls, etc., of suitable S.W.L. should be made available for use in connecting the hose.

Ballast: No dirty ballast reception facilities exist at this Terminal. All vessels nominated to load should arrive with clean or segregated ballast onboard that may be discharged overboard. The vessel should have sufficient deadweight, and be in a suitable trim for safe manoeuvering, given the prevailing conditions.

Cargo Specifications: "Alba Condensate", API at 60° (typical) – 52.3, density at 15°C – 0.7654, loading temperature 80° – 90°F.

Loading: The cargo will be loaded by gravity from the Terminal's storage facilities via the 1×12 in. submarine hose at a maximum rate of approximately 15,000 bbls./hr. Prior to commencing loading, the Mooring Master will advise the ship's Master of the exact product API, the approximate loading temperature, and the nominated quantity the vessel is to load. It will be the vessel's responsibility to determine when this quantity has been lifted and to tell the Mooring Master to inform the Terminal to stop loading.

Important: Do not, under any circumstances, close the ship's valves, or the submarine hose tail valve against the incoming flow of product.

On completion of loading, the Terminal will close their valves first, and then advise the Mooring Master when to tell the ship to close their valves.

Ship/Shore Communication during Loading: This will be carried out on a VHF channel that will be designated by the Mooring Master, and the vessel's main VHF units should be readily available and accessible for this purpose if required. In the event of a communications failure with the Terminal, loading may be suspended by blowing a series of short rapid blasts on the ship's whistle, to alert the Terminal staff of the failure.

Cargo Inspection: Two Government Petroleum Ministry Officials, two Customs Inspectors and a Cargo Surveyor will inspect the cargo tanks and determine the OBQ quantity prior to commencing loading. These officials will stay onboard throughout the loading, gauge the tanks upon completion of loading, and will require food and accommodation. The ship's measurements, barrels, cubic meters, long tons and metric tons will be used for Bill of Lading purposes, and all the commercial documentation will be completed by the Mooring Master prior to him leaving the vessel.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not available.

STORES: Very limited.

REPATRIATION: Possible. The Malabo Airport is served by an Iberia jet service once a week, with a flight directly to Madrid. This flight arrives at 1500 hrs. on Sundays, and departs again at 1600 hrs.

Alternative travel to Europe is possible through Douala, which is served by four local flights a week. A departure tax of CFA Franc 5,000 (U.S.$ 10.00) is required at Malabo and CFA Franc 10,000 ($20.00) at Douala Airport.

TIME: GMT plus 1 hour.

GENERAL: *Weather:* There are two distinct seasons, the rainy season, where it rains a lot, which extends from about May through to September, and the dry season, where it does not rain quite as much and extends from December through to February. The variable season between the wet and dry seasons occupies the rest of the year.

Currents: Offshore, the current generally sets from the West towards the East at variable rates throughout the year. Inshore, in the vicinity of the berth, a strong counter current flows from the East towards the West at rates in excess of 2 knots. This counter current is more pronounced during the rainy season, and becomes weak and variable during the dry season.

DEVELOPMENTS: It is planned to export LPG through this berth in the near future.

AUTHORITY: *Operators:* CMS Nomeco International Equatorial Guinea, B.P. 742, Malabo, Equatorial Guinea. *Tel:* (240) 9-2736. Inmarsat 874-1515245. *FAX:* (240) 9-2746. Inmarsat: 874-1515246 (Telephone or Fax). *Contact:* Captain A. Cumpstey, Marine Manager.

Eritrea

ASSAB: 13.01 N. 42.44 E. (See Plan)

PORT LIMITS: A line drawn from Ras Gombo to the Northern point of Umm al Baher (Islands) to Southern point of Umm al Baher, then to Ras Marcanah.

DOCUMENTS:

5 Manifests for Transit Passengers and passports.
5 Manifests for Landing Passengers and passports.
5 Crew Lists.
1 Complete Crew Provisions List.
1 Crew Personal Effects List.
1 Store List.
6 Cargo Manifests.

PILOTAGE: Compulsory. Pilots take tankers in and out of oil harbour only during daytime. Pilots embark about 0.5 miles N.N.E. from Northern extremity of breakwater. Commercial harbour gives 24 hour service. Vessels calling Assab must advise Agent through Assab Coastal Radio Station by call sign ETC. Assab Radio Signal Station is available, but it is preferable to contact the Agent through Satcom A (See "Agency").

ANCHORAGES: Assab Bay provides good anchorage in 42 ft. to 48 ft. of sand and coral bottom, good holding ground. Generally weather in Assab can be divided into two: Summer time and Winter time weather, during Summer (May–September) Northerly wind blows with a maximum force of 3/4 BS. During Winter time (October-April) South-easterly local monsoon winds blow usually 5/6 BS but reaching Force 7/8 BS during daytime and generally drop at night. This 7/8 BS force is mainly experienced about December to February.

RESTRICTIONS: There are 2 entrances, the North and the South entrance, the depth at the entrances is 38 ft. Least width 1,300 ft.

Vessels of any size enter or leave port during hours of darkness except tankers, and vessels carrying dangerous cargo. In these cases, where vessels are carrying explosives or other dangerous cargoes, Agents of calling vessels must notify the Port Office in advance of discharging and/or loading of explosives. Inflammable and other highly dangerous cargoes in commercial harbour are permitted from 0600 hrs. to 1800 hrs. local time. Firefighting truck attendance is compulsory.

MAX. SIZE: Largest vessels which can enter:

	LOA (m.)	*Beam* (m.)	*Draft* (m.)
Commercial Harbour	200	any	11.0
Sea Berth (for tankers)	185	29	11.0
Shell Berth (for tankers)	183	any	8.5
Refinery Berth (for tankers)	110	any	8.0

HEALTH: Quarantine and sanitation services available. Quarantine officer boards arriving vessels and necessary medical clearance given.

RADIO: Coastal radio station available:

(a) Position Lat. 13° 01' 24" N., Long. 42° 44' 38" E.

(b) Coastal radio station in service for 13 hours per day 0700 hrs. to 2200 hrs. Call sign ETC. Transmits traffic lists on 489 kHz after a preliminary announcement on 500 kHz, 30 minutes past each odd hour starting at 0500 and ending 1700 hrs. (0530, 0730, 0930, hrs. etc.).

(c) Transmits traffic lists on 6,509 kHz at 0500, 0900 and 1300 hrs. and searches 6,265.5 kHz – 6,280.5 kHz between 0515 – 0600, 0915 – 1000, and 1315 – 1400 hrs.

(d) Transmits traffic lists on 8,618 kHz at 0700, 1100 and 1500 hrs. and searches 8,354 kHz – 8,374 kHz between 0715 – 0800, 1115 – 1200 and 1515 – 1600 hrs.

(e) Rates shall include station charges and charge of transmission over telecommunication network within Eritrea.

(f) Accepts ship letter telegrams (SLT) from ships for delivery in Assab.

(g) For radio telephone service, Station keeps watch and replaces on 2,182 kHz for radio telephone service at 0615 – 0700, 0815 – 0900, 1015 – 1100, 1215 – 1300, 1415 – 1500, 1615 – 1700 hrs. and transmits traffic same hours on 4,379.3 kHz. Service hours will be extended to 24 hours.

VHF: VHF system is in operation in the port area and in Agent's office.

TUGS: Tug service compulsory for all ships. Two tugs of 1,400 h.p. and 1,600 h.p. attend ships on arrival and departure.

BERTHING:

		Depth
North half jetty	495 m. length	
Berth No. 1		10.97 m.
Berth No. 2		10.97 m.
Berth No. 3		10.06 m.
South half jetty	529 m. length	
Berth No. 4		5.48 m.
Berth No. 5		8.20 m.
Berth No. 6		9.00 m.
Berth No. 7		10.06 m.
Berth No. 7A		8.00 m.

In addition, stern ramp Ro-Ro vessels with LOA 133 m. and draft 8.0 m. can be accommodated at Berth No. 7A. There is a similar Ro-Ro berth at the end of Berth No. 1, namely No. 1A presently not in use.

Fenders are good and protect ships from impact; harbour is modern and has modern breakwater 711 m. length. 8 large vessels can be accommodated at a time.

Salt Loading Terminal: Located 1.7 miles from the Commercial Harbour, salt loading ships drawing up to 33 ft. are berthed at this terminal using 2 anchors and mooring to buoys and dolphins. Not in use at present time.

Cargo Handling Equipment:

Type of Equipment	*No.*	*Capacity*
Rail mounted quay cranes	4	20 tons
Rail mounted quay cranes	14	6 tons
Mobile cranes	6	15-50 tons
Container lift trucks	4	25-35 tons
Forklifts	62	4-10 tons
Tug Masters	4	40 tons
Tractors	56	70 h.p.
Trailers	187	20-40 tons
Bagging machines	12	75 kg.

STEVEDORES: Stevedoring activity is performed solely by the Port Administration. The port provides skilled labourers, equipment and materials, and organises and supervises the activity.

Loading and discharging rates as follows:

	Output per gang shift (tons)	*Output per gang shift* (tons)
Bulk cargo fertiliser	15	455
Wheat	21	575
Bagged cargo	19	525
General cargo	15	195
Containers	5 boxes	45 boxes

Working Hours:

1st shift:	0600 hrs. – 1400 hrs.
2nd shift:	1400 hrs. – 2200 hrs.
3rd shift:	2200 hrs. – 0600 hrs.

MEDICAL: One hospital in town and clinic in port. When sick person on board, hoist (by day) International code flag "W", (by night) 3 lights in vertical line upper one red, and middle and lower, white lights. Doctor may be called on board at any time to attend sick crew or passengers by arrangement with Agents.

TANKERS: Oil harbour located about 1.5 miles S.E. of commercial harbour with depth 12.0 m. Crude oil discharging terminal 500 m. from Southern end of breakwater open sea buoy berth – tankers of 185 m. length, and 11.0 m. draft can be accommodated. Diameter of pipeline for loading and discharging black and white products is 12 in.

There is also a coastal tanker jetty, known as the Refinery Jetty, with length 110 m. and depth 9.5 m. Vessels loading and discharging refined products with LOA 110 m. and draft 8.0 m. can be accommodated at this berth.

(1) By dropping port anchor, passing starboard head line to the buoy and

(2) Four lines together, one from starboard side dolphin and another from port side dolphin.

Tankers at the Shell Berth are moored by dropping 2 anchors and tying up 2 ropes from stern to the buoys, and 2 ropes from each quarter to the dolphins. All grades of oil in bulk discharged into shore storage tanks from this harbour.

In Assab, the petroleum installations are of Shell Eritrea Co. and Mobil Oil East Africa (Eritrea) Co.

DENSITY: At berths is 1030, while the tides are negligible for all seasons; max. 1 ft.

FRESH WATER: The best fresh water in the Red Sea and East African ports, available any time requested with no restriction on the amount.

FUEL: All grades available, at commercial harbour. Advance notice necessary. Rate of 300 t.p.h.

FIRE PRECAUTIONS: Modern fire brigade and tugs available.

CONSULS: Only Ethiopian Consulate in Assab.

REPAIRS: Minor repairs can be carried out at Port Administration workshop.

GANGWAY/DECK WATCHMEN: Watchmen on deck necessary, rate as per tariff.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: All ship's International Certificates should be on board.

CUSTOMS ALLOWANCES: Tobacco, 400 cigarettes. Wine and/or spirits: 1 litre or bottle of spirit.

REPATRIATION: Possible.

AIRPORT: 15 km. from Assab.

TIME: GMT plus 3 hours.

POLICE/AMBULANCE/FIRE: Port Police Tel: 660425; Hospital Tel: 660396; Port Office Fire Brigade Tel: 660102.

GENERAL: 3 modern hotels, namely Ras Gombo Hotel, Zeray Deres Hotel and Kebal International Hotel (ex-Star Lite Hotel) are available in town.

SHORE LEAVE: Crew allowed ashore, with Immigration Boarding Passes.

IDENTIFICATION CARDS: Required.

DEVELOPMENTS: Berths No. 13 and 14 to be constructed and dredged down to 12.0 m. from the current 10.0 m.

Deepwater berth with length of 500 m. to be constructed. It will have heavy duty paving and will be used for handling containers. No cranes on order at present.

For 1996 and 1997, there will be procurement of ship-to-shore container mobile crane, container lifting trucks, tug masters, forklifts, trailers and tug, which will substantially improve efficiency.

SHIPMASTER'S REPORT: January 1983 (Updated 1996).

VHF: VHF system is installed. Call sign "Assab Signal Station". Working Channel 12.

Medical: No dentist available in city.

Fresh Water: Available. No restriction on amount.

Repairs: Not possible. No oxygen or acetylene available.

General: No spares of any description available. Provisions can be supplied in small quantities.

SHIPMASTER'S REPORT: February 1985 (Updated 1996).
Documents: No cargo documents whatsoever were received by Agent prior to ship's arrival. The day after arrival at the roads, the Agent came on board to collect a full set of cargo documents. This procedure seemed to be a fairly normal practice on ships other than regular liner ships and tankers arriving at Assab. (Port Manager's Remarks (1996): If DHL used, documents can reach in time prior to vessel's arrival. But, we recommend Master to have cargo documents onboard for submission to the Agent and Customs Officer on arrival before berthing.)

After having berthed, Authorities came on board to collect 5 Crew Lists, 3 Stores' Declarations and 3 Crew's Effect Declarations. Ship's Certificates were not examined. Ship's lockers with tobacco and spirits were sealed by Customs. Beer-store not sealed. No search of crew cabins.

Pilotage: Signal station working VHF Channels 16 and 14, giving berthing instructions and other information. Also signal station is most willing to pass any messages to Agents, etc.

Pilot boards ships on the roads approx. 0.5 miles off the breakwater. 2 Pilots and 2 Apprentice Pilots are serving the port. This ship was handled by the Chief Pilot, who is very skilled in handling ships, making effective use of wind when berthing/unberthing/shifting ships in port.

Anchorages: Ship arrived on the roads 14th January, 1985 and was at anchor for 18 days. In that period the wind blew during the night with Force 4/5 from S.E., shifting E.S.E. Force 6/7 during daytime – often reaching Force 8. Holding ground good.

Restrictions: Draft restriction should comply strictly with the Port Regulations (See "Max. Size"). The problem is not the depth alongside the pier but a small patch of sand close to the breakwater, with a minimum depth over it of 35 ft. Ships with the deepest draft are berthed at Pier No.1 (The outer end of the Northern Pier).

Health: After arrival in roads, ships are called by a Quarantine Officer on VHF Channels 16/14, who asks relevant questions such as last port, crew members on board, if any sickness, gross/net tonnage. If satisfied with answers ship is granted Free Pratique.

Radio: Assab Radio (ETC) was impossible to use during voyage to Assab, and all messages were passed via Aden Radio (7OA). After having anchored at Assab Roads, Assab Radio did answer and arrival message and Notice of Readiness were sent via ETC.

Tugs: Tugs meet ships inside the breakwater. 1 tug built 1981 and 1 built 1987, respectively 1,400 and 1,600 h.p. Both of them are working very effectively. Large ships are normally berthed at Pier 1 or 2 – the outer ends of piers – bow heading out. An anchor is used to hold the ship's bow while tugs are pushing the ship into position. 1 larger tug and 1 smaller tug were seen in the port, but they were not in use during our visit.

Cranes: On the Northern pier there are 9 cranes, and on the Southern pier 9 cranes. All were electric cranes working well and well maintained. 2 of the cranes on each pier are 20 ton capacity and the others 6 ton. At least 3 mobile cranes were seen, one with capacity up to 60 tons.

Bulk Cargo Facilities: Bulk grain is discharged by grab to portable bag filling equipment on the pier. Capacity unknown. 2 cranes are normally used and an outturn of 575 tons (grain) per shift is obtainable.

Stevedores: Agents arrange gangs. Shifts worked: 0600 hrs. – 1400 hrs., 1400 hrs. – 2200 hrs., 2200 hrs. – 0600 hrs. It seems normal practice that all ships work around the clock with maximum possible gangs.

Density: 1023.5.

Fresh Water: Available. No restriction on amount.

Watchmen: Gangway watchman compulsory. One watchman works from 0600 hrs. to 1800 hrs. The other from 1800 hrs. to 0600 hrs. Meals are to be supplied by ship.

Customs Allowances: Each crew member had 200 cigarettes and some had a bottle of spirits on arrival. No comments were made to this quantity.

Repatriation: Said to be possible.

Shore Leave: Immigration Department issue a special shore pass, which is shown when passing the gate to and from the port.

Supplies: Ships should not rely on any supplies. At a local market, some supplies of fresh vegetables can be obtained, but most are of poor quality.

Delays: Depending on type of cargo. Berths No. 1 and 2 are said to have been promised to ships with food aid.

Notice:

TO:
THE MASTER
M/V "………………"
ASSAB

Assab Port Authorities: General Instructions to be followed:

1. No curfrew.
2. Any crew member going ashore should hold his Passport or Seaman's Book together with a shore pass given by the Immigration Officer. Misuse or loss of a shore pass card will not only lead to payment of U.S.$10.00 per card but also strong measures will be taken upon the individual crew member who involves himself in such misuses.
3. Attempts to exchange foreign currency on black market leads to serious prosecution. Official bank exchanges are authorised (Rate of exchange 1 U.S.$ = 6.30 Birr (1996)).
4. No restriction on movements of ship's crew in town.
5. All crew's personal belongings should be shown in Crew Declaration. The Customs Authorities will inspect all individual cabins upon arrival and departure.
6. Rat guards should be fitted to all mooring ropes immediately after berthing. Contravention of this will incur a penalty as decided by the Port Administration.
7. Anchoring in Territorial Waters and generally from "T10" to "Ras Damera" is strictly prohibited. When entering territorial waters you must open your VHF Channel 16 and inform Naval Base of your identity.
8. Two hours before departure, "G" flag should be hoisted by day and vertical "Red White Red" should be lit by night, for Pilot.
9. Before sailing from our port you must institute a thorough search of your vessel to ensure that no unauthorised persons or stowaways are on board at the time of departure.
10. No restriction for anchoring in territorial waters.
11. Any crew member found in illegal possession of harmful and toxic drugs or found circulating same directly or indirectly shall be seriously dealt with according to the penal code.
12. Diving, swimming and fishing within and or near by the premises of the harbour is strictly prohibited.
13. Photography within the port or around the town is strictly prohibited.
14. Smoking inside port area is strictly prohibited.

SIGNED:……………………
MASTER

SHIPMASTER'S REPORT: July 1987.
Fresh Water: Available, no limits. We received 200 tons in 7 hours.
Shore Leave: Allowed. Crew must take U.S. Dollars ashore to change to local currency. No other currency accepted.

AGENCY: Eritrean Shipping and Transit Service Agency (Sole Shipping Agent in Eritrea), P.O.Box 64, Assab, Eritrea. Tel: 873-1445562. Fax: 873-1445563. Telex: 583-1445562. Contact: Asfaha Tekeste, General Manager. Mohammed Ali Sherif, Shipping Manager.
AUTHORITY: Assab Port Administration, P.O.Box 58, Assab, Eritrea. *Tel:* 660710. *FAX:* 873-1445563. *Contact:* Mohammed Said Jassir, Port Manager. Captain Yohannes Asfaw, Harbour Master. Tesfay Tekle, Operations Manager.

MASSAWA: 15.37 N. 39.28 E.

PORT LIMITS: The coastline of Gurgussum Peninsula, at Lat. 15° 39' N. to a point Lat. 15° 39' N., Long. 39° 30' E. to Lat. 15° 35' N., Long. 39° 30' E. to the coastline at Lat. 15° 35' N., Long. 39° 26' 50" E.
DOCUMENTS:
2 sets Manifests.
2 sets Bills of Lading.
5 Crew Lists.
5 Passenger Lists.
2 Stores Lists.
APPROACHES: Through North Channel and South Channel. In channel, in direction of leading lights 243°, max. depth 31 ft. (but alongside 30 ft.) Marker buoy showing a wreck in position approximately 200 m. S.E. of North Breakwater.
PILOTAGE: Pilotage is compulsory for all vessels over 100 n.r.t. Pilot section headed by a Chief Pilot and 2 other Pilots.

There is 1 pilot boat. ETA should be given to Agent who will inform Pilot 72 hours prior to arrival. Signal tower located in port area contacts vessel on arrival informing Agent and Pilot, and receiving or transmitting by Morse lamp messages to and from vessel.

ANCHORAGES: 8 cables East of main lighthouse. Anchorage North of leading light not recommended.
Tides: Normally the range of tide varies between 1.5 and 2.0 m., but during spring tide season the range varies up to 3 m.
MAX. SIZE: Length 180 m., draft 29 ft.
HEALTH: Doctor normally boards with Pilot, but can be asked to board together with Customs and Immigration while vessel on roads. All crew members must be vaccinated against yellow fever, and possess necessary certificates. Derat and other health certificates required. Derat cannot be effected at Massawa, but exemption certificate can be obtained.
RADIO: Assab Radio, call sign ETC, Djibouti Radio, or Aden Radio may be used. Asmara Radio, call sign ETC 2, working hours 0500 to 1700 GMT. Radio-telegraphy and radio-telephone services.
TUGS: Compulsory. Join vessel in port.

3 tugboats are available, two of 350 h.p. and the third 1,000 h.p. The smaller motor tugboats used for assistance mainly within the port limits, and the deep-sea salvage motor tugboat, for salvage operations, but whenever conditions demand, is also employed for assistance within the port.

BERTHING: Vessels normally drop anchor before berthing.
Commercial Harbour: 6 berths, namely 1 to 6, and the overall distance from Berth No. 1 to Berth No. 6 is 907 m. These berths normally used by vessels handling general cargo, bagged cargo and livestocks. Depth of water at mean low water springs (MLWS) is shown below:

Berth No. 1 – 16 ft. 6 in.
Berth No. 2 – 24 ft. 6 in.
Berth No. 3 – 28 ft. 6 in.
Berth No. 4 – 28 ft. 0 in.
Berth No. 5 – 27 ft. 0 in.
Berth No. 6 – 30 ft. 0 in.

Salt Berth: This is a single berth where vessels load salt in bulk. The depth at the berth is 32 ft. Max. draft 29 ft. Loading with the help of conveyor belt at the rate of about 300 t.p.h.
Cement Berth: Depth 18 ft.
American Jetty: Depth 18 ft.

However, dredging will be carried out to accommodate vessels of a greater draft in the future.

STEVEDORES: Radio 24 hours' notice of ETA stating number of gangs required. Loading discharging rates 5 t.p.h. on general, 10 – 15 t.p.h. on bagged cargo.
DENSITY: 1025.

MEDICAL: Notice should be given to Agent only when specialist needed. Hospital treatment available. Dental facilities available at Asmara, 110 km. away.

TANKERS: AGIP, Arkiko Oil Station Terminal: Max. draft for entering channel 29 ft.

Total Pier, depth alongside 36 ft., max. draft 30 ft.

FRESH WATER: Supplied alongside, Max. rate 600 tons per day or by barge of 50 tons on roads. Barge can be loaded/discharged in 8 hours.

FUEL: Can be obtained alongside oil terminals and at Berth Nos. 5 and 6 for heavy fuel only. Diesel can be supplied by lorries alongside. No bunker barge available.

CONSULS: Italian Vice-consulate, Box 62. Tel: 52214.

REPAIRS: Good workshops for minor engine repairs. Slipway for vessel up to 600 g.r.t.

GANGWAY/DECK WATCHMEN: Compulsory when alongside.

OPENING/CLOSING HATCHES: Normally by labourers, but can be done by crew.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man. New allowance can be delivered after 1 week. Wine/Spirits: 1 bottle of wine/spirits (opened). Wine and beer quantity necessary for the stay in port allowed upon reasonable request on arrival.

REPATRIATION: Via Asmara by chartered air-taxi, then by international flights. Or Massawa-Asmara by road, 110 km., asphalt road (daily convoy).

TIME: GMT plus 3 hours.

POLICE/AMBULANCE/FIRE: Police, Tel: 52425; Ambulance, Tel: 52234-5-6; Fire Brigade, Tel: 52220.

TELEPHONES: Possible to place telephones on board. Arranged by Agent.

SERVICES: Radar and gyro compass technician available, but special spare parts not available.

SHORE LEAVE: Crew cannot leave vicinity of Massawa without special immigration permit.

IDENTIFICATION CARDS: Not needed. Immigration gives port entry card (without crew member's name) which must be given back prior to departure. In case of loss a fine is likely.

AUTHORITY: Department of Maritime Transport, P.O.Box 6, Massawa, Eritrea. *Tel:* 552931. *FAX:* 552157. *Contact:* Mr.Mekonen Habtezion, General Manager.

NOTES

GENERAL:

Republic of Estonia
Ministry of Transport and Communication

NOTE: The following is a translation into English.
Appendix 1. Navigation Safety Rules in Tallinn Port and Archipelago Small Ports (Roomassaare, Virtsu, Kuivastu, Rohukula, Heltermaa, Sviby (dated 1992)).

A. *General Clauses:*

1. The Appendix 1. of the Code of Customs of the Port applies equally to all vessels, irrespective of a flag, calling at Kesklinna Port, Muuga and Kopli Ports, Archipelago Small Ports, or to companies and private persons, performing their activities in the Port and Archipelago Small Ports territory.

2. The Tallinn Port Aquatorium includes:

The City Port water area, that is the basin area of the Old Harbour and outer routes in the Tallinn Bay, limited in the North by a geographical parallel, passing through the Northernmost point of the Old Harbour North-Western Mole head, in the East by the Tallinn Lighthouses leading line and by the coastline in the South.

The Kopli Port water is a basin area within the bounds of Sectors 1, 2, 3, 4, in the South, and Sectors 5, 6, 7, 8, 9, 10, in the North. The aquatic area bounds near Sector 4 docks and Sector 11 are equal remote of opposite coast territories.

The Muuga Port water area is a basin area from C.Tahkumagi, alongside coastline, up to the Western Basin Mole head extremity. From the sea side, the water area is limited by lines, connecting C.Tahkumagi (Lat. 59° 30' 04" N., Long. 25° 00' 04" E.) with the points (Lat. 59° 31' 04" N., Long. 24° 58' 01" E.) and with the Western Mole base (Lat. 59° 31' 04" N., Long. 24° 56' 06" E.).

B. *Vessels entering and leaving the Port:*

1.1 Vessels navigation in the approaches and within the Tallinn Port Aquatorium is controlled by the Traffic Control Service, further TCS, call sign "Tallinn Radio 5" on VHF Channel 14 ("Port Control").

In the Kopli Port water area, TCS call sign "Tallinn Radio 32" on VHF Channel 11.

In the Muuga Port and the Viimsi Reach, TCS call sign "Muuga Radio 5" on VHF Channel 67.

1.2 Information on a vessel approach should be sent to the Port Operator by the Master or his Agent 48 hours and 24 hours prior to the approach.

Information must contain following data:
Time of approach to the Pilot Station.
Draft forward and aft.
Reason for call.

1.3 The Master should contact TCS in advance on the VHF and adjust the time of approach. While entering Kesklinna Port, Kopli Port or Tallinn Bay, vessels' communication is maintained on VHF Channel 14, call sign "Traffic Control" or "Tallinn Radio 17". While entering Muuga Port, Muuga Bay on VHF Channel 67, call sign "Muuga Radio 5".

1.4 Vessel entering or leaving the Port should receive TCS permission.

1.5 Vessel's arrival and departure is registered by the Agent or vessel's administration representative at the Port Inspection.

1.6 The Master of a vessel departing should seek consent, via the Agency, from the Port Authority, during working hours.

Vessel's departure for a coastwise passage is registered in the same manner.

Vessels engaged in foreign traffic must receive a Customs' permission prior to a departure registration.

1.7 The Master of a vessel, arriving to an Archipelago Small Port, should send information about arrival to the Port Operator, who reports it to an Archipelago Small Port by special services.

1.8 When within VHF range of a small port, the Master should contact the Archipelago Small Port's administration, and receive its permission to enter.

1.9 The vessel's arrival at the Tallinn roadsteads for Customs' formalities processing, for deviation operations and other aims, and also for repair, technical works in harbours, plants and aquatic areas, not belonging to the Tallinn Port, should register an arrival at the port.

1.10 An arrival registration in the Port Inspection is performed within 8 hours from the moment of the arrival.

1.11 Auxiliary, port and technical fleet vessels register a navigation permission in the Port Inspection.

2. Pilotage.

2.1 Pilotage is compulsory in Tallinn, Muuga and Kopli Bays for all the vessels over 300 g.r.t., and for Estonian vessels over 20,000 g.r.t. Technical, port and dredging fleet vessels are free of pilotage.

2.2 Pilotage is performed 24 hours a day.

There are 3 Pilot Stations.
"Suurupi" in the place of Buoy N2 "Suurupi",
(Lat. 59° 29' 04" N., Long. 24° 30' 08" E.).
"Tallinn" in the place of Buoy N1 "Tallinn",
(Lat. 59° 37' 05" N., Long. 24° 38' 00" E.).
"Aksi" near the island Aksi,
(Lat. 59° 37' 03" N., Long. 24° 38' 00" E.).

2.3 Before the approach to the Pilot Station, the Master should contact radio station "Tallinn Radio 17" by radiotelephone on VHF Channel 14 ("Traffic Control") or "Muuga Radio 5" on VHF Channel 67, and confirm the final time of arrival.

2.4 While entering or leaving the Port, pilotage is compulsory for all vessels.

2.5 Vessels shifting in the Port is arranged with a Pilot aboard.

2.6 An application for pilotage should be sent by the Master or Agent, 4 hours prior to a vessel's approach to the Pilot Station. The vessels in Port apply for a Pilot to the Port Inspection 2 hours in advance, and re-confirm within 30 minutes of unberthing or shifting.

2.7 Vessels' pilotage is provided in sequence of vessels' arrival and when their applications are presented, except emergency and liner vessels. The pilotage order, if necessary, is settled by the Port Operator with the Port Inspection consent.

2.8 The Port bears no responsibility for a possible delay in the following cases:

A vessel's arrival notice not sent or not in due time.
No free Pilots in the port, because all are engaged in pilotage.
Unfavourable weather preventing Pilots boarding vessels.

2.9 In absence of a Pilot or for other reasons, a vessel should anchor in places recommended for this.

3. Vessel Traffic Regulations.

3.1 Vessels' traffic on approach to the Port and anchoring changes is controlled by the TCS.

3.2 Vessels are not allowed to enter or leave the Harbour, to shift alongside a berth without TCS permission.

3.3 In case of need, the TCS may impose speed restrictions for vessels, or one-way traffic in the regulation zone.

4. Navigation in Ice.

4.1 The Tallinn Bay, Muuga and Kopli Bays freeze some years. The beginning of the icebreaker-assisted navigation period is announced by the Harbour Master's office.

4.2 Icebreaker operations and convoy forming is performed according to icebreaker operations daily schedule.

4.3 In cases where another shipping company intends to conduct vessel in ice to the Port and outward, it should hand over an application to the Harbour Master 48 hours in advance.

4.4 An application may be amended or cancelled, but no later than 12 hours before the date declared.

4.5 A vessel's departure time from the Port or time of convoy forming alongside the edge of the ice is decided and is announced to a company or the Master.

4.6 The Master of a vessel, calling at the port, informs the Harbour Master or an Agent about an estimated time of approach to a meridian (C.Ristna) 12 hours in advance.

4.7 The Master is informed on his request about ice situation, ice edge location, approximate ice pilotage start and icebreaker departure time.

C. *Kesklinna Port:*

1.1 A vessel should not approach the Northern Gates of the Old Harbour, nearer than one mile, without the TCS' permission ("Tallinn Radio 5") for entering the Old Harbour.

1.2 The vessels, excluding tugs and icebreakers, may call at the Port and leave if visibility is no less than 5 cables.

The tugs and icebreakers may call at the Port and leave if visibility is no less than 2 cables.

Visibility for Passenger carriers calling and leaving is determined by the Master.

1.3 When vessels shift in the port, her main engine, steering gear, anchor and mooring devices should be in working order.

1.4 Vessels are prohibited to let go or dredge anchor in the passage from the Basin N1 to the Basin N2 (a submarine cable and a water pipe pass from the Berth N6 to the Eastern Mole extremity).

1.5 The vessel passage to the Admiral Basin is permitted when a crossing bridge is completely raised.

The bridge raising is arranged on the vessel's demand (one long blast).

1.6 A vessel's speed should not exceed 3 knots in the Port Aquatorium.

1.7 Vessels that may call at the Port:

The Port Area	*Maximum Vessels' Measurements* *Length* (m.)	 *Breadth* (m.)	 *Draft* (m.)
Basin N1:			
Berth 1	100	15	4.5
2	135	20	6.6
3	135	18	6.8
4	30	8	5.0
5	135	20	6.7
6	100	15	4.5

Comment: Mooring with tugs near Berths N3 and N5 for vessels over 15 m. in breadth is impossible if another vessel is alongside indicated berths with the same breadth.

Basin N2:			
Berth 7	160	25	7.7
8	140	20	7.0
9	30	8	4.8
10	160	18	7.3
12	180	25	7.8
Basin N3:			
Berth 13	160	25	7.7
14	160	25	8.2
15	180	25	8.3
16	160	25	8.0
17	140	18	7.8

1.8 The call at the Port through the Northern Gates is possible for vessels with draft under 8.6 m. and length under 180 m. Through the Southern Gates, with draft under 7.0 m., length under 140 m.

1.9 Water level in the Port depends on the wind force and direction (wind tide phenomena). Real water level data can be received in the Port Inspection.

2. Vessels Towing.

2.1 During towing operations in the Port Aquatorium vessels' communication is maintained through radiotelephone on VHF Channels 9 and 6.

2.2 The number of tugs and type required for mooring, unmooring and swinging operations is decided by the Master with a Pilot consent.

2.3 The Master should apply for tugs required while entering the Harbour, via the Agent or the Port Operator, 45 minutes prior to arrival at the Port.

2.4 The Master's order for tugs required while shifting in the Port or for vessel's departure, should be sent to the Agent 2 hours in advance.

2.5 If the wind velocity exceeds 16 m./sec., mooring operations are arranged with a Pilot and the Master's consent only.

2.6 Shifting of vessels in the Port Aquatorium if visibility is less than 2 cables, except passenger ship shifting.

2.7 Vouchers for towing vessels, leaving the Harbour, should be registered before departure. Vouchers for towing vessels while entering and shifting may be registered after the end of the works.

3. Vessels staying at Berths.

3.1 It is prohibited to turn a third vessel broadside on to another two vessels, turned broadside at the berth earlier.

3.2 Vessels berthed alongside must raise anchors, if used during berthing.

3.3 Vessels staying broadside at the berths is permitted by the Harbour Master.

3.4 Berth-side cranes, providing safety mooring, should be installed no later than 30 minutes prior to vessels' arrival (departure).

3.5 In Winter time, the berth, inshore part pile-moorings and approaches must be cleared of ice and snow and covered with sand.

3.6 While mooring, all the other works on a berth or any transport movement is prohibited. Non-participants in mooring operations are not allowed to stay in a mooring zone.

3.7 In case of extra dangerous phenomena warning, the Master and his Mate must be on duty on a vessel.

A vessel's electric power supply should be cut off from the shore mains.

3.8 A stevedore company's representative should be present on the berth while mooring. A vessel's stem position relative to a berth is determined by the above mentioned representative.

3.9 Vessels, staying at a berth, are prohibited to turn propellers, except small vessels' preparing for a departure or shifting.

3.10 A hull or a deck erection of a vessel, staying at the Berth N1, should not obscure the Southern Gates red light zone.

3.11 Diving operations should receive a permission for work from the Port Operator on duty after a report about supposed work duration.

3.12 A vessel lowering divers must have continuous radiotelephone communication with the Port Inspection.

3.13 Repairs, painting and other operations of vessels and berths must be arranged from special rafts with consent of cargo loading areas' supervisors and the Port Inspection's permission.

3.14 A vessel's hull painting operation near a berth may be permitted by the Port Inspection, only with absolute water pollution prevention.

3.15 Vessels staying at berths must have:
(a) Rat guards on mooring ends.
(b) Nets to prevent cargo dropping overboard. After loading operations are finished, they must be taken away.

4. Passenger Operations.

4.1 The Head of the Passenger Terminal should be held responsible for passengers embarkation/disembarkation.

4.2 Passengers embarkation/disembarkation on the roadsteads is performed by the Port craft or local companies' passenger carriers. The craft should have radiotelephone VHF communication with TCS. The Agent co-ordinates these operations with other services involved.

4.3 Passengers embarkation/disembarkation over a vessel, staying alongside a berth, is prohibited.

5. Radio and Telephone Aids Usage.

5.1 VHF radio station with call sign "Tallinn Radio 1" works 24 hours a day, and provides communication between vessels and all coastal services. It is linked to the Port ATE (automatic telephone exchange) and the telephone network of Tallinn, VHF calling Channel 16, working Channels 1, 3, 26, 27.

"Tallinn Radio 17" ("Traffic Control") – Traffic Control Service regulates vessels navigation in Tallinn Bay and performs radio pilotage, Channel 14 calling, Channel 20 working.

"Tallinn Radio 5" ("Port Control") – Traffic Control Service regulates navigation in the Port Aquatorium, Channel 14 calling, Channel 9 working.

5.2 The ATE of the Port provides telephone communication between vessels at the berths and coastal services. Connection to the town network is performed by dialling 9, from town to the Port ATE dialling 428.

5.3 The Port main services telephone numbers:

Subscriber	*ATE*	*Town*
Fire Station	206	9-01
Emergency First Aid		9-03
Police	612	9-02
Dispensary	510	
Telephone Repair Service	211	
Port Operator on Duty	363	
Port Inspection	588	
Sanitary Quarantine Department	520	
Customs	332	
Electrician on Duty	589, 545	
TCS, SRS (Shore Radar Station)	495	

D. *Kopli Port:*

1.1 Vessels entering and leaving the Harbour use a channel connecting the roadsteads with the Port. The channel length is 800 m., width 90 m. – 150 m. Vessels' admissible draft in the channel is 8.6 m.

Extreme draft of vessels, staying at berths must not exceed:

The Southern Side	1 Sector (Berth N1)	3.9 m.
	2 Sector (Berth N2)	6.0 m.
	3 Sector (Berth N3)	8.2 m.
	4 Sector (Berth N4)	6.0 m.
	11 Sector (Berths N11)	6.0 m.
The Northern Side	5 Sector (Berth N5)	8.6 m.
	6 Sector (Berth N6)	6.0 m.
	7 Sector (Berth N7)	4.5 m.
	8 Sector (Berth N8)	4.5 m.
	9 Sector (Berth N9)	4.0 m.
	10 Sector (Berth N10)	4.0 m.

The mooring to the Sectors 7, 8, 9 and 10 is permitted for two vessels with draft under 6.5 m. turned broadside at the berth.

1.2 Any shifting in the Port is planned by the Port Operator with consent of the Port Inspection.

1.3 Vessels over 150 m. in length enter/leave the Harbour if wind less than 10 m./sec. Vessels moving to a dock and outwards is permitted if wind less than 10 m./sec., and a side wind of 8 m./sec.

2. Vessels towing in the Port.

2.1 Vessels towing operations should be requested from the Port Operator 24 hours a day by radio telephone VHF Channel 11, call sign "Tallinn Radio 33", or via Agent. A request should be made no later than 45 minutes prior to a vessel's arrival and 2 hours before a vessel's departure.

2.2 Communication between tugs and towed ships is maintained through radiotelephone on VHF Channel 11.

2.3 During mooring, unmooring and swinging operations, the tugs usage and their number is decided by the Master, with a Pilot's consent.

2.4 Mooring operations are performed only with a Pilot and the Master's consent, if wind velocity over 11 m./sec.

2.5 Towing operations for vessels with main engine, anchors and steering gear out of action, or other non-self-propelled vessels, in case of a wind over 11 m./sec. may be permitted only with Harbour Master's consent.

2.6 In case of a disagreement between a Pilot and the Master, tugs necessity, number and capacity is determined by the Harbour Master.

2.7 Towing and shifting in the Port Aquatorium should be ceased:
(a) When visibility is less than 2 cables.
(b) When wind is over 14 m./sec.

3. Vessels staying in the Port.

3.1 The Port Authorities and passenger delivery to vessels, riding at anchor, is performed by the Port fleet vessels at the Master's request if the sea state is less than 3.

3.2 Vessels staying at berths is permitted:
(a) Over 150 m. in length, for one vessel turned broadside on to a berth.
(b) Within 75 m. – 150 m. in length, for second vessel turned broadside on to another vessel at a berth.
(c) Under 75 m. in length, for third vessel turned broadside on to another two vessels turned broadside at a berth earlier.
(d) Small-tonnage vessels at the Port Inspection's judgement.

3.3 In case of favourable weather (wind force 6 in directions safe for joint staying at a berth), a small-tonnage vessel can be placed alongside a vessel over 150 m. in length.

3.4 The salvage boats launching and testing is performed only with the Port Inspection's consent.

3.5 After storm warning and wind strengthening up to 18 m./sec., the Port Operator assigns the most high-power tugboat on duty.

3.6 The 4th Sector (Berth N59) is an oil terminal. Repair works with an open fire on vessels staying within 100 m. from oil terminal is prohibited.

3.7 The simultaneous oil products discharging (bunkering) of two vessels, turned broadside to each other, is permitted at the oil terminal upon following conditions:
(a) Agreement of two vessels' Masters.
(b) 1st and 2nd class oil products, explosive and highly inflammable goods absence.
(c) Oil products discharging (bunkering) with a flash point no lower than 65°, should be reported to the Port Inspection.

3.8 Sound signals should be sent only while manoeuvring in the Port Aquatorium.

3.9 While bunkering at the berth, a tanker and a bunkering vessel should be surrounded by booms, and oil waste collector must be ready alongside.

3.10 In the Port Aquatorium, only segregated clean ballast waters can be discharged.

3.11 Scrap and oil products dropping overboard should be reported to the Port Inspection.

3.12 If while loading or bunkering oil products spill on board or overboard, then loading and bunkering operations should be ceased immediately until spill is cleaned up.

3.13 Before undocking operations, a dock floor must be carefully cleaned up (scrap and oil products).

3.14 Sailing from the Port is prohibited for vessels, having on board accumulated sewage, oily waste waters, scrap and oil residues.

3.15 The Port Inspection is situated in the cold storage building at the 4th floor (5 Sector, Berth N70). The Customs, Sanitary Quarantine Department, Fire Inspection are also in the same building.

E. *Muuga Port:*

1.1 Extreme drafts of vessels, calling at the Port or staying at the berths, should not exceed following values, in cases of datum water level and wave height less than 1 m.:

	Draft (m.)	*Length* (m.)	*Breadth* (m.)
In Channel	16.8		
Near Buoyant Berth	5.5		
Berth N3	5.5	under 90	
Berth N4	5.6	under 260	
Berth N5	6.2		
Berth N6	9.0	under 140	
Berth N8	13.0	under 260	33
Berth N9	16.5	under 280	40
Berth N10	16.5	under 280	40
Berth N11	9.9		25
Berth N12	8.5		25
Berth N13	9.9		25
Berth N14	7.6		

Ramp measurements for Ro/Ro vessels:
Berth N5, breadth 16 m., rise upon sea level 1 m.
Berth N14, breadth 11 m., rise upon sea level 2 m.

1.2 Mooring operations for vessels over 25,000 g.r.t. are performed only when wind velocity less than 12 m./sec.

1.3 Vessels in the Port Aquatorium should maintain the slowest possible speed.

2. Vessels Towing.

2.1 When mooring and unmooring, number of tugs is decided by the Master with consent of a Pilot, tugs usage is obligatory for vessels over 20,000 g.r.t.

2.2 Tugs and towed vessels communication is maintained through radiotelephone VHF Channels 71 and 6.

3. Large Tonnage Vessels Placement Regulations.

3.1 Large tonnage vessels mooring to the grain terminal is permitted if wind under 12 m./sec., and at Berth N8 if there is a favourable weather forecast for a next day.

3.2 Large tonnage vessels mooring to the Berth N8 is performed portside to, and to Berths N9 and N10 bow to seaward.

These rules may be changed for some reasons, but only with the Harbour Master's consent.

3.3 Large tonnage vessels swinging for mooring at Berths N9 and N10, is arranged on the roadsteads outside 20 m. depth. These vessels' towing along the channel is performed stern first.

3.4 Vessels swinging for mooring at the Berth N8 is permitted in a basin between Berths N8 and N9.

4. Dredging Operations Regulations.

4.1 A dredging operations area is settled by the Harbour Master. Dredge Master should hand over to the Port Inspection a work quota, navigation safety instructions and dredgers anchor plan before work starts.

4.2 Dredgers and vessels should maintain communication with TCS by radio station on VHF Channel 67, and provide Port Operator and cargo vessels with dredging area deviation. Communication should be maintained 24 hours a day.

4.3 Dredge Master should be held responsible for dredgers safety, even in case of an unjustified weather forecast and ill-timed storm warning.

5. Vessel Mooring.

5.1 Passengers and Port Authorities delivery to vessels in the roadsteads is arranged by the port fleet vessels. Passengers embarkation/disembarkation is permitted only on the Berth N14 ramp of the ferry boat terminal or near grain terminal head.

5.2 The vessels' Masters should take into account that the Port Aquatorium and Muuga Bay are not protected from the winds from N., N.W., N.E. and E. directions.

In case of these directions with winds velocity over 17 m./sec. especially N.E. direction, staying at berths becomes unsafe, whereas near Berths N8 – N11 it is dangerous for the reason of very rough sea.

Tug operations are restricted by seaways. In case wave height over 1.5 m. tugs work becomes ineffective and it is dangerous for tugs themselves, Master's decision on sailing to the roadsteads should be agreed with the Harbour Master.

The Harbour Master's decision for sailing to the roadsteads should be executed implicitly. In case of an extraordinary sailing order in case of a storm warning, pilotage and towing operations sequence is settled by TCS.

5.3 A weather forecast and storm warning for the Western part of the Gulf of Finland and the Port Aquatorium are broadcasted regularly from 0730 hrs. to 1400 hrs. daily over VHF Channel 67 by TCS. Current weather and weather forecast information may be received in the Port Inspection on telephone number 532, or via TCS on VHF Channel 67, 24 hours a day, free of charge. In working time, weather data can be received from a weather chart maker on duty in meteorological service on Tel: 440-833.

5.4 The Master is responsible for vessel and crew safety even in case of unjustified weather forecast and ill-timed storm warning.

5.5 When wind comes from a dangerous direction, the Master should prepare a vessel for immediate sailing to the sea and report to the TCS. The TCS settles vessels' sailing order.

5.6 An extraordinary sailing from Berth N4 and N5 in case of storm phenomena can be performed without Pilot, with TCS consent.

5.7 The Western basin, protected by the mole, serves as a shelter for port and technical fleet vessels in case of strong North winds.

5.8 Duty Officer of the Port Inspection and a terminal representative control mooring and unmooring operations. A mooring team obeys a terminal representative. Auxiliary fleet mooring is controlled by the Port Inspection.

5.9 Mooring broadside to another vessel is prohibited (except port fleet vessels). Cargo vessels staying near berths except for loading/discharging is prohibited.

5.10 For extraordinary sailing to the roadsteads, crew members must remain on board a vessel.

Main engines, steering gear and anchor devices should be in good working order.

5.11 Any repair or preventive operations, resulting in vessels' sailing readiness, may only be arranged with the Harbour Master's written permit, and confirmed by the Port Operator.

5.12 All the vessels, staying at berths, should connect to the port telephone mains, after a request to the Port Operator (call sign "Muuga Radio 2", VHF Channel 35), or must maintain regular radio watch on VHF Channel 67.

5.13 Requests for port services of any kind should be made by Agent to the Port Operator on telephone 523 or by VHF radio telephone in advance, 2 hours prior to a desired time.

5.14 All vessels should discharge oily waste, fecal waters and scrap before departure registration.

5.15 The Port Inspection is sited in the Port Administration building on the 7th floor, Room 712.

6. The Port ATE telephone numbers:

Head of the Port – Office	503
Main Port Operator	530
Harbour Master	521
Port Inspection – Duty Officer	532
Pilots	621
Port Operator on Duty	523
Central Cargo Handling Area Operator	543
Harbour Fleet Operator	676
Tug on Duty	254
Water Supply	337
Emigration Service – Supervisor	559/228
Emigration Service – Duty Officer	556
Sanitary Quarantine Department	682
Dispensary	241/245/525
Police	284
Fire Station Inspector	239
ATE	211/522/525

Connection to the town ATE by dialling "1".

Agencies telephone numbers (through the town ATE):

TRANSFLOT	425-685
INFLOT	430-508
ESTMA	601-723
NOVOTRANS	236-731
TALLINK	215-708

7. Vessels Bunkering.

7.1 Oil and fuel bunkering is permitted on the roadstead and ex-berth. Bunkering is provided by self-propelled tanker.

7.2 Vessel approach initial information should contain a bunker request.

At the same time, a vessel's readiness for bunkering, estimated bunkering time should be reported to the Port Operator.

7.3 Bunkering on the roadstead is possible if wind less than Force 3. While bunkering ex-berth, a vessel and a tanker must be surrounded by booms, and oil waste collector must be ready alongside.

7.4 Bunkering ex-berth ceases in case a wind strengthening to over 12 m./sec.

7.5 Bunkering is flatly prohibited for vessels operating with dangerous goods.

7.6 While bunkering from refuelling trucks, vessel should take all precautions against oil products spillage on to a berth or overboard.

F. *Archipelago Small Ports:*

1. Ferry boat navigation is prohibited in passages in case of South direction winds over 15 m./sec. and North direction winds over 18 m./sec., and mooring operations in case of rough sea near working berths over 1 m. wave height.

2. A vessel may call at an Archipelago Small Port after a permission receipt.

3. Vessels that may call at the Archipelago Small Ports:

Archipelago Small Ports	*Vessels' Measurements* *Length* (m.)	*Breadth* (m.)	*Draft* (m.)	*VHF Communication Channel* *Calling*	*Working*
Roomassaare	96	14	3.9	16	14
Virtsu	60	12	3.9	16	14
Kuivastu	80	14	4.5	16	14
Heltermaa	70	12	3.3	16	30
Rohukula	60	12	3.3	16	30
Sviby					

Comment: VHF monitoring is maintained constantly in working time and at any other time, 2 hours before vessel's arrival.

4. Mooring is permitted for vessels, calling at an Archipelago Small Port for loading and passenger operations. Other departments vessels' mooring is permitted by the Head of an Archipelago Small Port.

KESKLINNA: 59.27 N. 24.46 E. (See Plan)

LOCATION: The port is located in Tallinn Bay on the S.W. coast of the Gulf of Finland.
PORT LIMITS: Dockage charges commence when vessel is made fast to quay.
DOCUMENTS: Basic documents for entry:
3 copies Cargo Declaration.
3 copies Notice of Readiness.
5 copies Crew List.
1 copy Maritime Declaration of Health.
2 copies Ship's Stores Declaration.
2 copies Crew's Effects Declaration.
PILOTAGE: Compulsory. Provided by Pilots' Estonian National Maritime Board (Tel: (+372) 6 339 222, 6 339 223. VHF Channels 13 and 73). Pilot should be ordered through the agencies at least 24 hours in advance. Pilot boards vessel coming into Kesklinna from West at position Lat. 59° 29.4' N., Long. 24° 32.8' E. and from East and North at position Lat. 59° 37.5' N., Long. 24° 38.0' E. Vessels should establish contact with Tallinn Traffic Control Station for permission to enter the area. VHF call sign "Tallinn Traffic Control" Channel 13. Pilot boat also on Channel 13, call sign "Tallinn Pilot".
ANCHORAGES: The anchorages are located in Tallinn Bay with depths up to 30 m. Anchoring position will be advised by "Traffic Control" VHF Channel 13.
RESTRICTIONS: Vessels can enter and leave the port at any time of day and night. Vessel entry/departure to/from the port, except tugs and icebreakers, ceases when the visibility is 3 cables and less. The possibility of a passenger vessel entering/leaving the port in any visibility is determined by her Master.
MAX. SIZE: Max. length 200 m., breadth 30 m.
HEALTH: Via agency (Vessels entering after calling at another port in Estonia, Pratique is automatic).
RADIO: Port has no communication equipment.
VHF: General station, call sign "Tallinn Radio-1", Channels 16, 13, 26 and 27.
"Traffic Control" on Channel 13.
"Port Control" on Channel 14.
RADAR: No port radar service.
Radar service only in Tallinn Bay, call sign "Traffic Control" (VHF Channel 13).
Initial message should include the following:
(a) Type and name of vessel.
(b) Nationality.
(c) Time of approach.
(d) N.r.t., LOA and max. draft.
(e) Type of cargo.
TUGS: 1,200 h.p. – 2,500 h.p. Icebreakers of 7,000 kW and 9,000 kW also available. Tug's assistance available for berthing, subject to Pilot's advice. Tugs can be ordered through Agents. Ship's lines normally used. Privately-owned tugs are ready at any time round the clock.
BERTHING: Ro-Ro vessels, 6 berths with ramps; 5 quays for cruise ships. 8 quays for ore and bulk cargo facilities. All berths equipped with cranes.

Kesklinna:

Quay	*Length* (m.)	*Depth* (m.)

No. 15	193	10.7
No. 16	144	10.7

Admiralty Basin: 5 quays with depth 5.5 m.
Kesklinna Port has 2 Gates (Locks). The depth in the North is 11.0 m., the passage of vessel up to 200 m. LOA is possible. Depth in South Gate is 7.0 m., passage of vessel under 140 m. LOA is possible.
CRANES: 6 tons up to 40 tons portal cranes and 2 private floating cranes of 100 tons capacity.
BULK CARGO FACILITIES: 8 quays. Depth alongside 7.0 m. – 10.7 m.
SPECIALISED CARGO HANDLING FACILITIES: Berth No. 1 is specialised in container handling with portable cranes. Depth alongside 4.4 m. – 4.7 m. Ramps for Ro-Ro vessel: 6 berths, depth alongside 6.0 m. – 8.0 m.
BRIDGES: None.
STEVEDORES: *Port Labour Working Hours:* Mondays to Fridays 0730 hrs. – 1930 hrs. with break at 1200 hrs. – 1300 hrs. Saturdays 0730 hrs. – 1200 hrs. Overtime is possible.
MEDICAL: Full hospital facilities available without prior notice. Dentists available during normal working hours.
TANKERS: No facilities.
DENSITY: Fresh water (1000).
FUEL: Bunkering by lighters at any quay and at anchorages. Arrange through Agent.
FIRE PRECAUTIONS: Smoking is prohibited in any areas of the port.
CONSULS: Canada, China, Denmark, Finland, France, Germany, Italy, Japan, Latvia, Lithuania, Norway, Philippines, Poland, Russia, Sweden, Ukraine, U.K., U.S.A. and Vatican.
REPAIRS: All kinds of repairs are possible. Arrange through Agent.
DRY DOCKS: No major facilities at port, but Balti Laevaremonditehas has 3 floating docks for hull and engine repairs. Tel: (+372) 479 425. Fax: (+372) 473 791.
SURVEYORS:
Marine Surveyors: Becmann & Jorgensen AS, 21 Sadama Street, EE 0102 Tallinnn, Estonia. Tel: (+372) 446 024. Telex: 173046. Fax: (+372) 6 313 169.
Classification Societies: Bureau Veritas. Tel: (+372) 2 529 277. Fax: (+372) 542 524.
Register of Shipping Inspectorate in Estonia, 52 Tuukri Street, EE 0010 Tallinn, Estonia. Tel: (+372) 426 089. Fax: (+372) 426 089.
GANGWAY/DECK WATCHMEN: No requirement for watchmen.
HATCHES: Normally opened and closed by ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 litre spirits.
CARGO GEAR: Load/discharge effected by shore gear.
REPATRIATION: Available through Agent.
AIRPORT: Nearest airport 7 km.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: All holidays are worked by stevedores.
POLICE/AMBULANCE/FIRE:
Police. Tel: 002, (+372) 6 318 614, 6 318 612. Fax: (+372) 6 318 613.
Ambulance. Tel: 6 318 620.
Fire Brigade. Tel: 001, (+372) 663 990.
EMERGENCY CO-ORDINATION CENTRE: Estonian Maritime Rescue Coordination Centre. Tel: (+372) 6 399 500. Fax: (+372) 6 399 501.
TELEPHONES: Telephones can be ordered in advance from shipping Agents or shipbrokers. Nearly all quays have facilities for ship-to-shore telephone connections.
SERVICES: Compass adjusting, radio and radar repairs, supply of charts, nautical publications, sounding paper, course recorder paper, Notice to Mariners, safety equipment, extension of certificates available.
BANKS: Many banks in Tallinn.
STORING: See "Prelims".
1. Vessel stored by truck.
2. None.
3. Alongside at the berth.
4. Available.
5. Via local riggers.
6. Available.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
GARBAGE DISPOSAL: Special sacks available, contact Agent.
WASTE OIL DISPOSAL: Private tankers and trucks, contact Agent.
SEAMAN'S CLUBS: None.
CURRENCY: Estonian Kroon. Approximate exchange rate to U.S.Dollar is 11.5 EEK. Money exchange in every bank.
REGULATIONS: The port's rules apply.
GENERAL: Year-round navigation is possible. In severe Winters, navigation is possible with icebreaker's assistance.
Variations in water level: There are no tidal variations as such in the port, but the differences noted are the result of weather or climatic conditions.
MHW + 0.80 m.
MLW − 0.80 m.
DEVELOPMENTS: New Passenger Terminal. Quay No. 8 will be completed in May 1996.
Rebuilding of Quay No. 17 will be completed in 1997.
New gate between Basin No. 2 and Admiralty Basin will be completed in May 1996.
AUTHORITY: Kesklinna Port, 25 Sadama Street, EE 0100 Tallinn, Estonia. *Tel:* (+372) 6 318 002, 6 318 084. *Telex:* 173167 Port EE. *FAX:* (+372) 6 313 060. *Contact:* Harbour Master, Tel: (+372) 6 318 329.

PALDISKI: 59.24 N. 24.05 E. (See Plan)

PORT LIMITS: Ship is considered to be an "arrived ship" alongside quay after clearance.
DOCUMENTS:
5 copies General Declaration.
4 copies Crew List.
4 copies Cargo Manifest.
2 copies Crew Effects Declaration.
2 copies Ship's Stores Declaration.
5 copies Passenger List.
PILOTAGE: Compulsory. Pilot boards vessels coming to Port of Paldiski at position Lat. 59° 23' N., Long. 24° 00' E. Pilot should be ordered through Agent 4 hours before arriving at pilot station and 2 hours before departure.
ANCHORAGES:
(1) Lat. 59° 21.5' N., Long. 24° 01.6' E. with depth 30 m.
(2) Lat. 59° 20' N., Long. 24° 02.8' E. with depth 18 m.
RESTRICTIONS: Vessels can enter or leave the port during daylight.
MAX. SIZE: Maximum permissible size: LOA 140 m., draft 8.4 m.
HEALTH: Free Pratique through ship's Agent. If entering after calling at another port in Estonia, Pratique is automatic.
RADIO: Port has no communication equipment.
VHF: Channels 16 and 9.
RADAR: No radar service available.

TUGS: Ordered through Agent.
BERTHING: There are 3 berths with overall length 470 m. with depth alongside 4.0 m. – 9.5 m.
CRANES: Two portal cranes with lifting capacity 6 tons each on Berth No. 2. There are no cranes on Berths No. 1 and No. 3.
BULK CARGO FACILITIES: None.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: *Handling Rates:* Loading 1,000 tons/24 hours, discharging 500 tons/24 hours.
MEDICAL: Full hospital facilities available without prior notice. Dentists available during normal working hours.
TANKERS: No facilities.
DENSITY: 1018.
FRESH WATER: Available.
FUEL: Limited supply available.
FIRE PRECAUTIONS: No specific precautions.
CONSULS: No local presentation.
REPAIRS: No facilities.
DRY DOCKS: None.
SURVEYORS: Cargo survey and draft survey available 24 hours by Esteve Ltd.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCES: 200 cigarettes, 1 litre of spirits and 2 litres of wine for each crew member to be held out of Bond.
CARGO GEAR: Load/discharge is to be effected by shore gear and by ship's gear. No heavy lift cranes.
AIRPORT: Tallinn Airport 50 km.
TIME: GMT plus 3 hours, GMT plus 4 hours in Summer.
HOLIDAYS: All holidays are worked by stevedores, except 1st January, 24th February, Good Friday, Easter, 1st May, 23rd and 24th June, 25th and 26th December.
POLICE/AMBULANCE/FIRE: Police 741-335. Ambulance 741-352, 741-338. Fire 745-132.
EMERGENCY CO-ORDINATION CENTRE: Nearest at Keila. Tel: 745-132.
TELEPHONES: Not available for placing onboard ship.
SERVICES: Special services available in Tallinn, to be ordered through Agent.
BANKS: Savings Bank, Rae Street 17, EE-3074 Paldiski. Tel: 741-318.
Virumaa Kommertspank, Peetri Street 9, EE-3074 Paldiski. Tel: 741-356.
STORING: See "Prelims".
(1) Truck.
(2) No.
(3) Yes.
(4) No.
(5) Customs regulations in force.
(6) Yes.
SHIP SUPPLY SERVICE: Available through Agent.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
GARBAGE DISPOSAL: Collection service not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: No seaman's club in Paldiski.
CURRENCY: EEK (Estonian Crown). U.S.$1.00 = 11.5 EEK (July 1996).
REGULATIONS: No particular regulations.
DELAYS: Delays in berthing, loading and discharging are not normally expected.
DEVELOPMENTS: Widening of Berth No. 2 and dredging works inside port underway.
AUTHORITY: Port of Paldiski South, Rae Street 15, EE-3074 Paldiski, Estonia. *Tel:* (372) 6391-241. *FAX:* (372) 6391-240. *Contact:* Valdo Heinla, Director. Ulo Kikas, Harbour Master.

PYARNU: 58.23 N. 24.29 E. (See Plan)

GENERAL: The Port of Pyarnu, a sea fishing port, is situated in the N.E. part of the Riga Bay, at the estuary of the Pyarnu River falling into the Pyarnu Lakht.

Vessels, with a draft of 4.0 m. can reach the port by the channel about 2.5 mile long and about 60 m. wide.

At the estuary of the Pyarnu River, the channel is protected by two moles extending S.W. from the shore. Depths at the berths are up to 5 m. Changes of the water level within the port aquatorium are due to tides caused by winds.

Vessels proceeding to the port by the channel are recommended to have sufficient keel clearance bearing in mind requirements of good sea practice. The pilotage is carried out with due regard to the existing water level compared usually with the mean water level at the Kronstadt tide-gauge. Data of the exact depth of the channel can be obtained from the Harbour Master's Office. The harbour of the port is usually frozen over from November till April.

PILOTAGE: Compulsory. The Port of Pyarnu has no special Pilot service. In view of this, Pilots for entry or leaving should be ordered through maritime Agency "Inflot" at the Port of Tallinn. Pilots embark at the port of Pyarnu roadstead.

ANCHORAGES: The Port of Pyarnu roadstead occupies the whole of the middle part of the head of the Pyarnu Lakht limited by the 5 m. line.

When in the roadstead vessels may anchor on both sides of the Pyarnu-Morskoi leading line, beyond the boundaries of the fishing areas. The holding ground is good. The roadstead is sheltered from winds of all directions, except those blowing from the South and S.W.

Masters should bear in mind that there are a lot of fishing nets laid in the Pyarnu Lakht. The boundaries of the fishing net prohibited areas for navigation of merchant vessels are marked on the charts.

RESTRICTIONS: All traffic of vessels, both in the harbour and in the approaches to the port, is controlled by the Harbour Master's Office, by a Master on duty.

Navigation in the approaching channel is allowed day and night, in turn, but only in one direction at one time.

It is prohibited for vessels to pass by each other and pass by vessels keeping the leading marks of the approaching channel in line as well as to cross the channel.

The priority to navigate in the channel is given to vessels leaving the harbour. In this case vessels proceeding to the port must give way to outgoing vessel not preventing her manoeuvring. The turn of movement in the channel is stipulated by the Port Controller but the traffic of vessels itself is controlled by the Harbour Master's Office.

Vessels navigating both in the channel and in the harbour must proceed at a moderate speed to avoid the possibility of causing waves.

If winds over Force 6 Beaufort Scale entry to the port, leaving the port and shifting berths is allowed by the Harbour Master or a person in charge only.

RADIO: Radio communication can be effected through the radio stations:

Call Sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work Remarks*
RKD/F	487	500	AZJ	H24
"Pyarnu-31"	156.8*(16)	156.8*(16)	F3E	H24
Harbour Master	156.55*(11)	156.55(11)	F3E	HX
"Pyarnu-33" Port Controller	156.50*(10)	156.50*(10)	F3E	HX (Operates during navigation)

*Frequencies in MHz

Notice of Arrival: All vessels proceeding to the port from the seaward should advise their ETA to the Port Controller. Masters should also advise vessels' particulars and the purpose of visit.

VHF: Vessel in the Roads or within port area can contact Harbour Master's Office on Channel 16 by radio-telephone (call sign "Pyarnu-31") all round the clock; Port Dispatcher (call sign Pyarnu-33) on Channel 10 around the clock.
TUGS: Tugs should be ordered through the Port Controller's service. Towage of vessels within the port is prohibited if wind over Force 6.
RADAR: Radar station not available.
BERTHING: Vessels having draft over 4.0 m. cannot berth. During S.W'ly and Westerly winds Force 8 and over, when in the port, the Master or his Chief Officer must be on board and have sufficient number of the crew on board in order to secure the vessel safely.

Berths of the port are equipped to handle vessels loaded with fish and fish products, salt, timber, rod metal and some other cargoes. There is a portal crane with 5 tons capacity and a closed warehouse. The Port Authority plans to build a new warehouse and an administrative building.
FRESH WATER: Available alongside.
FUEL: Available alongside and by barge.
OPENING/CLOSING HATCHES: By crew.
REPAIRS: Small repairs possible.
TIME: GMT plus 3 hours from October 1st – March 31st. GMT plus 4 hours from April 1st – September 30th.
AUTHORITY: The Port of Pyarnu Authority, 2 Kalda Street, 203600 Port of Pyarna, Estonia. *Tel:* 41-893, 40-164, 40-442. *Cables:* Pyarnu Morrybport. *Contact:* Harbour Master, Tel: 40-164.

TALLINN, including Muuga and Kopli: 59.27 N. 24.46 E. (See Plan)

Also see "Kesklinna".

LOCATION: A Baltic seaport situated in Tallinn Bay and Bay of Muuga on the S.W. coast of the Gulf of Finland. Year-round navigation is possible. In severe Winters, navigation is possible with ice-breaker assistance.

Kopli: Kopli is a Baltic seaport situated in Tallinn Bay on the S.W. coast of the Gulf of Finland. The port is situated at the stem of Paljassaare Peninsula on Tallinn Bay between the Cabotage port and Southern part of Paljassaare shallow. It operates all year round as the harbour basin is covered with ice only in very cold Winters. Navigation is possible with icebreaker assistance. The connection with the sea is by an 800 m. channel, which has a marked width of 90 m. – 150 m. and depth of 8.6 m.

GENERAL: Port of Tallinn consists of Kesklinna Port (See separate listing), Port of Muuga and Port of Kopli. Kesklinna Port and Port of Kopli are situated in Tallinn Bay, Port of Muuga is situated in Muuga Bay. Tallinn and Muuga Bays are frozen over in severe Winters only in Winter months (February and March). Streams in the Bays are inconsiderable. The difference of the water level is due solely to the effects of the wind, and is about ±0.8 m.

DOCUMENTS: The following documents are requested for Clearance:
4 copies Crew List.
2 copies Ship's Stores List.
2 copies Crew Effects List.
2 copies Crew Foreign Currency Declaration.
2 copies Ship's Foreign Currency Declaration.
1 copy Health Declaration.
DEEP SEA PILOTAGE: See "Baltic Deep Sea Pilotage".

PILOTAGE: Compulsory. Pilot boards vessels coming into Kesklinna Port and Port of Kopli from West at position Lat. 59° 29.4' N., Long. 24° 30.8' E., coming from the East and North at position Lat. 59° 37.5' N., Long. 24° 38.0' E. Pilot boards vessels coming to Port of Muuga at position Lat. 59° 37.5' N., Long. 25° 09.5' E. or Lat. 59° 37.5' N., Long. 24° 38.0' E. Pilot service is available throughout 24 hours. Pilot should be ordered through Agencies. Deep Sea Pilots are also available in the port.

APPROACHES: Depth of water in Tallinn Bay ranges from 14.0 m. to 80.0 m. and in Muuga Bay up to 90.0 m. The approach to port is marked by leading lights and beacons. Vessels can enter the harbour of Kesklinna Port through either the Northern or Southern Entrances.

ANCHORAGES: The anchorage areas are situated in Tallinn Bay and Muuga Bay with depths up to 30.0 m.

RESTRICTIONS: Vessels can enter or leave the port at any time of day and night.

MAX. SIZE: Maximum permissible dimensions for Tallinn are 180 m. LOA, 8.6 m. draft and 140 m. LOA, 7.0 m. draft respectively for the Northern and Southern Entrances. Maximum permissible dimensions for the Port of Muuga are 280 m. LOA, 40.0 m. beam, 16.5 m. draft. Maximum dimensions of vessels for Port Kopli are 185 m. LOA and 8.6 m. draft.

HEALTH: International quarantine signals to be used on arrival. No later than 6 hours before arrival at the inner area Master should radio Agents giving full details of state of health on board, and requesting Pratique which will be given on arrival.

RADIO/VHF: Tallinn Radio on 500 kHz and 2182 kHz.

Station	*Call Sign*	*VHF Channel*
Port of Muuga Gen.	Muuga Radio 1	16, 7, 83
Traffic Control	Muuga Radio 5	67
Port Operator	Muuga Radio 2	37
Port Control Kopli	Tallinn Radio 32	11
Kopli Port Operator	Tallinn Radio 33	11
Operator	Tallinn Radio 33	11
Traffic Control	Tallinn Radio 17	13, 16, 20
Harbour Master	Tallinn Radio 32	11

Note: Vessels should establish contact with the Traffic Control Station for permission to enter the area.

Arrival Advice: Request Pilot at least 4 hours in advance of ETA and 2 hours in advance of ETD. Radar pilotage, available 24 hours, is provided in reduced visibility or on request.

Vessels should establish contact with the Traffic Control Service (VTS) for permission to enter the area.

Initial message should include the following:
(a) Type and name of vessel.
(b) Nationality.
(c) Time of approach (to area of operation of VTS).
(d) N.r.t., LOA and maximum draft.
(e) Type of cargo.

All vessels should maintain a continuous listening watch on an agreed working channel whilst underway within the area, and on Channel 16 whilst at anchor. Vessels leaving port must establish VHF contact with VTS on an agreed working channel before leaving berth or anchorage.

All movements within the operating area require permission from VTS. Such permission expires after 15 minutes and should be renewed.

In case of radio failure, vessels should leave the leading line or recommended route and anchor, drift or proceed with due caution whilst trying to re-establish radio contact.

TUGS: 1,200 h.p. – 2,500 h.p. Ice-breakers of 7,000 kW. and 9,000 kW. also available. Tug's assistance available for berthing subject to Pilot's advice. Tugs can be ordered through Agents. Ship's lines normally used. When tugs are ordered in advance the cost will be charged to the vessel whether tugs are used or not.

BERTHING: Vessel will not be allowed to berth unless main engines and steering mechanism are in good working order. All vessels in port are required to fly their national flags between 0700 hrs. and sunset. On holidays and special occasions vessels may be expected to dress their ships if requested by Port Authorities.

Tallinn: There are 17 berths with overall length of 2.8 km. in the Kesklinna Port. Berths are equipped with portal cranes and with a floating crane of 100 tons capacity. Port handles general and bulk cargoes, timber, containers and Ro/Ro cargoes. There is also a Passenger Terminal.

Kopli: There are 11 berths, equipped with portal cranes. Berths No. 35, 36, 37, 38, 40 and 41 in the Northern part of the port are used to handling the cargo. Refrigeration unit and four-storey warehouse are located in this part of the port.

The oil terminal in the Southern part of the port can receive single tankers up to 120 m. in length and 6.0 m. draft. Berths No. 32 and 33 in the Southern part of the port are a coal terminal.

Berth		*Length* (m.)	*Depth* (m.)
South Side:			
31		100	3.4 – 5.4
32	Coal Terminal	266	5.4 – 6.5
33	Coal Terminal	186	7.8
34	Oil Terminal	100	5.9 – 6.4
North Side:			
35	General cargoes, fish, Ro-Ro	400	9.0
36		288	6.4
37	Timber	90	4.5
38		140	4.1 – 4.7
39		51	4.5
40		88	4.2 – 6.0
41		102	5.3

Muuga: There are 15 berths with overall length of 2,790 m. in the Port of Muuga. The port handles general and bulk cargoes, timber and Ro/Ro cargoes. The Grain Terminal can handle vessels up to 280 m. LOA, 40 m. beam and 16.5 m. draft. There is also a refrigeration complex with overall length of 609 m., it can accept vessels with 9.0 m. draft. The port is equipped with portal cranes.

CRANES: Loading and unloading is usually done by shore portal cranes of up to 40 tons capacity, by floating cranes of up to 100 tons capacity and by other cargo handling equipment.

Also see "Cargo Gear".

STEVEDORES: Arranged by Agent on basis of Master's ETA. Loading and unloading is carried on throughout 24 hours a day including holidays.

MEDICAL: Facilities available.

DENSITY: 1025.

TANKERS: *Report:* September 1994.

Terminal	Scantrans ("Old Port")	Pakterminal ("Muuga")	Motalis ("Old Shipyard")

Connections:	2×5 in.	1×8 in.	2×5 in.

Also see "Berthing" – "Kopli".

FRESH WATER: Supplied by pipelines at all berths and by water tanker at Muuga.

FUEL: All kinds of fuel available.

CONSULS: Argentina, Australia, Austria, Belgium, China, Denmark, Finland, France, Germany, Hungary, Italy, Japan, Korea, Latvia, Lithuania, Norway, Poland, Russia, Sweden, Ukraine, U.K., U.S.A.

REPAIRS: Repairs may be effected.

DRY DOCKS: Floating dock with lifting capacity of 12,000 tons.

SURVEYORS: Survey companies for cargo inspection: LMT – Tel: 6 318 631. ISI – Tel: 6 313 864. Marine Register – Tel: 426-089, 425-692, 433-608.

Lloyd's Register, Bureau Veritas and others also available.

GANGWAY/DECK WATCHMEN: No requirements for watchmen.

OPENING/CLOSING HATCHES: Normally opened and closed by ship's crew.

CUSTOMS ALLOWANCES: No restrictions on crew's consumption of tobacco and alcohol on board. It is forbidden to take these items ashore.

CARGO GEAR: *Kopli:* Cranes (lifting capacity) – 7×5 tons, 6×6 tons, 2×10 tons and 8×16/20 tons.

Forklift trucks – 38×1 tons, 30×1.5 tons, 31×2 tons and 3×3 tons.

Self-propelled trucks – 7×5 tons.

Diesel trucks – 5×1.5 tons, 1×2.5 tons, 6×3 tons, 2×4.5 tons and 2×10 tons.

Trailers – 10×20 tons and 15×40 tons.

2 port tractors.

8 tractors.

REPATRIATION: No facilities.

AIRPORT: Tallinn, 7 km. International flights to Helsinki and Stockholm.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: 1996: New Year's Day (1st January); Sovereignty Day (24th February); Good Friday (5th April); Easter Sunday (7th April); May Day (1st May); Whitsun (26th May); Victory Day (23rd June); Midsummer Day (24th June); Christmas Day (24th December).

POLICE/AMBULANCE/FIRE:

Police in Port, Tel: 6 318 612; in the City, Tel: 002.
Ambulance in City, Tel: 003.
Fire Brigade in City, Tel: 001.

EMERGENCY CO-ORDINATION CENTRE: Telephone for emergency matters: In Tallinn call Frontier Guard by radio VHF Channel 9, call sign "Aster".

TELEPHONES: Connection on board vessels can be made in Tallinn.

No facilities for placing telephones on board vessels in Kopli.

SERVICES: Special services: Compass, radio and radar repair, supply of nautical publications, course recorder paper, Notice to Mariners and other services available through Agent.

BANKS: Hansapank, Livalaia 12, Tallinn EE0100, Estonia. Tel: 6 310 310. Telex: 173005 HABA EE.

STORING: See "Prelims", page viii.
(1) Not available.
(2) Not available.
(3) Trucks can be used at berth and in port territory.
(4) Trucks can be used in warehouses and holds.
(5) There is no Customs warehouse in the port.
(6) It is possible to employ local dockers.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Available.
WASTE OIL DISPOSAL: Not available.
CURRENCY: Estonian Crowns (EEK). U.S.$1.00 = 12 EEK.
DEVELOPMENTS: New Port of Muuga under construction in the Bay of Muuga, 20 km. N.E. of Tallinn, for handling grain cargoes in vessels of 100,000 d.w.t. The Port will also handle perishable cargo and Ro-Ro vessels. Grain silo capacity 300,000 tons.

SHIPMASTER'S REPORT: March 1993 (Updated 1996).
For clearance, the following documents were requested:
4 copies Crew List.
2 copies Ship's Stores List.
2 copies Crew Effects List.
1 copy Narcotics List.
1 copy Health Declaration.

REPORT: June 1995 (Updated 1996).
The following are extracts from "Code of Customs – Port Muuga", effective April 1995.

2.9. In the Port of Muuga, the Coastal Radar Station is not available. The Masters of vessels approaching the Port should rely only on the vessel's navigational aids.

2.10. In the Muuga Bay, pilotage is compulsory for all vessels, with the exception of those under the flag of Estonia, with tonnage less than 20 tons, and harbour, technical and dredging vessels.

2.11. Pilotage is compulsory for all vessels entering and leaving the Port, except harbour, technical and dredging vessels. The shifting of vessels in the Port, as well as shifting for a distance of over 100 m., is carried out with a Pilot on board the vessel.

2.12. Pilotage is provided by the Estonian Waterways Department round-the-clock. A Pilot meets vessel sailing in the N.W. passage at the distance of 3 miles to the South of the "Tallinn" Lighthouse, in the N.E. passage in the area of the Aksi Island. To enter the Port, a Pilot meets vessel in the area of the entrance buoys.

2.13. The order for a Pilot should be sent through an Agent to the Harbour Master of the Port of Muuga, 4 hours prior to a vessel's approach to the pilot station. Vessels in the Port order Pilots through an Agent 2 hours prior to departure, verifying the exact time 30 minutes in advance.

2.14. Pilotage is performed according to order of arrival. Average and passenger vessels, as well as vessels sailing on schedules, are piloted on a priority basis.

3. Vessel Navigation in the Port Waters:

3.1. The maximum permitted draft of vessels entering the Port of Muuga or berthing alongside quays should not exceed, with the "zero" sea level and waves under 1.0 m., the following values:

Berth No.	*Max. Draft* (m.)
Approach Channel	– 16.8
Floating Jetty	– 5.5
1 A (Pakterminal)	– 11.0
2 A (Pakterminal)	– 6.6
3	– 7.5
4	– 6.5
5	– 6.2
6	– 8.9
8 (Grain Terminal)	– 13.0
9 (Grain Terminal)	– 16.0
10 (Grain Terminal)	– 16.0
11	– 10.5
12	– 10.3
13	– 10.7
14 (Ferry Terminal)	– 8.9
15 (Ferry)	– 8.0

In connection with the dredging in the basin for the Port development, the permitted drafts may be altered.

3.2. Restrictions with regard to vessel maximum measurements alongside the berth.

Berth No.	*Max. LOA* (m.)
1 A	240
2 A	116
3	120
4	120
5	100
6	140
8	260
9, 10	280 (Breadth under 40 m.)
11	250
12	165
13	165

Ramps for Ro-Ro vessels:
Berth No. 5: Width 16.0 m., elevation above sea level is 1.0 m.
Berth No. 13: Width 11.0 m., elevation above sea level is 2.0 m.

3.3. Vessels with drafts and measurements over those specified in Clause 3.1 and 3.2 could be berthed only if the Harbour Master gives permission to do so, in each particular case.

3.4. Mooring/unmooring operations with vessels over 25,000 g.t. are performed at the wind velocity under 12 m./sec.

3.5. The speed of vessels in the Port waters should not exceed the minimum permitted speed for steering.

3.6. Anchoring in the approach channels and in the entrance channel is prohibited.

3.7. Anchorage is in the areas limited by the coordinates:
3.7.1. In the Ihasalu Bay (Anchoage 27A)
Lat. 59° 31' N., Long. 25° 05.3' E.
Lat. 59° 31.3' N., Long. 25° 06.3' E.
Lat. 49° 30.2' N., Long. 25° 08.1' E.
Lat. 59° 30' N., Long. 25° 07.2' E.
3.7.2. In the outer road, the Viimsi Reach (Anchorage 27B)
Lat. 59° 35' N., Long. 25° 03' E.
Lat. 59° 36.1' N., Long. 25° 03' E.
Lat. 59° 35.7' N., Long. 25° 00' E.
Lat. 59° 35' N., Long. 25° 00' E.
3.7.3. In the inner road, the Muuga Bay (Anchorage 27C)
Lat. 59° 30.6' N., Long. 24° 59.3' E.
Lat. 59° 31.4' N., Long. 25° 00.5' E.
Lat. 59° 31.4' N., Long. 24° 59.6' E.
Lat. 59° 30.6' N., Long. 24° 58.5' E.

Tanker Facilities:

Berth No.	*Depth* (m.)	
Sonmarine Oilproduct Terminal:		
3	7.0	The berth is linked with the Terminal by 4 pipelines; max. vessel loading rate 500 cu.m./hr. There is a railway flyover with two railway tracks leading to it, as well as an elevated runway for loading fuel trucks.
Pakterminal Oil Terminal:		
1A	10.8	There are 13 separate storage tanks with heating, capacity of 100,000 cu.m., 5 heated isolated pipelines, which can be cleaned, leading to 2 berths. 26 wagon discharging points and 23 wagon loading points; max. rate of tanker loading is 1,500 cu.m./hr.
2A	7.2	
Nybit Bitumen and Special Lubrication Terminal:		
3	7.0	Bitumen storage tanks, capacity 3,000 cu.m. and 5,000 cu.m. One tank for storing lubricants, 2,400 cu.m. capacity, and 3 tanks with 1,400 cu.m. capacity. There is an elevated runway for loading bitumen and lubricants into road transport. In 1995, an elevated runway for loading bitumen and lubricants into railway wagons will be put into operation.
Estonian Transoil Oilproducts Terminal:		
3	7.0	Handles gasoline and diesel fuel. It has storage tanks with capacity of 14,100 cu.m.

Falkland Islands

PORT STANLEY: 51.42 S. 57.51 W. (See Plan)

PORT LIMITS: West of the line joining Mengeary Point and Cape Pembroke.
DOCUMENTS:

- 2 copies Crew Lists.
- 2 copies Passenger Lists.
- 2 copies Customs Documents.
- Health Document.
- Manifest and Bills of Lading.
- Ship's Papers.
- Ship's Certificates.

PILOTAGE: Pilotage not available.
ANCHORAGES: For large vessels, the anchorage is somewhat confined; except South of Navy Point, where there is good swinging room in depths of from 8.2 m. to 10.4 m. (27 ft. to 34 ft.). There is good anchorage N.N.E. of the cathedral, but, owing to the prevailing strong Westerly winds, a vessel may have some difficulty in turning, when leaving this position. The best time to leave is after 1800 hrs. or before 0800 hrs. as, unless there is a widespread area of bad weather over the islands, the wind, which is local, is seldom strong between these hours. The holding ground is good, and vessels have not dragged during winds of up to Force 8, though a second anchor is often necessary.

The bottom of the harbour is stiff mud, which is very noisome and sticky; it is necessary to allow plenty of time for cable washing when weighing.

Several small boats, none of which exhibit a riding light at night are moored at the South side of the harbour.
RESTRICTIONS: No restrictions on night berthing, but advance warning should be given via Agent.
MAX. SIZE: Max. LOA 130 m.
RADIO: Cable & Wireless Ltd.
VHF: Port Radio, call sign "Port Control", listening on Channels 16 and 10 throughout 24 hours.
RADAR: No port radar service.
TUGS: No harbour tugs.
BERTHING: Falkland Islands Company jetty with a depth of 1.5 m. at its "T" shaped Head.
Flexiport: Tel. 22671.

3 berths, each 91 m. in length and a Ro-Ro facility. Depth at West End 6.5 m., shoaling to 6.1 m. at Eastern End. Discharge is by ship's gear, 20 ft. containers accepted with a maximum weight of 18 tons. Working hours are 0800 hrs. – 1200 hrs. and 1300 hrs. – 1700 hrs., overtime to vessel's account.
CRANES: 1×25 ton crane.
BULK CARGO FACILITIES: None. Drummed cargoes only are handled.
STEVEDORES: No notice required at Flexiport for stevedores.

If Falkland Islands Company charter vessel (4 voyages a year) is being worked then stevedores will not be available until work on the charter vessel has been completed.
MEDICAL: Advance notice required.
TANKERS: Advance information should be sought.
Mare Harbour: Tanker mooring buoy and pipeline in position: Lat. 51° 54.11' S., Long. 58° 29.87' W.
DENSITY: Full salt water.
FRESH WATER: Available from jetty, cost £3.75 per ton.
FUEL: Fuel is available by special arrangement with Stanley Services Ltd. Grade 47 Cetane (viscosity cSt 100° F – 1.8; s.g. at 15° C – 0.840). Delivery by lighter and pump. Fuel also available at the Flexiport.
FIRE PRECAUTIONS: Normal safety requirements.
CONSULS: Norwegian.
REPAIRS: Minor repairs to machinery.
DRY DOCKS: None.
SURVEYORS: Lloyd's and B.V.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: Quantity permitted by crew is one bottle of spirits, 200 cigarettes or 1 lb. of tobacco, 6 bottles of wine, 1 case (24 cans) beer.
CARGO GEAR: Ship's gear may be used.
AIRPORT: 32 miles from Port.
TIME: GMT minus 4 hours. Summer time from October to end of March.
HOLIDAYS: Cargo may be handled on the 10 public holidays.
POLICE/AMBULANCE/FIRE: Dial 999.
TELEPHONES: Available in East warehouse (card only).
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Seaman's Book sufficient.
REGULATIONS: No particular or unusual regulations.
DELAYS: Delays may be experienced if berthing alongside the only commercial jetty if firms charter vessel is being handled. Four voyages a year: – turn around 1 week.
AUTHORITY: Harbour Master, c/o F.I.F.D., P.O. Box 122, Port Stanley, Falkland Is. *Tel:* 27260. *Telex:* 2426. *FAX:* 27265. *Contact:* J. Clark, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Faroe Islands

KLAKKSVIK: 62.14 N. 06.35. W. (See Plan)

DOCUMENTS:
One copy of Each:
Crew List.
Passenger List.
Custom Documents (one list crew's quantity of tobacco and spirits).
Health Document.
Manifest.
Bill of Lading.

PILOTAGE: Not compulsory but available. Give ETA via Torshavn Radio, OXJ, 1 or 2 hours before arrival, and Pilot will meet vessel in Roads. International signals can always be used. VHF Channels 16, 12, and 6 in use.

ANCHORAGE: In Roads in 12 to 20 fathoms; good anchorage.

RESTRICTIONS: No restrictions upon entry.

MAX. SIZE: Up to 560 ft. length and 25 ft. draft.

HEALTH: Pratique usually automatic.

RADIO: Torshavn Radio, OXJ, is only coast station in Faroe Isles.

TUGS: No tugs available.

BERTHING: Ships will be berthed on arrival, if ETA announced 12 hours before arrival.

New quay with depth 7.0 m. – 8.5 m. available.

STEVEDORES: Ship's Agent will arrange stevedores.

MEDICAL: Inform doctors before arrival. Hospital facilities available.

TANKERS: Only small tankers, up to 2,000 – 3,000 tons can be handled.

FRESH WATER: Available from quay. 30 t.p.h.

FUEL: Diesel oil available, usually without notice (or short notice).

CONSULS: British, Tel: 55109 and 55489; Norwegian, Tel: 55018 and 55353.

REPAIRS: All types of deck and engine repairs possible. Slipways for ships up to 200 ft. length.

GANGWAY/DECK WATCHMEN: Watchmen usually unnecessary, but available if desired.

OPENING/CLOSING HATCHES: Normally done by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 litre of spirits.

REPATRIATION: Small changes in crew can usually be arranged and, for example, sick seamen/fishermen are often sent home, when recovered.

AIRPORT: Nearest airport on Vagoy, about 6 hours travelling. Regular flights, 6 times a week.

TIME: GMT. GMT plus 1 hour (Summertime) from last Sunday in March until last Sunday in Spetember.

HOLIDAYS: Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police 55348; Ambulance 55464; Fire 000.

TELEPHONES: Can be arranged on board at one berthing place, at about 50.00 kr plus dues for conversations.

SERVICES: Compass adjusting, day and night.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Not needed.

GARBAGE DISPOSAL: Container of 12 cu.m. available. It is also possible to obtain a container from garbage service, please contact Harbour Office.

WASTE OIL DISPOSAL: Shore tank capacity 2,500 litres.

SEAMAN'S CLUBS: No seaman's clubs. One seaman's hotel available.

CURRENCY: Danish Kroner. Banks available.

DELAYS: Normally there are none.

AUTHORITY: Klakksvikar Havn, P.O.Box 26, FR-700 Klakksvik, Faroe Islands. *Tel:* 55081, 55101 and 84081. *FAX:* 57340.

AGENT: Christen Joensen Stengavegur, P.O.Box 179, FR-700 Klaksvik, Faroe Islands. Cables Christen Joensen. Tel: Klaksvik 55922. Fax: (298) 57922.

DOCUMENTS:
Bill of Lading.
Customs Documents (including Crew List).
Ship's Certificate (stating size of ship).

PILOTAGE: Ships can call Pilot via Torshavn Radio. Pilot has good knowledge of local conditions.

ANCHORAGES: Danish Chart No. 82 (B.A. Chart No. 85) – on Soervaag Fjord – can be recommended as good. Bottom gravel.

RESTRICTIONS: Difference between high and low water up to 2 m. on Spring tide and up to 1 m. on Neap tide.

MAX. SIZE: Largest vessel reported in Soervaag was 12,000 d.w.t. tanker. Harbour about 150 m. long and formed with one long pier and another one stretching from it. Depth at pier 8 m. Pier runs N.E./S.W. Max. draft permissible 26 ft.

HEALTH: Ships coming from countries having epidemic-disease have to fly the flag "Q". No persons allowed connection with shore, before official doctor given Free Pratique.

RADIO: Only civilian radio on Faroe Islands is Torshavn-Radio (Int. call sig.: OXJ) via this radio ships can call for medical assistance and weather forecast. These 2 services are free. All traffic to Faroe Islands via Torshavn-Radio.

VHF: Port Office on Channels 16 and 12 during working hours (0800–1700).

TUGS: No actual tugs can be obtained, but many small vessels which can be used as tugs.

BERTHING: Masters should take care when berthing not to come on to East side of pier – owing to very low water.

CRANES: 1×30 ton mobile crane available.

STEVEDORES: Arranged through Agent.

MEDICAL: Hospital in Torshavn with all facilities. There is a doctor in Soervaag.

TANKERS: Ordinary pier also used by tankers, size of load/discharge-lines: 3 in. and 6 in.

FRESH WATER: Ships can obtain fresh water direct from pier.

FUEL: Marine diesel fuel; turbo-jet A1–100; gasoline-petroleum.

CONSULS: Belgium, Finland, Greece, Iceland, Norway, Spain, U.K., Germany, Brazil, France, Netherlands, Italy, Portugal, Sweden.

REPAIRS: Small deck and engine repairs carried out.

DRY DOCKS: On Skaalefiord, dry dock up to 1,500 d.w.t.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: Tobacco, each crew member is allowed to have 200 cigarettes or 250 gm. of tobacco. Wine and/or Spirit, 1 litre spirits and 1 litre wine.

REPATRIATION: Can be arranged.

AIRPORT: Faroe Island has 1 airport – only 3 km. from Soervaag. Flights 12 times a week to Copenhagen, and 3 times a week to Iceland.

TIME: GMT. Summertime from last Sunday in March to last Sunday in September.

HOLIDAYS: Same as Denmark. Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police Tel: 33448; Ambulance Tel: 326011. Fire Tel: 000.

TELEPHONE: Telephones can be placed on board.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Available. Contact Port Authority.

WASTE OIL DISPOSAL: Contact Statoil in Torshavn. Tel: 11133. Fax: 11378.

SEAMAN'S CLUBS: None.

CURRENCY: Same as Denmark.

REGULATIONS: Per ordinary regulations in Danish Ports. Harbour dues to be paid before ship's departure.

DELAYS: Usually none.

AUTHORITY: Harbour Master, Soervaag 380, Faroe Islands. *Tel:* Office 32046. Residence 32283.

TORSHAVN: 62.00 N. 06.45 W. (See Plan)

DOCUMENTS: See "Klakksvik".

PILOTAGE: Not compulsory. Can be obtained through Torshavn Radio 2182 kHz or Channel 16 VHF (Harbour Office).

ANCHORAGES: 5 cables S.E. of breakwater in a depth of about 30 m.

MAX. SIZE: LOA 220 m., draft 8.3 m.

HEALTH: Pratique usually automatic.

RADIO: Torshavn Radio, OXJ.

TUGS: One small tug available.

BERTHING: 1 slip and 3 Ro-Ro ramps.

Berth	*Length* (m.)	*Depth* (m.)
East Breakwater	420	5.8 – 8.3
Main East Quay	230	6.8
Pier Outer Harbour	60	10.0
Main West Quay	168	8.1
West Pier	90	8.3
West Pier	80	8.0

STEVEDORES: Must be arranged with the Agent.

FRESH WATER: 50 t.p.h., by pipeline. Cost 12 DKR./ton.

FUEL: All kinds of fuel at 100 t.p.h.

REPAIRS: All kinds are possible.

DRY DOCKS: 2 hydraulic slipways (1×1,000 d.w.t. and 1×2,500 d.w.t.).

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: Tobacco (1 carton); 1 litre of spirits or 2 litres of wine.

REPATRIATION: Can be arranged.

AIRPORT: Regular airlines, 2 hours by car from Airport.

TIME: GMT. Summertime GMT plus 1 hour (late March – late September).

HOLIDAYS: Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police, 11448; Ambulance, 13540; Fire, 000.

TELEPHONES: No facilities.

SERVICES: Compass adjusting, radio and radar repairs.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Garbage container provided alongside the vessel on ship's account. Telephone 11655 for garbage service.

WASTE OIL DISPOSAL: 2 waste oil tanks (each 1,200 cu.m.) available on a truck. For service telephone 11762 or fax 19059.

SEAMAN'S CLUBS: Torshavn Seaman's Home. Tel: 13515.

CURRENCY: Danish Kroner.

AUTHORITY: Torshavnar Havn, Eystara Bryggja, P. O. Box 103, FR-100 Torshavn, Faroe Islands. *Tel:* 298-11762. *FAX:* 298-19059. *Contact:* Jonsvein Lamhauge, Harbour Master.

TRANGISVAAG: 61.33 N. 06.50 W.

DOCUMENTS:
3 Crew Lists.
1 Passenger List.
1 Bill of Lading.
1 Bonded Store List.

PILOTAGE: When Pilot required pre-arrange with Agent by telegram or telephone, 2 hours notice of ETA required. Pilot boat is local fishing-boat, usually boarding vessel at harbour entrance.

ANCHORAGES: Safe sheltered harbour up to 30 fathoms deep along the entrance transit bearing. Vessels anchor 1 cable offshore in 8 fathoms, clay bottom.

RESTRICTIONS: Vessels may enter harbour day and night.

MAX. SIZE: Vessels may berth with draft up to 7 m.

HEALTH: Pratique granted if no contagious illnesses aboard and all arrival formalities accomplished by the boarding officials.

RADIO: Torshavn Radio, call signal OXJ, 24 hours service, listens 2482 kHz, replies and transmits traffic on 1778 kHz, traffic lists on 1778 kHz 35 minutes past each even hour. VHF service: Channel 16 (156.80 MHz) Channel 26 (161.90 MHz). All ETA messages, etc. must be routed through Torshavn Radio.

TUGS: None; if required local fishing-boats are capable to act as tugs.

BERTHING: Tveraa at Northern side of fjord. Outer side of quay 280 m. length and 20/21 ft. alongside. Inner side length 170 m. and 15 ft. alongside. Quay is for general cargo, fish and salt.
Harbour basin length 58 m., depths 7 ft. to 18 ft. alongside.
Drelnes on South side of fjord. Quay length 89 m. Depth alongside outer side 23 ft.; inner side length 43 m., depth 22 ft.

STEVEDORES: In order to enable Agent to arrange gang important obtain in good time accurate ETA from vessel. Work normally not carried out on Sundays.

MEDICAL: Advance notice to Agent preferable, good hospital facilities for both surgery and medicine.

DENSITY: 1024.

FRESH WATER: Water available at main quay, rate 50 t.p.h.

FUEL: Diesel gas oil available, 50 t.p.h., no advance notice required.

CONSULS: Spanish Vice-Consul.

REPAIRS: Local marine repair companies can undertake all repairs of general nature to deck, engines, hull, electric and radio equipment, etc. Slipway available for small vessels.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Crew allowed to open and close hatches.

CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarettes or 200 grams tobacco out of Bond. Limited quantity wine and spirits.

REPATRIATION: May be arranged by sea or air.

AIRPORT: (Vagar) Served by regular airlines, located 50 miles from Trangisvaag.

TIME: GMT. Summertime (GMT plus 1 hour) from last Sunday in March to last Sunday in September.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Christmas Day; Second Christmas Day; work not carried out these days.

POLICE/AMBULANCE/FIRE: Police Tel: 71448; Ambulance 71133; Fire 000.

TELEPHONES: Usually not placed aboard, but can be arranged.

SHIP SUPPLY SERVICE: Contact Vaktar-OE Bjargin-Gartenastan, Torshavn, Faroe Islands.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not needed.

GARBAGE DISPOSAL: Garbage trucks available (Tel: 71976) or call Harbour Office on VHF Channel 16. Cost: DKr.120/cu.m.

WASTE OIL DISPOSAL: One tank with capacity 10 cu.m. Cost: DKr.1000/cu.m. For service call Harbour Office on VHF Channel 16.

SEAMAN'S CLUBS: None.

CURRENCY: Danish Crown.

DEVELOPMENTS: New quay under construction as extension of existing quay.

AUTHORITY: Tvoroyrar Havn, P.O.Box 20, FR-800 Tvoroyri, Faroe Islands. *Tel:* 71055 (after hours 71801). *FAX:* 71418. *Contact:* O. Mortensen, Harbour Master.

TVOROYRI: 61.33 N. 06.50 W.

DOCUMENTS:
1 copies Crew List.
1 copy Passenger List.
1 copy Bill of Lading.
1 copy Bonded Stores List.

PILOTAGE: When a Pilot is required, the vessel should advise Agent 24 hours prior to arrival by telephone or telegram. The pilot boat is a local fishing boat. The Pilot usually boards at the harbour entrance.

ANCHORAGES: Vessels anchor 1 cable offshore in depth of 15 m. The bottom is clay. The Harbour Office will advise Master on best location.

RESTRICTIONS: Vessels may enter day and night.

MAX. SIZE: Max. draft 7.0 m.

HEALTH: Pratique granted if no contagious illness aboard. All arrival formalities accomplished by the boarding officials.

RADIO: Torshavn Radio, call sign "OXY". 24 hour service. Station listens on 2182 kHz.

VHF: Harbour Office on Channel 16. Vessels should make contact one hour prior to arrival and one hour prior to departure.

RADAR: No facilities.

TUGS: No tugs. Fishing boats will assist if required.

BERTHING: North side of Fjord: Outer side of quay – length 280 m., depth 7.0 m. Inner side of quay – length 170 m., depth 4.5 m.
Drelnes on South side of Fjord: 2 berths, each length 89 m. and depth 7.0 m.

CRANES: None.

BULK CARGO FACILITIES: None.

STEVEDORES: It is important that vessel gives Agent accurate ETA in order to arrange gangs.

MEDICAL: Hospital and doctor available. Give Agent advance notice if treatment required.

DENSITY: 1024.

FRESH WATER: Available. Rate 30 t.p.h. Cost DKR 2.0/cu.m.

FUEL: Diesel gas oil available at 50 t.p.h., no advance notice required.

CONSULS: None locally.

REPAIRS: All deck, engine and hull repairs of a general nature can be undertaken.

DRY DOCKS: None.

SURVEYORS: Bureau Veritas.

GANGWAY/DECK WATCHMEN: Not compulsory but available.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits for each member of crew.

CARGO GEAR: Ship's gear.

REPATRIATION: Possible.

AIRPORT: Vagar, 50 miles from the port, served by regular airlines.

TIME: GMT. GMT plus 1 hour (Summertime) from last Sunday in March until last Sunday in September.

HOLIDAYS: New Year's Day, Good Friday, Easter Monday, Labour Day, Ascension Day, Whit Monday, Christmas Day and second Christmas Day.

GARBAGE DISPOSAL: Garbage trucks available (Tel: 71976).

WASTE OIL DISPOSAL: 2×10 cu.m. tanks available.

CURRENCY: Danish Crown.

AUTHORITY: Tvoroyri Havn, FR-800 Tvoroyri, Faroe Islands. *Tel:* 71055 (After hours 71801). *FAX:* 71418 (After hours 72689). *Contact:* Ossur Mortensen, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Fiji Islands

LABASA: 16.26 S. 179.22 E.

SHIPMASTER'S REPORT: January 1983 (Updated 1996).

PORT LIMITS: Port limit is up to the entrance of Mali Passage.

DOCUMENTS:

1 Crew Personal Property Declaration.
8 Crew Lists.
5 Passenger Lists.
4 Stores Lists.
3 Parcels Lists.
4 Maritime Declarations.
3 Form 'D' Regulation 46.
Maritime Declaration of Health.
1 Vaccination List.
1 Copy Fiji Quarantine Ordinance Cap-92.

PILOTAGE: Compulsory. Agent arranges booking for Pilot. Pilot boards at entrance to Mali Passage from 30 ft. long, white hulled boat (no flag). Docking/undocking carried out during daylight hours only. Pilotage is also available for inshore passages to Suva, Lautoka, etc. Reef navigation is carried out by Pilots during daylight hours only.

ANCHORAGES: Safe anchorage is available only after passing Mali Passage, about 6 miles to the S.E.

If vessel arrives early, she can drift safely about 20 miles N.N.W. of Mali Passage.

RESTRICTIONS: Docking/undocking only during daylight hours. Max. draft 10.5 m.

MAX. SIZE: LOA 174 m., draft 10.5 m. Max. shipment available 27,000 tonnes, as this is the max. storage capacity at Labasa.

HEALTH: Anti-malarial squad boards vessel with Pilot. They inspect and spray the vessel, only then is Pratique granted.

If vessel is coming from a "Malaria infested" region, spraying is done twice daily during the vessel's stay in port.

TUGS: None available. 2 mooring boats are used for taking lines ashore.

BERTHING: *Malau Wharf:* Length 150 m., depth alongside 11 m. Vessel berthed starboard side to, using 1 head/sternline, 2 breastlines and 1 spring at each end.

As the sugar loader is fixed, this mooring system enabled vessel to shift fairly easily when loading in different hatches.

Caution must be exercised while docking, undocking and shifting to avoid contacting the middle piled dolphins of the wharf, as they are unfendered and non-loadbearing.

No tidal restrictions for wharf or port.

BULK HANDLING FACILITIES: Raw bulk sugar: 400 t.p.h./hr., 24 hours a day.

MEDICAL: Facilities available in local hospital and from private practitioners.

DENSITY: 1024.5.

FRESH WATER: Not available.

FUEL: Available at Suva only. Reasonable prices are negotiable.

SURVEYORS: Pilot carries out hatch inspection prior to loading. Also see "Suva".

GANGWAY/DECK WATCHMEN: None.

HATCHES: Attended to by crew.

AIRPORT: Local airport with connections to Suva and Lautoka.

HOLIDAYS: Most of the population is of Indian descent, hence some Indian holidays observed.

TELEPHONES: No telephone provided for berth.

DELAYS: Normally 12 hours documentation time (non-laytime) after completion is provided for in the Charter Party; which may not be necessary.

GENERAL: *Communications:* Well connected via Suva. Telexes can be sent via Suva or Lautoka, by telephoning Agent's office there.

Formalities, Clearance, etc.: Labasa is not a 'Port of Entry' (about 2 vessels per month call here). Pilot, Agent, Surveyor, Customs, Immigration, Agricultural Inspector, Malaria Prevention Squad, etc., all have to come from Suva or Lautoka. Customs Officer *only* stays on board the vessel until departure.

Pilferage: None reported.

Bonded Stores: Not available.

Provisions: No shipchandler. Fresh fruit, vegetables, etc., are available at reasonable prices from the local market, about 8 miles from the wharf.

AUTHORITY: See "Suva".

LAUTOKA, (Vuda Point): 17.36 S. 177.26 E. (See Plan)

DOCUMENTS/HEALTH: Refer to "Suva".

PILOTAGE: Compulsory. Pilot boards at Navula Passage, 20 miles South of Lautoka. Masters should telegraph to their Agents ship's ETA at Navula and indicate whether they require a Pilot or not at least 24 hours in advance.

Note: Radio communications with Fiji can be difficult and Masters are advised that telephone or telex messages worked via New Zealand or Australia direct to their Agents are far more reliable.

The Pilot normally boards from a 60 ft. fibreglass hull launch with white superstructure. The pilot vessel can be contacted on VHF 16. Listening watch only when vessels are expected. Pilot normally boards 1 mile seaward of the passage on the leads. In heavy weather it may be necessary for a vessel to enter the passage to embark the Pilot. There is no anchorage outside the passage.

Vessels requiring Pratique should anchor approximately 1 mile to the Westward of Vio Island in Lautoka Harbour. If prior arrangements have been made through Agent, Health Officers may board inside Navula (The Health Officers inspect vessels only from 1 hour after sunrise to 1 hour prior to sunset).

ANCHORAGES: The whole of the area enclosed by a circle of diameter approximately 1 mile between Vio Island and Pinder Reefs is an acceptable anchorage with depths ranging from 9 to 13 fathoms.

MAX. SIZE: Minimum depth in approaches to wharf 32 ft., depth alongside 36 ft. Generally speaking, any vessel not exceeding 32 ft. draft can be accommodated. Main wharf is only 457 ft. long but overhangs are allowable, ("Canberra", berthed at Main Wharf), dolphins for mooring lines being situated off each end of the wharf. Range of tide approximately 5.5 ft. at Springs and 3 ft. at Neaps, but state of tide does not affect the foregoing.

At Vuda Point, the tanker berth of Lautoka, tankers in the 18,000 to 24,000 d.w.t. class can be handled. This is a submarine pipeline installation, the ship mooring to 4 buoys, available depth being about 36 ft.

VHF: Port Control on Channel 16 throughout 24 hours.

TUGS: 2×2,000 b.h.p. (33 ton B.P.) available. Use of 2 tugs is required if berthing at Vuda Point at night.

BERTHING: Berthing and unberthing at Vuda Point throughout 24 hours. Berthing at Lautoka is at discretion of Pilot, but in normal conditions is effected at any hour of day or night.

Berthing in Lautoka is generally effected port side to.

Wharf	*Length*	*Depth*
Queens West	457 ft.	36 ft.
Queens North	257 ft.	24 ft.
Queens East	423 ft.	12 ft.
*F.S.C.	577 ft.	32 ft.

*Bulk sugar loading installation for Fiji Sugar Corporation Ltd. (Woodchip also loaded).

TANKERS: See "Max. Size". No slop discharge facilities. Discharge line 8 in. diameter.

FRESH WATER: Fresh water is available at all berths, there may be some restrictions in the dry season.

FUEL: Diesel fuel is available at the North and East berths on Queens Wharf.

DENSITY: 1025.

CONSULS: None.

REPAIRS: Only comparatively minor repairs can be effected such as welding jobs and repairs to pumps and other auxiliaries.

SURVEYORS: Cargo and Marine Survey Ltd., 117 Vitogo Parade, Lautoka. Tel: 663922, 663504. Fax: 665866.

REPATRIATION: Repatriation can be effected through vessel's Agents.

AIRPORT: Nandi International Airport is 16 miles from Lautoka. Frequent flights to all parts of the world by several major airlines operating through Nandi.

TIME: GMT plus 12 hours. No alterations to clocks.

HOLIDAYS: *Public holidays:* New Year's Day, Good Friday, Easter Saturday, Easter Monday, Queen's Birthday, Bank Holiday, Fiji Day, Deepwali, Prince Charles' Birthday, Prophet Mohammed's Birthday, Christmas Day, Boxing Day.

POLICE/AMBULANCE/FIRE: Dial 000 in emergency. Police, 60222; Ambulance, 60399; Fire, 60211.

SERVICES: Tank-cleaning labour and labour for painting, chipping, etc. can be provided, but no equipment. No facilities for discharge of slop tanks etc. Compass adjustments can be arranged.

Telephone connection on wharf (3 lines). Police post on wharf.

AUTHORITY: Ports Authority of Fiji, G.P.O. Box 780, Suva, Fiji. *FAX:* 312700 (Director General), 304187 (Port Master). *Cables:* Pafiji Suva. *Contact:* A. Savu, Director General.

Ports Authority of Fiji, Lautoka. *Tel:* 662944. *Contact:* Captain George Macomber, Port Master. Lasarusa Tuimanu, Wharf Manager.

LEVUKA: 17.41 S. 178.51 E. (See Plan)

DOCUMENTS:

Goods carried in Unregistered Space (C.E. 148) (1 only).
List of articles in possession of Crew, Officers and Master (1 only).
Crew List (8 only).
Passenger List (8 only).
Parcel List (2 only).
Primary Health Report (1 only).
Special Malaria Forms (1 only).
Vaccination Certificates (1 for each person).
Derat Certificates (1 only).

PILOTAGE: Compulsory. Pilots are arranged through Agents. Pilot boards in position – Lat. 17° 40.64'S., Long. 178° 52'E.

MAX. SIZE: Length 560 ft. Max. draft 25 ft.

HEALTH: Radio Pratique may be granted when any vessel has not visited any malarious port and Master declares that crew and passengers are healthy and vessel has not come from any area where internationally quarantinable diseases are endemic or in epidemic. Vessel may then enter port by day or night. On berthing, Master must immediately deliver to Quarantine Officer fully completed Primary Health Report and Derat or Derat Exemption Certificate. If there is any suspected case of disease or fever on board, vessel must be anchored at Quarantine Anchorage until cleared by Port Medical Authority. Pratique is automatic if a vessel has been granted Pratique at another port in Fiji.

TUGS: No tug service available, but tugs can be ordered from Suva.

BERTHING: Only 1 vessel berthing at a time.

Berthing in Levuka is generally effected starboard side to, outside Queens Wharf. Both dry cargo vessels and tankers use the one berth available for overseas shipping at Levuka.

Wharf	*Length*	*Depth Alongside*
Outer Face	255 m. (837 ft.)	7.9 m. (26 ft.)
Inner Face	No longer used due to new reclamation.	

STEVEDORES: Estimated time of arrival of any vessel and tonnage of cargo to be discharged should be received at least 24 hours from time of arrival.

MEDICAL: Normal hospital facilities are available. Specialist services not available but can be arranged for within 24 hours. Cholera and yellow fever valid Vaccination Certificates are required to be held by ship's crew and passengers, except those coming from New Zealand, Australia, Kiribati, Tuvalu, Tonga or Samoa.

TANKERS: Load and discharge lines 8 in. steel pipe. 1 berth only.

DENSITY: 1025.

FRESH WATER: Available only during normal working hours, which is from 0600 to 1600 from Monday to Thursday, and Friday up to 1500. Rate of delivery of water is about 15 t.p.h.

FUEL: Light marine diesel only – viscosity kin. at 100°F. = 3.4.

FIRE PRECAUTIONS: Bunkering only permitted during period between sunrise and sunset.

CONSULS: None.

REPAIRS: Minor engine repairs are possible, but deck and major engine repairs could be carried out at Port of Suva, which is about 57 miles away.

SURVEYORS: See "Suva".

GANGWAY/DECK WATCHMEN: Services of watchman highly recommended to stop unauthorised persons from going on board.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: All crew and Officers will be issued with 25 cigarettes per day. A maximum of 4 days' allowance may be given at any one time. Cigars or tobacco may be taken in lieu of cigarettes. Masters and other Officers may be allowed to keep in their possession small quantities of liquor.

Daily allowances: Spirits, 1 reputed quart to Master; 0.25 reputed quart to other Officers; Beer, 2 reputed quarts to Master; 2 reputed quarts to other Officers.

REPATRIATION: Facilities exist for repatriation.

AIRPORT: Situated on island of Viti Levu and the distance is about 200 miles. It is served by regular airlines (international). Connections twice daily from local airport, 12 miles from port.

TIME: GMT plus 12 hours.

HOLIDAYS: Working of cargo is not permitted on Sundays, Good Friday and Christmas Day. Application to work on Sundays to be made to the Ports Authority of Fiji at Levuka.

Public Holidays: See "Lautoka".

POLICE/AMBULANCE/FIRE: Police, 44222; Ambulance, 44015; Fire, 44014.

TELEPHONES: Arrangements may be made with Postmaster for installing telephone on board.

SHORE LEAVE: All crew members are allowed shore leave unless there is a special restriction from any Government authorities.

IDENTIFICATION CARDS: Not compulsory.

DELAYS: No berthing at night (lines cleared by Quarantine Authorities). Bunkering from sunrise to sunset. No loading or discharge during rain.

GENERAL: Rat guards must be affixed to all shore moorings or cables greased when alongside to prevent the advent of rats.

AUTHORITY: Port Authority of Fiji, G.P.O.Box 780, Suva, Fiji. *Tel:* 312700. *Telex:* 2203 PAF FJ. *Cables:* Pafiji Suva. *Contact:* Akuila Savu, Director General.

SUVA: 18.08 S. 178.26 E. (See Plan)

PORT LIMITS: A vessel is considered to be an "arrived vessel" having passed the West Reef Beacon at the entrance to Suva Harbour.

DOCUMENTS:

1 Last Port of Clearance Certificate.
2 Declaration of Nett and Unregistered Tonnage form.
8 Passenger Lists.
8 Crew Lists.
6 Stores Lists (for high duty goods).
Passenger liners are required to submit Transit Passenger Lists and also a Letter of Guarantee from Master.
Vaccination Certificates for Passengers and Crew.
Derat Certificates.

PILOTAGE: Arranged through vessel's Agents. 24 hours notice of ETA with confirmation 12 hours before arrival. Suva Harbour Control should be contacted on VHF Channel 16 when within range. Pilot vessel is a white clipper bow launch with word "Pilot" in black on each side and will leave wharf 30 minutes before signalled ETA of vessel. Pilots board on leads 5 miles from front lead. Vessels may stand in on leads to meet pilot vessel. Vessels are advised to provide 2 manropes for pilot ladder which will usually be required on the port side. No anchorage for vessels awaiting a Pilot.

ANCHORAGES: Safe anchorage may be found in depths of 10 to 20 fathoms within the harbour. Holding is good, mud bottom.

RESTRICTIONS: Vessels may enter at any time of day or night.

MAX. SIZE: No length or draft limitation for conventional vessels entering port. Largest vessel regularly entering is 42,000 tons.

HEALTH: Health authorities require that vessels cable details of ports visited within 50 days of ETA. Radio Pratique will be granted to vessels which are healthy and have not visited a port in a malarial area within 50 days. Health authorities board and inspect any vessel which has visited a malarial port within 50 days and will spray any vessel which has visited a malarial port. Vessels arriving from malarial areas are not permitted to berth during hours of darkness. Authorities board from a launch as vessel enters harbour. Quarantine Officer will sight Maritime Declaration of Health and Derat Certificate on boarding. No further Pratique formalities are required in Fiji ports other than first port of entry.

RADIO: Suva Radio, call sign 3 DP. 500 kHz., 24 hours listening watch.

VHF: Port Control maintains a 24-hour port radio control watch at Suva on VHF Channel 16. The call sign is "Suva Port Control".

TUGS: One tug available – 2,000 h.p. (33 ton B.P.). Compulsory for vessels of 3,000 g.r.t. and upwards. 2×12 ton B.P. tugs also available if required.

BERTHING: Vessels berth port or starboard side to King's Wharf or port or starboard side to Walu Bay Wharf as may be necessary. King's Wharf is 495.0 m. in length, having a least depth alongside of 11.6 m. at MLWS at the North end and 10.6 m. at the South end, whilst Walu Bay Wharf is 183.0 m. in length, having a least depth alongside of 9.0 m. MLWS. Ro/Ro cargoes handled.

Vegetable Oil: Vessels loading vegetable oils berth at Walu Bay or North King's Wharf.

LPG Carriers: Berth North King's Wharf or Walu Bay.

Equipment: Forklift trucks 2.5 tonnes – 25 tonnes capacity.

Out Ports of Suva: Customs and Pilot are embarked at Suva or Lautoka.

Ellington: Lat. 17.20° S., Long. 178.14° E. private wharf for loading sugar and molasses from Raki Raki Mill.

Savu Savu: Lat. 16.47° S., Long. 179.21° E. Government wharf for local coast trade and anchorage for cruise vessels.

Vatia Point: Lat. 17.25° S., Long. 177.46° E. Private wharf for discharging explosives and fuel to gold mines.

STEVEDORES: Arranged by ship's Agents.

Working Hours:

Day Shift:	0800 – 1300 hrs.	:	5 hours
	1300 – 1400 hrs.	:	unpaid meal break
	1400 – 1600 hrs.	:	2 hours
			7 hours
Afternoon Shift:	1600 – 2100 hrs.	:	5 hours

MEDICAL: Advance notice of medical assistance is desirable. Hospital facilities available. Current international vaccination certificates required.

TANKERS: Discharge lines 8 in. diameter. Tankers discharge at King's Wharf, North and South Berths. Depths alongside 42 ft. No residue discharge facilities.

DENSITY: Salt water, density 1025 approx. No tide effect on density.

FRESH WATER: Available at all berths. Delivery rate 30 t.p.h. per hose. Hose diameter 75 mm.

FUEL: Furnace fuel oil, diesel fuel oil, gas oil available by prior arrangement through oil company.

CONSULS: *Diplomatic Heads of Missions Resident in Fiji:*

Australian High Commissioner
British High Commissioner
French Ambassador
Indian High Commissioner
Japanese Ambassador
New Zealand High Commissioner
Papua New Guinea High Commissioner
Ambassador for the People's Republic of China
Tuvalu High Commissioner
United States Ambassador
Malaysian Ambassador
South Korean Ambassador

Consular Representatives in Fiji:

Denmark
Finland
Italy
Nauru
Netherlands
Norway
Pakistan
Philippines
Sweden

REPAIRS: Engine and deck repairs may be carried out at local machine shops. 3 slipways for vessels up to 1,000 tonnes.

SURVEYORS: *Non-Exclusive Classification:*

Lloyd's Register of Shipping
Panama Bureau of Shipping Inc.
Det Norske Veritas
Nippon Kaiji Kyokai
Germanischer Lloyd
Korean Register of Shipping
China Corporation Register of Shipping
Bureau Veritas
American Bureau of Shipping

The resident Surveyor Mr. D. Sunderland of Billett, Wright & Associates Ltd. is based in Suva, however attendance in other Fiji ports is possible providing adequate notice is given. Surveyor may be arranged by contacting Ship's Agents.

Cargo Surveys:

Cargo & Marine Survey Ltd. of Lautoka (See "Lautoka") provide all manner of services including draft surveys and damaged cargo inspection.

Resident Surveyor Captain D.E. Worthington is also available to attend at Malau Labasa. Surveys may be arranged through Ship's Agents.

GANGWAY/DECK WATCHMEN: Employment of deck/gangway watchmen is recommended and normally provided by ship's Agents.

OPENING/CLOSING HATCHES: Normally opened and closed by stevedore labour but crew may be employed at Master's discretion.

CERTIFICATES:

Load Line.
Certificate of Registry.
Safety Equipment Certificate.
Radio Certificate.
Derat Certificate.
Maritime Declaration of Health.

CUSTOMS ALLOWANCES: 1 oz. tobacco per man per day. No alcohol.

REPATRIATION: Facilities exist for crew changes and repatriation.

AIRPORT: 15 miles to Nausori (Suva) Airport, serving Pacific Islands on weekly basis. Numerous daily flights to Nandi International Airport.

TIME: Local time is 12 hours ahead of GMT.

HOLIDAYS: See "Lautoka".

Cargo is not worked on Public Holidays.

POLICE/AMBULANCE/FIRE: Police, 311222; Hospital, 313444; Ambulance, 312439; Fire, 22688; Emergency, 000 for any of the above services.

TELEPHONES: Telephone connections to ships are provided.

SERVICES: Compass adjusting may be carried out.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not compulsory.

GARBAGE DISPOSAL: The port has its own incinerator for wet and dry waste from ships. Charges for burning waste are based on an hourly rate.

WASTE OIL DISPOSAL: Waste oil and sludge can be discharged after prior arrangement.

SEAMAN'S CLUBS: Flying Angel - Missions to Seamen, Tel: 300911.

CURRENCY: Fiji Dollar.

DELAYS: Delays are not usual except for rain during hurricane season from November to April.

AUTHORITY: Ports Authority of Fiji. G.P.O.Box 780, Suva, Fiji. *Tel:* 315399. *Telex:* 2203 PAF FJ. *Cables:* Pafiji Suva. *FAX:* (679) 300064. *Contact:* Akuila Savu, Director General. Captain Malcolm Peckham, Port Master.

NOTES

Please also advise Shipping Guides Ltd.

Finland

GENERAL:

DEEP-SEA PILOTAGE: See "Baltic Deep-Sea Pilotage".

EKENAS / TAMMISAARI (Including Skogby): 59.58 N. 23.26 E. (See Plan)

DOCUMENTS:
International or Finnish Measurements Certificate.
1 Personal Effects List.
1 Ship's Provisions List.
2 Crew Lists (passengers to be included).
1 Customs Declaration (official forms supplied by the Customs Authorities).
4 Manifests.
2 Bills of Lading.

PILOTAGE: Pilots for Ekenas / Tammisaari applied for at Hango Pilot Station by approaching Pilot Station outside Hango/Hanko, where pilot boat will meet vessel right outside Pilot Station.
Telegram address: Hango Pilot.

MAX. SIZE: Max. draft 15.1 ft. (4.6 m.). No other restrictions. At Skogby, draft up to 24 ft. – No tide.

RADIO: Helsinki Radio, Call sign OHG.

VHF: Helsinki Radio, Channels 5, 28 and 85. When in the Hanko/Ekenas area use Channels 86, 03 and 25.

TUGS: Normally no tugs stationed at Ekenas but can be arranged from Koverhar or Hanko (12 nautical miles and 20 nautical miles from Ekenas respectively).

BERTHING: Two quays at Ekenas: "Trakajen", length about 160 ft.; "Stenkajen", length about 500 ft.
3 mobile cranes, capacities 27, 36 and 56 tons are available. Two of the mobile cranes are equipped with grabs suitable for discharging of bulk cargoes such as coal, coke, china clay, ball clay, salt and grain.

STEVEDORES: ETA to be given to Agent 1400 hrs. Finnish time on the day before arrival in order to prepare loading/discharging (Stevedore: J. A. Westerlund).
Working Hours: Normal working hours are Monday to Friday 0700 – 1600. Daily overtime can normally be arranged for up to 4 hours (1600 – 2000). All overtime is, however, voluntary.

MEDICAL: Hospital treatment can be arranged when needed.

DENSITY: 1001.

FRESH WATER: Fresh water is delivered to the ship's side by means of hose in Summertime.

FUEL: Bunkering available at Ekenas by means of tank trucks.

REPAIRS: Minor electrical and deck repairs may be carried out.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: 200 cigarettes permitted for each crew member. 1 open bottle of 1 litre wine or spirit is allowed for each crew member over 18 years of age.

AIRPORT: Nearest airport is Helsinki Airport, situated about 100 km. from Ekenas.

HOLIDAYS: On Saturdays and days preceding Church holidays, the eve of Independence Day, the day preceding May Day, on Whitsun Eve and on New Year's Eve the working day consists of four working hours, starting from 0700 hrs. or 0800 hrs. and lasting to 1100 hrs., or 1200 hrs. respectively without break for meals. May Day, Independence Day, (6th December), Easter Saturday, Midsummer Eve and Christmas Eve are considered as labour free days.

POLICE/AMBULANCE/FIRE: Police, Tel: 112 and 2414000; Ambulance, Tel: 112; Fire, Tel: 112.

TELEPHONES: There are no arrangements for placing telephones on board the vessel but telephone calls can be made from the Harbour Constable's Office.

SUPPLIES: Ship stores and provisions can be ordered from Hango through Agent.

SHORE LEAVE: Shore leave allowed for crew members.

IDENTIFICATION CARDS: Not needed.

GARBAGE DISPOSAL: Available at 2 hours notice. Tel: 911-2486713.

WASTE OIL DISPOSAL: Available. Tel: 911-2486713.

SEAMAN'S CLUBS: None.

CURRENCY: Finnish Mark. U.S.$1.00 = FIM 4.60 (2/96).

AUTHORITY: Hamnkontoret i Ekenas, Postbox 75, SF-10601 Ekenas, Finland. *Tel:* 911-263111, 949-471663 or 911-43374. *FAX:* 911-2632050. *Contact:* Svante Rosin, Harbour Master.

HAMINA: 60.34 N. 27.11 E. (See Plan)

PORT LIMITS: A vessel is considered to be an "arrived vessel" subject to Charter Party Terms, when arrived at roads.

DOCUMENTS: Normally required:
1 Crew List.
1 Passenger List.
3 Manifests.
1 Bill of Lading of each consignment.
Customs Documents:
1 Special List (personal effects).
1 Provision List (Ship's Articles).
Ship's Papers Required:
Safety Equipment Certificate.
Radio Safety Certificate.
Construction Certificate.
International Tonnage Certificate.
International Load Line Certificate.
Certificate of Registry.
Tonnage Dues and Ice Dues Certificates if vessel called previously.

PILOTAGE: Sea Pilot boards at Orrengrund. Fairway 33 miles from Orrengrund to Hamina, depth 9.0 m. New Fairway 38 miles long, depth 10.0 m. VHF radio telephone Channel 16; pilot boat: hull red, superstructure yellow. Vessels coming from Eastward can take Pilot at Haapasaari (Aspo), but must order Pilot by radio via Coast Radio Station at least 6 hours before ETA Haapasaari.
Harbour Pilotage: Harbour Pilot takes over at Roads. Harbour pilot boat: hull black, superstructure yellow, word "Pilot" painted with black letters. Harbour pilotage optional. VHF Channel 12.

ANCHORAGES: 2 anchorages with good holding grounds at Roads.

RESTRICTIONS: Usually no restrictions. Max. draft 10.0 m. Port open throughout year.

MAX. SIZE: Draft is governing factor. No tide but prolonged Easterly winds can cause lower water level, which must be checked before entering berths.

HEALTH: Bill of Health not required. In case suspected disease or fever on board, doctor to be contacted, preferably via Agent, by radio before arrival.

RADIO: Vessels in Baltic Sea usually contact Helsinki Radio/OHC, A1 and OHG, A3. VHF Channels 16 and 26.

RADAR/VHF: There is no land radar service. Harbour is equipped with VHF radio telephone, Channel 12. Also see "Radio".

TUGS: Join vessels at Roads. Ship's lines usually used.

BERTHING:

Quay	*No.*	*Depth* (m.)	*Length* (m.)

STEVEDORES: ETA is expected in good time before arrival.

MEDICAL: Advance notice helpful but not compulsory. Hospital facilities available at town.

TANKERS: Possibility to discharge oily water ballast.
Also see "Berthing".

DENSITY: 1003.

FRESH WATER: Available at majority of quays; elsewhere supplied by boat.

FUEL: Fuel and diesel oils available by tank truck at short notice.

CONSULS: Denmark, Netherlands, Norway, Sweden, United Kingdom.

REPAIRS: Minor repairs effected.

GANGWAY/DECK WATCHMEN: Shore watchmen available, Sundays and holidays 100% extra.

OPENING/CLOSING HATCHES: Crew close automatic hatch covers. Hatches to be covered manually are usually covered by stevedores.

CUSTOMS ALLOWANCES: Tobacco: Master 200 cigarettes or 200 grams tobacco. Others, 100 cigarettes or 100 grams tobacco. Wine and/or Spirit: Master, 3 bottles wine or spirits. Others, 1 bottle.

REPATRIATION: There are facilities for repatriation.

AIRPORT: Helsinki Airport, distance 145 km. Regular flights.

TIME: Local time is GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: New Year's Day (Jan. 1); Epiphany (Jan. 6); Good Friday; Easter Monday; Labour Day (May 1); Ascension Day; Whit Monday; Midsummer Day; All Saints' Day; Independence Day (Dec. 6); Christmas (Dec. 25 and 26); Midsummer's Eve.

POLICE/AMBULANCE/FIRE: Police 002; Ambulance 000; Fire 000.

REGULATIONS: Regular vessels have preference at certain berths.

AUTHORITY: Port of Hamina Authority, PL 14, SF-49401 Hamina, Finland. *Tel:* 358-52-7495400. *FAX:* 358-52-7495419. *Contact:* M. Koskinen, Harbour Master. H. Heikkila, Port Director.

HANKO: 59.49 N. 22.56 E. (See Plan)

DOCUMENTS:
Ship's Register.
Crew List.
Manifests.
Bills of Lading.
Provisions List.
Health Certificate.

PILOTAGE: Compulsory, distance from sea to port is 6 miles. Pilot boat painted red, arriving outside Russaro called by radio via Helsinki Radio or by flag, sound or Morse: "G".
Pilot Station: Tel: (911) 2482246. Fax: (911) 2482251. VHF Channels 16 and 13.
ANCHORAGES: Inside Gustavsvarn.
RESTRICTIONS: Draft 26.5 ft., length/breadth no restriction; no tide.
RADIO: Cable Agents giving ETA via Hanko or Helsinki Radio.
RADAR: At Pilot Station; service for ships entering port, contact by ship's radio.
TUGS: In Winter harbour tug assists ships to and from the quay.
BERTHING: Quay height about 6 ft. above sea level. Shore fenders keep vessel about 2 ft. off quay. Special quays for Ro/Ro traffic.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Customs Documents.
2 Crew Bond Declarations.
2 Ship's Bond-Stores Lists.
Derat Certificate.
4 Manifests.
2 Bills of Lading.
Ship's Register, Certificate of tonnage.

APPROACHES: *Directions for arrival in the port:* Vessels using the main approach to the port from Helsinki Lighthouse should keep the Harmaja Lighthouse Beacon in line with the church tower on the island of Suomenlinna. The light from Harmaja is visible at a distance of 37 km. (20 nautical miles), and the approach channel has a bearing of 007°. The islet of Harmaja is left on the Western side of the fairway. In the event that the Master of the vessel is not thoroughly acquainted with the fairway and its markings, he is strongly advised not to proceed without the assistance of a Pilot any closer than 3.7 km. (2 nautical miles) to Harmaja, where the channel veers to a bearing of 010°.

PILOTAGE: Compulsory. ETA required 24 hours prior arrival. At present there are 5 different channels available for vessels approaching Helsinki.
1. *Helsinki Lighthouse-Harmaja-Helsinki:*
The main approach to Helsinki, this channel starts from East of the Helsinki Lighthouse, a caisson beacon on the shoals South of Helsinki, at a distance of around 22 km. from the port. It proceeds via the Harmaja Pilot Station and the Kustaanmiekka Strait between the islands of Suomenlinna and Vallisaari, to the open area of water beyond, known as Kruunuvuorenselka. To this point the channel is navigable by vessels drawing up to 9.6 m. The fairway branching off North of the Harmaja Pilot Station and leading to the West Harbour has a depth of 8.9 m. Pilots are taken on board from the station at Harmaja.
2. *Helsinki Lighthouse-Melkki-Helsinki:*
This 11 m. channel leads from the Helsinki Lighthouse to the East of the Graskarbadan Light and then between the islands of Pihlajasaari and Melkki to the West Harbour. Pilots are taken on board from the Helsinki Pilot Station.
3. *Porkkala-Helsinki:* (Southern Finland Winter Fairway).
The Winter fairway into Helsinki begins from roughly 8 km. West of the Porkkala Lighthouse. The channel is 10 m. deep from Sommaro, decreasing to 9 m. from Ronngrund. The fairway joins the 11 m. channel (see above) leading to the West Harbour S.W. of Katajaluoto, and joins the 9.6 m. lead to Helsinki, North of Harmaja.
During the Winter months, when the passage from the Helsinki Lighthouse to Harmaja is closed owing to ice conditions, all vessel traffic into Helsinki is directed via the route above. Pilots are taken onboard from the Porkkala Pilot Station.
4. *Porkkala-Helsinki:*
In addition to the above channel, there is a 7.9 m. fairway leading from Porkkala to Helsinki, which begins from about 1 km. West of the Porkkala Lighthouse and joins S.E. of Pihlajasaari with the 8.9 m. channel leading to the West Harbour. Pilots are taken onboard from the Porkkala Pilot Station.
5. *Emasalo-Vuosaari-Helsinki:*
From the East there is a 9 m. channel leading to Helsinki through the outer islands, which joins with the main approaches to Helsinki North of Harmaja. Pilots are taken onboard from the Emasalo Pilot Station. Leading from this 9 m. channel, there is a 7.5 m. approach to the former shipyard area of Vuosaari.
Services to Vessels entering and leaving the Port: In order to improve vessel safety for ships entering and leaving the Port of Helsinki, a "Control Zone" is enforced in the approaches to the port. Vessels in this area (exceeding 12 m.) should listen for instructions on VHF Channel 71. Traffic announcements and warnings to navigation will be issued via this channel. Notification of position should be given by vessels over 20 m. in length on entry to this zone, and a further report should be made at least 15 minutes prior to arrival at Sarkansalmi or Kustaanmiekansalmi.
On departure from the port, vessels should notify their intention to leave and course prior to casting off.
Vessels in local harbour traffic (waterbuses, tugs, escort vessels, etc.) are required to give notification of their course and whereabouts only in the case of poor visibility.
Pilots are obtainable from:

Emasalo Pilot Station	VHF Channels 16 or 13.	Tel. (358) 15542710.
Helsinki Pilot Station	VHF Channels 13, 16 or 71.	Tel. (358) 0668123.
Port of Helsinki	VHF Channels 13, 16 or 71.	Tel. (358) 017333280.

DIRECTION FINDING: Harmaja Radio Beacon (frequency 298.8 kHz. Signal "HA") transmits:
Non-directional radio signals, with a modulation frequency of 395 kHz. By listening to these signals with a direction finding receiver, equipped with frame aerial, a ship can determine her bearing to the beacon.
Harmaja Lighthouse and Helsinki Lighthouse fitted with "Racon" for 3 cm. radar (X-area).
ANCHORAGES: Good anchorage available outside harbour, depth 26 ft. – 32 ft. clay bottom.
MAX. SIZE: Draft 31 ft., length no limit.
HEALTH: See "Oulu".
DEPTH OF CHANNELS:
From Helsinki to East 9 m.
From Helsinki Lighthouse to Helsinki 9.6 m. and 11.0 m.
From sea South via Porkkala 9.0 m.
Variations in water level: There are no tidal variations as such in the port, but rather the differences noted are the result of weather or climatic conditions.

Max.	+1.30 m.
MHW	+0.85 m.
MLW	−0.65 m.
Min.	−0.90 m.

VHF: Harmaja Pilots, Porkkala Pilots and Port Authority call VHF Channel 16 or 13.
TUGS: Several available. Charges based upon time when tug leaves station berth until moment of return to same station.
BERTHING: Port and equipment owned by Municipality of Helsinki. 5 principal parts of port are South Harbour and West Harbour, North Harbour, and Herttoniemi and Laajasalo Oil Harbours.
Foreign passenger traffic is concentrated on the South Harbour.
West Harbour handles main part of transoceanic traffic; heavy goods and container terminal in West Harbour fitted with 3 container cranes and 1 multi-purpose crane (lifting capacity of each 40 tons), also silos of 2 flour-milling plants (Vaasanmylly Oy and State Granary), into which grain discharged by suction. On silo quay pneumatic grain unloader owned by State Granary travels along 71 m. long bridge alongside ship to be unloaded. Equipment is 30 m. above quay level and range of suction pipe 11 m. from edge of quay. Unloading equipment can handle 100 t.p.h. Mass export articles such as cellulose, paper and wood goods, loaded chiefly in this harbour. In West Harbour is free-zone warehouse, which offers same privileges as free port.
The North Harbour operates mainly as a North Sea general cargo harbour. The area contains a coal harbour.
Herttoniemi and Laajasalo form the oil harbour, where the leading oil companies have oil storage tanks and their own piers.

South Harbour:

BULK HANDLING FACILITIES: Specially equipped berths for handling bulk cargoes in North Harbour. Berths equipped for containers or Roll-on/Roll-off traffic in West Harbour (40-ton container cranes and multi-purpose crane) and North Harbour (40 ton multi-purpose crane).

Also see "Tables".

STEVEDORES: 24 hours ETA required. Companies available of which 1 specialises in discharging timber and coal.

Working hours: Weekdays, 0700 – 1600 hrs. and 1600 – 2230 hrs. Saturdays, 0700 – 1500 hrs. Lunch break weekdays and Saturdays 1100 – 1130 hrs.

MEDICAL: Agents to be informed by radio if fever suspected.

TANKERS: Max. draft 9.6 m.

Herttoniemi and Laajasalo form together the oil harbour of Helsinki, where the leading oil companies have oil tanks and their own piers.

Harbour	Quay length (m.)	Depth alongside (m.)	Depth of channel (m.)
Herttoniemi Oil Harbour:			8.0
Suomen	100	8.8	
	24	8.1	
Rescue Dept. Pier	60	3.0	
Laajasalo Oil Harbour:			9.6
Shell Co's pier	32	10.0	
Esso Co's pier	30	10.6	
Neste Co's pier	58	10.2	

DENSITY: 1004 – 1005.

FRESH WATER: Unlimited amount available by hoses from hydrants at quays.

FUEL: All grades available; any amount at short notice.

CONSULS: All maritime countries are represented in Helsinki.

REPAIRS: All types available.

DRY DOCKS: *Kvaerner-Masa Yards, Hietalahti:*

Dock	Extreme length (m.)	Breadth at entrance (m.)	Depth on sill (m.)
Dry dock 1	142	20	6.6
Dry dock 2	208	34	9.6

SURVEYORS: Lloyd's Register of Shipping, Bureau Veritas, Germanischer Lloyd, Det Norske Veritas, American Bureau of Shipping, Korean Register of Shipping, N.K.K. and other private companies.

GANGWAY/DECK WATCHMEN: Recommended but not necessary.

OPENING/CLOSING HATCHES: Crew/Stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 litre wine and 1 litre spirits each man.

REPATRIATION: Available.

AIRPORT: Distance to airport 25 km. Flights every day all over Europe.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); Good Friday; Easter Monday; 1st May; Ascension; Whitsun; Midsummer's Eve and Day; All Saints' Day; Independence Day (6th December); Christmas Eve; Christmas Day (25th December); Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Police 10002; Ambulance 112; Fire 112. General alarm 112.

EMERGENCY COORDINATION CENTRE: Helsinki Maritime Rescue Coordination Centre (MRCC). Tel: 667766. VHF Channel 16.

Privately owned tugs are ready at any time round the clock to put to sea for towing or sea rescue tasks.

Oil Pollution Control: In the event of an oil spill or accident involving the risk of oil pollution, contact should be made immediately with the City of Helsinki Rescue Department, Emergency, Tel: 112, and with the Port of Helsinki Port Control, Tel: 1733 3280 (24 hours).

TELEPHONES: Nearly all quays have facilities for ship-to-shore telephone connections. Telephone receivers are available from the Port Control personnel, who also inform ships of the telephone number. Telephones can be ordered in advance from shipping agents.

SERVICES: Compasses are adjusted by competent adjusters approved by the Board of Navigation. For compass adjustment the port has constructed piles or buoys with direction markings. These appliances can be used also for radio direction-finders.

Vessels using the compass-adjustment facilities must have on board a Harbour Pilot, who is entitled to the same compensation as for harbour pilotage.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: In accordance with the terms of the Convention on the Protection of the Marine Environment of the Baltic Sea Area, the discharge or jettisoning of solid or liquid waste into the sea is, with certain exceptions, prohibited throughout the Baltic Sea Area.

On their arrival at the quay, vessels are provided with numbered special waste sacks (yellow), intended for the reception of all special waste carried by vessels arriving from a foreign port. This category of special waste includes raw meat from mammals or birds or poultry, raw offal, meat packaging materials and wrappings, and bones. Vessels are specifically required to take the filled, sealed sacks only to the yellow special waste storage bins on the quay, which bears the same text and markings as on the sacks.

Normal waste and refuse should be deposited in the transparent refuse sacks which are also delivered to vessels on arrival in the port, and the filled sacks are to be taken to the grey storage bins provided for the purpose on the quayside.

Port Authority duty personnel and shipping agents can provide more detailed directions on the reception of waste in the port.

WASTE OIL DISPOSAL: The Port of Helsinki is obliged to accept up to 30 cu.m. of oily mixtures per vessel stay. Collection is by tanker truck and charges, which vary, are for ship's account. Contact Port of Helsinki Authority or SERVI, the company which operates the service, Tel: 90-7571433.

SEAMAN'S CLUBS: Finnish Seamen's Service, MEPA, operate the Helsinki Seamen's Club and Hotel, Tel: 625233. Facilities include TV, pool, refreshments, sauna and gymnasium, sightseeing tours, football and athletics can also be arranged.

CURRENCY: Finnish Mark (FIM).

ICEBREAKERS: Icebreaking work within the harbour area is carried out by privately-owned tugs.

During the Winter months, government ice-breakers are assigned to assist vessels from the open sea to the harbour area and vice versa.

POLLUTION: In the event of an oil spill or accident involving the risk of oil pollution, contact should be made immediately with the City of Helsinki Rescue Department, emergency Tel: 112, and with the Port Authority (Duty Officer) on Tel: 173-33-3280 (24 hours).

AUTHORITY: Port of Helsinki Authority, Olympiaranta 3, 00140 Helsinki. Mailing Address: P.O.Box 193, 00141 Helsinki. *Tel:* 358-0-173331. *Telex:* 124913. *FAX:* 358-0-17333232. *Contact:* Mr.Eljas Muurinen, Managing Director (*Tel:* 17333201.) Mr. Kari Wallin, Harbour Master (*Tel:* 17333270).

INKOO: 60.01 N. 23.55 E. **(See Plan)**

APPROACHES: Max. draft 13 m.
PILOTAGE: Pilot station is Porkkala Pilot Station. Pilotage service 24 hours a day, VHF watch on Channels 16 and 13, 24 hours a day. Notice must be given 2 hours before arrival at boarding place (Lat. 59° 54' N., Long. 24° 12' E.). Distance from boarding place to harbour area about 14 miles. Pilot may also be ordered by telephoning Helsinki 2984112.
MAX. SIZE: See "Berthing".
ANCHORAGES: 5 miles S.W. of Sommaroe Island.
TUGS: Tugs are available at any time, notice required is same as Pilot. If the vessel is over 200 m. LOA tug joins at Fageroe Island about 5 miles before harbour area, otherwise tugs join at the turning place 1 mile before harbour area. Tugs use ship's lines.
BERTHING: Max. draft 7.8 m.

Coal Quay: Length 175 m., 2 cranes, 10 tons and 6 tons by hook and half the capacity by grab.

Paper Quay: Length 140 m.

IVO Generation Services: Total length of quay 410 m. Max. draft 13 m. at the East part of the quay (240 m.), and max. draft 10 m. at the West part of the quay (170 m.). 4 cranes, 3 cranes capable of lifting 10 tons hook or 6 tons by grab and 1 crane capable of lifting 20 tons by hook or 12 tons by grab.
FRESH WATER: Available.
DENSITY: 1004.
REPAIRS: Possible.
TELEPHONES: Available.
AUTHORITY: Inkoo Shipping Oy AB, 10210 Inkoo, Finland. *Tel:* 358-0-2218121. *Telex:* 1418 Lkin Fi. *FAX:* 358-0-2218115. *Cables:* Elcoy. *Contact:* Mari Korhonen. Tom Bjorklof (After hours 358-49-475353). Tomas Damen (After hours 358-49-471053).

JAKOBSTAD (Pietarsaari): 63.42 N. 22.42 E. **(See Plan)**

DOCUMENTS:
International Measurement Certificate.
3 Manifests.
2 Bills of Lading of each consignment.
Customs Documents:
1 Crew List.
1 Special List (personal effects).
1 Provision List (ship's articles).
Important: If the vessel is calling at two or more Finnish ports, 2 of each of these lists are to be produced at the first port of call.
PILOTAGE: VHF Channel 16, MF 2182 kHz. Anchorage for vessel awaiting a Pilot: outside the lighthouse "Kallan". Pilot boat equipped with radar.
ANCHORAGES: On inner roads called "Ado Roads", depth 8 m.
MAX. SIZE: Max. draft in the inner harbour 9.0 m. No tide.
HEALTH: See "Oulu".
RADIO: Helsinki Radio Station. Gamlakarleby/Kokkola VHF Channels 16/28.
TUGS: Tugs (1,300 h.p.) are normally stationed in the harbour. Ship's lines to be used.
BERTHING: Southern Quay: Length 200 m., depth 7.4 m.
Old Quay: Length 180 m., depth 4.9 m. (inside), 6.0 m. (outside).
Busko Quay (Ro/Ro Berth): Length 160 m., depth 7.4 m.
Laucko Quay: Length 150 m., depth 9 m.
Elevator Quay: Depth 6 m.
CRANES: 3 Harbour cranes and 1 mobile crane.
STEVEDORES: 1st shift Monday to Saturday 0700 – 1600 hrs. (meal hours 1100 – 1200 hrs.); 2nd shift Monday to Friday 1600 – 2400 hrs. To commence loading at 0700 hrs. notice must be given latest at 1600 hrs. the day before, or before 1200 hrs. if commencing at 1600 hrs.
MEDICAL: Advance notice not required. All facilities available.
TANKERS: Vessel's draft must not exceed 9.0 m.
DENSITY: Fresh water.
FRESH WATER: From pipeline alongside quay.
FUEL: Light Fuel Oil and Heavy Fuel Oil available.
CONSULS:
Denmark. Tel: 7247456, 7232234.
Sweden. Tel: 7862102.
REPAIRS: All types of repairs possible.
GANGWAY/DECK WATCHMEN: Watchmen recommended.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Derat Certificate to be kept on board.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per 6 days for each crew member. Wine and/or Spirits: 1 bottle of each per 6 days for each man over 20 years of age.
REPATRIATION: Crew changes can be effected.
AIRPORT: Kronoby Airport about 30 km. from Jakobstad. 4 flights daily.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: 1st and 6th January; Good Friday; Easter Eve; Easter Monday; Labour Day (1st May); Ascension Day; Midsummer Eve; Whit Monday; 6th December (Independence Day); 25/26th December; All Saints' Day.
POLICE/AMBULANCE/FIRE: Police 10022; Ambulance and Fire 112.
TELEPHONES: Connection for telephone on board available.
IDENTIFICATION CARDS: Not needed.
AUTHORITY: Port of Pietarsaari Authority, FIN-68600 Pietarsaari, Finland. *Tel:* +358 (9) 67-7236128. *FAX:* +358 (9) 67-7230034. *Contact:* Hakan V. Sundqvist, Harbour Master.

KASKINEN (Kasko): 62.23 N. 21.13 E. **(See Plan)**

DOCUMENTS:
2 Crew Lists.
2 Customs Lists.
2 Passenger Lists.
Manifest, Bill of Lading, etc.
Between 1st December – 30th April (Winter) ice breaker available. The Finnish Ice Class Certificate, (required since 1984) can be obtained in Kaskinen.
PILOTAGE: Kaskinen Pilot boards 4–5 miles outside Pilot Station. Pilot boat or station can be called by VHF Channel 16 or 13. Tel: +358-62-2227296.
ANCHORAGES: Safe areas of anchorages, 3 miles W.S.W. of Salgrund, depths 10 m. – 20 m.
MAX. SIZE: Max. draft 8 m.
HEALTH: In case of sickness onboard, contact the Agent.
RADIO: Helsinki Radio.
RADAR/VHF: Radar service/VHF Channel 13 (Kaskinen Pilot).
TUGS: 1×1,015 kW. Tug available during Winter.
BERTHING:
Pier 250 m. length, 8.0 m. – 10.0 m. depth
Pier 35 m. length, 7.0 m. depth
Pier 160 m. length, 6.0 m. – 7.0 m. depth
CRANES: Mobile cranes with capacity 8 tons – 24 tons.
DENSITY: 1004.
STEVEDORES: Available; rates about 250 – 300 tons pulp per work gang.
MEDICAL: Hospital available.
FRESH WATER: Available at berths. Charge 15 Fmk. per ton.
FUEL: Available by tank truck.
CONSULS: None.
REPAIRS: Only small repairs.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes. Wine/Spirit: 1 bottle spirit.
AIRPORT: Distance to Vasa Airport 100 km. Served by regular airlines.
TIME: GMT plus 2 hours.
HOLIDAYS: See "Oulu".
POLICE/AMBULANCE/FIRE: Police 10022; Ambulance and Fire 112.
TELEPHONE: Can be connected. Cost for connection is 60 Fmk.
SHORE LEAVE: Allowed.
GARBAGE DISPOSAL: Drums available alongside. Charges: 0.12 Fmk./nrt. Minimum charge 145 Fmk, maximum charge 350 Fmk.
WASTE OIL DISPOSAL: Collection can abe arranged by tanker trucks. Contact Kasko Shipbroker Oy. Tel: +358-62-2227651. Telex: 73138 Kasko Sf. Fax: +358-62-28064.
SEAMAN'S CLUBS: None.
CURRENCY: Finnish Mark.
GENERAL: Port is open throughout Winter.
AUTHORITY: Kasko Hamnkontor (Harbour Office), 64260 Kaskinen, Finland. *Tel:* +358-62-2227201. *FAX:* +358-62-2227235. *Contact:* Jukka Inkio, Harbour Master.

KEMI (Ajos): 65.40 N. 24.31 E. **(See Plan)**

LOCATION: Ajos harbour is a municipal port owned and managed by the city of Kemi. It is located at Ajos, about 10 km. (6 nautical miles) South of Kemi, Lat. 65° 40' N., Long. 24° 31' E. The area is shown on Finnish Charts Number 275 and Number 59.
DOCUMENTS: Documents to be handed over after berthing:
2 Crew Lists.
1 Provision List.
1 Special List (Customs).
Tonnage Certificate.
Cargo Documents.
APPROACHES: The distance from Kemi lighthouse to the harbour is about 21 nautical miles (39 km.). The minimum width of the channel is 100 m. (328 ft.), and approved depth up to the oil harbour is 10 m. (32.8 ft.).

The water level varies between +1.5 m. and −0.75 m. (+5 ft. and −2.5 ft.) depending on winds (water level rises during Southerly and falls rapidly during Northerly winds). There are no tides in the area.

During normal winters the harbour is frozen from the beginning of December to the end of May. Over this period the channel from the open sea to the harbour area is kept navigable by state-owned ice-breakers. The Finnish Board of Navigation determines the restrictions and requirements for vessels allowed to enter the harbour during this period. The port has been kept open throughout the year since 1971.
PILOTAGE: Pilot boards from "Kemi I" Lighthouse or "Kemi 2" Lighthouse. VHF and radio telephone watch maintained.
RESTRICTIONS: Ships can enter and leave Ajos harbour 24 hours a day.

MAX. SIZE: Sea to Fairway at Ajos. Max. draft 10 m. Sea to Fairway at Veitsiluoto. Max. draft 7.1 m. Also see "Berthing".
RADIO: *Entering the Harbour:* Time passing Kiel/Holtenau/Copenhagen is to be given via Harnosand Radio, Mariehamn Radio or Stockholm Radio.

ETA to be given 12 hours before the calculated time of arrival.

Notice is to be given to the Pilot Station, which is situated at the S.W.-end of Ajos Island via VHF Channels 16/13 two hours before ETA at the pilot embarking point, which is between Kemi lighthouse and lighthouse Nukkujanmatala depending on the weather.

The notice is to include the name, call sign and the nationality of the vessel, n.r.t., the draft and length of the vessel, time of arrival (at the Pilot's boarding site) and tugs needed for berthing.
TUGS: Icebreaker tugs of 3,500 h.p. and 1,300 h.p. Ship's lines used.
BERTHING:

Quays:	*Length* (m.)	*Depth* (m.)	*Permitted draft* (m.)
Oil Quay	90	11.4	10
No. 1	420	7.3-8.3	7.6-10.0
No. 2	315	9.3	8.6
No. 3	185	5.8	5.0

2 Ro/Ro Berths	—	11.4 and 9.3	10.0 and 8.6

CRANES: Mobile cranes. 2×6 tons capacity; 2×55 tons capacity; 18×5 tons – 25 tons capacity.
FRESH WATER: Available at Quay Nos. 1 and 2.
FUEL: Available.
DENSITY: 1001.
AIRPORT: At Lautiosaari, Tel: 53519.
TIME: GMT plus 2 hours.
TELEPHONES: Lines on the quays at Berths No. 1 and 2 and the Ro/Ro Berth.
POLICE/AMBULANCE/FIRE: Police Tel: 112. First Aid Tel: 112.
GARBAGE DISPOSAL: Garbage disposal fee is collected from every ship, FIM 0.15/net reg.ton. Minimum fee FIM 180.0, maximum fee FIM 460.0/vessel.
WASTE OIL DISPOSAL: Waste oil disposal by tanker trucks. 6 hours advance notification to the ship's agent is required. Disposal costs are charged to the ship in accordance with current agreement.
Notice to Masters: Instructions concerning waste disposal.

Kemi Harbour Master informs you hereby that in Kemi harbours, the Rules and Regulations concerning the protection of the marine environment of the Baltic Sea Area as stated in the Helsinki Convention have to be followed by all vessels.

On the strength of this convention, no wastes shall be discharged into the water while the ship is in the port area. Violation of these rules cannot be accepted. The port staff will check that the instructions are followed without exception.

While your vessel is in the port a necessary amount of bags for your waste disposal will be delivered to the vessel. Your waste is to be stowed to these bags, and before departure, be moved by your crew to waste container on the quay in vessel's vicinity.

In case you want to get rid of oily residues, you are to inform Harbour staff directly or through your agent of your intention. Kemi City and Ekokem Oy have an agreement about taking care of oily residues. The costs hereby will be charged to the vessel in accordance with current agreement. The same applies to cargo or repair residues which need special treatment, i.e. oil drums, chemical wastes, etc.

All questions concerning waste disposal service will be answered by Kemi Harbour Office, Ajos. Tel: 282017.
SEAMAN'S CLUBS: Kemi Seaman's Mission. Tel: 9698-282074. Facilities: Canteen, souvenirs, telephone (international and local), T.V., radio, magazines, newspapers. Hours: Monday – Friday, 1800 – 2200.

Finnish Seaman's Service, Ajos Harbour. Tel: 282180. Hours: 0800 – 1500. Services: Sight-seeing tours, football, volleyball, swimming, transport for shopping tour.
CURRENCY: Finnish Mark.
AUTHORITY: Port of Kemi Authority, Ajoksentie, FIN-94900 Kemi, Finland. *Tel:* 358-698-282017. *FAX:* 358-698-282003. *Contact:* Captain Markku Toivonen, Harbour Master (Tel. 358-698-282017).

KOKKOLA (Yxpila): 63.50 N. 23.08 E. **(See Plan)**

DOCUMENTS:
2 Crew Lists.
2 Customs Lists.
2 Passenger Lists.
Manifest, Bill of Lading.
PILOTAGE: Pilot boards 2 miles North of Tankar Pilot Station. Pilot on VHF Channel 16. Distance to port 12 miles.

The vessel's ETA must be given at least 6 hours in advance of arrival to Pilot Station.
ANCHORAGES: 1 mile North of the breakwater.
RESTRICTIONS: *Winter Navigation:* The port is open throughout the year. Ice class restrictions apply in Winter.
MAX. SIZE: No restrictions except draft 11.0 m. Also see "Developments".
VHF: Vaasa Radio VHF Channel 28. Kokkola Harbour Office Channel 16.
TUGS: 2 tugs available, 2,460 h.p. and 1,500 h.p. Normally ship's lines used.
BERTHING:

	Length	*Max. draft*
Deep Quay	400 m.	11.0 m.
Shore Quay (South side)	323 m.	9.5 m.

RADIO: Kotka Radio call sign OHF.
VHF: See "Pilotage".
TUGS: Tugs normally join the vessel in the harbour entrance. Ship's lines are to be used. 3 tugs available, 4,000 h.p., 1,650 h.p., and 630 h.p.
CRANES: 26 shore cranes with capacity of 3-60 tons.
SPECIALISED CARGO-HANDLING FACILITIES: Hietanen Terminal, consisting of 4 Ro/Ro berths and 3 conventional berths and is equipped with 3 container cranes (1×37 tonnes, 1×50 tonnes and 1×40 tonnes).
Deep Water Terminal: The Main Quay of the Deep Water Terminal is for loading, unloading and intermediate storing of dry bulk goods, but the occasional handling of other goods is also possible.

The depth of the 590 m. long quay is 15.3 m. at the outer end for 415 m., and 13.5 m. at the inner end.

The quay has 1×8 tonne crane and 2×20/40 tonnes cranes, one of which has automatic container spreaders for 20 ft. and 40 ft. containers. The storage area extends over an area of 12 hectares, 2.5 hectares of which is used for short-term storing beside the quay.
MEDICAL: Master to advise by Radio Kotka on arrival if medical attendance required aboard.
TANKERS: *Deep Water Terminal:* Quay No. 1 – depth 13.5 m. Quay No. 2 – depth 10.0 m. The quays are equipped with hydraulic hose cranes.

There are 3 chemical terminals in the area, owned by Sonmarin Oy, Transkem Oy and Neftefinn Oy. These have a total of 46 tanks for various products. The total volume of the tanks is 160,000 cu.m.
Oil Harbour: South Quay – depth 10.0 m. North Quay – depth 9.0 m. Two companies, Transkem Oy and Sonmarin Oy, have their terminals in Oil Harbour, which serve mainly transit traffic. The total volume of the tanks in the area is approximately 400,000 cu.m. The Oil Harbour has a plant, owned by the Port Authority of Kotka, for receiving ballast water containing oil. The receiving pipe of the plant is at the Southern Quay. Also see "Notice".
DENSITY: 1003.
FRESH WATER: All berths are equipped with water pipelines, but in Sunila port only supplied by tugs.
FUEL: All grades of fuel available.
CONSULS:

Belgium	Tel. 195920	Iceland	Tel. 604447
Denmark	Tel. 2283300	Netherlands	Tel. 74951
Germany	Tel. 190111	Norway	Tel. 2295270
Great Britain	Tel. 2274281	Sweden	Tel. 190111

REPAIRS: All types of repairs can be carried out.
DRY DOCKS: Kotkan Telakka Oy: 3 floating docks. Docking dimensions for vessels:
Length 165 m., beam 28 m., draft 7.8 m./12,000 tons.
Length 127.2 m., beam 20.1 m., draft 6.8 m./5,000 tons.
Length 96 m., beam 16.5 m., draft 4.5 m./2,500 tons.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally by the crew.
SHIP CERTIFICATES: List of Certificates to be on board:
Passenger Ship Safety Certificate.
Cargo Ship Safety Construction Certificate.
Cargo Ship Safety Equipment Certificate.
Cargo Ship Safety Radio-telephony Certificate.
Cargo Ship Safety Radio-telegraphy Certificate.
Exemption Certificate.
Nuclear Passenger Ship Safety Certificate.
Nuclear Cargo Ship Safety Certificate.
Derat Certificate.
CUSTOMS ALLOWANCES: For passengers: Tobacco: 200 cigarettes or 0.2 lb. of other manufactured tobacco. Wine and Spirits: 1 litre.
REPATRIATION: Facilities exist.
AIRPORT: Nearest Helsinki-Vantaa, 140 km.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: New Year's Day (Jan. 1st); Epiphany (Jan. 6th); Movable Holidays; Easter Holiday, 4 days (Sunday included); Ascension Day, 1 day; Whitsunday, 2 days (Sunday included); Midsummer Day, 3 days (Sunday included); All Saints' Day, 1 day (first Saturday of Nov.); Christmas Holidays (Dec. 24th-26th). Other free days: May 1st; Dec. 6th (Independence Day). Cargo work can be done on all above holidays.
POLICE/AMBULANCE/FIRE: Police 10022; Ambulance 112; Fire 112.
TELEPHONES: On some berths telephones placed on board.
SERVICES: Compass adjusting service available.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: There are orange coloured garbage containers on the quays which can be used by paying a special Garbage Disposal Fee. More information is available from ship's agent.
WASTE OIL DISPOSAL: Bilge water collection is handled by Ekokem Oy, orders through the ship's agent. Oily ballast water is received in Oil Port. See "Tankers".
SEAMAN'S CLUBS: Seamen's Club, Kirkkokatu 18A, 48100 Kotka. Tel: 358-52-213093. Hours: 0800 – 2400. Facilities: Sauna, swimming pool, poolroom, table tennis, gym, T.V. room, snacks, magazines, newspapers.
CURRENCY: Local currency is Finnish Mark FIM. Money exchange possible in all banks.
DEVELOPMENTS: The second phase in the construction of infrastructure for the Deep Water Terminal will be carried out during 1996-1999. Like the first phase, this new extension will primarily serve transit traffic.

The second phase in the construction of the Kotka Deep Water Terminal will be carried out as dry work. This solution is mainly affected by the location of the site, general arrangements and the terrain.

The extension will mean the construction of a new basin with a total of 1,000 m. of quay with a depth of 13.5 m. The quay can later be extended by another 400 m. The ground work for these will be done during the dry work period, but the actual quay construction will be built as required by the increase in traffic. The present area of this port area is 62 hectares, and the extension of the second phase is approximately 40 hectares. The reserved areas allow an expansion of another 50 hectares later. The quay construction will comprise an edge wall fixed to the bedrock, and a support wall in deeper locations.

It is estimated that the work will take 3 years.

Also see "Plan".
NOTICE: Port Authority Notice to Masters.
Instructions Concerning Waste Disposal:

The Port Authority of Kotka informs you hereby that in the Port of Kotka the rules and regulations concerning the protection of the marine environment of the Baltic Sea Area as stated in the Helsinki Convention have to be followed by all ships.

On the strength of this convention no waste shall be discharged into the water while the ship is in the port area. Breaking of these rules cannot be accepted. The Port Authority will check that the instructions are observed without exception.

While your ship is in the port an amount of sacks for waste disposal will be delivered to the ship. The waste emanating from your ship shall be put into these sacks and before the departure of your ship the sacks shall be delivered *by your crew* to the waste container in the vicinity of the berth of your ship.

In case you want to get rid of oily residues please inform the Harbour Master either through your Agent or directly. For the reception of these wastes the Port Authority does not charge you separately as the cost of this service is included in the general waste disposal fee.

In case your ship is a tanker loading oil products and you wish to dispose of oily water such as tank washing water or ballast water it has to be agreed separately with the Port Authority.

All questions in connection with the waste disposal service will be answered by the Harbour Master (Tel: 2274283).

Signed: Port Director.
GENERAL: It is prohibited to let or throw any substance or refuse causing pollution or shoaling in the harbour area.
AUTHORITY: Port Authority of Kotka, Laivurinkatu 7, FIN-48100 Kotka 10, Finland. *Tel:* 358-52-2274280. *Telex:* 53144 Portk Sf. *FAX:* 358-52-181375. *Cables:* Port Authority of Kotka. *Contact:* Lassi Arminen, Port Director.

KOVERHAR: 59.52 N. 23.13 E.

DOCUMENTS:
Ship's Register.
Crew List.
Manifests.
Bills of Lading.
Provisions List.
Health Certificate.
PILOTAGE: Compulsory. There are 2 approaches: (1) Via Ajax, max. draft in fairway 33 ft. Pilot arrives from Pilot Station at Hanko. Distance to port 11 miles.

(2) Via Hanko, max. draft in fairway is 28 ft. Pilot arrives from Pilot Station at Hanko, Tulludden (Tel. Hanko 82246, radio-telephone, VHF). Station has radar. Distance to port 23 miles.
MAX. SIZE: Max. draft alongside quay 30 ft. Max. LOA 200 m. Max. breadth 30 m. No tide.
RADIO: Cable Agents giving ETA via Hanko and Helsinki Radio.
TUGS: Available, 1,800 h.p. – 3,000 h.p.
BERTHING: Length 250 m., depth 30 ft. Quay 6 ft. above sea level.
New berth, length 120 m., depth 30 ft. Quay 6 ft. above sea level.
CRANES: Two of 13 tons and one of 12.5 tons capacity.
STEVEDORES: Ordered by Agent.
FRESH WATER: Available rate 20 cu.m./hr.
REPAIRS: Small repairs possible.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per man.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
POLICE/AMBULANCE/FIRE: Police 002; Ambulance 000; Fire 000.

KRISTINESTAD: 62.16 N. 21.23 E.

DOCUMENTS:
Ship's Measurement Certificate.
2 Crew Lists.
Cargo Manifest.
Copy Bill of Lading.
2 Provision Lists and Tobacco Lists for Customs.
Ice Certificate.
PILOTAGE: Pilot boards at Hojerstein Light Buoy. At least 2 hours ETA required. Pilot boat has red painted hull, white marking "L" on bow, and deck house yellow. Pilot station situated South of Kasko (see Kasko Pilot), International pilot call signals to be used, also radio telephone 2182 and VHF Channel 16.
ANCHORAGES: Good safe holding ground off Adgrund. Depth 10 m.

MAX. SIZE: For general cargo and timber, 20 ft. draft in old port. For tankers, 33 ft. in the oil port. Depth at new coal harbour 40 ft. (12.0 m.).

See also "Tankers".

RADIO: Messages through coastal stations. Also Kristinestad VHF Channel 24. Also see "Pilotage".

TUGS: 1 tug available 240 h.p. Additional powerful tugs available with sufficient notice.

BERTHING: No special requirements. Pilot gives orders for berthing.

Inner Wooden Quay. Length 75 m., depth alongside 15 ft.

Outer Stone Quay. Length 250 m., depth alongside 20 ft.

There are 3 mobile cranes of 10 tons capacity.

SPECIALISED CARGO HANDLING FACILITIES: Bulk cargoes can be discharged at quay, 4 portable cranes available. There is 1 ramp for Ro/Ro ships in oil harbour at Bjorno.

New coal harbour at Bjorno Power Station, depth alongside 12 m. Berth is equipped with 1 conveyor for handling self-discharging vessels.

STEVEDORES: Advise ETA and gangs required as stipulated in charter-party. Also when laytime will commence to count. Only timber cargoes loaded.

Normal working hours 0700 – 1600 hrs. all weekdays.

DENSITY: 1004.

MEDICAL: Hospital facilities available.

TANKERS: Oil harbour at Pohjolan Voima Oy, power station at Bjorno. Depth 33 ft. (10 m.) alongside the oil pier. One berth for tankers. Discharge capacity with 2×10 in. pipelines 2,500 t.p.h. Fresh water supply to tankers available from shore installation rate 30 t.p.h.

FRESH WATER: Fresh water supply by shore installation. Any amount available.

FUEL: Fuel available by tank cars of about 20 tons capacity at short notice.

CONSULS: Danish, Tel: 962-12350.

REPAIRS: No shipyards, but welding pipeline electric repairs possible.

SURVEYORS: Surveyors and Cargo Inspectors available.

GANGWAY/DECK WATCHMEN: Not compulsory at Timber Pier. Compulsory in oil harbour, according to rules of Board of Navigation.

OPENING/CLOSING HATCHES: Normally carried out by crew, but on request may be handled by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes per 6 days, per man. Wine/Spirit allowance: 1 bottle per man.

CARGO GEAR: BOT Certificates. No additional requirements.

AIRPORT: Nearest airports in Vaasa and Pori within 100 km., several flights per day.

TIME: Local time GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: See "Oulu".

POLICE/AMBULANCE/FIRE: Police Station of Kristinestad 12055 or 002; Ambulance 11626; Fire Brigade 005.

EMERGENCY CO-ORDINATION CENTRE: Kummalgrund Coast Guard Station: Tel: 962-29142 (Kristinestad) or VHF Channel 16.

TELEPHONE: Public telephones on the pier.

STORING: Vessels may be stored by truck which may proceed alongside. No special Customs regulations in force. Riggers and fork lift trucks available.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Containers provided on quay. Contact agent for information.

WASTE OIL DISPOSAL: Ekokem Oy. Tel: 914-7151. Telex: 15305. Fax: 914-715300.

SEAMAN'S CLUBS: Available. Facilities: Shop, international telephone service, church services, football matches and postal facilities.

CURRENCY: Finnish Mark (FIM).

GENERAL: Timber pier in Port of Kristinestad closed from the end of December to the middle of April owing to ice. Oil port will be kept open according to the general ice situation of Gulf of Bothnia.

AUTHORITY: Kristinestad Harbour Office, 64100 Kristinestad, Finland. *Tel:* 962-2216291. *FAX:* 962-2212275. *Contact:* Sakari Laipio, Harbour Master.

LOVISA (Valkom): 60.25 N. 26.16 E. (See Plan)

APPROACHES: Depth in fairway (Orrengrund – Valko) – 8.5 m.

PILOTAGE: Pilot arrives from Pilot Station at Orrengrund (Tel. 358-52-213081, radio telephone). Station equipped with radar. Distance to port 12 miles.

TUGS: 1 tug available, 1,250 h.p., between December and April.

BERTHING: *Coal Quay:* Length 141 m., depth 8.5 m.

Middle Quay: Length 280 m., depth 7.30 m.

Connection Quay: Length 115 m., depth 7.30 m.

Roll-on/Roll-off Berth: Length 20 m., depth 7.30 m.

South Pier (East Side): Length 130 m., depth 8.50 m.

Inner Harbour: Length 80 m., depth 4.20 m.

CRANES: 6 mobile cranes, lifting capacity 6 – 36 tons. 2 shore cranes, lifting capacity 6 tons. 1 shore crane lifting capacity 6 – 28.5 tons.

DENSITY: 1003.

GARBAGE DISPOSAL: Garbage may be left any time in skips provided alongside. Charges: 0.16 FMK/NRT. Minimum charge 160 FMK/vessel, maximum charge 400 FMK/vessel.

WASTE OIL DISPOSAL: Collection service available. Contact: Ekokem Oy AB. Tel: 914-7151. Telex: 15305 SUOJE SF. Fax: 358-14-715300.

SEAMAN'S CLUBS: None.

CURRENCY: Finnish Mark.

AUTHORITY: Lovisa Port, 07910 Valkom, Finland. *Tel:* 358-15-515163. *FAX:* 358-15-515055. *Contact:* Harbour Master.

MARIEHAMN: 60.06 N. 19.56 E. (See Plan)

PORT LIMITS: The Southern boundary of the port is on a line between Lat. 60° 03.5' N., Long. 19° 56.1' E. and Lat. 60° 04.2' N., Long. 19° 55' E.

DOCUMENTS:

1 Crew List.

1 Passenger List.

3 Provision Lists.

2 Special Lists (in possession each crew member – cigarettes, tobacco, spirit, radios, etc.).

2 Bills of Lading.

Registered Tonnage Certificate.

PILOTAGE: Pilot arrives from station at Hamngatan 4, in Westerhamn harbour, and meets entering vessels about 2 nautical miles S.W. of Marhallan lighthouse. 24 hours and 6 hours notice of ETA is required. Pilot station and cutter are fitted with VHF radio and keep watch on Channel 16, 24 hours a day. Working Channel is 13. Pilot can also be ordered by cable via Mariehamn Radio.

ANCHORAGES: Good anchorages North of Grano Island in 10 m. to 20 m. water.

MAX. SIZE: Ships of 220 m. length and 8.2 m. draft can enter the port, but require twin screw and bow thruster for safe manoeuvring.

RADIO: Mariehamn Radio, call sign OHM on telegraphy and OFH for telephony. Connected to the public telegraph and telephone service.

VHF: Following stations keep watch on VHF Channel 16: Mariehamn Radio (working 7 and 25), Mariehamns Pilot, Mariehamns Hamn (Harbour Office – working 12), Sjobevakningen Mariehamn (working 10). (The Coast Guard at Mariehamn.)

TUGS: 1 tug of 320 h.p. available. The m/s *Gustaf Erikson* belongs to the Alands Lifeboat Society. Usually ships' lines are used.

BERTHING: *Quays for Passenger Vessels:*

Berth No.	*Length* (m.)	*Depth* (m.)	*Remarks*
1	100	7.6	
2	150	7.6	
3	190	7.7	Ro/Ro
4	120	7.8	Ro/Ro
5	140	7.7	Ro/Ro

Power Station Pier: Depth 5.0 m.

CRANES: 7 mobile cranes can be rented. Maximum lift, 2 cranes of 25 tons and 5 of 16 tons on the shortest radius.

SPECIALISED CARGO-HANDLING FACILITIES: 3 berths for Roll-on/Roll-off traffic, used by car ferries.

STEVEDORES: Ordered by Agents. ETA in good time to obtain gangs.

DENSITY: 1005.

TANKERS: Max. LOA 100 m. Depth alongside 6.0 m.

MEDICAL: All services available.

FRESH WATER: Most berths supplied by shore installations about 15 t.p.h., otherwise by truck.

FUEL: Only diesel oil, no heavy products.

CONSULS: Denmark 11 454, Netherlands 12 070, Iceland 21 849, Norway 12 050, Sweden 11 624, Russia 11 524, Germany 16 270. France 13 931

REPAIRS: Most repairs possible.

DRY DOCKS: Slipway for small vessels, max. about 300 d.w.t.-400 d.w.t.

SURVEYORS: No permanent surveyors at Mariehamn.

GANGWAY/DECK WATCHMEN: Available but not necessary.

OPENING/CLOSING HATCHES: Normally done by crew.

CERTIFICATES: International Tonnage Certificate or National Tonnage Certificate.

CUSTOMS ALLOWANCES: 200 cigarettes and limited amount spirits for each crew member.

REPATRIATION: Mariehamn is a good place for repatriation, with many connections to Sweden and to the Finnish mainland every day, with car-ferries and aeroplanes. About 1 million tourists visit Aland Island every year.

AIRPORT: About 5 km. from town, daily traffic to Stockholm and Abo/Turku.

TIME: GMT plus 2 hours. Summertime GMT plus 3 hours.

HOLIDAYS: See "Oulu".

POLICE/AMBULANCE/FIRE: Police 112 or 15 444; Ambulance and Fire 112.

TELEPHONES: Available at berths for passenger ships.

IDENTIFICATION CARDS: Not needed for Scandinavian citizens. Passports for all others.

AUTHORITY: Port of Mariehamn, Harbour Office, Box 5, 22101 Mariehamn, Finland. *Tel:* (9) 28-531470. *FAX:* (9) 28-531479. *Contact:* Jan Sundstrom, Port Director (After hours Tel: (9) 28-13626).

NAANTALI: 60.28 N. 22.01 E. (See Plan)

DOCUMENTS:

Health Certificate.

Crew List.

Passenger List.

Dangerous Cargo List.

Ship's Register.

PILOTAGE: Pilot compulsory at Uto Pilot Station. When approaching Uto communicate via VHF Channel 16 – ETA, name of vessel, destination, draft. Harbour Pilots available at the port. Distance Uto-Lohm – Naantali, 53 miles, depth 10.0 m. Uto-Houtskar-Naantali, 62 miles, depth 13.0 m.

ANCHORAGES: Good safe anchorage in harbour area. Max. draft for vessels 10 m. Anchorage for vessels with draft 13.0 m. at Airisto.

HEALTH: International Quarantine flag required in case of suspected disease or fever including preliminary report by VHF, otherwise ask Agent.
RADIO: Helsinki Radio.
VHF: Communication on Channel 16, own working Channel 11.
Radio Stations: Turku – Channel 2; Mariehamn – Channels 23 and 26; Uto – Channel 24 and Hanko – Channels 3, 25 and 26.
RADAR: When Radar Service needed, contact Agent.
TUGS: Harbour icebreaker tug available. Use ship's lines. Additional tugs on application from Turku.
BERTHING: No special requirements. Harbour/Drafts: No tide. Main quay, length 370 m., draft 13 m. Timber quay, length 110 m., draft 8.0 m. 2 car-ferry piers, length 85 m./172 m., drafts 8.4 m./6.9 m. Lubricating Oil pier/Car Ferry pier, length 90 m., draft 6.0 m. Sugar quay, length 32 m., draft 4.5 m.
CRANES: 2 cranes owned by electric powerplant of 6 tons each.
BULK CARGO FACILITIES: Grain handled by two pneumatic elevators and belt conveyor, Loading/Discharging 500 t.p.h., maximum reach for outlet/inlet 15 m. and 18.7 m., maximum height above quay level 9.0 m. and 16.0 m. when loading, discharging limits are 11.6 m. and 18.6 m., 200 m. of main quay intended to be for handling of grain, 170 m. for coal, which is handled by 2 cranes of 6 tons each and belt conveyor, discharging rate about 2,000 t.p.h.
SPECIALISED CARGO-HANDLING FACILITIES: Ro/Ro traffic possibility.
STEVEDORES: Available, ordered by Agent.
MEDICAL: Advise by radio prior arrival if medical attendance required aboard.
TANKERS: Oil Harbour, Neste Oy. Discharge lines ashore 10 in., 12 in., 18 in., Diameter of cargo hoses and respective depth of tanker berths:
Berth No. 1, 6 in., 5.7 m.
Berth No. 2, 10 in., 10.0 m.
Berth No. 3, 8 in., 10 in., 12 in., 13.0 m.
DENSITY: 1007.
FRESH WATER: Supplied by shore installations at most berths.
FUEL: All grades available.
FIRE PRECAUTIONS: Usual precautions.
CONSULS: In Turku 17 km. away.

DRY DOCKS: None, see Turku. Naantali shipyard owned by Turun Korjaustelakka Oy, Tel: (21) 638711, main dimension of dry dock 220 m. × 70 m., outfitting dock 180 m. × 125 m., sill depth 8.2 m.
SURVEYORS: Contact Agent.
GANGWAY/DECK WATCHMEN: Available. Tankers compulsory.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: 200 cigarettes/200 gm. tobacco and 1 bottle spirits/wine.
REPATRIATION: Good connections.
AIRPORT: 20 km. distant. Regular service.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: New Year's Day, Epiphany, Good Friday, Easter Monday, Labour Day, Whit Monday, Midsummer, All Saints' Day, Independence Day, (6th December), Christmas.
POLICE/AMBULANCE/FIRE: General alarm 112.
TELEPHONES: A telephone connection available at Main Quay and Quay No. 22.
SHORE LEAVE: No restrictions for crew members.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL/WASTE OIL DISPOSAL: *Regulations concerning Wastes from Vessels in the Port of Naantali:* The handling of vessel's waste is subject to such regulations as those embodied in the Convention on the Protection of the Marine Environment of the Baltic Sea Area 12/1980:
Regulations applying to the Treatment of Special Wastes:
Special wastes are raw mammal and bird, poultry, meat, raw offal, meat packaging materials and wrappings, and bones, brought by vessels arriving from a foreign port. Frozen raw meat is also included in this category.
In the case of an epidemic, a kind of waste not specifically mentioned above may be included under this heading.
Upon arrival at the port, vessels will be supplied with numbered special waste sacks (yellow), intended for the reception of all the special wastes carried by each vessel.
However, care must be taken to ensure that normal dry waste is not put into special waste sacks.
A vessel shall take the filled, sealed only to one of the special waste storage bins (yellow), bearing the same text as that appearing on the sacks.
Infringement of Regulations:
Should a vessel violate these regulations by, for example, leaving special wastes in storage bins intended fro dry wastes, the entire contents of the affected bin are required to be taken to the waste incineration plant for treatment, in which case the vessel/shippers shall bear the cost of the municipal health authority's order and the expenses entailed by this.
At 1991 rates, the incineration of one ton of waste cost FIM 6,000.
Regulations applying to Dry Wastes/Refuse:
Dry waste/refuse is taken to mean domestic type kitchen waste, excluding bottles, rubbish from packaging, cargo waste, etc.
Instruction for Treatment of Wastes:
Refuse sacks must not be jettisoned into the sea, but when full, should be taken to one of the special bins provided for the purpose on the quayside.
Additional refuse sacks may be obtained during normal office hours from the Port Traffic Department, Tel: 4351662.
Refuse, which cannot be transferred to sacks, should be disposed of in one of the bins provided for the reception of refuse sacks.
Regulations applying to Oil-Containing Mixtures:
An oil-containing mixture is, for instance, oily bilge waters and waste oil.
The emptying of oil-containing mixtures from vessels can be handled by a company which has a transport agreement with the Port Authority.
The Master or Agent of a vessel shall contact the Port Traffic Department, or the company having a transportation agreement with the Port Authority, at the latest 24 hours before such a facility is required.
Emptying is carried out during normal working hours.
The vessel/shipping company is responsible for the costs of receiving oil-containing mixtures.
Regulations applying to Sewage:
The Master or Agent of a vessel requiring a sewage removal service shall arrange for this service either through the Port Authority or by contacting the company carrying out such work.
Emptying will be carried out during normal working hours.
Wastes which are not handled by the Port of Naantali Wastes Facility:
Chemical wastes.
Tanker ballast waters and tank cleaning waters.
Wastes having IMO classification.
General Regulations:
A wastes handling fee will be levied in accordance with the current rates of all vessels making use of the Port Authority's wastes facility.
Those vessels which have made an agreement with the Port Authority respecting the waiving of the wastes facility fee are responsible for handling all their wastes themselves. This type of vessel may not forward or deliver any kind of waste to the port wastes facility.
Vessel wastes must be left in the bins provided for the purpose and nowhere else in the port. Bins intended for the reception of vessel wastes are indicated by a special sign.
The port wastes facility does not apply to vessels lying in the roads.
Further informations can be obtained from the Port Traffic Department, Tel: 751662.
SEAMAN'S CLUBS: None.
CURRENCY: Finnish Mark (FMK.). U.S.$ 1.00 = FMK.4.6438 (1.7.96).
REGULATIONS: Oil pollution strictly prohibited. Dumping of waste, refuse, etc., also prohibited.
DELAYS: Usually no delays.
AUTHORITY: Naantalin Satamalaitos, Satamatie 13, 21100 Naantali, Finland. *Tel:* (21) 4345111. *FAX:* (21) 4351727. *Contact:* Kari Rahsa, Port Director (Tel: 4345377).

OULU: 65.00 N. 25.25 E. (See Plan)

PORT LIMITS: The seaward boundary of the port is drawn West of Oulu Roads. The arriving vessel passing the line Hermanni Island – Kyrokari Ice Buoy is inside the boundaries and if necessary to anchor on the roads, is considered to be an "arrived vessel".
Port consists of four separate parts: Toppila, Nuottasaari, Oritkari and Vihreasaari harbours.
DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Customs Documents.
2 Crew Bond Declarations.
2 Ship's Bond-store Lists.
Derat Certificate.
4 Manifests.
2 Bills of Lading.
Ship's Register, Certificate of tonnage.
PILOTAGE: Vessel requiring Pilot applies from Marjaniemi. Pilot station, Lat. 65° 02' 4" N., Long. 24° 34' E., near West point of Hailuoto Island. Pilots require 12 hours' notice of ETA to Peltinmatala lightbuoy (Pilots) or to alternative position 3 miles North of Kelmi lightbuoy. Pilot boat red coloured displaying usual international pilot signs. Pilot station equipped with MF (2182) and VHF, listening on Channels 16 and 13, radar and RC. Morse signalling by light. No specific requirements on part of Pilots boarding, only safe pilot ladder according to rules. Anchorage near lightbuoy Peltinmatala, when awaiting for Pilot in fine weather; in bad weather advisable to ride against weather and wind. Pilot for Oulu can also be obtained near the "Kemi 1" light-tower. Vessels with a draft more than 8.0 m. can use both fairways, depth 10.0 m. Pilot either from Marjaniemi or "Kemi 1" Pilot Station, VHF Channels 16 and 13.
ANCHORAGES: Safe anchorage on Oulu roads. There are no safe anchorages West of Hailuoto Island.
RESTRICTIONS: Day and night service, no tides. Winter season, contact ice-breaker 24 hours in advance on MF (2182), or VHF Channels 16 and 6.
MAX. SIZE: *Marjaniemi Fairway:* 10.0 m.
Kemi Fairway: 10.0 m.
Toppila Harbour: Toppila Quay depth 6.1 m., Hietasaari Quay, depth 6.1 m.
Oritkari Harbour: Main Quay, depth 9.0 m. Stern Door Quay, depth 7.0 m. North Quay, depth 10.0 m.
Nuottasaari Harbour: Main Quay, depth 6.40 m. Chemical Quay, depth 7.50 m.
Vihreasaari Harbour: Oil Quay, length 72 m., depth 10.0 m. Bulk Quay, length 150 m., depth 10.0 m.
Also see "Berthing".

HEALTH: No special rules existing in obtaining pratique. If disease or fever is suspected on board report to ship's Agent; will contact the Health Authority for necessary arrangements.

RADIO: Helsinki Radio (North Quarken). Close to Hailuoto Island call "Helsinki Radio" VHF Channel 27 or Channel 24.

RADAR/VHF: At Marjaniemi Pilot station, radar range 30 miles. Contact on VHF (Channel 16). All ice-breakers keep watch on frequency 2182 and VHF (Channel 16).

TUGS: Tug optional, but for vessels over 140 m. long use is advisable. Tug ("Tuura", 3,600 h.p.) will meet on Oulu Roads according to agreement; customary to use ship's lines in open water and lines from tug during ice operations.

BERTHING: *Toppila Harbour:* Depth 5.0 – 6.1 m. Toppila Quay length 992 m. Hietasaari Quay length 600 m.

Nuottasaari Harbour: Main Quay, length 320 m. Chemical Quay, length 125 m.

Oritkari Harbour: Main Quay, length 270 m. Stern Door Quay, length 85 m. North Quay, length 170 m. Facility for Ro/Ro service.

Vihreasaari Harbour: Oil Quay, length 72 m. Bulk Quay, length 150 m.

CRANES:

	No.	Capacity (tons)	Reach of arm (m.)	Type
Nuottasaari Harbour	2	5 and 8	12	Movable
Toppila	2	3 and 5	12	"
Vihreasaari	1	6	22	"
Oritkari Harbour	1	50	36	Movable

CARGO HANDLING FACILITIES: Toppila Harbour is equipped with 2 cranes, Vihreasaari Harbour with 2 cranes, Nuottasaari Harbour with 1 crane to load and discharge bulk cargoes and general cargoes with hook and Oritkari Harbour is equipped with one crane to handle general cargoes with hook and containers with spreader. 10 mobile cranes available from stevedores in all ports.

2 Ro/Ro berths are adjacent to the Oritkari Harbour.

Oritkari Harbour is built to mechanically handle paper cargoes.

Free zone warehouse in Toppila (2,100 sq.m.) and free zone area in Oritkari (18,000 sq.m.). Warehouses in Toppila and Oritkari of 50,100 sq.m. There is a large amount of open storage in all harbours.

BRIDGES: No bridges.

STEVEDORES: 24 hours' notice of ETA to be given to Agent who arranges necessary gangs.

MEDICAL: Medical attention arranged through Agent, 2 – 4 hours' notice required. Good hospital facilities available.

TANKERS: One principal tanker berth in Vihreasaari Oil Harbour, depth 10.0 m. Discharge lines of 12, 14 and 18 in. Pressure 10 kg./sq.cm.

DENSITY: Fresh water.

FRESH WATER: Available at main berths and Oil Harbour from pipeline, cost about 17.00 Fmk/ton. Elsewhere water is delivered by boat, cost about 17.00 Fmk/ton plus standard charge.

FUEL: Small quantities of all grades available, delivered by lorries.

CONSULS: Sweden, Norway, Denmark, Netherlands and United Kingdom.

REPAIRS: Minor deck and engine repairs carried out. Docking only for small tug boats.

DRY DOCKS: One small slipway. Max. vessels of 25 m. length and 8 ft. draft.

GANGWAY/DECK WATCHMEN: Watchmen recommended.

OPENING/CLOSING HATCHES: Normally carried out by crew. Stevedores will do it by order of Master and will charge as shipwork.

CERTIFICATES:
- Nationality Certificate.
- Measuring Certificate.
- Load-line Certificate.
- Classification Certificate.
- Safety Equipment Certificate.
- Radio Safety Certificate.
- Derat Certificate.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 200 gm. pipe tobacco or equal amount of cigars allowed to each member of crew. Wine and/or Spirit: One bottle wine or spirit allowed for each member of the crew.

CARGO GEAR: Tested cargo gear to international safety regulations. Test certificates to be on board vessel.

REPATRIATION: Good facilities for effecting crew changes and to arrange necessary repatriation.

AIRPORT: Oulu Airport 15 km. from harbour served by regular airlines. 10 daily flights to Helsinki (worldwide connections) and 10 flights from Helsinki to Oulu with continuous connection to Kemi and Rovaniemi.

TIME: Local time GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: General holidays in Finland: New Year's Day (January 1st); Good Friday; Easter Monday; Labour Day (May 1st); Independence Day (December 6th); Christmas Day (December 25th); Boxing Day (December 26th).

POLICE/AMBULANCE/FIRE: Fire 112, Reserve 3112987; Ambulance 112, Reserve 3112987; Police 10022, Reserve 3112001.

TELEPHONES: A telephone connection available in all harbours.

SHIP SUPPLY SERVICE: English speaking Pilots keep watch round the clock at Oulu Pilot Station on VHF Channels 13 and 16. The have pilot boats for ship-to-shore transport in emergency cases. In other cases Oulu Harbour Radio keeps English speaking watch in office hours VHF Channels 13 and 16. At other times the Pilots help to translate messages to tugowners. Oulu Harbour and a few private Owners have tugboats for service around the clock. Helsinki Coastal Radio has watch around the clock on Channels 16 and 27. They can arrange a helicopter in emergency cases for service in whole Bay of Bothnia area.

SERVICES: Compass adjusters and ship's cleaning.

IDENTIFICATION CARDS: Not needed.

GARBAGE DISPOSAL: The garbage containers are placed on the quay at 200 m. intervals. The local agent makes contact with the collectors when required. The charge for every ship is 0.15 FMK/N.R.T., the minimum is FMK 150.00 and the maximum is FMK 380.00.

WASTE OIL DISPOSAL: The capacity for waste oil is 250 tons. There are many collecting companies. All collecting is by tanker trucks. Local agent orders the tanker truck when needed. The charge for truck is 270 FMK/hour and handling about 300 FMK/ton.

SEAMAN'S CLUBS: The Finnish Seamen's Mission operates in the Oritkari Harbour. They have telephone for visitors for calling home, postage facilities. The address of the Seamen's Mission is Merimieslahetys Jaasalontie, SF-90400 Oulu. The Harbour Office will help with arranging football matches between ships or clubs on shore. Harbour Office Tel: 358-8-344266.

CURRENCY: Finnish Mark (FMK).

U.S.$1.00 = FMK 4.53.
U.K.£1.00 = FMK 6.97.
French Franc 1.00 = FMK 0.89.
German Mark 1.00 = FMK 3.08.
(8.2.96).

DEVELOPMENTS: A new warehouse of 12,000 sq.m. will be available at Oritkari by 1997.

AUTHORITY: Port of Oulu Authority, Harbour Office of Oulu, P.O. Box 48, FIN-90501 Oulu, Finland. *Tel:* 358-8-344266. *Cables:* Satama. *FAX:* 358-8-344580. *Contact:* Kari Himanen, Port Director. Tel: 358-8-344266.

PARGAS: 60.18 N. 22.18 E. (See Plan)

DOCUMENTS:
- 3 Crew Lists.
- 2 Customs Provisions Lists.
- 2 Customs Special Lists.
- 2 Passenger Lists.
- 2 Copies each Bill of Lading.

Tonnage Certificate and in special instances other regular documents.

PILOTAGE: On arrival at Pargas, from Gulf of Finland, from Baltic via Uto, from Gulf of Bothnia via Enskar, information of ETA to be given in good time to respective Pilot Stations. VHF Channel 16 for calling, 13 for further communication. Charge for pilotage in accordance with official Finnish tariff. Harbour Pilot available, but not compulsory, and can be ordered through Sea Pilot.

ANCHORAGES: Well sheltered and safe anchorage, immediately outside harbour area.

MAX. SIZE: Maximum depth both in channel and along quay 6.70 m. As regards length of quay and possibilities for a quick dispatch, it is desirable (though not an absolute stipulation) that discharging vessel be a bulk carrier with the engines aft.

HEALTH: Free Pratique automatic for all vessels, but temporary exceptions in and according to regulations issued by WHO and Authorities may occur.

RADIO: Radio-telephone contact with Agent and consignee/shipper is obtained via Mariehamn, radio-call 2196 kHz, reply 1852 OHF; or via Hango, radio-call 1967 kHz, reply 2649 OFO. Contact with VHF is made via Abo, Channel 26.

TUGS: A small motor tug of 200 h.p. available.

BERTHING: Directions to berth via nearest Pilot Station. Quay level above water 1 – 2 m., dependent on berth.

Length of quays, 800 m. 2 electric coal-discharging bucket cranes and one electric conveyor belt.

STEVEDORES: Arrangements will be made by Agent, who must be advised of ETA previous day to enable arrange men, trucks, etc.

MEDICAL: Medical Officer available locally. Necessary examination and taking of tests usually done in Abo. Regular appointment with local physician can be arranged by telephone with Agent or doctor.

DENSITY: Brackish water 1002.

FRESH WATER: Delivery from installation on quay.

FUEL: No local supply. In case of need delivery by truck from Abo.

CONSULS: See "Turku".

REPAIRS: Facilities for arranging small repairs on deck and engine in Pargas, but usually carried out by reliable companies in Abo.

DRY DOCKS: No local docking facilities. See "Turku".

GANGWAY/DECK WATCHMEN: Available but not necessary.

OPENING/CLOSING HATCHES: Must always be performed by crew.

CERTIFICATES: Normally Tonnage Certificate only but in special instances other regular ship's documents may also be needed.

CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits. In accordance with the decision of Customs Authorities.

AIRPORT: Nearest airport in Abo. Distance about 25 km.

HOLIDAYS: Whit Monday, Midsummer (2 days), All Saints' Day, Independence Day (6th December), Christmas (25th December). Work in harbour carried out during these days only under very pressing circumstances.

POLICE/AMBULANCE/FIRE: Police 744048; Ambulance 744064; Fire 005; Life-saving Corps 356595.

TELEPHONE: No facilities for placing telephone on board. Telephone available on quayside.

SHORE LEAVE: No restrictions for crew members.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Garbage facilities on the quay alongside ship. Separate drums available for oil waste. For service Tel: 358-21-742216. Charges: 0.13 FIM/N.R.T. (Minimum charge 130 FIM, maximum charge 390 FIM).

WASTE OIL DISPOSAL: Waste oil collection capacity is 20 cu.m. This is included in the normal harbour charges. Charges as above. For service Tel: 358-21-742216.

SEAMAN'S CLUBS: None available.
DELAYS: Vessels dispatched in order of arrival. Usually no delays occur as work has generally been carried out within the time limit stipulated in C/P. Port activity aimed at good dispatch of vessels, and consequently work in 2 shifts has been arranged.
AUTHORITY: Partek Cement Ab., SF-21600 Pargas, Finland. *Tel:* 358-21-742277. *Telex:* 62220. *Cables:* Partek. *FAX:* 358-21-742148. *Contact:* Karl-Erik Lindholm, Port Director/General Manager.

PORI, (including Mantyluoto, Reposaari and Tahkoluoto): 61.36 N. 21.29 E. (See Plan)

PORT LIMITS: The line between the lighthouses on Mantyluoto and Reposaari.
DOCUMENTS:
Ship's Register.
Crew List.
Passenger List.
Customs Documents.
Manifests.
Bills of Lading.
PILOTAGE: Pilot compulsory. Cable address: Luotsiasema, Mantyluoto (Pilot Station Mantyluoto), VHF Channel 16 or frequency 2182. 24 hour service by pilot boats from Mantyluoto Pilot Station, boats red-painted, international light or sound signals. Pilot to be taken 4 miles off Mantyluoto. In heavy fog, if required, Pilot Station able to navigate vessels into harbour by radar, provided vessel has corresponding equipment.
ANCHORAGES: Reposaari Roads and outside the breakwater.
RESTRICTIONS: Depth in the channel 8.6 m.
MAX. SIZE: *Tahkoluoto Oil Harbour:* Max. draft: 10.0 m.
Tahkoluoto Bulk Harbour: Max. draft: 10.0 m. Length of the quay 145 m.
Deep Water Harbour: (Berth Nos. 23-24). Length of quay 450 m., max. draft 15.3 m.
Mantyluoto: Max. draft 10.0 m. Length of quay 2,418 m.
Reposaari: Max. draft 3.9 m.
RADIO: Inform Agents giving ETA via Helsinki Radio, Hanko Radio, or Mariehamn Radio, or VHF Channel 26, Pori.
TUGS: 5 tugs available from 200 h.p. up to 3,520 h.p. Tugs normally join the vessel near the quays. Tugs use ship's lines.
BERTHING:

Quay	*Quay Section*	*Depth of water (at normal water) (m.)*
Kivilaituri	1	6.3
	2	5.5
Betonilaiturin lansipaa	3, 4, 5	7.0

		2	20/40 tons

CARGO HANDLING FACILITIES: Four Ro/Ro berths (Berths No. 2, 18, 19 and 20)., 200 tons, 30 tons and 2×40 ton cranes able to handle containers.
Deep Water Harbour: Unloading capacity at new Deep Water Harbour is 1,000 t.p.h. – 1,400 t.p.h. by Siwertell travelling ship unloader and 2×40 ton cranes.
STEVEDORES: The vessels receive workers in the order in which they enter the harbour. ETA advices appreciated in order to facilitate arranging gangs.
MEDICAL: No advance notice for medical attention required. Hospital facilities available.
TANKERS: Berth No. 26. Depth 11.5 m. Max. draft 10.0 m.
DENSITY: 1004.5.
FRESH WATER: Supply by shore installation.
FUEL: All grades available.
CONSULS: Vice-Consuls: Britain, Tel: 939/823007; Denmark, Tel: 939/342111; France, Tel: 939/6333500; Italy, Tel: 939/823222; Netherlands, Tel: 939/341000; Norway, Tel: 939/823000; Spain, Tel: 939/6326162; Sweden, Tel: 939/823000.
REPAIRS: Most repairs possible.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: This work normally carried out by crew.
CERTIFICATES: Load Line Certificate; and during Winter season Ice Dues Certificate which issued by authorities for each season.
AIRPORT: Distance from airport 22 km. Served regularly by Finnair.
TIME: Local time 2 hours ahead of GMT. 3 hours ahead in Summer. (end March – end September.)
GENERAL: Harbour icebreaker "Porin Karhu", 3,500 h.p. available.
AUTHORITY: Port of Pori Authority, 28880 Pori, Finland. *Tel:* (35839) 6383700. *FAX:* (35839) 6383911. *Contact:* Simo Hermonen, Port Manager.

PORKKALA (Kantvik): 60.05 N. 24.23 E. (See Plan)

Documents and all general information, refer to "Helsinki".
APPROACHES: There are four official ship routes leading to the port of Porkkala (Kantvik) of Suomen Sokeri Osakeyhtio. The deepest one is 9.2 m. (30 ft.) and the shallowest one is 5.5 m. (18 ft.). The port does not have an ice-breaker of its own and the fairway is kept open by means of the State's ice-breakers.
PILOTAGE: A Pilot can be obtained from the Pilot Station of Porkkala, Tel. 90–2984 112 or VHF Channels 13 and 16. Distance to port about 14 miles. Pilotage in the harbour area may be carried out only by State-appointed Pilots. Pilotage in the harbour is not obligatory.
MAX. SIZE: Maximum draft 30 ft. 2 in. (9.2 m.).
CLEARANCE: The Customs formalities of the port are attended to by the Custom House of Inkoo.
TUGS: A tug is available.
BERTHING: The Port of Porkkala (Kantvik) is owned by Stromsby Invest and it is located at Kantvik. Directly in the vicinity of the port there is the factory of Suomen Sokeri Osakeyhtio (sugar mill). The port basin has 3 quays:
The outer quay is 110 m. long, draft 9.2 m. (30 ft. 2 in.).
The inner quay is 50 m. long, draft 5.3 m. (17 ft. 4 in.).
The fairway of the port basin is 120 m. wide, narrowing up at its end to 76.5 m. South quay (at the South bank of Kantvik Bay) is 60 m. long, draft 8.5 m. (27 ft. 7 in.).
DENSITY: 1004.
CRANES: Two cranes, capacity 8 tons. One crane is on the outer quay and one on the South quay.
FRESH WATER: Available at quays.
CONSULS: Nearest in Helsinki.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally by the crew.
AIRPORT: Nearest Helsinki, distance 45 km.
TIME: Local time is GMT plus 2 hrs. GMT plus 3 hours in Summer.
HOLIDAYS: On Saturdays, Sundays and General Holidays in Finland no cargo work is done.
POLICE/AMBULANCE/FIRE: Contact the Gatehouse of Factory.
TELEPHONES: Can be arranged on board. Telephone calls can be made from the Harbour Office during day-time.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not needed.

SHIPMASTER'S REPORT: The sugar discharging berth for Porkkala is at Kantvik, situated in Lat. 60° 05' N., Long. 24° 23.25' E., about 21 miles West of Helsinki.

The Pilot for the port is embarked at the position indicated on British Admiralty Chart No. 2331, 115°×3.5 miles from Porkkala Lighthouse. From there to the berth is 12 miles and the passage presents no difficulties. It is well lit, and there is ample water. The least depth recorded was 31 ft. and that was alongside the berth. There is a powerful tug for assisting in berthing and unberthing.

The discharging berth, alongside which vessels lie port side to, is modern and well fendered. It is sheltered from most directions. Unfortunately, the berth is short for a 500 ft. vessel, and additional moorings have to be placed from amidships.

There is only 1 crane on the berth and to work either of the end hatches a shift would be necessary. Work was continuous while the vessel discharged her part cargo at Kantvik, and an out-turn rate of 100 t.p.h. was achieved.

Fresh water is readily available from the Jetty, and presumably, fuel could be obtained from Helsinki. Telephones in the dock offices are available for official use.

There is a bus service to and from Helsinki, the journey taking about 40 minutes.

AUTHORITY: Finnsteve Oy AB, Sankonkuja 5, 00180 Helsinki, Finland. *Tel:* 0-2985166. *FAX:* 0-2985163. *Contact:* K. Alhojoki, Port Director.

PORVOO (Skoldvik): 60.18 N. 25.33 E. **(See Plan)**

The harbour is a private oil harbour owned and managed by Neste Oy.

The harbour is located at Skoldvik in the municipal area of Porvoo about 45 km. (28 miles) East of Helsinki, Lat. 60° 18' N., Long. 25° 33' E. The area is shown on Finnish Marine Chart Nos. 17 and 902.

The distance from the Kallbadagrund Lighthouse to the harbour is 20.5 nautical miles (38 km.). The minimum width of the harbour channel is 270 m. (885 ft.) and the approved depth is 15.3 m. (50 ft.).

The water level varies between +1.5 m. and −0.75 m. (+5 ft. and −2.5 ft.) depending on the wind. There are no tides in the area.

The Winter period is from January to the end of April. During this time the channel from the open sea to the harbour is kept open by icebreakers owned by the State. The Finnish Board of Navigation determines the requirements for vessels allowed to enter various ports during this period.

DOCUMENTS: The following documents shall be handed over after berthing:

4 Crew Lists.
2 Lists of Visitors.
3 Passenger Lists.
1 Provision List.
1 Special List (Customs).
Ship's Register.
Certificate of Tonnage.
Cargo Documents.

PILOTAGE: Pilotage is compulsory. The Pilots are Sea Pilots employed by the State. They also perform the pilotage inside the port area.

The Pilot Station is at the outer end of Emsalo Island. Vessels entering from the sea are boarded by the Pilot at Kallbadagrund, Lat. 59° 59.1' N., Long. 25° 36.1' E.

The Pilot shall be called by using the international code, VHF Channels are 13 and 16.

The Sea Pilots serve as Docking Masters berthing the vessel with the help of 2 tugs when the vessel is over 15,000 tons.

RESTRICTIONS: Vessels can enter and leave the harbour 24 hours a day. However, vessels whose keel clearance is minimal are not allowed to berth in darkness or under unfavourable wind conditions.

In Winter, port kept open by ice-breakers.

MAX. SIZE: Up to about 260,000 d.w.t. Max. draft 15.3 m.

HEALTH: Bill of Health not required. In case suspected disease or fever on board, radio Agent full details before arrival to advise Port Health Officer in advance.

RADIO: Notice of arrival shall be given 12 hours before the calculated time of arrival by the ship's Agent (Helsinki Radio). Two hours before arrival at the boarding site for the Pilot, the same notice shall be sent, including

(1) The name and the nationality of the vessel
(2) Nett registered tonnage
(3) The time and date of the notice
(4) The draft of the vessel
(5) Time of arrival at the boarding site for the Pilot.

VHF: The harbour office is open 24 hours a day. It is provided with the VHF station "Neste". The following Channels are available: 6, 9, 13, 15, 16, 17 and 21. Telex connection is 12467159.

TUGS: The harbour tugs "Esta" and "Esko" owned by Neste are available to handle vessels. Respective capacities are:
"Esta" 1,000 kW (1,330 h.p.) "Esko" 2,352 kW (3,200 h.p.)

Vessels over 80,000 d.w.t. need additional tugs, which the ship's Agent shall order from Helsinki.

The ship's own lines shall be used for towing.

Tug to stand-by whilst vessel discharging if vessel over 130,000 d.w.t.

BERTHING: There are 5 berths available for discharging crude oil and loading of oil products. 2 additional berths are available for handling of petrochemical products.

Loading and discharging is possible around the clock. During the icefree period all berths are surrounded by oil booms.

Berth 1:
Face direction 023° 42'
Water depth 12.6 m. (41 ft.)
Maximum vessel size about 50,000 d.w.t.

Berth 2:
Face direction 128° 42'
Water depth 17.6 m. (57 ft.)
Maximum vessel length 330 m. (1,082 ft.) without special permission
N.B.
Vessel to be moored starboard side alongside
Shore gangway
Maximum reach of loading arms +21.5 m. (+70 ft.) from sea level

Berth 3:
Face direction 128° 42'
Water depth 17.6 m. (57 ft.)
Maximum vessel length 280 m. (918 ft.)
N.B.
Vessel to be moored starboard side alongside
Shore gangway
Maximum reach of loading arms +19.5 m. (+64 ft.) from sea level

Berth 4:
Face direction 017° 56'
Water depth 15.3 m. (50 ft.)
Maximum vessel size about 150,000 d.w.t.

Berth 5:
Face direction 002° 58'
Water depth 8 m. (26 ft.)
Maximum vessel size about 8,000 d.w.t.

Berth 8:
Face direction 004° 42'
Water depth 13.5 m. (44 ft.)
Maximum vessel size about 40,000 d.w.t.

Berth 9:
Face direction 333° 18'
Water depth 7.3 m.
Maximum vessel size about 7,000 d.w.t.

The water depths correspond to the normal water level.

All loading arm flanges are ANSI 150 lb. RF. For tugs and cargo vessels there are separate berths in the harbour.

DISCHARGING/LOADING: The usual methods are applied in discharging and loading. While discharging and loading the safety rules for Neste tank vessels and oil harbours shall be followed.

Crude oil can be discharged simultaneously at a maximum of three berths. However, at Berths 2 and 3 only one ship at a time can be discharged because of a common pipeline.

Berth 8 is used for benzene loading, capacity 500 cu.m./hr. and propylene loading, capacity 400 cu.m./hr.

During cargo handling adequate crew shall be on board. A gangway watchman is not required.

Loading and Discharging Facilities:

Berth 1: Discharging rate 4,000 cu.m./hr., shore line 24 in. diameter, arms No. 12 and No. 13, 2×12 in. diameter.

Loading rate for heavy fuel oil 3,500 cu.m./hr., shore line 20 in. diameter, arms No. 12 and No. 13, 2×12 in. diameter.

Loading rate for diesel oil 2,000 cu.m./hr., shore line 14 in. diameter, arm No. 14, 1×12 in. diameter.

Loading rate for gasoline 2,000 cu.m./hr., arm No. 15, 1×12 in. diameter.

Loading rate for jet fuel 500 cu.m./hr., arm No. 16, 1×8 in. diameter.
Deballasting 1,000 cu.m./hr., arm No. 12, 1×12 in. diameter.
Bunkering rate 600 cu.m./hr., arm No. 11, 1×8 in. diameter.
All flanges ANSI 150 lb., RF.
LPG loading rate 80 cu.m./hr., hose 1×4 in. diameter, flanges ANSI 300 lb., RF.

Berth 2: Discharging rate 11,000 cu.m./hr., main shore line 40 in. diameter, arms No. 22, No. 23 and No. 24, 3×16 in. diameter.

Loading rate for heavy fuel oil 5,000 cu.m./hr., arm No. 22, 1×16 in. diameter.

Deballasting 1,000 cu.m./hr., arm No. 22, 1×16 in. diameter.
Bunkering rate 600 cu.m./hr., arm No. 21, 1×10 in. diameter.
All flanges ANSI 150 lb., RF.

Berth 3: Discharging rate 6,000 cu.m./hr., main shore line 40 in. diameter, arms No. 34 and No. 35, 2×12 in. diameter.

Loading rate for heavy fuel oil 5,000 cu.m./hr., arms No. 34 and No. 35, 2×12 in. diameter.

Loading rate for diesel oil 2,500 cu.m./hr., arm No. 33, 1×12 in. diameter.

Deballasting 1,000 cu.m./hr., arm No. 35, 1×12 in. diameter.
Bunkering rate 600 cu.m./hr., arm No. 37, 1×8 in. diameter.
All flanges ANSI 150 lb., RF.

Berth 4: Discharging rate 6,000 cu.m./hr., shore line 24 in. diameter, arms No. 42 and No. 43, 2×12 in. diameter.

Loading rate for heavy fuel oil 4,000 cu.m./hr., shore line 20 in. or 24 in. diameter, arms No. 42 and No. 43 or No. 43 and No. 44, 2×12 in. diameter.

Loading rate for diesel oil, cat cracked spirit and unleaded gasoline 2,000 cu.m./hr., arm No. 44, 1×12 in. diameter.

Loading rate for gasoline 2,000 cu.m./hr., arm No. 45, 1×12 in. diameter.

Loading rate for straight-run naphtha 1,500 cu.m./hr., arm No. 44, 1×12 in. diameter.

Loading rate for bitumen 1,000 cu.m./hr., arm No. 40 1×8 in. diameter.

Deballasting 1,000 cu.m./hr., arm No. 42 and No. 44, 2×12 in. diameter.

Bunkering rate 600 cu.m./hr., arm No. 41, 1×8 in. diameter.
All flanges ANSI 150 lb., RF.
Discharge rate for coal: 11,000 tons per 24 hours.

Berth 5: Discharging rate 1,000 cu.m./hr., arm No. 51, 1×8 in. diameter.

Loading rate for heavy fuel oil 1,000 cu.m./hr., arm No. 51, 1×8 in. diameter.

Loading rate for diesel oil 1,000 cu.m./hr., arm No. 52, 1×8 in. diameter.

Loading rate for gasoline 1,000 cu.m./hr., arm No. 53, 1×8 in. diameter.

Deballasting 1,000 cu.m./hr., arm No. 51, 1×8 in. diameter.

Bunkering rate for heavy fuel oil 600 cu.m./hr., arm No. 51, 1×8 in. diameter.

Bunkering rate for diesel oil 40 to 1,000 cu.m./hr., arm No. 52, 1×8 in. diameter and hose 1×2 in. diameter.

All flanges ANSI 150 lb., RF.

LPG loading rate 80 cu.m./hr., hose 1×4 in. diameter, flanges ANSI 300 lb., RF.

Berth 8: Loading rate for benzene 500 cu.m./hr., arm No. 81, 1×8 in. diameter.

Loading rate for phenol 100 cu.m./hr., hose 1×6 in. diameter.
Loading rate for propylene 400 cu.m./hr., hose 1×8 in. diameter.
Loading rate for oily water 100 cu.m./hr., hose 1×4 in. diameter
Loading rate for acetone 300 cu.m./hr., arm 1×8 in.
Flanges for propylene loading ANSI 300 lb., RF.
All other flanges ANSI 150 lb., RF.

Berth 9:

Discharging rates for:

Styrenemonomer	500 cu.m./hr.
Ortoksylene	500 cu.m./hr.
Hexanol	500 cu.m./hr.
Glykol	60 cu.m./hr.
Oktanol	500 cu.m./hr.
VCM	45-200 cu.m./hr.
Isobutene	270 cu.m./hr.
Ethylene	270 cu.m./hr.
Vinylasetate	200 cu.m./hr.
Alfol-610	500 cu.m./hr.
Butadiene (loading)	270 cu.m./hr.

BALLAST: There are facilities for discharging ballast at oil berths. However, discharging can be effected simultaneously only from 2 berths.

The capacity of the ballast handling system of the refinery is 30,000 cu.m. and the maximum discharging rate at each berth is 1,000 cu.m./hr. Ballast over 5,000 cu.m. must be reported 48 hours prior to arrival.

The harbour office collects a charge to cover treatment costs for receiving ballast.

Berth No. 8: Flushing water for the tanks can be discharged provided that the pollutants can be handled in the Neste waste water treatment system. In that case the capacity is 100 cu.m./hr.

MEDICAL: In emergency a doctor can be called on board. To call ambulance, dial 69-2222. The nearest hospitals are in Porvoo and in Helsinki. Ship's Agent helps in other medical problems, such as providing medicines.

DENSITY: 1006.

FRESH WATER: Drinking water can be supplied from:

Berths 1, 4 and 5	25 cu.m./hr.
Berths 2 and 3	50 cu.m./hr.(2 connections)
Berths 8 and 9	20 cu.m./hr.

FUEL: Bunkering facilities are installed at oil berths. Two grades are available, marine fuel oil and marine diesel oil.

The bunkering capacities:

Marine fuel oil	600 cu.m./hr.
Marine diesel oil	up to 1,000 cu.m./hr.

The diesel oil can be delivered through product lines. Bunkers must be ordered with 72 hours' notice addressed to Neste Marine Product Sales, Telex: Hki 12-4641.

Bunkering at Berths No. 8 and 9 is by truck only.

REPAIRS: Only minor repairs can be effected following the safety rules and with the permission of the harbour office.

GANGWAY/DECK WATCHMAN: Not required.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine or spirits for each man.

REPATRIATION: Disembarking is possible. A foreigner needs a passport. Distance to Porvoo is 20 km. (12.5 miles) and to Helsinki 45 km. (28 miles).

AIRPORT: There are daily flights from Helsinki – Vantaa Airport with good connections all over the world. Distance to the airport is about 50 km. (30 miles).

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

TELEPHONE NUMBERS: After berthing a telephone connected to the local automatic exchange will be placed on board all vessels, the respective dial numbers being:

Berth 1	23333
Berth 2	23334
Berth 3	23335
Berth 4	23336
Berth 5	23337
Berth 8	23341
Berth 9	(90) 224304

Important Numbers:

Harbour Office	23339 693115 and 693117
Customs	23293
"Esta"	23423 or 693134
"Esko"	23423 or 693134
Fire Alarm/ Ambulance	69-2222

Bus Connections, Taxi:

Bus connection daily to Porvoo from 0700 hrs. to 2300 hrs.

Taxi 24 hours

	Tel.
Neste Oy Taxi Station	23245
Pekema Oy Taxi Station	23390
K-O Johansson	22252

REGULATIONS: In addition to the existing Finnish laws, statutes and other regulations the Port Regulations of Neste Harbours must be followed.

Some excerpts:

Entering the Harbour: Vessels carrying explosives or flammable liquids or gases shall observe what has been separately laid down concerning such cargo. The vessel shall show the prescribed caution sign in the harbour area.

Traffic in the Port Area: In the port area the speed of the vessel shall be according to the circumstances, so that no harm or danger shall be caused to anyone. Oil booms, underwater jobsites etc. shall be passed with special care. The maximum speed allowed in the port area is 6 knots, unless otherwise stated by the Harbour Office.

Berthing of the Vessel: Without urgent need, anchorage is prohibited in the marked fairway, in the vicinity of the submarine pipelines or cables or in any place where the vessel may disturb the traffic.

The vessel shall be moored alongside the berth appointed by the Harbour Authorities and it shall not be removed without permission.

While berthing or unberthing or whilst moored at the berths the relevant safety precautions shall be taken to avoid any damage to the berths.

All ships' scuppers must be plugged or closed by mechanical means so that no water, steam or dirt comes into contact with the berth or its immediate vicinity.

A sufficient crew shall be maintained on board to ensure that the ship can be removed, if necessary.

Prevention of Shallowing and Contamination of the Harbour: In the port area it is prohibited to discharge oil or oil-emulsified water. In the Baltic Sea the existing restrictions must be observed.

The jettisoning of garbage and refuse is prohibited in the port area. The blowing of tubes and boilers of the ship while at the berth is prohibited.

GENERAL: *Inspections:*

To avoid oil accidents, an inspection based on the checking list is carried out before loading/discharging to find out the preparedness of the vessel to act in an emergency.

Vessels loading/discharging oil products are surrounded by oil booms. Inspections are carried out and loading/discharging is supervised by the Loading Master, whose instructions must be followed. If he is not on board, he can be contacted by telephone, No. 23339 or 693115 or 693117.

AUTHORITY: Neste Oy, Porvoo Works, Harbour Office, 06850 Kulloo, Finland. *Tel:* 693106. *Telex:* 12464159. *Contact:* Harbour Master.

RAAHE (Rautaruukki Oy): 64.41 N. 24.29 E. (See Plan)

PORT LIMITS: Vessel is considered to be an "arrived vessel" subject to Charter Party Terms, when passing breakwaters if not ordered to anchor near Raahe Lighthouse by Port Authority.

DOCUMENTS:

Crew Lists.
Passenger List.
Ship's Register.
Custom List.
Provisions List.

PILOTAGE: Compulsory. To avoid delay in obtaining a Pilot the Owners, Master or Agent of the ship bound for Raahe must report vessel's ETA 6 hours in advance of ETA. ETAs must be confirmed or corrected not less than 2 hours prior to ETA by VHF contact with Pilot Station on Channel 16. Departing vessels must also give 2 hours' notice.

Pilots board and disembark by pilot cutter (red) near Raahe Lighthouse (Lat. 64° 39' N., Long. 24° 13' 5" E.). Day and night service. Distance from lighthouse to port is 6 miles.

ANCHORAGES: Vessels can anchor outside Raahe Lighthouse, depth 15 m. – 20 m. No anchorages inside breakwaters.

RESTRICTIONS: No restrictions night entry.

MAX. SIZE: Max. sailing draft at MLW from Port of Rautaruuki Oy is 8.0 m.

RADIO: Helsinki Radio, 2182 kHz, call sign OHG, Mariehamn Radio, 2182 kHz, call sign OFH; Vaasa Radio VHF Channels 16, 24 and 27, call sign OFW.

RADAR/VHF: No port radar services. Pilot station. Radio, 2182 kHz, VHF Channel 16. Rautaruukki Oy Harbour Office, VHF Channel 16 and 9 (0600 hrs. – 2200 hrs.) and tugs on VHF Channel 16.

TUGS: 2 tugs, 600 h.p. and 1,500 h.p. Tug assistance not compulsory but recommended. Ship's lines used.

BERTHING:

Pier	*Berth* No.	*Length* (m.)	*Depth at MLW* (m.)
Import Pier	1,2,3	370	9.05 (280 m.) 7.40 (90 m.)
Export Pier	4,5	270	9.05 (180 m.) 7.40 (90 m.)
Oil Pier	6,7	200	9.05
Lapaluoto	8	100	8.0

STEVEDORES: Rautaruukki Oy, in Steelworks Harbour; August Lindberg Oy at Lapaluoto.

SPECIALISED CARGO – HANDLING FACILITIES: Lapaluoto Harbour, no shore cranes. Rautaruukki Oy Harbour, import quay equipped with 3×12.5 ton shore cranes and conveyor; export quay equipped with 1×12.5 ton and 1×40 ton shore crane, straddle carriers, forklifts, payloaders, lorries and equipment for handling steel, bulk and general goods.

LIFEBOAT STATION: Lifeboat cutter "Niilo Saarinen", 360 h.p., 10 knots. Radio 2182 kHz, VHF Channel 16, Radar, fire and suctionpump 4,000 litres/minute. Alarm through Helsinki Coastal Radio Station on 500 kHz, 2182 kHz and VHF Channels 16, 24 and 27. Raahe Pilot Station, Kalajoki Coast Guard Station and Rautaruukki Harbour office on VHF Channel 16.

DENSITY: Average density 1003.

FRESH WATER: Available at all berths in Rautaruukki's harbour.

FUEL: Small quantities available, one day's notice required.

FIRE PRECAUTIONS: No special precautions in Lapaluoto Harbour.

CONSULS:
Denmark 31146 – 37269
Norway 31146 – 37269
Sweden 37300 – 37007

REPAIRS: Mechanical workshops available. Slip for small ships.

DRY DOCKS: None.

SURVEYORS: Lloyd's and Norske Veritas.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally by the crew.

CUSTOMS ALLOWANCES: About 200 cigarettes and limited amount spirits per man.

REPATRIATION: Crew changes and repatriation can be carried out without difficulties.

AIRPORT: Oulu Airport, about 70 km. from Raahe.

TIME: Local time is GMT plus 2 hours. GMT plus 3 hours in Summer, (early April – late September).

HOLIDAYS: New Year's Day; Twelfth Night; Good Friday; Easter Monday; Labour Day (1st May) holiday when no work takes place; Ascension Day; Whitsun Monday; Midsummer Day; All Saints' Day; Independence Day (6th December); Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Police 10022; Ambulance; Fire and First Aid 112.

TELEPHONES: Telephones may be placed on board at a charge.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Collection is available. Containers for garbage are situated at 100 m. intervals on the quays. Charge 0.13 FIM/N.R.T. Minimum charge FIM 130, maximum charge FIM 500.
WASTE OIL DISPOSAL: Collection service for waste oil is available. Maximum quantity per vessel is 30 tons, as per Baltic Agreement. Orders via agent. Charges as per Tariff.
SEAMAN'S CLUBS: None.
CURRENCY: Local currency is FIM (Finnish Mark).
GENERAL: *Shipping Season:* Normal shipping season for non-ice strengthened vessels is May – December. During the rest of the year icebreaker assistance is normally necessary and given only to ice strengthened vessels.

Harbour basin stays free of ice throughout the year because of factory's warm cooling water.

The installations of the harbour are operated throughout the year.

Services: Lub. oil, drinking water, boiler water, provisions, stores, launches, facilities to receive garbage and oily water and minor repairs.

Consult Rautaruukki Oy Harbour Office for further information.

Litter: Littering is forbidden. In such cases, harbour authorities will activate the cleaning process and charge the ship for expenditure. All garbage must be sent ashore.

Spirits: Selling of alcohol on board a cargo vessel is forbidden by the law. Penalties in such cases are high.

Drunken workers will be relieved of their duties immediately.

Cameras: The steelworks area is private property. Photographing is forbidden in the whole area. Exceptions may only be made by the owner.

Safety: All necessary precautions must be taken for the safety of the workers.

A protective net must be placed under the gangway stretching about 2.0 m. over its lower part in order to prevent any falls.

Safety inspection is undertaken on ship's arrival by stevedores.

Visitors: Visitors will be allowed into the harbour area if they have a pass card signed by the ship's Master and the security service of the factory.
AUTHORITY: Rautaruukki Oy, Raahe Steel Works, Harbour Office, Box 93, 92101 Raahe, Finland. *Tel:* 358-82-221580. *Telex:* 32181 Steel SF. *FAX:* 358-82-2237155. *Cables:* Rautaruukki, Raahe. *Contact:* Captain R. Rahja, Port Captain. Tel: 982-302304.

RAUMA: 61.08 N. 21.30 E. (See Plan)

PORT LIMITS: Southern entrance port limit when passing Tankkarit, northern entrance port limit when passing Riskonpoella.
DOCUMENTS: 2 Crew Lists and 1 Passenger List. Ship's Register, Customs Documents, Ship's Papers, etc. (Ship's Agent will give the necessary advice).
PILOTAGE: Pilot station at Kylmapihlaja-island, Lat. 61° 08' 7" N., Long. 21° 18' 4" E. Pilot boards vessels East of Rauman Majakka light. International Pilot signals, VHF Channels 16 and 13. Fairways: Valkeakari 6.5 m.; deep passage 9.0 m.
ANCHORAGES: Ample area for anchorage in Archipelago.
RESTRICTIONS: Entrance: North Channel 7.2 m., South Channel 10.0 m., max. draft 10.0 m. Harbour open all year round.
MAX. SIZE: Draft limit only.
HEALTH: In the event of any suspect contagious disease ask for orders by wireless. Port Regulations do not allow such a ship to come alongside or closer than 350 yards. Pilot must not leave ship before allowed by the Doctor. Pilot does not board an infected ship but ship piloted to safe anchorage by pilot boat.
RADIO: Helsinki Radio, Hanko Radio, Mariehamn Radio and nearest station Vaasa Radio.
VHF: Vaasa VHF, intermittent watch on Channels 16, 26 and 28. Channel 16 used for calling Pilot, tug etc. Channels 13 and 12 for further operations.
RADAR: When required Pilot Station radar used for advising Pilot onboard.
TUGS: 3 ice-breaker tugs available (up to 3,500 b.h.p.) 24 hours per day. 2 hours' notice recommended.
BERTHING:

Quay	*Length* (m.)	*Depth Alongside* (m.)	*Remarks*
Petajas	320	11.5	Bulk Cargo
Hakuni	250	6.7 – 7.5	General Cargo
Central	410	6.7 – 7.3	General Cargo
Laitsaari	285	9.05	General Cargo
Suoja	110	5.7	General Cargo
Chemical I	100	5.5	Liquid Cargo
Chemical II	110	7.25	Liquid Cargo
Oil	125	9.15	Oil Carriers
Ro-Ro No.1	—	6.7 – 6.8	—
No.2	250	6.7 – 7.5	—
No.3	120	11.5	—
No.4	110	11.5	—
No.5	110	11.5	—
No.6	150	11.5	—

CRANES: 2×6 tons; 2 mobile cranes 15 – 42 tons available. 2 jib cranes of 40 tons for containers and 30 tons for bulk. 1 gantry crane, 50 tons.
STEVEDORES: 24 hours' notice to Agent recommended.
BULK CARGO FACILITIES: Part of Central Quay for bulk carriers, shore cranes, max. draft 7.0 m.

Petajas Quay for bulk carriers, max. draft 10.0 m. (depth alongside 11.5 m.).

Facilities for grain cargo (storage capacity 150,000 tons).
SPECIALISED CARGO-HANDLING FACILITIES: Containers can be handled by harbour cranes and mobile cranes.

Good berths for Roll-on/Roll-off traffic.

Different kinds of liquid chemicals can be handled in special berths.
MEDICAL: Advance notice recommended if possible. Hospital available.
TANKERS: See "Berthing".
Storage:

Oy Teboil Ab. 200,000 cu.m.
Rauma-Repola Oy. 280,000 cu.m.

Both storage facilities are underground.

Ballast: Facilities available for dirty ballast.
DENSITY: 1004 – 1003.
FRESH WATER: Fresh water available on any quay. Charges depending on amount taken. An extra fee is charged if tug is used.
FUEL: Fuel brought by tank-trucks.
CONSULS: Denmark, Norway and Sweden.
REPAIRS: All types available.
DRY DOCKS: Finnyards Ltd.: Dry dock 260 m. × 85 m. × 10.0/9.0 m. Movable electric cranes: 3×150 tons and 1×80 tons. Building slipways: 190 m.×31 m., 150 m.×32 m. and 160 m.×35 m.
SURVEYORS: SGS Inspection Services Oy. (chemical surveys). Tel: 358-2-241177. Fax: 358-2-222332.
GANGWAY/DECK WATCHMEN: Available if wanted. Watchmen supplied by private company.
OPENING/CLOSING HATCHES: Performed by ship's crew or by Stevedores at request of ship.
CUSTOMS ALLOWANCES: Tobacco: 6 day's ration (about 200 cigarettes or 200 gm. tobacco). Wine and/or Spirits: 1 opened bottle of wine or liquor, subject to Customs Regulations.
CARGO GEAR: At Central Quay and Petajas Quay shore gear available. Other quays mobile gear or ship's gear.
REPATRIATION: Repatriation and signing on or off.
AIRPORT: Pori Airport 50 km. away. Regular connections.
TIME: Local time is 2 hours ahead of Greenwich (Long. 30° E.). GMT plus 3 hours in Summer.
HOLIDAYS: See "Turku".
POLICE/AMBULANCE/FIRE: Public emergency (Ambulance, Police, and Fire alarm) 112, spare: 8220522, Police also 10022.
TELEPHONES: Oil quay, Laitsaari Quay and Iso-Hakuni Quay.
SERVICES: Compass adjusting facilities and compass adjusters.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Normally no identification card needed but Passport or Seaman's Book preferable.
GARBAGE DISPOSAL: Garbage disposal services are provided by the mooring men and their use is compulsory. Garbage bins for large amounts of rubbish are to be found on the quays and marked with "garbage".

Charge FIM 0.15/n.r.t., minimum charge FIM 160/vessel. Bins available throughout 24 hours.
WASTE OIL DISPOSAL: Oily ballast, tank washing water, bilge water. Operating companies: Call your Agent.
SEAMAN'S CLUBS: Seamen's Club is near Ro/Ro Berth No. 2. Tel: 358-2-8227308, open on workdays 1700 hrs. – 2100 hrs. and on Saturdays between 1400 hrs. – 1700 hrs. Following services available: Canteen, international telephone, reading room, information, billiards, etc.
CURRENCY: Finnish Mark (FIM). U.S.$ 1.00 = FIM 4.90 (May 1996).

No restrictions placed upon seafarers.
DELAYS: No delays in berthing, loading and discharging weather permitting.
DEVELOPMENTS: New warehouses and storage fields under construction.
AUTHORITY: Port of Rauma Authority, Hakunintie 19, 26100 Rauma, Finland. *Tel:* 358-2-83411. *FAX:* 358-2-8226369. *Contact:* Heikki Honkaheimo, Port Director.

SAIMAA CANAL AND PORTS IN LAKE AREA OF SAIMAA (See Plan)

APPROACH CHANNELS: The canal can be reached from the international waters of the Gulf of Finland through an approach channel South of Someri. The channel passes the Island of Vihrevoi and continues, at the Island of Malyj Vysotski, as the Vysotski-Viipuri Channel, from which the approach channel departs at a distance of 10 km. from Malyj Vysotski. The length of the approach channel from the point of departure to the Brusnitchnoe Lock is 14 km. The distance from the international water area to the Island of Vihrevoi is 94.5 km. and the length of the section Vihrevoi-Malyj Vysotski 12 km. The total length of the channel from the territorial waters of Russia to the Brusnitchnoe Lock is thus 131 km.

From the territorial waters of Finland the canal may be reached through the so-called coastal channel starting from the Finnish border at the island of Santio and joining the above sea channel at the Island of Vihrevoi. The length of the channel from the border to Vihrevoi is 49 km. and the overall length to the Brusnitchnoe Lock is 85.5 km. The channel and its refuge harbours have been marked on the Russian sea charts Nos. 1131 and 1132 and on Finnish charts Nos. 11 and 12. The coastal channel may also be used by vessels of other nationalities.

Canal: The length of the canal on the Finnish side of the border is 23.3 km. and that of the part on the Russian side 19.6 km. The overall length of the Saimaa Canal is thus 42.9 km. The average difference in the height between Lake Saimaa and the Gulf of Finland is 75.6 m. The canal has 8 locks, the heights of fall of which range between 5.54 m. and 12.69 m. Earth transports will use the 7 moving bascule bridges and the 6 stationary bridges across the canal.

NAVIGATION SEASON: The natural open water season of the Saimaa Canal lasts on average 211 days. Since most vessels navigating in the Canal have been strengthened and inspected for navigation in ice, a season of navigation of ten months has lately been reached, the season beginning in early April and ending in January.

The opening and closing of the season of navigation on the Canal is decided each year by the Finnish and Russian Saimaa Canal Delegates. The opening will be announced not later than 1 day before the opening day and the closing not later than 7 days before the closing day.

During the season of navigation the Saimaa Canal and the other deep channels are kept open 24 hours a day.

PILOTAGE: *Use of Pilot is compulsory in Russian territory:* Pilotage in the Russian water area is carried out by the Russian Pilot Service. Pilotage is needed when using the channel between Vihrevoi – Brusnitchnoe. All vessels must use Pilot on this channel section.

Pilotage on the Saimaa Canal: Pilotage on the section Brusnitchnoe – the lock of Malkia is carried out by canal pilots subordinated to the Inland Waterways District. All vessels, excluding small Finnish vessels less than 25 m. in length, shall use a Pilot when proceeding through the Canal. The Inland Waterways District may grant upon application to a Master of a vessel the right to navigate a certain vessel on the Canal without a Pilot provided that the Master of the vessel has passed an examination required for the purpose.

Pilot must be ordered 12 hours in advance of point of receipt of Pilot: In navigation from the Gulf of Finland the Pilot must be ordered from the Viipuri Section of Inflot 12 hours before the arrival at the Vihrevou Pilot Station. The order must be checked 4 hours before the start of the pilotage. To avoid excessive work by the Pilot Service and to eliminate delays special attention is to be paid to the accuracy of the time the pilotage is to be started, particularly in the last notifications.

In navigation from the Lake Saimaa the Pilot must be ordered from the Canal Office 6 hours before entrance into the Canal. The order must be checked two hours before the pilotage is to be started.

In navigation from the Gulf of Finland a Canal Pilot need not be ordered separately. Similarly, a Russian Pilot for the approach channel need not be ordered separately when the vessel proceeds from Lake Saimaa.

Pilotage in the water system of Saimaa: Pilotage in the water system of Saimaa is carried out by Pilots of the Inland Waterways District. The order for Pilots shall be made 6 hours before the start of the pilotage to the Pilot Stations of Lake Saimaa.

MAX. SIZE: The canal can be used by vessels with dimensions not exceeding the following:

Length	82.0 m.
Beam	12.2 m.
Draft	4.35 m.
Height of mast	24.5 m.

The draft of a vessel in tow, however, shall not exceed 4.5 m. For vessels larger than those mentioned above, a permit for navigation on the canal may be granted upon application to the Inland Waterways District.

The permit may contain regulations concerning the structure or equipment of the vessel or special provisions pertaining to navigation of the vessel on the canal such as good manoeuvrability, liability to wait or speed restrictions.

The Inland Waterways District may also grant a vessel or equipment with slightly larger dimensions, carrying exceptional cargo, a Trip Let Pass for one passage through the canal.

The Rules and Regulations for Traffic on the Saimaa Canal also contain more detailed directions – among others on the permissible dimensions of vessels in tow and timber rafts using the open canal sections.

NEW VESSELS: When designing new vessels, to be used also in traffic through the Saimaa Canal, the designers are advised to consult the main dimensions and the structure of the vessels with the Inland Waterways District. The conditions of navigation in the canal depend, first of all, on manoeuvrability, though certain other factors are also important.

MAXIMUM PERMISSIBLE SPEED AND TIME OF PASSAGE: The highest permissible speed on the actual channel of the Saimaa Canal is 9 km./hr. for vessels with a draft greater than 3.9 m. For vessels navigating on lesser drafts the speed is graduated within the limits of 9–15 km./hr. depending on the draft. In the lake parts of the Canal the highest permissible speed varies between 15–18 km./hr. depending on the size of the vessel. Detailed regulations available from the Canal Office. The time of passage through the part of the Canal provided with locks (mouth of the Canal on Lake Saimaa–Lock of Brusnitchnoe) is 5 – 8 hours depending on waiting time at locks caused by heavy traffic volumes, and on size of vessels.

SIGNS AND SIGNAL LIGHTS: The sign system of the approach channel of the Saimaa Canal, the canal and the channels on Lake Saimaa is adequate to ensure safe navigation throughout the day, also at night and in poor visibility.

The approach channel is provided with beacons, light buoys and signs in accordance with the Lateral System. The signs have been erected by Russian authorities. The illumination and the signalisation systems of the Saimaa Canal are based on the same principles with beacons and signs, but in the signal system of the canal, sign lanterns, signboards, line markers, water traffic signs and radar reflectors have been used. The colour of sign lanterns is orange on the West bank and green on the East bank of the canal. In marking of the lake channels of Saimaa according to the Cardinal and Lateral System, leading and warning lights, light buoys, range beacons, landmarks and signs have been used.

RADIO: There are two radiotelephone networks for marine use in the sphere of influence of the Saimaa Canal. On the frequency of 160 MHz reserved for actual marine radio communications there is also the Pilot radiotelephone network.

The Pilot radiotelephone network covers all stationary radiotelephone equipment at all locks, at Pilot Stations and in the Traffic Office at Mustola as well as portable radiotelephone apparatus used by canal Pilots. The radiotelephone equipment of the canal Pilots operate on Channel 11 of the international marine radio. The telephone of the Brusnitchnoe Lock and the Lock of Malkia and the radio telephone in the Traffic Office of the canal are also provided with a general calling and safety Channel 16.

When approaching from the sea the vessel makes a radio contact with the Brusnitchnoe Lock by using Channel 11. After this all radio communications required by navigation on the canal also use Channel 11. On Lake Saimaa, radio communications move over to Channel 13 on which the traffic office of the Saimaa Canal and the Pilot Station of Lauritsala are also able to operate.

BERTHING: *PORTS OF LAKE SAIMAA:*

Lappeenranta: Located at the Northern end of the Saimaa Canal. Authority: City of Lappeenranta Harbour Authority, Valtakatu 25, FIN-53100 Lappeenranta. Tel: +358-5-616-2575. Fax: +358-5-415-2387.

Port of Mustola: Located 1.0 km. from Mustola Lock to the South. Room for 7 ships; max. size of the Canal. Railway connection. Terminal stores of 28,000 sq.m., paved storage yard of 65,000 sq.m. and unpaved storage yard of 40,000 sq.m. Electricity, fresh water, services, etc., available.

Port of Rapasaari: Located 6 km. from the entrance of the Canal to the West. Room for one ship; max. size of the Canal. Railway connection. Paved storage yard of 3,000 sq.m. and unpaved storage yard of 3,000 sq.m. Pilotage distance from the Canal 6 miles. Mobile cranes.

Stevedores: Working hours (Monday to Friday) 0700 hrs. – 2300 hrs.

Port of Kaukas: Located 1.5 km. from the entrance of the Canal to the West.

Authority: Kaukas Oy, FIN-53200 Lappeenranta. Tel: +358-5-67-1411. Fax: +358-5-67-14263.

Room for 2 ships; max. size of the Canal. Pilotage distance from the Canal 3 miles.

Joutseno: Located 20 km. from the entrance of the Canal to the East.

Port of Honkalahti: Authority: Honkalahden Teollisuuslaituri Oy, c/o Oy Saimaa Terminals AB, Lastaajanvayla 1, FIN-53420 Lappeenranta. Tel: +358-5-612-5451. Fax: +358-5-612-5459.

Room for one ship; max. size of the Canal. Paved storage yard of 3,000 sq.m. Pilotage distance from the Canal 14 miles.

Port of Pulp: Authority: Yhtyneet Paperitehtaat Oy, Joutseno Pulp, FIN-54120 Pulp. Tel: +358-5-630711. Fax: +358-5-630-7403.

Room for one ship; max. size of the Canal. Paved storage yard of 9,000 sq.m. Pilotage distance from the Canal 13 miles. Mobile cranes.

Stevedores: Working hours (Monday to Friday) 0700 hrs. – 2300 hrs.

Imatra: Located 44 km. from the entrance of the Canal to the East.

Port of Vuoksi: Authority: Enso-Gutzeit Oy, FIN-55800 Imatra, c/o Oy Saimaa Terminals AB, Lastaajanvayla 1, FIN-53420 Lappeenranta. Tel: +358-5-612-5451. Fax: +358-5-612-5459.

Room for 3 ships; max. size of the Canal. Terminal stores of 37,000 sq.m. Paved storage yard of 30,000 sq.m. Railway connection. Fresh water, services, etc., available. Pilotage distance from the Canal 24 miles. Mobile cranes.

Stevedores: Working hours (Monday to Friday) 0700 hrs. – 2300 hrs.

Ristiina: Located 91 km. from the entrance of the Canal to Northwest.

Port of Ristiina: Authority: Schauman Wood Oy, Pellos Mills, FIN-52300 Ristiina. Tel: +358-15-740011. Fax: +358-15-740.

Room for one ship; max. size of the Canal. Paved storage yard of 5,000 sq.m. Pilotage distance from the Canal 49 miles. Mobile cranes.

Stevedores: Working hours (Monday to Friday) 0700 hrs. – 2300 hrs.

Savonlinna: Located 155 km. from the entrance of the Canal to the North.

Port of Savonlinna: Authority: The City of Savonlinna, Olavinkatu 40, FIN-57130 Savonlinna. Tel: +358-15-5711. Fax: +358-15-571-579.

Room for one ship; max. size of the Canal. Paved storage yard of 6,000 sq.m. and unpaved storage yard of 5,000 sq.m. Railway connection. Water, services, etc., available. Pilotage distance from the Canal 84 miles. Mobile cranes.

Stevedores: Working hours (Monday to Friday) 0700 hrs. – 2300 hrs.

Joensuu: Located 348 km. from the entrance of the Canal to the North.

Port of Joensuu: Authority: The City of Joensuu, Harbour Office, Ukonniemen Syvasatama, FIN-80220 Joensuu. Tel: +358-13-267-3545. Fax: +358-13-267-3548.

Room for 5 ships; max. size of the Canal. Terminal stores of 18,000 sq.m. Paved storage yard of 20,000 sq.m. and unpaved storage yard of 60,000 sq.m. Water, services, etc., available. Railway connection. Pilotage distance from the entrance of the Canal 166 miles. Mobile cranes.

Stevedores: Working hours (Monday to Friday) 0700 hrs. – 2300 hrs.

Kitee: Located 270 km. from the entrance of the Canal to the North.

Port of Puhos: Authority: Puhoksen Satama Oy, FIN-82430 Puhos. Tel: +358-13-421151. Fax: +358-13-4211195.

Room for one ship; max. size of the Canal. Terminal store of 3,200 sq.m. and paved storage yard of 5,000 sq.m. Water, services, etc., available. Pilotage distance from the Canal 147 miles. Mobile cranes.

Stevedores: Working hours (Monday to Friday) 0700 hrs. – 2300 hrs.

Varkaus: Located 221 km. from the entrance of the Canal to the North. Authority: City of Varkaus, Harbour Office, P.O.Box 208, FIN-78201 Varkaus. Tel: +358-17-579411. Fax: +358-17-5794641.

Port of Akonniemi: Room for 2 ships; max. size of the Canal. Railway connection. Paved storage yard of 4,000 sq.m. and unpaved storage yard of 5,600 sq.m. Water, services, etc., available. Pilotage distance from the entrance of the Canal 123 miles.

Port of Taipale: Room for 2 ships; max. size of the Canal. Terminal store of 600 sq.m. and paved storage yard of 3,000 sq.m. Water, services, etc., available. Pilotage distance from the Canal 125 miles.

Port of Kosulanniemi: Authority: Enso-Gutzeit Oy, P.O.Box 185, FIN-78261 Varkaus. Tel: +358-17-57711. Fax: +358-17-577-5812.

Room for 3 ships (one quay for raw timber); max. size of the Canal. Railway connection. Terminal store of 3,000 sq.m. and paved storage yard of 5,000 sq.m. Pilotage distance from the Canal 126 miles. Mobile cranes.

Stevedores: Working hours (Monday to Friday) 0700 hrs. – 2300 hrs.

Kuopio: Located 300 km. from the entrance of the Canal to the North. Authority: City of Kuopio, Harbour Office, Tulliportinkatu 52, FIN-70100 Kuopio. Tel: +358-17-185191. Fax: +358-17-185196.

Port of Kumpusalmi: Room for 3 ships (one quay for tankers); max. size of the Canal. Railway connection. Terminal store of 2,500 sq.m., sawn goods shed of 800 sq.m. Paved storage yard of 23,000 sq.m. and unpaved storage yard of 34,000 sq.m. Water, services, etc., availble. Pilotage distance from the Canal 168 miles. Mobile cranes.

Stevedores: Working hours (Monday to Friday) 0700 hrs. – 2300 hrs.

Port of Kelloniemi: Authority: Oy Esso AB, Kelloniemi, FIN-70460 Kuopio. Room for one tanker; max. size of the Canal.

Siilinjarvi: Located 333 km. from the entrance of the Canal to the North. Two small quays owned by Kemira Oy. Tel: +358-17-400111, Fax: +358-17-400218, and Oy Partek Industrials Minerals AB. Tel: +358-17-4643200. Fax: +358-17-4643162.

Ships can be max. size of the Canal, but draft can be 4.2 m.

TOLKKINEN (Tolkis): 60.20 N. 25.35 E.

APPROACHES: Max. draft of fairway from sea to roads 15.0 m., and from Roads to quay 7.0 m.
PILOTAGE: Pilot arrives from port station at Emsalo (tel. 915-542710). Station equipped with VHF, radiotelephone and radar. Pilot boards between Kalbadagrund and Porvoo Lighthouse. Pilotage distance to port 22 miles.
TUGS: Several tugs available from oil harbour.
BERTHING: Tolkis North Quay, depth 6.5 m. Tolkis South Quay, depth 5.2 m. Oil Harbour (See "Porvoo").
CRANES: Tolkis South Quay equipped with 1 movable crane. Lifting capacity 2.5 tons with grab and 5 tons with hook. Several mobile cranes up to 70 tons available for hire.
STEVEDORES: Working hours from 0700 – 1600 hrs. 3 gangs available Monday to Friday. On Saturday only 1 gang on overtime.
FRESH WATER: Fresh water available. Rate 8 t.p.h.
FUEL: Small quantity available by tank-car.
DENSITY: 1004.
GARBAGE DISPOSAL: Garbage containers are provided alongside the vessel.
WASTE OIL DISPOSAL: Possible by tanker trucks if ordered in advance through the Agent.
SEAMAN'S CLUBS: None.
CURRENCY: Finnish Mark.
AUTHORITY/AGENT: Oy Borga Stuveri Ab., P.O.Box 40, 06101 Borga, Finland. *Tel:* 915-577530. After office hours: *Tel:* 915-5243952. *Telex:* 1758 Clear sf. *FAX:* 915-577285. *Cables:* Stevedore. *Contact:* Captain Christer Lindstrom. (Car Telephone No. 949-555811).

TORNIO: 65.51 N. 24.09 E. (See Plan)

The harbour of Tornio in Roytta is situated about 6 miles S.W. of Tornio. The port is a public port.
DOCUMENTS:
2 Crew Lists.
2 Provisions Lists.
Passenger List.
One set of Bills of Lading, Ship's Papers, Health Documents.
PILOTAGE: Ajos Pilot Station VHF Channels 16 and 13. Pilot to be taken on board by lighthouse "Kemi 2" in position 65° 30.3' N., 24° 22.5' E., 10 miles from Ajos.
ANCHORAGES: See "Kemi".
MAX. SIZE: At same time there can be 2 vessels of 90 m. – 160 m. length, draft 8.0 m. alongside the main quay.
RADIO: Helsinki Radio/OHX or Harnosand Radio, Sweden/SAH.
TUGS: Tugs are only available during Winter. If they are needed in Summer, they can be ordered from Kemi (12 hours before arrival).
BERTHING: Depths alongside 7.10 m. – 8.00 m.
CRANES: 36 ton crane with container facilities; mobile crane of 200 tons; 5×80 tons and 5×40 tons quay cranes.
STEVEDORES: Ordered by Agent (Telex 35 – 12 Kandi Fi). Agent must be given 24 hours ETA. Normal working time 0700 – 1100 hrs., 1200 – 1600 hrs. and 1600 – 2400 hrs. (Two shifts).
DENSITY: Fresh water.
FRESH WATER: Available by pipeline.
FUEL: Ordinary fuel by lorries from Kemi.
CONSULS: Sweden Tel. (9) 698-433700.
REPAIRS: No docks but accommodation for small repairs.
OPENING/CLOSING HATCHES: By the ship's crew.
CUSTOMS ALLOWANCES: 1 litre spirits, 1 litre wine, 2 litres beer and 200 cigarettes.
AIRPORT: At Kemi, 20 km. from Tornio; served by Finnair.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
GARBAGE DISPOSAL: Normal garbage service available.
WASTE OIL DISPOSAL: Service available.
POLICE/AMBULANCE/FIRE: Tel: 112. Salvage Tel: (0) 16-82074.
AUTHORITY: Tornion Satamakonttori, City Hall, 95400 Tornio, Finland. *Tel:* (0) 16-447419. *FAX:* (0) 16-447436. *Contact:* M. Pajunen, Harbour Master.

TURKU (Abo): 60.27 N. 22.15 E. (See Plan)

DOCUMENTS: See "Oulu".
PILOTAGE: Telegram to Agent with 24 hours ETA to sea Pilot Station.
There are 4 entrances:
Uto: Fairway 10 m., Radio Beacon, VHF, coastal radar, telephone via Hanko or Mariehamn Radio. A 13.0 m. channel is to be established between Uto and Turku.
Nyhamn: 8.2 m. on Rodhamn, radio beacon.
Isokari-Enskar: 7.1 m., radio beacon, VHF radio.
Hanko: 7.3 m., radio beacon, telephone via Hanko Radio.
Lighthouse and Pilot at each.
All fairways sheltered. No tide. Channel to main harbour 10 m.
When approaching port ETA by VHF to Port Information Centre, international VHF Channel 12 for Harbour Pilot. Cutter whilst in action, same Channel, but takes orders from Port Traffic Control Centre only. Pilot cutters painted red with white circular field marked "L" on the bows. Flying flag in daylight, showing red and white lights vertically at night. Coming out when required to Pilot Station 0.75 miles from Main Harbour.
All ships arriving from sea will get necessary information from Sea Pilot, whose service is compulsory. Harbour Pilot not compulsory.
ANCHORAGES: Outer anchorage at Bay of Airisto, 2 miles from Port, 15 m. – 18 m.
MAX. SIZE: Maximum draft in Commercial Harbour 11.0 m. fresh water. In Oil Harbour 9.0 m. in fresh water. Max. length 230 m. and breadth of minor importance. No tides.
HEALTH: International Quarantine flag required in case of suspected disease or fever including preliminary report by VHF, otherwise, ask Agent.
RADIO: Hanko Radio and Mariehamn Radio. In addition these have telephone and VHF service. Local telephone network on VHF, Mariehamn on Channels 26 or 23 and Hanko on Channel 2.
TUGS: Advisable to apply for tugs in advance. 6 tugs available.
BERTHING: Priority given to arriving and departing passenger ships on regular lines. 11 Roll-on/Roll-off berths. One berth for train ferry.
Total length of quays 5,145 m.
Berth depths 6.5 m. – 11.0 m.
The container terminal in West Harbour, quay length 500 m.
CRANES:

No.	*Capacity* (tons)	*Type*
9	5	Movable
9	6	Movable
1	60	Movable
1	40	Multipurpose, movable.

STEVEDORES: Agent should be well informed about ETA and Master's Requirements. Normal working hours: 0630 – 1030, 1100 – 1500, 1500 – 2300. Saturdays and days preceding public holidays 0700 – 1530 hrs. The Port Office: 0900–1700 hrs. Saturdays and days preceding public holidays closed.
MEDICAL: All medical and hospital facilities available. No special requirements regarding inoculations, etc.
TANKERS: No special requirements. Small slop discharge facilities. 1 berth, depth 9.0 m. for larger ships.
DENSITY: 1004.
FRESH WATER: From pipelines along berths. Approx. 12.00 fim. per ton.
FUEL: Most grades available. No advance notice necessary if from motor vehicles. In case of greater quantities, from Oil Harbour only. This requires advance notice to Agent.
CONSULS: The following countries are represented by Consuls or Vice-Consuls in Turku: Austria, Belgium, Denmark, France, Germany, Great Britain, Greece, Honduras, Iceland, Italy, Norway, Portugal, Russia, Spain, and Sweden.
REPAIRS: All types of repairs possible.
DRY DOCKS: Graving dock: Length 183 m.×25.6 m.×8.3 m.
Floating dock: 155 m.×23.5 m.×7.0 m. with lifting capacity of 8,500 tons. Owner: Turku Repair Yard Ltd. Tel: (21) 638711. Telex: 62484 Try SF. Fax: (21) 6387250.
GANGWAY/DECK WATCHMEN: Gangways to be rigged out so that they do not obstruct quay crane movements. Watchmen customary, but not necessarily hired.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
REPATRIATION: Good connections everywhere.
AIRPORT: 10 km. from port, regular lines.
TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Bank Holiday; May 1st; Midsummer Day; All Saints' Day; Independence Day (December 6th); Christmas Day; (December 25th); Boxing Day (December 26th).
POLICE/AMBULANCE/FIRE: Dial 112.
TELEPHONES: Ships' telephones available.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Service available. Charges: Minimum U.S.$ 32.50 – maximum U.S.$ 78.50, or U.S.$ 0.04 per net register ton.
WASTE OIL DISPOSAL: All Finnish ports have a special agreement with Ekokem Oy for waste oil disposal or similar service. Charges as per Ekokem Tariff.
SEAMAN'S CLUBS: Finnish Seaman's Service. Tel: 21-304995.
CURRENCY: Finnish Mark.
GENERAL: Ice-breakers maintain Winter traffic.
DEVELOPMENTS: New container crane will be available December 1996.
AUTHORITY: Port of Turku Authority, Linnankatu 90, FIN-20100 Turku, Finland. *Tel:* 358-21-267411. *Teletex:* 244-1021502 tuport. *FAX:* 358-21-2674125. *Contact:* Captain Tom Joutsia, Harbour Master.

UUSIKAUPUNKI: 60.48 N. 21.24 E.

DOCUMENTS:
Agent will prepare during clearance:
2 Ship's Report.
1 Declaration List, Arrival (Board of Navigation).
1 Declaration List, Departure (Board of Navigation).
To be prepared before Arrival:
2 Provision Lists (own provision of the ship).
2 Special Lists (must be signed by each member of the crew).
2 Crew Lists.
Bill of Admeasurement.
Certificate of Registry.
Ice-class Certificate (during Winter, 1st December – 30th April, issued by hull surveyor).
Bill of Lights (issued by Customs).
APPROACHES: 3 fairways lead to harbour through sheltering archipelago; Uto-Uusikaupunki, 78 miles; Isokari-Uusikaupunki, 13 miles; Kylmapihlaja-Uusikaupunki, 24 miles.

Good sheltered anchorage in the roads. Depth of fairways 10.0 m.
PILOTAGE: Embark Pilot at Isokari or Uto Pilot Stations. Distance through archipelago Isokari-Uusikaupunki 13 miles, Uto-Uusikaupunki 78 miles. Under normal circumstances first fairway recommended. During Winter months, if ice-situation difficult in Gulf of Bothnia, traffic goes via Uto.

Both Pilot Stations equipped with radio 2182 kHz, Channels 16 and 24, VHF duplex-Channels 18, 20 or 22 and radar. Pilot-boat red, with letter "L" and fitted with VHF Channels 13 and 16. Pilot boards usually between Sandback-Isokari, to where "Hauteri" light leads in line 134.5° – 314.5° (T). Notice of ETA at least 4 hours prior reaching station.
ANCHORAGES: Many areas of safe anchorages in Archipelago. Pilot advises.
RESTRICTIONS: No entry restrictions. No tide. During North and East winds sea-level can fall about 40 cm. below normal, which may sometimes delay deep loaded vessels reaching port.
HEALTH: Pratique not necessary. In the event of any disease/fever on board or in last port of departure, vessel has to inform before arrival, hoist quarantine-flags, or in darkness 2 lights, red light above white, showing all round horizon.
RADIO: Mariehamn Radio OFH; Helsinki Radio OHG.
TUGS: 2 available; normally tugs join vessel at port, ship's lines used.
BERTHING: *Kemira Quay:* 340 m. long, owned by fertiliser factory Kemira Oy, has depth 10 m. alongside, two 8 ton cranes, two discharging pipes, one for discharging ammonia at minus 32°C and one for sulphur acid. Discharging capacity depending material 140-170 tons/hour/crane and loading/discharging bags 45-50 tons/hour/crane.

Esso Quay: 40 m. long, owned by Oy Esso AB, depth in channel and alongside 5 m. Terminal is used for discharging LP gas.

Telakka Quay: 140 m. long, owned by Uudenkaupungin Telakka Oy, has depth alongside 5 m. There is also a floating dock with 5,000 ton capacity.

Hepokari Pier: 80 m. long and 18 m. breadth, owned by town. Channel and alongside depth 7 m. There is terminal on South side for Ro-Ro traffic.
STEVEDORES: Available. Contact Agent.
MEDICAL: Hospital facilities, vaccination, certificates, etc., available. Contact Agent.
TANKERS: For discharging and loading liquid ammonia – Marine Loading arm "Luceat/Chicksan, Type RCMA" 8 in., ASA 300.
DENSITY: No tide, density 1004.
FRESH WATER: Water-hoses, about 20 t.p.h.
FUEL: Fuel available, contact Agent.
CONSULS: None.
REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: Uudenkaupungin Telakka Oy has a floating dock, lifting power 5,000 tons, draft 6.1 m., breadth 19.6 m., and length 130 m.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: All certificates according to International Convention for the Safety of Life at Sea, Class Certificate, etc.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per each member of the crew. Wine and/or Spirit: 1 bottle wine or spirit per each member of the crew.
CARGO GEAR: No additional requirements.
REPATRIATION: Facilities exist for effecting crew changes and arranging any necessary repatriations.
AIRPORT: Distance to Turku Airport about 90 km. Airport is served by regular Airlines.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: Official Holidays are: New Year's Day (January 1st); May 1st; Midsummer Day (Saturday between June 20th and June 26th); Independence Day (December 6th). Usually no work on those days.
POLICE/AMBULANCE/FIRE: Police 10022; Ambulance 112; Fire 112.
TELEPHONES: Available.
SHORE LEAVE: Crew members are allowed ashore.
IDENTIFICATION CARDS: Not needed.
AUTHORITY: Uusikaupunki Harbour Office, Satamantie 9, FIN-23500 Uusikaupunki, Finland. *Tel:* +358 (2) 84515299. *FAX:* 358 (2) 84515294. *Contact:* Esa Soini, Acting Harbour Master.

VAASA: 63.06 N. 21.36 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
2 Customs Documents.
2 Health Documents.
5 Manifests.
5 Bills of Lading.
PILOTAGE: Pilot vessel not cruising in open sea. Pilot meets vessels at boarding ground (63° 09.8' N., 20° 45.0' E.).

Pilot signals: Letter "G" as flag, light or sound. Radio telephone call: Pilots watching 24 hours on VHF Channels 16 and 13.

Pilot vessel: 30 ft. motor yacht with wheelhouse and radar. Hull red all over with letter "L" painted on bow.

Harbour Pilot available from Vaasa Pilot Station Tel. 527725.
ANCHORAGES: To Pilot's advice.
RESTRICTIONS: No locks. Fairway lit all the way. Depth of Channel 9.0 m.

No tide, but water level may be reduced by up to 30 cm. in Spring and early Summer, or increased by 30 cm. in Autumn.
MAX. SIZE: Depth alongside piers up to 9.0 m. At the Oil Harbour, max. recommended LOA is 185 m., depth 9.0 m.
HEALTH: See "Documents" – no restrictions. Hospital and Doctor for any purpose available.
RADIO: Helsinki Radio – 2803 kHz.
RADAR/VHF: No radar service in port area. Pilot vessels at sea Pilot Stations equipped with radar. VHF radios on Pilot Stations, harbour tug-boat and Harbour Office. Channels 16, 13 and 12.
TUGS: Harbour tug boat and icebreaker "Hercules" 1,200 h.p., 750 kW. available 24 hours. Radio telephone/VHF available. Charge according to size.
BERTHING: 2 piers of 180 m. length and the Reins Quay of 240 m. length. Depth 5.0 m. to 9.0 m. New Coal Quay length 145.9 m., depth 9.0 m. There are 3×5 ton cranes on the South Pier.

The Ferry Pier, 130 m. and 145 m. length, depth alongside 5.5 m. – 6.5 m. with berths for Ro/Ro traffic (4 Ro/Ro ramps).
CRANES: 3×5 tons and mobile cranes up to 200 tons.
STEVEDORES: ETA as usual according to C/P to Agent, etc.
MEDICAL: If serious illness advance notice to Agent necessary.
TANKERS: The Oil Harbour is at Vasklot. Depth alongside 9.0 m. Tankers discharge through three arms of 500 mm. and 400 mm. diameter. Storage capacity 500,000 cu.m.
DENSITY: 1004-1006. No tide.
FRESH WATER: Available, no limit. Direct from quay-side, through pipes, rate about 25 t.p.h.
FUEL: All grades of bunker fuel available – direct from oil jetty or by lorries to berth.
FIRE PRECAUTIONS: Dry cargo ships; no smoking in holds. Tankers: usual restrictions. Tankers with petrol cargo not allowed to berth at dry cargo piers.
CONSULS:
Belgium
Denmark
France
Iceland
Netherlands
Norway
Sweden
United Kingdom
REPAIRS: Nearest dry dock at Rauma.
GANGWAY/DECK WATCHMEN: Not compulsory, ship's own crew can be used.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES:
Safety Equipment Certificate.
Stability Certificate.
Load Line Certificate.
Derrick and Hoisting Gear Test Certificate.
Derat Certificate.
Nationality Certificate.
Measurement Certificate.
Ice-class Bill.
CUSTOMS ALLOWANCES: Tobacco: Max. 200 cigarettes per man or 50 gm. of tobacco. Wine/Spirit: Maximum 1 bottle of each per man to be opened and used on board only.
CARGO GEAR: Cargo gear test book to be in order – all gear to be tested within a year otherwise risks for breaks in discharging/loading.
REPATRIATION: Can be carried out easily.
AIRPORT: Vaasa Airport (about 8 miles from town) served by regular airlines, domestic and abroad, Stockholm, U.K., Continent, etc.
TIME: Local time GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: Working hours in port: 0700 – 1100 hrs., 1200 – 1600 hrs. Monday to Friday, Saturday: 0700 – 1100 hrs. Sunday free. Working days in port: Monday to Saturday. Working days ashore: Usually Monday to Friday. All banks closed on Saturday. Shops open all weekdays. Other holidays: 6th December – Independence Day – Christmas, etc., as usual.
TELEPHONES: Can be arranged on board.
SERVICES: Compass adjusting available.
POLICE/AMBULANCE/FIRE: Police 10022; General Emergency No. 112.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Garbage can be disposed of into dustbins which are provided on every quay. Plastic bags for this purpose can be provided. Charges are 0.18 FIM/NRT. Minimum charge 180 FIM, max. 480 FIM.
WASTE OIL DISPOSAL: Collection service available. Charges depend on amount of oil in water. Contact Sailio Cistern Puts Raukko & Wiitala, Tel: 440210.
SEAMAN'S CLUBS: None.
CURRENCY: Finnish Mark (FIM).
DELAYS: Only Winter time when Government icebreaker is arranging, waiting or assisting in outbound convoys of ships.
GENERAL: Ships approaching port of Vaasa in Winter time (January-May) when sea area icebound, have to call any of Government icebreakers operating in area or to inform Harbour Authorities of exact ETA – engine power, size and nationality, and whether strengthened for ice or not. Call signs, etc., for Government icebreaker can be obtained from nearest coast radio station.
AUTHORITY: Vaasa Harbour Office, P.O. Box 2, SF-65101 Vaasa, Finland. *Tel:* 358-61-3251111. *FAX:* 358-61-3254514. *Contact:* Captain Lars Holmqvist, Port Director. Osmo K. Kivilehto, Harbour Master (Tel: 358-61-3254505).

VEITSILUOTO: 65.42 N. 24.37 E. (See Plan)

DOCUMENTS: Usual documents for Finnish ports. In addition the Harbour Master requires a copy of the Crew List.
PILOTAGE: Inwards compulsory for vessel in foreign trade. Boarding about 8 miles before Ajos. Ajos Pilot Station may be contacted on VHF Channel 16/13.
ANCHORAGES: Good holding ground about 1 mile from Rautakallio and by Koivuhauta 2 miles from harbour entrance.
RESTRICTIONS: No tide. Entry by day or night. Approach Channel, depth 7.1 m. It is recommended that vessels longer than 150 m. and with a minimal keel clearance avoid berthing under unfavourable weather conditions.
MAX. SIZE: See "Berthing".
VHF: Make initial contact on Channel 16/13.
HEALTH: See "Oulu".
TUGS: Available when required, charges according to net tonnage. Use ship's lines.
BERTHING: Total length of Quays 574.5 m.
Berth No. 1: Length 135.5 m. Depth 7.1 m.
Berth Nos. 2 and 3: Total length 209 m. Depth 7.1 m.
Berth Nos. 4 and 5: Total length 230 m. Depth 7.1 m.
Berth No. 6: Length 120 m. Depth 7.1 m.
Berth No. 7: Length 130 m. Depth 7.1 m.
Max. draft at all berths 7.1 m.
CRANES: Load/discharge by ship's gear or mobile cranes.
SPECIALISED CARGO HANDLING FACILITIES: 4 Ro/Ro berths, no special equipment.
STEVEDORES: Ordered by Agent.
MEDICAL: Hospital at Kemi. Masters to advise if medical attendance required aboard.
FRESH WATER: Available at short notice.
FUEL: Ordinary fuel, diesel and gas oil. Deliveries by lorries only.
FIRE PRECAUTIONS: No special precautions. Company's fire-fighting corps.
CONSULS: At Kemi.
REPAIRS: Available at Kemi.
GANGWAY/DECK WATCHMEN: Available, ordered by Agent.
OPENING/CLOSING HATCHES: By crew.
AIRPORT: At Kemi, approx. 15 km. from port.
POLICE/AMBULANCE/FIRE: The nearest emergency services are available through the Alarm Centre of the Veitsiluoto Company, telephone number 22. If you phone outside the Company, call first 8141 (the number of the Company), and then ask for number 22.
SERVICES: Radar repairs possible in Kemi.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Not required.
REGULATIONS: Port regulations delivered to ship on arrival on request.
DELAYS: Not normally expected.
AUTHORITY: Port of Kemi Authority, Ajoksentie, FIN-94900 Kemi, Finland. *Tel:* 358-698-282017. *Telex:* 3614 Vto Sf. *FAX:* 358-698-282003. *Contact:* Captain Markku Toivonen, Harbour Master.

France

GENERAL

NOTICE TO MARINERS: No. 2005/81

Regulations concerning vessels laden with hydrocarbons (including oil) or other dangerous cargoes approaching French ports.

Regulations have been promulgated by the French Authorities concerning vessels laden with hydrocarbons (including oil) or other dangerous cargoes in the approaches to French Mediterranean ports and the ports in Corse.

Any such vessel intending to enter French territorial waters (including Corse) from seaward, or to sail from a French port or anchorage, is required to signal certain details to the Prefet Maritime de la Mediterranee at Toulon, 6 hours beforehand. Should there be any subsequent change in the vessel's intended movements, or in her material state, a further signal should be made. All such vessels are required, throughout their stay in French territorial waters, except when lying alongside in port, to maintain radio watch on Channel 16 or the local frequency, if applicable.

Any such vessel which suffers significant damage at sea, or the threat of damage, from whatever cause, while within 50 miles of the French coasts, is required to signal certain details to the Prefet Maritime at Toulon. Subsequent developments must be reported, including the time of requesting assistance, the expected time of its arrival and the actual time of arrival. Any ship joining the damaged vessel to render assistance is required to signal details to the Prefet Maritime, and to render reports on the casualty on arrival. These signals are informative and do not constitute a request for rescue or assistance.

For details of all signals required above see *Admiralty List of Radio Signals, Vol. 6.*

Vessels exceeding 1,600 gross tons laden with hydrocarbons (including oil) or other dangerous cargoes must not approach the French coasts within 7 miles, unless instructed to do so by the French authorities or within the port approach channels listed below. Exceptions to this rule are made in the channel between Corse and Capraia, where the minimum distance is reduced to 5 miles, and in the Bonifacio Strait.

Such vessels approaching, or departing from, the ports of Port-la-Nouvelle, Sete, l'Espiguette, Golfe de Fos, Marseille, Toulon, Ajaccio, Porto Vecchio, Solenzara, Lucciana and Bastia are required to use the charted port approach channels. When in these channels such vessels are priority vessels and must display Flag "B" of the International Code by day, and exhibit one red light, visible all round, at night. The provisions of Rule 9 of the *International Regulations for Preventing Collisions at Sea (1972)* explicitly apply.

NOTICE TO MARINERS: No. 2379/81.

Regulations concerning tankers laden with hydrocarbons and vessels carrying dangerous cargoes navigating in the approaches to the N. and W. coasts of France.

The French authorities have issued the following regulations concerning the above mentioned vessels.

(a) **Laden vessels exceeding 1,600 tons gross** must keep at least 7 nautical miles from the French coast, unless otherwise instructed by a Prefet Maritime, except within:–

The N.E.-bound lane of the Dover Strait traffic separation scheme.

Race of Alderney.

The access channels to the following ports:

Dunkerque, Calais, Boulogne, Dieppe, Fecamp, Le Havre-Antifer, Rouen, and the ports of the lower Seine, Caen/Ouistreham, Cherbourg, Granville, Val de Saire transhipment area, Saint-Malo, Saint-Brieuc, Roscoff, Brest, Douarnenez, Concarneau, Lorient, ports of the Loire, Les Sables-d'Olonne, La Rochelle/La Pallice, Ports of the Gironde, Bayonne.

(b) **Vessels intending to enter French territorial waters (12 miles) or to sail from a French port or anchorage,** are required to inform Prefet Maritime de la Manche et de la Mer du Nord (for North Sea coast and English Channel – East of a line joining positions 48° 53' N., 02° 20' W. and 50° 02' N., 05° 40' W.) or Prefet Maritime de l'Atlantique (for Atlantic Coast and English Channel West of the above mentioned line) 6 hours beforehand, either by radio or through the port authority, giving the following details:–

Prefix	SURNAV FRANCE
A	Name, nationality and call sign.
B	Date and time (GMT) suffixed "Z".
C	Position.
E	Course.
F	Speed.
I	Destination.
J	Date, time (GMT) and position of entering French territorial waters or of getting underway.
K	Date, time (GMT) and position of leaving French territorial waters, or of arriving at destination in French waters.
N	RT watch being maintained.
P	Draft.
Q	Cargo: type (as defined in MARPOL 73) and quantity.
R	Whether manoeuvring ability is normal or impaired by defects in propulsion, steering or anchoring equipment.
S	Whether operational fitness is normal or impaired by defects in radar, radio, safety or ballasting equipment.

Any subsequent changes should be reported immediately.

Constant listening watch must be maintained on Channel 16, or a frequency specified for this purpose by a local authority throughout the period the vessel is in French territorial waters, except when lying alongside in a port.

(c) **Vessels within French territorial waters suffering from an impairment of normal navigational or manoeuvring capability,** are required to take such an action as the Prefet Maritime may require to ensure, the safety of navigation and to avoid the threat of pollution.

(d) **Vessels within 50 nautical miles of the French coast suffering damage or having defects,** are required to report to Marine Brest and Marine Cherbourg any occurrence (collision, stranding, incident on board or external) which could result in damage to the vessel or cargo.

Any vessel going to the assistance of the damaged vessel is also required to make a report.

These reports are informative and do not constitute a request for rescue or assistance.

Requests for assistance, if required, should be made in accordance with international regulations, keeping Marine Brest and Marine Cherbourg informed.

The damaged and the assisting vessel are required to take such action as the Prefet Maritime may direct with a view to avoiding danger to navigation and threat of pollution, whether they are in French territorial waters or international waters.

Form of signalled report to be made by the damaged vessel:–

Prefix	SURNAV AVARIES
A	Name, nationality and call sign.
B	Date and time (GMT) suffixed "Z".
C	Position.
E	Course.
F	Speed.
I	Destination.
J	Time (GMT) and nature of a call for assistance or towage.
K	Name of assisting vessel, if present, or ETA (GMT).
M	Name and telegraphic address of Owner, Charterer and any French consignee.
N	Radio watch being maintained.
P	Draft.
Q	Cargo: type (as defined in MARPOL 73) and quantity.
R	Nature of damage or development of the situation.
T	Any other information.

Subsequent developments are also to be reported.

Form of signalled report to be made by the assisting vessel:–

Prefix and A to I as above, but details applicable to the assisting vessel.

J	Date, time (GMT) and position of casualty.
K	Name, nationality and call sign of casualty.
L	Course of casualty, or destination, if known.
M	Speed of casualty, if known.
N	Radio watch being maintained.
Q	Cargo of casualty if known.
R	Damage of casualty.
T	Any other information.

Further reports on the casualty are required after arrival.

(e) **Laden vessels exceeding 1,600 tons approaching or departing from the following French ports:–**

Saint-Malo, Saint-Brieuc, Roscoff, Brest, Douarnenez, Concarneau, Lorient, ports of the Loire, Les Sables-d'Olonne, La Rochelle/La Pallice, ports of the Gironde, Bayonne are required to comply with the following regulations:–

To use the authorised approach and entry channels and waiting areas.

Inform the Port Authority on entering the approach channel.

When in these channels and waiting areas, display Flag B of the International Code of Signals by day and exhibit one red light at night, clearly visible all round.

Anchoring or waiting in the approach and entry channels is not permitted except in emergency, in which event the Port Authority must be informed as soon as possible.

Vessels crossing approach or entry channels should do so as nearly as possible at right angles to the channel and well clear of vessels in the channel.

These regulations do not in any way absolve Masters and Pilots from the requirement to comply with the International Regulations for Preventing Collisions at Sea (1972).

For further details of signals required by the above regulations see *Admiralty List of Radio Signals Vol. 6.*

Similar messages must be sent to Marine Toulon by vessels in the Mediterranean.

Navigation in French Territorial Waters:

Any ship as specified above must keep permanently 7 nautical miles off the French Coast, except:

1. When entering a French harbour, in the specified channel leading to this harbour;
2. In the N.E. lane of the Dover Straits Separation Scheme;
3. In the Channel of Corsica between the Italian island of Capraia and the Corsican shore, where the limit is reduced to 5 nautical miles.

DISTRESS, SEARCH AND RESCUE:

Search and Rescue operations are controlled by the following Centres:

Re: (1) – (2) – (3) – See "Notes" below.

1. Cross Gris-Nez (50° 52' N., 01° 35' E.) covers the North coast of France from the Belgian border to Cap d'Antifer (49° 41' N., 00° 10' E.). The following stations maintain a continuous watch:
   Dunkerque (51° 03' N., 02° 21' E.) (2)
   Gris-Nez (2) (3)
   Saint-Frieux (50° 37' N., 01° 36' E.) (2)
   Ailly (49° 55' N., 00° 58' E.) (2).

2. Cross Jobourg (49° 41' N., 01° 54' W.) covers the Northwest coast of France from Cap d'Antifer to Mont-Saint-Michel (48° 38' N., 01° 31' W.). The following stations maintain a continuous watch:
    - Antifer (49° 41' N., 00° 09' E.) (2)
    - Ver-sur-Mer (49° 20' N., 00° 34' W.) (2)
    - Gatteville (49° 24' N., 01° 16' W.) (2)
    - Jobourg (2) (3)
    - Granville (48° 52' N., 01° 35' W.) (2)
    - Roches-Douvres (49° 06' N., 02° 49' W.) (2).
3. Cross Corsen (48° 24' N., 04° 47' W.) covers the Northwest coast of France from Mont-Saint-Michel to Pointe du Raz (48° 02' N., 04° 44' W.). The following stations maintain a continuous watch:
    - Cap Frehel (48° 41' N., 02° 19' W.) (2)
    - Ile de Batz (48° 54' N., 04° 02' W.) (2)
    - Le Stiff (48° 28' N., 05° 03' W.) (2)
    - Corsen (2) (3)
    - Ile de Sein (48° 03' N., 04° 52' W.) (2).
4. Cross Etel (47° 40' N., 03° 12' W.) covers the West coast of France from Pointe du Raz to the Spanish border. The following stations maintain a continous watch:
    - Penmarch (47° 48' N., 04° 22' W.) (2)
    - Etel (2)
    - Belle Ile (47° 19' N., 03° 14' W.) (2)
    - Kerrouault (47° 30' N., 02° 21' W.) (2)
    - Armandeche (46° 29' N., 01° 48' W.) (2)
    - Ile d'Yeu (46° 43' N., 02° 23' W.) (2)
    - Chassiron (46° 03' N., 01° 25' W.) (2) (see also Sous-Cross-Soulac).

    The coast Radio Station Le Conquet watches 2182 kHz J3E for Etel. This Cross is associated with the Cospas/Sarsat Mission Control Centre at Toulouse. It also receives distress messages sent through Immarsat-A/C.
5. Sous-Cross Soulac (45° 31' N., 01° 07' W.), operating under the authority of Cross Etel, covers the Southwest coast of France from Lat. 46° 20' N. to the Spanish border. The following stations maintain a continuous watch from June 15th to September 15th (out of this period they are remotely controlled by Cross Etel):
    - Soulac (2)
    - Cap Ferret (44° 39' N., 01° 15' W.) (2)
    - Contis (44° 06' N., 01° 19' W.) (2)
    - Biarritz (43° 30' N., 01° 33' W.).
6. Sous Cross Agde (43° 18' N., 03° 30' E.), operating under the authority of Cross La Garde, covers the Mediterranean coast of France from the Spanish border to Long. 04° 20' E. The following stations maintain a continuous watch from the end of June to the beginning of September (out of this period they are remotely controlled by Cross La Garde):
    - Pic Neoulos (42° 29' N., 02° 56' E.) (2)
    - Agde (2).

    The Coast Radio Station Marseille watches 2182 kHz J3E for Sous-Cross Agde.
7. Cross La Garde (43° 06' N., 05° 59' E.) covers the Mediterranean coast of France from the Spanish border to the Italian border. The following stations maintain a continuous watch:
    - Planier (43° 12' N., 05° 14' E.)
    - La Garde (2) (3)
    - Mont Coudon (43° 09' N., 06° 00' E.) (2)
    - Pic de l'Ours (43° 28' N., 06° 54' E.) (2) (see also Sous-Cross Agde and Sous-Cross Corse). This Cross is associated with the Cospas/Sarsat Mission Control Centre at Toulouse.
8. Sous-Cross Corse (41° 55' N., 08° 46' E.), operating under the authority of Cross La Garde, covers the coast of Corse. The following stations maintain a continous watch:
    - La Punta (47° 57' N., 08° 42' E.) (2)
    - Serra di Pigno (42° 41' N., 09° 24' E.) (2)
    - Antisanti (42° 10' N., 09° 20' E.) (2)
    - Aspretto (41° 55' N., 08° 46' E.) (2) (3).

Notes:
(1) Cross: Centre Regional Operationnel de Surveillance et de Sauvetage (MRCC).
Sous-Cross: Sub Cross (MRSC).
(2) Watch on VHF Channel 16.
(3) Watch on 2182 kHz J3E.

VISAS: Foreign visitors (except EEC nationals and Swiss nationals) are required to be in possession of visas before arrival in France.

Companies sending foreign crewmen to join vessels in French ports should arrange visas through French Consulates.

GARBAGE/WASTE OIL DISPOSAL: The MARPOL Convention rules apply to all reception facilities. Advance notice to the reception facilities is not mandatory, but is highly recommended. Charges depend on the quantity and quality of substances to be delivered. Further information on reception facilities should be requested if required from the relevant port authorities. Should any deficiencies/ inadequacies be observed in the system they should be reported to Direction des Ports et de la Navigation Maritimes, 3 Place de Fontenoy, 75700 Paris.

CUSTOMS: *Shipmaster's Report:* September 1994.

The French Customs Regulations have been changed as follows:

> The Stores and Provisions List now has to be made out in triplicate.
> The attached Crew Declaration (on the new form on the backside of the Stores and Provisions List) also to be made out in triplicate.

Vessels may open the bonded store between French ports (as in our case between Dunkirk and Port Jerome), but the above mentioned lists have to be submitted in both the first and the following port(s).

AJACCIO, Corsica: 41.55 N. 08.44 E. (See Plan)

DOCUMENTS:
Cargo Vessels:
1 Stores List.
1 Personal Effects List.
1 Crew List.
1 Passenger List.
2 Manifests.
Safety Certificates.
Ship's Register.
Passenger Vessels:
1 Stores List.
1 Personal Effects List.
3 Crew Lists.
3 Passenger Lists.
Ship's Register.
2 Manifests.
Safety Certificates.

PILOTAGE: No advance notice required for regular ships. Vessels call Pilot with 3 blasts on ship's siren. Pilot boat flies usual Pilot flag. Pilot joins approaching vessel at a line Isolella/Chapelle des Grecs. Available 24 hours a day. Pilot boat has VHF Channel 6.

ANCHORAGES: Several safe anchorages in harbour which can be indicated by Pilot.

MAX. SIZE: Length 200 m., draft 8.5 m. At anchor, no limit.

HEALTH: Health Officer boards on arrival. Pratique automatic unless suspected contagious disease on board, when it is necessary to notify Agent or Health authorities in advance by cable.

RADIO: ETA cables, etc., via Grasse Radio, Marseilles Radio or Ajaccio Radio. VHF Channel 24.

VHF: Port Captain on Channel 6. Call Sign "Ajaccio Port".

TUGS: None available.

BERTHING: Regular vessels have priority at all berths. 6 Ro/Ro berths.

CRANES: Up to 20 tons.

STEVEDORES: Advice should be sent 24 hours prior to arrival. French vessels have priority of labour.

MEDICAL: Advance notice required Tel: 95.51.40.40. All hospital facilities available. Except in the case of an epidemic in any country from which the vessel has sailed, no inoculations or vaccinations are necessary.

TANKERS: Max. draft 6 m., length 110 m. Preferably with bow thrust unit. Gas tankers also preferable with bow thrust unit.

FRESH WATER: Available at all berths, except Gas Berth.

FUEL: Ordinary grades only, 48 hours notice required. Delivered by tanker trucks to quay side.

CONSULS: Sweden and Austria.

REPAIRS: Minor repairs can be carried out.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Ship's Register and Safety Certificates.

CUSTOMS ALLOWANCES: Tobacco, 250 gm. or 200 cigarettes per member of crew. Wine, 2 litres. Spirits, 1 litre.

SURVEYORS: None.

DRY DOCKS: None.

REPATRIATION: Can be arranged by ship's Agents.

AIRPORT: 8 km. from port. Served by daily flights (4 flights to Nice by C.C.M., 4 flights to Marseille by C.C.M. and 2 flights to Paris by Air France).

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; Easter Monday; Whit Monday; 1st May; 8th May; 14th July; 15th August; 1st November; 11th November; 25th December. Cargo work can be arranged on all dates except 1st November.

POLICE/AMBULANCE/FIRE: Police 17; Ambulance 95.21.50.50 (SAMU); Fire 18.

EMERGENCY CO-ORDINATION CENTRE: Crosscorse Ajaccio. Tel: 95.20.13.63. Telex: 460187.

Affaires Maritimes, Tel: 95.50.90.00. Telex: Afmar Ajacc 460690.

TELEPHONES: Can be placed on board warships only.

BANKS: Banque de France, Tel: 95.21.00.05. Telex: Banfra Ajacc 460083; Banque Worms, Tel: 95.21.00.13. Telex: BWOR 460032; Banque Nationale de Paris, Tel: 95.21.54.90. Telex: 460894 BNP; Credit Agricole, Tel: 95.29.34.11. Telex: 460808 Creagri; Credit Lyonnais, Tel: 95.23.37.42 and 95.21.51.26. Telex: 460824 Credion Ajacc; Societe Generale, Tel: 95.21.41.30. Telex: 460757 Sogener Ajacc.

STORING: Stores and bunkers by truck only. Trucks may go alongside except at gas berth and tanker berth. Fork lift trucks available. Dockers available to assist.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: Garbage disposal service available through ship's Agent, 24 hours notice required. Charges: Container alongside (65 F. per container).

WASTE OIL DISPOSAL: Collection service available through ship's Agent, 24 hours notice required. Tanker trucks come alongside.

SEAMAN'S CLUBS: None.

CURRENCY: French Franc (F.F.).

GENERAL: Galley waste, etc., must not be discharged inside the bay, but put into plastic bags and sealed before putting into special containers at berth.

AUTHORITY: Direction Departementale de l'Equipement de la Corse du Sud, Terre-Plein de la Gare, B.P. 408, 20302 Ajaccio Cedex, France. *Tel:* 95.29.09.09. *Telex:* 460943. *FAX:* 95.29.09.94.

Chambre de Commerce et d'Industrie d'Ajaccio et de la Corse du Sud, Hotel Consulaire, Boulevard du Roi Jerome, B.P. 253, 20179 Ajaccio Cedex, France. *Tel:* 95.21.34.65. *Telex:* 460084 Chamco Ajaccio. *FAX:* 95.21.23.89.

ANTIBES: 43.35 N. 07.08 E. (See Plan)

DOCUMENTS:
(a) For Harbour Master:
Ships Papers.
Declaration of Exit and Entry.
Crew List.
Passenger List.
(b) For Customs:
Health Declaration.
Provision List.

PILOTAGE: Not obligatory for yachts. Port cannot receive pleasure boats longer than 40 m. Ensure pilotage authorities advised of ETA. VHF Channel 9 day and night.

ANCHORAGE: In winds of N.E. to S.E. anchorage in front of Antibes not advised. Recommended anchor in Bay de Golfe-Juan, in shelter of Cap d'Antibes, in direction of Juan-les-Pins. In winds from N.W. to S.W., good anchorages on East face of Cap d'Antibes, Bay of Garoupe, Bay of La Salis, Bay of Ilette.

RESTRICTIONS: None.

MAX. SIZE: For yachts length 50 m., width 6 m., draft 3.5 m.

VHF: Port Captain on VHF Channel 9 throughout 24 hours.

TUGS: None.

FUEL: For pleasure boats only.

CONSULS: None.

REPAIRS: For pleasure boats only. 2 travelifts for boats of max. weight 45 tonnes and 120 tonnes.

REPATRIATION: Must be arranged through Consulates at Nice or Marseilles.

AIRPORT: Nice, Cote d'Azur. 15 km.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Tel. Police 93.33.58.58 and 17; Ambulance 18; Fire 18.

SERVICES: Water and electricity on each pier.

AUTHORITY: Capitainerie du Port d'Antibes, Port Vauban, S.A.E.M. de Gestion, Port Vauban, 06600 Antibes. *Tel:* 93.34.74.00. *Telex:* 970480 F. *Contact:* J. Pluym, Le Commandant du Port.

BASTIA, Corsica: 42.41 N. 09.27 E. (See Plan)

DOCUMENTS: See "Ajaccio".

PILOTAGE: Address, Hangar No. 1, Nouveau Port, Bastia. Tel: 95.31.50.95 and 95.31.07.15. VHF Channel 16. Pilot boats, 12 m. long, black and white with navigation and pilotage lights. Previous advice to Pilots necessary before arrival. Pilot boards in bay of Porto Vecchio, North of the citadel. Vessels should call "Bastia Port" or Bastia "Bastia Pilot" one hour before arrival in the anchorage area.

ANCHORAGE: Anchoring not recommended in Easterly winds. Depth 15 m. to 30 m. in Porto Vecchio Bay. Bastia harbour: up to 4.50 m. deep.

RESTRICTIONS: Ships may enter harbour any time, weather permitting. It is very difficult to enter if a West wind (Libecciu) of over 25 knots is blowing.

MAX. SIZE: Max. length: 160 m.; draft 7 m.

TUGS: None available.

BERTHING: Ships berth in order of arrival.

Accommodation available for 8 vessels:

3 berths with length 100 m. to 120 m., max. draft 6.50 m. (cement, wine, liquefied gas).

1 berth, length 160 m., max. draft 7.50 m. (Ro/Ro cargo).

2 berths, length 150 m. to 160 m., max. draft 6.50 m. (car-ferries).

2 berths, length 120 m., max. draft 6.00 m. (car-ferries).

Mooring carried out by watermen. Same address as Pilots.

CRANES: One mobile crane with max. lifting capacity 7.5 tons.

MEDICAL: Medical controls made by Customs officer. Doctor available.

FRESH WATER: Supplied ashore.

FUEL: Not available.

FIRE PRECAUTIONS: General rules. One wharf reserved for tankers.

CONSULS: Nearest at Ajaccio.

GANGWAY/DECK WATCHMEN: Night watchman supplied by Agent.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: None on entry. 10 packets cigarettes when leaving. Wine/spirits unlimited when leaving.

REPATRIATION: No facilities exist.

AIRPORT: Bastia 20 km. from ports. Departures every day to continent.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Police, 17; Ambulance, 15; Firemen, 18.

TELEPHONES: As a rule telephone is put only on naval ships.

SHORE LEAVE: Crew may go ashore.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: Service available. Contact: Corse Hygiene, Tel: 95.31.50.45.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

AUTHORITY: Direction Departementale de l'Equipment de la Haute-Corse, B.P. 214, 20200 Bastia, France. *Tel:* 95.31.99.66. *Telex:* 460680 F. *Contact:* M. Gavini, Port Captain, Hanger No. 1, Rue de Nouveau Port, Bastia. Tel: 95.31.07.15 and 95.31.61.50.

BAYONNE: 43.30 N. 01.28 W. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
3 Lists of Provisions on Board.
3 Individual Lists of Tobacco and Spirits.
3 Manifests of Cargo.
1 Set Bills of Lading.

PILOTAGE: Station extends 3 miles between the parallel of Ondres to the North and the limit of French territorial waters to the South. When weather permits, the pilot boat comes out of l'Adour and comes alongside ships near the light buoy situated W.N.W. of the port entrance. Contact Pilot at least 12 hours before arrival relaying through Bordeaux Arcachon Radio and stay on radio watch in the pilot zone. VHF Channel 12.

ANCHORAGE: Ships must not anchor in the river.

RESTRICTIONS: In bad weather ships are led to take the Pilot at the pilot boat which is based on St. Jean-de-Luz and are led either towards l'Adour or to the anchorage of St. Jean-de-Luz.

When alongside, even in fine weather, a swell may be experienced causing lines to part.

MAX. SIZE: The Adour is accessible to ships of 160 m. length (15,000 – 20,000 tonnes). Depth at the mouth varies with the seasons and are maintained by dredging. They are never less than 7 m. during Summer but during Winter can be reduced following Westerly storms. The height of the tide has to be added to these depths but the draft can never exceed 8.0 m.

HEALTH: A Declaration of Health Form is lodged by the Customs Service on arrival; it must be completed by the Master. In case of a suspect illness, advise Agent 24 hours in advance.

RADIO: Bordeaux – Arcachon Radio. The signal tower on the South side of the mouth, and the Harbour Master's Office, in the tower, has a VHF radio station, Channel 12.

TUGS: 1 tug available, 1,250 h.p., 10 tons bollard pull. Request for tug through the Agent. Tug waits at the entrance to the Adour.

BERTHING: When working berth is occupied, vessel is directed to a waiting berth. Large ships or those carrying dangerous cargo can be requested to wait outside the entrance.

Berth	*Max. Length Vessel*	*Recommended Draft*
Socadour	150 m.	29.5 ft.
Cement Wharf	160 m.	24 ft.
Satec Wharf	160 m.	24 ft.
Grain Silo	130 m.	23 ft.
SNPA Sulphur Quay	150 m.	25 ft.
Other berths	120 m.	22 ft.

BULK HANDLING FACILITIES: Silos with capacity 60,000 tonnes (maize). Rate 450 t.p.h.

3 silos, total capacity 10,000 tonnes at Armand Gommes Quay.

Phosphate handled at Boucau Quay with 3 cranes of 10 tonnes capacity, feeding conveyor belts with capacity 350 t.p.h. – 400 t.p.h.

CRANES: Edmond Foy Quay: 3×3 ton and 2×6 ton cranes.
Pierre Le Roy Quay: 4×3 – 4 tonne cranes.
Boucau Quay (Socadour): 2×10 tonne cranes.
Marcel Forgues Quay: 1×10 tonne and 1×8 tonne crane.
Jean Letellier Quay (private): 1×10 tonne crane.
Armand Gommes Quay: 2×3 – 4 tonne cranes.

STEVEDORES: Arrival must be notified to Agent 24 hours in advance.

MEDICAL: Medical attendance can be organised by the Agent without advance notice, Hospital and private clinic available. However, if medical attendance required as soon as the ship arrives, particularly at night, it is advisable to send a radio message 12–15 hours before the arrival of the ship.

TANKERS: No installation to receive residues. Two berths for unloading of refined products. Refinery de Midi: Max. length 120 m., max. draft 6 m. Saint Gobain, length 150 m. max. draft. 24 ft.

FRESH WATER: Available at each berth, minimum supply 3 cu.m.

FUEL: Available by arrangements in advance through Agent or suppliers.

CONSULS:
Belgium
Brazil
Chile
Finland
Norway
Peru
Portugal
Spain
Sweden
United Kingdom
Uruguay

REPAIRS: Running repairs to hull, machinery, radio and radar can be effected.

SURVEYORS: Bureau Veritas. Tel: 59.25.20.44.

DRY DOCK: Usable length 98 m. Length on stocks 94.1 m. Width of entry 15 m. Depth above sill, neap tides 4.5 m., spring tides 6 m.

GANGWAY/DECK WATCHMEN: Not obligatory except for ships with dangerous merchandise on board.

OPENING/CLOSING HATCHES: Generally carried out by the crew.

CUSTOMS ALLOWANCES: 200 grammes or 250 grammes of tobacco for each crew member and for 8 days (must without fail be declared in the individual list of provisions). 1 bottle of wine or spirits (must without fail be declared in the individual list of provisions).

REPATRIATION: Possible for all countries as well as crew changes.

AIRPORT: At Biarritz: 7 km. away. Regular service with Paris. Two services per week to and from London.

TIME: European Standard Time: GMT plus 1 hour and GMT plus 2 hours from 2nd April to 1st October.

HOLIDAYS: 1st January; Easter Sunday/Monday; 1st May; Ascension Day; Whit Sunday/Monday; 14th July; 15th August; 1st November; 25th December.

POLICE/AMBULANCE/FIRE: Police, telephone 17 or 59.55.84.09. Anglet: 17 or 59.03.76.10 Boucau: 17 or 59.55.29.53. St. Leon Hospital: 59.63.50.50. Fire Station: 18 or 59.59.21.84.

TELEPHONES: Telephones on board not possible.

SHORE LEAVE: Crew are authorised to go ashore.
IDENTIFICATION CARDS: Not necessary – Seaman's Identity Card sufficient.
AUTHORITY: Direction Departementale de l'Equipement Alles Maritimes, 64109 Bayonne. *Tel:* 59.63.08.40. *Contact:* A. Lage, L'Ingenieur Des T.P.E.

BORDEAUX (inc. Verdon, Bassens, Ambes, Pauillac, Blaye): 44.50 N. 00.34 W. **(See Plan)**

DOCUMENTS:
Tonnage Certificate.
2 copies Provisions List.
2 copies Personal Effects List.
2 copies Crew List.
Customs Clearance.
Crew Manifests.
Check List.

APPROACHES:
Report: 1986 (Updated 1994).

Of primary concern in approaching or leaving the berths is the difficulty of the channel between Le Verdon and Ambes, especially for inbound/outbound tankers at the maximum draft.

When loading full cargo at Bordeaux/Ambes, Masters have to pay careful attention to the maximum permissible draft alongside at LW and to the maximum draft (fresh water) allowed for transitting channel outbound, owing to the many shelves especially around the Buoys 20 and 28.

Port Approaches: There is no special navigation difficulty for approaching 'BXA' Light buoy, though there is no noticeable landmark by daytime, but the 'BXA' Racon is efficient and the buoys of the entrance channel Passe de l'Ouest are detected early on the radar. The soundings may also give useful information.

Anchoring outside is *not* recommended during bad weather owing to the heavy swell. Ships have to use the tide to transit the River Channel which takes about 4 hours. They need about 2 hours for taking the Pilot and proceed to the Le Verdon Roads where they enter the river.

Best arrival time at 'BXA' Light buoy is between 4 to 6 hours before the HW of Pointe de Grave; this will avoid anchoring, leaving sufficient time for Master/Pilot exchange on the soundings in the channels which are the major problem during the transit for deep drafted tankers, especially in the river. Movements are carried out on a round the clock basis.

Heights of water are given on VHF Channel 17, every 5 minutes, for many places in the river corresponding to the main shoal areas (given in metres in the French language).

A monthly recommended maximum draft for vessels proceeding to and sailing from Ambes A.P. and E.D.F. is issued and always calculated based on fresh water. This sheet is given to the Agent and may be given to the Master when the Pilot boards.

The Under Keel Clearance considered in this draft calculation is mainly subject to local atmospheric and hydrological conditions but never less than 0.80 m. for the river transit. Meanwhile, in the River Channel, siltation and moving soft mud patches may reduce the deep draft passage width between the buoys. The Pilot must know these latest limitations as the Port Authority cannot give a complete safe sounding statement to Masters.

PILOTAGE: To embark and disembark at sea from ships entering or leaving the Gironde Estuary, Pilots use either a 17 m. fast launch or a twin-turbine helicopter Ecureuil AS355F1.

With the helicopter, winching is the normal procedure to transfer Pilots.

The service at sea extends from 1 hour before to 5 hours after Cordouan LW.

For container ships, special arrangements can be made through the Agent.

When weather conditions do not permit service to ships at sea, the Pilot boards as soon as possible, after the ship has crossed the bar. In that case and after Master's agreement, a Pilot gives navigation assistance from Verdon shore-based radar station, until Pilot's boarding point or for outward ships, from Pilot's disembarking point to sea.

Vessels should announce their arrival at 'BXA' Fairway Buoy at least 24 hours in advance to the Commandant du Port de Bordeaux through Coast Station "Bordeaux-Arcachon Radio". Masters must confirm to the Harbour Master's Office, Channel 12 and the Pilot Station at least 12 hours before arrival their ETA, ship's draft and speed, and give their agreement for an eventual helicopter operation. *Three hours before arrival at 'BXA',* Masters may contact Gironde Pilot Station on Channel 14, but must contact "Radar Verdon" on Channel 12 and communicate on Channel 14 or 12. Ships can also call Verdon Pilot Station by Telephone No. 56.09.63.85 or by Telex PILVDON550167F.

Ships leaving ports located between Santander and Lorient, must send the above mentioned message on departure. In case of any change of more than 3 hours of the initial ETA, Masters must send a correcting message.

Helicopter Service: The helicopter is red and white, and "PILOTE BX" is painted in black. The VHF call sign is "PAPA GOLF" or "Gironde Pilot Helicopter". During the flight, VHF contact between the ship and helicopter must be maintained on Channels 6 or 12.

The Pilot is boarding in the vicinity of 'BXA' Fairway Buoy and winching is the normal procedure. Depending on weather conditions, the Master may be requested to alter the course or speed of the ship for safe boarding of the Pilot.

The helicopter is working in accordance with International regulations and particularly with the rules of the International Chamber of Shipping.

Masters are asked to watch very carefully the following points:
– check that there are no horizontal aerials or wires above the helicopter's manoeuvring zone
– check that no loose object, in the proximity of the manoeuvring zone, could be swept up by the effects of the wind created by the rotor blades
– at night, the manoeuvring zone must be well illuminated but in such a way that the helicopter Pilot is not dazzled
– if necessary, provide for washing the area to avoid dust being blown around by the effects of the rotor.

No extra charge for the Pilot boarding by helicopter.

Pilot Launch Service: When operating with a fast launch, the Pilot boards between 'BXA' Fairway Buoy and the entrance to Grande Passe de l'Ouest. Masters are requested to maintain a speed of about 5 knots. The pilot ladder should be rigged well amidships and the bottom of the ladder should be 1.50 m. above the water level. No line or rope shall be attached to the bottom of the pilot ladder.

The pilot launch keeps watch on VHF Channel 14.

Vessels less than 70. m. long, for which pilotage from the sea to Verdon is not compulsory, may embark River Pilot at Le Verdon providing Masters have advised the Pilot Station accordingly.

ANCHORAGE: The normal waiting anchorage area is the Roadstead of Le Verdon, depth 10 m. to 12 m. and sand silt bottom. Tankers find a good anchoring area in the Saintonge Roadstead with a depth of 15 m. to 20 m. (sand silt bottom).

RESTRICTIONS: The great entrance to the Gironde estuary (Western entrance) is dredged to a depth of 13.50 m. under the zero of French sea charts.

MAX. SIZE: Verdon: Vessels up to 12.5 m. draft, 290 m. length.
Bec d'Ambes: Tankers up to 32 ft. 6 in. draft, 210 m. length.
Pauillac: Tankers up to 34 ft. draft, 240 m. length.
Bassens: Vessels up to 9.40 m. – 11.00 m. draft, 250 m. length.
Blaye: Vessels up to 30 ft. draft.

HEALTH: Vessel should ask for Free Pratique by radio at least 12 hours before arriving at port. Message should be addressed to Saniport – Bordeaux routed via Bordeaux/Arcachon Radio. Otherwise, Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique, Master should radio Agent before arrival, advising full details.

Health Control: Hospital Saint Andre, 1me Jean Burguet, Bordeaux. Tel: 56.50.64.52.

RADIO: Arcachon Bordeaux Port Radio: Radiotelephony 1,862 kHz. Radiotelegraphy 421 kHz.

Port Authority by VHF: Calling band 156.8 MHz Channel 16. Traffic band 156.6 MHz Channel 12 (port). Traffic and 156.7 MHz Channel 14 (radar).

Pilots: Telegraphy: Watch on 500 kHz at the prescribed hours. Telephony: continuous watch on 2,182 kHz. VHF: Continuous watch on Channel 14.

Every vessel fitted with HF radio equipment shall keep a constant watch and be in contact with "Arcachon-Bordeaux-Port-Radio" Station when navigating in the area between the landing buoy and her berth, or at least watch at the sending times of this station, when moored and awaiting orders.

Every vessel fitted with VHF radio equipment, shall also keep permanent watch and maintain contact with the Port Operations Station on 156.6 MHz (Channel 12) when navigating in the zones indicated below, or when moored and awaiting orders.
Le Verdon zone: Call "Radar-Verdon".
Bordeaux zone: Call "Port-Bordeaux".

RADAR/VHF: Port radar is in operation in the Gironde estuary and approaches. Vessels must contact this station for navigation information by calling Verdon Port Radio on VHF Channel 12.

TUGS: Tug assistance is available as advised by the Pilot. Tugs will join vessels at the following places: In Verdon Roads for vessels mooring at Verdon. In Pauillac Roads for vessels mooring at Pauillac. At Buoy BA1 for vessels mooring at Ambes.

As a rule ship's tow-lines are used; when a tug line is required there will be an additional charge.

BERTHING: *Le Verdon Deep Water Terminal:* 2 containership berths, length 600 m., depth alongside 12.5 m. at LW; slip for quarter ramp Ro/Ro handling. Operations carried out 24 hours a day 7 days a week. 100 power points for reefer containers. 3 container gantry cranes (1×32 ton and 2×40 tons capacity below spreader). One is multi-purpose and can work with a 30 ton grab for bulk unloading.

Riverside Quays: 18 berths, depth alongside 5.0 m. – 8.5 m. at LW. Now available only for cruise ships and naval vessels.

Enclosed Docks: 2 basins joined by a lock 25 m. wide. Entrance effected by locks. Large lock 146 m. long 22 m. wide. Depth of water in the basins is maintained at 5.0 m. These are now used only for repairs and yachting.

Queyries: 250 m. long, depths offered are 7 m. alongside. 2×6 ton cranes.

Bassens-Amont: 850 m. long, depth alongside at LW up to 9.0 m. – 11.0 m (5 berths). The quay caters for general trade. Equipped with 2 Wellman cranes of 6 tons, 2 Mague cranes 8/10.5 tons, 2 Mague cranes 8/12 tons, 2 Caillard cranes 15/24 tons.

The heavy bulk storage zone has a capacity of 128,000 cu.m. It is served by two railway sidings with road/rail weighbridges for re-dispatch.

Two of the berths at Bassens-Amont are equipped to cater for molasses which can be stored in 3 reservoirs.

Bassens-Amont is also the centre of the ports phosphate traffic, bound for neighbouring industries and stocked in a silo depot, which is linked to the quay by a conveyor belt network.

During the last quarter of 1982, the bulk trades received at Bassens-Amont ceded their place to general cargo. In the context of this redevelopment, which enables better throughput rates and more flexibility, a 6,000 sq.m. shed has been built.

Letigo: The grain silos behind the quays are linked by an overhead continuous conveyor to a quayside gantry loader (throughput 1,200 t.p.h.) at Berth No. 417.

Bassens-Aval: 10 berths, total length 1,474 m. Depth alongside 11.0 m. at LW. 2 Mague cranes 8/10.5 tons, 2 Mague cranes 8/12 tons, 2 Caillard cranes 15/24 tons, 5 Cereti cranes 15/25 tons, 1 Duro crane 15/25 tons, 1 Mague crane 15/25/28 tons.

A bulk terminal is available with discharge capacity 2,000 t.p.h. Max. size: 120,000 d.w.t. and 250 m. LOA.

In addition there are facilities for heavy bulk goods, Ro-Ro; coal; forest products terminal; grain conveyors of 150 t.p.h., 400 t.p.h., 600 t.p.h. and 900 t.p.h.

Bulk Liquid Berth: Berth No.436 is a dedicated bulk liquid berth and caters for tankers carrying butadiene, methanol, phosphoric acid, turpentine and vegetable oil.

The environment of the berth meets the safety requirements for each of these commodities and a security company carries out surveillance and ensures safety and security.

Blaye: Main commodities at Blaye: Grain, liquid bulk and dry bulk.

Total quay length 390 m.

Dimensions of the largest vessel capable of being accommodated (tidal coefficient 45 at low water):

Deadweight tonnage: 15,000 tons (with a half load).
Overall length: 190 m.
Draft: 9.0 m.

Cranage: 1 Wellman crane of 2.5/6 tons (grab or hook, outreach 18 m.).

Dedicated handling gear:

Public Wharf (Berth 601): Liquid bulk unloader. Continuous dry bulk loader with conveyor belt network.

Grain Wharf (Berth 602): Bulk grain loading gantry and a conveyor to the SEMABLA silo, (throughput 12,000 tons per day). 2 suction unloaders (throughput 150 t.p.h.) for barges. 1 bagging and shore-to-ship bag loading unit (throughput 2,400 tons per day).

Weighbridges: 1 × road/rail and 1 × road.

Storage:
Sheds: 80,000 tons
Silos: 40,000 tons
Tanks: 13,000 cu.m.

The port has been deepened to provide access for vessels of 20,000 d.w.t. – 25,000 d.w.t.

Pauillac: Public berth for vessels drawing up to 10.35 m.

Left Bank Quays: 3 quays (No. 121, 122 and 123), have been developed to accommodate cruise liners. Max. LOA 210 m., max. draft 8.50 m. "Espace Maritime" at Shed No. 5 have been developed with all amenities for cruise liners.

Also see "General".

MEDICAL: All facilities available. Malaria and cholera vaccinations can be performed at the Military Hospital or at the Port Vaccination Centre (Shed 14).

TANKERS: *Pauillac:* Oil installation operated by Shell, 33 ft. alongside. *Ambes:* Terminal for tankers up to 210 m. length, 32 ft. 6 in. draft. Operated by Societe DPA and Esso. Also see "Shipmaster's Report" – dated June 1981.

There is a new private wharf at Ambes, catering for liquified gas tankers. Length, 125 m. Maximum ship's length 145 m. Max. draft 7.70 m.

Unloading by articulated arm which connects to ship's manifold. This manifold should be as close to the central perpendicular as possible.

Standard security measures for handling propane and butane. This berth belongs to Cobogal and has been allotted Berth No. 515.

Berth 501: Hydro Azote are currently building a plant for processing amonitrates. A jetty (Berth 501) is available in front of the plant, catering for tankers bringing supplies of liquid ammonia. Max. LOA 240 m. and max. draft 10.0 m.

Bassens: See "Report" dated March 1981.

DENSITY: Verdon 1023 to 1015. Pauillac 1026 to 1000. Ambes approximately 1000. Bordeaux approximately 1000.

FUEL: Vessels wishing to bunker during their call at Bordeaux-Le Verdon, shall make known their needs of quantity and quality to their Agents or consignees before arrival in port. Requests must be forwarded, 48 hours in advance (at least), to one of the bunkering Agents of the following companies:

Shell – Bassens. Tel: 56.06.29.20.
Esso – Worms. Tel: 56.31.69.85.
ELF/SIMA. Tel: 56.90.49.00.
B.P. Floirac. Tel: 56.32.97.01.
Total C.F.R. Tel: 56.06.40.62.

A very large proportion of the bunkering fuels comes from the Shell refinery at Pauillac. These fuel-oils are mainly intermediate oils made by viscosity mixing between 80 and 460 centistocks (at 50°). Orders must therefore be for a quantity of at least 400 tons.

The quality control of mixtures is carried out by the Shell refinery laboratory, whose opening hours are: Monday: from 0400 to 1630 hrs. Tuesday, Wednesday, Thursday, Friday & Saturday: from 0400 to 2000 hrs.

REPAIRS: ARMI, Face au 81 Rue Des Etrangers, 33300 Bordeaux. Tel: 56.50.35.73.

Ateliers et Chantiers Auroux, 7 boulevard Chanzy, Arcachon. Tel: 56.83.32.62.

Service de Travaux et d'Etudes Maritimes et Industrielles, 110 Rue Achard, BP 115, 33028 Bordeaux Cedex. Tel: 56.50.40.35.

DRY DOCKS: There are 2 dry docks and 5 small covered docks. Dimensions of the largest graving dock are 247 m. length 34 m. width 13.40 m. depth.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of alcohol per man.

AIRPORT: Situated 10 km. from Bordeaux. Frequent and Daily flights to most parts of Europe and North Africa. Good internal service.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

TELEPHONES: Can be connected on board vessels moored at quays in Bordeaux, Bassens, Ambes, Pauillac, and Verdon.

IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.

GARBAGE DISPOSAL: Skips are available alongside for galley waste.

Industrial waste collection is available from local company by containers of various sizes, contact Agent.

WASTE OIL DISPOSAL: Companies available locally, contact Agent.

GENERAL:

Mooring Regulations: Vessels fitted with radio equipment, which, for any accidental cause, (engine damage, fog, etc.) are obliged to moor or ground at any point in the area between the landing buoy "BXA" and the "Ponts de Pierre" (Stone Bridges) at Bordeaux and Libourne, must immediately indicate their mooring or grounding position, by cable or VHF Channel 12 to the Harbour Master, Bordeaux. In all cases, the text of the message must specify whether the moored or grounded vessels interferes or not with shipping.

Berthing: Berthing is carried out on the advice of the Pilot, following instructions from the Harbour Officers.

Special precautions are recommended during Spring Tide periods to ensure that vessels in the river are held fast to the quay.

The following instructions apply:

Special Instructions for Securing Vessels at the Quay During Spring Tide Periods (K > 90).

Given the disturbances caused by the strong currents of tides with a K of over 90, the securing of vessels on the quay must receive unremitting attention.

Pilots shall pay close attention to the mooring lines, for which the Master remains constantly responsible.

Masters shall follow Pilot's instructions and provide all means asked for in terms of both manpower and equipment.

A strict surveillance is necessary to ensure that lines remain correctly secured by adjusting them according to the height of the tides.

A sufficient number of crew shall be kept on board, to carry out any handling which might eventually be ordered by the Harbour Officers.

Fire Fighting: 1. All vessels berthed in the Port of Bordeaux, be they loading, discharging, or under repair, must have permanently on board a sufficient watch to keep effective surveillance, to take all preventive measures and to fight any fire on board.

2. It falls to the Master or the watch, and this under their sole responsibility, to use the signalling equipment at their disposal.

3. Communication and signalling equipment. Telephones and fire hydrants available on all quays.

4. Fire fighting is carried out under the direction of the Master, but gangs intervening, especially the fire brigade, remain under the command of their respective officers.

The ship's crew must be able to guide the rescue teams. A plan of the ship and her loading plans, in particular those showing the location of dangerous goods on board, shall be put at their disposal on arrival. Where there is a risk of the fire spreading, for which the Harbour Master is the sole judge, he shall lead operations and order all necessary steps to be taken to safeguard public interests.

REPORT: The following report was received from a Ship Operator in March 1981.

Michelins Reception Facilities at Bassens:

1. The equipment consists of 2 pipes: One 10 in. diameter with a normal capacity of 500 cu.m./hr. and the other 6 in. diameter. These capacity limits result from the meter which is fitted. Either pipe can be used independently according to conditions and features of the ship's pumps and equipment.

The absolute maximum pressure allowed in whole system is 10 bars.

Length of pipes:

2,315 m. for 10 in. pipe.

2,274 m. for the 6 in. pipe.

The equipment incorporates a meter post consisting of a Smith LB 250 volumeter normal temperature – 3 degrees normal pressure, 8 bars accuracy, 0.2 outputs of between 110 and 570 cu.m./hr. The equipment does not include a vapour return line.

2. Deliveries must be made by tanker vessels specifically designed and fully equipped for carriage and refrigerated liquid gases. The liquid must be delivered at a temperature of between −2° and −5° Celcius when measured at the ship's discharge connection.

The ship must be fitted with suitable pumping equipment, in full working order and of a capacity sufficient to maintain throughout the whole unloading operation and under the condition of temperature and pressure already specified, an hourly delivery rate at least equal 1/16th the total shipment and in any case not less than 100 cu.m./h. As indicating the pumps must be specifically designed for the movement of butadiene in the order that any premature failure, or suction of gas, be avoided. A further reason for the pumps and compressors being in perfect condition is that the quay is public and any delay prejudicial to the movement of vessels requiring to use it. The ship's discharge equipment must include a security device capable ensuring at all times, both under normal conditions and in the event of accidental or unforeseen mishandling that the delivery pressure at the connection point for the hose never exceeds 10 bars.

The ship must have lifting gear (derrick, hoist, etc.) with a minimum 2 tons capacity and sufficient reach to maintain the flexible hose at right height, even at low tide. The ship must be capable of completely emptying each tank and the systematic use of nitrogen must be avoided, as it is detrimental to the manufacturing process.

To enable receivers to prepare for cargo, following information required at least one week prior arrival of vessel.

1. The position of discharge outlets in relation to central axis of vessel and to the level of the deck.

2. Type and diameter and thread dimensions of the sampling connection.

3. Diameter and details of the ship's outlet union.

4. The details of the discharging equipment for each pump or compressor.

5. The normal and maximum rates of discharge and pressure of delivery should be given.

The vessel is equipped with 2 sampling positions in the middle and lower positions of each tank.

Notice of Arrival: Either the seller or the carrier must give to the Bordeaux Authorities (Port Autonome de Bordeaux) notice of the estimated arrival of the vessel at Bassens either 7 days advance of the tanker getting under way at the previous port of call should this be less than 7 days before arrival. Confirmation of the arrival of the vessel off the Gironde Fairway/Buoy (BXA) must be given to the Bordeaux Port Authorities by cable, telex or other means at least 24 hours in advance.

If the vessel is likely to arrive during a weekend, Michelin Bassens must be informed by Friday mid-day at the latest, otherwise operations will not be able to commence before 0800 hrs. on Monday.

Discharge: The ship's crew must scrupulously observe all general security regulations, together with any particular ones laid down by the officials appointed by the Bordeaux Port Authority to supervise the safety of discharging operations.

Receivers cannot be held responsible for any mishandling, excessive pressure or untimely purging that may occur during the discharge operation due to the vessel, or for the consequences of any failure to observe the security regulations by any person not employed by Michelin.

On arrival of the ship, Michelin, assisted by the crew, will connect up the shore line to the ship's outlets union by means of flexible hose. The ship's crew will be responsible for the use of their own lifting equipment (crane and derricks) for the raising of the flexible pipe to a sufficient level above the quay so as to take into account the tide. Jointly with representatives of the ship and the sellers, Michelin will proceed with, the drawing of samples from each tank (for quality control).

The Liaison of Discharging Procedures: Michelin's representatives are to be introduced to the crew members appointed to the discharging operation.

Throughout the duration of the discharging operations the rate and pressure of the output must remain constant and within the agreed limits in order that the metering equipment shall function correctly. On having completed discharge of the liquid from the last tank, the ship must cease pumping to permit:

The meter post personnel to by-pass the meters.

Michelin in conjunction with the representatives of the seller and the ship, to check the remaining cargo (the weight of liquid butadiene discharged thus being determined).

The gas can then be pumped out – the quantity being determined by measuring the difference in pressure and temperature of the ship's tanks, on the assumption that it contains only gas both before and after pumping out.

Unloading Completion: On the representatives of the sellers and the ship agreeing that the discharge of the butadiene has been satisfactorily completed, the receiver's personnel and the ship's crew will uncouple the flexible hose.

In the event that after complete discharge of all liquid, it is agreed between the ship and the seller to pump out the gas, the quantity involved will be calculated by measuring the difference in pressure and temperature of the ship's tanks, on the assumption that they held only gas both before and after pumping.

SHIPMASTER'S REPORT: June 1981.

Bordeaux – Bec d'Ambes: If proceeding further up river then Sea Pilot leaves at Le Verdon and River Pilot boards. Pilot gives an Inwards Declaration which (different from EEC check list) is to be completed and handed to Port Officer after boarding.

Reference Admiralty List of Radio Signals, Volume 6, 1980, Part 1, Page 205, paragraph (2), vessels wishing to enter La Gironde should address the 24 hour message to "Capiport Bordeaux" and 3 hours before entering French Territorial Waters should request, via 'Capiport' permission to enter La Gironde. These messages are free of charge.

Port regulations require the berthing (River Pilot) Pilot to stand-by, together with 1 tug, until a loaded vessel has lightened to 28 ft. fresh water maximum draft.

When berthing starboard side to then one tug on port bow and second tug just for pushing.

Usually, first ropes on board are one shore head wire and one shore head breast. Final moorings usually 2 shore heads, 2 shore breast, (fore and aft) and 2 shore stern lines, and 2 springs each end from ship.

The shore moorings consist of a chain cable connected to the shore, this is connected to a 57 mm. wire which is made fast on board. The wires are hove on board by means of a messenger (ship) which is attached to a small size, long length pennant attached to the 57 mm. wire. The shore end of the 57 mm. wire is attached to a chain cable thus creating a 'catenary effect' which proves very good in keeping the vessel alongside. For berthing there is one shore rigger each end to advise and assist.

For unberthing one rigger boards to assist in singling up to 1 shore wire and one back spring each end. He then goes ashore by pilot ladder. Vessels berth day and night depending on tide.

Agent requires in advance the distances from bow and stern to centre of manifold.

AUTHORITY: Port Autonome de Bordeaux-Le Verdon, Palais de la Bourse, 2 Place Gabriel, 33075 Bordeaux-Cedex. *Tel:* 56.90.58.00. *Telex:* 570617 Pablv. *FAX:* 56.90.58.77. *Cables:* Poronom – Bordeaux. *Contact:* A. Combeau, Port Director. Commandant Bozec, Harbour Master – 56.90.59.31 (32, 33, 34).

BOULOGNE SUR MER: 50.43 N. 01.35 E. (See Plan)

PORT LIMITS: *Seaward Boundaries:* 4 nautical miles from the piers (e.g. Limits of Pilotage Area).

DOCUMENTS: As for "Calais".

PILOTAGE: Compulsory for vessels over 50 m. length. Vessels can communicate with Pilot Station, tel. 21.31.36.08, through Boulogne Radio. When pilot launch is at sea, contact by VHF Channel 12.

The most favourable boarding point is between the sea buoy "Approaches Boulogne" and the wreck buoy situated 1.5 miles to the South, or slightly nearer the land if there are strong Westerly winds. In any event, the surf created by the Carnot breakwater must be avoided by keeping at least 1 mile off shore. If Pilot is not immediately available, vessel must wait in Outer Roads, if necessary at anchor, until further instructions received. On no account should vessel attempt to enter Carnot Roads without Pilot.

ANCHORAGE: The outer anchorage for large vessels is midway between Ophelie Buoy and the Carnot Breakwater. Anchorage prohibited in the main approach channel.

RESTRICTIONS: Entrance depends on tidal conditions. For larger vessels best to enter the breakwaters at slack water which occurs 2 hours before time of high tide. Arriving vessels are obliged to contact Harbour Master's Office immediately by radio, or VHF Channel 12.

MAX. SIZE: For outer harbour: Length, 230 m.; draft, 10.67 m. springs, 11.00 m. neaps. Max. d.w.t., 35,000 (approx.). Bassin Loubet: Length, 130 m.; draft, 7.5 m. springs, 7.75 m. neaps.

HEALTH: Pratique given by Customs Officers who board on arrival. In case of suspected disease on board, Master should radio Agents prior arrival advising details.

RADIO: Boulogne Radio, call sign FFB, also on VHF Channel 25.

VHF: Harbour Master's Office: Call "Boulogne Port" on Channel 12.
Pilotage: Channel 12.
Tugs: Channel 12.
CROSSMA Gris Nez: Channel 16.

RADAR: No Port radar service at present.

TUGS: 2×14 ton tugs (1,200 h.p.). One tug is fitted for firefighting.

The tugs meet vessels as requested by Master on Pilot's advice.

BERTHING:
Sarraz-Bournet Dock: Europe Quay, 775 m., depth 11 m.; Ore Quay, 240 m., depth 11 m. max. rate 12,000 tonnes per day.
Carnot Basin: Mooring on dolphins for Ro-Ro vessels up to 146 m. long, beam 14 m. – 32 m., depth 5.0 m. Connection to the open area by ramp capable of taking up to 175 tons.
Loubet Basin: (Closed by a lock, depth 5.50 m.) Huguet Quay, 240 m. for Ro-Ro/Lo-Lo vessels up to 132 m. LOA; Voisin Quay, 700 m. (for refrigerated fishing vessels up to 135 m. LOA).
Fore-Port and Tidal Port: Cross-channel terminal with 3 ramps (one of which is dual level/double lane for new generation car ferries), capacity 40/175/144-228 tons. Can accept car ferries up to a length of 145 m. and a draft of 4.50 m.

Direct connection by railway with Paris.

The port offers 70,000 sq.m. of warehouses and 150,000 sq.m of open storage area. 250,100 sq.m. of cold storage space.

A silo enables 42,500 tons of clinker to be stored for loading directly on to vessels at a rate of 1,200 t.p.h.

CRANES/EQUIPMENT:
Quai de l'Europe:
- 2×3 tonne cranes.
- 1×6 tonne crane.
- 3×12.5 tonne cranes.
- 2×30 tonne cranes.
- 1×35 tonne covered gantry crane.
- 1×1,000 t.p.h. conveyor belt for clinker and ore.

Ore Quay:
- 2×25 tonne gantry cranes.

Carnot Berth (Ro-Ro):
- Single lane, single deck ramp.
- Length: 70 m.
- Lane width: 4.50 m.
- Pontoon at end of ramp of 28 m.×28 m.
- Max. Load: One lane for 38 tonne trucks.

Quai Amiral Huguet:
- Ro-Ro berth for bow, stern or side ramps.

Quai Jean Voisin:
- 3×6 tonne cranes.

DENSITY: 1026.

FRESH WATER: Supplied by pipeline to all berths.

FUEL: SMCL quay can supply marine fuel. Quay is limited to vessels less than 100 m. length and 5 m. draft, otherwise fuel obtainable by tanker lorry from Dunkirk.

CONSULS:

Denmark	21.33.92.22.
Finland	21.30.44.55.
Germany	21.33.92.33
Greece	21.30.31.11.
Norway	21.33.92.22.
United Kingdom	21.87.16.80.

REPAIRS: Only quick repairs may be effected because of congestion at the quays. Slipway for vessels up to 2,500 tons.

SURVEYORS: Soemari, 52 Rue Blanzy – Pourre, 62200, Boulogne-sur-Mer. Tel: 21922200. Telex: 110013.

Bureau Veritas, Building A, Boulevard Gambetta, 62200 Boulogne-sur-Mer. Tel: 21315240.

GANGWAY/DECK WATCHMEN: By crew.

OPENING/CLOSING HATCHES: Performed by crew.

CARGO GEAR: Load/discharge effected by shore gear or ship's gear.

REPATRIATION: Facilities available.

AIRPORT: Le Touquet, 50 km. from Boulogne.

TIME: GMT plus 1 hour in Winter and GMT plus 2 hours in Summer.

HOLIDAYS: No work Sundays and legal holidays.

POLICE/AMBULANCE/FIRE: Police, Tel: 21.83.12.34 or in case of Emergency Tel: 17. Ambulance/Fire, Tel: 18.

EMERGENCY CO-ORDINATION CENTRE: At Sea: Crossma, Gris Nez. Tel: 21872187. Telex: 130680. In Port: Port Directorate and Harbour Master's office.

TELEPHONES: Can be connected on board vessels at Quay de l'Europe.

SERVICES: There are several private companies which carry out repairs, whether for sheet-metal, mechanical or electronics.

Supply of charts, nautical publications, sounding paper, availability of Notice to Mariners etc., contact shipping agents or Harbour Master's Office.

BANKS: Banque de France, 1 place d'Angleterre. Telex: 110902.

Societe Generale, 60 rue Victor Hugo. Telex: 110044.
Union Francaise de Banques (U.F.B.). Telex: 110999.

STORING: See "Prelims".
1. Storing by lorries.
3. Lorries can proceed alongside at berth.
4. Ship's stores can be loaded by any means.
5. Fuel is free of taxes, the same applies to provisions (within proportions estimated by Customs with relation to the number of crew members).

SHORE LEAVE: Permitted, no restrictions.

SEAMAN'S CLUB: Quai Chanzy. Tel: 21.31.73.20.

AUTHORITY: Service Maritime des Ports de Boulogne-sur-Mer et Calais, 96 Boulevard Gambetta. Postal address: B.P. 689, 62321 Boulogne Sur Mer Cedex. *Tel:* 21103500. *Telex:* 110968 Sermar F. *FAX:* 21.83.42.76.

Capitainerie du Port, B.P. 756, Jetee Sud-Ouest, 62321 Boulogne-Sur-Mer Cedex, France. *Tel:* 21.80.72.00, 21.31.52.43. (24 hours). *FAX:* 21.87.28.79.

BREST: 48.24 N. 04.30 W. (See Plan)

DOCUMENTS: See "Dunkirk".

PILOTAGE: Pilots do not stay out at sea, but only go to meet ship at estimated time of arrival as sent by ship. Normally pilot boat positioned on the line Toulinguet lighthouse and Beuzec (or Charles Martel) buoy, about 2.5 miles N.W. Toulinguet lighthouse. If strong S.W. wind, pilot boat waits for ship at entrance of Camaret Bay, about 1.5 miles N.E. Toulinguet lighthouse. If sea too rough to allow pilot boat to sail out, boat waits for ship at entrance of Brest Roads, near Portzic lighthouse.

Ships proceeding Brest must send last message giving ETA Pilot station (stating if *local time or GMT*), about 5 hours before arrival. Message to be addressed *"Brest Pilot Office"* through Brest Le Conquet radio station (call sign FFU). Day and night watch at pilot office. Radio station phones message direct as soon as received. Any alteration in ETA should be passed pilot office immediately.

Pilot boat sails from Brest harbour about 1.5 hours before ship's ETA, and 0.5 hour later pilot boat takes radiotelephony watch on 2182 kHz, calling ship from time to time on same frequency. Ships fitted with radiotelephony should listen and call on 2182 kHz. Pilot boat also equipped VHF Channels 16, 9, 6, 12 and Pilot office Channel 9.

ANCHORAGE: At Pilot's discretion. Anchoring in main approaches restricted as indicated on charts.

RESTRICTIONS: Entry subject draft and height of tide on day in question. Two entrances to port, one dredged to 6 m. below zero of charts and the other 5.8 m. below zero. Depth at quays varies according berth from 6 m. to 11 m. below zero.

MAX. SIZE: Inside harbour, max. length 320 m. Draft up to 35 ft. subject to tide.

HEALTH: If from foreign port, cable Maritime Health Service 48 or 24 hours prior arrival requesting Free Pratique. If risk of contagious disease exists, vessel will be held in roads until cleared. If from another French port, Free Pratique automatic.

RADIO: Brest Le Conquet – FFU.

VHF: VTS in operation.
Also see "Pilotage".

TUGS: Two port tugs, 1,900 h.p. and 2,900 h.p. Tugs join vessel at main entrance to port. Marine National places tugs at ship's disposal for all port movements. Generally, tow rope supplied by tug at additional charge.

One French salvage tug belonging to the Abeille Company is stationed at the port, but only gives assistance for vessels requiring aid outside the port area.

BERTHING: According to draft, ships may have to wait in roads before berthing, depending on height of tide in fairways. Also see "Restrictions".

Commercial Harbour Facilities:

Dock	*Quay*	*Utilisation*	*Length (m.)*	*Depth (m.)*	*Equipment*
1	West	Wine, Other goods Railways	212	5.30	Mobile cranes
3	"Eperon"	Refrigerated goods, Potatoes, other goods.	140	9	2 cranes 3 ton at 22 m.
5	West	Refrigerated goods, Potatoes, Fruit, Other goods, Railways	174	7	2 cranes 6 ton at 22 m.
5	North	Refrigerated goods, Potatoes, Other goods, Railways	330	7	mobile cranes
5	East	Cereals, Wood, Refrigerated Goods, Other goods, Railways	440	10 – 8	1 crane 12 tons at 30 m. 2 cranes 6 ton at 22 m.
6	West	Hydrocarbons, Molasses.	150	8	
6	East	Cereals, Phosphate, Manioc, Soya Beans, Soya Meal, Soya Oil.	175	9	3 cranes 8 tons at 30 m. Conveyor belts (550 t.p.h., 1,000 t.p.h. in near future).
6	Coaster	Not in use.	110	6	
6	South	Containers, Railways, Soya Beans, Soya Meal and Manioc.	230	12	1 crane 40 ton at 24 m. 2 cranes 8 tons at 30 m. Conveyor belts (1,000 t.p.h.)

Complete area of the Port: 250 hectares.

Storage:

1. In open air 100 hectares (with the Industrial Zone near Dry Dock No. 3).
2. Covered sheds 35,750 sq.m.
3. 3 silos (87,000 tons) and 1 silo (20,000 tons).
4. Refrigerated shed 21,000 cu.m. and shortly 63,000 cu.m.

BULK HANDLING FACILITIES: See "Berthing".

STEVEDORES: Agent has responsibility of making all arrangements for unloading, and is in touch with stevedores who arrange necessary gangs.

MEDICAL: Hospitals and clinics available. In the case of ship needing medical assistance, request should be addressed to Maritime Health Service through Conquet Radio Station, advising ETA, where vessel coming from and state of patient.

TANKERS: One berth for receipt of refined products destined for local storage tanks. Berth length 142 m., dredged alongside to a depth of 10 m. below zero of charts over an area 250 m. long and 30 m. wide.

FRESH WATER: All berths have fresh water supply. Apply to Chamber of Commerce who make necessary arrangements. Loading rate 13-15 t.p.h.

FUEL: Delivered by Societe de Depot des Petroles Cotiers and by Societe Maritime des Petroles.

CONSULS: The following countries are represented by Consuls at Brest:

Belgium
Chile
Denmark
Finland
Germany
Netherlands
Norway
Portugal
Spain
Sweden

REPAIRS: Repair Quay No. 1 at the South of the dry dock No. 2. Length: 320 m.; Depth: 9 m. to 9.50 m.

Repair Quays Nos. 2 and 3. Length: 608 m.; Depth: 8.30 m. to 10.70 m. Can accommodate vessels up to 550,000 d.w.t.

Repair Quay No. 4. Length: 400 m.; Depth 11 m.

Repair Quay No. 5. Length: 400 m.; Depth: 12.5 m.

These two quays are situated to the North and to the South of the dry dock No. 3.

The 5 floating repair piers totalling 1,700 m. in length in water at a depth varying between 9 m. to 12.5 m. at the lowest tide, and connected to a tanker cleaning and bunkering station specially equipped to handle slop and residue from ship tanks.

Several modern lifting machines, among which:

1 crane of a capacity of 80 tons at 25 m.

1 crane of a capacity of 150 tons at 38 m.

Piers and dry docks equipped with electricity, steam, compressed air, oxygen, acetylene, telephone, potable water and fire fighting equipment.

DRY DOCKS: *No. 1:* Dimensions 225 m. by 26.77 m., entrance sill 4 m. below datum, situated at the Northeast angle of Basin No. 5. The entrance lock can receive 2 vessels simultaneously, 1 of 75 m. length and the other of 150 m. length, with some adjustments.

Max. draft, at Spring tides: 11.50 m.; at neap tides: 10 m.

No. 2: Dimensions 338 m. by 55 m. Can accept tankers of up to 280,000 d.w.t. Entrance sill 7.25 m. below datum. Dock situated in the Southeast of the Industrial Port Zone. Can accept vessels of the following dimensions.

At mean Spring tides: length 335 m.; beam 50 m.; draft 12.50 m.

At neap tides: length 335 m.; beam 50 m.; draft 10 m.

No. 3: Dimensions 420 m. by 80 m. Can accept vessels of 550,000 d.w.t. Entrance sill: 9 m.

TANK CLEANING: Station situated at the Southern extremity of the East Mole. Can operate 4 Victor Pyrate machines simultaneously. Equipped with 3 boilers to supply steam, 3 pumps, oily water separator and an extractor for solid residues.

The tank-cleaning station is connected by pipeline to Repair Quays No. 1, 2 and 3 where tankers of 550,000 d.w.t. may be accommodated.

The new tank-cleaning and bunkering station, situated behind the dry-docks No. 2 and 3 is operational.

This station is connected by pipelines to dry docks No. 2 and 3, all repair quays and so to the 6 South for bunkering facilities.

It includes four sections:

A tanker cleaning section with oil-water separator (2,000 cu.m.p.h.).

An oil-treatment section to transform the recovered oil into commercial products;

A bunkering section with tanks of 35,000 cu.m.

A section that is able to separate the solid residues of tankers.

WATCHMEN: Compulsory for ships carrying dangerous materials, non gas-free tankers, vessels with chemical products, munitions, etc.

CERTIFICATES:

Nationality.
Gross Tonnage.
Classification.
Derat.
Vaccination.

CUSTOMS ALLOWANCES: Tobacco, Wine/Spirit. Ship's provisions must be under seal.

AIRPORT: At Guipavas, 7 km. from Brest – 4 daily services to Paris for onward connections.

TIME: Local time GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Police 98444850 and 98445861; Police Secours 17; Ambulance and Fire Brigade 18 or 98442766.

TELEPHONES: Can be placed aboard at certain berths.

SERVICES: Degassing station, tank-cleaning and slop discharge, adjustment of chronometers, chart and document department, weather forecasting, permanent daytime service for signing on crew, barometer adjustment. Also Compass and D/F adjusting.

Port Weather Service: Port Office, 30 bis, Quai Commandant Malbert.

Health Service: Quai Commandant Malbert.

DEVELOPMENTS: A new port industrial zone with an area of 100 hectares, and frontage of approx. 1,800 m. which will enable the construction of quays with depths of 10 m. – 12 m.

Furthermore, the Port is studying a vast plan to develop the commercial port, so that the latter may adapt itself to the requirements of modern maritime transport.

AUTHORITY: Port de Brest, Direction Departementale de l'Equipement, 2 rue Alderic Lecomte, 29200 Brest Cedex, France. *Tel:* 98.31.41.02 (12 lines). *Telex:* 940586. *FAX:* 98.31.41.14. *Contact:* M. Redoulez, Ingenieur des Ponts et Chaussees.

CAEN: 49.13 N. 00.21 W. (See Plan)

DOCUMENTS:

3 copies Crew List.
3 copies Provisions List.
3 copies Crew Personal Effects List.
Derat Certificate or Exemption.

PILOTAGE: Pilot boat is on station from 2.5 hours before HW until 3 hours after HW. Vessels can contact the Pilot on VHF Channels 12 and 16. The pilot boat is stationed in the outer port of Ouistreham and goes out to the roads on vessels approach. International code flag signals are used to call Pilot.

Caen Pilot boat has a black hull with white stripe. The words "Pilote Caen" are written in white letters on the hull. During the Summer months the pilot boat is replaced by a launch bearing the same markings. As soon as the Pilot boards he will hand the Master an Entry Declaration to be completed.

ANCHORAGE: While waiting for the tide vessels may anchor in the vicinity of the light-buoy in Ouistreham Roads. The position of this buoy is Lat. 49° 19' 50" N., Long. 00° 14' 18" W. The buoy is positioned in depth of 10 m. Anchorage is open to winds from West through North to East; good holding ground. Currents do not exceed 2 knots at spring tides.

RESTRICTIONS: Dimensions of locks – East Lock length 181 m., width 18 m. West Lock length 225 m., width 28.45 m.

The locks are open to navigation from 2 hours before HW to 3 hours after HW. The locks can be used up to a maximum of 1 hour before/after these times by special permission of the Harbour Master and payment of additional dues.

Maritime Canal, length 14 km. The canal is dredged to 9.89 m. depth up to Herouville Dock. Vessels proceeding to the docks at Herouville and Calix must pass 2 bridges: Colombelles 30 m. wide and Blainville (a new bridge under construction with a width of 40 m., completion expected June 1994).

Vessels proceeding to new dock must also pass the bridge at Calix, 21.76 m. wide. Maximum speed authorised in the Maritime Canal is 7 knots.

Maximum air draft for New Dock and St. Pierre Dock, 33 m.

MAX. SIZE: *Daytime:* Length 205 m., beam 23.5 m., draft 28.8 ft., sea water.

Night-time:

Blainville/Herouville	Length 160 m.	Beam 20 m.	Draft 25.9 ft. SW.
Calix	Length 150 m.	Beam 20 m.	Draft 25.9 ft. SW.
New Dock	Length 135 m.	Beam 16 m.	Draft 21.4 ft. SW.

HEALTH: Free Pratique is automatic for all ships. Health control is carried out by Customs Officers under the direction of the Havre Port Health Office. For ships coming from ports in Africa, Asia, or Pacific Islands a Maritime Declaration of Health is required.

In case of suspected epidemic or fever on board Master must advise the port authorities who will instruct him to proceed to an appropriate anchorage to be boarded by the Port Health Doctor.

RADIO: Nearest radio station Boulogne Radio, call sign FFB.

VHF: Vessels may communicate with the Harbour Master's Office by VHF Channels 12 and 68. This service only operates during the hours when the locks are operating.

TUGS: The use of 1 or 2 tugs is recommended for vessels over 16.50 m. beam.

BERTHING:

Dock	*Quay*	*Facilities*	*Length* (m.)	*Draft* (m.)(F.W.)
Saint Pierre	Vendeuvre	Reserved for pleasure boats	280	4.0

	Mole a Charbon	Private berth, 4 cranes 8 t	200	8.95
Blainville	Blainville	Cereals machinery 2 units, rate 1,000 t.p.h. 1 crane 26 t; 3 cranes 20 t; 2 cranes 26 t	560	8.95
Ouistreham	Fore Port	Car Ferry Berth No. 1	140	5.0 (SW) at LW
		Car Ferry Berth No. 2	170	7.0

Note: A second car ferry berth, fitted with a double level bridge, able to receive the new generation of ferries is available. The berth receives ships up to 165 m. LOA.

STEVEDORES: Arranged by Agent on basis of ETA provided by vessel before arrival.

MEDICAL: Doctors and hospital facilities available.

TANKERS: There is a tanker berth (D.P.C.) in Calix Dock, max. draft 8.60 m. Gas-freeing is prohibited.

FRESH WATER: Available at all berths, rate about 5 – 10 t.p.h.

FUEL: Can only be supplied by tanker lorries.

CONSULS: The following countries are represented locally:

Denmark Tel: 31.72.35.30 Norway Tel: 31.52.04.74
Finland Tel: 31.97.33.27 Sweden Tel: 31.82.21.76

REPAIRS: Deck and machinery repairs can be carried out by local workshops. Nearest dry docks at Le Havre or Cherbourg.

WATCHMEN: Not compulsory during daylight hours from 0600 hrs. to 1800 hrs.

OPENING/CLOSING HATCHES: This work is normally carried out by the crew.

CUSTOMS ALLOWANCES: Amount of tobacco and alcohol for crew consumption must be declared on the Stores List. Quantities held out of bond are at Customs discretion.

REPATRIATION: Can be arranged.

AIRPORT: Situated 12 km. from the port. There are no regular services, but an air taxi with 5 seats can arrange connections to international airports.

TIME: GMT plus 1 hour or GMT plus 2 hours in Summertime.

HOLIDAYS: Work is carried out on legal holidays. No work on "Jours de Fetes" and Sundays.

POLICE/FIRE/AMBULANCE: Police Tel: 17; Fire Tel: 18; Ambulance Tel: 18.

TELEPHONES: Can be connected on board ships. Quayside telephone situated in Blainville Dock.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: On request from the Agent, skips are provided at the ends of the quays, as near as possible to the ship.

WASTE OIL DISPOSAL: No facilities.

SEAMAN'S CLUBS: None.

AUTHORITY: Ingenieur des Ponts et Chaussees, Chef de l'Exploitation, Direction Departmentale de l'Equipment, B.P. No. 517, 14035 Caen Cedex. *Tel:* 31.45.30.90. *Telex:* 170213 FT.

CALAIS: 50.58 N. 01.50 E. (See Plan)

DOCUMENTS:

Ship's Register.
Inwards Declaration.
Manifest of Cargo.
Bill of Lading.
3 Lists of Provisions on board.
4 Lists of Articles held by Crew.
3 Lists of Crew.
List of open spaces.
Health Certificate, endorsed by Master on arrival.
Derat or Exemption.
For tankers, Certificate of Cargo Specification and Certificate of vessel's suitability to transport inflammable liquids in bulk.

PILOTAGE: Compulsory when entering or leaving harbour, except for ships less than 50 m. length. Pilotage area: 3 miles from piers. Ships required to give notice of their arrival 18 hours before, through Boulogne Radio. Pilot waits between buoys CA4 and CA6. Pilot boat: Black, white side stripe, bearing the inscription "Pilote Calais". She is equipped with VHF, Channel 6 and Channel 16.

ANCHORAGES: North of "CA4" Buoy, 25 m. deep, sand and gravel. Good anchorage. When bad weather from North, ships are advised to stand out to sea or anchor in the roads of Les Dunes (Near Goodwin Sands – English Coast). Ship will receive instructions from Pilots or Harbour Captain's Office when to enter roads of Calais.

RESTRICTIONS: Harbour channel 230 m. wide. In channel and outer harbour, depths are maintained at 9.0 m. MWL. Vessels should enter harbour preferably about 2.5 hours before high tide about 2.5 hours after high water.

MAX. SIZE: "Bassin Carnot", 150 m. max. length; "Bassin Ouest", (West Dock) 110 m. max. length; "Quai P. Devot", 190 m. max. length; "Bassin Carnot", 19 m. max. beam; "Bassin Ouest", 16 m. max. beam. 9.15 m. max. draft. Eastern Dock, 245 m. max. length, 11.50 m. max. draft. Port accessible to vessels of 45,000 d.w.t.

HEALTH: Sanitary Control can arrange Derat and Exemptions. Port Sanitary Control, 21-23 rue du Commandant Bonningue, 62100 Calais. Tel: 0321-977741. Telex: 160758 F.

RADIO: Messages through Boulogne Radio. ETA must reach pilotage station and Harbour Master's Offices 18 hours before arrival (Telex: 160758 F. Fax: 0321-340892).

VHF: When near Calais, 2 hours before arrival, ships equipped with VHF must call Harbour Master on Channel 12.

TUGS: Generally join ships at end of the piers. Towing ropes are generally ships own but can be supplied by tug.

BERTHING: Max. height of tide 7.30 m. Depth on dock sills 2 m. LWOST.

At West dock, entrance between 1.5 hours before and half an hour after high tide. In Bassin Carnot, entrance between 3 hours before and 1 hour after high tide.

There are 2 berths equipped for handling Roll-on/Roll-off traffic, situated in Bassin Carnot.

Eastern Dock: The new deep water dock has direct access to the sea and 3 multi-purpose berths. 4×40 tonne multi-purpose cranes are available.

Outer Harbour: One berth equipped for handling Ro-Ro traffic in the N.E. part of the harbour.

TANKERS: Oil tankers are not allowed to enter harbour. Small liquid sulphur and suphuric acid tankers are accepted at "Bassin Carnot". Tankers are allowed to enter harbour only by daytime. They must leave as soon as operations are finished. Hoses 10 in. and 12 in. in diameter. Barges discharged with a 10 in. hose.

CRANES:

Paul Devot Quay	Electric cranes – 15 tons with automatic scoop	2
Transit Station	A block of 2 gantries able to handle a load of 40 tons (containers)	
Carnot Basin		
Vistule Quay	Electric cranes – 6 tons	2
Loire Quay	Electric cranes – 6 tons with automatic scoops	3
	Electric cranes – 12 tons with automatic scoop	2
Crespin Quay*	Electric cranes – 6 tons with automatic scoops	4
Fournier Quay*	Electric cranes – 12 tons with automatic scoop	2
Volga Quay	Electric crane – 6 tons with automatic scoops	1
Tidal Basin	Electric cranes – 40 tons	4

*Possibility of using cranes at Paul Devot Quay.

Dry Dock: One electric crane – 15 tons, 2 mobile cranes "PPM" of 18 tons complete the lifting machinery of the Public Equipment of the Port and one crane of 30 tons.

BRIDGES: Swing bridges (West Dock) and draw bridges (Bassin Carnot) are situated on sluices.

STEVEDORES: Informed by Agent of tonnage, nature and condition of cargo.

MEDICAL: All facilities available.

DENSITY: Salt.

FRESH WATER: Supplied from hydrants on wharves.

FUEL: Any fuel can be supplied by tank lorry of large capacity.

CONSULS:

Netherlands, A. Ravisse, 12 Bd. des Allies. Tel: 0321-965503.
Denmark, M.Lasuen, Place de Suede. Tel: 0321-344400.
Finland, H. Ravisse, 12 Bd. des Allies. Tel: 0321-965503.

CALVI, Corsica: 42.34 N. 08.46 E. (See Plan)

DOCUMENTS:
- 3 Crew Lists.
- 3 Passenger Lists.
- 1 Provisions List
- 1 Cargo List.
- 1 List of Articles (new and Customs-barred) in possession each crew member – cameras, binoculars, radios, cigarettes, spirits, etc.
- 1 Health Declaration.

PILOTAGE: Not compulsory. If required, telephone Pilot Station at Bastia, Tel: 95.31.50.95.
ANCHORAGE: Outside port for cruise vessels.
MAX. SIZE: Draft 6.5 m.; length 140 m.
RADIO: Within 50 miles call Ajaccio Radio VHF Channel 16. Then connected over Channel 23 to telephone network.
TUGS: None available.
BERTHING: 3 wharves, the main wharf being the Corsica ferry berth.
STEVEDORES: 24 hours accurate ETA necessary for ordering gangs. No work on Sundays and official holidays.
CARGO GEAR: Only a few nets and slings available; all other gear must be supplied by ship. Ship's derricks used.
FRESH WATER: Available at very slow pumping rate.
FUEL: Diesel fuel available.
REPAIRS/CONSULS: None.
AIRPORT: Calvi (5 miles), regular flights to Nice.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
AUTHORITY: Capitainerie du Port, Quai Landry, 20260 Calvi, Corsica. *Tel:* 95.65.05.21.

Affaires Maritimes, Quai Landry, 20260 Calvi, Corsica. *Tel:* 95.65.01.71.

CANCALE: 48.40 N. 01.51 W.

Used by fishing and pleasure vessels only.
PILOTAGE: Pilot available from St. Malo. Tel: 99.81.63.59.
BERTHING: 2 public wharves, depths from 0.5 m. to 13 m. at Spring tides.
CRANES: One 3 ton crane available.
MEDICAL: Hospital facilities available at St. Malo, 15 km. distant. Tel: 99.81.60.40.
FRESH WATER: Available in small quantities.
FUEL: Diesel oil available by truck and by pipeline on wharf.
AIRPORT: Nearest at Dinard, 30 km. away.
AUTHORITY: Subdivision Maritime de l'Equipement, Quai du Pourquoi Pas., 35402 Saint Malo, France. *Tel:* 99.56.07.24. *Telex:* 950197. *FAX:* 99.40.11.70. *Contact:* Xavier La Prairie, Engineer.

CANNES: 43.33 N. 07.01 E. (See Plan)

DOCUMENTS:
To be sent on departure from previous port:
- 3 copies of Passenger List.
- 1 copy of Crew List.

Required on arrival:
- 4 copies of List of Passengers, showing Christian name, surname, age, date and place of birth, nationality.
- 2 Crew Lists.
- 5 copies of a Special Arrival form (supplied on arrival).

PILOTAGE: No Pilot station at Cannes. A tender with Company's flag on top of its mast will meet the vessel: *(a)* If ship is proceeding to anchorage No. 1, in Golfe de la Napoule, about half a mile South of the lighthouse at end of Cannes port Pier (Quai Lauboeuf); *(b)* If ship is proceeding to either anchorage No. 2 or 3, in Golfe-Juan, half a mile North of Ile Ste Marguerite.

The tender will lead to anchorage and will give 1 blast of the siren when correct position has been reached. At night, tender has a fixed white light at top of its mast, which replaces the flag. Should it not be possible to advise by wireless before arrival at anchorage and weather conditions making it necessary for ship to anchor at either position No. 2 or 3, boat will meet ship in Golfe de la Napoule, 2 miles South of Cannes port lighthouse. In this event, ship must proceed to anchorage No. 2 or 3 as appropriate, steaming to South of Ile St. Honorat, whilst tender will proceed by channel between Ile Ste Marguerite and the mainland.

ANCHORAGE: Advice of anchorage is passed to Master via Grasse Radio or Monaco Radio, VHF Channel 16 usually about 1 hour before arrival. There are 3 anchorages, any of which may be used according to the weather:

No. 1 off the port of Cannes, approximately half a mile South of end of breakwater, used by calm sea or by East or N.E. winds.

No. 2 is situated to North of Ile Ste Marguerite, used by S.E. or S.W. or South winds.

No. 3 to the East of Cap de la Croisette, used by West or N.W. winds.

It could happen during the call, winds may change direction and movement from anchorage No. 1 to No. 2 or No. 3 become necessary. Shift takes about 1 hour.
HEALTH: Port officials will embark immediately the ship anchors. Free Pratique may be granted by wireless telephone 1 hour before arrival at ship's surgeon request stating: "No illness on board".
VHF: Port Authority on Channel 12, call sign "Cannes Port".
FRESH WATER: One water barge (capacity 65 tons) and 2 water barges (capacity 20 tons) available.

12 hours notice required for orders up to and including 100 tons. 24 hours notice required for amounts in excess of 100 tons. Pumping rate 30 – 40 cu.m./hr. with one or two boats.
GANGWAY/DECK WATCHMEN: Watchmen for gangways should be provided by ship and passengers are requested to present their landing cards every time they use the gangways.
AIRPORT: Cannes Mandelieu, 5 km.
GARBAGE DISPOSAL: Available.

Cheyresy et Fastout. Tel: (33) 04.93.39.36.12. Fax: (33) 04.93.68.54.55.

Shema. Tel: (33) 04.93.49.24.39. Fax: (33) 04.92.97.67.28.
WASTE OIL DISPOSAL: Collection service available from companies mentioned above.
AUTHORITY: Capitainerie du Port Gare Maritime, 06400 Cannes, France. *Tel:* (33) 04.92.98.70.00. *FAX:* (33) 04.92.98.70.01. *Contact:* M. Mortreux, Port Director.

CHERBOURG: 49.38 N. 01.38 W. (See Plan)

DOCUMENTS:
- Declaration of Health.
- Manifest of Provisions on Board.
- Manifest of Crew's Possessions.
- Manifest of Cargo – in certain cases.
- Manifest of Equipment.

DEEP SEA PILOTAGE: Pilots board off "CH1" Buoy. Radio ETA to Deep Sea and Coastal Pilots Ltd., Telex 911847 Pilots G or "Cherbourg Pilots" Telex 170952 or "Pilotage Hauturier Cherbourg" Telex 171467 Pilhaut and others (48 and 6 hours notice.) On approaching Cherbourg contact Cherbourg Signal Station on VHF Channel 16 confirming ETA. Also see "Pilotage".
HELICOPTER SERVICE:

A French Navy helicopter is available for boarding of deep-sea pilots.

Description of Services: A 24 hours – 7 days per week service, within a radius of 150 nautical miles of Cherbourg, to and from ships without the necessity of reducing speed or changing course, in any sea conditions.

The positioning and pick-up of pilots are accomplished either by landing or by winching on all types of vessels, serving even small coasters and fishing boats.

Doctor and stretchers for injured personnel available within minutes of your call.

Note the possibility to put technicians and specialists on board if a deep-sea pilot is ordered.

Recommended Procedure:

(A)	48 hours before	Please cable through Saint Lys Radio (FFL) or any radio station to Cherbourg Pilot Telex 170952 PILCHER the following information: (a) ship's name (b) state you require Helicopter and reason for request (c) ETA rendezvous point requested (d) VHF in good order or not (e) Confirm full landing, restricted or winching area available.
(B)	24 hours before	With the same radio procedure confirm your ETA.
(C)	4 hours before	Call "Jobourg Traffic" (French Marine Traffic Centre) on VHF 16/11 to confirm your ETA.
(D)	When helicopter is flying, its pilot contacts you on VHF.	Give information about relative wind and start locked key homing signal on 410 kHz,

Services are assured 24 hours per day with 2 hours' notice, or immediately in case of emergency.

Rendezvous Points:
Standard Points

For normal operations, 4 rendezvous points are recommended.

Point A: 13 nautical miles North of Cap de la Hague.
Point B: 10 nautical miles North of Cap Levi.
Point C: 5 nautical miles North of Cap Levi (prohibited area for tankers).
Point D: 27 nautical miles North of Cap Levi (ships West bound).

PILOTAGE: Requests for pilotage must indicate arrival time at the buoy CH1. They may be addressed to Agent or direct to Pilot Station, telegraphic address "Pilotage Cherbourg" Telex: 170952, or through the Homet look-out station by means of the usual signals. To avoid delay it is well to warn the Pilot Station 4 hours in advance of arrival. As a general rule, the pilot boat always comes out, whatever the weather. In bad weather, the vessel follows the pilot boat and Pilot boards as soon as shelter permits.

Deep-Sea Pilots for Tankers: Deep-Sea Pilots for loaded tankers carrying hyrdrocarbons or other dangerous cargoes are embarked 7 miles North of Fort de l'Ouest Light, or at least 7 miles off the coast, the exact boarding place being given on each occasion by R/T from the Pilotage Service.

ANCHORAGES: Anchoring must be made strictly according to the instructions of the Pilot so as not to get in the way of movements and anchorage of steamers. Depths vary from 6 m. to 12 m. in safe anchorages.

RESTRICTIONS: In the wet dock, the bridge is opened 1 hour before until 1 hour after high water.

MAX. SIZE:

	Length (m.)	*Breadth* (m.)	*Depth Average Tide* *Spring* (m.)	*Neap* (m.)
In the Roads	No Limit	No Limit	11	12.50
Trans-Atlantic Dock	No Limit	No Limit	7.0–12.5	8.5–14.0
Mielles Dock	150		5.00	6.50
Ro/Ro No. 4	210	30	8.0	–
Berth Amiot	100		3.0	4.50
Ro/Ro No. 1	130	20	7.0	8.50
Ro/Ro No. 2	200	30	8.0	9.50
Ro/Ro No. 4	170	40	7.0	8.50
Ro/Ro No. 5	–	–	4.5	6.00

Ro/Ro No. 3: (Quai de France – South). Length: No limit. Width: 44 m. Depth: 12 m.

HEALTH: From French port to French port, no formalities. From foreign port to French port, request for Free Pratique (yellow flag). In case of sickness on board, warn the Agent in advance. No crew member may leave ship before consultation and agreement of Port Doctor.

RADIO: The stations which offer the best facilities are Boulogne Radio, Brest le Conquet Radio, and St. Lys for ships which are a long way off.

VHF: Deputy Harbour Master on Channel 12 throughout 24 hours.

TUGS: Tugs generally join vessel in the main approaches. With regard to the tow rope, a charge is made.

BRIDGES: Only the swing bridge at the entrance to the wet dock, which is opened on request from 1 hour before until 1 hour after high tide for the entry and exit of ships. Contact Lockman on VHF Channel 6, call sign "Pont Tournant".

STEVEDORES: Agent needs ETA, to arrange personnel and equipment to be used for handling cargo.

CRANES: 35 ton capacity gantry for road/rail container and kangaroo operations. 40 ton capacity mobile crane for container and kangaroo operations. 60 to 204 ton floating cranes. Various mobile cranes for light and heavy lifts. Fleet of tugmasters and fork-lift trucks.

Also see "Berthing".

MEDICAL: Advise Agent of any requirements at the same time as ETA. There are 2 hospitals, civil and military, both very well equipped.

TANKERS: Querqueville facility is temporarily closed for repairs to pontoons.

FRESH WATER: Water points on all quays.

FUEL: Available from local suppliers – Esso, Shell, etc.

CONSULS:

Belgium
Denmark
Finland
Greece
Haiti
Ireland
Norway
Portugal
Sweden
Venezuela
United Kingdom

REPAIRS: All types of hull and engine repairs are possible.

DRY DOCK: Commercial Port's dock: Length 75 m., width 14 m.

Dry Dock No.	*Sill Length* (m.)	*Max. dim. of vessel able to enter* *Length* (m.)	*Breadth* (m.)
N. Dry docks			
1*	90.00	97.85	18.50
4*	90.00	97.85	18.50
S. Dry docks			
5*	200.00	206.40	25.70
7*	69.30	75.75	17.30

* These dry docks are inside the Navy Yard. Special agreement from Navy Authority is required for civilian vessel use.

WATCHMEN: Every ship in port must have a watchman, usually a crew member.

OPENING/CLOSING HATCHES: At the discretion of Master, crew may perform this.

CUSTOMS ALLOWANCES: Free allowance for each crew member – 200 cigarettes or 50 cigars, and 1 litre of alcohol. Common Market Countries – Crew: 300 cigarettes, 75 cigars and 1.5 litres of alcohol.

AIRPORT: At Maupertus, 12 km. from Cherbourg, with services to Paris, Southampton and Guernsey. There are no regular services in the immediate vicinity.

REPATRIATION: Can be arranged.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: January 1st; Easter Sunday/Monday; May 1st; Ascension; Whitsun Sunday/Monday; July 14th; Assumption; 15th August; November 1st; Victory Day, November 11th; Christmas Day, December 25th.

POLICE/AMBULANCE/FIRE: Police: 33.44.20.22 or 17. Ambulance: 33.53.13.29. Fire: 33.23.40.59 or 18.

TELEPHONE: Generally, ships do not request the installation of a telephone line, unless for a prolonged stay.

IDENTIFICATION CARDS: Each crew member must carry his Seaman's Card.

GARBAGE DISPOSAL: Drums available alongside, drums collected when full. For service, contact Chambre de Commerce et d'Industrie, Tel: 33.44.21.80.

WASTE OIL DISPOSAL: Collection by tanker truck, free of charge, capacity unlimited. Contact: Napoly, Tel: 33.65.33.03. Telex: 306022 (Napoly). Fax: 33.66.55.89.

SEAMAN'S CLUBS: None.

DEVELOPMENTS: Deep draft berths (13.0 m. depth), length 360 m. to be extended to 450 m.

A special linkspan for catamarans to be built.

BERTHING:

CONCARNEAU: 47.52 N. 03.55 W. (See Plan)

DOCUMENTS:

Ship's Registration Certificate.
Cargo Manifest.
Stores List.
Crew Personal Effects List.
List of Crew and Passengers with dates of Vaccinations.

PILOTAGE: The pilotage area is limited to the East by alignment of the sea marks of Point of Raguenes (Lat. 47° 47' N., Long. 03° 48' W.) and the Ile Verte (Lat. 47° 46' 40" N., Long. 03° 48' W.), to the South by the Parallel of the "La Jument Buoy" (Lat. 47° 39' N., Long. 04° 01' 20" W., to the South of the Glenan Islands), to the West by the meridian of the "Basse Rouge" Buoy.

Pilotage is not required for vessels with an overall length of less than 50 m., except for tankers carrying oil products or gas.

It is recommended to warn the Pilot 24 hours in advance, indicating the most accurate ETA (Tel: 98.50.89.03).

The pilot craft is not stationed at sea. The Pilot generally boards to the South of the Cochon Tower or, on request, between Cochon Tower and the Ile aux Moutons; the craft carries the "H" flag by day and white flashing lights at night.

If the state of the sea does not permit the Pilot to board, the pilot craft makes the signal "T" (by flag or morse code) signifying: "follow-me, the Pilot will board in the shelter of the Peneroff Breakwater". If the state of the sea does not allow the pilot craft to come out, it stations itself in the shelter of the Peneroff Breakwater and makes the signal "BT".

Access: It is not advisable for vessels of a certain size whose Masters do not know the channel well to proceed without a Pilot, at LW in particular, to the North of the line Beg-Meil – Trevignon Point.

ANCHORAGE: *Main Roads:* Vessels anchor in the bay, on request, on a muddy bottom, on the alignment at 028.5° from the Beuzec church tower through the la Croix lighthouse.

Small Roads: Vessels anchor in the small roads sheltered from the North to Southeast by East, in 8 m. of water and a bottom of sand and mud, on the access alignment or to the West of this alignment.

At night, when on the access alignment, as soon as the Lanriec Light appears, the alignment is opened so as to see the Beuzec Light to the left of the La Croix Light, and when the Lanriec Light disappears, the vessel anchors in 8 m. of water.

The recommended landing stage is on the La Croix Breakwater.

Kersos Cove (Lat. 47° 52' N., Long. 03° 55' W.): It is possible to anchor here sheltered from winds from North to South by East, but with a reduced turning area. Vessels anchor half way between the Kersos Tower and the coast to the N.E. in 3 m. – 5 m. water with a good holding ground of sand and mud.

MAX. SIZE: *Tankers:* LOA 105 m. – 106 m., beam 18.0 m. and max. draft 5.7 m.

Other vessels: By day: 115 m. – 116 m. overall; by night: 110 m. – 111 m. overall. Max. beam day and night 18.0 m.

RADIO: Contact Conquet Radio.

VHF: Tugs on Channel 12 on weekdays during working hours from 0800 – 1200 hrs. and 1400 – 1800 hrs.

TUGS: 2 tugs available on demand, meet vessels near Cochon Light, large vessels use a tug for berthing.

BERTHING: As Concarneau is essentially a fishing port, a commercial vessel of a certain size cannot enter without the authorisation of the port services, who must prepare a quay berth for her in advance.

The Port of Concarneau includes the Port of La Croix located to the West of the La Croix Lighthouse, a fore-port and a rear-port separated by the peninsula on which is Ville-Close. The Lanriec Passage connecting these two port areas is cleared at 3 m. depth and marked by 5 light towers.

Fore Port: In the middle of the fore port are 540 m. of pontoons enabling 265 pleasure craft with a draft of 2.5 m. approx. and length of 10 m. to berth.

Along the Peneroff Quay, deposits formed by a hard bottom covered by a thin layer of muddy water from 1 m. to 2 m. Along Ville-Close, the bottom dries from 2 m. to 5 m. Along the North face of the South Breakwater, a slipway permits careening of craft.

Rear Port: The Rear Port is comprised of 1,537 m. of mooring quay.

Aiguillon Quay: Depth 1 m., length 210 m.
Carnot Quay: Depth 2.80 m., length 250 m.
Lin Quay: Depth 5.00 m., length 263 m.
East Quay: Depth from 2.50 m. to 5 m., length 240 m.
Petrol Tanker Quay: Depth 5 m., length 95 m.
Right Bank Moros Quay: Depth 5 m., length 257 m.
Left Bank Moros Quay: Depth 5 m., length 220 m.
Ship's Lift Pier: Depth 5 m., length 90 m. (Duc d'Albe).

These quays receive fishing and commercial vessels and vessels under repair. The vessels are positioned according to their characteristics and the nature of the goods to be unloaded or taken on board.

CRANES: 6 × 8 tonnes (mobile).

MEDICAL: Municipal Hospital at Porzou. Tel: 98.50.30.30.

FRESH WATER: Available.

FUEL: Available.

DRY DOCKS: Synchrolift available. Max. capacity 2,000 tons; max. LOA 95 m.; max. keel length 76 m.; max. beam 14 m.; max. draft 5.50 m. Fresh water, electricity, compressed air and cranes available.

There is a slipway which can accommodate vessels of 350 tonnes.

AIRPORT: At Quimper – Pluguffan 30 km. from the town. Twice daily flights to Paris and flights to London during the Summer months.

CUSTOMS ALLOWANCES: *Tobacco:* Fixed at 30 grams per day, at sea, per person.

Alcohol: The equivalent of 5 centilitres of rum at 42° per day, at sea, per person.

These allowances are free of tax for use on board, but may not be landed.

POLICE/AMBULANCE/FIRE: Police Tel: 98.97.17.17; Ambulance and Fire Brigade Tel: 18.

IDENTIFICATION CARDS: Any National Identity Documentation will suffice.

GARBAGE DISPOSAL: Waste containers available on request to ship's Agent, Port Captain (Tel: 98.97.33.80) or Chamber of Commerce (Tel: 98.97.20.11).

Containers are collected on request.

WASTE OIL DISPOSAL: No facilities.

SEAMAN'S CLUBS: Seaman's Hostel, Rue de Port. Tel: 98.97.04.01. Rooms and meals only.

AUTHORITY: Direction Departementale de l'Equipement, Cite Administrative de Kerfeunteun, B.P.506, 29325 Quimper Cedex. *Tel:* 98.95.70.32. *Telex:* 940.424. *Contact:* The Director.

Chef du Service Maritime, Fluvial et Aeroportuaire, Direction Departementale de l'Equipement, B.P. 506, 29325 Quimper Cedex. *Tel:* 98.76.51.00. *FAX:* 98.76.50.24.

Capitanerie du Port, Quai Est, B.P. 231, 29182 Concarneau. *Tel:* 98.97.33.80. *FAX:* 98.97.88.02. *VHF:* On Channel 12 during working hours. *Contact:* L. Tanguy, Le Commandant de Port.

DIEPPE: 49.55 N. 01.04 E. (See Plan)

DOCUMENTS:

4 Crew Lists.
2 Lists of Stores.
1 Loading Manifest.
1 Passenger List.
1 Declaration (furnished by Agent) stating that ship possesses up-to-date Safety Certificates.
1 Health Declaration.

APPROACHES: Coming from the West, immediate landfall is Cap d'Ailly which is passed at 3 miles distance and then vessels proceed to the landfall buoy of Dieppe marked D.1. (East Cardinal, black yellow black, very quick flashing light, 3 flash every 5 seconds and a bell).

Location: Lat. 49° 57' 15" N., Long. 1° 01' 20" E., or 2.5 miles to the N.W. of the port entrance.

The cliffs which surround Dieppe give very good radar echoes.

PILOTAGE: Pilot boards 4 miles from breakwaters. Pilotage must be imposed by Harbour Master for the vessels of less than 50 m. for the first entry or departure of the Master if meteorological, time or other conditions are unfavourable. Pilot boat is ready to put to sea 2 hours before high tide. During this period maintains radio telephone watch. VHF Channel 12.

All vessels must send ETA to the pilotage authority of the Seine/Rouen/Dieppe at least 5 hours prior to arrival in the Dieppe Roads, any delay greater than 2 hours or where a tide is missed must be signalled at least 3 hours before the initially ETA. Vessels not obliged to take on a Pilot must indicate in their ETA whether or not a Pilot is needed.

Pilotage de la Seine, 21 Bd. du Mont Riboudet, 76723 Rouen. Tel: 35.71.68.50. Telex: 770575. Fax: 35.71.94.79.

ANCHORAGE: It is recommended to anchor in zone bounded by following points:

(a) Lat. 49° 56' 55" N., Long. 01° 04' E.;
(b) Lat. 49° 58' 40" N., Long. 01° 02' 45" E.;
(c) Lat. 49° 57' 42" N., Long. 00° 59' 20" E.;
(d) Lat. 49° 55' 50" N., Long. 01° 00' 30" E.

This anchorage area includes Buoy D.I and depths are from 6 m. to 12 m. with sand and broken shell bottom. Larger vessels anchor approximately 0.5 miles to North of Buoy D.I in depths of 10 m. to 12 m.

Submarine Telephone Cable: A submarine telephone cable crosses through the East part of the Anchorage Zone. It is better to anchor in the S.W. part of this zone. "Dieppe-Port" will indicate position for anchorage.

Forbidden Anchorage: It is forbidden to anchor in the area defined by the following points: Lat. 49° 56' 55" N., Long. 01° 05' 29" E. – Lat. 49° 56' 25" N., Long. 01° 03' 03" E. – Lat. 49° 56' 05" N., Long. 01° 04' 50" E.

RESTRICTIONS: The lock gates of the commercial basins are only open from 2 hours before to 1 hour after high tide. Vessels remain at anchorage in the roads until the gates are opened. Large vessels enter preferably at the time of high tide to benefit to the maximum from the level of water under the keel and the best conditions of navigation.

Entry and Leaving: Vessels entering must arrive in the roads at the latest

25 minutes after high tide, except for large vessels which must be in the roads at the latest at high tide. Vessels leaving must be ready at the latest 30 minutes after high tide.

Entry and Leaving Signals: Entry and leaving signals are exhibited on the signal post on the West jetty and on the repeater post of the fore port (signals in accordance with A.I.S.M.). At the Colbert Sluice and at the various locks the signals are simplified.

MAX. SIZE: Vessels LOA 155 m. and beam 21.6 m. can enter. In certain cases vessels of LOA 165 m. may be permitted to enter.

Colbert Lock (Dimensions of Lock): 230 m. length, 37 m. width, controls entrance to Inner harbour, where depth maintained at 5.00 m.

Canada Docks: Length 154 m.; width, 21 m.; draft 8 m.

Paris Dock: Length 154 m.; width 21 m.; draft 7 m.

Opening of Canada and Paris Basins: 2 hours before to 1 hour after full tide, night or day. The port is accessible to vessels up to 10,000 d.w.t. – 12,000 d.w.t.

HEALTH: Pratique given by Customs Officers who board on arrival. In case of suspected disease, Master required to radio details to Agent in advance.

RADIO: Boulogne Radio (FFB).

Arrival Advice: Masters of vessels must send to the Port Authority, 24 hours in advance, or at the latest when leaving the previous port where this is located less than 24 hours away, the expected time of arrival in the roads, indicating the name of the vessel, tonnage, length, beam, the date and time of arrival, maximum draft of the vessel on arrival, the nature and tonnage of various items of its cargo and hazardous cargo (in transit or to be landed), possible damage to the ship, its equipment or to the cargo. A rectifying message must be sent in the event of a change. Address: Port Captaincy: 1 Quai de la Cale, Dieppe. Tel: (35) 84 10 55. Telex: Mardiep 180414F.

VHF: Boulogne Radio maintains continuous watch on Channels 2 and 24. The Port Authority (Call sign "Dieppe Port", Tel: 35.82.23.85) maintains watch throughout 24 hours on Channels 16 and 12.

TUGS: 2 tugs available (1,400 h.p. and 1,500 h.p.). Requests for use must be made to the Port Captaincy. One tug in service at all times.

BERTHING:

Dock	*Quay*	*Facilities*	*Length (m.)*	*Sea level chart (m.)*
Paris	Norvege	1 Roll-on/Roll-off ramp (80 t.)	715	7.5/9
	Maroc	6 noria conveyors for banana handling	600	7.5/9
Canada	Indes	1 grain bagging funnel	150	7.5/9
	Quebec	grain silo (cap. 12,000 tons). Capacity 500 t.p.h.	160	7.5/9
Avant-Port	Henri IV	Pleasure craft	380	4.5/5 minimum
Arriere-Port	Quai Guynemer	1 Roll-on/Roll-off ramp (120 t.)		

Handling Capacities:

	Loading:
Colza oil	200 t.p.h. (from the quay)
Colza grains	60 tons/man hour
Grain and wheat	500 t.p.h. (silo)
Rough timber	23 to 28 cu.m./man hour

	Unloading:
Colza oil	(taken from quay)
Colza grains	50 tons/man hour
Sand and gravel	100 to 150 tons/man hour
Bananas	about 3,000 cartons/man hour
Citrus fruit on pallets	55 to 65 pallets/man hour
Citrus fruits not palletised (cases, cartons, crates)	16 to 21 tons/man hour
Pre-slung timber	about 80 cu.m./man hour
Bulk timber	about 25 cu.m./man hour
Iron and steel	50 to 60 tons/man hour

CRANES: One mobile crane, 40 ton and jib 40 m.

Quay Cranes: 6×3 ton, 2×3-6 ton, 2×6-12 tons and 6×2 ton gantry cranes.

BRIDGES: To request bridges to open, call "Dieppe Port" on VHF Channel 12.

Ships without VHF use whistle to request opening (3 long blasts for Colbert Bridge and Admiral Rolland Bridge, and 2 long blasts for Jehan Ango Bridge).

STEVEDORES: Normal hours are 0800–1200 and 1400–1800. Possible to work from 1800–2200 to complete operations. No work on Sundays or holidays.

MEDICAL: All medical facilities available.

FRESH WATER: Supplied by pipeline. There are a great number of outlets on the quay.

FUEL: Available in small quantities; delivered by tanker lorry.

CONSULS: Norway Denmark
Sweden Netherlands

REPAIRS: Good facilities exist, all types carried out.

DRY DOCKS: Dry dock in the inner harbour, dimensions 130 m.×18 m. It can receive ships 129×17 m. One lift of 300 tons and 7 repair sites.

SURVEYORS: Bureau Veritas at Dieppe; Lloyd's at Le Havre and Rouen; American Bureau of Shipping at Le Havre; Det Norske Veritas at Le Havre.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: According to agreement, either by crew or stevedores.

CUSTOMS ALLOWANCES: Contact French Customs (Tel: 35.82.24.47) to verify allowances.

REPATRIATION: Good facilities.

AIRPORT: Dieppe Saint Aubin (3 km.) has two daily connections with Shoreham, England. The nearest main airport is Paris.

TIME: GMT plus 1 hour, but during the period from beginning April to end September (six months) the legal time is advanced by 1 hour (GMT plus 2 hours).

HOLIDAYS: 1st January; Good Friday; Easter Monday; Ascension Day; Whit Monday; 1st May; 14th July; 15th August; 1st November; 11th November; 25th December.

POLICE/AMBULANCE/FIRE: Police (Bd. Clemenceau) 35.84.87.32 or 17. Fire and Ambulance 18 or 35.84.33.00.

TELEPHONES: No connections on the quays.

SERVICES: Compass adjusting, etc. available.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Embarkation card or passport is sufficient.

GARBAGE DISPOSAL: Skips can be provided alongside. Tel: 35.84.70.07 for service.

WASTE OIL DISPOSAL: There are waste oil tanks for small quantities on Quay Duquesne in Basin Duquesne. Tanker trucks can be obtained from Sonolub. Tel: 35.81.07.88.

SEAMAN'S CLUBS: None.

AUTHORITY: Capitainerie du Port de Dieppe, Quai de la Cale, 76203 Dieppe, France. *Tel:* 35.84.10.55. *Telex:* Mardiep 180414 F. *FAX:* 35.06.12.56. *Contact:* Henri Follin, Commandant du Port.

DONGES: Refer to Nantes.

DUNKIRK: 51.03 N. 02.24 E. **(See Plan)**

PORT LIMITS: The seaward boundaries of the port within which a vessel is considered to be an "arrived ship" is the Dyck Lightbuoy or the Roads if the ship comes from the East.

DOCUMENTS:

Entry Bill (all information about ship), given by Pilot to Master, who fills it in and gives it to Harbour Officer.

To be given to Customs:

3 Crew Lists.
3 Passenger Lists.
3 Copies Stores/Bonded Stores List
Manifest or copy.
Form for increase of tonnage.
Declaration of open spaces.
3 Lists of objects held by crew.

APPROACHES: A new route, which allows vessels with draft 9.0 m. coming from the North Sea to reach Dunkirk more directly, has been buoyed. Vessels drawing 11.0 m. should adjust their course to round the Dunkirk Lanby (51° 03.0' N., 01° 51.8' E. approx.) after passing Ruytingen S.E. Buoy.

Buoys have been laid to mark the route.

It is recommended that this route should not be used by vessels not having a pilot on board.

The buoys marking Le Dyck and Haut-fond de Gravelines are liable to change.

PILOTAGE: Pilotage station limits – there are 2 pilotage zones.

1. The Outer Zone which is limited:
To the West by the meridian of Calais Lighthouse (Long. 01° 51' E.);
To the East, by the meridian of Long. 2° 27' E.;
To the North, by the line situated 3 miles seawards of the LW mark;
To the South, by the Calais Pilotage Zone, the coast and the Inner Zone defined below.
2. The Inner Zone limited:
To the West by meridian Long. 02° 08' E.;
To the North, by a continuous broken line constituted by the parallel Lat. 51° 03' N., the line of the coast, the meridian Long. 02° 20' E., the parallel Lat. 51° 04' 30" N.;
To the East by the meridian of Dunkirk Lighthouse (02° 22' E.);
To the South by the end of the water levels of the autonomous port of Dunkirk.

Pilotage is compulsory in Inner Zone for ships over 150 n.r.t. or ships of max. length 50 m., or with dangerous cargo.

Pilotage compulsory in Outer Zone for ships not fitted with VHF, or over 1,000 nett tons or max. length 100 m. or with dangerous cargo.

Vessels coming from the West should call Pilots 12 hours before arrival or when leaving the former harbour. This message must be confirmed by the vessel 4 hours before arrival at Dunkirk Lightbuoy or 2 hours before arrival on roads of Dunkirk East or Dunkirk West, at E12 Buoy or by VHF by calling "Pilot Dunkirk" on Channels 16 or 72 or by telephoning 28.66.74.14. ETA to state: ETA (at Pilot Station). Length of the ship. Draft. Place where the Pilot is requested: Dyck/Dunkirk Lightbuoy; Dunkirk Roads; Zuydcoote Pass.

ETA will be considered null and void if vessel does not arrive within 2 hours of stated ETA.

The Pilot Station is equipped with a watch tower with radar, a helicopter based at Calais-Dunkirk Airport, a pilot boat base at Calais port and a pilot boat base in Dunkirk East Harbour.

Ship's Departure: Sailings must be ordered at the Harbour Office, Pilot Station, towage office and linemen's office.

Pilots: For a sailing between 0800 and 2000 hrs. 1.5 hours' notice is necessary to Pilot for the ships moored in Dunkirk-East (Mardyck Bassin excepted) a 2 hours' notice for ships moored in Mardyck Bassin and Dunkirk-West.

For a sailing between 2000 hrs. and 0800 hrs. vessels are required to give notice to the pilot office before 1600 hrs. and to order the Pilot before 1800 hrs.

Report: July 1990.

Following received by Master from Agent:

ETA Dunkirk: Agent will advise all parties, but Pilot Station requires information directly from ship 12 hours, 6 hours (Telex: 820902); 3 hours, 2 hours (VHF); and permanent contact prior to arrival.

New pilot procedure: Boarding either by helicopter or fast launch.

ANCHORAGES: Large vessels waiting for entrance must anchor in the area West of Dyck Lightbuoy. In bad weather, ships may anchor off English coast, in the roads of Les Dunes, with good mooring ground of sand and mud 20 m. deep. On the Roads of Dunkirk, ships must anchor East of Buoy E.1 so as not to disturb the entrance of ships.

RESTRICTIONS/MAX. SIZE: Movement of vessels: Normal operating conditions. Exceptionally, dispensations may be given by port services after study of specific cases.

Eastern Port

VIA CHARLES DE GAULLE LOCK:

ENTRY: By day: Passage to breakwaters from sunrise to sunset.

Before HW (HW −3 hours). LOA 250 m. or less – max. draft 12 m. After high tide (HW +2 hours). Length 289 m. (tolerance 5 cm.) plus 1% or under if vessel is engine-driven and length 265 m. or under if vessel is turbine-driven – max. draft 14.20 m. Beam 45 m. (tolerance 5 cm.).

After agreement of Captaincy/Pilotage/Tugs is obtained, a second vessel can be taken at the entrance, up to 2 hours after high tide, providing its draft is 12.80 m. or under and beam 40 m. or under.

If tugs have to be changed during the entry manoeuvres of 2 large vessels, the Master of the vessel using the tugs must be warned in advance by a message from the Captaincy.

At Night:

Before high tide (HW −3 hours). Length 250 m. or under – max. draft 12 m. Beam 40 m. or under.

After high tide (HW +2 hours). Length 250 m. or under – max. draft 12.50 m. Beam 40 m. or under.

SAILING:

If length 251 m. or over and beam 39 m. or over, register for sailing between 1 hour before sunrise and 1 hour before sunset, except for Berth AP 1, and ships moored at West of this point where interval is brought to 1 hour 30 minutes before sunrise or sunset and 2 hours for ships moored at the Bulk Pier heading Westward.

From tide-coefficient 95 onwards (h=5.85 m.) no registration required between HW – 3.5 hours and HW – 0.5 hours.

If the length is between 250 m. – 251 m. and beam is under 39 m. sailing registration possible from 0500 to 2200 hrs. (Summer and Winter) except for tankers, where length is still limited to 250 m. and beam under 39 m.

If length is under 250 m. and beam is under 39 m. sailing registration day and night without restriction.

Draft on sailing: 14.00 m.

Conditions for sailing:

Beam 42 m. or less.

Sailing by day with registration of vessel between 1 hour 30 minutes before sunrise and 1 hour 30 minutes before sunset if the vessel is at Quai de Grande-Synthe or 1 hour before sunrise and 1 hour before sunset if the vessel is at the Grain Quay.

Registration of vessel: 5.30 hours before high water or 2 hours before high water if vessel at Quai de Grande-Synthe.

4.30 hours before high water or 1 hour before high water if vessel is at Grain Quay.

Navigation depth in the channel – 13.5 m. minimum.

VIA WATIER LOCK:

Passage prior to high tide: Max. draft 10.50 m. – beam 32 m. or under.
Passage after high tide: Max. draft 10.00 m. – beam 32 m. or under.
Max. length (before or after HW).

By Day: Length 230 m. or under with no vessel at Mole V. Length 220 m. or under with vessel at Mole V.

By Night: Length 220 m. or under with no vessel at Mole V. Length 210 m. or under with vessel at Mole V.

VIA TRYSTRAM LOCK:

Max. draft 8 m. – beam 22 m. Length 150 m. or under on leaving port, Tixier Lock pumps stopped on Pilot's request. Length 140 m. or under on entering port, Tixier Lock pumps stopped on Pilot's request.

CHANNEL – MARDYCK LOCK:

Usable length: 144 m.
Usable width: 11.40 m.
Draft: 3.20 m. for canal level of 0.66 m.
Air draft: 5.05 m. for basin level of 6.30 m.
Speed in channel: 10 km./hr. in ballast, 8 km./hr. loaded.

DUNES CHANNEL – DUNES LOCK:

Connects the East and West sections of the port.
Length of lock: 185 m.
Usable width: 11.40 m.
Max. Draft: 5.0 m.
Air clearance under bridge with 7.0 m. water height.
Bridge lowered – 5.25 m.
Bridge raised, dimensions of side wall – 15.0 m.
Theoretical depth of channel – 3.50 m.
Max. speed – 6 knots.

Note: Gas Carriers are not accepted in this lock.

BP BERTHS:

By day and by night, on direct entry or with tow relinquished: Length 250 m. or under. Draft 12.50 m. or under (this can be extended to 12.80 m. max. dependent on water level in basins).

DRY DOCK 6 – DOVER – PANAMA QUAYS:

Large vessels may manoeuvre in good visibility and wind less than Force 5 Beaufort.

Max. dimensions of vessels admitted to Dry Dock 6:

Length 289.05 m.×beam 45.05 m.×draft 6.50 m. Bow/8.5 m. Stern, through de Gaulle Lock.

On Relinquishing Tow: Entry and sailing registration on Dock 6:

By day, registration from sunrise less 1 hour to sunset less 2 hours for vessels length 251 m. or over or beam 39 m. or over.

Registration from 0500 hrs. to 2200 hrs. if length between 250 m. and 251 m. and beam under 39 m. No limit on registration time if length is 250 m. or under and beam is under 39 m.

Entry Direct of vessels length over 250 m. and/or beam over 39 m.: passage to jetties when daylight 2 hours after HW – latest time 2 hours before sunset.

Direct Sailing to Sea from Dock 6 of vessels length over 250 m. and/or beam over 39 m.: Registration from 1 hour before sunrise to 3 hours before sunset. Direct sailing to sea from Quai de Douvies on Quai de Panama if length over 250 m. and/or beam over 39 m., registration from 1 hour before sunrise to 2 hours 30 minutes before sunset.

Note: Mole V, Eastern section, must be clear for vessels of length over 250 m. swinging in front of Dry Dock 6 and Watier Amont Quay free for passage of vessels of length over 250 m. via Brocquaire Channel.

RECOMMENDED DRAFTS FOR SAILING OR TOW RELINQUISHING MOVEMENTS

Length	150 m.-180 m.	180 m.-205 m.	205 m.-230 m.	230 m.-280 m.
Draft	B 5 m.-S 6 m.	B 6 m.-S 7 m.	B 7m.-S 8 m.	B 9 m.-S 10 m.

B=Bow, S=Stern. (except for repairs)

Western Port:

FLANDERS TANKER BERTH:

In Normal conditions of Dredging – Entry: Passage to jetties from sunrise to 1 hour before sunset if length over 300 m.; entry by day and by night if length is equal to or less than 300 m.

Before high tide (3 hours before HW at Dunkirk East). Draft 19.50 m.

After high tide (HW at Dunkirk East plus 2.5 hours). All coefficients draft 20.50 m.

Tugs must be present at "DW 13/DW 14" 45 minutes before theoretical time of passage to berths of the tanker they are serving.

Theoretical Number of Tugs:

D.w.t.	D.w.t.	No. of tugs	
under	125,000	3	According to Pilot's request
125,000 –	175,000	4	According to Pilot's request
175,000 –	250,000	5	According to Pilot's request
250,000	and over	5 or 6	According to Pilot's request

Sailing: Sailing registration from 30 minutes before sunrise to 1 hour 30 minutes before sunset if length over 300 m.; sailing without restriction of length if equal to or less than 300 m.

If length is greater than 300 m.: With coefficient over 95, no sailing registration from HW – 3 hours to time of HW. The interval between registration time for sailing of a tanker from the Flanders Tanker Berth at the time of passage to the jetties of an incoming tanker must not be less than 3 hours.

Recommended draft on sailing:

Length 280 m. or under	Length over 280 m.
8 m. bow/9 m. stern	9 m. bow/10 m. stern

No. of tugs to be used:

D.w.t. under 150,000 tons – 3 according to Pilot's request.
D.w.t. over 150,000 tons – 4 according to Pilot's request.

Note: Wherever possible, between buoys DW 14 and DW 16, large vessels leaving Dunkirk East should not cross tankers entering Dunkirk West.

HEAVY LIFT QUAY: (Quai Pondereaux Ouest (Q.P.O.))

Entry: From sunrise to 1 hour before sunset if length over 300 m. and vessel's bow Southward.

Sailing: If vessel's bow Southward and LOA less than 289.05 m. – no restriction. If LOA over 289.05 m., registration from 30 minutes before sunrise to 1 hour 30 minutes before sunset.

On entry by day the vessel can be positioned with bow facing North if length equal to or less than 270 m. and draft equal to or less than 16.0 m.

Draft before and after high water 18.0 m.

Heaving off at Heavy Lift Quay/Eastern Port – length up to and including 289 m., beam up to and including 45 m., draft 14.20 m. and less.

Minimum registration for heaving off, 5 hours before passage to quays of Eastern port. Priority on entry if length greater than 250 m. and draft greater than 12.5 m.

OPERATION OF S.F. BP OIL BASIN BERTHS:

Middle BP Berth:

Max. draft 12.5 m. Length 245 m.
Max. distance stern/connection 122.5 m.

South BP Berth:

Max. draft 10.5 m. Length 230 m.
Max. distance stern/connection 120 m.

Coaster Berth – North Face: (No longer equipped for commercial operations).

(a) West Part, from Bollard 2.5 to Bollard 7 (quay length 80 m.) – Max. draft 6.5 m.

(b) East Part, to the East of Bollard 7 (length of quay 90 m.) – Max. draft 7.5 m.

Max. length of vessels admitted to coaster berth is 120 m. with a draft of 6.5 m.

Coaster Berth – South Face: Solely reserved for river traffic.

Bunker Berths: Reserved for bunkering craft.

Note: The drafts shown correspond to a minimum water depth in the basins of 5.3 m.

At all BP berths, vessels are positioned bow facing West.

Vessels of larger dimensions than those covered by this note can be admitted to the following berths only after prior study and subject to special conditions of draft, berthing and securing cables, etc.

Overflow rafts: See Article 412 of Permanent Instruction No. 57.

Max. length of vessels, with draft of 12.5 m. transiting Brocquaire Channel is fixed at 250 m.

HEALTH: For ships coming from *(a) All European Countries:* Declaration of Health is not obligatory but general International Certificates are controlled. *(b) Other Harbours:* Admission subject to Declaration of Health and usual controls of certificates. Admissions in Free Pratique only in daytime except special cases (intervention of a physician). Request for Free Pratique may be made to Sani-Port, Dunkirk, through Boulogne Radio. In case of necessity, health service can – on request – intervene at night.

RADIO: Dunkirk Harbour Station (FFF), VHF call sign "Dunkerque Port", for messages about port service through VHF Channels 73 and 16. Communications other than in VHF made through Boulogne Radio (FFB).

VHF: Dunkirk Port Station maintains continuous watch on VHF, Channels 73 and 16.

RADAR: There is radar at the control tower of harbour. It is not a guiding radar.

TUGS: Tugs normally join vessel between Buoys DW.28 to DW.30 and DW.16. Smaller vessels are joined by tugs in the outer port.

On departure tugs must be ordered with a 2 hour notice for Dunkirk-East and a 4 hour notice for Dunkirk-West. Moreover, for manoeuvring between 1900 hrs. and 0700 hrs. tugs must be reserved before 1600 hrs. and ordered before 1800 hrs.

It is possible to cancel or delay any order for tugs, without indemnity, provided this request is done with a 1 hour (daytime) and 2 hours' (night-time) notice for Dunkirk-East, with a 2 hours' (daytime) and 4 hours' (night-time) notice for Dunkirk-West.

Also see "Restrictions".

BERTHING: Berthing priority is decided by Port Captain's office. Vessel is informed by radio of the location and priority given to her.

Mobile Cranes (Port Services): 1 at 6/10 tons and 2 at 17/36 tons. Possibility of mobile cranes from other yards.

BULK HANDLING FACILITIES: Bulk Quay No. 1, formerly known as the ore quay. Equipped with 2 gantry cranes. Principally used for iron ore destined for Usinor Dunkirk and Usinor Valenciennes. There is a loader for slag at the Western part of the Quay.

Bulk Quay No. 3, an extension of the Usinor Quay for iron ore cargo. Equipped with 3 gantries of 50 tons capacity. Permissible draft 14.20 m.

Quai de Grande-Synthe, situated West of Bulk Quay (Appontement Ponderеux). Berth is 600 m. long with a min. depth alongside of 14.8 m. Bulk carriers of 80,000 d.w.t. with a draft up to 14.2 m. can be accommodated.

Unloading equipment consists of 3 cranes with grabs, each with a max. discharge capacity of 565 t.p.h.

A new silo is situated at Quai de Grande Synthe. Capacity 150,000 tons. Permissible draft 14.0 m. 1×1,000 t.p.h. shiploader.

The second new silo, (Silonor), will have horizontal handling and storage under a shed of 140,000 tonnes.

Sugar is handled at Freycinet No. 9 and Freycinet No. 10 (North part), silo capacity 83,000 tonnes.

Dunkirk-West: The Western Bulk Terminal (Q.P.O.): For large bulk carriers (iron ore and coal) with 1 berth for vessels up to 220,000 d.w.t. (according to dredging conditions). Equipped with 2×50 ton grab gantry cranes linked to storage yard with a 600,000 cu.m. capacity.

Aluminium Dunkerque (Pechiney): Quay length 225 m., depth 13.00 m. Quay for barges length 171.5 m., depth 4.5 m.

Also see "Report – March 1996".

CONTAINER FACILITIES: *Dunkirk-West:* Quai de Lorraine and Quai de Flandre. Total length 1,200 m. equipped with 3 container gantry cranes capable of lifting 45 tons on spreaders for 20 ft. – 40 ft. units.

ROLL-ON/ROLL-OFF FACILITIES: *Dunkirk-West:* Quai d'Alsace is equipped for direct transhipment of vehicles, trailers and wagons. Quai de Lorraine is provided with movable steel ramps for direct transhipment of vehicles and trailers. A fixed quarter ramp has been installed at the West end of Quai de Lorraine. Quai de Ramsgate for shipment of vehicles.

Dunkirk-East: Quay Freycinet VII, the berth South of Freycinet VII, has been provided with a fixed ramp for roll-on/roll-off for ships up to 8 m. draft and 22 m. beam, and Quay Freycinet XIII, South part, is fitted with a fixed ramp for ships up to 12.50 m. draft.

BRIDGES: Bridges of locks and wet docks are closed to navigation for short periods to allow work hands to go. The maritime traffic is practically never disturbed.

OIL TANKERS: The following tanker berths are available:

West Port: Flanders Oil Berth: max. draft 20.50 m. Discharge lines to Total Refinery, and to the B.P. Refinery. The access channel has been dredged to a depth of 22 m. at L.W. The turning circle at the entrance to the Outer Port West has a diameter of 1,400 m. Max. discharge rate 20,000 cu.m./hr.

East Port: S.F.B.P. Oil Dock.

Middle wharf North, max. draft 12.50 m. Loading/discharging lines 2×22 in. and 3×16 in. lines, bunker line 16 in. diameter.

Middle wharf South, max. draft 12 m. Dimensions of lines as for Middle wharf North.

Coasters Wharf, max. draft 7.50 m. Loading/discharge lines 6 in.

Bassin de Mardyck Oil Port: Appt C.F.R. – Poste Est. Max. draft 11.70 m., Poste Ouest draft 14.20 m.

Facilities for discharge of dirty ballast are available at all main tanker berths.

Stocknord Pier: Pier of length 440 m. with 4 platforms.

P.1 – For barges only.

P.2 – For barges and coasters up to 100 m. length and 8.50 m. draft.

P.3 – Oil and Gas. For vessels up to 100,000 d.w.t., 280 m. length and 14.20 m. draft.

P.4 – Gas only. 10,000 d.w.t. Max. length 160 m. and draft 9.5 m.

C.P.A. Quay: Berth at Mole V. Mainly for Fuel and Vegetable Oil. For vessels up to 250 m. length and max. draft 9.60 m.

Also see "Reports" dated August 1990 and March 1996.

GAS TANKERS:

Appt. C.F.R.: Bassin de Mardyck: 1 berth for butane and propane. East side of pier for vessels up to 11.60 m. draft.

Stocknord: Bassin de Mardyck. The total length of the quay is 440 m. with a width of 30 m.

Alongside this quay, are berths or platforms P1, P2, P3 and P4.

P1: Oil only.

P2: Oil only.

P3: Coasters of 90 m. LOA and tankers of 280 m. LOA, d.w.t. 100,000 tonnes on East side of pier.

P4: Coasters LOA minimum 60 m. and gas-carriers of LOA max 160 m., max. d.w.t. 10,000 tonnes on West side of pier.

Products: LPG, ethylene, FR and PP.

P3 can take LPG products and chemical products: Vessels up to 280 m. length.

Distance from P3 to storage areas: Approx. 800 m. with a 10 in. line.

Nitrogen in gas-form available on site (2 in. and 3 in.).

P4 is for vessels of LOA 160 m. max. with a d.w.t. of 10,000 tonnes, and a max. draft of 9.5 m. Beam – no limits.

Products: LPG, derivates, propylene, ethylene, butadine. 10 in. lines and arm flanges of 8 in. ASA 300. Products can be refrigerated or at ambient temperature.

Connection with P3 and with the storage areas.

Nitrogen in gas-form on the quay (2 in. and 3 in.).

Length of platform: 25 m. Width of platform: 12 m. Height above water line: 5 m.

Loading and discharge by 8 in. Luceat arms.

Tidal movement at the quay is minimal: Approx. 1.0 m. min./max. Predominant winds from the West.

Transhipment from vessel to vessel can take place at Berths P3 and P4 by connection line between the two berths.

The possibility of transhipment with a first vessel berthed and a second connected to it is accepted. For this to happen:

1. Advise the authorities minimum of 24 hours before the operation.
2. A technician must be on hand.
3. The owner must supply hoses and defences.
4. Port rights and occupation of the quay is to be discussed with the owner.
5. A tug must be available for both vessels.
6. If the wind is blowing above Force 5, the operation must be stopped and the connected vessel must go out to the roads with Pilot and tug, if the quay which can accept the type of vessel is not free.
7. Transhipment from vessel to vessel via connection lines from Berth P4 and Berth P3. If during this operation a priority vessel must at all costs berth, the operation of transhipment must be stopped and one of the vessels must connect up to continue the operation or go out into the roads (Pilot and tug necessary).

Port Entry: It must be emphasised that the depth of water at the port entrance towards the Mardyck Basin at Charles de Gaulle Lock, foreport East is 14.20 m. max. with a beam of 45.05 m. maximum.

Storage facilities: At approx. 800 m. from the Stocknord quay. 2 LPG – Propylene storage points of around 3,500 cu.m. each take propane for the account of the company CDF Chimie. They have a service pressure of 15 kg/sq.cm. and a temperature of −10°C.

From these 2 facilities, it is possible to load/discharge to and from lorries (18 tonnes) or trucks (45 tonnes).

Consumption of vapocracker (set for between 300 tonnes and 500 tonnes per day) is with the use of propane and naphtha.

List of storage points at Stocknord:

2×3,500 cu.m.	Propane–butane–Btd–propylene operating pressure 15 kg./sq.cm. Minimum temperature −10°C.
1×17,000 cu.m.	C2
1×17,000 cu.m.	C3
1×9,000 cu.m.	C4
8×6,000 cu.m.	Essences
9×6,000 cu.m.	Pyrolised essences
6×20,000 cu.m.	Naphtha, gasoil, diesel and fuel oil
2×2,000 cu.m.	(drums) chemical products
1×1,000 cu.m.	(drums) chemical products

Trains–trucks: Stocknord can hire, load, discharge trucks or lorries.

By truck: convoys of 1,000 tonnes of all products and throughout France.

By lorry: 15–20 tonnes LPG–ethylene, etc.

By truck: 45–50 tonnes each, filling in groups of 6; for each group of trucks filling takes approx. 20 minutes for all liquid products.

Nitrogen: Possibility of degassing at Berths P3 and P4 (from 800 to 1,000 cu.m. per hour of nitrogen in gas-form).

Heater: Currently, there is a propylene land-based heater (350 cu.m./hour) of the steam type working from −47°C to +5°C.

This heater can be connected to the lines of the new propane storage facilities: time involved, approximately 1 month.

Also see "Report" dated March 1996.

STEVEDORES: Each Master will contact his consignee.

MEDICAL: Hospitals and all medical facilities.

DENSITY: Salt.

FRESH WATER: Available in unlimited quantities. Numerous hydrants on all wharves.

FUEL: Supplied by barges or tank lorries if no connection at wharf. Fuel, diesel and gas oil available. Requests for bunkers must be made 48 hours in advance to Agents.

FIRE PRECAUTIONS: The preventive measures are taken for tankers are those of the I.M.O. recommendations. Rounds of the port officers. Ship's Master is given instructions of the harbour concerning tankers if necessary when filling the I.M.O Check List. In case of storm, the Harbour Officer can stop loading or discharging.

Overall length	215.00 m.
Overall beam	30.00 m.
Maximum draft	8.30 m.
Variation of draft allowed	2 cm./m.
Cranes	2 of 7 t.

GANGWAY/DECK WATCHMEN: Guarding is strongly advised.

OPENING/CLOSING HATCHES: Carried out by crew.

CERTIFICATES:

Certificate of Nationality.
International Certificate of Tonnage.
Certificates from the Classification Office where ship is registered, especially:
Certificate of Freeboard.
Classification Certificate, engine and boiler.
Classification Certificate, hull.
Classification Certificate, electric equipment for tankers.
List of Hoisting Apparatus.
Derat Certificate.
TOVALOP Certificate or similar for tankers.

CUSTOMS ALLOWANCES: Tobacco: Amount allowed for each member of crew: 200 cigarettes or 200 gramme tobacco. Wine and/or Spirits: 1 bottle.

AIRPORT: Calais, Marck, 35 km.; International airport of Lille Lesquin, 80 km.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; Easter; Whitsuntide; 1st May; 14th July; 15th August; 1st November; 11th November; Christmas. On public holidays, handling operations can be carried out from 0600 hrs. to 1200 hrs.

POLICE/AMBULANCE/FIRE: Police 17; Ambulance 28646054; Firemen 18.

TELEPHONES: Connections possible at all berths.

SERVICES: No specific port equipment for gas-freeing. Dirty ballast can be received at all oil terminals and by barges of the Port Service. Compass adjustment, radio repairs.

SHORE LEAVE: Crew are allowed ashore.

IDENTIFICATION CARDS: An official identity certificate is compulsory ashore (Passport, Identification Card, Seaman's Book, etc.).

GARBAGE DISPOSAL: Under International agreements and port regulations, all vessels are required to evacuate, prior to departure, all wastes and garbage accumulated during their stay. For this purpose, garbage bags may be obtained from agent, which should be placed when full in the blue and white containers located on each quay. Disposal of industrial and liquid waste can only be effected through private companies.

WASTE OIL DISPOSAL: Various companies can facilitate the disposal of waste oil and oily water mixtures. Contact Port Authority for further details, Tel: 28.29.70.70.

SEAMAN'S CLUBS: The Seafarers Centre, 130 Rue de l'Ecole Maternelle, 59140 Dunkerque, France, Tel: 28.59.04.20. Facilities include shop, telephone, church office, football matches, minibus collection, postage, various games, TV lounge, newspapers, hospital visits to seamen.

CURRENCY: French Franc (FFR).

DEVELOPMENTS: Canal des Dunes (connects Dunkirk-West and Dunkirk-East) for barges with length 180 m., beam 11.4 m. and draft 5.00 m.

SHIPMASTER'S REPORT: December 1988 (Updated 1994).

Pilotage: The pilot boards from a small launch or helicopter. Alternatively the pilot can board at Calais. Pilot on VHF Channels 16, 6 and 72. Pilot Office Telex No. 820902.

If vessel wishes to order a pilot for leaving, a minimum of 2 hours notice is required.

The transit time, including lock time, from time of pilot boarding until alongside in Stocknord (Mardyck Basin) is about 3 hours. Only one pilot used.

Anchorage: The anchor is 1.2 miles N.W. of Dunkirk light-float. The anchorage is exposed and the holding ground is poor. Vessels are to report to Dunkirk Pilot before anchoring.

Approaches: The approaches to the East Port are well buoyed. For large vessels the entrance is narrow, especially when swinging to starboard to enter Charles de Gaulle Lock.

Maximum size for entering the Lock: LOA 289.05 m., beam 45.05 m. and max. draft 14.2 m.

Tugs: Number of tugs required depends on size of vessel. Tugs meet vessel outside the breakwaters. Tugs require 4 hours notice and 2 hours cancellation notice at night, otherwise a charge is made.

Berthing: Stocknord and C.R.D. Berths for handling LPG in Bassin de Mardyck.

Stocknord is the Western of the 2 piers. The berth is capable of accepting the largest gas and product carriers. Vessel berthed head in.

Ethylene is handled at Berth No. 4 at the North West end of Stocknord Pier. A mooring boat is available for running lines. Vessel berthed with 2 headlines and 2 springs, fore and aft.

Cargo: Ethylene storage 5,000 cu.m. C2, C3 and C4 are imported and exported. The shore liquid arm is 8 in. (150 ASA) with automatic disconnect coupling fitted with a 6 in. (300 ASA) reducer. The vapour return line is a 6 in. (150 ASA) flexible hose. Shore supply the reducer and connect/disconnect the lines. The rate of discharge varies according to what the plant is doing with production. Sometimes one pump is used and at other times 5 pumps are used.

The shore plant places a telephone on board for communication with the Loading Master.

The surveyor, who came from Terneuzen, stays on board most of the time.

Fresh Water: Available.

REPORT: The following telex was received by a vessel from Agent in August 1990:

Please find hereafter general information concerning your call at Dunkirk:

(1) Receivers: Messrs. Stocknord – Telex: 130065.
(2) Berth: Stocknord Terminal – Pier 3.
(3) Connections: 2×12 in.
(4) Discharge: Empty tank ashore – no back pressure. From experience, turnaround is about 24 hours, including analysis prior to discharge.
(5) Facilities: Shore gangway – no shore crane – no lorry access (only lub oil in bulk with lorry fitted with special safety equipment). Bunkering: only by barge (concurrently with discharge). Fresh water available.
(6) ETA France: Please kindly remember following telex numbers:
SURNAV Marine/Cherbourg 170495
France: Marine/Brest 940527
Cross/Gris-Nez 130680
Information directly from ship only is considered as official.
(7) ETA Dunkirk: Attention please to New Pilotage Procedure: Agent will advise all parties, but Pilot Station requires information directly from ship 12 hours, 6 hours (Telex 820902), 3 hours, 2 hours (VHF) and permanent contact prior arrival.
New procedure Pilot/Dunkerque – boarding either by helicopter or fast launch boat, please kindly update ship's book.
(8) Tugs Order: Pilot will arrange tugs order when on board, after meeting with Master.
(9) Prospects: Awaiting receivers instructions at this stage.
(10) Documents: Upon arrival, please kindly prepare following documents:
The Ship's Register.
5 Crew Lists, 3 Stores Lists, 3 Crew Declarations, Cargo Manifest/Sailing Clearance from Last Port, Original Bill of Lading to receiver and copy to Agent.
(11) Information: We need as soon as possible, when known, following information:
Best ETA please.
Draft on arrival fore/aft.
Ship's and B/L figures – kilos/liters/API.
Your requirements.
(12) Acknowledgement of this message is kindly required when received.
(13) Please kindly read carefully, especially No. 7 (New Pilotage Procedure).

REPORT: March 1996.
Eastern Port:
Max. Size: Maximum length: 289.05 m. Maximum beam: 45.05 m. Maximum draft: 14.20 m.

Restrictions: Docking:
Draft less than 10.0 m.: Day and night without restrictions.
Draft 10.0 m. – 12.0 m.: Passing breakwaters 3 hours before or 2 hours after HW, day and night.
Draft 12.0 m. – 12.5 m.: Passing breakwaters 2 hours after HW, day and night.
Draft over 12.5 m.: Passing breakwaters 2 hours after HW in daylight only.
Sailing: Maximum draft 13.75 m.
LOA less than 250 m.: Day and night (subject to vessel's draft).
LOA over 250 m.: In daylight only (subject to vessel's draft).

Berthing:

Bassin Berigny			
Quai Berigny Est*	+0.25	200	Heavy swell during opening of watergates by W.N.W. wind.
Quay Sadi-Carnot	−1.50	300	
Quai de la Mature	−1.50	90	

* There is a new marina on the East side (See "Plan").

STEVEDORES: Informed by Agents (available).

CRANES:

Mobile Cranes: 1×4 tons (9 m.), 1×24 tons and 2×16 tons (8 m.).

Electric Cranes: 1×5/6 tons and 2×3 tons (18 m.).

MEDICAL: Notice not required for medical attention. Doctors and hospital always ready.

FRESH WATER: Available from shore (pipes each 50 m. on quay).

FUEL: Fuel station in Berigny Dock for fishing vessels. Other vessels are supplied by tanker truck.

CONSULS:

Consulate of Norway	Tel: 35.28.00.08.
Vice-Consulate of Denmark	Tel: 35.29.22.86.

REPAIRS: Possible.

DRY DOCKS: 1 slipway (out of order) for vessels of maximum 1,500 tons displacement, total available length 75.60 m.

Max. water height in dock: 7.50 m. dredged down to minus 2.50 m.
Max. forward draft for access: 1.80 m.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: By crew.

CERTIFICATES: In accordance with international regulations:
Load Line.
Radio Equipment.
Safety Equipment.
Derat, etc.

CUSTOMS ALLOWANCES: About 200 cigarettes per man; wine/spirits at Customs Officer's discretion.

REPATRIATION: Agents carry out these operations.

AIRPORT: Le Havre-Octeville, 35 km.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Arrangements for working during holidays can be made if necessary.

POLICE/AMBULANCE/FIRE: Police, Tel: 17 and 35.28.06.68; Ambulance, Tel: 15 or 35.10.62.62; Fire, Tel: 18 or 35.10.60.18.

TELEPHONES: No arrangements for placing telephone on board.

SERVICES: No possibilities for tank cleaning, etc. Compass adjusting available if necessary.

SHORE LEAVE: Always possible for crew members to go ashore.

IDENTIFICATION CARDS: Not required.

AUTHORITY: Chambre de Commerce et d'Industrie de Fecamp, Palais Consulaire. 8 Rue Bailly, B.P. 126, 76400 Fecamp, France. *Tel:* 35.10.38.38. *Telex:* 190452. *FAX:* 35.29.94.60. *Contact:* J. Saunier, Director General of Services. J. Duchemin, President.

Port Office: Passe Gayant, 76400 Fecamp, France. Tel: 35.28.25.53.

GRANVILLE: 48.50 N. 01.37 W. (See Plan)

DOCUMENTS: See "Calais".

PILOTAGE: Pilotage not compulsory for ships of less than 45 m. length, except for those carrying dangerous cargo. Pilots board from fishing boats carrying regulation marks of a pilot boat, and maintain position at Videcoq Buoy when a vessel is expected.

Limits of Granville pilotage are: 1. On entering, towards the West, the line joining "la Pierre d'Herpin", and Chausey lighthouse. To the North, alignment of Chausey lighthouse and "le Pignon". 2. On leaving, alignment of Mont. St. Michel through Champeaux Point. Ships bound Granville required notify ETA 18 hours in advance.

Telegraphic address: Telex 170002 SCAC Granville – Ship's Agency – Handling. Telex 170777.

1.5 hours before to 1.5 hours after high tide contact with Port Officer (Tel: 33.50.12.45 and 33.50.17.75 Granville) can be established by relay through "Coastal" Stations. During same hours contact can be made with pilot boat and with Port Office by VHF Channel 12 (port wave band 156.6).

ANCHORAGE: At landfall buoy of Le Videcoq.

RESTRICTIONS: Draft restrictions apply at neap tides. Width of Lock – 20 m. Length – 40 m.

MAX. SIZE: Vessels 115 m. long, 18 m. wide and with a max. draft of 7.50 m. may enter the tidal basin during 6 days, twice a month with effect from a tidal coefficient of about 80.

For a vessel of this size, it is recommended to give advance notice of arrival as far ahead as possible at the commencement of tides with a coefficient of 80.

Entry of a deep draft vessel may make it necessary to close the tidal basin more quickly after high tide.

Speed in the channel, the fore port and the tidal basin is limited to 5 knots.

HEALTH: Pratique arranged by Customs.

RADIO: Boulogne Radio for ships coming from the North. Brest-Le Conquet Radio for ships coming from the South.

TUGS: Port not equipped with tugs. Pilot boats used as "pushers" for port manoeuvres, or for carrying hawsers to tying-up points.

VHF: Port Authority on Channels 16 and 12 during working hours.

BERTHING: Determined according to nature of cargo.

Tidal Basin: 3 electric cranes (2×7 tons and 1×6 tons) serve the South quay, and 1×10 tons serves the North and East quays.

Open areas, warehouses and storage silo capable of receiving all goods in bulk, bags or packages.

Internal transport: rail and road.

Fore Port: Open area and mobile cradle capable of hauling up vessels up to 100 tons. 1×5 ton crane on cradle. Repair yards.

West Quay: Between tidal basin and fore-port – solely for fish discharge and auction. Quay to be lengthened by 110 m. and widened by 14 m.

STEVEDORES: Work hours 0800/1200, 1400/1800. Overtime possible.

MEDICAL: Hospital available. Tel: 33.50.11.37. Also Medical Centre.

TANKERS: 2 berths for unloading domestic fuels through 8 in. pipes.

DENSITY: 1025.

FRESH WATER: Available at all quays, international connections.

FUEL: Available from tanker lorry to commercial vessels at 48 hours notice.

CONSULS: None.

REPAIRS: Possible. Also radio repairs.

OPENING/CLOSING HATCHES: Carried out by crew.

GANGWAY/DECK WATCHMEN: Available on request.

CUSTOMS ALLOWANCES: Tobacco. 200 cigarettes. Wines and spirits. 1 bottle spirits.

REPATRIATION: Paris, 3.5 hours by train.

AIRPORT: 10 km. from the port at Breville. Air-taxi and commercial flights.

TIME: Local Time GMT plus 1 hour in Winter and GMT plus 2 hours in Summer (1st April – 1st October).

HOLIDAYS: See "Calais". Local holiday, Mardi Gras afternoon.

POLICE/AMBULANCE/FIRE: Police Tel: 33.50.11.16; Fire Service 18; Ambulance 33.50.11.37.

GENERAL: Marina with 1,050 berths at Herel. Max. length 15 m. Max. depth available 2.75 m.

AUTHORITY: Le Commandant de Port, Port de Granville, Terre-Plein de l'Ecluse, 50400 Granville, France. *Tel:* 33.50.17.75 or 33.50.12.45. *FAX:* 33.50.32.99. *Contact:* A. Beauvilain, Port Officer.

HONFLEUR: 49.25 N. 00.14 E. (See Plan)

DOCUMENTS: See "Rouen".

PILOTAGE: See "Rouen".

RESTRICTIONS: Access to port made through channel 100 m. wide, protected by 2 dykes about 500 m. long, which leads to outer harbour. Honfleur possesses 3 basins:

Dock	*Length*	*Width*	*Sluice width*
West Dock	128 m.	77 m.	10.50 m.
East Dock	295 m.	71 m.	16.50 m.
Carnot Dock	788 m.	108 m.	13.00 m.

East Dock joins outer harbour: ships of more than 70 m. long must anchor in Carnot Dock which spans from East.

Lock: Vessels proceeding to docks mentioned above have to pass through a lock (36 m. × 23 m.) (See "Plan"). Contact Harbour Master for opening times.

MAX. SIZE: Port can receive ships 100 m. long and 15.50 m. wide berthing in East Dock; but with Carnot Dock, only ships less than 12.50 m. wide can enter. Drafts vary according to tides: 5.00 m. with average spring tide and 3.5 m. in average slack water.

The "Quai en Seine" (2 berths) can receive ships of LOA 200 m. and over 8.0 m. draft, according to tides, without dredging difficulties.

HEALTH: Bill of Health is under the jurisdiction of Customs office of Honfleur. Hospital nearby.

RADIO: Boulogne Radio, Brest Radio or St. Lys Radio. A permanent watch is maintained by Rouen Port on Channels 16 and 73. Disengagement frequency after call on Channel 73 is Channel 17 for Honfleur Port.

TUGS: If necessary are provided by "La Societe des Abeilles" of Le Havre.

BERTHING:

Name	*No. of Berths*	*Depth Neaps (m.)*	*Depth Springs (m.)*	*Equipment*	*Remarks*

RADIO: Within 50 miles call Ajaccio Radio VHF Channel 16. Then connected over Channel 23 to telephone network.
TUGS: None available.
BERTHING: Depths alongside 2.0 m. – 6.0 m. Only available when not occupied by ferry.
STEVEDORES: 24 hours accurate ETA necessary for ordering gangs. No work on Sundays and official holidays.
CARGO GEAR: Only a few nets and slings available; all other gear must be supplied by ship. Ship's derricks used.
FRESH WATER: Available at very slow pumping rate.
FUEL: Not available.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
AUTHORITY: Bureau du Port de Commerce, 20220 Ile Rousse, Corsica. *Tel:* 95.60.00.68 or 95.60.14.50.

IZON: 44.57 N. 00.22 W.

NO ACTIVITIES AT THE PORT SINCE 1990.

LA CIOTAT: 43.10 N. 05.36 E. (See Plan)

NOTE: THE PORT HAS CEASED RECEIVING CARGO SHIPS SINCE 1990. PORT STILL IN USE FOR FISHING VESSELS AND YACHTS.
APPROACHES: La Ciotat Bay is situated between Toulon and Marseilles. The bay is sheltered from North and N.W.'ly winds. The "Bec de L'Aigle", height 155 m., makes an easily recognisable landmark for the approach to the harbour.
The entrance channel to the harbour has a depth of 7 m.
PILOTAGE: Pilotage compulsory for vessels over 70 m. LOA. Chantiers Navals de La Ciotat (C.N.C.). have 2 Pilots.
ANCHORAGES: Good anchorages available in La Ciotat Bay. Anchoring in the harbour is forbidden.
MAX. SIZE: Largest vessel 380 m. long, 60 m. beam and 7.5 m. draft.
VHF: Signal station keeps watch on Channel 16 from 0630 – 2100 hrs.
TUGS: 2 tugs of 180 h.p. and 200 h.p.; tugs also available from Marseilles.
BERTHING: Harbour is formed by 6 moles. Depth in harbour varies from 1.32 m. to 7.62 m., vessels drawing up to 7.31 m. can enter. Total quayage 1,610 m. There are two basins near the main harbour specially equipped for pleasure craft.
CRANES: Electric cranes: 1×250 tonnes, 1×120 tonnes, 1×50 tonnes, 2×40 tonnes, 1×20 tonnes, 3×6 tonnes and 1×5 tonnes. One floating crane of 80 tonnes. All cranes belong to C.N.C.
MEDICAL: Private clinics and local hospital available.
FRESH WATER: Available from C.N.C.
FUEL: Available.
DRY DOCKS: Building Dry Dock: 360 m. × 60 m. × 9 m.
No. 1 Slipway: 228 m. × 39.30 m. with lifting apparatus for 7 – 150 tonnes.
No. 2 Slipway: 172 m. × 31 m. with lifting apparatus for 5 – 150 tonnes, one 660 tonne gantry crane and one 500 tonne gantry crane.
AIRPORT: Marseilles (Marignane) 55 km. away.
POLICE/AMBULANCE/FIRE: Police – Tel: 42.83.90.00. Fire – Tel: 18.
AUTHORITY: Port Authority of La Ciotat, Service Maritime Departmentale, 40 Bd. de Dunkerque, 13002 Marseille, France. *Tel:* 91.91.80.80. *FAX:* 91.56.61.49. *Contact:* M.Priere.
Harbour Office at La Ciotat, Tel: 42.08.62.90. *FAX:* 42.71.80.87. *Contact:* M.Font.

LA NOUVELLE: 43.01 N. 03.04 E. (See Plan)

DOCUMENTS:
1 Passenger List.
4 Crew Lists.
2 Stores Lists.
1 Cargo Manifest.
Bill of Health.
Safety Certificates.
I.O.P.P. for Tankers.
PILOTAGE: Pilotage is compulsory for all vessels over 45 m. LOA.
Send ETA with request for pilot 18 hours prior to arrival, by telex or cable via Marseille Radio.
Pilot boards 1.0 – 2.0 miles East of harbour entrance.
Pilots: Tel: 68 48 01 81.
Fax: 68 48 25 40.
Cables: Pilonov.
Telex: 505588.
VHF: Channel 12.
ANCHORAGE: Anchorage area is located 1.0 – 2.0 miles S.E. of South Breakwater.
MAX. SIZE: For port entry: Length 140 m., beam 22 m., draft 8.0 m. Tanker sea line: 40,000 d.w.t. LOA 200 m., max. draft 12 m.
HEALTH: Pratique is given by Customs Officers who board vessel on arrival. In case of suspected disease on board, Master should radio Agents advising details before arrival.
VHF: La Nouvelle Port Control on Channel 12.
TUGS: One tug of 900 h.p. available (bollard pull 11 tons). There are several launches to assist in mooring (200 h.p. – 400 h.p.).
BERTHING: Effected in the order in which vessels arrive. Specialised berth for Roll-on/Roll-off available.
STEVEDORES: Arranged by consignees.
MEDICAL: Doctors available at La Nouvelle. Nearest hospital is at Narbonne, 27 km. away.
TANKERS: 3 dolphin berths in the oil dock, max. draft 8.0 m. One of these berths is used for LPG cargoes. Slop disposal facilities available if requested 48 hours prior to arrival.
Tete Terminal: Buoy mooring, approximately 1.0 miles E.N.E. of harbour entrance, in position Lat. 43° 01' 05" N., Long. 03° 05' 19" E.
Masters of tankers berthing at the sea-line must advise their ETA and cargo on board by telex or fax to:
(a) Saram Manager - Telex: 500582 or Fax: 68.48.55.95.
(b) Pilot Station (See "Pilotage").
Vessels moor with two anchors forward, four buoys aft, and 2 swamped moorings from break of forecastle.
Tankers must be fitted with winches, drums and bollards and be able to receive 45 mm. diameter steel cables.
The vessel's derrick/crane must be rigged to a minimum 5 tons SWL. The pilot and 2 mooring crew remain onboard during the vessel's stay. The sea-line connection is 10 in. diameter.
DENSITY: 1025.
FRESH WATER: Supplied at all town berths.
FUEL: Available from several suppliers.
FIRE PRECAUTIONS: Usual safety regulations strictly applied. A barrage can be positioned across the channel to contain burning oil.
CONSULS: No local representation.
REPAIRS: Not possible ashore, except very minor ones.
OPENING/CLOSING HATCHES: Optional, performed by stevedores or crew.
CUSTOMS ALLOWANCES: Each crewman allowed to retain only sufficient for his own consumption while in port. It is forbidden to take alcohol ashore.
REPATRIATION: No difficulties.
AIRPORT: Perpignan (Internal and Charter flights). Marseille (International flights).
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: In principal, no work done on legal holidays.
POLICE/FIRE/AMBULANCE: Police, 68.48.00.11; Fire, 68.48.00.17; Ambulance, 68.48.10.13.
TELEPHONES: No connections can be made on board.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Any person going ashore should carry a passport or identity card.
AUTHORITY: Service Maritime et de Navigation du Languedoc-Roussillon, 33 Rue Honore Daumier, 66006 Perpignan, France. *Tel:* 68.61.31.70. *FAX:* 68.61.30.04. *Contact:* Mr. Thureau, Port Director.
Capitainerie du Port, 229 Avenue de la Mer, B.P. 47, 11210 Port La Nouvelle. *Tel:* 68.48.17.64. *Telex:* 505586 F. *FAX:* 68.40.31.42. *Contact:* Captain Gilbert Guillaume, Harbour Master.

LA ROCHELLE/LA PALLICE: 46.10 N. 01.14 W. (See Plan)

DOCUMENTS:
3 Cargo Manifests, or Manifest of Ballast.
Certificate of Cargo Space.
2 Bills of Lading.
2 Stores Lists.
2 Personal Effects Lists.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.

PILOTAGE: Access from sea is through Pertuis d'Antioche, the strait between Isle of Re and Isle of Oleron. Pilotage compulsory for all vessels over 55 m. length and available 24 hours. Pilot launch named *Armeria,* meets vessels at Chauveau Buoy in position Lat. 46° 06' 05" N., Long. 01° 16' W. Contact Pilot via VHF Channel 16, 2 hours before arrival. ETA must be given to Capiport 12 hours before arrival. In same message, Master must also advise if engine, rudder, winches, windlass, cargo pumps, radar, VHF and radio are in good working order. Master must also give the expiration date of the Oil Pollution Liability Certificate and state insurers name.

Vessels which do not receive berthing instructions on arrival should wait in the vicinity and South of Chauveau Buoy, keeping watch on VHF Channel 16.

Harbour Pilots: Tel: 46426305. Fax: 46422696.

ANCHORAGES: Vessels which do not receive berthing instructions on arrival should wait at anchor in the vicinity and 0.5–1.0 miles South of Chauveau Buoy. Keeping watch on VHF Channel 16.
Tanker Anchorage: Lat. 46° 05' N., Long. 01° 15' W.

RESTRICTIONS: Tankers usually berth at HW on the East side and either at HW or LW on the West side, providing their draft allows it.

Sailing possible at any time.

Vessels in excess of 140 m. length can enter Inner Basin only from 2 hours before to 1 hour after HW.
Lock: 168.5 m.×21.6 m.×4.0 m. (sill).

MAX. SIZE:

HEALTH: Pratique given by Customs Officers who board on arrival. In case suspected disease on board, radio Agent in advance advising details.

RADIO: Bordeaux-Arcachon Radio. Also see "Pilotage".

VHF: La Pallice Port on Channels 16 or 12. Bordeaux-Arcachon Radio on Channels 21 and 26.

TUGS: Join vessels either in outer roads or inner roads of La Pallice. Normally tugs' lines are used.

3 tugs are permanently based at La Pallice, 1×1,250 h.p. (22 tonnes B.P.), 1×1,800 h.p. (30 tonnes B.P.) and 1×2,050 h.p. (30 tonnes B.P.).

Port Regulations prescribe the number of tugs to be used depending on tanker's deadweight:
Outer Port:

Berthing			*Sailing*	
Without bow-thruster	*With bow-thruster*	*d.w.t.*	*Without bow-thruster*	*With bow-thruster*
1 (12 tons)	none	5,000–10,000	none	none
2 (30 tons)	1 (20 tons)	10,000–25,000	1 (20 tons)	1 (20 tons)
2 (40 tons)	1 (30 tons)	25,000–40,000	1 (30 tons)	1 (30 tons)
3 (60 tons)	2 (50 tons)	over 40,000	2 (50 tons)	2 (50 tons)

Inner Port:

Tankers over 5,000 d.w.t. require 1 tug (12 tons) for berthing and sailing.

BERTHING:

CRANES: *Basin:* North Quay: 4×3-10 tons, 1×3-12 tons.
South Quay: 6×6 tons at 18 m.
Dry Dock: 1 Titan crane×20 tons at 25 m.
Fore Port: Chef de Baie: 3×33.5 tons at 22 m.
Mole D'Escale: East Side: 5×3-6 tons.
West Side: 2×15.5 tons, 1×33.5 tons.

STEVEDORES: Normal working hours for stevedoring are: 0800 – 1200 hrs. and 1400 – 1800 hrs. 2 hours overtime may be worked from 1800 – 2000 hrs. When a quick despatch must be given to a vessel, an 8-hour shift can be arranged, from 0500 – 1300 hrs. and 1400 – 2200 hrs. during the week, and 0500 – 1300 hrs. on Sundays and holidays.

MEDICAL: All facilities available. Advance notice should be given if assistance required on arrival.

TANKERS: Only refined products are discharged at La Pallice. Four installations can receive cargo at both berths (West or East). Petroles de l'Ouest, Total and Raffinerie du Midi use the same pipeline of 16 in. with a metal arm of 10 in. on each side. The Picoty installation has its own pipeline of 12 in. with a metal arm of 12 in. on West side and one of 10 in. on East side.

All shore tanks (total capacity 500,000 cu.m.) are 3 km. to 4 km. from oil jetty.

Also see "Berthing" and "Max. Size".

FRESH WATER: Available from all wharves. Loading rate 15 t.p.h. No barges available.

FUEL: Supplied by tank trucks only. Diesel oil available locally. Light fuel oils available with sufficient notice. Tankers must stop pumping during bunkering.

FIRE PRECAUTIONS: Smoking is prohibited on the oil jetty. Entrance to the oil jetty is controlled by watchmen.

CONSULS:

Denmark	Tel: 46.41.10.66	Netherlands	Tel: 46.42.61.94
Finland	Tel: 46.44.15.07	Panama	Tel: 46.42.13.44
Greece	Tel: 46.42.13.44	Spain	Tel: 46.41.17.25
Italy	Tel: 46.41.35.94	Sweden	Tel: 46.42.13.44

REPAIRS: All kinds of deck, hull and engine repairs can be carried out by Le Ponant.

Vessels not exceeding 21 m. beam may be repaired in the inner basin. Larger vessels are repaired at berths outside the inner basin.

DRY DOCKS: 2 dry docks in Inner Basin: 170 m.×21.8 m. and 100 m.×13.8 m.

OPENING/CLOSING HATCHES: Performed by ship's crew.

GANGWAY/DECK WATCHMEN: Available from shore if required. *Tankers:* An automatically–moving shore gangway is available providing that the ship's deck has a sufficient clear surface.

CUSTOMS ALLOWANCES: 200 cigarettes and bottle wine/spirits per man.

REPATRIATION: Can be arranged without difficulty.

AIRPORT: Airport, 3 km. Daily flights to Paris.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer. (April-September).

HOLIDAYS: New Year (1st January), no labour available; Easter Sunday, possibility of labour with overtime; Easter Monday, no labour available; Labour Day (1st May), no labour available; Ascension Day, possibility of labour with overtime; Whit Sunday, possibility of labour with overtime; Whit Monday, no labour available; National Day (14th July), no labour available; Assumption Day (15th August), no labour available; All Saints' Day (1st November), no labour available; Armistice Day (11th November), possibility of labour with overtime; Christmas Day (25th December), no labour available.

N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100% extra.

POLICE/AMBULANCE/FIRE: Police Secours 17; Commisariat Central 46.41.92.44; Ambulance 18; Fire Service 18.

TELEPHONES: Telephones are available at all berths at the mole.

SHORE LEAVE: Allowed, no restrictions.

IDENTIFICATION CARDS: Crewmen going ashore should carry passports or identity cards.

WASTE OIL DISPOSAL: Tanker trucks available from several companies.

GENERAL: Old harbour at La Rochelle is used only by fishing vessels and pleasure craft.

DEVELOPMENTS: Cereals quay to be lengthened and facilities to be upgraded. Vessels up to 100,000 d.w.t. will be able to be accommodated.

AUTHORITY: Capitainerie des Ports de La Rochelle, B.P. 2042, La Pallice, 17009 La Rochelle Cedex, France. *Contact:* Port Office: Tel: 46005630. Fax: 46423188. Duty Office: Tel: 46005656. Fax: 46005600.

Chambre de Commerce et d'Industrie de la Rochelle, BP 2057, 17009 La Rochelle Cedex, France. *Tel:* 46005360. *FAX:* 46431254. *Contact:* P. Brenuchot, President. O. Jousset, General Manager.

LE CHATEAU d'OLERON: 45.53 N. 01.11 W.

Very small fishing port on Ile d'Oleron. Entrance to port is 9 m. wide.

BERTHING: Tidal harbour with 350 m. of quayage. Depths alongside from 4.9 m. HW to zero at LW. Local fishing boats are the only vessels handled at the port.

CRANES: One 2.5 ton crane available.

REPAIRS: Minor repairs only.

AUTHORITY: Monsieur Le Maire de la Commune du Chateau d'Oleron, Boulevard Victor Hugo, 17480 Le Chateau d'Oleron. *Tel:* 46.75.53.00. *FAX:* 46.47.79.75.

AGENT: M. Le Boutillier, 106, Bd. Emile Delmas, P.O.Box 2038, 17009 La Rochelle Cedex, France. Tel: 46.421344. Telex: 790742 ("Ships 790742 F"). Cables: "Daylight – La Rochelle".

LE HAVRE (Including Antifer): 49.30 N. 00.07 W.

(See Plan)

DOCUMENTS: At arrival in-bound bill tendered by Pilot to be filled up and signed by Master specifying ship's data and dangerous cargo on board. After berthing: The Master must also complete the inwards declaration as soon as the Pilot comes onboard. Any abnormality must be reported to the Harbour Master (VHF Channel 12).

For Customs Officers

1 Crew List.
1 Crew Declaration List (personal effects, camera, radio set, cigarettes, cigars, tobacco, etc.).
1 Ship's Store List.
1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).

For Health Officers

1 Crew List.
1 Health Declaration.
Derat Certificate.
1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).
Individual International Certificates of Vaccination.

For Customs Broker

1 Crew List.
1 Crew Declaration List (personal effects, camera, radio set, cigarettes, cigars, tobacco, etc.).
1 Ship's Store List.
1 Certificate of open space occupied by cargo.
1 Passengers' Manifest (disembarking).
1 Baggage Manifest (unaccompanied).
Tonnage Certificate.

For Agents

1 Crew List.
2 Passengers' Manifests (disembarking).
2 Passengers' Manifests (in transit).
2 Baggage Manifests (accompanied).
2 Baggage Manifests (unaccompanied).
2 Dangerous Cargo Manifests and usual cargo documents.

For Immigration Office

1 Crew List.
1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).

PILOTAGE: Pilotage is compulsory for all vessels over 70 m. in length and those vessels carrying dangerous cargoes or not equipped with VHF. Under certain conditions car ferries of less than 135 m. in length may be exempt from pilotage.

ETA and draft must be sent to Harbour Master by any means at least 24 hours prior to arrival, or if at sea or in a port less than 24 hours away as soon as possible.

New ETA must be sent if change is more than one hour. Failure to send amended ETA may lead to penalty.

Pilot boats have orange hull with "Pilote Havre" in black letters on both sides, green flag with white anchor on fore-mast.

Pilot boards in the vicinity of:

(a) The LHA Lt. buoy for deep draft vessels.
(b) The HP Lt. buoy for other vessels, including those carrying dangerous cargoes.
(c) The A5 Lt. buoy for vessels bound for Antifer.

Vessels may anchor near LHA Buoy, South of entry alignment in good weather and further off in bad weather.

Light or sound signal to be made by vessels requiring a Pilot, letter "G" in morse code.

Pilots also board by twin-screw helicopters. This method is most frequently used to bring the Pilot(s) to large tankers (only during the day), and Pilots are landed either by the craft landing on the deck or being winched down if the vessel has no landing area.

Pilots on VHF Channels 16, 12 and 20. Tel: 35.19.28.48.

Shipmaster's Report: June 1988.

Master, after having sent his ETA by telex or cable, has to contact Le Havre Port by VHF at least 4 hours before arrival and confirm his ETA.

Usually 3 hours before arrival is accepted, but, when coming from the North, it is very difficult or impossible due to distance to have contact by VHF with Le Havre Port. In good weather conditions, Master will be able to contact Le Havre 1 hour to 2 hours before Pilot Station.

To avoid difficulties with Le Havre Port and Pilot, Master can send a cable through Boulogne Radio giving and confirming his ETA.

ANCHORAGES: Anchoring forbidden in the channel between both parallels 100 m. South and North of channel and in a zone 1 nautical mile long and 500 m. wide in prolongation of channel.

RESTRICTIONS: Depth in main channel 15.5 m. LW. Depth in tidal basin 14.5 m. LW.

Main lock entrance to enclosed basins, length 400 m. width 67 m., depth 14.5 m.

Vessels berthing in tidal docks (Bassin Theophile Ducrocq) dependent on tide.

Quinette de Rochemont Lock open from 2 hours 20 minutes before high tide until 40 minutes after. During this period vessels of max. length 210 m. and max. breadth 26 m. may pass through. Otherwise max. length authorised is reduced to 180 m. In some circumstances some locks are completely closed around low tide.

CIM Berth No. 10 may receive tankers up to 280,000 d.w.t., depending upon tide. Such vessels enter only by daylight and must arrive at Le Havre Buoy at least 3 hours before HW.

MAX. SIZE: Tankers: Length 392 m., draft (approx.) 20 m. subject tide.

Berths of Compagnie Industrielle Maritime (C.I.M.): Max. draft recorded 20.73 m. Another vessel with following dimensions has also berthed – length 391.83 m., beam 68.05 m., 423,699 d.w.t.

Antifer (East and West Berths): Max. dimensions recorded: Length 458 m., beam 79 m., 564,760 d.w.t., draft 28.85 m., subject of tide.

Bulk Carriers: 194,226 d.w.t. (coal). draft 17.16 m.

HEALTH: Free Pratique automatic for vessels coming direct from Continent or Italy and "Q" flag not to be flown. From other countries including Spain and Portugal usual applies. Free Pratique may be obtained by radio message to Sanipor Le Havre specifying name of vessel – where coming from – total number of Crew members, number of Crew members vaccinated (yellow fever, cholera).

Tankers: For tankers it is advisable to ask Free Pratique by radio in order start operation as soon as vessel berths.

RADIO: Masters of ships are requested to send to Le Havre Harbour Master their expected time of arrival at Le Havre Light Buoy and maximum draft.

The message will be sent by any means and in particular through radio stations of: Boulogne-Radio/FFB (working frequencies 1771 kHz and 2747 kHz) or Brest le-Conquet Radio/FFU (1806/2726 kHz) for less than 24 hours before arrival and confirmed 3 hours before arrival

It will give the date and time GMT of ETA, and the maximum draft. Same stations of Boulogne and Brest to be used to contact Agent and in addition Saint Lys/FFL. This ETA must be confirmed to Le Havre Port by VHF, 3 hours before arrival in the roads.

Port Operations Radio Service: The "Havreportradio" station keeps a permanent watch on the following frequencies: 156.6 MHz (Channel 12); 156.8 MHz (Channel 16); 157.0-161.6 MHz (Channel 20 duplex). This station sends and receives all messages for the port operations control.

Ships call "Havreportradio" directly on Channels 12 or 20. Ships mooring, leaving or moored on roads *must keep watch on Channel 16.*

Ships with Pilot on board must keep watch on Channels 12 or 20 from Pilot on board until arrival at berth, and from departure of berth until disembarking Pilot. Havreportradio/FFY keeps watch on 2182 kHz. This frequency will be used only in a radius of 22 miles from Havre Light Buoy and only when it is not possible to use VHF.

Public Correspondence Service: Ships fitted with VHF sets can obtain telephone calls through the Le Havre Radio Station.

Telephone calls are admitted with ships on berth.

Ships must call "Le Havre Radio" directly on Channels 23, 26, 28 and 82. "Le Havre Radio" calls ships on Channel 16.

Identification of Vessels: Notice No. 33/95 dated 19.12.95.

Creation of an identification zone demarcated by a circular arc of 22 miles centred around the La Heve Lighthouse (49°30.8'N., 00°04.1'E.).

Any vessel over 50 m. in length, either arriving at or departing from the ports of Le Havre, Rouen or Caen, is asked to send a signal to the "Baie de Seine" Station on VHF Channel 22. Vessels keep double watch in the area on VHF Channel 16 of the port of origin or destination.

RADAR/VHF: Radar assistance may be obtained by calling Le-Havre-Radar on Channel 16 (156.80 MHz). Then working frequencies are Channels 14 and 22. Radar coverage is from 20 km. to the West of the Light-Buoy and 40 km. to the West of Antifer.

Le Havre Port on Channels 16, 12 and 20. Antifer Port on Channels 16 and 22. Also see "Radio".

TUGS: 10 tugs available, from 2,300 to 4,800 h.p. Normally join vessel inside the jetties in outer harbour. Ship's lines or tug's lines used at ship's option. Extra charge for use of tug's line. 2 tugs are equipped for fire fighting.

BERTHING: Agents generally inform Master by radio of berthing prospects, arrival time limits and any special requirements.

*Access Conditions:

Mean level 4.57 m.

Unit of Height 3.45 m.

Width of the Outer Channel 300 m.

Depth of the Outer Channel under Chart Datum 15.5 m. on the shipping route.

Inner Channels and Swinging Areas, depths under Chart Datum 15 m.

Level Reading: The levels quoted represent those of the bottom or of a piece of work in comparison with the zero on marine charts.

The zero of the charts is the reference point defined by the level of the lowest possible sea.

Contrary to marine customs signs (+) correspond to a height above zero. Signs (–) correspond to a height below zero.

A quarterly timetable gives for each tide the maximum admissible draft for large ships calling at the port.

Calculation is Based on the Following Principle: The vessel must keep a keel clearance equal to 10% of the admissible draft.

As a guidance, in Spring Mean Tide:

Example:

Coefficient	95
High Water	7.7 m.
Depth of the Outer Channel under Chart Datum	15.5 m.
Depth of the Inner Channel under Chart Datum	15.0 m.
Water depth	22.7 m.
Maximum admitted draft	20.65 m.

BULK HANDLING FACILITIES: *Minerals:* 6 berths with cranes, outreach 15 m. – 37 m. Able to accept vessels up to 300 m. LOA and 150,000 d.w.t. Depths up to 16.0 m. Discharge rates up to 2,400 t.p.h.

Grain: Quai Hermann du Pasquier for ships up to 28,000 d.w.t. Grains (theoretical output) 2 gantry cranes for loading cereals in bags 150 t.p.h., 3 gantry cranes import/export 280 t.p.h., 1 gantry crane import 300 t.p.h. Max. LOA 210 m.

Quai Joannes-Couvert: For ships up to 60,000 d.w.t., 2 elevators (grains – export gantries) theoretical output 600 t.p.h.

Quai des Arachides: For ships up to 6,000 d.w.t. Max. LOA 130 m.

Cattle Feed: Multibulk terminal with length 300 m., max. draft 17.00 m. 1×15 ton and 1×30 ton gantry crane. Storage capacity 45,000 tons. Max. discharge rate 20,000 tons per day.

Sugar: Handled at "Silagro" Terminal at Quai Hermann du Pasquier. 2×15,000 ton silos. Bagged products can be loaded on vessels of 30,000 d.w.t. at the Northern end and bulk products can be loaded on vessels of 80,000 d.w.t. at the Southern end. Loading rate 700 t.p.h.

Fruit: 7 berths available (2 banana berths). Max. LOA 300 m.

Containers: Quai de l'Atlantique: Length 800 m., 3 berths for large vessels. Depth –12 m.

4 gantry cranes of 40 ton capacity with 35 m. extension, at quay's edge. 2 French Railway's gantries for handling on to wagons. 1×7,000 sq.m. shed under construction near to terminal for container groupage and breaking bulk. 16 hectares open air areas. Extensive parking facilities. LASH facilities also available.

Quai de l'Europe: Length 1,160 m. 4 berths for large vessels, 3 of which are equipped to handle Roll-on/Roll-off traffic.

5 gantry cranes of 40 tons with 40 m. extension, at quay's edge. 1 shed 10,108 sq. m., 1 shed of 7,023 sq. m., already used for groupage and break-bulk of containers and 1 shed of 10,000 sq.m. under construction.

2 S.N.C.F. gantry cranes for loading and unloading of wagons. 45 hectares of open air areas. Extensive parking facilities.

Quai de Bougainville: Actual length 1,580 m. Equipped with 5 gantries for containers of 40 tons and 5 cranes 6 – 10 tons.

Rapid Turnaround Port: Quai de l'Asie: Length 620 m. 3 Post-Panamax container gantry cranes.

Darse du Pacifique - Quai d'Osaka: Length 460 m. 2 Post-Panamax container gantry cranes.

Quai de l'Amerique: Length 503 m. 3 Post-Panamax container gantry cranes.

Roll-on/Roll-off: Four berthing places in the tidal basin, five berths in the wet dock, eight berthing places in the non-tidal docks.

Liquid Chemicals: At the berths of "Societe Normandie de L'Azote", "Sogestrol", and "Petrochimie" along the Grand Canal du Havre. 9 berths available, depths 0.5 m. – 5.0 m. For vessels of 80 m. – 240 m. LOA and 7,000 – 45,000 d.w.t.

LPG: 4 berths available, depths up to 9.0 m. For vessels up to 75,000 cu.m. and LOA of 240 m.

CRANES: Also see "Berthing".

71 wharf cranes of 2.5 tons – 10 tons.

3 floating cranes 8, 90, 200 tons.

24 electric gantry cranes 6 tons – 40 tons.

1 land sheer legs 650 tons.

4 grain elevators 280 t.p.h. – 300 t.p.h.

2 gantry cranes for loading cereals in bags 150 t.p.h.

BRIDGES: No special restrictions. Opened upon request. Master will be informed as above in case any bridge stopped for repairs.

STEVEDORES: Stevedores work in 4 working periods, Sundays and holidays included (except January 1st, May 1st and December 25th, which are never worked).

Working periods are 0500 hrs. to 1500 hrs. 1000 hrs. to 2000 hrs., 1300 hrs. to 2300 hrs. and 2000 hrs. to 0600 hrs.

Each of the first three periods are called "day periods" and no more than 9 hours of continuous working and 8 hours in the 4th (night period) with a minimum of 5 worked hours (day) and 4 hours (night).

There is no overtime but extra charges are applied in the 4th period (night) – 25% on weekdays, 50% on Sundays and holiday nights.

In a period, gang can successively work on several ships.

It is necessary to give agent and compulsory to give Harbour Master 24 hours notice of accurate ETA and hatch distribution in order to arrange gangs.

Work done with shore crane. Ship's derricks used only exceptionally.

It is compulsory to put a net under the gangway before starting work, for lack of which stevedores refuse to go on board.

MEDICAL: It is not necessary for Agent to receive advance notice of required medical attention except when Master requests a doctor on board. The Master must after berthing inform Agent of number of patients and nature of disease, name of patient, rank, in order Agent may arrange corresponding appointment with doctors, dentists, specialists, etc. Hospital facilities available provided admission ordered by local doctor.

Inoculation: Yellow fever – effected only at the hospital once per week on Thursdays 1400 to 1500 hrs. Other inoculations may be effected by local doctors (with appointment).

TANKERS: Diameter of connections at different berths of C.I.M.: No. 3, 4 and 5, 10 in.; 6 and 7, 12 in.; 8 and 10, 16 in.

9 additional berths available for refined products. Max. LOA 270 m. (50,000 tons), depth 6.0 m.

Tankers calling first time at Le Havre recommended to inform Agents of position of manifold connection. Slop reception facilities available up to 1,000 t.p.h.

Berth	*Max. LOA (m.)*	*Pumping rate t.p.h.*	*Max. d.w.t.*

M.C. 3	220		45,000

Note: Minimum length Antifer West 320 m. and Antifer East 270 m.

Berth	*Admissible Length (m.)*	*Remarks*
Canal de Tancarville Orcher		
Berth for loading	100	Refined products
Waiting Berth	100	Refined products
4 Berths for barges	80	Refined products
Appt. Saint-Denis 1	85	Refined products
Appt. Saint-Denis 2	60	Berth for self-propelling barges
Waiting Berth in Garage de Tancarville	80	Bunkering only
Canal Bossiere		
Jonction 1	80	Accessible to 4,000 d.w.t. tankers
Jonction 2	150	Accessible to 12,000 d.w.t. tankers
Jonction 3	270	Accessible to 50,000 d.w.t. tankers

*Level: For explanation see "Berthing".

Report: *Port Approaches:* After having rounded the Barfleur Cape, at least 7 miles off the French coast for tankers carrying dangerous cargoes, vessels approaching Le Havre have to take care of the heavy traffic coming from this port or from the River Seine.

In Port: As the approach channel is tidal, attention must be paid to cross currents when transitting and especially outside the breakwater entrance (250 m. wide) where the setting effects can be very important. Drift allowance to counteract the current will vary from about 5° on Neap tides with no wind to 20° on Spring tides with strong cross winds. Inside the harbour there is practically no current from 2 hours before HW time up to 1 hour after. No vessel is permitted to anchor in any part of the port except in an emergency or for docking purposes.

Berthing: The Avant port is entered between two breakwaters about 860 ft. apart, and tankers bound for the CIM Berths proceed through a second set of breakwaters into the tidal basin Theophile Ducrocq, where those bound for CIM Berth Nos. 6, 7, 8 and for SHMPP Berth MCT 3 are swung, assisted by tugs, in the first turning basin, and those for CIM Berth 10 in second turning basin.

It is a difficult manoeuvre, particularly for VLCCs' to slow the vessel down and connect tugs within the time and space available from passing the breakwaters till the turning basin is reached. It is, therefore, important that engine response is prompt and that personnel and equipment are ready to connect up the tugs.

General: The CIM Berths are located on the South side of the tidal basin. Berth Nos. 1 to 7 are aligned at a 45° angle and the VLCC Berth Nos. 8 and 10 are parallel to the basin.

The SHMPP Berths, Junction 2 and 3 are located in the Constant Level Dock, facing the new Lock Francois Ier, which is at the Eastern extremity of the tidal basin.

Water density in the port averages 1024 – 1026.

Tugs:

Vessel	*Number usually used*				
(k.d.w.t.)	Up to 40	50/60	70/80	90/120	190/250
Berthing	2	3	3/4	4	4
Unberthing	2	2	2	2	2

4 tugs are recommended for mooring VLCCs. The 4 most powerful tugs available are used.

2 tugs are made fast on the hook forward and aft and 2 others are secured alongside.

Especially for VLCCs, it is recommended to use tug lines putting eye over bitt.

Berthing Procedure:

(a) CIM Berth Nos. 1, 2, 3, 4 and 5: Tankers bound for these berths are, after having made tugs fast, moved directly into berth, mooring head in. Starboard side alongside Berth Nos. 1, 3 and 5; and port side alongside Berth Nos. 2 and 4.

(b) CIM Berth Nos. 6, 7, 8: Tankers bound for these berths are swung in the first turning basin and towed stern first into the berth mooring head out with starboard side alongside Berth No. 7 and port side alongside Berth Nos. 6 and 8.

(c) CIM Berth No. 10: A tanker bound for this berth is, assisted by tugs, swung in the second turning basin just upstream of the berth, then moved into position parallel to the berth about 100 m. off and pushed alongside by the tugs, mooring with port side alongside.

Exceptionally, when 2 VLCC's have to be berthed during the same HW tide, they can be berthed at CIM No. 8 and 10 starboard side to, this saving 30 – 40 minutes corresponding to the swing.

(d) SHMPP Berths JON 2 and 3: Tugs (usually 1 forward and 1 aft) are made fast while vessels are proceeding through the tidal basins.

Locking time is about 45 minutes, port side or side under the wind alongside, with 1 head line and 1 spring line forward and aft. After leaving the lock, vessels are berthed port side alongside at Jonction 3 and starboard side alongside at Jonction 2.

Also see "Report" dated June 1982.

Antifer:

The Port of Le Havre – Antifer, attached to the Port of Le Havre which covers it administratively, is a port on the coast located 4 km. South of Cape Antifer, at Saint-Jouin-Bruneval.

It is an oil terminal, designed to accommodate vessels of 500,000 d.w.t. – 700,000 d.w.t. and of 28.6 m. draft, subject to tide (Also see "Max. Size").

The port comprises: A breakwater 3,500 m. long protecting the port in its Northern area and starting at Groin Point, 3 km. South of Cape Antifer. A manoeuvring zone. A dry-land area of 35 hectares at the foot of the cliffs intended for hydrocarbon storage and for port operation installations. A 8 hectare service port. A mooring installation with 2 positions for tankers. The oil discharged into storage tanks is pumped away to installations in Le Havre port, by means of a pipeline of 42 in. dia. and 25 km. long.

Tides and Currents: At Antifer, the influence of the Seine estuary is much less than at Le Havre. The tidal curve is of the sinusoid type, without, however, being perfectly symmetrical. Slack water only lasts a short while (about 20 minutes). With winds from the North to East, there is a drop of about 0.25 m. to 0.50 m. increasing with the amplitude of the swell.

With winds from the South to N.W., passing through a Westerly point, there is either a slight drop (0.15 m.) or a rise corresponding to the extent of swell and sometimes reaching 0.75 m.

Tidal currents are alternating in their direction and generally parallel to the coastline. With Spring tides they reach a speed of 3 knots.

The breakwater protects the port from the action of ebb currents.

A Waiting Area has the approach route on its Southern edge. It has the form of a trapezium 2 miles in length. The Western commencement of the large base of this area incorporates 2 anchoring areas: the N.W. area for vessels of more than 25 m. draft, and the S.E. area for vessels of less than 25 m. draft. The 2 areas are separated by Buoy "A5".

A Connecting Area trapezoidal in shape and 2.5 miles in length, connecting the approach route to the approach channel.

An Approach Channel, 1,000 m. wide, marked on its Northern edge by Buoys "A8", "A14", "A16", "A18", and on its Southern edge by Buoys "A7", "A9", "A17". This channel is orientated in the same direction as the approach route on a bearing of 118.5°. Buoys "A7", "A8" and "A9" form at the entry of the channel a triangle easily identifiable by radar.

An Access Channel 3.5 miles long, 700 m. and then 550 m. wide and on a bearing of 127.5°. It is marked by 4 pairs of buoys: "A19/A20", "A21/A22", "A23/A24", "A25/A26". Its depth is 25 m.

A Separation Area adjacent to and to the South of the access channel, allowing vessels on entering to make a half-turn to come out of the channel and then come if necessary to the waiting area. The centre of this area is marked by Buoy "DA".

A Swinging Area sheltered by the main breakwater, marked to the South by buoy "A27", and to the East by Buoy "A29".

The conditions of current (direction and force) and the height of the tide determine, in terms of the drafts of vessels, the periods during which the port may be entered, and which are somewhere between full and low tides.

Vessels must, therefore, on leaving the separation area, follow entry instructions given to Masters by the Pilots, with the agreement of the Port Captaincy of Havre-Antifer.

Pilotage: The Pilot is taken onboard in the waiting area in the disengagement area by means of a pilot boat, a launch or the helicopter allocated to the Le Havre pilotage service.

Port: To the North of the swinging area, is the mooring area dredged to 26 m. allowing access to 2 alongside berths which have depths of water of 27.5 m. – 28.0 m.

The service port is reserved for the mooring of tugs, pilot boats, anti-pollution equipment (booms) and servicing equipment.

Arrival Advice: Masters of vessels destined for Antifer, as well as those whose vessels may enter either Le Havre or Antifer, must send to the Harbour Master of Le Havre a message stating the date and time GMT of their arrival at the Antifer landfall buoys or at the Le Havre lightship and stating the draft of their vessel.

This message must be sent via a coastal station at least 12 hours in advance and confirmed by a VHF message 3 hours prior to arrival at the landfall buoys of Antifer or at the lightship. In return, the vessel will receive from the Havre Port station all information and necessary instructions.

Radio: The Antifer Port Control (call sign Havre-Antifer) listens out permanently on the following frequencies:

156.8 MHz (Channel 16)
157.10 – 161.7 MHz (Channel 22) VHF

If Channel 22 is not available on board the vessel, Channel 14 (156.7 MHz) can be used after having first called up on Channel 16.

Radio communications are used for: Port operations (movements of vessels) and guiding vessels during times of fog.

Radar Assistance: During times of fog, radar assistance is supplied to vessels by the radar located on La Heve lighthouse (guidance provided by the Semaphore Lookout of Le Havre) as well as by the radar of the Oil Terminal (guiding provided by the Captaincy of Antifer from the Buoy "A–16"). Vessels requiring radar guidance must start by requesting it on the call-up frequency (Channel 16). Only after an affirmative reply can they switch in to the connections affected by radar, taking necessary precautions (listening out in advance) not to disturb a guiding process already taking place. Assistance is given in strict rotation of requests. Information is supplied free of charge in French and in no way renders the Port Authority responsible. Such information covers the following: route clear or not, vessels anchored or under way in the vicinity, successive positions in relation to the landfall buoys, possible position of the pilot vessel, then guidance in the channel as far as the swinging area and mooring area.

Syledis: A system of aid to navigation and to manoeuvring, covering the receipt on board the vessels of parameters covering in particular the position, the speed, is in the course of being tried out. It requires the Pilot bringing on board a small transmitter/receiver.

Aids to Manoeuvring: In order to facilitate swinging manoeuvres and mooring of large tankers, the Port of Antifer has 3 lights of different colours, the positions and characteristics of which are as follows:

Access guiding light (on the open storage area at the foot of the cliffs) – light with red, white, green sectors, regularly flashing (4 secs.) the red sector to the North the green to the South.

Guiding lights for coming alongside (on the breakwater).

West light (position 3) – light of red, white, green sectors, regularly flashing (4 secs.) – Red sector to the East, green to the West.

East light (position 2), light of red, white, green sectors, flashing twice (6 secs.), red sector to the West, green to the East.

Each quay berth is equipped with aids for mooring comprising luminated panels showing the distance to the berthing point of the bow and the stern of the vessel; the speed (in cm./sec.) of approach or pulling away of the bow and stern of the vessel in relation to the berthing point.

Fuel: Supplied by pipelines on the berth (S.H.M.PP. depot).

Cranes: 2 cranes of 2.5 tons capacity on the berth (1 per position). Berth for heavy items in the service port – handling by mobile crane.

Floating Equipment: Pontoon for transporting heavy items.

Tugs: Stationed in the service port are 1 or 2 tugs of 4,000 h.p. or 4,900 h.p. Other tugs required for manoeuvring come from Le Havre.

Pollution: Barrages laid on pontoons in the service port can be very quickly placed into service.

General Information:

The Port Captaincy is situated on the open land area of the Service Port.

Tel: 35.21.74.00 Extension (92) 403 or (92) 404 or 35.20.71.70.

Pilot's office: At Le Havre Pilot's Office.

Towing: The Les Abeilles Company on the pontoon in the service port.

C.I.M. Depot: 35.26.51.05.

S.H.M.PP. Depot: 35.24.11.77.

Communications: By buses from Saint Jouin. The airport of Le Havre-Octeville is 16 km. to the South of Antifer.

DENSITY: In outer port and tidal docks: salt water. In inside docks brackish. Density depending upon season and amount of fresh water brought in by river Seine and Canal de Tancarville.

FRESH WATER: Most berths supplied by shore hydrants. Otherwise by barge minimum quantity invoiced then being 50 cu.m. Overtime charged in addition. Late cancellation of barge invoiced.

FUEL: All grades available, viscosities from 200 sec. to 3000 sec. Redwood. Minimum 48 hours advance notice required to prepare barges.

FIRE PRECAUTIONS: Dangerous cargo must be declared on "Inbound Bill" and Dangerous Cargo Manifest must be given to the Harbour Master's office 48 hours before arrival in order that Harbour Master's office can deliver instructions regarding safety.

Tankers: A "Notice to Master's of ships loading/unloading hydrocarbons" is handed to Master upon arrival. This notice specifies *inter alia:* repairs, ventilation/cleaning of tanks, handling of goods subject to Harbour Master's authorisation. All naked lights and fires prohibited, boiler furnaces and galley ranges excepted, such exception cancellable on simple order of Harbour Master or Depot Manager.

CONSULS: The following countries have representatives at Le Havre:

Argentina
Belgium
Brazil
Chile
Colombia
Costa Rica
Denmark
Dominica
Ecuador
Finland
Germany
Greece
Guatemala
Haiti
Honduras
Italy
Ivory Coast
Japan
Liberia
Madagascar
Mexico
Netherlands
Norway
Panama
Peru
Portugal
Salvador
South Africa
Spain
Sweden
Switzerland
United Kingdom
Uruguay
Venezuela

REPAIRS: 11 berths for vessels up to 350 m. Depths up to 10.0 m. 2 berths can accept vessels up to 550 m. LOA.

Societe Nouvelle des Ateliers et Chantiers du Havre (SNACH), 30 rue Jean-Jacques Rousseau, 76090 Le Havre. Tel: 35.26.81.77. Telex: 190 322 F.

Specialises in: Ship repairs (boilers, engineering, fitting out, electricity); Alterations and conversion; Jumboisation.

Siren – Route du Mole Central, B.P.1286, 76068 Le Havre Cedex. Tel: 35253543. Telex: 190964 F.

Also see "Dry docks".

DRY DOCKS:

Graving docks	*Overall length* (m.)	*Inside length at block level* (m.)	*Entrance width at block level* (m.)
International Ship Repair Centre			
Floating Dock	310.00	290.00	53.00
Dry Dock VII	319.00	313.00	38.00
Eure Dry Docks			
Dock IV	184.10	181.46	28.12
Dock V	168.75	163.70	19.05
Dock VI	131.00	127.33	14.20

High tides vary from (+5.80) to (+8.30).

New floating dock, capacity 220,000 tonnes. Lifting capacity 50,000 tons.

SURVEYORS:

Bureau Veritas, 71 bd. de Strasbourg, 76600 Le Havre. Tel: 35.22.69.23.

American Bureau of Shipping, 4 rue Andre Caplet, 76600 Le Havre. Tel: 35.42.39.83.

Det Norske Veritas, 19 quai George-V, 76600 Le Havre. Tel: 35.42.26.05.

Germanischer Lloyd, 110 rue Gustave Flaubert, 76600 Le Havre. Tel: 35.43.75.18.

Lloyd's Register of Shipping, 7 rue Pierre Brossolette, 76600 Le Havre. Tel: 35.42.42.15.

GANGWAY/DECK WATCHMEN: Compulsory, by ship's crew. Sworn watchmen in uniform and equipped with a VHF set may be obtained from the Port Authority per hour for day and night, working days and holidays. Some other companies may also supply watchmen (not sworn) at lower prices.

OPENING/CLOSING HATCHES: May be done by stevedores at the same price as shifting of cargo depending upon the type of cargo and consequent number of men included in the gang.

It is highly recommended to carry out opening by the crew before beginning of shift to avoid both loss of time and expensive charges and also risk of accident to stevedores who are sometimes not well aware of vessel's closing system.

It is emphasised that for reefer cargo stevedores wait for cold exhaust half an hour after opening hatches before getting down in the holds. Consequently it is strongly advised to stop ventilation and start opening hatches with crew about 1 hour before beginning of shift keeping in mind that for reefer cargo, the morning shift may commence at 0500 hrs.

CERTIFICATES:

Tonnage Certificate.
Safety Construction Certificate.
Loadline Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derat Certificate.
Cargo Gear Register.

(Fresh water analysis certificate may also be requested.)

CUSTOMS ALLOWANCES: 200 cigarettes or 200 grammes tobacco plus 1 bottle spirit (must be mentioned on Crew Declaration List). Crew members may obtain extra allowance but only after 5–6 days' call.

CARGO GEAR: Cargo handling usually carried out by means of shore cranes. Hatch-tents to be supplied by vessel.

REPATRIATION: Except if airplane chartered by Owners, all crew have to pass through Paris.

AIRPORT: Le Havre Airport 7 km. from the centre of the town, with a runway of 1,800 m. × 40 m. may receive chartered planes up to 40 tons total weight (50 tons with special authorisation). Regular flights from and to Orly (Paris Airport) twice a day, holidays excepted.

TIME: GMT plus 1 hour from last Sunday in September to last Sunday in March and GMT plus 2 hours last Sunday in March to last Sunday in September.

HOLIDAYS: New Year's Day (January 1st); Easter Monday; Labour Day (May 1st); Victory Day (May 8th); Ascension Day; Whit Monday; National Holiday (July 14th); Assumption B.V. Mary (August 15th); All Saint's Day (November 1st); Armistice Day (November 11th); Christmas Day (December 25th). No work possible except for passenger ships and tankers the latter being loaded/discharged round the clock every day.

POLICE/FIRE/AMBULANCE: Emergency (Fire) 18; Emergency (First Aid) and SAMU 15; Police 17 or 35.21.77.00.

TELEPHONE: Possible at most berths. Apply to ship's Agent prior to arrival.

SHORE LEAVE: Authorised within port and town area. Foreign seamen wishing to go further and more especially to Paris must obtain police authorisation and consequent pass.

CREW IDENTIFICATION CARDS: Not required. Recommended to have Passport or Seaman's Book to go ashore.

REGULATIONS: Vessels carrying dangerous cargo must when on roads or in the entrance channel, show the red flag by daylight or 1 red light by night-time. When leaving the port they must keep their Pilot up to the end of the channel.

Vessels arriving with hazardous cargoes must declare same to Port Control 48 hours prior to arrival.

General: When the Pilot comes on board, he hands to the Master a file containing:

A leaflet showing a map of the port, the position of the fire brigade points, call-up points in the event of fire, fire-fighting hydrants, a list of important telephone numbers, a list of VHF Channels monitored by the Captaincy.

One copy, with map, of the the Maritime Prefect's decrees covering the circulation of vessels in the roads and channel, and in particular oil tankers.

An entry declaration which the Master must complete and which enables a check to be made that the hazardous material transported has already been the subject of a prior declaration to the Captaincy.

On berthing, instructions are handed to vessels:

– either by the ship's Agent where conditioned goods are involved.

– or by the operator of the berth for bulk carriers (liquid or liquified hydrocarbons, chemical products).

Furthermore, for these vessels, a check-list in accordance with that recommended by the IMO must be completed and signed jointly by the vessel and the terminal, prior to commencement of commercial operations.

DEVELOPMENTS: *Rapid Turnaround Port:* Phase 1 in operation. Phase 2 under construction at new Quai de l'Pacifique with length 450 m. and depth 13.5 m. The quay will have 2 gantry cranes. The quay will be extended further at a later date.

REPORT: June 1982 (Updated 1988).

Requirements When Vessels Call to Load/Discharge LPG at Norgal:

Further to difficulties encountered for some months now in receipt or despatch of vessels, we would like the associates of NORGAL (or their customers) to let us know by telex, as soon as possible and for each operation, information of a general, technical and administrative kind, *those sections which are an obligatory nature being preceded by the sign* (+).

1. *General Information:*
 + Name of vessel and its ETA (expected date of arrival in the roads).
 + Nature of the operation (import, export, transit under Customs control).
 + Approximate quantity in tonnes and product and possibly the breakdown of capacity confirmed by a telex from the interested associate.
 Name of consignee (if possible).

2. *Technical Information:*
 + Temperature of product.
 On board pressure.
 Hourly pumping capacity.
 Height of manifold in relation to water level.
 Dimension and series of manifold flanges.
 Laydays and possibly demurrage.

Receiving Possibilities at NORGAL

Propane:

(a) If temperature = 42°C and max. pressure 30 mb. (with return of gas) : 1,000 tonnes per hour.
(b) If temperature = −10°C and max. pressure 3 bars : 300 tonnes per hour.
(c) If full pressure : 80 tonnes per hour.

Butane:

(a) If temperature = 10°C and max. pressure 30 mb. (with return of gas) : 1,000 tonnes per hour.
(b) If full pressure : 70 tonnes per hour.

Characteristics of vessels:

Maximum length : 240 m.
Total displacement : 67,000 tonnes.
Depth of water : 12.0 m (39 ft. 04 in.).

Quality if Product Admissible:

French commercial standards, for butane, the temperature must not be less than −8°C for a tv of 0 bar (effective).

3. *Administrative information (for Customs).*

(a) *Imports:*
 + Product origin.
 + Price per tonne and currency of invoicing.
 + Kind of contract (f.o.b., c. and f., c.i.f.). If contract is f.o.b. state the amount of freight and insurance per tonne. If contract c. and f. state amount of insurance.
 + Invoice weight (at level acceptable to Customs).
 + Bank domiciliation (name of bank, number of pay office, number of domiciliation file) or the bank domiciliation file.

Note: The invoice and possibly the original of the Certificate of Origin justifying exemption form Customs duty (T2L, Certificate type "A", Certificate EUR1) must be sent to us *as quickly as possible* to be attached to the Customs entry or to put right this entry as quickly as possible.

(b) *Exports:*

+ Consignee of the invoice and final destination.
+ Price per tonne and currency of invoicing.
+ Kind of contract (f.o.b., c. and f., c.i.f.). If contract is c. and f. or c.i.f., state f.o.b. value.
+ Invoice weight (as recognised and acceptable to Customs).
+ Name of domiciling bank and number of pay-office.

Note: The export invoice must be sent to us urgently for settlement at the end of the month.

(c) *Transit Under Customs Control:*

(i) *Receipt.*

+ Declaration of Transit A42, if it has not been able to be placed on board.
+ Amount of freight per tonne for payment of VAT, where a foreign vessel is involved.

(ii) *Despatch.*

+ Consignee and Customs Office of destination.
+ Number of derogation of flag monopoly if a foreign vessel is involved. This number is required by Customs before loading.

SHIPMASTER'S REPORT: June 1987.

Berth: Berth ATO 2 at Gonfreville.

Documents:

6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest (including bond, ship's stores, currency, etc.).
1 copy Health Declaration.
2 copies Cargo Manifest.

Pilotage: Le Havre Pilot boards in the vicinity of LH14 Buoy from a high speed launch. Helicopter can be used in poor weather.

Approaches: Vessels can cross Antifier Channel after obtaining clearance on VHF Channel 22.

Vessels cannot cross East of Buoys A21/22. Pilots advise just West of A17/18.

Tugs: Not required for our vessel inward or outward except if high winds blowing.

Locks: Vessel locked into canal system after passing through Francoise Premier Lock. Time in lock about 20 minutes. Vessels can be delayed up to 1 hour if other ships lock-in at the same time.

Berthing: Vessel berthed port side to Berth ATO 2 on the North side of Grand Canal du Havre, which is about 20 minutes from the lock.

For ethylene loading an 8 in. 150 ASA loading arm and a 6 in. 150 ASA vapour return line are provided. The vapour return line can only return on completion of loading. Chemical handling using Chicksan arms is also possible on the berth.

The shore tanks have 0.6 kg./sq. cm. pressure relief valves. Maximum loading rate 250 t.p.h.

If port side to, vessel can only use After liquid line/After vapour line. If starboard side to, use Forward liquid/vapour line.

Moorings at this berth consist of 2 head lines and 2 springs forward and aft.

Depth alongside 10.4 m. Maximum size vessel accepted at the berth is 30,000 cu.m.

Shore gangway provided.

Fresh Water: Available from the pier ex-hydrant.

Stores: Lorries delivering ship's stores may proceed to within 50 m. of the vessel.

Also see "Shipmaster's Report" dated December 1988.

SHIPMASTER'S REPORT: December 1988.

The following is an update of Shipmaster's Report, dated June 1987.

Anchorage: Waiting Area No. 1 is a small area for a port the size of Le Havre. The anchorage runs into Rouen Anchorage. Do not anchor within 1 mile of Le Havre Fairway which is radar controlled. The anchorage is exposed to all winds.

Pilotage: Small vessels without tugs are allowed to berth in very low visibility, dependent on Pilot/Master and vessel's radar. Vessels requiring tugs must have 250 m. visibility.

Tugs: Tugs not required in or out for smaller vessels, except if there are high winds. The tugs are powerful and the tug wire is used. One hour's notice required.

Locks: Vessels can also proceed to Gonfreville by way of the old locks at Rochemont/Vetillart (max. LOA 160 m., max. beam 22 m. and max. draft 8.0 m.) and Canal du Havre. The time taken from Buoy LH05 to Berth ATO2 via the old system is 3 hours.

Berthing: Vessels can also berth starboard side to at Berth AT02, but landing gangway is difficult.

Chemical Chicksans also available on berth. Max. loading rate 250 t.p.h.

General: Telephone: Nearest public telephone is at Sogestrol Office or at the car loading facility, about 1 mile down the road towards the lock. It is possible to telephone the agent or the chandler from the jetty office.

Airport: Le Havre Airport is about 30 minutes by road from the berth. There are daily flights to and from Gatwick.

Rail Link: There is a good rail link with Paris, time of journey about 90 minutes.

AUTHORITY: Port of Le Havre Authority, Terre-Plein de la Barre, B.P. 1413, 76067 Le Havre Cedex. *Tel:* 32.74.74.00. *Telex:* 190663 Port Havre. *FAX:* 32.74.74.29.

Harbour Master's Office: Boulevard Kennedy, 76600 Le Havre. *Tel:* 32.74.70.71. *Telex:* 190663. *FAX:* 32.74.70.69. *Cables:* Havreport.

LES SABLES D'OLONNE: 46.29 N. 01.47 W. (See Plan)

PORT LIMITS: Entrance to wet dock constitutes port limits.

DOCUMENTS:

2 copies Crew and Passenger Lists.
2 copies Personal Effects Lists.
2 copies Stores Lists.
1 copy Cargo Manifest from ship's papers for Customs Authorities and all Bills of Lading, Ship's Papers, etc.

PILOTAGE: Pilotage is compulsory for all vessels equal to or exceeding 50 m. in length and for all oil and gas tankers.

The compulsory pilot boarding points are two straight lines from "La Petite Barge" Buoy (Lat. 46° 28.9' N., Long. 01° 50.6' W.), to "Le Phare des Barges", and to "La Peruse" rock.

Confirmation of ETA can be given to the Agent or Pilot. Tel: 51-32-60-97.

Channel 12 VHF is continuously watched as soon as Pilot is on board. Pilot boat is 9 m. long (black and white hull).

ANCHORAGES: Vessels awaiting Pilot may anchor about one mile South of the West breakwater. They can use pilot services in bad weather.

MAX. SIZE: Vessels up to 110 m. LOA and beam 16 m. Draft 4.8 m. to 6.2 m., dependent on tides.

HEALTH: Customs take action against suspected diseases or fever on board when vessel arrives.

RADIO: Saint Nazaire & Arachon Radio. All ETA and other messages should be in local time.

VHF: Harbour Authorities keep watch on Channel 12 during opening of lock gates. At neap tides, the watch is kept for 1 hour 30 minutes before and after HW.; at Spring tides for 2 hours before and after HW.

RADAR: There is no Port Control Radar.

TUGS: None, pilot boat assists.

BERTHING: Max. beam 16 m. to allow passage through lock gates. Max. LOA 110 m.

BRIDGES: None.

CRANES: Mobile cranes 25 tons – 60 tons.

STEVEDORES: Working hours from 0700 – 1200 hrs. and 1400 – 1900 hrs. No work on Saturdays.

MEDICAL: Full hospital facilities available.

FRESH WATER: Available in unlimited quantities, with 6 to 12 hours prior notice.

FUEL: By lorry from Nantes or La Pallice.

REPAIRS: Small repairs carried out if sufficient spares available.

SURVEYORS: None.

HATCHES: Opening/closing carried out by vessel's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 2 litres of spirits per person.

REPATRIATION: Possible.

AIRPORT: At Nantes, 87 km. distant. 6 – 7 flights daily.

TIME: GMT plus 1 hour. Summertime GMT plus 2 hours (March to October).

HOLIDAYS: Port is open all year round.

POLICE/AMBULANCE/FIRE: Police, 17; Ambulance, 51 951953; Fire, 18.

SERVICES: Compass adjusting.

SHORE LEAVE: When Immigration and Customs requirements have been satisfied, there is no restriction on crew shore leave so long as they rejoin the vessel before departure.

DEVELOPMENTS: None.

GARBAGE DISPOSAL: Container in port area for small quantities.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: Seamens Catholic Mission, Tel: 51320637.

CURRENCY: French Franc (FFr).

AUTHORITY: Mr. le Ingenieur des Ponts et Chaussees, Service Maritime, 1 Quai Dingler, 85100 Les Sables d'Olonne, France. *Tel:* 51.21.02.61.

Bureau du Port, 1 Rue Colbert, 85100 Les Sables D'Olonne. *Tel:* (33) 51.95.11.79. *FAX:* (33) 51.21.40.04. *Contact:* Jean-Pierre Baret, Harbour Master.

AGENT: Pierre Lambot, Quai Archereau, B.P. 65, 85102 Les Sables d'Olonne Cedex. Tel: 51-951010. Telex: 710634. Fax: 51.21.23.11.

LIBOURNE: 44.55 N. 00.15 W.

Port closed. All vessels proceed to Izon.

LORIENT: 47.45 N. 03.21 W. (See Plan)

DOCUMENTS:

Cargo Manifest or Manifest of Ballast.
Certificate of Cargo Space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.

PILOTAGE: Compulsory for all vessels over 60.0 m. LOA. Vessels must confirm their ETA to the Pilot Station (VHF Channels 16 or 12) and/or the Harbour Master's Office (VHF Channel 12) and/or Lorient Signal Station (VHF Channels 16 or 12) at least 2 hours prior to arrival on Lorient Roads. The Pilot boards from a launch 1 mile S.W. of the Fairway Buoy or in the anchorage area. Large vessels only proceed at slack tide. Pilot Station: Tel: 97.21.46.47. Fax: 97.64.67.86.

ANCHORAGES: The area centered around position Lat. 47° 40' N., Long. 03° 25' W. offers a fair waiting anchorage in depth of 15.0 m. – 20.0 m., sand and shell, good holding ground.

Mooring buoys are positioned off Port Tudy on the North coast of Ile de Groix. These buoys are reserved for the use of the French Navy. There are prohibited zones for anchoring due to presence of submarine cables, marked on chart (French Charts No. 5912 and 6470).

RESTRICTIONS: There are 2 entry channels to the port. The South Channel, depth 3.6 m. is used exclusively by local fishing boats. The West Channel is marked by the alignment of 057°. This channel is dredged at 8.0 m. below datum (March 1988). Both channels are very well marked.

Traffic signals are hoisted at Port Louis Citadel as follows: 3 red lights – Entry or Exit prohibited. 3 green lights – Entry or Exit allowed.

Tankers: Vessels carrying more than 500 cu.m. of hydrocarbons, or other dangerous cargoes in bulk, intending to enter Lorient Harbour, should report 6 hours in advance to "Marine Lorient" and Port Captain, giving details of cargo and of any defects which may affect manoeuvrability. Traffic of such vessels is regulated by Lorient Signal Station – 1 or 2 tugs are compulsory by law. Other vessels may obtain information about such movements on Channel 16.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessels should not receive Free Pratique, Master should radio Agent before arrival, advising full details.

RADIO: Use local station Radio Conquet or Radio Saint-Nazaire.

Regulations: All vessels have to confirm their ETA to the Harbour Master's Office 24 hours before arriving on the roads of Groix.

VHF: Port Captain keeps watch on Channel 12.

Lorient Signal Station keeps watch on Channel 16 throughout 24 hours.

TUGS: 1×2,556 h.p., 1×1,740 h.p. and 1×700 h.p. for the use of merchant and fishing ships. Several tugs from 1,200 h.p. to 250 h.p. belonging to French Navy can be requested if necessary.

BERTHING: Kergroise Quays, 568 m. Max. length of vessels 260 m. Depth of water 10.0 m. below datum.

One berth, length 150 m. Depth of water 8.0 m. below datum.

One Ro/Ro berth is available for ships of 150 m. length, depth of water is 8.0 m. below datum.

2 discharge gantries, 500 t.p.h. and 750 t.p.h., feeding a silo and road/rail transit station.

11 cranes. 6×10 tons at 30 m. and 5×6 tons at 22 m. Also 1 mobile crane of 6 tons and 1 Kangaroo crane of 22 tons at 40 m.

TANKERS: The Oil Jetty is 112 m. long and can accommodate tankers up to 180 m. length, the depth of water is 9.0 m. below datum. The diameter of the manifold is 8 in.

FRESH WATER: Can be supplied at all quays and at the Oil Jetty. Rate 10 t.p.h.

CONSULS: Norway, Denmark, Netherlands and Sweden.

REPAIRS: Minor deck and engine repairs can be carried out. Slipways can accommodate 6 fishing boats at the same time. There are 3 dry docks, the largest of which is 186.20 m. long×26.33 m. wide (Navy).

MEDICAL: All facilities available. Local maritime and civil hospitals.

AIRPORT: 10 km. from port. There are a minimum of 2 flights a day to and from Paris.

TIME: U.T. plus 1 hour in Winter. U.T. plus 2 hours in Summer.

HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.

POLICE/FIRE/AMBULANCE: Police Tel: 97.21.19.16; First Aid Tel: 17; Ambulance Tel: (97) 65.33.44; Fire Tel: 18.

TELEPHONES: One portable telephone available on request. Only cost of calls are charged.

IDENTIFICATION CARDS: Crewmen going ashore should carry passport or identity card.

GARBAGE DISPOSAL: Skips are provided free of charge for domestic waste on all quays. A 600 ltr. container can be arranged through CCIM, Tel: 97.87.76.00.

For industrial garbage, contact Grandjouan, Tel: 97.76.00.22, in order to arrange for 6 cu.m. or 11 cu.m. skips. Charges are 745 FFR and 982 FFR per hour respectively.

WASTE OIL DISPOSAL: Waste oil can be collected free of charge for quantities of 200 ltr. or more. Contact HUMEAU, Tel: 98.59.61.08 or CHIMIREC, Tel: 99.99.15.38.

Oily water mixtures can be collected by tanker truck at a cost of 547 FFR per hour. Contact DESTEVE-LE TEUFF, Tel: 97.76.00.97 or SANIROISE, Tel: 97.86.06.61.

SEAMAN'S CLUBS: Marin' Accueil, 21 Bd. Jacques Cartier, 56100 Lorient. Tel: 97.83.80.20.

CURRENCY: French Franc (FFR).

AUTHORITY: D.D.E. Morbihan – Service Maritime et de Navigation, Boulevard Adolphe Pierre, 56321 Lorient, France. *Tel:* 97.64.11.36. *Telex:* Marilor 950 887 F. *Contact:* H.Quinquis, Port Director.

Harbour Master's Office: 3 bis Boulevard de la Rade, 56100 Lorient, France. *Tel:* 97.37.11.86 and 97.37.12.71. *Telex:* Capilor 951 566 F. *FAX:* 97.37.90.73. *Contact:* F. Le Priellec, Port Commandant.

MARANS: 46.18 N. 01.00 W.

No ships have called since 1984.

MARSEILLES: 43.18 N. 05.25 E. (See Plan)

(a) Old Port to Estaque
(b) Port de Bouc/Lavera/ Caronte/Etang-de-Berre/La Mede
(c) Fos

(a) OLD PORT TO ESTAQUE

DOCUMENTS:

Inward Declaration (Printed Form presented by Pilot on boarding).
Ships Register.
Declaration of Health.
3 Crew Lists.
2 Provisions Lists.
2 Lists of Passengers in Transit.
2 Lists of Passengers disembarking.
1 List of Ports where cargo is loaded for Marseilles.
Cargo Manifests and Bills of Lading.
1 List of Crew Personal Effects.

Entry Procedures: On arrival, French Authorities do not visit the ships systematically. However, as circumstances require, Police, Customs and Health may do inspection on board.

Free Pratique by radio is possible be sending cable to "Saniport Marseilles" through Marseilles Radio before arrival on roads.

Inward Declaration, duly filled in by Master must be delivered to Port Authority upon arrival.

Other formalities are completed by shipbrokers and consignees.

PILOTAGE: *Arrival:* Contact port authority by VHF on Channel 12 one hour before arrival ("Marseilles Port"). Compulsory. 21 pilot launches, mostly painted black, wooden hulls with white anchor insignia on the bow.

Contact Pilot Station and pilot boats by VHF Channel 8, one hour before arrival.

Southern Entrance: Pilot boards between "Le Frioul" and "Chateau d'If" island. Max. recommended draft 28 ft. 06 in. in good weather.

Northern Entrance: Pilot boards at Estaque roads. In case of strong N.W. winds or for all deeper draft vessels the Northern entrance is preferred.

Vessels anchoring in roads without a Pilot will still incur full pilotage fee.

On departure, 15 to 30 minutes notice sufficient to order Pilot and tugs.

ANCHORAGES: Marseilles North, Saint Marie and Endoume.

MAX. SIZE: Draft dependent on berth depth up to max. of 14.5 m.

HEALTH: Free Pratique automatic for vessels coming direct from continent or Italy and "Q" flag not to be flown. From other countries – including Spain and Portugal – usual procedure applies. Unless special arrangement for passenger liners, Free Pratique not given by radio, also practice of issuing Health or Customs Clearance on sailing now discontinued.

Free Pratique by Radio: Send cable to "Saniport Marseilles" through Marseilles Radio between 0700 hrs. and 1900 hrs., containing the following information:

Ship's Name, ETA Marseilles, from (last 3 ports in reversed order) number of crew.

Then "ZT" (my Maritime Declaration of Health has negative answers concerning the 6 health questions).

Date of Derat (exemption) Certificate.

Then "ZS" (my ship is healthy and ask for Free Pratique).

Example: Balder Antwerpen ETA 17/2300 Malaga, Hamburg, Bremen crew 25 stop ZT stop 06/07/81 stop ZS. Regards Master.

From 0700 hrs. to 1900 hrs., answer of Saniport will be: "ZY" (Free Pratique is granted).

If Free Pratique is requested and granted by radio, no sanitary officials will board the vessel, no declaration must be filled in, and crew members are granted shore leave without delay. Furthermore, the "Q" flag must not be flown on arrival.

The above information was supplied to a Ship's Master by the Port Health Officials.

RADIO: Within 150 miles Marseilles Radio/FFM – otherwise St. Lys/FFL.

VHF: Port Authority on Channel 12. Tugs on Channel 6.

RADAR: Port and approach radar station.

TUGS: About 3 tugs available, from 1,200 h.p. to over 3,000 h.p. Ship's lines normally used.

BERTHING: When specific side alongside berth required. Agents radio Master prior arrival also advise Pilot. Otherwise side alongside at discretion Master after conferring with Pilot.

CRANES:

Public Quay Cranes: 1×3 tonnes; 5×3 – 5 tonnes; 42×6 tonnes.
Public Mobile Cranes: 1×4 – 8 tonnes; 4×6 – 12 tonnes; 6×15 tonnes; 3×40 tonnes.

14 dry dock cranes, largest has a lifting capacity of 150 tonnes.

2 floating cranes for public use, owned by the Port Authority, capacities 90 tonnes and 150 tonnes and one floating derrick owned by the Port Authority, capacity 500/600 tonnes.

BULK HANDLING FACILITIES:Cereals:

President Wilson Dock: Berth Nos. 24/25. Storage: The Madrague Silo, owned by the Societe Fonciere et Commerciale du Silo de la Madrague, has a capacity of 30,000 tonnes in 143 cells. The silo is connected to the berth by covered conveyors. The silo is outside the port area. 1 suction unit, rate 600 t.p.h.

Grande Joilette Dock: Used for storage only. The silo, owned by the Marseilles Port Authority, is within the port area and has a capacity of 22,000 tonnes in 99 cells.

Minerals in Bulk:

National Dock: Berth Nos. 47 and 48. Specifically for bulk traffic, handled by bucket-cranes. Storage: 4,000 sq.m. (43,040 sq.ft.) in the open, beside the East Quay. 2 cranes, rate 300 t.p.h. or 150 t.p.h. per crane.

3 berths on the Seaward Breakwater, Berth Nos. 109, 110 and 111. Theoretical length 151 m. each, max. draft 12 m. Storage capacity 50,000 tonnes.

These berths are equipped with 5 bucket cranes of 7 tonnes and facilities for storing clinker.

President Wilson Dock: Berth No. 14. Allocated specifically for alumina. Storage: 2 silos, with a total capacity of 11,000 tonnes, constructed by and belonging to Pechiney Cie. and Ugine Cie., to facilitate the import/export of dehydrated alumina in bulk.

There is an additional warehouse with 1,000 sq.m. on Mole "D" which is used for hydrated alumina. Vessels are handled via Berth No. 47 (National Basin). Storage capacity 3,000 tonnes.

Leon-Gourret Dock: Berth No. 8. Allocated specifically for bulk traffic that can be handled by grab-bucket. Storage: An open area of 4,000 sq.m. (43,040 sq. ft.) at the quayside; suitable for import/export.

Liquids in Bulk:
Mourepiane Dock: Berth Nos. 151 and 148. For vegetable oils and chemicals. Storage: The private company, Marseilles Vrac, which operates this depot, has 32 vats of 125 to 1,640 cu.m. (4,412 to 57,892 cu.ft.), with a total capacity of 24,500 cu.m. (864,850 cu.ft.). There are pipelines to the quay for discharging tankers. Berth No. 143 operated by Mediaco Vrac has a maximum permitted draft of 9.50 m.

Import and Export: The major import is vegetable oil; export is chemical products in bulk.

Berth Nos. 104 and 104A for wine in bulk.

Sugar:
President Wilson Dock: Berth Nos. 19 and 20. Storage: The silo, which has a capacity of 24,000 tonnes is within the port area and is owned by the Port of Marseilles Authority. Sugar is discharged by bucket-crane into hoppers which feed the conveyor belts to the silo. The total conveyor capacity is 250 tonnes per hour.

SPECIALISED CARGO HANDLING FACILITIES:
Heavy Load Berths:
In Mirabeau Basin there is a special berth (No. 161) designed to receive barges loading and unloading heavy loads. This berth is located between Berth No. 160 and the Leon Gourret Mole and consists of a quay 80 m. long into which has been built a barge basin 50 m. long by 20 m. wide with a depth of 2.5 m.

Apart from this special berth, there are 29 Ro/Ro berths in operation in the Port of Marseilles which permit direct loading of heavy loads into Ro/Ro ships. There are also numerous conventional berths that can be used for vertical loading and unloading of heavy loads, with the assistance of the port's "Atlas" floating crane, which has a lifting capacity of 150 tonnes.

In addition to the floating crane, the following floating equipment is also available:

The Port Authority's floating derrick, "Protis", which has a lifting capacity of 500 to 600 tonnes.

Various types of private floating equipment with capacities ranging from 40 to 60 tonnes.

Various public or private heavy load barges.

The Port Authority's submersible seagoing barge.

This barge is designed for transporting heavy loads, or for putting them into the water in the case of floating loads (within the limits of its deadweight capacity of 1,800 tonnes; the loading and unloading of heavy floating loads of 1,800 to 2,000 tonnes must be carried out in dry docks). The barge can be loaded vertically, horizontally (Ro/Ro), or by floating the load into the hold in the case of a floating load.

Also see "Berthing".

CONTAINER HANDLING FACILITIES: Various quays are devoted to container traffic: At the Leon Gourret Mole (14.5 m. permitted draft, large open areas, railway tracks); at the Mourepiane quay, in the Mirabeau basin, where there is a new terminal:

6 public berths, Berths No. 152-157, each of which has a theoretical length of 154 m. and a max. draft of 11.7 m.

Container handling equipment: 2×40 tonne Caillard gantry cranes. 4×30 tonne at 30 m. mobile cranes.

Railed tracks: 2 railway tracks alongside the quay; 1 railway track behind warehouse 20; 2 railway tracks at the Eastern limit of the dense storage area behind warehouse 20.

Area alongside the quay 35 m. wide comprising: A working area 15 m. wide equipped with 2 railway tracks and a trailer movement area; a storage area for short periods, 17 m. wide (under the rear jib of the gantries).

Storage areas covering a total of 90,000 sq.m.

BRIDGES: Turning bridge near Southern end of port – Pont d'Arenc – opened on request.

Bridge further North – Pont de la Pinede – closed to navigation from 0700 hrs. – 0800 hrs., 1115 hrs. – 1345 hrs. and 1630 hrs. – 1800 hrs. It may be opened in cases of emergency.

STEVEDORES: Enable Agent order gangs important obtain in good time accurate ETA from vessels. No work New Year's Day or Labour Day (May 1st).

MEDICAL: Yellow fever inoculations only in hospital (Tuesdays and Friday). Masters to advise by radio prior arrival if medical attendance required aboard.

TANKERS: See "Port de Bouc" and "Fos".

DENSITY: About 1028.

FRESH WATER: Can be obtained from hydrants or quays or fromwater-boats. When delivered by barge, minimum quantity invoiced is 50 tons. Preferable order prior arrival to avoid delays. Minimum pumping rate 50 t.p.h.

FUEL: Ordinary fuel, also fuel oil max. 1000 secs., diesel and gas oil. Deliveries by barge only.

FIRE PRECAUTIONS: Special harbour fire-fighting corps, with two firefighting vessels.

CONSULS: The following countries are represented in Marseilles:

Algeria
Argentina
Austria
Belgium
Bolivia
Brazil
Canada
Colombia
Costa Rica
Cuba
Cyprus
Denmark
Dominica
Ecuador
Egypt
Finland
Germany
Greece
Guatemala
Haiti
Honduras

10	465	84.00	10.00	3×25 – 1×150	10,800t/h	12 lines possible

Fresh water and power available at all berths.

WATCHMEN: Available but not compulsory.

HATCHES: Crew allowed open and close.

SHIP CERTIFICATES: On first call Registered Tonnage Certificate; thereafter not required unless gross/net tonnages changed.

CUSTOMS ALLOWANCES: About 200 cigarettes and limited amount spirits per man.

CARGO GEAR: No additional requirements; all gear supplied by stevedores except rain tents.

AIRPORT: Marseilles-Provence is the second largest airport in France with 18 air companies serving 60 national and international destinations.

The international airport of Nimes-Garons (50 km. from Fos) serves the West region of the Marseilles district.

POLICE/FIRE/AMBULANCE: Police (disturbance of peace): Tel: 17. Marine Fire Brigade (fire, ambulance, injury, explosion, flooding, man overboard, etc.) Tel: 18. Police and Marine Fire Brigade can also be called through the Central Watch Tower (VHF Channel 12) or Telephone: 91.56.15.00 (Marseilles Port).

SERVICES: Deballasting and degassing services can be provided on request in the Ports of Fos and Lavera (only deballasting).

Vessels coming for repairs in Marseilles can discharge their slops, if any, under particular conditions.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Collection services available. Drums can be provided alongside.

For garbage service contact the following companies:
T.E.A. – Tel: 91.02.99.58.
Silim – Tel: 91.03.47.47.
ONET – Tel: 91.62.53.90.
Transresious – Tel: 91.51.60.64.

WASTE OIL DISPOSAL: A collection service is available. Shore tanks: Capacity 15,000 tons. Contact PAM/GIP, Tel: 42.06.09.90.

Barges: Capacity 2,500 tons. Contact Citerna Maritima, Tel: 42.06.09.90.

Special services: Contact Gardella Coating, Tel: 91.61.50.70, and Somecal Coating, Tel: 91.02.60.60.

Fax: 91.39.40.34. Commandant Alexandre, Port Captain. Mr. Lerdrizet, General Manager. Commandant Castagnera, Harbour Master – Eastern Area. Mr. Riou, Operations Director – Eastern Area.

(b) **PORT DE BOUC,** including Port de Lavera 43.23 N. 05.00 E., Port de Berre 43.27 N. 05.10 E., Port de la Mede 43.24 N. 05.07 E. Caronte 43.24 N. 05.02 E. **(See Plan)**

DOCUMENTS: On arrival:
Inward Declaration (presented by Pilot on boarding).
1 Cargo Manifest or manifest in ballast.
Bill of Lading.
Ship's Register (if required).
6 Crew Lists (8 if Spanish or Russian ship or ship bound for these countries).
3 Passenger Lists.
Health Declaration.
Derat Certificate.
Bunker's Supply (3 forms).
1 Crew Declaration of Personal effects – cameras, binoculars, radios, cigarettes, tobacco, etc. If on inspection articles or quantities not in conformity or in excess, Master held responsible, articles removed and heavy fines imposed.

PILOTAGE: Pilotage is compulsory for vessels over 50 m. LOA.

Call "Fos Port Control" direct on Channel 12 for traffic. Pilot must be taken to enter Port de Bouc, Fos and Port St. Louis du Rhone. Contact by Marseilles Radio or pilot boat VHF (Channel 14 for calling, Channel 14 for traffic). Pilot boards in the Roads between 2 miles and 2.5 miles South of Lavera Buoy or further out if required, for entering Port de Bouc and Fos. Motor launch black hull, white cabin, white anchor on bow, "H" flag.

ANCHORAGE: It is recommended to ask for Pilot before anchoring in Outer Roads to avoid forbidden places for ships bound for Port de Bouc and Fos. Permanent watch on VHF Channel 12 is compulsory.

RESTRICTIONS: No entry restrictions for Lavera. Night transit of Caronte Canal to Etang de Berre forbidden to tankers above 6,000 g.r.t. Transit of Caronte Canal to Etang de Berre is forbidden for vessels over 180 m. (598 ft.) overall and over 24 ft. draft.

Notice: *"Port Authorities instructions concerning Fos/Lavera Tanker Areas.* Special Notice No. 94/81.

Re: Berthing of Tankers Loaded with Naphtha or Gasoline.

Vessels concerned will only be allowed alongside providing that pump room is clean, gas free and that no product is leaking at ship's valves or pumps.

Should above conditions not be fulfilled vessels could not be accepted in above areas.

MAX. SIZE: Lavera: LOA 275 m., draft 12.80 m.

Caronte: LOA 190 m. – 200 m. - draft 8.23 m.
180 m. – 190 m. - draft 8.68 m.
Less than 180 m. – draft 9.14 m.

Berre: LOA 160 m., beam 24 m., draft 7.0 m.

La Mede: Draft 5.18 m.

HEALTH: Pratique given by Customs Officers who board on arrival. In case of suspected disease on board, notify Agents by radio before arrival. Also see "Marseilles".

RADIO: Within 150 miles traffic through Marseille Radio/FFM, otherwise St. Lys (FFL).

VHF: Port de Bouc Radio (Harbour Office) VHF used for navigation purposes only – Channel 12 for calling and traffic.

VTS: *Port Authorities and Vessels Traffic Services:* Vessels entering the Gulf of Fos, must contact Port Authorities (VTS), calling "Fos Port Control" 2 hours before arrival on VHF Channel 12.

RADAR: Port and approach radar station.

TUGS: 8 tugs available from 3,000 h.p. to 5,000 h.p. Normally join vessel in entrance channel off Port de Bouc. Tow lines furnished if required.

BERTHING: Lavera: 16 berths for public and private use. Permitted drafts: 4 berths of 3.6 m. to less than 5.5 m.; 1 berth of 5.5 m. to less than 6.1 m.; 5 berths of 10 m. to less than 11 m.; 3 berths of 11 m. to less than 12.5 m.; 3 berths of 9.9 m.

1×12 tonne public mobile crane.

Lavera Harbour has been specifically designed and equipped to handle refinery products and the discharge of oil tankers.

Each berth has flexible pipe connections, with articulated metal arms, supported by special cranes. The type of pipework depends on the product handled (crude or refined) and is connected to the storage tanks of:—

C.F.R. and Shell
S.F.P. – B.P. Refinery at Lavera
The maritime terminal of S.P.L.S.E., which supplies the Esso Refinery at Fos.

Berths A1, A4, H Bis, H and K1 have been designed to handle the loading and unloading of propane and chemical products.

Crude: 8 public berths in 4 basins.

Name of Berth	*No. of Berth*	*Max. Length* (m.)	*Max. Draft* (m.)
B	721	275	12.00
C	722	275	12.00
D	723	275	11.89
E	724	275	12.20
F	725	275	12.80

Refined Products: 12 public berths.

Name of Berth	*No. of Berth*	*Max. Length* (m.)	*Max. Draft* (m.)
A2	712	210	11.10
A4	714	240	12.20
B	721	275	12.00
C	722	275	12.00
D	723	275	11.89
E	724	275	12.20
F	725	275	12.80
K1	701	90	6.10
K5	705	100	5.80
K6	706	100	5.90

Liquid Gas: 6 public berths.

Name of Berth	*No. of Berth*	*Max. Length* (m.)	*Max. Draft* (m.)
A1	711	210	10.10
A4	714	210	12.20
F	725	325	12.80
G	726	275	12.80
H Bis	728	130*	11.00
K1	701	100	6.10

*Usable length 100 m.

Annual capacity of loading or discharge: 600,000 tons based on the 4 multi-purpose berths being exclusively used for discharge of vessels bringing propane gas.

Average output per quay 600 cu.m./h. (300 t.p.h.)

Storage capacity: The storage capacity of propane gas of the Societe GEOGAZ is 120,000 cu.m (60,000 tons).

Chemical Products (exclusively): 4 public berths.

Name of Berth	*No. of Berth*	*Berthing Length* (m.)	*Permitted Draft* (m.)
A1	711	210	10.10
A2	712	210	11.10
A4	714	240	12.20
H	727	200*	11.80
H Bis	—	130*	11.00

*Usable length 100 m.

Berth A4 is also equipped for refined oil products and for the importation of liquid gas.

Berths F, G and H Bis can also accept liquid gas.

Annual capacity of loading or discharge: 2,700,000 tonnes if these 2 berths are exclusively used for chemical product traffic.

Discharge rate using vessels' pumps: 150 t.p.h. Loading rate using land pumps 150 t.p.h. to 300 t.p.h.

Storage capacity: Societe NAPHTACHIMIE: factory. Societe MAVRAC: 53,000 cu.m. Density 0.80 – 1.62.

Report: Berthing Procedures: Tugs are made fast between the 2 buoys "Lavera" and "Les Tasques", using the "On the Hook" method. Tugs watch VHF Channel 6.

Loaded or ballasted tankers are berthed heading outwards. Ships are swung off the head of the pier and backed alongside stern first. On request (ship's manifold too far, only gangway available, weather conditions, etc.) they may be moored directly and swung on departure.

Anchors are only used in case of emergency or when the ship's bow overhangs the pier's end.

Port Authorities do not advise anchoring method for safety reasons (delay if emergency departure needed).

No shore gangway is available at this terminal. Vessels must use their own gangway with safety nets and lifebuoys.

Port de Bouc/Caronte: Quay berths reserved exclusively for commercial operation of sea-going vessels: Berth Nos. 780 to 786 and 2 berths for river barges.

Total length of quays: 763 m.; Usable berthing length: 1,000 m.; Permitted draft: 2 berths for barges with draft of less than 4 m.; 5 berths of 8 m. to less than 9.14 m.

Berths reserved for repairs afloat (Agglomerate Quay No. 787): Total length of quays: 250 m. Max. draft 3.0 m.

Equipment:

Quay cranes: 2 cranes of 5 tonnes
3 cranes of 8 tonnes
2 cranes of 12 tonnes

Seven cranes, private, forming part of the installations of the Etablissement Maritime de Caronte et de Fos (CARFOS)

Quay gantries: 2 gantries of 15 tonnes, private (CARFOS) used for ores, stacking and removal from stock. Lifting capacity of the most powerful: 15 tonnes.

1 phosphate reloading gantry (CARFOS) with a capacity of 200 t.p.h.

Cranes allocated to naval repairs afloat, at the Agglomerate Quay: 2 private cranes from 6 to less than 15 tonnes. Lifting capacity of the most powerful: 4–8 tonnes.

Floating cranes: 1 private crane, with a lifting capacity of 100 tonnes.

Storage:

Quay-side sheds	8,200 sq.m.	(private)
Other sheds or warehouses	5,200 sq.m.	"
Quay-side open areas	16,000 sq.m.	"
	10,000 sq.m.	(public)
Other open areas	8,000 sq.m.	(private)

Bulk Liquids: Vegetable or animal oils and chemical products:

1 public quay under private use (Favat installation) (Berth No. 780): Verminck Quay. Useful berthing length: 120 m. Permitted draft: 7.50 m.

Discharge of oils is effected by shipboard pumps and the relay pump of the land installations – rate 200 t.p.h.

Storage capacity: 10,000 tonnes.

The Favat storage installations located outside the port area, on private property, have a total capacity of 12,000 cu.m. These installations are connected by a network of 3 pipelines of 200,150 and 100 mm. to the discharge points at the quayside. Storage Shed: 4,000 sq.m.

Chemical products exclusively: 1 private berth (Berth No. 786): Kuhlman Quay. Useful berthing length: 120 m. Permitted draft: 6.80 m.

Bulk Solids: Ores, coal, heavy minerals:

5 berths at the Caronte Quay (Berths Nos. 781–785) private use granted to Etablissement Maritime de Caronte et de Fos (CARFOS).

Usable berthing length: 650 m. Permitted draft: 9.14 m.

1 quay berth for loading phosphate barges, located between berth No. 785 and berth No. 780. Berthing length: 80 m. Permitted draft: 3.50 m.

The Caronte Quay has a specialised installation comprising:

3 transporting units and weighing hoppers with a unit output of 135 t.p.h.

1 transporting unit and specialist weighing hopper specialised in wagon loading: output 150 t.p.h.

2 weighing hopper towers – unit capacity: 1,200 tons per day.

2 weighbridges (40 and 80 tonnes).

The 7 scoop cranes are emptied into weighing hoppers which in turn discharge on to conveyor belts which terminate either above wagons to be loaded, into sheds or open storage areas. Hourly capacity per crane 120 t.p.h. – 150 t.p.h.

The quay is also equipped with 2 gantry cranes of 10 to 20 tonnes used for stacking and reclaiming minerals and 1 gantry crane with a capacity of 400 t.p.h. used for reloading phosphate.

Storage capacity: 70,000 tonnes.

The CARFOS storage installations include:

2 phosphate sheds with capacity 33,000 tonnes.
1 ilmenite shed of 3,000 sq.m.
1 open area of 3,000 sq.m.

Oil seeds – oil cake: 2 berths (No. 784 and No. 785) at the Caronte Quay, private use granted to CARFOS

Available berthing length and permitted draft.

LOA	*Draft*
Less than 180 m.	9.14 m.
180 m. – 190 m.	8.68 m.
190 m. – 200 m.	8.23 m.

Storage capacity: 10,000 tonnes. These berths are also used for ores, coal and heavy minerals.

Installations and equipment: Identical to those on the quays for ores, coal and heavy minerals.

Etang de Berre/La Mede:

Available berthing length: La Mede – 70 m. Berre – 160 m.

La Mede: 1 berth. Berre: 4 berths.

Port of La Mede: Cie de Raffinage et de Distribution (C.R.D. Total France). Berth No. 744.

Name of Berth	*Berth* No.	*Type of Berth Installation*	*Available berthing length* (m.)	*Permitted draft* (m.)
4	744	Pier	70	5.18

The installations of the C.R.D. Total France permit loading or unloading of 100-600 cu.m./hr. according to product.

The installations of C.R.D. Total France are connected to tanks by pipelines of varying sizes under the waters of the Berre Lake and Canal from Marseilles to the Rhone.

Storage capacity: Depot of the Refinery of C.R.D. Total France – 1,700,000 cu.m. of refined products to which may be added 280,000 cu.m. of crude brought by pipeline from the berths at Lavera and Fos to the Refinery.

Port de La Pointe de Berre: Cie. de Raffinage Shell Francaise (Berths No. 751 to No. 754). Refined oil products. 4 private berths.

Berth Name	*Berth* No.	*Max. length* (m.)	*Permitted draft* (m.)
A	751	160	6.86
B	752	160	6.86
Salins Berth	754	160	6.86
South West (coasters)	753 (West side)	90	5.00
	(East side)	90	4.00

The berthing installations of the Cie. de Raffinage Shell Francaise S.A. have connections to its tanks by specialised pipelines for the various products. They provide loading and discharge outputs from 120 to 500 cu.m./hr. according to product.

Storage capacity: Depot of the Port de La Pointe de Berre 161,000 cu.m.

Storage area of the Shell Refinery 1,390,000 cu.m.

To the above capacities should be added 260,000 cu.m. of crude oil brought by pipeline to the Shell Refinery from the Lavera and Fos berths.

BRIDGES: 1 railway bridge and 1 road bridge across Caronte Canal each having special times for opening. Ships of less than 21 m. height clearance may pass below the railway bridge. Motorway bridge over Caronte Canal with 44.00 m. clearance.

STEVEDORES: To enable Agent order gangs important obtain accurate ETA between 24 hours and 48 hours in advance. 2 shifts 0500 to 1300 hrs. and 1300 to 2100 hrs. normally 6 days a week. Confirmation to be made at 0900 hrs. for afternoon shift, and 1700 hrs. for next morning.

MEDICAL: All hospital and medical facilities. Yellow fever inoculation made by appointed doctors. Masters to advise by radio prior arrival if medical attendance is required on board.

TANKERS: See "Berthing".

DENSITY: About 1028. Variable in Canal de Caronte and Etang de Berre owing to discharge of hydraulic plant of St. Chamas.

FRESH WATER: Available generally by pipes and hoses at the berths. Water barges available from Marseille.

FUEL: By barges for cargo ships and vessels in the Roads. Tankers at Lavera refuel by pipeline at the berths. All grades available.

FIRE PRECAUTIONS: Oil Harbour fitted with a system of 203 mm. (8 in.) or 254 mm. (10 in.) sea water pipes at 5 bars permanent pressure. It may be increased by pumping station up to 9 bars, and supply 500 cu.m./hr. Each wharf has 5 fire hydrants with first-aid equipment: fire hoses and spray nozzle, foam nozzle with powder cans. If fire breaks out on a ship, the hose handling gantries are protected by a screen of sprayed water. All fire equipment and installations are painted red.

There is a special fire-fighting Corps with fire vessel. Call for firemen on 42.06.21.29 in case of fire or call Fos Port Control on 42.40.60.60 or VHF Channel 16.

CONSULS: Norwegian, Swedish, Danish and Spanish consuls at Port de Bouc. Others at Marseille.

REPAIRS: Permission must be granted by Harbour Master only.

DRY DOCKS: Nearest at Marseille.

GANGWAY/DECK WATCHMEN: Available but not essential.

OPENING/CLOSING HATCHES: Always by crew.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes every 5 days; wine/spirit: limited amount per man.

REPATRIATION: All facilities for crew change and repatriation by railway or planes.

AIRPORT: Marignane Airport 40 km. and Nice Airport 230 km. (Nice for SAS lines).

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Same as "Marseille".

POLICE/AMBULANCE/FIRE: Police, 42.06.23.74 or 42.07.03.31; Fire, 42.06.21.29 or 42.06.28.37.

TELEPHONE: On application can be connected on board at Lavera. Telephone ashore in other places.

SHIP SUPPLY SERVICES: *Auxiliaire Maritime:* Monsieur Seguin Technical Manager – Tel: 42.06.09.89, 20 Cours Landrivon, 13110 Port de Bouc, France. Telex: 430 274. Regular and spot launches service.

Port Service: Monsieur Erick Ganaye, Operations and Technical Manager, Place de Narvik, Port Petrolier, 13117 Lavera, France. Tel: 42.81.62.30, Telex: 401 305. Shinc boat service, Interpreters, spot helicopter service, watching.

Societe Citerna: Anse Aubran 13110 Port de Bouc, France. Tel: 42.06.09.90, Telex: 420 730. Bunkering (with no limits of tonnage).

Societe Ouvrages Sous-Marins et Portuaires: Monsieur Boscolo – Director, Anse Aubran, 13110 Port de Bouc, France. Tel: 42.06.22.44, Telex: 400 035, SHinc diving operations – wet docking. Speaking English, German and Spanish.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Seamen going ashore should carry passport or identity card.

GARBAGE DISPOSAL: See Part (a).

WASTE OIL DISPOSAL: See Part (a).

SEAMAN'S CLUBS: See Part (a).

CURRENCY: See Part (a).

SHIPMASTER'S REPORT: October 1987.

Berth: Berth No. A1 at Lavera.

Documents:

6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest (including bond, ship's stores, currency,etc.).
1 copy Health Declaration.

The agent assisted with all formalities.

Anchorage: The vessel anchored in Fos Bay about 1 mile West of Lavera North Breakwater (Port de Bouc). Pilot now compulsory for anchoring. Under certain circumstances vessels can vent off gas at anchor if wind from North. Use West anchorage. Normally for venting have to go 12 miles off coast.

Pilotage: Pilot boards off Lavera Buoy from a fast launch.

Reporting: Report to "Couronne" Signal Station on VHF Channels 16 and 10 when inbound at Omega Buoy and when outbound leaving Lavera or Fos. They require details of vessel, cargo type and tonnage and destination.

Currents: There are strong currents in the Basin off Lavera piers due to outflow from Etang de Berre through Canal de Caronte. Eddies encountered in the vicinity of Berth A4. Vessels often experience strong cross current off Port de Bouc entrance.

Tugs: Tugs not normally required by small vessels, except in strong winds.

Berthing: Vessel berthed at Berth A1 for loading ethylene, this being the nearest pier inside the harbour. If vessel is loading vinyl chloride monomer (VCM) Berth A4 is used. This berth is just behind Berth A1. Butadiene and propylene are also loaded at Berth A1.

There are good fenders at both berths.

Moorings consisted of 3 head/stern lines and 2 springs forward and aft.

A shore telephone is connected and an English speaking deck watchman is compulsory whilst working cargo only.

Fresh water is available at both berths.

Storing: Lorries delivering stores to Berth A1 may proceed to within 60 m. of the ship's rail. However, at Berth A4 storing is difficult as lorries are not allowed within 200 m. of the vessel.

Cargo: Ethylene (Berth A1) and VCM (Berth A4) are handled through 8 in. liquid and vapour Chicksans.

The loading rate for ethylene is about 150 t.p.h. Digital temperature readout available.

VCM is loaded at an approximate rate of 230 t.p.h.

At Berth A1 vapour return up to a back pressure of 3 Bar was obtained with ship's compressors. However, if vessel is careful, 2 compressors can be used to facilitate loading rate/cool down.

At Berth A4 the shore stop was on the exact quantity. A tonnage check is given about 1 hour before completion. Anything in the 3 km. shore line must be taken on board. This was stated to be 140 tonnes but can be over or under by 10 tonnes.

The GECO Surveyor is in constant attendance at both berths and the office is close at hand. The surveyor speaks fairly good English.

Nitrogen can be taken from shore line at ambient temperature at both berths, rate about 500 cu.m.p.h.

There are no shore foremen.

The maximum venting to atmosphere that is allowed by Port Authority is 10% of lower explosive limit of Cargo Vapour in tanks.

General: The nearest airport is Marseilles Marinagne, which is about 8 miles away.

Berth A1 telephone number from UK is 010 33 42.81.55.70.
Berth A4 telephone number from UK is 010 33 42.81.56.36.

Nitrogen can also be taken at H Bis Berth at far side of harbour. No meter on tank volume. Telephone from UK 010 33 42.81.84.44.

Nitrogen also taken at "K1" Berth on the other side of pier from 'A4'. Again, no meter on tank volume. No telephone available.

No V.R.L./vent line at H Bis and K1 Berths, hence 100% LEL atmospheric venting.

Port side to both berths.
K1 Berth only for small vessels, stern protrudes.
Also see Shipmaster's Report dated December 1988.

SHIPMASTER'S REPORT: December 1988.

The following is an update on Shipmaster's Report, dated October 1987.

Berthing: Good fendering at both berths, except at Berth A1, one fender aft has a steel face which can cause damage.

At Berth A1 vessels berth head-in starboard side alongside. At A4 Berth vessels usually berth starboard side alongside.

Cargo: At Berth A1, the VRL for ethylene is now a 6 in. flexible steel hose.

Fuel: Gas Oil available from shore line at Berth A1. Bunkering not allowed during cargo operations, but may be allowed during cooling down, depends on Shift Supervisor.

AUTHORITY: Port Autonome de Marseille, Capitainerie des Bassins Ouest, B.P.200, 13528 Port de Bouc Cedex, France. *Tel:* 42.40.60.05. *Telex:* 440164 CAPOR. *Cables:* PORFOS. *FAX:* 42.40.60.40. *Contact:* Harbour Master.

(c) **FOS:** 43.24 N. 04.53 E. **(See Plan)**

DOCUMENTS:
Inward Declaration (Presented by Pilot on boarding).
1 Cargo Manifest or Manifest in Ballast.
Bill of Lading.
Ship's Register (if required).
6 Crew Lists (8 if Spanish or C.I.S. ship or ship bound for these countries).
3 Passenger Lists.
Health Declaration.
Derat Certificate.
3 Bunker Supply Forms.
Declaration of crew personal effects, cameras, binoculars, radios, cigarettes, tobacco, etc.

If on inspection, articles or quantities not in conformity or in excess, Master held responsible, articles removed and heavy fines imposed.

Shipmaster's Report: October 1988.
1 copy Inward Declaration.
1 copy Outward Declaration.
1 copy Cargo Manifest.
1 copy Ship's Register.
6 copies Crew List.
3 copies Passenger List.
1 copy Maritime Declaration of Health.
2 copies Personal Effects Declaration.
2 copies Stores List.
2 copies Transit Cargo List.

PILOTAGE: Compulsory. Contact by Marseilles Radio VHF Channel 14 for calling, Channel 9 for traffic. Pilot boards in the roads between 2 and 2.5 miles South of Lavera Buoy or farther out if required. Motor launch, black hull, white cabin, white anchor on bow, flying "H" flag. VTS: Fos Port Control, call on Channel 12, Channel 12 for traffic. Pilot boat on Channel 14 for traffic.

ANCHORAGE: It is recommended to ask for Pilot before anchoring in outer roads to avoid prohibited anchorages. Permanent watch on VHF Channel 12 compulsory.

RESTRICTIONS: When large tankers are proceeding in the Fos Channel, other vessels' entrance may be delayed.

Access channel for very large vessels dredged to 22 m. over a width of 250 m.

Notice: *Port Authorities Instructions Concerning Fos/Lavera Tanker Areas.*

Special Notice No. 94/81.

Re: Berthing of Tankers Loaded with Naphtha or Gasoline.

Vessels concerned will only be allowed alongside providing that pump room is clean, gas free and that no product is leaking at ship's valves or pumps.

Should above conditions not be fulfilled vessels could not be accepted in above areas.

MAX. SIZE: Max.draft at Oil Jetty 22.25 m.; Sollac in Dock No. 1 – 18.59 m.; Mineral Quay in Dock No. 1 – 17.37 m. Dock No. 2 - 13.00 m.; Dock No. 3 - 11.50 m.

HEALTH: Pratique given by Customs Officers who board on arrival. In case of suspected disease on board, notify Agent by radio before arrival. See also "Marseilles".

RADIO: Within 150 miles, traffic should be routed through Marseilles Radio, FFM, otherwise via St. Lys. FFL.

VHF: Channel 12 for calling and traffic.Channel 14 for pilot.

VTS: *Port Authorities and Vessels Traffic Services:* Vessels entering the Gulf of Fos, must contact Port Authorities (VTS). Calling "Fos Port Control" 2 hours before arrival on VHF Channel 12.

RADAR: Port and approach radar station.

TUGS: Tugs normally join vessel in the entrance channel. Ship's lines are used, or from tugs if required.

GENERAL CARGO FACILITIES: *End of the Mole between Docks 2 and 3:* 1 berth (No. 870). Serviceable length: 110 m. Max. draft: 6.50 m.

This berth permits sea-going barges to come alongside and is reserved for stern-loading Ro-Ro vessels.

Dock 3: The Brule Tabac Quay for miscellaneous traffic.
3 berths (Nos. 871-873).
Berth 871: Serviceable length: 221 m. Max. draft: 11.50 m.
It is equipped with a floating ramp for Ro/Ro traffic.
Berth 872: Serviceable length: 222 m. Max. draft: 11.50 m.
Berth 873: Serviceable length: 222 m. Max. draft: 11.50 m.

It is equipped with a floating pontoon, permitting access for stern-loading Ro/Ro vessels.

Equipment: 1 quayside railway for direct transhipment; 1×30-40 tonne mobile crane; 3×6 tonne bucket cranes and 1×20 tonne rail mounted crane; a storage area of 170,000 sq.m.; a transit shed of 9,000 sq.m.

In addition to the above equipment, the Port Authority's 500/600 tonnes floating derrick "Protis" is available for use in the harbour areas of Marseilles, Port Saint Louis du Rhone and Fos.

Gloria Quay:
Length: 250 m.
Maximum draft: 10.00 m.

A 220 m. long Ro/Ro berth to the South with a right-angled return quay of 50 m. width and one fixed inclined ramp.

Berths 821, 822, 823: Sollac finished products dispatch quay.

South Dock: Length 360 m. Max. draft: 11.89 m. Equipped with 2 cranes of 50 tonnes at 26 m.

Berth 859: Private berth at the end of Dock 2, serving the installations of the Compagnie Eiffel.

Length: 120 m. Max. draft: 5.0 m.

BULK HANDLING FACILITIES: Fuel, solid minerals, ores: 3 public berths and 2 private berths.

Public Berths:

3 berths Q1 (No.851), Q2 (No.852) and Q3 (No.853) in Dock 1, West Quay: Total length of quay: 884 m. Usable length of quay: 850 m. Max. depth of water at quay side berth: 17.37 m.

Largest admissible ship: Deadweight capacity: 140,000 d.w.t. (approx.). Length: about 300 m. Max. draft: 57 ft. (17.37 m.).

Equipment: Operations which can be performed:
Unloading and storage in addition to transshipment.
Unloading and simultaneous loading of cargo in two different places.

Terminal facilities from South to North:
Quayside handling equipment.

Unloading:
2 unloading gantries, with buckets, of 20 tonnes (P1 and P2) (peak output 2×800 t.p.h.).
2 tracked cranes, with buckets, of 15 tonnes at 30 m. and 12 tonnes at 35 m. (K1 and K2) (2×600 t.p.h.).
2 hoppers of 70 cu.m. which can be coupled to cranes (T1 and T2).
One continuous loader (P+) (2,200 t.p.h. peak rate, density 0.8).

Loading:
One conveyor belt loading gantry (C1) (1,500 t.p.h. peak rate) privately-owned (Aluminium Pechiney).
One conveyor belt loading gantry (C2) (peak output: 1,500 t.p.h.).
One barge loading berth (peak output: 800 t.p.h.).

Fixed conveyors:
One longitudinal conveyor supplying loading gantry (C1).
One reversible two-speed longitudinal conveyor (L1) (1,600 and 2,000 t.p.h.).
One reversible conveyor (T1) (1,600 t.p.h.).
One non-reversible two-speed transverse conveyor (T2) (1,600 and 3,400 t.p.h.).
One reversible two-speed longitudinal conveyor (L2) (1,600 and 3,400 t.p.h.).
One reversible longitudinal conveyor (L3) (output 1,600 t.p.h.).
One non-reversible transverse conveyor (T3) (1,600 t.p.h.).
One non-reversible longitudinal conveyor (L5) (2,400 t.p.h.) privately-owned (Stockfos).
One non-reversible transverse conveyor (T6) (1,600 t.p.h.) privately-owned (Carfos).
One non-reversible longitudinal conveyor (L6) (1,200 t.p.h.) privately-owned (Carfos).
Privately-owned equipment (Aluminium Pechiney) for reloading wagons (400 t.p.h.).

Mobile conveyors: One chain of mobile conveyors comprising:
1 elevated conveyor.
5 mobile conveyors.
1 self-propelled conveyor.

Rated output of the chain: 1,600 t.p.h.

A second identical mobile two-speed conveyor chain (1,600 and 2,000 t.p.h.) privately-owned (Carfos).

One assembly consisting of a wheeled belt-feeder and inclinable mobile conveyor (positioned downstream of the belt-feeder) with an output of 1,200 t.p.h. for loading small ships.

One assembly consisting of a wheeled belt-feeder and inclinable mobile conveyor (positioned downstream of the belt-feeder) with an output of 1,500 t.p.h. for loading small ships.

A wheeled belt-feeder 1,400 t.p.h. privately-owned (Carfos).

Storage equipment:
One wheeled stacker:
Jib: 18 m.
Stacking height: 8 m.
Orientation: 180°.
Throughput: 1,600 t.p.h.
One wheeled stacker:
Jib: 18 m.
Stacking height: 8 m.
Orientation: 180°.
Throughput: 1,600 to 2,000 t.p.h.
Privately-owned (Carfos).
One rail mounted stacker:
2×21 m. jibs.
Stacking height: 12 m.
Throughput: 2×600 t.p.h.
Privately-owned (Carfos).
One rail mounted stacker:
Jib: 30 m.
Stacking height: 14 m.
Orientation: 210°.
Throughput: 2,400 t.p.h.
Privately-owned (Stockfos).

Commercial throughput:

Varies with density and quality of the product, type of vessel, operating conditions, etc.

Daily commercial capacities with 3 shifts (19.5 hours of work) for products with a density of either 0.8 (coal) or 1.3 (bauxite).

Unloading:
With 2×20 tonne gantries: 12,000 to 18,000 tonnes/day.
With 2×15 tonne cranes: 7,000 to 10,000 tonnes/day.
With the continuous unloader plus a high throughput, yard capable of 25,000 to 32,000 tonnes/day.

Reshipment:
With gantry C1: 15,000 to 20,000 tonnes/day.
With gantry C2: 15,000 to 20,000 tonnes/day.
With river berth: 9,000 to 12,000 tonnes/day.

Storage:
One 6-hectare long-duration storage yard (Carfos).
One 6-hectare high-throughput yard (Stockfos).
One 15-hectare ordinary storage yard.
One 3,840 sq.m. shed (17,000 cu.m.).
25,000 tonnes alumina storage silo (Aluminium Pechiney).

Traffic capacity:
Between 6 and 7 million tonnes a year.
4 to 5 million tonnes of imports.
1 to 2 million tonnes of exports.

Technical data for gantries and unloaders:
Caillard gantries (P1 and P2).
Outreach beyond fenders: 23.50 m.
Free lift: 17.80 m.*
* Free lift limited to 15.00 m. while putting loader into hold.
Caillard cranes (K1 and K2).
Outreach beyond fenders:
15 tonne crane: 21.50 m.
12 tonne crane: 26.50 m.
Free lift: 17.00 m.
Continuous reloader (C2).
Outreach beyond fenders: 17.50 m.
Free lift: 13.50 m.
Continuous unloader (P+).
Outreach beyond fenders: 37.50 m.
Free lift: 19.00 m.

DRY BULK EQUIPMENT: P.M.A. equipment:
2×20 tonne bucket gantry cranes. 2 cranes of 15 tonnes at 30 m. 6 fixed conveyors. 10 public and 7 private mobile conveyors. 2 stackers on tyres. 3 feeders with a capacity of 1,500 t.p.h.; 1 of these is privately owned. 1 ship loader of 1,000 t.p.h. capacity. 1 continuous unloader with a capacity of 24,000 tonnes per day has also been brought into service.

Private equipment: 2×40 tonne discharging gantry cranes on the Sollac import quay. 2 cranes of 50 tonnes at 26 m. on the Sollac export quay. 1 loading gantry crane of 1,500 t.p.h. conceded to a private firm (Pechiney Co.) with the obligation to give public service on the ore quay.

Private Berths: Two private berths (Nos. 811 – 812) in Dock 1 – Eastern Quay. Sollac reception quay.
Available berthing length: 640 m. Permitted draft: 18.60 m.
Annual capacity of loading or discharge:
Solid minerals, fuels – Coal: 3,000,000 tons/year.
Ores: 4,000,000 tons/year.

The Sollac Quay is equipped with 2×40 ton gantries, each having an hourly rate of discharge of 2,000 tons.

Storage Capacity: Fuel, solid minerals, Coal: 350,000 tons.
Ores: 1,000,000 tons.

Sollac has a quayside open area of 360,000 sq.m. for the receipt and storage of coal and ores.

LNG FACILITIES:
At Dock No. 1. (Berth No. 830) (Owned by Gaz de France).
Length available for berthing 180 m. Max. draft 9.75 m.

2 storage tanks, for LNG in the liquid phase (−160°C.), each with a capacity of 35,000 cu. m. (1,235,500 cu. ft.) and 1×80,000 cu.m.

The pumps on the LNG Carrier discharge through articulated pipes of 300 mm. diameter (11.8 in.), 3 are specifically for discharge; one is to return the methane, in the vapour phase to the carrier.

After warming up from the liquid phase, with the addition of nitrogen to conform with the value in the French Gas Grid, the gas, in the vapour phase, is despatched by pipeline to the underground storage at Tersanne, 214 km. from Fos (134 miles), and to Marseilles and the Cote d'Azur.

LPG FACILITIES: *Propane:* Geogaz's underground storage of 120,000 cu.m. at Lavera is connected directly by pipeline to the oil refineries and the port

Butane: Underground storage of Geobutane at Lavera. Capacity of 170,000 cu.m. can now be raised to 230,000 cu.m. following a positive geological survey.

Reshipment Traffic: The port has established an international reputation for its technically delicate operations.

CHEMICAL PRODUCTS: 2 privately managed berths on the East quay of Dock 2.

Berth No. 858: The facilities of Atochem and of Ste. du Chlorure de Vinyle de Fos (SCVF):
Serviceable length: 35 m.; Max. draft: 11.30 m.

This berth is reserved for the export of chemical products such as vinyl monomer chloride and washing soda.

Arco-Chemie Terminal:
Serviceable length: 70 m. Max. draft 11.30 m.

This berth is reserved for the export of different products (MTBA, MTBE, Oxynol, Oxide Propylene, etc.).

CONTAINER HANDLING FACILITIES:
5 berths (Nos. 862–866) in Dock 2, Graveleau Quay.
Available berthing length: 1,130 m.
Depth alongside: 14.0 m.
Permitted draft: 13.00 m.

Annual loading or discharge capacity: 150,000 containers, i.e. 2,500,000 tonnes (approx.) (20 ft. and 40 ft.)

P.M.A. equipment: 5 Paceco quayside gantry cranes of 40 tonnes, capacity 20 – 25 containers p.h. and 1 Kone gantry crane of 70 tonnes.

Storage capacity: 15,000 containers i.e. 225,000 tonnes (approx.) (20 ft. and 40 ft.). Users have at their disposal a storage area with a total surface of 33 hectares. 112 reefer points available (220 Volts and 380 Volts 50 Hz. power supply).

Annual capacity of output or input: 150,000 containers (20 ft. and 40 ft.) i.e.: 2,000,000 tonnes (approx.) by lorries or railway. The French Railways Transcontainers terminal has 3 gantries on open areas with lifting capacity of 40 tonnes.

The terminal also has: A control centre of 2,000 sq.m.; 2 service areas of 200 m.×70 m.; a stuffing and unstuffing area of 3,200 sq.m. comprising 2 sheds of 25 m.×20 m. each.

Terminal Operators' ground equipment:
INTRAMAR:
1×60 tonne PPM crane, fitted with an automatic 20 ft./40 ft. spreader.
4×20 ft./40 ft. front forklifts.
5 front forklift trucks with 15/25 tonne lifting capacity.
12 yard tractors.
10×20 ft./40 ft. trailers.
2×12 tonne elevators, one fitted with a spreader for empty 20 ft. or 40 ft. containers.
2×3 tonne elevators and more if required.
Extra equipment is readily available in Marseilles.
EUROFOS:
7×40 tonne front elevators fitted with telescopic 20 ft./30 ft. and 40 ft. spreaders and three 42 tonne elevators.
3×11.5 tonne front elevators fitted with telescopic 20 ft./40 ft. spreaders for rapid handling of empty containers.
1×9.5 tonne front forklift truck.
2×2.5 tonne front elevators for minor operations and loading/unloading of containers.
6 Mafi-Douglas tractors with elevator ramp and 15 Plan 170 HD tractors.
A fleet of 32 frame trailers (no tailbard) and 3 swan-necked roll trailers, with a payload of 40 tonnes.
MAFOC:
7×38 to 42 tonne front elevators fitted with spreaders.
20 tractors.
23 trailers.
2 Belotti cranes for empty containers.
2 forklift trucks with 10/20 tonne lifting capacity.
6 forklift trucks with 5 tonne lifting capacity.
Special equipment is also available for handling non-standard containers.
Extra equipment is readily available in Marseilles.
Also see "Developments".

MEDICAL: All hospital and medical facilities. Yellow fever inoculation made by appointed doctors. Masters to advise by radio, prior arrival, if medical attendance required on board.

CONSULS: Norwegian, Swedish, Danish and Spanish Consuls at Port de Bouc. Others at Marseilles.

REPAIRS: Ore berth can be used as a repairs berth when not required for cargo operations. Permission must be obtained for tanker repairs. No tankers repairs if vessel is not gas free. Permission given by Harbour Master only.

TANKERS: Chicksan loading/discharge arms fitted at all berths. Ballast discharge ashore through pipeline. Tank cleaning slop or oil residue not accepted through shore line, but can be disposed of by barge from Marseilles. Possibility of crude cleaning for vessels with inert gas system if cleaning does not exceed time of discharging operations.

Crude: 6 public berths, of which one is multi-purpose 0 Bis (No. 807).

Designation	*Berth* No.	*Berthing Length* (m.)	*Max. Draft* (m.)
0	800	250	12.40
0 Bis	807	250	12.80
1	801	370	20.58
2	802	350	17.90
3	803	420	22.25
4	804	420	14.00

Berths 0 and 0 Bis (800 and 807) are equipped to handle either export or import of refined products, or chemical product traffic (Methanol and TBA), or the loading of crude oil from a tanker moored at one of the Berths 1, 2 or 3 (Nos. 801, 802, 803)

Berths 1, 2, 3 and 4 (Nos. 801, 802, 803 and 804) are for receiving crude oil only. Berth 2 (No. 802) is specially equipped to tranship, by using special pipelines, crude oil from vessels alongside at Berth 1 (No. 801) and No. 3 (No. 803).

Specialised lines, dependent upon the nature of the products, connect these berths to the oil depot of Fos, to the CRAU depot (Shell-Total-B.P.) to the Esso refinery and to the S.P.S.E. terminal, all located in Fos.

Shipmaster's Report: October 1986.

On Berth Nos. 1, 2 and 3 the outboard lifeboat is to be lowered down to the embarkation deck and rigged ready for immediate use.

Storage Capacity:

S.P.S.E. Terminal	2,660,000 cu.m.
CRAU Depot	1,910,000 cu.m.
Esso Refinery	840,000 cu.m.
Total:	5,010,000 cu.m.

Berth 4 (No. 804): Located at Mole No. 2 of the oil terminal, offers in a primary stage a depth of water of 15 m. The berth is intended for berthing in ballast of vessels of 550,000 d.w.t. for washing out tanks prior to repair.

It also permits the reception of crude oil imports and the transhipment of crude from tankers moored at Berths 801, 802 and 803.

The maximum permissible draft is at present 14 m.

The berth is connected to the new deballasting station by a 20 in. diameter pipeline. During the current first phase of development, this station treats only ballast of low oil content.

The berth can also be used for discharging crude from tankers with drafts up to 14.02 m., and is equipped with one 42 in. diameter discharge pipe and two 16 in. diameter discharge arms.

During the current first phase of development, this berth is not equipped with refuelling pipes or boarding towers.

This berth is also used for transhipment from ship to ship (alongside each other) for crude and gas operations.

Refined Products: 5 berths of which 3 are multi-purpose – 0, 0 Bis and 1(Nos. 800, 801 and 807).

Designation	Berth No.	Berthing Length (m.)	Max. Draft (m.)	Remarks
0	800	230	12.40	Public
0 Bis	807	200	12.80	Public
C.2	808	100	7.00	Public
Sollac	821A	100	5.50	Private
1	801	370	20.58	Public

Independently of the receipt of crude oil, berths 0 and 0 Bis are equipped to handle either refined product import or export traffic, or the loading of crude oil from tankers berthed at berths 1, 2 and 3 (801, 802, 803).

Berth C.2 (No. 808) specialises in loading refined products on coastal vessels and the Sollac berth (No. 821A) specialises in the receipt of fuel oil.

Storage capacity:

Fos Oil Depot		686,000 cu.m.
Esso Refinery		947,000 cu.m.
	Total:	1,633,000 cu.m.

Report:
Berthing Procedures: Tugs are secured in the dredged channel between Buoy Nos. 3 to 7, using the "On the Hook" method. Tugs watch VHF Channel 6.

Loaded or ballasted tankers are usually berthed starboard side to the berth and are swung on departure. But on request (ship's manifold too far displaced or only one gangway available) or in some weather conditions (S.E. winds), ships may be berthed port side alongside. The swing is always difficult and requires careful attention.

Usual parallel landing method is followed for Berths 0 – 0 Bis and 4, and ship's anchor may sometimes be used in special weather conditions.

When instructed to Berth at No. 1 or 2, Masters should be aware that the speed has to be carefully checked and agreed with the Pilots. When passing the last buoy of the channel (No. 11), the engine has to be put "full astern" and the effect of the propeller may bring the vessel approximately parallel to the jetty. The berth approach is then conducted at an angle of less than 30° with tugs' control.

Only Berth No. 4 is equipped with an approach velocity indicator which may be moved to No. 3 in the future.

For all the berths, ships' lines are taken ashore by mooring launches and lifted by hand on to the bollards or quick release hooks.

Spring lines are sent first, then breast lines and tugs will come alongside to push. Mooring boats make VHF contact on Channel 6.

Shore gangways are available only on Berth Nos. 1, 2 and 3, put on the ship's deck forward of the manifold (ships' lifebuoys used). On the other berth ships' gangways are needed with safety nets and lifebuoys.

Berths: Managed by the "Port Autonome de Marseilles", the berths consist of concrete platforms with rubber fenders. All are equipped with counter balanced hard arms, bolted connections. Shore personnel carry out connections/disconnections and a permanent watch is maintained on the berth. This watch may be made from a control room where video surveillance is carried out for the berths by one camera mounted on the arms and another one watching the entire berth.

The outside arms can be used for bunkering and for discharge of ballast.

Storage for ballast is up to 80,000 cu.m. and discharge rate to 5,000 cu.m.p.h.

Shore lines have *No Non-Return* valves, and ships are advised to carefully close their manifold gate valves during any stops.

Port Regulations give maximum cargo temperature allowed for discharging heated cargo using crude oil lines: in these special cases, 55°C (131°F) may not be exceeded.

BALLAST: *Deballasting Station:* This station is situated to the rear of the oil jetties. It treats ballast of only low oil content, but can receive slops of crude oil and refined petroleum products.

Its main characteristics are as follows:

Primary separation: 4,000 cu.m/hr., with apparatus for removing sediment and the oil recovered.

Intermediate storage in a basin of 80,000 cu.m., 320 m. long by 108 m. wide by 3.50 m. deep.

Secondary separation capable of rejecting water containing less than 5 p.p.m. of crude oil and petroleum products (by infra-red measurement) with a throughput of 250 cu.m/hr.

Storage of oil-rich mixtures (slops) 4×360 cu.m. and 1×4,950 cu.m.

Auxiliary installations (fire).

FRESH WATER: Available by pipeline at all berths.

FUEL: Available by barge only.

FIRE PRECAUTIONS: A special fire fighting corp. operates at Fos. Tel. 42.06.21.29 or call Fos Port Control on VHF Channel 12 or Telephone 42.40.60.60.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes every 5 days. Wine/Spirits: limited amount allowed per man.

AIRPORT: Marseilles/Marignane Airport about 60 km. distance.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

TELEPHONES: On application, telephones can be connected on board.

GARBAGE DISPOSAL/WASTE OIL DISPOSAL: See Part (a).

SEAMAN'S CLUBS: See Part (a).

CURRENCY: See Part (a).

DEVELOPMENTS: In 1993, Fos Container Terminal will have an additional 250 m. of quays and an additional 2 new Post-Panamax gantries.

SHIPMASTER'S REPORT: August 1987 (Updated 1996).
Berth: ATOFOS Berth.
Documents:
6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.

Pilotage: Pilot boards between 2 and 2.5 miles South of Lavera Buoy. The vessel is to call Fos Port Control 2 hours before arrival and on passing Omega Buoy.

Berthing: ATOFOS Berth is a private facility at the North East end of Dock 2. The depth alongside is 12 m. The berth is capable of handling 30,000 d.w.t. vessels. Products handled are vinyl chloride monomer (VCM) and caustic soda.

The berth has a 50 m. face with mooring/fender dolphins either side giving a flat fendering of about 100 m. The vessel berthed port side to, head out. The mooring dolphins are fitted with large rubber fenders.

Tugs: No tugs are required by small vessels, mooring to the dolphin and the shore is carried out by use of a launch.

Cargo: VCM is handled through an 8 in. Chicksan with a 6 in. vapour return line attached. Caustic soda is also handled through a Chicksan on the North end of the pier. The VCM Chicksan is in the centre of the pier.

Vapour is returned to the shore tanks.

VCM intake temperatures average −8°C and the loading rate is approximately 260 cu.m.p.h. VCM storage not inhibited. Inhibitor added to each ship's tank through loading arm, after first foot samples taken.

The ship makes the stops. After completion ship blows back ashore.

The plant/berth works in tandem with Berth A4 at Lavera. If Lavera berth is occupied and the ATOFOS berth free, ships berth at ATOFOS.

Storing: Diesel trucks are allowed to back-up to within 50 m. of the vessel. Fuel tankers and lub. oil tankers are not allowed near the vessel while the arm is connected.

General: Fresh water is available at the quay. There is no charge made.

Developments: A chemical complex and berth for ARCO Chemical Company is located 3 cables South East of ATOFOS. The berth can handle 1 vessel a day and average about 300 vessels per year (Berth No. 857 – max. LOA 200 m., max. draft 11.50 m.).

AUTHORITY: Port Autonome de Marseille, Capitainerie des Bassins Ouest, B.P. 200, 13528 Port de Bouc Cedex, France. *Tel:* 42.40.60.05. *Telex:* 44.01.64 CAPOR. *Cables:* Capor. *FAX:* 42.40.60.40.

ST. NAZAIRE: 47.17 N. 02.12 W.
DONGES: 47.18 N. 02.04 W.
MONTOIR: 47.18 N. 02.08 W.

DOCUMENTS:
Cargo Manifest or Manifest of Ballast.
Certificate of Cargo Space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.

PILOTAGE: Compulsory for vessels longer than 75 m. Pilotage is not compulsory for vessels under 75 m. LOA if they are equipped with radar and VHF and have no hazardons cargo onboard. Pilotage starts about 4 miles North of lighthouse of Le Pilier. Pilot boat on station day and night, if weather conditions permit, West of lightbuoy of "La Couronnee" about 2 miles. If Pilot unable to come aboard he may invite ship to follow his boat until they have reached better shelter. Ships heading for one of the Loire estuary ports should give ETA at least 24 hours before arrival to Port Captain of Saint-Nazaire. Approximate time of arrival at "La Couronnee" buoy, the onward destination and speed should be given. VHF contact can be made direct with St. Nazaire pilot boat or "Loire Pilot Station".

La Loire Pilots: Nantes - Tel: 02 40 69 29 00. Fax: 02 40 73 29 36.

St. Nazaire - Tel: 02 51 76 08 76. Fax: 02 51 76 08 75. Telex: 711251 F Pilore.

ANCHORAGE: Waiting Area is centred 6 miles West of Saint Gildas Point. In case of doubt contact pilot boat by VHF or telephone. Vessels are not allowed to anchor neither before Quay Emile Cormerais and Chevire Power Station Embankment (cables) nor in the vicinity of Power Station "Cordemais".

MAX. SIZE:
St. Nazaire: South Entrance Lock: Max. LOA 185 m. Max. draft 8.50 m. Max. beam 28 m.
Montoir: Length 300 m., max. draft 16.1 m.
Donges: Length 355 m., max. draft 16.1 m.
Nantes: Length up to 225 m., max. draft 10.05 m., minimum 8.55 m.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique Master should radio Agent before arrival, advising full details.

RADIO: St. Nazaire Radio operates on 1687 MHz. It keeps a continuous watch on VHF Channel 16 and 2182 kHz.

VHF: VHF Radiotelephone must be used for giving information and obtaining clearance to navigate from the Harbour Master.

The following Channels and frequencies are used:

Channel 16	Frequency: 156.8 MHz
Channel 12	Frequency: 156.6 MHz

The Pilots can be contacted on VHF Channels 16 and 12.

A continuous watch is maintained on Channels 16 and 12.

Storage:
One 6-hectare long-duration storage yard (Carfos).
One 6-hectare high-throughput yard (Stockfos).
One 15-hectare ordinary storage yard.
One 3,840 sq.m. shed (17,000 cu.m.).
25,000 tonnes alumina storage silo (Aluminium Pechiney).

Traffic capacity:
Between 6 and 7 million tonnes a year.
4 to 5 million tonnes of imports.
1 to 2 million tonnes of exports.

Technical data for gantries and unloaders:
Caillard gantries (P1 and P2).
Outreach beyond fenders: 23.50 m.
Free lift: 17.80 m.*
* Free lift limited to 15.00 m. while putting loader into hold.
Caillard cranes (K1 and K2).
Outreach beyond fenders:
15 tonne crane: 21.50 m.
12 tonne crane: 26.50 m.
Free lift: 17.00 m.
Continuous reloader (C2).
Outreach beyond fenders: 17.50 m.
Free lift: 13.50 m.
Continuous unloader (P+).
Outreach beyond fenders: 37.50 m.
Free lift: 19.00 m.

DRY BULK EQUIPMENT: P.M.A. equipment:
2×20 tonne bucket gantry cranes. 2 cranes of 15 tonnes at 30 m. 6 fixed conveyors. 10 public and 7 private mobile conveyors. 2 stackers on tyres. 3 feeders with a capacity of 1,500 t.p.h.; 1 of these is privately owned. 1 ship loader of 1,000 t.p.h. capacity. 1 continuous unloader with a capacity of 24,000 tonnes per day has also been brought into service.

Private equipment: 2×40 tonne discharging gantry cranes on the Sollac import quay. 2 cranes of 50 tonnes at 26 m. on the Sollac export quay. 1 loading gantry crane of 1,500 t.p.h. conceded to a private firm (Pechiney Co.) with the obligation to give public service on the ore quay.

Private Berths: Two private berths (Nos. 811 – 812) in Dock 1 – Eastern Quay. Sollac reception quay.
Available berthing length: 640 m. Permitted draft: 18.60 m.
Annual capacity of loading or discharge:
Solid minerals, fuels – Coal: 3,000,000 tons/year.
Ores: 4,000,000 tons/year.

The Sollac Quay is equipped with 2×40 ton gantries, each having an hourly rate of discharge of 2,000 tons.

Storage Capacity: Fuel, solid minerals, Coal: 350,000 tons.
Ores: 1,000,000 tons.

Sollac has a quayside open area of 360,000 sq.m. for the receipt and storage of coal and ores.

LNG FACILITIES:
At Dock No. 1. (Berth No. 830) (Owned by Gaz de France).
Length available for berthing 180 m. Max. draft 9.75 m.

2 storage tanks, for LNG in the liquid phase (–160°C.), each with a capacity of 35,000 cu. m. (1,235,500 cu. ft.) and 1×80,000 cu.m.

The pumps on the LNG Carrier discharge through articulated pipes of 300 mm. diameter (11.8 in.), 3 are specifically for discharge; one is to return the methane, in the vapour phase to the carrier.

After warming up from the liquid phase, with the addition of nitrogen to conform with the value in the French Gas Grid, the gas, in the vapour phase, is despatched by pipeline to the underground storage at Tersanne, 214 km. from Fos (134 miles), and to Marseilles and the Cote d'Azur.

LPG FACILITIES: *Propane:* Geogaz's underground storage of 120,000 cu.m. at Lavera is connected directly by pipeline to the oil refineries and the port

Butane: Underground storage of Geobutane at Lavera. Capacity of 170,000 cu.m. can now be raised to 230,000 cu.m. following a positive geological survey.

Reshipment Traffic: The port has established an international reputation for its technically delicate operations.

CHEMICAL PRODUCTS: 2 privately managed berths on the East quay of Dock 2.

Berth No. 858: The facilities of Atochem and of Ste. du Chlorure de Vinyle de Fos (SCVF):
Serviceable length: 35 m.; Max. draft: 11.30 m.

This berth is reserved for the export of chemical products such as vinyl monomer chloride and washing soda.

Arco-Chemie Terminal:
Serviceable length: 70 m. Max. draft 11.30 m.

This berth is reserved for the export of different products (MTBA, MTBE, Oxynol, Oxide Proplyene, etc.).

CONTAINER HANDLING FACILITIES:
5 berths (Nos. 862–866) in Dock 2, Graveleau Quay.
Available berthing length: 1,130 m.
Depth alongside: 14.0 m.
Permitted draft: 13.00 m.

Annual loading or discharge capacity: 150,000 containers, i.e. 2,500,000 tonnes (approx.) (20 ft. and 40 ft.)

P.M.A. equipment: 5 Paceco quayside gantry cranes of 40 tonnes, capacity 20 – 25 containers p.h. and 1 Kone gantry crane of 70 tonnes.

Storage capacity: 15,000 containers i.e. 225,000 tonnes (approx.) (20 ft. and 40 ft.). Users have at their disposal a storage area with a total surface of 33 hectares. 112 reefer points available (220 Volts and 380 Volts 50 Hz. power supply).

Annual capacity of output or input: 150,000 containers (20 ft. and 40 ft.) i.e.: 2,000,000 tonnes (approx.) by lorries or railway. The French Railways Transcontainers terminal has 3 gantries on open areas with lifting capacity of 40 tonnes.

The terminal also has: A control centre of 2,000 sq.m.; 2 service areas of 200 m.×70 m.; a stuffing and unstuffing area of 3,200 sq.m. comprising 2 sheds of 25 m.×20 m. each.

Terminal Operators' ground equipment:
INTRAMAR:
1×60 tonne PPM crane, fitted with an automatic 20 ft./40 ft. spreader.
4×20 ft./40 ft. front forklifts.
5 front forklift trucks with 15/25 tonne lifting capacity.
12 yard tractors.
10×20 ft./40 ft. trailers.
2×12 tonne elevators, one fitted with a spreader for empty 20 ft. or 40 ft. containers.
2×3 tonne elevators and more if required.
Extra equipment is readily available in Marseilles.

EUROFOS:
7×40 tonne front elevators fitted with telescopic 20 ft./30 ft. and 40 ft. spreaders and three 42 tonne elevators.
3×11.5 tonne front elevators fitted with telescopic 20 ft./40 ft. spreaders for rapid handling of empty containers.
1×9.5 tonne front forklift truck.
2×2.5 tonne front elevators for minor operations and loading/unloading of containers.
6 Mafi-Douglas tractors with elevator ramp and 15 Plan 170 HD tractors.
A fleet of 32 frame trailers (no tailbard) and 3 swan-necked roll trailers, with a payload of 40 tonnes.

MAFOC:
7×38 to 42 tonne front elevators fitted with spreaders.
20 tractors.
23 trailers.
2 Belotti cranes for empty containers.
2 forklift trucks with 10/20 tonne lifting capacity.
6 forklift trucks with 5 tonne lifting capacity.
Special equipment is also available for handling non-standard containers.
Extra equipment is readily available in Marseilles.
Also see "Developments".

MEDICAL: All hospital and medical facilities. Yellow fever inoculation made by appointed doctors. Masters to advise by radio, prior arrival, if medical attendance required on board.

CONSULS: Norwegian, Swedish, Danish and Spanish Consuls at Port de Bouc. Others at Marseilles.

REPAIRS: Ore berth can be used as a repairs berth when not required for cargo operations. Permission must be obtained for tanker repairs. No tankers repairs if vessel is not gas free. Permission given by Harbour Master only.

TANKERS: Chicksan loading/discharge arms fitted at all berths. Ballast discharge ashore through pipeline. Tank cleaning slop or oil residue not accepted through shore line, but can be disposed of by barge from Marseilles. Possibility of crude cleaning for vessels with inert gas system if cleaning does not exceed time of discharging operations.

Crude: 6 public berths, of which one is multi-purpose 0 Bis (No. 807).

Designation	*Berth* No.	*Berthing Length* (m.)	*Max. Draft* (m.)
0	800	250	12.40
0 Bis	807	250	12.80
1	801	370	20.58
2	802	350	17.90
3	803	420	22.25
4	804	420	14.00

Berths 0 and 0 Bis (800 and 807) are equipped to handle either export or import of refined products, or chemical product traffic (Methanol and TBA), or the loading of crude oil from a tanker moored at one of the Berths 1, 2 or 3 (Nos. 801, 802, 803)

Berths 1, 2, 3 and 4 (Nos. 801, 802, 803 and 804) are for receiving crude oil only. Berth 2 (No. 802) is specially equipped to tranship, by using special pipelines, crude oil from vessels alongside at Berth 1 (No. 801) and No. 3 (No. 803).

Specialised lines, dependent upon the nature of the products, connect these berths to the oil depot of Fos, to the CRAU depot (Shell-Total-B.P.) to the Esso refinery and to the S.P.S.E. terminal, all located in Fos.

Shipmaster's Report: October 1986.

On Berth Nos. 1, 2 and 3 the outboard lifeboat is to be lowered down to the embarkation deck and rigged ready for immediate use.

Storage Capacity:

S.P.S.E. Terminal	2,660,000 cu.m.
CRAU Depot	1,910,000 cu.m.
Esso Refinery	840,000 cu.m.
Total:	5,010,000 cu.m.

Berth 4 (No. 804): Located at Mole No. 2 of the oil terminal, offers in a primary stage a depth of water of 15 m. The berth is intended for berthing in ballast of vessels of 550,000 d.w.t. for washing out tanks prior to repair.

It also permits the reception of crude oil imports and the transhipment of crude from tankers moored at Berths 801, 802 and 803.

The maximum permissible draft is at present 14 m.

The berth is connected to the new deballasting station by a 20 in. diameter pipeline. During the current first phase of development, this station treats only ballast of low oil content.

The berth can also be used for discharging crude from tankers with drafts up to 14.02 m., and is equipped with one 42 in. diameter discharge pipe and two 16 in. diameter discharge arms.

During the current first phase of development, this berth is not equipped with refuelling pipes or boarding towers.

This berth is also used for transhipment from ship to ship (alongside each other) for crude and gas operations.

Refined Products: 5 berths of which 3 are multi-purpose – 0, 0 Bis and 1(Nos. 800, 801 and 807).

Designation	Berth No.	Berthing Length (m.)	Max. Draft (m.)	Remarks
0	800	230	12.40	Public
0 Bis	807	200	12.80	Public
C.2	808	100	7.00	Public
Sollac	821A	100	5.50	Private
1	801	370	20.58	Public

Independently of the receipt of crude oil, berths 0 and 0 Bis are equipped to handle either refined product import or export traffic, or the loading of crude oil from tankers berthed at berths 1, 2 and 3 (801, 802, 803).

Berth C.2 (No. 808) specialises in loading refined products on coastal vessels and the Sollac berth (No. 821A) specialises in the receipt of fuel oil.

Storage capacity:

Fos Oil Depot	686,000 cu.m.
Esso Refinery	947,000 cu.m.
Total:	1,633,000 cu.m.

Report:

Berthing Procedures: Tugs are secured in the dredged channel between Buoy Nos. 3 to 7, using the "On the Hook" method. Tugs watch VHF Channel 6.

Loaded or ballasted tankers are usually berthed starboard side to the berth and are swung on departure. But on request (ship's manifold too far displaced or only one gangway available) or in some weather conditions (S.E. winds), ships may be berthed port side alongside. The swing is always difficult and requires careful attention.

Usual parallel landing method is followed for Berths 0 – 0 Bis and 4, and ship's anchor may sometimes be used in special weather conditions.

When instructed to Berth at No. 1 or 2, Masters should be aware that the speed has to be carefully checked and agreed with the Pilots. When passing the last buoy of the channel (No. 11), the engine has to be put "full astern" and the effect of the propeller may bring the vessel approximately parallel to the jetty. The berth approach is then conducted at an angle of less than 30° with tugs' control.

Only Berth No. 4 is equipped with an approach velocity indicator which may be moved to No. 3 in the future.

For all the berths, ships' lines are taken ashore by mooring launches and lifted by hand on to the bollards or quick release hooks.

Spring lines are sent first, then breast lines and tugs will come alongside to push. Mooring boats make VHF contact on Channel 6.

Shore gangways are available only on Berth Nos. 1, 2 and 3, put on the ship's deck forward of the manifold (ships' lifebuoys used). On the other berth ships' gangways are needed with safety nets and lifebuoys.

Berths: Managed by the "Port Autonome de Marseilles", the berths consist of concrete platforms with rubber fenders. All are equipped with counter balanced hard arms, bolted connections. Shore personnel carry out connections/disconnections and a permanent watch is maintained on the berth. This watch may be made from a control room where video surveillance is carried out for the berths by one camera mounted on the arms and another one watching the entire berth.

The outside arms can be used for bunkering and for discharge of ballast.

Storage for ballast is up to 80,000 cu.m. and discharge rate to 5,000 cu.m.p.h.

Shore lines have *No Non-Return* valves, and ships are advised to carefully close their manifold gate valves during any stops.

Port Regulations give maximum cargo temperature allowed for discharging heated cargo using crude oil lines: in these special cases, 55°C (131°F) may not be exceeded.

BALLAST: *Deballasting Station:* This station is situated to the rear of the oil jetties. It treats ballast of only low oil content, but can receive slops of crude oil and refined petroleum products.

Its main characteristics are as follows:

Primary separation: 4,000 cu.m/hr., with apparatus for removing sediment and the oil recovered.

Intermediate storage in a basin of 80,000 cu.m., 320 m. long by 108 m. wide by 3.50 m. deep.

Secondary separation capable of rejecting water containing less than 5 p.p.m. of crude oil and petroleum products (by infra-red measurement) with a throughput of 250 cu.m/hr.

Storage of oil-rich mixtures (slops) 4×360 cu.m. and 1×4,950 cu.m.

Auxiliary installations (fire).

FRESH WATER: Available by pipeline at all berths.

FUEL: Available by barge only.

FIRE PRECAUTIONS: A special fire fighting corp. operates at Fos. Tel. 42.06.21.29 or call Fos Port Control on VHF Channel 12 or Telephone 42.40.60.60.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes every 5 days. Wine/Spirits: limited amount allowed per man.

AIRPORT: Marseilles/Marignane Airport about 60 km. distance.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

TELEPHONES: On application, telephones can be connected on board.

GARBAGE DISPOSAL/WASTE OIL DISPOSAL: See Part (a).

SEAMAN'S CLUBS: See Part (a).

CURRENCY: See Part (a).

DEVELOPMENTS: In 1993, Fos Container Terminal will have an additional 250 m. of quays and an additional 2 new Post-Panamax gantries.

SHIPMASTER'S REPORT: August 1987 (Updated 1996).

Berth: ATOFOS Berth.

Documents:

6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.

Pilotage: Pilot boards between 2 and 2.5 miles South of Lavera Buoy. The vessel is to call Fos Port Control 2 hours before arrival and on passing Omega Buoy.

Berthing: ATOFOS Berth is a private facility at the North East end of Dock 2. The depth alongside is 12 m. The berth is capable of handling 30,000 d.w.t. vessels. Products handled are vinyl chloride monomer (VCM) and caustic soda.

The berth has a 50 m. face with mooring/fender dolphins either side giving a flat fendering of about 100 m. The vessel berthed port side to, head out. The mooring dolphins are fitted with large rubber fenders.

Tugs: No tugs are required by small vessels, mooring to the dolphin and the shore is carried out by use of a launch.

Cargo: VCM is handled through an 8 in. Chicksan with a 6 in. vapour return line attached. Caustic soda is also handled through a Chicksan on the North end of the pier. The VCM Chicksan is in the centre of the pier.

Vapour is returned to the shore tanks.

VCM intake temperatures average −8°C and the loading rate is approximately 260 cu.m.p.h. VCM storage not inhibited. Inhibitor added to each ship's tank through loading arm, after first foot samples taken.

The ship makes the stops. After completion ship blows back ashore.

The plant/berth works in tandem with Berth A4 at Lavera. If Lavera berth is occupied and the ATOFOS berth free, ships berth at ATOFOS.

Storing: Diesel trucks are allowed to back-up to within 50 m. of the vessel. Fuel tankers and lub. oil tankers are not allowed near the vessel while the arm is connected.

General: Fresh water is available at the quay. There is no charge made.

Developments: A chemical complex and berth for ARCO Chemical Company is located 3 cables South East of ATOFOS. The berth can handle 1 vessel a day and average about 300 vessels per year (Berth No. 857 – max. LOA 200 m., max. draft 11.50 m.).

AUTHORITY: Port Autonome de Marseille, Capitainerie des Bassins Ouest, B.P. 200, 13528 Port de Bouc Cedex, France. *Tel:* 42.40.60.05. *Telex:* 44.01.64 CAPOR. *Cables:* Capor. *FAX:* 42.40.60.40. *Contact:* Harbour Master.

Fos Facilities Management: *Tel:* 42.48.66.05. *FAX:* 42.48.66.00. *Telex:* 410789.

Health Declaration.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.

PILOTAGE: Compulsory for vessels longer than 75 m. Pilotage is not compulsory for vessels under 75 m. LOA if they are equipped with radar and VHF and have no hazardons cargo onboard. Pilotage starts about 4 miles North of lighthouse of Le Pilier. Pilot boat on station day and night, if weather conditions permit, West of lightbuoy of "La Couronnee" about 2 miles. If Pilot unable to come aboard he may invite ship to follow his boat until they have reached better shelter. Ships heading for one of the Loire estuary ports should give ETA at least 24 hours before arrival to Port Captain of Saint-Nazaire. Approximate time of arrival at "La Couronnee" buoy, the onward destination and speed should be given. VHF contact can be made direct with St. Nazaire pilot boat or "Loire Pilot Station".

La Loire Pilots: Nantes - Tel: 02 40 69 29 00. Fax: 02 40 73 29 36.
St. Nazaire - Tel: 02 51 76 08 76. Fax: 02 51 76 08 75. Telex: 711251 F Pilore.

ANCHORAGE: Waiting Area is centred 6 miles West of Saint Gildas Point. In case of doubt contact pilot boat by VHF or telephone. Vessels are not allowed to anchor neither before Quay Emile Cormerais and Chevire Power Station Embankment (cables) nor in the vicinity of Power Station "Cordemais".

MAX. SIZE:

St. Nazaire: South Entrance Lock: Max. LOA 185 m. Max. draft 8.50 m. Max. beam 28 m.

Montoir: Length 300 m., max. draft 16.1 m.

Donges: Length 355 m., max. draft 16.1 m.

Nantes: Length up to 225 m., max. draft 10.05 m., minimum 8.55 m.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique Master should radio Agent before arrival, advising full details.

RADIO: St. Nazaire Radio operates on 1687 MHz. It keeps a continuous watch on VHF Channel 16 and 2182 kHz.

VHF: VHF Radiotelephone must be used for giving information and obtaining clearance to navigate from the Harbour Master.

The following Channels and frequencies are used:

Channel 16	Frequency: 156.8 MHz
Channel 12	Frequency: 156.6 MHz

The Pilots can be contacted on VHF Channels 16 and 12.

A continuous watch is maintained on Channels 16 and 12.

Storage:
One 6-hectare long-duration storage yard (Carfos).
One 6-hectare high-throughput yard (Stockfos).
One 15-hectare ordinary storage yard.
One 3,840 sq.m. shed (17,000 cu.m.).
25,000 tonnes alumina storage silo (Aluminium Pechiney).

Traffic capacity:
Between 6 and 7 million tonnes a year.
4 to 5 million tonnes of imports.
1 to 2 million tonnes of exports.

Technical data for gantries and unloaders:
Caillard gantries (P1 and P2).
Outreach beyond fenders: 23.50 m.
Free lift: 17.80 m.*
* Free lift limited to 15.00 m. while putting loader into hold.
Caillard cranes (K1 and K2).
Outreach beyond fenders:
15 tonne crane: 21.50 m.
12 tonne crane: 26.50 m.
Free lift: 17.00 m.
Continuous reloader (C2).
Outreach beyond fenders: 17.50 m.
Free lift: 13.50 m.
Continuous unloader (P+).
Outreach beyond fenders: 37.50 m.
Free lift: 19.00 m.

DRY BULK EQUIPMENT: P.M.A. equipment:

2×20 tonne bucket gantry cranes. 2 cranes of 15 tonnes at 30 m. 6 fixed conveyors. 10 public and 7 private mobile conveyors. 2 stackers on tyres. 3 feeders with a capacity of 1,500 t.p.h.; 1 of these is privately owned. 1 ship loader of 1,000 t.p.h. capacity. 1 continuous unloader with a capacity of 24,000 tonnes per day has also been brought into service.

Private equipment: 2×40 tonne discharging gantry cranes on the Sollac import quay. 2 cranes of 50 tonnes at 26 m. on the Sollac export quay. 1 loading gantry crane of 1,500 t.p.h. conceded to a private firm (Pechiney Co.) with the obligation to give public service on the ore quay.

Private Berths: Two private berths (Nos. 811 – 812) in Dock 1 – Eastern Quay. Sollac reception quay.

Available berthing length: 640 m. Permitted draft: 18.60 m.
Annual capacity of loading or discharge:
Solid minerals, fuels – Coal: 3,000,000 tons/year.
Ores: 4,000,000 tons/year.

The Sollac Quay is equipped with 2×40 ton gantries, each having an hourly rate of discharge of 2,000 tons.

Storage Capacity: Fuel, solid minerals, Coal: 350,000 tons.
Ores: 1,000,000 tons.

Sollac has a quayside open area of 360,000 sq.m. for the receipt and storage of coal and ores.

LNG FACILITIES:

At Dock No. 1. (Berth No. 830) (Owned by Gaz de France).

Length available for berthing 180 m. Max. draft 9.75 m.

2 storage tanks, for LNG in the liquid phase (–160°C.), each with a capacity of 35,000 cu. m. (1,235,500 cu. ft.) and 1×80,000 cu.m.

The pumps on the LNG Carrier discharge through articulated pipes of 300 mm. diameter (11.8 in.), 3 are specifically for discharge; one is to return the methane, in the vapour phase to the carrier.

After warming up from the liquid phase, with the addition of nitrogen to conform with the value in the French Gas Grid, the gas, in the vapour phase, is despatched by pipeline to the underground storage at Tersanne, 214 km. from Fos (134 miles), and to Marseilles and the Cote d'Azur.

LPG FACILITIES: *Propane:* Geogaz's underground storage of 120,000 cu.m. at Lavera is connected directly by pipeline to the oil refineries and the port

Butane: Underground storage of Geobutane at Lavera. Capacity of 170,000 cu.m. can now be raised to 230,000 cu.m. following a positive geological survey.

Reshipment Traffic: The port has established an international reputation for its technically delicate operations.

CHEMICAL PRODUCTS: 2 privately managed berths on the East quay of Dock 2.

Berth No. 858: The facilities of Atochem and of Ste. du Chlorure de Vinyle de Fos (SCVF):

Serviceable length: 35 m.; Max. draft: 11.30 m.

This berth is reserved for the export of chemical products such as vinyl monomer chloride and washing soda.

Arco-Chemie Terminal:
Serviceable length: 70 m. Max. draft 11.30 m.

This berth is reserved for the export of different products (MTBA, MTBE, Oxynol, Oxide Proplyene, etc.).

CONTAINER HANDLING FACILITIES:

5 berths (Nos. 862–866) in Dock 2, Graveleau Quay.
Available berthing length: 1,130 m.
Depth alongside: 14.0 m.
Permitted draft: 13.00 m.

Annual loading or discharge capacity: 150,000 containers, i.e. 2,500,000 tonnes (approx.) (20 ft. and 40 ft.)

P.M.A. equipment: 5 Paceco quayside gantry cranes of 40 tonnes, capacity 20 – 25 containers p.h. and 1 Kone gantry crane of 70 tonnes.

Storage capacity: 15,000 containers i.e. 225,000 tonnes (approx.) (20 ft. and 40 ft.). Users have at their disposal a storage area with a total surface of 33 hectares. 112 reefer points available (220 Volts and 380 Volts 50 Hz. power supply).

Annual capacity of output or input: 150,000 containers (20 ft. and 40 ft.) i.e.: 2,000,000 tonnes (approx.) by lorries or railway. The French Railways Transcontainers terminal has 3 gantries on open areas with lifting capacity of 40 tonnes.

The terminal also has: A control centre of 2,000 sq.m.; 2 service areas of 200 m.×70 m.; a stuffing and unstuffing area of 3,200 sq.m. comprising 2 sheds of 25 m.×20 m. each.

Terminal Operators' ground equipment:
INTRAMAR:

1×60 tonne PPM crane, fitted with an automatic 20 ft./40 ft. spreader.
4×20 ft./40 ft. front forklifts.
5 front forklift trucks with 15/25 tonne lifting capacity.
12 yard tractors.
10×20 ft./40 ft. trailers.

2×12 tonne elevators, one fitted with a spreader for empty 20 ft. or 40 ft. containers.

2×3 tonne elevators and more if required.

Extra equipment is readily available in Marseilles.

EUROFOS:

7×40 tonne front elevators fitted with telescopic 20 ft./30 ft. and 40 ft. spreaders and three 42 tonne elevators.

3×11.5 tonne front elevators fitted with telescopic 20 ft./40 ft. spreaders for rapid handling of empty containers.

1×9.5 tonne front forklift truck.

2×2.5 tonne front elevators for minor operations and loading/unloading of containers.

6 Mafi-Douglas tractors with elevator ramp and 15 Plan 170 HD tractors.

A fleet of 32 frame trailers (no tailbard) and 3 swan-necked roll trailers, with a payload of 40 tonnes.

MAFOC:

7×38 to 42 tonne front elevators fitted with spreaders.
20 tractors.
23 trailers.
2 Belotti cranes for empty containers.
2 forklift trucks with 10/20 tonne lifting capacity.
6 forklift trucks with 5 tonne lifting capacity.

Special equipment is also available for handling non-standard containers.

Extra equipment is readily available in Marseilles.

Also see "Developments".

MEDICAL: All hospital and medical facilities. Yellow fever inoculation made by appointed doctors. Masters to advise by radio, prior arrival, if medical attendance required on board.

CONSULS: Norwegian, Swedish, Danish and Spanish Consuls at Port de Bouc. Others at Marseilles.

REPAIRS: Ore berth can be used as a repairs berth when not required for cargo operations. Permission must be obtained for tanker repairs. No tankers repairs if vessel is not gas free. Permission given by Harbour Master only.

TANKERS: Chicksan loading/discharge arms fitted at all berths. Ballast discharge ashore through pipeline. Tank cleaning slop or oil residue not accepted through shore line, but can be disposed of by barge from Marseilles. Possibility of crude cleaning for vessels with inert gas system if cleaning does not exceed time of discharging operations.

Crude: 6 public berths, of which one is multi-purpose 0 Bis (No. 807).

Designation	*Berth* No.	*Berthing Length* (m.)	*Max. Draft* (m.)
0	800	250	12.40
0 Bis	807	250	12.80
1	801	370	20.58
2	802	350	17.90
3	803	420	22.25
4	804	420	14.00

Berths 0 and 0 Bis (800 and 807) are equipped to handle either export or import of refined products, or chemical product traffic (Methanol and TBA), or the loading of crude oil from a tanker moored at one of the Berths 1, 2 or 3 (Nos. 801, 802, 803)

Berths 1, 2, 3 and 4 (Nos. 801, 802, 803 and 804) are for receiving crude oil only. Berth 2 (No. 802) is specially equipped to tranship, by using special pipelines, crude oil from vessels alongside at Berth 1 (No. 801) and No. 3 (No. 803).

Specialised lines, dependent upon the nature of the products, connect these berths to the oil depot of Fos, to the CRAU depot (Shell-Total-B.P.) to the Esso refinery and to the S.P.S.E. terminal, all located in Fos.

Shipmaster's Report: October 1986.

On Berth Nos. 1, 2 and 3 the outboard lifeboat is to be lowered down to the embarkation deck and rigged ready for immediate use.

Storage Capacity:

S.P.S.E. Terminal	2,660,000 cu.m.
CRAU Depot	1,910,000 cu.m.
Esso Refinery	840,000 cu.m.
Total:	5,010,000 cu.m.

Berth 4 (No. 804): Located at Mole No. 2 of the oil terminal, offers in a primary stage a depth of water of 15 m. The berth is intended for berthing in ballast of vessels of 550,000 d.w.t. for washing out tanks prior to repair.

It also permits the reception of crude oil imports and the transhipment of crude from tankers moored at Berths 801, 802 and 803.

The maximum permissible draft is at present 14 m.

The berth is connected to the new deballasting station by a 20 in. diameter pipeline. During the current first phase of development, this station treats only ballast of low oil content.

The berth can also be used for discharging crude from tankers with drafts up to 14.02 m., and is equipped with one 42 in. diameter discharge pipe and two 16 in. diameter discharge arms.

During the current first phase of development, this berth is not equipped with refuelling pipes or boarding towers.

This berth is also used for transhipment from ship to ship (alongside each other) for crude and gas operations.

Refined Products: 5 berths of which 3 are multi-purpose – 0, 0 Bis and 1(Nos. 800, 801 and 807).

Designation	*Berth* No.	*Berthing Length* (m.)	*Max. Draft* (m.)	*Remarks*
0	800	230	12.40	Public
0 Bis	807	200	12.80	Public
C.2	808	100	7.00	Public
Sollac	821A	100	5.50	Private
1	801	370	20.58	Public

Independently of the receipt of crude oil, berths 0 and 0 Bis are equipped to handle either refined product import or export traffic, or the loading of crude oil from tankers berthed at berths 1, 2 and 3 (801, 802, 803).

Berth C.2 (No. 808) specialises in loading refined products on coastal vessels and the Sollac berth (No. 821A) specialises in the receipt of fuel oil.

Storage capacity:

Fos Oil Depot	686,000 cu.m.
Esso Refinery	947,000 cu.m.
Total:	1,633,000 cu.m.

Report:

Berthing Procedures: Tugs are secured in the dredged channel between Buoy Nos. 3 to 7, using the "On the Hook" method. Tugs watch VHF Channel 6.

Loaded or ballasted tankers are usually berthed starboard side to the berth and are swung on departure. But on request (ship's manifold too far displaced or only one gangway available) or in some weather conditions (S.E. winds), ships may be berthed port side alongside. The swing is always difficult and requires careful attention.

Usual parallel landing method is followed for Berths 0 – 0 Bis and 4, and ship's anchor may sometimes be used in special weather conditions.

When instructed to Berth at No. 1 or 2, Masters should be aware that the speed has to be carefully checked and agreed with the Pilots. When passing the last buoy of the channel (No. 11), the engine has to be put "full astern" and the effect of the propeller may bring the vessel approximately parallel to the jetty. The berth approach is then conducted at an angle of less than 30° with tugs' control.

Only Berth No. 4 is equipped with an approach velocity indicator which may be moved to No. 3 in the future.

For all the berths, ships' lines are taken ashore by mooring launches and lifted by hand on to the bollards or quick release hooks.

Spring lines are sent first, then breast lines and tugs will come alongside to push. Mooring boats make VHF contact on Channel 6.

Shore gangways are available only on Berth Nos. 1, 2 and 3, put on the ship's deck forward of the manifold (ships' lifebuoys used). On the other berth ships' gangways are needed with safety nets and lifebuoys.

Berths: Managed by the "Port Autonome de Marseilles", the berths consist of concrete platforms with rubber fenders. All are equipped with counter balanced hard arms, bolted connections. Shore personnel carry out connections/disconnections and a permanent watch is maintained on the berth. This watch may be made from a control room where video surveillance is carried out for the berths by one camera mounted on the arms and another one watching the entire berth.

The outside arms can be used for bunkering and for discharge of ballast.

Storage for ballast is up to 80,000 cu.m. and discharge rate to 5,000 cu.m.p.h.

Shore lines have *No Non-Return* valves, and ships are advised to carefully close their manifold gate valves during any stops.

Port Regulations give maximum cargo temperature allowed for discharging heated cargo using crude oil lines: in these special cases, 55°C (131°F) may not be exceeded.

BALLAST: *Deballasting Station:* This station is situated to the rear of the oil jetties. It treats ballast of only low oil content, but can receive slops of crude oil and refined petroleum products.

Its main characteristics are as follows:

Primary separation: 4,000 cu.m/hr., with apparatus for removing sediment and the oil recovered.

Intermediate storage in a basin of 80,000 cu.m., 320 m. long by 108 m. wide by 3.50 m. deep.

Secondary separation capable of rejecting water containing less than 5 p.p.m. of crude oil and petroleum products (by infra-red measurement) with a throughput of 250 cu.m/hr.

Storage of oil-rich mixtures (slops) 4×360 cu.m. and 1×4,950 cu.m.

Auxiliary installations (fire).

FRESH WATER: Available by pipeline at all berths.

FUEL: Available by barge only.

FIRE PRECAUTIONS: A special fire fighting corp. operates at Fos. Tel. 42.06.21.29 or call Fos Port Control on VHF Channel 12 or Telephone 42.40.60.60.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes every 5 days. Wine/Spirits: limited amount allowed per man.

AIRPORT: Marseilles/Marignane Airport about 60 km. distance.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

TELEPHONES: On application, telephones can be connected on board.

GARBAGE DISPOSAL/WASTE OIL DISPOSAL: See Part (a).

SEAMAN'S CLUBS: See Part (a).

CURRENCY: See Part (a).

DEVELOPMENTS: In 1993, Fos Container Terminal will have an additional 250 m. of quays and an additional 2 new Post-Panamax gantries.

SHIPMASTER'S REPORT: August 1987 (Updated 1996).

Berth: ATOFOS Berth.

Documents:

6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.

Pilotage: Pilot boards between 2 and 2.5 miles South of Lavera Buoy. The vessel is to call Fos Port Control 2 hours before arrival and on passing Omega Buoy.

Berthing: ATOFOS Berth is a private facility at the North East end of Dock 2. The depth alongside is 12 m. The berth is capable of handling 30,000 d.w.t. vessels. Products handled are vinyl chloride monomer (VCM) and caustic soda.

The berth has a 50 m. face with mooring/fender dolphins either side giving a flat fendering of about 100 m. The vessel berthed port side to, head out. The mooring dolphins are fitted with large rubber fenders.

Tugs: No tugs are required by small vessels, mooring to the dolphin and the shore is carried out by use of a launch.

Cargo: VCM is handled through an 8 in. Chicksan with a 6 in. vapour return line attached. Caustic soda is also handled through a Chicksan on the North end of the pier. The VCM Chicksan is in the centre of the pier.

Vapour is returned to the shore tanks.

VCM intake temperatures average −8°C and the loading rate is approximately 260 cu.m.p.h. VCM storage not inhibited. Inhibitor added to each ship's tank through loading arm, after first foot samples taken.

The ship makes the stops. After completion ship blows back ashore.

The plant/berth works in tandem with Berth A4 at Lavera. If Lavera berth is occupied and the ATOFOS berth free, ships berth at ATOFOS.

Storing: Diesel trucks are allowed to back-up to within 50 m. of the vessel. Fuel tankers and lub. oil tankers are not allowed near the vessel while the arm is connected.

General: Fresh water is available at the quay. There is no charge made.

Developments: A chemical complex and berth for ARCO Chemical Company is located 3 cables South East of ATOFOS. The berth can handle 1 vessel a day and average about 300 vessels per year (Berth No. 857 – max. LOA 200 m., max. draft 11.50 m.).

Nantes: Length up to 225 m., max. draft 10.05 m., minimum 8.55 m.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique Master should radio Agent before arrival, advising full details.

RADIO: St. Nazaire Radio operates on 1687 MHz. It keeps a continuous watch on VHF Channel 16 and 2182 kHz.

VHF: VHF Radiotelephone must be used for giving information and obtaining clearance to navigate from the Harbour Master.

The following Channels and frequencies are used:

Channel 16	Frequency: 156.8 MHz
Channel 12	Frequency: 156.6 MHz

The Pilots can be contacted on VHF Channels 16 and 12.

A continuous watch is maintained on Channels 16 and 12.

RADAR: The radar service can be contacted on VHF Channels 16 and 12 or through St. Nazaire Port Control.

TUGS: *Nantes:* 2×1,000 h.p.

Donges – Montoir – St. Nazaire: 6×1,500 h.p. – 3,000 h.p. They are provided by Abeilles Nantes St. Nazaire.

BERTHING: St. Nazaire: Is a port with locks. Max. draft: 28 ft. (vessels up to 20 – 25,000 d.w.t. in the best conditions of tides).

Dock Water Density: 1015.

Length of Quay: 2,700 m.

Number of Berths: 15.

Numerous cranes up to 12 tons and a 400 ton derrick.

Traffic: Timber, heavy loads, metallurgical products, refined products, fertilizers, grain (capacity of the grain silo: 10,000 tons. Loading rate 400 t.p.h.), oil seeds, phosphates. Tanker berth – Deballasting station. Ro/Ro operations can be carried out.

Montoir: Port Authority use own steel cables to supplement ship's ropes.

Dock Water Density: 1000 to 1020.

Specialised Facilities: Ro/Ro Berth No. 1 – Max. LOA 140 m. Warehousing and 36,960 sq.m. of back up land. Ro/Ro Berth No. 2 – Max. LOA 180 m.

LNG: 2 privately managed berths can receive gas-carriers up to 125,000 cu.m. Also see "Shipmasters Report" dated "June 1980".

Dry Bulk: Length of quay 818 m., cranes 1×15 tons and 5×15/30 tons. 2 continuous unloader. Total daily throughput 20,000 tons. Storage facilities and grain silo with gantry crane.

Traffic: Oil seeds, oil cakes, timber, coal, soya pellets, fertilisers and scrap iron.

Liquid Chemicals: Connections for ammonia gas, acids and liquids. Molasses average throughput: 600 t.p.h.

Container Terminal: Length of quay: 611 m., max. draft 12.0 m. Storage facilities, 1×40 tonne mobile crane, 1×32 ton quay crane and 2 Post-Panamax container gantries with capacity 70 tonnes. Ro/Ro vessels with side ramps also berth. 24 power points for refrigerated containers.

Coal: A coal berth is operational to receive ore carriers up to 140,000 d.w.t., rate 2,500 t.p.h.

Donges: Mooring of vessels to Dock No. 3 is performed with ship's ropes. On Dock Nos. 4, 5, 6 and 7, Port Authority use own steel cables to which ship is secured to supplement her own ropes.

Berth Nos. 5, 6 and 7: To reduce the time of mooring a special mooring gang can be put at Master's disposal for arrival and departure. Arrangements must be made 12 hours in advance of this service. Permanent watch on VHF Channel 16 is recommended.

Tanker Berths: Can receive fully loaded tankers of 120,000 – 140,000 d.w.t. or the 350,000 d.w.t. lightened. Number of berths 7.

4 berths are designed for handling refined products. Throughput: 1,500 to 5,000 cu.m./hr. Berths No. 3 and 4 can handle LPG.

3 berths are designed for discharging crude oil. Throughput: 10,000 cu.m./hr.

Crude Connections: No. 5 Berth 4×12 in. Chicksan arms, 12 holes type 150 lbs. No. 6 Berth 5×12 in. No. 7 Berth 5×16 in. Chicksan arms. 12 holes type 150 lbs. Reducers available, notice required prior to arrival.

Bunkering Lines: No. 5 Berth 8 in. Chicksan arm with 6 in. connection. No. 6 Berth, 6 in., 8 in., or 12 in. No. 7 Berth 16 in.

Le Carnet: Berth for chemical tankers up to 180 m. LOA.

Nantes: Vessels may be moored with bow facing up or downstream. During heavy flood periods, however, bow to face upstream.

Dock Water Density: 1000.

Quai Chevire: Traffic: Timber and containers. 3 berths. Cranes up to 25 tons. Two 15 to 25 ton cranes are able to operate together, providing a 25 ton to 45 ton lifting capacity. Spreader available for handling 20 ft. containers (about 20 containers per hour). Storage facilities.

Quai Wilson: Length 800 m., 8 berths. Traffic: Heavy loads and containers in the Eastern part.

Phosphates, coal, pyrites, sulphur, salt, scrap iron, molasses, sugar, fruits and vegetables. Storage facilities. Numerous cranes up to 60 tons capacity.

Quai Roche-Maurice: Length 747 m. 6 berths. Cranes up to 6 tons capacity.

Discharging: phosphates, grains (loading rate 700 t.p.h.), molasses, fertilizers. Storage capacity of the grain silo: 120,000 tons.

Additional facilities for discharging oil and coaltar, chemical products, wine and various cargoes, length of quays: 1,500 m.

CRANES: 60 ton heavy lift crane at Nantes. 400 ton derrick at St. Nazaire.

BRIDGES: Vessels coming up the river to Montoir, Donges and upstream pass underneath the St. Nazaire bridge: Clearance 61 m. at lowest water.

Clearance under Chevire Bridge is 56 m. at lowest tide.

STEVEDORES: Available.

MEDICAL: Facilities available at any time.

TANKERS: See "Berthing".

Degassing and deballasting operations possible at St. Nazaire, capacity 1,700 cu.m.p.h.

FRESH WATER: Available at docks.

FUEL: Available in any grade or viscosity. Advance notice of at least 2 days must be given if vessel has to bunker on Saturday or Sunday. Otherwise, delivery within 36 hours by barge.

FIRE PRECAUTIONS: Usual precautions for tankers in neighbourhood of refineries. No fire, no smoking, Ground wire for ship.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Done by crew.

CONSULS:

Algeria	02.40.74.38.19	Netherlands	02.40.58.56.57
Belgium	02.40.12.96.77	Norway	02.40.73.85.59

REPAIRS/DRY DOCKS: Very good facilities exist for all types of repairs.

St. Nazaire: "L. Joubert" graving dock, length 350 m., width 50 m. Dock can accommodate ships up to 240,000 d.w.t.

Dry Docks: No. 1 Ships up to 40,000 d.w.t. No. 2 Ships up to 1,500 d.w.t. No. 3 Ships up to 6,000 d.w.t.

Nantes: One careening unit of 1,700 ton accommodating ships up to 100 m. long.

CUSTOMS ALLOWANCES: Tobacco: 300 cigarettes or 75 cigars. Wine; 7 pints. Spirits: up to 22° – 5.3 pints, beyond 22° – 2.7 pints. Coffee: 26 ozs. Tea: 5 ozs.

AIRPORT: *Nantes:* Good connections with French internal network (Air Inter) and also international, mainly with stop-over Paris. 5 daily flights to the capital. Direct flights to Bordeaux, Lorient, La Rochelle, Lyon, etc.

TIME: GMT plus 1 hour, seasonal alteration.

HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); Victory 1945 (8th May); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.

POLICE/FIRE/AMBULANCE: Police 17; Fire 18; Ambulance 18.

TELEPHONE: Arrangements are possible.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not needed.

DEVELOPMENTS: Montoir: The Container Terminal is to be extended to 1,210 m.

SHIPMASTER'S REPORT: June 1980 (Updated 1994).

Montoir: (Discharging ammonia) – See "Plan".

Approaches: B.A. 3216, 2989 and 2647, outer coverage not very good. Arrived in good visibility so shore lights gave good positions. Ile de Yeu does not show up very well on the radar until only about 16 miles off. The light on Ile de Yeu is listed on different charts as having different characteristics and in fact agreed with that in the Light List. The mainland showed up for some considerable distance but no worthwhile details were identified until well up to "SN1" Buoy (Racon).

The light on "SN2" was seen about the same time as "SN1" and is much brighter. Both buoys were seen on radar at ten miles. As there are many fishing vessels, identification of these buoys in poor visibility would require a great deal of care.

Once in the "tanker channel" proceed to the Pilot Station as indicated on the chart.

NOTE: Remember the standard message to "Surnav France" for a tanker carrying hydrocarbons.

Pilotage: Contact made on Channel 16, working Channel 12. Good communications.

Pilot cutter is a large vessel which will come close alongside and send away a small boat. Pilot ladder 1.0 ft. above the water.

The cutter surprised us by steaming towards us at full speed and we eventually met some 3 miles West of the boarding area.

Vessel may only berth (and unberth) at slack water at Montoir. Being loaded means having to arrive at the top of the tide, although if in ballast one may sail at low slack water. Should any supertankers be moving at that time, presumably having booked their tide first, vessel will not be allowed to sail. The Pilot could not confirm whether incoming ships had priority.

NOTE: Unberthing tugs and Pilot to be booked by 1800 hrs. for the following morning. Vessel charged if unable to meet that particular slack water after ordering.

Three tugs used for berthing and unberthing; tugs lines, 1 forward, 1 aft and 1 pushing amidships. Backsprings sent away first.

When unberthing vessel moves upstream to turn.

Mooring boat to handle ropes.

NOTE: There were a lot of buoys which are not marked on the chart due, no doubt, to extensive dredging operations and spoil ground dumping.

Length of pilotage to first line ashore 1 hour 30 minutes.

Berth: Consists of a small "T" jetty with a line of dolphins standing proud of it by 1.5 m. These extend from just forward of the accommodation to No. 1 tank dome, 150 m. approx.

Mooring arrangements were adequate and the linesmen were reasonably adept.

Shore gangway must be used.

It is necessary to rig the low extension to the liquid manifold as the shore Chicksan has insufficient upreach. Invariably berthing port side alongside.

Storing: Prior to this call the berth operators allowed vessels to take on provisions and foodstuffs but port regulations forbid the loading of machinery items or heavy lifts during discharge.

The derrick only plumbs the after corner of the "T" jetty and all items have to be manhandled from the gate to the derrick hook.

If any items of machinery are to be landed or loaded, it is necessary to do this either before discharge or after completion; the port authorities insist on the Chicksan being disconnected, merely stopping discharge is not sufficient.

Similarly they will not allow a fork lift truck to operate on the berth during pumping operations.

Lube oils were taken at this call and we were able to continue this during discharge, simply because the lines were connected before the Chicksan and the lorry was still parked outside the jetty access.

However, after discharge, protest was made against the very low discharge rate and frequent stoppages; the berth operators were most upset by this and have sworn that NO STORING will be allowed there in future. This situation will obviously have to be checked very thoroughly in the event of having a large storing/lube oil programme. Barges are not allowed alongside during discharge.

Discharge: As already noted the low load/discharge line must be rigged on the port side prior to arrival.

There is no vapour return line. Ship supplied 10 in. reducer.

Storage capacity ashore is about 25,000 tonnes.

On arrival there was only a reported 2,000 tonnes in the shore tanks and they were therefore warm with consequent problems for the initial discharge. Apparently these tanks are loaded from the top, the liquid being allowed to free fall to the bottom. In the first 24 hours the discharge rate was little more than 80 t.p.h. and there was a total of 5 hours 29 minutes stoppages at shore request. We could not discover whether this was usual or if it was due to some uncommon machinery defect.

On boarding, the receivers quoted a maximum rate of no more than 400 t.p.h. and probably no more than 300 t.p.h. In fact, once the shore problems were resolved we rapidly increased to 550 t.p.h. and then up to 800 t.p.h. at times. At all times ship discharged to shore requirements, shore personnel at the Chicksan communicating with the officer of the watch, but only by coming on board. No telephone contact, no walkie-talkie. A telephone was put on board by the Agents.

Port Regulations require ship to maintain continuous VHF watch on Channels 16 and 12.

Receivers originally requested vessel to blow through lines on completion but this was not required.

Overall discharge rate 365 t.p.h.

Surveyor: Redwoods, figures taken on gauging of ship's tanks.

General: Fresh water available from quay, not costly.

Bunkers must come by barge, usual restrictions.

No film exchange possible unless with another vessel. If the depots at out ports have sufficient it may be possible to carry out an exchange if ample warning is given.

Chandler was quite good but closes over the weekend, plenty of warning should be given for unusual items.

Access to St. Nazaire by taxi, about 50 francs.

Papers: 2 Crew Declarations. 2 Stores and Bonded Stores Lists. Port Health Form; their own form, spares supplied. 1 Passenger Declaration, made up on board.

Applied for Radio Pratique but this was not granted prior to arrival.

Agents: Very good, very helpful with good representation on board. Local office in Donges, main office at Nantes.

Ballast: The river water is very dirty indeed, flood only being marginally less so than the ebb. High injection points only should be used.

If at all possible ballasting should only be carried out from about half flood to just beyond HW to minimise the amount of deposits within the ballast tanks. Even then an immediate programme of flushing tanks should be put into effect on clearing the river.

Density varied between 1025 and 1010.

SHIPMASTER'S REPORT: August 1989 (Updated 1994).

Donges. Berth No. 7. *Vessel:* 268,000 tonnes d.w.t.

We arrived at Donges after a part discharge elsewhere with a draft of 11.8 m. The pilots advised us that they take vessels up to 15.0 m. draft, and if conditions and tides permit, up to 16.0 m. draft at Donges. A VLCC of more than 300,000 tonnes d.w.t. has been handled in a lightened condition.

Approaches: The approaches are quite straightforward as the vessel can only be berthed at Donges at slack water.

The vessel anchored in the waiting area until the pilot boarded, which was 2.5 hours before high water at Donges.

Pilotage: The pilot boarded from a small launch from the cutter which comes close alongside in the waiting area. We were instructed to have the anchor aweigh and to provide a good lee. It was not necessary for the vessel to steam to the usual pilot boarding station.

Tugs: 5 tugs were used, they approached the vessel after passing under the bridge.

Moorings: The moorings were as per "plan" (See "Plan" Section), namely 2 head lines, 2 stern lines, 2 breast lines forward and aft and 2 spring lines forward and aft. Ship's lines are sent away first, after which mooring gang boards by the shore gangway to assist the ship's crew to take up the 6 shore wires.

Loading: The berth is equipped with 4 × 16 in. Chicksans for crude oil and 1 × 12 in. Chicksan for bunkers.

Departure: Unberthing is performed at slack water and is normally in daylight for vessels of this size as vessels are berthed port side alongside and have to be swung after unberthing. Slack high water is preferred for unberthing, but for vessels which can achieve a light draft it is sometimes possible to unberth at slack low water.

When we were ready to sail the tugs were not available as they were shifting a new ship at St. Nazaire Shipyard and the Port Authorities would not permit us to depart at night, so we had to wait nearly 24 hours after completion of discharge before sailing. This particular set of circumstances does not occur very often.

Repatriation: Easily undertaken via Nantes Airport which is about one hour by taxi from Donges. The local airport at St. Nazaire is visible from the berth, but was not convenient as there were no weekend flights, also crew members undertaking international flights would have to change at Paris.

Garbage: Garbage disposal can be arranged by the agent, we had a large skip (30 cu.m.) left on the quay during our stay.

Cranes: There is a small hydraulic crane on the jetty which is used for positioning of the shore gangway, it may also be used for loading small quantities of stores and laundry and off-loading of garbage, etc. The driver must be ordered from the Port Authority in advance and there is a charge for this service.

AUTHORITY: Port Autonome de Nantes – St. Nazaire, B.P. 3139, 44031 Nantes Cedex, France. *Telex:* 700425 F. *Contact:* Harbour Office.

Nantes (Upstream): 18 Quay Ernest Renaud, 44000 Nantes. *Tel:* 02.40.44.20.54 (Harbour Master), 02.40.44.20.53. *FAX:* 02.40.44.20.02.

Downstream: 3 bis, Boulevard de Verdun, B.P. 422, 44616 Saint-Nazaire. *Tel:* 02.40.00.45.18 (Harbour Master), 02.40.00.45.20, 02.40.00.45.19. *FAX:* 02.40.00.45.66. *Telex:* 700912 F.

NICE: 43.42 N. 07.17 E. (See Plan)

PORT LIMITS: The Port is situated in the N.E. part of the Baie des Anges (Bay of Angels) between the castle hill and the Boron Mount which form at the Nice Cape a rocky promontory towards the South.

DOCUMENTS: The Master of a vessel, when he arrives, is required to fill out an entry declaration, a copy of which is handed to him by his Agent or by the Port Captaincy.

A Crew List and a List of Passengers intended for the Port Commissariat must be drawn up before arrival at the port.

All documents required by marine regulations, i.e. health declaration, manifest, vessel's safety plan etc., . . . are required by the port services.

PILOTAGE: The Pilot Station operates 24 hours a day and is attended by 2 licensed Pilots. Pilotage is obligatory for vessels of LOA 50 m. and over. Pilotage is exempt for vessels of less than 50 m., and if they are equipped with VHF.

The pilotage area of Nice-Villefranche extends as far as 3 miles from the coast between the meridians of the left bank of the Var (07° 12' E.) and of Cap Ferrat (07° 20' E.). Vessels must, if possible, give warning of their arrival 24 hours in advance, particularly if they intend arriving during night-time hours.

Pilots may be called up by regulation signals during the day and night or by radiotelephone to Grasse Radio or Monaco Radio both stations on VHF Channel, telephone Nice Station (93.55.24.41) or to the Port Captaincy (Tel. 93 89 50 85).

ANCHORAGE: The coast being very rocky, does not allow anchorage close to the port. The Villefranche Roads, on the other hand, offers a sheltered zone, giving very good anchorage facilities. In the Villefranche Roads, 2 buoys can be used with the permission of the Nice Captaincy, by vessels merely calling at the port or waiting for a place on the quay at the Port of Nice. There is access for vessels of all dimensions.

RESTRICTIONS: The transport and handling of dangerous or infected materials, within the limits of the Nice Port, are subjected to the requirements of decree of the 1st February 1951 which controls the transport and handling of dangerous materials in maritime ports. There is no operation in this respect at night.

All operations, prescriptions, order and stipulations as laid down in the general regulations and the local regulation covering "Port Services" are governed by the Port Commandant.

MAX. SIZE: The commercial port is accessible to vessels of 145 m. in length and 7.0 m. draft.

HEALTH: Health control at the frontiers is subject to the measures prescribed by the international health conventions; the functions of health police and health guard are entrusted to an Agent in the service of Health. Urgent medical help can be obtained through the intermediary of the radio stations of Monaco and Grasse who establish contact directly with the department concerned.

VHF: Port Officer is on duty 24 hours a day and listens on Channel 16. Working on Channels 12 and 9.

There are two Channels, i.e. 9 and 12 for communication purposes. No communication of a private nature may be handled.

RADIO: Monaco Radio.

VHF: Port Captain on Channel 16.

RADAR: None.

TUGS: None.

BERTHING: Length of usable quays 1,600 m. having a depth of 5.0 m. – 7.50 m. and 10 berths available.

CRANES: Quai Infernet: 1×5 ton crane on rails (scoop and hook).

Commerce: (Commercial Quay) 2 cranes on rails of 6 tons capacity (scoop and hook).

Commerce: (Commercial Quay) 2 hoppers of 50 cu.m. capacity – on rails. 2 Nellen cranes on tyred wheels, capacity 4.2 tons at the end of the jib and 8 tons at 6 m. (with tackle block), and 1×10 ton capacity Gottwald crane with rubber tyred wheels.

CARGO HANDLING FACILITIES:

Material Handling Equipment: All the handling equipment is supplied by the stevedores. 1 forklift of 4 tons capacity and 11 forklifts between 4 and 8 tons capacity.

Storage Facilities: 45,000 sq. m. of open air areas. Specialised equipment for the discharge of bulk equipment (pyrite, clinker, mineral etc.)

Unloading or loading capacity – cement 1,400 tons per day; various: 400 tons to 700 tons per day and per gang; ores in bulk: 1,200 tons per day with 2 hoppers, 2 cranes and 2 gangs.

Facilities for Specialised Goods: 4 platforms for Ro-Ro traffic. Height of quays 1.23 m. and 3.06 m.

BRIDGES: None.

STEVEDORES: 67 professional dockers; 10 occasional dockers.

Employer – Bureau Central de la Main d'Oeuvre (B.C.M.O.) of the Port of Nice.

MEDICAL: Hospitals are situated in the town and give excellent treatment in the case of accidents or illnesses of any nature whatsoever.

Passengers coming from foreign countries are required to abide by the prescriptions of international agreements (vaccination certificates, health certificates, etc.).

TANKERS: No facilities.

DENSITY: *Salinity:* Varies between 34 gm. and 38 gm. per litre.

FRESH WATER: It is possible to take on fresh water at all quays by connection to the main supply. Average rate of supply 60 t.p.h. – price 9.60 Fr. per ton.

FUEL: All types available by truck.

FIRE PRECAUTIONS: The town provides fire fighting facilities. The fire station is close to the Port.

SURVEYORS: Lloyd's of London, The Coasting Mediterranean Company, The Venturer Company, Weir (S.A.), Societe Azureenne de transports et d'affretements Maritimes, Societe Nationale Maritime Corse, Mediterranee, Pittaluga & Co., Martini & Co., Cie Charles le Borgne, Cie Fabre, Cie Fraissinet, Cie Messageries Maritimes, Nautilus Line, Barry Rogliano et Cie.

REPAIRS: All possible deck and engine repairs can be carried out. There is no dry dock. Hull careening is carried out by underwater procedure.

HATCHES: Hatches are opened and closed by crew.

CUSTOMS ALLOWANCES: 30 cigarettes per person per day; 1 litre of aperitif per 6 persons per day.

REPATRIATION: Airport and railway network in the town.

AIRPORT: International Airport 4 km. from the Port. Principal countries are served by international airlines.

TIME: GMT plus 1 hour (Winter). Summertime kept from April to October.

HOLIDAYS: These are staggered as far as dockers are concerned so that there is continuity of operation.

POLICE/AMBULANCE/FIRE: Police Tel: 17; Ambulance Tel: 18 or 93.92.55.55; Fire Brigade Tel. 18 or 93.86.16.11.

TELEPHONES: Telephones can be installed on board at Papacino Quay, Entrecasteaux Quay, Quai du Commerce, Quai de la Traverse, and Quai Ribotti.

SHORE LEAVE: Crew members may disembark after checking with Police.

IDENTIFICATION CARDS: For foreign seamen a permit to come ashore is issued by the Port Police.

GARBAGE DISPOSAL: Containers and boxes on quay. Daily collection made.

WASTE OIL DISPOSAL: Collection by trucks of 25 tons capacity each. Contact: Sud Est Assainissement, Tel: 93.26.32.19.

SEAMAN'S CLUBS: None.

GENERAL: There is a bus and taxi service very close to the port also there are coastal trading entities within the Port precincts.

AUTHORITY: Capitainerie du Port de Nice, 2 Quai d'Entrecasteaux, B.P 3, 06300 Nice. *Tel:* 93.89.50.85. *Contact:* Captain F. Guivarch, Port Captain.

PARIS: 48.51 N. 02.20 E. (See Plan)

GENERAL: The Port of Paris Authority is responsible for the following ports having maritime trade: Bonnieres, Mantes, Limay, Nanterre, Gennevilliers, Saint-Ouen, Evry and Montereau. They are described in individual entries under "Berthing".

General Description: The Port of Paris facilities are mainly situated on the River Seine, some 230 km. to 480 km. from the sea (English Channel).

The Port Autonome de Paris has under its control 300 port facilities over the 500 km. of navigable waterways of the Greater Paris region (Seine, Oise, Marne, Yonne, Loing). Many of them are attainable by sea-going vessels.

Vessels are generally berthed at the premises of the company receiving or sending goods, these premises being either private or rented from the Port of Paris Authority. Handling is carried out by such companies, using their own staff and materials, materials included in the rented warehouse, or with the assistance of private handling firms. Shipping Agents also perform this function when the sender or receiver is not established at the riverside.

There is 800 ha. of publicly owned riverside land with 30 km. of quays used for storage and distribution.

PORT LIMITS: Within 1 km. of loading or discharging berth or, if occupied by another vessel, where the Pilot will place the vessel in agreement with the consignees.

DOCUMENTS: As Rouen is considered as the frontier port for vessels entering or leaving the Seine above this port (estuary to Rouen is known as "Seine Maritime", Rouen to Paris and beyond as "Seine Fluviale"), documents relating to vessel, crew, passengers, cargo, health, etc., are exactly the same as for Rouen and must be presented to the Agent on arrival in this port or be available to concerned authorities.

PILOTAGE: As for Rouen, except that in spite of Rouen Agents being able to follow the vessel's progress through Rouen Port Information System, Masters should confirm by radiotelephone to Rouen Agents, before entry into Seine, of the final destination, so that "Seine Fluviale" Pilots are waiting to take the vessel from Rouen to inland destination. From Rouen to any place in the Greater Paris Area, pilotage is not compulsory, even if highly recommended for Masters with no experience of the river or under special conditions (floods, fog, etc.).

ANCHORAGE: See "Rouen".

RESTRICTIONS: Depending on place to be reached. Draft 3.5 m. – 2.8 m., airdraft 8.75 m. – 5.25 m., beam 15.5 m. – 11.4 m. Above Rouen, night navigation only possible on request to Rouen Agents.

MAX. SIZE: 120 m. length, 15.5 m. beam, 3.5 m. draft and 8.75 m. airdraft.

Largest vessel handled: 3,124 d.w.t.

HEALTH: See "Rouen".

RADIO/VHF: Contact Rouen Pilot Station as soon as possible. Vessels arriving in Seine Estuary are automatically registered by the Port of Rouen Information Centre, which data is accessible to Agents. Any special messages to inland Agents or Receivers should be made by radiotelephone direct or via Rouen Agents, or by VHF (Channels 16 and 73) to Rouen Agents when in "Seine Maritime". Pilot can always help Masters send these messages via Rouen Port Station (Channel 73). Normal communications to be sent via local coastal radio station (Rouen Radio, Channel 27). In the "Seine Fluviale" all locks have VHF and telephone by which messages can be relayed in case of accident, breakdown or delays. Pilot notifies inland Agents by telephone of such incidents.

RADAR: There is no radar service in the "Seine Fluviale". Bridge piles are equipped with radar reflectors.

TUGS: No offical tug service on "Seine Fluviale", but in case of breakdown, local tugs may be hired.

BERTHING:

Paris/Bonniere Sur Seine: Lat. 49° 02' N., Long. 01° 34' E.
Restrictions: Draft 3.5 m., beam 15.5 m., airdraft 8.75 m.
Private Berths: 1. Silos de Bonnieres, Quai de Seine, 78270 Bonnieres sur Seine. Tel: +33.1.30.93.04.37. Fax: +33.1.47.03.93.07 (Paris Offices). Grain silo with a 26,000 ton total capacity (24 cells).
2. Iton Seine, Quai de Seine, 78270 Bonnieres sur Seine. Tel: +33.1.30.98.20.80. Fax: +33.1.30.93.31.14. Mini steel plant with a 10 ton gantry crane.

Paris/Mantes: Lat. 48° 59' N., Long. 01° 43' E.
Restrictions: Draft 3.5 m., beam 15.5 m., airdraft 8.75 m.

Paris/Evry: Lat. 48° 38' N., Long. 02° 27' E.
Restrictions: Draft 2.8 m., beam 11.4 m., airdraft 6.0 m.
General Description: 5 hectare industrial port zone with a 350 m. quay, including specialised heavy load berth (reinforced area, 530 ton crane at 6 m. from the quay, Ro-Ro ramp).
Authority: Port Autonome de Paris (local office), 22 bis Quai d'Austerlitz, 75013 Paris. Tel: +33.1.44.06.19.00. Fax: +33.1.45.85.10.98.

Paris/Montereau: Lat. 48° 23' N., Long. 02° 56' E.
Restrictions: Draft 2.8 m., beam 11.4 m., airdraft 5.5 m.
General Discription: 15 hectare industrial port zone, presently equipped with 2 wharves, one of them being privately used by a neighbouring mini steel plant.

STEVEDORES: *Working Hours:* Normally 0800 hrs. – 1200 hrs. and 1300 hrs. – 1700 hrs.

MEDICAL: Many hospitals available.

DENSITY: 1000 (River fresh water beyond the first lock).

FRESH WATER: Available at most quays and by barge.

FUEL: One barge delivers fuel.

CONSULS: Nearly all countries represented in Paris.

REPAIRS: *Main Yards:*

Chantiers Navals d'Acheres, La Croix d'Acheres 78260 Acheres. Tel: +33.1.39.11.02.27. Fax: +33.1.39.11.22.92.

Chantiers Navals de la Haute-Seine, rue des Voeux Saint-Georges, 94290 Villeneuve-le-Roi. Tel: +33.1.46.61.43.33. Fax: +33.1.49.61.43.30.

DRY DOCKS: Slips in the yards above. 1×1,100 ton synchrolift in Acheres (73 m.×13 m. platform).

SURVEYORS: Bureau Veritas, Lloyd's, American Bureau of Shipping and Norske Veritas have surveyors in Rouen or Paris.

GANGWAY/DECK WATCHMEN: Not normally considered necessary.

HATCHES: Normally opened by crew.

CUSTOMS ALLOWANCES: Same allocation per man per day as Rouen with allowance made for inland voyage.

AIRPORT: Paris "Charles de Gaulle" and "Orly".

TIME: GMT plus 1 hour (Winter), GMT plus 2 hours (Summer).

HOLIDAYS: Saturdays, Sundays and legal holidays (January 1st; Easter Monday; May 1st; May 8th; Ascension Thursday; Whit Monday; July 14th; Assumption Day; November 1st and 11th; Christmas Day).

TELEPHONES: Not available, but telephone always within short distance of quays.
SERVICES: Compass adjusting may be arranged by Rouen on outward trip.
SHORE LEAVE: Seamen's Book sufficient.
GARBAGE DISPOSAL: Various solutions available ranging from municipal collection system to private contractors. Ship's agent should be able to give details.
WASTE OIL DISPOSAL: The following are approved engine waste oil stations :

Station Rolleboise, kilometre mark 119.0 (Left Bank), 78270 Rolleboise. Tel: +33.1.30.93.21.47.

Station Fluviale Mobil, kilometre mark 70.8 (Left Bank), 78700 Conflans-Ste-Honorine. Tel: +33.1.39.72.65.75.

Firemen's Wharf, Port of Gennevilliers. Tel: +33.1.47.94.47.53.

CURRENCY: French Franc (FFr.). U.S.$1.00 = 5.02 (7.8.96).
AUTHORITY: Port Autonome de Paris, 2 Quai de Grenelle, 75732 Paris Cedex 15. *Tel:* +33.1.40.58.28.70. *Telex:* 204487 Poronom. *FAX:* +33.1.40.58.29.48. *Contact:* Bernard Chenevez, General Manager. Remi Loth, Head of Maritime Operations.

PORT-VENDRES: 42.31 N. 03.07 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
5 Passenger Lists.
2 Store Lists.
1 Maritime Health Declaration.
4 Cargo Manifests.
2 Bills of Lading.
Ship's Papers: Nationality Act, International Tonnage Certificate.

PILOTAGE: Pilotage is compulsory for all vessels over 45 m. LOA. Request for pilot should be sent with ETA 18 hours prior to arrival by telex or cable via Marseille Radio.

Pilot boards 1.0 miles North of Mole Abri.

Pilots: Pilot Station – Port La Nouvelle/Port Vendres, 152 Avenue
de la Mer, 11210 Port La Nouvelle.
Tel: 68 48 01 81 or 68 82 00 75.
Fax: 68 48 25 40.
Telex: 505588.
Cables: PILONOV.
VHF: Channel 12.

MAX. SIZE: Max. length 150 m. max. draft 8.0 m.
HEALTH: Usually Customs give Free Pratique. In event of suspected disease or fever on board must advise naval doctor.
RADIO: Marseille Radio (or St. Lys Radio) or Perpignan Radio.
TUGS: 2×200 h.p. launches assist with mooring.
CRANES: 1 shore crane available only of 55 tons.
SPECIALISED CARGO-HANDLING FACILITIES: 2 Roll-on/Roll-off berths, 1 refrigerated warehouse 11,000 cu.m., and 1 warehouse of 1,200 sq.m. with temperatures regulated at 10° centigrade.
STEVEDORES: ETA to be given to Agent in order to arrange gangs (usual rate per day. 8 normal working hours). 200 tonnes per gang.
MEDICAL: Perpignan Hospital (30 km. away).
TANKERS: Berth for wine tankers with pipeline.
DENSITY: Salt water.
FRESH WATER: Supplied by Chambre de Commerce, Port-Vendres.
FUEL: For small craft only, otherwise delivery by trucks.
REPAIRS: Minor repairs only.
DRY DOCK: 1 travelift for craft up to 150 tons.
SURVEYORS: Available from Sete or Marseilles.
OPENING/CLOSING HATCHES: Normally to be carried out by crew (or as per charter party if any).
CARGO GEAR: Load/discharge effected by ship's gear.
GANGWAY/DECK WATCHMEN: Recommended if loading dangerous cargo.
CERTIFICATES:
Load Line Certificate.
International Tonnage Certificate.
Derat Certificate.
CUSTOMS ALLOWANCES: See "Calais".
AIRPORT: Perpignan Rivesaltes (30 km.)
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: As for whole France – cargo work can be arranged on those days as overtime.
POLICE/AMBULANCE/FIRE: Tel. 17 or 68.82.00.60 or five long blasts. Officier du Port: 68.82.12.00.
EMERGENCY CO-ORDINATION CENTRE: Crossmed Toulon.
SERVICES: Workshop for small repairs, radio/radar repairs available, ship chandler for bonded stores, laundry.
STORING: Vessels can be stored by truck only, which are able to proceed alongside the berth. Fork lift trucks available. Customs Regulations in force.
SHORE LEAVE: Crew members are allowed ashore.
IDENTIFICATION CARDS: Only Seaman's Book required.
AUTHORITY: Service Maritime-Capitainerie du Port, 66660 Port Vendres. *Tel:* 68.82.12.00.

PROPRIANO: Corsica, 41.40 N. 08.54 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Provisions List.
1 Cargo List.
1 List of Articles (new and Customs-barred) in possession each crew member – cameras, binoculars, radios, cigarettes, spirits, etc.
1 Health Declaration.

PILOTAGE: Not compulsory.
ANCHORAGE: Outside port for cruise vessels.
MAX. SIZE: Draft 5 m.; length 160 m. (Ferry Berth).
RADIO: Within 50 miles call Ajaccio Radio VHF Channel 16. Then connected over Channel 23 to telephone network.
TUGS: None available.
BERTHING: 3 basins, depths 4.0 m., 6.0 m. and 3.7 m. New Marina with 370 berths. Facilities include fresh water, electricity, telephone. Crane (12 tonne) available for lifting pleasure craft. Engine repairs also possible.
STEVEDORES: 24 hours accurate ETA necessary for ordering gangs. No work on Sundays and official holidays.
CARGO GEAR: Only a few nets and slings available; all other gear must be supplied by ship. Ship's derricks used.
FRESH WATER: Available at very slow pumping rate.
FUEL: Available. Tel: 95.76.12.37.
REPAIRS/CONSULS: None.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
AIRPORT: Propriano Tavaria 6 km. Direct flights to Marseilles, Nice and Lyons in Summer. Daily connections Airport Campo del Oro/Ajaccio.
POLICE/AMBULANCE/FIRE: Tel. Gendarmerie Propriano 95.76.00.17.
AUTHORITY: Administration du Port de Propriano, Quai St. Erasme, Propriano. *Tel:* 95.76.10.40. *Contact:* Captain A. Duval, Port Captain.

QUIMPER: 47.58 N. 04.07 W. (See Plan)

LOCATION: Quimper Port is located 80 km. South of Brest, on the River Odet, downstream from the town of Quimper, 16 km. from the sea.
DOCUMENTS:
Crew List.
Passenger List.
Customs Documents.
Port Health Documents.
Manifest of Cargo.
Stores on Board.
Ship's Papers.

PILOTAGE: *Pilot Station – Notice of Arrival:* Pilotage for the ports of Loctudy and Odet, as well as Concarneau, is provided by the Brest Station which despatches a Pilot to Concarneau, where there is a permanent office and a pilot boat. Tel: 98.50.89.03.

The request for a Pilot must be received at least 18 hours in advance and should state, in addition to the vessel characteristics, the preferred time and place of embarkation.

Pilotage Areas and Requirements: Pilotage is compulsory for vessels over 50 m. LOA and all vessels carrying oil, gas or hazardous substances in the so-called "Concarneau-Odet" pilotage area which extends:

to the North of the parallel of the "Jument de Glenan Buoy", to the South of the Glenan Islands;
to the West of the alignmen at 013.7° of the sea marks of the Point de Raguenes and Ile Verte;
and to the East of the meridian of the Men ar Groas (Lesconil) Lighthouse.

Pilotage is also compulsory for sand carriers with a net tonnage of 100 tons in the area limited to the East by the line joining Beg-Meil to Ile aux Moutons and to the South by that joining this island to the Men ar Groas (Lesconil) Lighthouse.

Vessels, for which pilotage is not compulsory but which require the assistance of a Pilot, can take the Pilot onboard halfway between Ile aux Moutons and Beg-Meil. Those vessels which do not have a plan are advised to come close to the East cardinal light-buoy, "Karek Greiz", located 1.9 miles S.S.E. of Lesconil, where the Pilot embarks in fair weather.

APPROACHES: *Channels and Fairways:* Charts No. 7146 and 7313.

To gain access to Odet or the River Pont-l'Abbe, coming from West of the Glenan Islands, vessel either uses the Benodet Channel, or pass South or North of Ile aux Moutons to rejoin the Fairway from the East.

ANCHORAGE: Depths of 11 m. in position with the Taro Tower, bearing 245°; distance 0.8 miles.

Depths of 6 m. in position with the Point of Combrit bearing 000°; distance 0.5 miles.

Depth of 9 m., bottom sand and mud, in Du Trez Anchorage at the mouth of the Odet.

RESTRICTIONS: Vessels arriving at night must anchor outside the port entrance. It is dangerous to enter the river at night as there are no lights, and the channel is restricted by yachts at anchor.
MAX. SIZE: At spring tides: length 80 m.; breadth 12 m.; draft 5.3 m. At neap tides: length 80 m.; breadth 12 m.; draft 3.40 m.
RADIO: The Port Superintendent requires 24 hours notice of arrival.
TUGS: No tugs available.
BERTHING: At one quay there is 226 m. length for coasters. One quay of 120 m. length for discharging sand. No quay cranes, but cranes are available for hire.
MEDICAL: Hospitals nearby.
TANKERS: No facilities.

FRESH WATER: 5 drinking-water hydrants situated on the quay, loading rate 12 t.p.h.
FUEL: Can be supplied by various companies from tanker lorries.
AIRPORT: Airport of Pluguffan situated 4 km. from the port. 2 regular daily flights to Paris.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: French Franc.
AUTHORITY: Conseil General, Service Departmentale Maritime Sud, 23 Quai Pors Moro, B.P. 124, 29120 Pont L'Abbe, France. *Tel:* 98.82.84.00. *FAX:* 98.82.84.29. *Contact:* Jean Baptiste Huet, Commandant du Port.

ROCHEFORT SUR MER: 45.56 N. 00.57 W. (See Plan)

For all general information refer to Tonnay-Charente.
MAX. SIZE: Max. permissible length: 116 m; breadth: 16.5 m. (ships must pass through a lock of 18 m. width).
Max. draft is 5.6 m. at Neap tides, 6.3 m. at Spring tides.
Max. Size using Lock: LOA 100 m. Beam 16.5 m. Vessels enter 3 hours before to 3 hours after HW.
BERTHING: Lock Quay: Open storage area 1,900 sq.m.
South Quay: 2 berths, length 100 m. and 250 m. Public storage 4,200 sq.m. and private storage 9,200 sq.m.
West Quay: 2 berths, length 110 m. each. Public open storage 7,900 sq.m.
Bachelar Quay: 2 berths, 110 m. each. Public open storage 2,500 sq.m., private warehouse 4,000 sq.m. and public warehouse 2,900 sq.m.
CRANES: 1×5 ton electric crane on rails, 2×5 ton mobile cranes and 2×10 ton mobile cranes.
POLICE/AMBULANCE/FIRE: Police 17; Ambulance 46.87.10.33.
GARBAGE DISPOSAL: Possible. Consult agent.
WASTE OIL DISPOSAL: Possible. Consult agent.
SEAMAN'S CLUBS: Available at La Rochelle, 30 km.
CURRENCY: French Franc (FFr).
AUTHORITY: Direction de l'Amenagement du Department de la Charante-Maritime B.P. 125, Avenue William Ponty, 17306 Rochefort-Sur-Mer Cedex. *Tel:* 46.99.44.93. *FAX:* 46.99.44.93. *Contact:* M. Verbieze, Harbour Master.
Chambre de Commerce et d'Industrie de Rochefort, Corderie Royale, 17306 Rochefort, France. *Tel:* 46.87.34.56. *Telex:* 791 171 F. *FAX:* 46.99.13.28.

ROSCOFF: 48.43 N. 03.59 W. (See Plan)

PILOTAGE: Send ETA at least 24 hours in advance. Pilot and Harbour Master listen on VHF Channel 16, 0700 – 1100 hrs., 1300 – 2200 hrs. Pilotage compulsory for vessels over 150 n.r.t.
Pilot boards 0.5 miles East of Astan Buoy.
ANCHORAGE: Anchorage and laying-by can be carried out in an area sheltered from S.E. and N.W. winds, bounded on the East by the "Basse Bloscon" and on the West by the "Menk" and "Duons" Reefs.
MAX. SIZE: 5,000 d.w.t.
VHF: Pilot and tugs on VHF Channel 16 throughout 24 hours.
Signal Station on the Isle of Batz: Tel: 98.61.76.06 or VHF Channels 12 and 16.
Signal Station at Brignogan: Tel: 98.83.50.84 or VHF Channel 16.
Signal Station at Ploumanach: Tel: 98.23.21.50 or VHF Channel 16.
BERTHING: Safely accessible pier 240 m. long with 7 m. of water at lowest tides.
Quay 90 m. long with 3.5 m. of water at lowest tides.
Quay 120 m. long with 5.0 m. of water at lowest tides.
Storage warehouses (1,200 sq.m.).
Weighbridge (50 tonnes).
20 acres of parking facilities and other space.
Cranes available on request.
Electric power supply on all quays.
With strong N.E. winds, conditions in the harbour can be uncomfortable.
Minimum depths as per "Plan". Range of tide 9.6 m. maximum.
Cargoes Handled: Car Ferries – Inward: Fish and shellfish, milk, china clay, meat and cattle, steel, machine parts, paper, etc.
Car Ferries – Outward: Vegetables, fruit, meat, paper, machine parts, plastics, ship's stores, etc.
Freighters – Inward: Sand and marine aggregates, ammonia sulphate, fertilisers, seed potatoes, shellfish, etc.
Freighters – Outward: China clay, scrap iron.
CRANES: Mobile cranes of 25 tonnes and 72 tonnes.
FRESH WATER: Piped on to quays.
FUEL: By road tanker.
AIRPORT: Airport at Morlaix, 13 miles away. Airport at Brest, 35 miles away, flights to London and Paris.
TELEPHONES: Payphones available at the Ro/Ro terminal.
GARBAGE DISPOSAL: Galley rubbish is collected in dustbins on the quay or taken away directly by the Harbour Authority compacting skip, depending on the amount. This service is free of charge. Industrial rubbish must be collected in a special skip for which there is a charge of 700 FrF/ton. Contact the Harbour Master for details in all cases.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: French Franc (FFr.).
There is an automatic currency changing machine in the ferry terminal.
SERVICES: Laundry available at Roscoff.
Chandler at Brest. The Agent can arrange for small quantities to be delivered from the hypermarket at St. Pol de Leon, 2 miles.
GENERAL: Customs are based at the Ro/Ro terminal.
Daily car ferry service to Plymouth, weekly to Cork and to Rosslare (June to September). Local train service.
AUTHORITY: Chambre de Commerce et d'Industrie de Morlaix, B.P. 43, Port de Bloscon, 29682 Roscoff, France. *Tel:* 98.62.39.39. *Telex:* 940696. *FAX:* 98.62.39.50. *Contact:* Jean-Pierre Addes, Port Manager. Roscoff Port Office. Tel: 98.61.27.85. Fax: 98.61.18.16.
Roscoff Harbour Master. *Tel:* 98.61.27.84. *FAX:* 98.61.11.81. *VHF:* Channels 16 and 12. *Contact:* Jean-Pierre Croguennec.

ROUEN: 49.28 N. 01.04 E. (See Plan)

DOCUMENTS:
Cargo Manifest or Manifest of Ballast.
Certificate of Cargo Space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.
Certificate of Insurance for Oil Pollution Damages (tankers over 2,000 tons).
PILOTAGE: Vessels proceeding to the ports of Rouen and Honfleur are met by Pilot on La Carosse Roads (Rade de La Carosse). Pilotage is compulsory between the mouth of the Seine and Rouen. Vessels of 55 m. length and less can be exempt from the obligation for the lower sector of the river, and vessels of 45 m. and less for the upper sector, on condition that such vessels be equipped with suitable radar, with VHF sets and able to speak French, and that they are not carrying dangerous goods. Each vessel taking a Pilot for the downriver stage between La Carosse Roads and Caudebec, or vice-versa, and a Pilot for the upriver stage between Caudebec and Rouen, or vice-versa.
The following signals should be made for summoning a Pilot on La Carosse Roads: By Day: flag "G" of the International Code of Signals. By Night: in morse by signalling lamp. Failing this, the vessel should hoist her national ensign at the foremasthead.
The following additional signal can be made: 5 prolonged blasts (– – – – –) to call attention to Pilot.
The radio station "Rouen-Pilot", located in the radar tower at Honfleur keeps a permanent watch day and night on VHF Channels 16 and 73. Masters are requested to call this station when arriving on the Roads.
Vessels leaving harbour or shifting berth should apply for a Pilot to the Pilotage Office, 21 Avenue du Mont-Riboudet, Rouen (Tel: 32.10.24.01).
Helmsman: Masters and Owners are advised that temporary crew members including helmsmen for the river are available from the Boatmen Association of Rouen. In the case of an incoming ship, they should be requested by cable to Harbour Master at least 6 hours before arrival in roads.
ANCHORAGE: In the outer roads at La Carosse.
One waiting berth on buoys at Villequier and one on dolphins at Vatteville, for vessels going down the river and awaiting the tide.
RESTRICTIONS: The height of water above chart datum at Le Havre is broadcast by Honfleur VHF radar station on request.
MAX. SIZE: Vessels over 280 m. length have entered. Draft approximately 3.5 m. more than height of tide at Le Havre. Maximum about 37 ft. Port accessible to vessels of 40,000 d.w.t. fully laden and 110,000 d.w.t. partly laden.
HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique, Master should radio Agent before arrival, advising full details.
RADIO/VHF: Vessels are obliged to give their ETA and draft in salt water at least 5 hours before arrival to Rouen Information Centre via Brest – Le Conquet Radio or Boulogne Radio. The Port of Rouen Authority has introduced a VHF network of frequency modulation for port needs working on the following frequencies: Channel 16 (156.800 MHz); international safety and watch frequency. A permanent watch is maintained on this frequency at the Information Centre of the Port of Rouen. All vessels entering the 22 mile circle centered on La Heve Lighthouse must contact "Baie de Seine Trafic" on Channel 22.
Channel 73 (156.675 MHz) compulsory frequency to be used by all ships, boats, ferries . . . in movement between the pilot boat station and Rouen. Call on Channel 73 in case of fire, injury, sickness, etc. (24 hours).
Channel 68 (156.425 MHz) upper part of river, Channel 15 (156.750 MHz) down part of river, secondary working frequencies.
Special Process for Tankers and Vessels Carrying Dangerous Goods in Bulk: For oil tankers it is compulsory, before entering the 12 miles limit, to have a VHF contact with Rouen-Pilot or with Rouen-Port, and to keep permanent VHF watch till the ship is back out of this limit.

Tankers over 250 m. length or 12 m. draft must wait for Pilot 7 miles from shore, others can come to La Carosse Roads, passing half mile South of Buoy LHA and remaining always South of a line marked by the buoys LHA and RN.

They have obligation to announce every fault in engines, anchors or windlass, steering gear, radar, mooring gear, and their Masters must sign an inquiry paper given by the Pilot when coming on board.

PORT RADAR: Two radar stations are located respectively at the East of Honfleur and on the right bank of the river 12 miles upstream at Radicatel.

Both stations are operated from Honfleur and work as navigational aids between the first buoys of the channel and Aizier, from 2 hours after until 8 hours after low water Le Havre.

To obtain information call on VHF Channel 16 (156.800 MHz) or 73 (156.675 MHz).

Information given by this radar, at ship's option, is considered as an aid only and implies no responsibility either to the Port Authority or its Agents in any subsequent recourse to such information, which is given free of charge.

TUGS: Permanently available in the Port of Rouen. Tug assistance in the River Seine is available on request.

MOORING: See "Notice".

BERTHING: The main Maritime Port of Rouen extends from the Guillaume le Conquerant Bridge as far as La Bouille over a distance of 11 miles. Quays and wharves cover the length of both banks of the Seine. There are also 5 basins in direct connection with the river without the interposition of any locks.

On the Right Bank: St-Gervais Docks; on the Left Bank: the Timber Dock, the Rouen-Quevilly Dock, the Floating Docks tidal basin, and the "Bassin aux Hydrocarbures" at Petit-Couronne.

The extent of quayage in the Maritime Port is about 38,000 ft., and in the river docks 5,900 ft.

Between the downstream limits of the Port of Rouen and the sea are a number of maritime establishments serving local requirements. The most important of these, all of them managed by the Port Authority of Rouen, being the petroleum terminal at Port Jerome and the quays of St. Wandrille (2,000 ft.) and Radicatel (1,380 ft.).

Containers: 2 berths at the Quai de l'Ouest (St.-Gervais Dock) with 1×25 ton crane.

2 berths at Grand Couronne Moulineaux with 2×35 ton gantry cranes.

One private berth at Radicatel Quay with a gantry crane.

Roll-on/Roll-off: 4 berths in service of which 2 Roll-on/Roll-off berths at Petit Couronne and Quai de Rouen – Quevilly able to load or unload rolling heavy lifts up to 400 tons (max. draft: 10 m.)

Dock	*Quay*	*Facilities*	*Length (m.)*	*Depth at low water (m.)*
Seine	Rive Droite Amont (RDA)	Waiting berth	2,636	6.3/9.0
St.-Gervais	Quai de L'Ouest (QW)	4 cranes 8 t 2 cranes 25 t – 1 crane 35 t	411	9.0/9.5
Seine Rive Droite (Aval)	Silo Skalli	1 unloading machine for hard corn 150 t/h. Grain shed capacity 32,000 t.		7.3
	Silo Levy	1 loading machine for grain in bulk 500 t/h. Grain shed capacity 30,000 t.		10.0
	Silo Soufflet	1 loading machine for grain in bulk 600 t/h. Grain shed capacity 170,000 t.		10.0
	Poste 13	Waiting berth max. length 190 m.		9.0
	Poste 15	Waiting berth max. length 280 m.		10.5
	Poste 19	Caustic soda max. length 110 m.		7.0
	Silo Lecureur	1 loading machine for grain in bulk 1,000 t/h. Grain shed capacity 120,000 t.		9.5
	Poste 23	Waiting berth max. length 120 m.		6.5
	Poste 25 (CPA)	Pipelines, vegetable oils, molasses. 79,000 cu.m. specialised tanks.		6.5
	Poste 27 (CPA)	Same use as Poste 25.		8.2
Seine	Rive Gauche	Cruise vessel berth.	582	7.5/9.0
	Amont	Waiting berth.	568	
	(RGA)	Open storage – Coal.	200	9.8
Bassin aux Bois	(Q.B.B.)	5 cranes 7.5 t; 1 crane 8 t 1 crane 25 t. 2 special gantries for loading bags.	723	6.0
		Sugar (Storage capacity 60,000 t).		9.3
Quai de la Presqu'Ile Elie	(Elie)	Cranes for grain in bulk. 2 cranes 1,200 t.p.h. 2 cranes 800 t.p.h. 1 crane 600 t.p.h. Grain shed capacity 250,000 t.	800	9.0/10.0
Bassin de Rouen-Quevilly	(Q.R.Q.) Rive Nord	6 berths with unloading grain 150 t.p.h. 2 Ro-Ro ramps capacity 400 t.	1,610	10.5
	Rive Sud	Specialised newsprint. Specialised forest products. 4 cranes 8 t – 2 cranes 7.5 t. 1 Ro-Ro ramp capacity 200 t.		
Seine Rive Gauche (Aval)	Maprochim Appontement (MPCA)	Phosphoric acid – Capacity 6,500 cu.m.		7.0
Seine Rive Gauche (Aval)	Maprochim Quay (MPC)	2 gantry cranes 7 t (phosphates). 1 gantry crane 10 t. 1 pipeline sulphur.	220	9.5
	CPA 1	Phosphoric acid.		6.0
	Charvet	1 gantry crane 120 t.p.h. Domestic coal.		5.3
	AGQ	Specialised liquified ammonia gas.		9.5
	CPA 2	Pipeline refined oil.		8.8
	CPA Quay	Refined oil, phosphoric acid, chemical products.	320	10.5
	CPA 3	Crude oil – gasoline (CPA storage capacity 563,000 cu.m.).		9.3
	Simarex	2 loading machines for grain 400 t.p.h. Grain shed capacity 180,000 t.		9.5
	Poste 14	Waiting berth.		7.0
	Quai de Petit-Couronne (QPC)	2 cranes 6 t – 3 cranes 35 t. 1 crane 25 t. Specialised flour. 1 ramp for Ro-Ro of 400 t.	625	9.0
Jupiter	BJ 1	Refined products.		8.0
	BJ 2	Refined products.		8.0
	BJ 3	Gas pipeline (Shell)		9.0
	NAJ	Refined products.		11.0
	PAJ	Refined products.		8.0
	Quai de la Papeterie (QPAP)	6 cranes 7.5 t. Fertiliser and wood.	390	8.5
	Quai Sogema (SGMA)	2 cranes 10 t at 48 m. 1 crane 15 t at 42 m. 2 cranes 8 t at 30 m. Specialised: Coal, all bulk and bags.	370	8.2/10.7
	Quai Carue (Caru)	2 cranes 25 t. Specialised: Solid bulk.	400	11.0
	Silo MRM	3 loading machines for grain 3×1,000 t.p.h. Grain shed capacity 385,000 t.		11.0
	Appontement Comexol (GCVL)	Oilseeds capacity 50,000 t.		9.5
	Quai de Grand-Couronne/ Moulineaux (QGCM)	2 gantry cranes 30 t. 1 crane 25 t. 2 cranes 8 t – 2 cranes 5 t. Specialised: Containers and general.	800	11.0
	Terminal Conteneurs et Marchandises Diverses (TCMD).	1 crane on tyres 40 t. 100 t for heavy lift.		
	Poste de Moulineaux Attente (MLXA)	Waiting berth.		11.0
Quai St.-Wandrill	(QSTW)	1 crane 8 t – Waiting berth. Specialised: Coils (SLD).	645	9.5
Quai de Radicatel	(RADI)	1 gantry crane for containers (Bell Lines). Waiting berth.	420	10.0
Quais de Honfleur	QSH 1	2 cranes 30 t.	122	9.0
	QSH 2	2 cranes 7.5 t.	122	9.0
	Miroline (Miro)	All refined oil – Chemical products and fertiliser. Storage capacity 480,000 cu.m.		9.0

STEVEDORES: From Monday to Friday 24 hours working. 0600 hrs. – 2200 hrs. (normal tariff) and 2200 hrs. – 0600 hrs. (overtime rates).

Saturday at overtime rates.

No work 1st May, 25th December and 1st January.

MEDICAL: All facilities available. Vaccination Certificates required if vessels coming from a North African port. Yellow fever inoculations required if vessel coming from South of parallel 30° N.

TANKERS: Petit Couronne, Shell, 5 berths. One berth for vessels up to 250 m. length and 11 m. draft. CPA, 4 berths for refined oil (one with 11.0 m. draft.)

Port Jerome, Esso and Mobil Oil, 2 berths for vessels up to 11 m. draft (7 berths total).

Honfleur, Miroline – 1 berth.

Deballasting facilities available at all berths (Except CPA 3).

Report: 1982.

Petit Couronne (Butane/Propane): Max. LOA 170 m. Bollards 40 m. downstream from loading arm and 30 m. upstream from loading arm. Vessels berth with bow to seaward. Max. draft 28 ft. (8.5 m.). Height of manifold above waterline 10.0 m. Max. distance between edge and manifold of ship 4.9 m. There is no special connection for the gas phase. Diameter of discharge arm 6 in. (300 ASA).

Report: 1985.

Port Approaches: Tankers carrying dangerous cargo, when approaching River Seine Ports need to be aware of the heavy traffic. When sailing inside the French Territorial Waters, these vessels have to follow special French Regulations as mentioned in Sailing Directions. For example, navigation is forbidden inside a 7 mile limit off the French coast without Pilot, except for anchoring in emergency or in some dedicated places; no crossing of Antifer, Le Havre entrance channels permitted within this 7 mile limit or during a VLCCs transit, etc.

In-Port: The Port Jerome berths' main short-comings are: The strong tide currents and the passing ships' effect when berthing/unberthing. VHF contact with Pilots of passing ships are very important as these can disturb the manoeuvre.

When berthed, moorings have to be strictly and frequently checked; they must be maintained tight as passing ships' effect is very significant, especially at LW. See "Notice" – "Special Regulation for tankers in Port Jerome".

Tidal Entry: The "River Seine Pilotage" issues a monthly recommended maximum draft for each HW for vessels proceeding to and sailing from River Seine ports.

Water heights may be influenced by atmospheric (winds) and Hydrologic perturbations (flow of the river).

Ships have to use the tide to enter the river taking into account ship's draft, tidal currents and the possibility to moor the tanker at Port Jerome starboard side to during the last hour of flood stream. Tide also to be used when leaving Port Jerome berths.

Vessels may proceed by day or night.

In consideration of all above conditions, Pilot will advise any modification of the permissible draft taking into account a 2 ft. underkeel clearance.

Also see "Notices".

DENSITY: Except at Honfleur, all berths are in fresh water.

FUEL: All grades available by barge.

CONSULS: The following countries are represented in Rouen: Algeria, Belgium, Denmark, Finland, Germany, Greece, Ireland, Italy, Ivory Coast, Korea, Morocco, Netherlands, Norway, Poland, Portugal, Russia, Senegal, Spain, Sweden, Turkey and U.K.

REPAIRS: All deck, engine and radio repairs can be effected.

DRY DOCKS: One floating dock, length 180 m., 25 m. wide for vessels up to 14,000 tons.

SURVEYORS: Bureau Veritas, Lloyd's Register, Registro Italiano, Det Norske Veritas, A.B.S. and Germanischer Lloyd.

WATCHMEN: Recommended to employ watchmen on board tankers and vessels handling dangerous cargo.

HATCHES: Opening/closing hatches always performed by ship's crew.

AIRPORT: Nearest Rouen-Boos. Le Havre – Octeville, 80 km. away. Paris – Orly or Paris – Roissy, 120 km. away.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Spring and Summer.

HOLIDAYS: No labour available on the following days; New Year (1st January); Easter Monday; Labour Day (1st May); 8th May; Ascension Day; Whit Monday; National Day (14th July); Assumption Day (15th August); All Saints' Day (1st November); Armistice Day (11th November); Christmas Day (25th December).

POLICE/FIRE/AMBULANCE: Police 17; Fire 18; Ambulance 15 or by VHF via Rouen-Port on Channel 73 (24 hours). Tel. 35.52.54.00.

TELEPHONES: Can be connected on board at some berths.

IDENTIFICATION CARDS: Crewmen going ashore should carry passport or identity card.

GARBAGE DISPOSAL: It is compulsory for all ships to send their domestic waste ashore in plastic bags supplied by agents. Full sealed bags should be placed at the special places which are marked with a "Garbage" sign.

WASTE OIL DISPOSAL: If vessel is alongside the tanker berth, hydrocarbon slops can be transferred to shore tank.

Chemical waste and slops from vessels at other berths in the port are discharged into road tankers. For road tanker service contact Ortec Environnement. (Tel: 35.72.25.22 or Telex 180973 or Fax: 35.72.12.83) or VIAM (Tel: 35.73.76.06 or Telex 771359).

SEAMAN'S CLUBS: International Seaman's Centre, 16 Rue Duguay Trouin, 76000 Rouen. Tel: 35.70.02.94. Facilities: Shop, international telephone, church services, postage facilities, money change, billiards, T.V. and bar.

CURRENCY: French Franc. U.S.$1.00 = 5.80 Francs (March 1994).

SHIP SUPPLY SERVICE: In case of emergency (sick crew members, exceptionally urgent stores) a liaison can be established by launch with a ship when passing off Port-Jerome or off Caudebec.

NOTICES:

Rules concerning the employment of tugs at Port-Jerome's ESSO S.A.F. Terminal as from 1st June 1992:

The rules apply, in normal manoeuvering, hydrological, meteorological and technical conditions in the area between the beacon downriver at Quillebeuf and the beacon upriver at Saint Leonard.

These rules are a minimum to be respected. They do not exempt the Master from all additional measures in order to insure the safety of the operations.

The tug expenses are for owner's account.

1. Rules for the LPG-Carriers (berthing and unberthing):
1.1. LOA under 80 m. with or without a bow thruster: No tugs.
1.2. LOA from 80 m. to 100 m.
    1.2.1. With bow thruster: No tugs.
    1.2.2. Without bow thruster: 1 tug.
1.3. LOA over 100 m. with or without bow thruster: 1 tug.
2. Rules for vessels other than LPG-Carriers:
2.1. LOA under 100 m. with or without bow thruster: No tugs required for berthing and unberthing.
2.2. LOA from 100 m. to 150 m.
    2.2.1. With bow thruster: No tug for berthing and unberthing.
    2.2.2. Without bow thruster: 1 tug for berthing and no tug for unberthing.
2.3. LOA from 150 m. to 165 m.
    2.3.1. With bow thruster: 1 tug for berthing and no tug for unberthing.
    2.3.2. Without bow thruster: 1 tug for berthing and 1 tug for unberthing.
2.4. LOA over 165 m. (Maximum 200 m.).
    2.4.1. With bow thruster: 1 tug for berthing and 1 tug for unberthing.
    2.4.2. Without bow thruster: 2 tugs for berthing and 1 tug for unberthing.
    2.4.3. With bow thruster and aft thruster: 1 tug for berthing, no tug for unberthing.

Note: Advance notice of 5 hours is compulsory if additional tugs are required.

Special Regulations for Tankers at Port Jerome (Esso S.A.F. Terminal):

Mooring: Due to weather / tide conditions and river traffic it is compulsory for each ship to provide moorings as follows:

L.O.A less 100 m.	2 head and 2 stern lines. 2 breast lines, fore and aft. 2 spring lines, fore and aft.
L.O.A. Between 100 m. and 160 m.	3 head and 3 stern lines. 2 breast lines, fore and aft. 2 spring lines, fore and aft.
L.O.A. Between 160 m. and 210 m.	3 head and 3 stern lines. 3 breast lines, fore and aft. 2 spring lines, fore and aft.

Lines having same purpose must be of same material.

All lines must be in good condition and kept tight at all times.

To avoid slipping of lines remaining on drum, winches must be on brakes, out of gear and never in automatic function.

Starboard side alongside is compulsory for ships of more than 110 m. length. Ships less than 110 m. length can be berthed port or starboard side alongside.

Ship/Shore Access: Ship's gangway is compulsory but shore gangway can be used under ship's watch and Master's responsibility.

Arm connection: Manifold to be ready for arm connection on arrival (one arm per product).

No adapter available on terminal.

Shore Flanges:

Berth 3:

Gas Liquid	6 in., Serial 300 ANSI Standard.
Gas Return	4 in., Serial 150 ANSI Standard.
Petroleum Products	12 in., Serial 150 ANSI Standard.
Bunkering IF 380	6 in., Serial 150 ANSI Standard.
Bunkering LDO	6 in., Serial 150 ANSI Standard.

Berth 2 (Upstream and downstream):

Petroleum Products	: 6 in., Serial 150 ANSI Standard.
Bunkering LDO	: Self Service-Flexible Hose: 10 cu.m/hr.

Berth 1 (Downstream):

Petroleum Products	: 6 in., Serial 150 ANSI Standard.
Gas Liquid	: 6 in., Serial 300 ANSI Standard.
Gas Return	: 2 in., Serial 300 ANSI Standard.
Bunkering LDO	: Self Service-Flexible Hose: 10 cu.m/hr.

Berth 1 (Upstream):

Petroleum Products	: 6 in., Serial 150 ANSI Standard.
Gas Liquid	: 6 in., Serial 300 ANSI Standard.
Gas Return	: 6 in., Serial 300 ANSI Standard.

If mooring regulations (above), which were agreed by Port of Rouen Authority, are not complied with, arms will not be connected and ship's operations will be delayed or stopped and expenses will be to ship's account until Port Jerome Regulations are complied with.

Notice to Masters:

General Instructions: Masters shall in all circumstances comply with Port Officer's orders either verbal, written, or given through the medium of Pilots and especially the orders regarding manoeuvring in the port, towage, berth, and mooring.

Mooring: The attention of Masters is particularly drawn to the provisions contained in Section 6-01 of the Police Regulation in the Port of Rouen and River Seine (issued June 26th 1974), which stipulates as follows:

1. Vessels can moor either bow upstream or downstream, unless particular orders are issued by the Port Officers.

2. Vessels must moor with a sufficient number of bow and stern ropes, breast ropes and springs according to their deadweights.

If possible each line must be fastened on a different fixed point.

3. The mooring must be homogeneous, this means that the lines having the same function must have the same mechanical qualities.

4. The lines must be in good condition.

5. Keep a permanent watch upon the lines and their slack must be hauled at any time if necessary, and especially before the Spring tide flow.

According to the position of the berth and to meteorological conditions, when the expected height of high water in Le Havre exceeds 750 cm. (approx. tide coeff. 90), risk of bore exists. In this case moorings must be heaved tight one half hour before the expected time of local low water and ship's main engines must be available for immediate use.

It is recommended that a Pilot be on board at this time.

Further information may be obtained from either Pilots of Port Officers.

6. According to the deadweight of their vessels, the situation of the berths, the height of high water in Le Havre, Masters must take all necessary precautions as the tide is arriving.

7. Vessels which, to make their berthing easier have dropped their anchor, must, unless contrary to Port Officer's orders, heave it up, if they are berthed in the basins.

8. Vessels must have adequate fenders along the quay, these fenders must have a sufficient diameter to prevent the vessel being in direct contact with the quays and the cranes.

9. A sufficient free space must exist near the hatch-coaming to allow easy access to the gangway.

Gangway Ladders, Foot-Bridges Giving Access to Dry Land: The link between shore and vessel must comply with the International Convention No. 32, signed in 1932 concerning the protection of people working on board ships.

Action in Case of Accident or Fire: Anyone discovering a fire, or seeing an accident, should immediately give the alarm:

to the Harbour Master on VHF Channels 73 or 16, call sign ROUEN-Port).

Measures to be Taken on Board Vessels: Fire-fighting will be under the direction of the Master, but the operating crews from shore, especially the fire-brigade, will be under the orders of their respective chiefs.

The vessel's crew should be able to guide the assistants from shore. Plans of the ship, the cargo plan, and stowage of hazardous cargo on board, should be available on their arrival.

The Harbour Master can decide upon the shifting of the vessel, or that of neighbouring vessels. No decision such as scuttling, beaching, overloading to upset the stability, nor in general any action which may have an effect on the working of the port equipment, can be taken without the consent of the Harbour Master.

Oil tankers, or vessels loaded with dangerous cargoes, should always have a hanging wire tow-line each end ready to be hooked by a tug boat.

Cleanliness: In order to preserve the River Seine and our shore cleanliness please use plastic bags for your ship's domestic wastes.

Full bags closely fastened should be laid at the place marked by "garbage" signal. These bags will be delivered on request to your Agent.

Injury or Sickness On Board: In case of serious injury, call the fire brigade in the same way as in case of fire or the Rouen Port Station (VHF Channel 73).

In case of sickness, a doctor can be obtained quickly by VHF Channel 73.

Radio Communications: Masters of vessels are advised that they can get communications by radio-telephone with telephone subscribers ashore on metric wave-lengths (VHF).

They must call:

when below Tancarville – LE HAVRE-Radio direct on Channels 26, 28, 82 or 23 Semi-duplex;

when above Tancarville – ROUEN-Radio direct on Channels 25, 27 duplex or 21 Semi-duplex.

Do not use Channel 16 for these communications.

These radio communications are authorised when alongside berth.

Furthermore it is useful to keep watch on Channels 16 or 73. LE HAVRE-Radio and ROUEN-Radio stations use Channels 16 or 73 when they call vessels.

Notice to Masters of Vessels Proceeding to Le Havre and to Rouen: The attention of Masters of vessels bound to or from the ports of Le Havre and Rouen is drawn to the regulations laid down in by-law No. 5 of the Marine Superintendant of the 1st District appertaining to anchorage and navigation of vessels in the Le Havre roadstead dated June 18th 1991.

BORE:

1. The bore is the name given to the phenomenon caused by the arrival of the tidal wave in the river at times of high tides. The current is reversed, going from ebb to flow.

The rise in water is then very rapid, and the level of the river can rise 1 m. in less than 10 minutes.

The greater the tidal coefficient and the lower the river flow, the greater the phenomenon.

Basically, it starts to be felt in the Seine when the full tide height at Le Havre reaches or exceeds 7.6 m., i.e. for tidal coefficients equal to or greater than 90.

It is generally stronger when the coefficients are falling than when they are rising, and it is greater in Summer than in Winter.

It is also stronger when atmospheric pressure drops and West winds produce tidal heights greater than normal.

In Winter, the Seine is in flood, and the very considerable river flow attenuates considerably the effect of the bore.

On the other hand, in Summer the relatively low level of the river favours the rise in water, and the bore is then much stronger.

The bore is experienced between Caudebec and downstream of the Port of Rouen. It then weakens by virtue of various structures in the river and some basins. Upstream of the port, it is no longer present except for high tidal co-efficient.

2. Vessels berthed at quays or discharge/loading points are subject to the effect of the bore all the more when they are heavy and loaded.

Downstream of the port, vessels are wherever possible positioned with their bows downstream. They can be assisted during the passage of the flood by a Seine Pilot and possibly tugs.

The arrival of the bore is announced on VHF by the Rouen Port Station giving the time when it will pass La Bouille, which is the downstream limit of the Port of Rouen, and where a recorder is installed. It is then easy to forecast the time of its passage at different points in the port, by knowing the time taken for the flood to go from La Bouille to different berths:

Moulineaux Roulier: 4 minutes.
MRM Silo: 8 minutes.
Sogema Quay: 10 minutes.
Petit-Couronne Quay: 15 minutes.

Rouen Port Station now also announces the time the bore passes Duclair, when normally occurs 36 minutes before passing La Bouille.

In principle, it occurs at the time of local low-tide, but according to circumstances, it can be advanced by almost half an hour over the theoretical expected time.

3. During very high tides, the measures to be taken before the passage of the flood are as follows:

To be well berthed and tied up and to ensure opportunely that all lines are working in the same way.

Take up the gangway.

Stop handling operations in order to disengage cranes or gantries, or disconnect tankers.

Have engines ready for manoeuvring (30 minutes before theoretical time). Engines must be started up before the flood arrives and manoeuvred so as to counter the effect of the bore during its passage. Once the bore has passed, no risks exist.

The Harbour Master's Office carries out continuous watch on VHF Channel 73, and can give at any time all information to vessels on the bore and its strength.

DEVELOPMENTS: Dredging operations in order to accommodate vessels of 60,000 d.w.t. at Port Jerome and Honfleur.

SHIPMASTER'S REPORT: June 1987 (Updated 1990).

Port: Port Jerome.

Anchorage: Vessel anchored in Rouen waiting area, just South of Le Havre fairway in a depth of 12 – 13 fathoms.

Documents:

6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest (including bond, ship's stores, currency, etc.).
1 copy Declaration of Health.
2 copies Cargo Manifest.

Customs Officers board after arrival.

Pilotage: Pilot boards in the anchorage area from a high speed launch.

Passage: It is about 2.5 hours from the anchorage to Port Jerome berth, which is just beyond Tancarville Bridge.

Inward transit is made from about 3 hours before to 3 hours after high water at Le Havre. Time of leaving the anchorage depends upon the vessel's draft.

The outward transit from Port Jerome is again from about 3 hours before to 3 hours after high water at Le Havre. Time of leaving Port Jerome depends upon the draft of the vessel.

The maximum draft to Rouen is 11.5 m. inwards and 10.0 m. outwards.

Berthing: Tugs not used for berthing. Vessel berthed starboard side to at Esso No. 1 to load ethylene. Vessel used starboard anchor to swing in river.

Moorings were made up of 2 head/stern line, 2 breast lines and 2 springs forward and aft. It is advisable to use long lines as the rise and fall is about 4.5 m. Fendering consists of large wooden buttresses with protruding bolts.

Ship's gangway constantly on the move due to tidal range and has to be constantly shifted.

Cargo: 6 in. liquid and vapour arms connected. Ship's reducer required for vapour arm.

The SGS surveyor attended.

A control box was placed onboard which regulates the loading valve at the base of the Chicksan arm.

Rate of loading is about 90 t.p.h. with 1 shore pump. A second pump can be used on the line to increase the rate to 120 t.p.h.

If necessary, the rate can be reduced to 20 t.p.h. Cargo can be stopped in about 12 seconds.

A dead man arm is incorporated in the control box. This stops cargo loading if it is not pressed every 12 minutes.

The manifold temperature during loading was −93°C. Two compressors were run returning vapour ashore throughout loading. The temperature on completion of loading was approximately −98°C after which one plant was put on internal cooling with one compressor still running ashore. This was maintained for 9 hours until temperature reached −101°C.

The terminal personnel were generally very helpful. If required, they would backload liquid after the vapour return but the initial plug would be hot after sitting in the line.

General: All services are provided from Le Havre.

AUTHORITY: Port Autonome de Rouen, Capitainerie du Port, 34 Boulevard de Boisguilbert, B.P. 4075, 76022 Rouen Cedex, France. *Tel:* (33) 35.52.54.00. *Telex:* 770865 Capipor. *Cables:* Poronom-Rouen. *FAX:* (33) 35.52.54.02. *Contact:* G. Vionnet, Le Commandant du Port.

ST. LOUIS DU RHONE: 43.23 N. 04.48 E. (See Plan)

DOCUMENTS:

1 Cargo Manifest or Manifest in Ballast.
Ship's Register.
Bills of Lading.
6 Crew Lists (8 if Spanish or Russian or ships bound to these countries).
3 Passenger Lists.
Health Declarations.
Derat Certificate.
3 Bunker Supply forms.
1 Declaration of Crew Personal Effects. If on inspection articles or quantities not in conformity or in excess, Master held responsible, articles removed and heavy fines imposed.

PILOTAGE: Compulsory for vessels exceeding 50 m. LOA. Contact Pilots by Marseilles Radio or by VHF Channel 12 for calling Fos Port Control. Pilot boards off Lavera Buoy.

River Pilot required by vessels loading salt in the Rhone river, boards at the locks entrance to Port St. Louis basin off Lavera Buoy.

ANCHORAGE: Suitable anchorage outside Port St. Louis keeping well clear of Fos channel.

RESTRICTIONS: The St. Louis Canal is 3,300 m. long and 63 m. wide, with a depth of 26 ft. 6 in. The lock has a length of 135 m., width 22 m., and depth 18 ft. Max. ship size: Length 95 m., beam 16 m.

No entrance allowed between 2100 hrs. and 0500 hrs. except in emergency, although entrance may be effected up to 2400 hrs. if ordered before 2100 hrs.

Entrance may be delayed when large tankers are proceeding in the Fos Channel.

HEALTH: Pratique given by Customs officers who board on arrival.

RADIO: Within 150 miles use Marseilles Radio FFM, otherwise St. Lys FFL.

TUGS: Two tugs available of 1,060 h.p. Ship's lines are normally used.

BERTHING:

Quays	*No. of Berths*	*Draft*
Quai Ouest	3	6.00 m.
Quai Nord*	2	6.00 m.
Quai East*	3	5.20 m.
Quai Hardon	1	5.50 m.
Quai de la Suisse	3	7.92 m.
Quai Charles	1	7.92 m.

* Berths allocated for pleasure craft.

CRANES: Also see "Berthing".

Quay cranes: 5×6 tonnes (Quay de la Suisse). One private crane at heavy lift berth, capacity 544 tonnes.

Floating crane: Marseilles Port Authority operate a floating derrick, capacity 500-600 tonnes.

Front Loaders: 1×30 tonnes for containers.

SPECIAL CARGO FACILITIES:

Company	*Berth* No.	*Length* (m.)	*Max. draft* (m.)	*Remarks*
C.R.E.A.	924	100	4.5	2 berths – Military, refined products.
Frahuil	925	80	6.7	Capacity 17,550 tons. Refined products.
Mavrac	919	100	6.5	Natural Gas – Loading and discharging. Berth also used by Medistock.
Sedipa	921	100	4.0	Public berth, storage capacity 9,000 tonnes. (Chemicals, vegetable and animal oils). (Not in use.)
Soterm	923	150	7.0	Private berth (destroyed 1982) used by Soterm, Mazout and Deleup. Storage Capacity (still available): Mazout 150,000 tons. Deleup and Soterm 30,000 tons.
Port Petrolier de Givors (PPG)	916	100	6.7	Private berth. Storage Capacity: 5,000 tonnes. (Liquid tar).

Basin	*Berth* No.	*Length* (m.)	*Max. draft* (m.)	*Remarks*
Port St. Louis/ Rhone	904	110	5.2	Ro-Ro
	909	130	6.0	Ro-Ro
Tellines	951	130	7.92	Ro-Ro.
"	952	147	7.92	Ro-Ro.
"	954	147	7.92	Ro-Ro, heavy lifts. (4 ton/sq.m. – 6 ton/sq.m.).
"	953	160	7.92	Heavy lifts (4 ton/sq.m.). Private crane, 544 tonnes capacity and Port Authority floating derrick 500/600 tonnes capacity, located at this berth.

STEVEDORES: *Working Hours:* 0600 – 1300, 1300 – 2000, 2000 – 0300, 0830 – 1200 and 1330 – 1700.

Saturday afternoon, Sunday and Holidays at overtime rates.

FRESH WATER: Available from hydrants on the quays at a rate of 10 t.p.h.

FUEL: Available only by barge or railcar.

AIRPORT: Marseille-Provence Airport distant 70 km.

AUTHORITY: Port Autonome de Marseille, 23 Place de la Joliette, 13002 Marseille, France. *Tel:* 91.39.40.00. *Telex:* 440746. *FAX:* 91.39.45.00.

Contact: Mr. Perdrizet, Port Director. Captain Alexandre, Harbour Master. Captain Balsen, Harbour Master – Western Area. Mr. Mahe, Operations Director – Western Area.

ST. MALO: 48.38 N. 02.02 W. (See Plan)

PORT LIMITS: A vessel is considered to have arrived within the Port limits, when it is within a radius of 3 miles to the North of the Grand Jardin lighthouse.

DOCUMENTS:

Ship's Register.
Store List in duplicate (ship's stores).
2 Crew Declarations of Bonded Stores.
Health Declaration.
Manifests and B/Ls.
3 Crew Lists.
3 Passenger Lists.

One Security Form (Inwards Declaration) with vessel's details to be handed to Port Captaincy when passing through the lock.

PILOTAGE: Compulsory for vessels over 45 m. LOA and over 150 n.r.t..

(1) During tidal hours, 2.5 hours before and after high water, vessels may enter into direct contact with the Pilots on VHF Channel 12. Call Sign "Pilot – St. Malo".

(2) Outside tidal hours and during working hours, vessels may call the Port Office on VHF Channel 12. Call sign "Port Control – St. Malo".

When waiting for the Pilot, vessels anchor near the "Shore Buoy" and report their arrival to the Port Office.

In good weather, the Pilot boards near the "Shore-buoy". In bad weather when the wind is from N.E. or N.W. the Pilot may guide the vessel as far as Dinard Roads, where the Pilot will come aboard.

Pilot Cutters: One cutter ("La Mauve" – length 10 m., speed 18 knots) fitted with radar, relief cutter ("Pilote Vayva" – length 10 m., speed 18 knots) both fitted with radio-telephone and VHF Channels 6, 12, 14, 16, 24 and 25.

ANCHORAGE: Large vessels with draft greater than 9.0 m. anchor by the land-buoy. Smaller vessels may anchor in St. Malo Roads, there is sufficient swinging room for vessels with draft of 7 m. It is recommended to use a Pilot to come into this anchorage.

RESTRICTIONS: Vessels are allowed to enter from 2.5 hours before to 2.5 hours after high water. To be certain of mooring, vessels should arrive at the lock (Naye Lock: Length 150 m., width 25 m.) at least 1 hour after high water.

Depth available 20 ft. to 22 ft. at Spring tides for the Bouvet and Duguay Trouin Basins.

No movements during foggy weather. Large vessels (length greater than 100 m.) approach the lock at high-tide. Tankers lock in by themselves (no other vessel allowed in the same lock) in daytime only. Movements are carried out day and night.

Vessels with hazardous cargo and large vessels (more than 135 m. LOA) enter in daytime only.

MAX. SIZE: The height of the tide, the length of the lock and width of the channel must be taken into account.

Cargo Vessels:

(a) Overall length 150 m., beam 20 m. or
(b) Overall length 135 m., beam 21.5 m.

Max. Draft: Spring tides 9 m. Neap Tides: Equal to the depth of water in the access channel according to the tide (height of water above zero of French charts) at the time when the vessel passes through the access channel to the lock (normally 8.5 m.), 2 tugs required.

Characteristics of the Channels: Permissible dimensions for vessels:

St. Malo Channel linking the Vauban Docks to Duguay Trouin and St. Servan Channel linking the Vauban Docks to Bouvet. Length 120 m., breadth 16.5 m. Depth in the docks 5 m. (sill of the channels: 5 m.)

Jacques Cartier Channel linking the Vauban Docks to Jacques Cartier, length 150 m., breadth 21 m. – at the moment – depth of the docks 3 m.

Tankers: Length 147.50 m. (443 ft.), beam 20 m. (65.6 ft.), draft see "Cargo Vessels" above. 2 tugs required if vessel not fitted with bow-thruster.

HEALTH: Customs Officers are appointed as Health Officers and deliver Pratique. In case of suspect disease, Masters must declare it at once by radio to their Agents who will contact authorities.

RADIO: Vessels coming from West use Brest le Conquest Radio, call letters FFU. Vessels coming from North should go through Boulogne Radio, call FFB.

Arrival Advice: The requirements on arrival of large vessels must be given to the Port Captaincy 8 days in advance.

For vessels with a length less than 100 m., 48 hours notice must be given.

The precise ETA mst be sent 24 hours before arrival in the Roads.

VHF:

(a) Port Office: Channels 12 and 16, 24 hours
(b) Pilot: Channels 6, 12 and 16, when awaiting a vessel.
(c) Tugs: Channels 6, 12 and 16, at the time of high tide.
(d) St. Nazaire Radio: Channels 1 or 2, for telephone communications.

Vessels call Pilot and tugs on 12 or 16 and change to Channels 6 or 8 for working.

TUGS: 2 tugs are available at St. Malo (600 h.p. and 1,800 h.p.). Usually joins vessel at the end of breakwater. Ship's lines are usually used.

Towing is obligatory on entering or leaving the docks for vessels which have a length greater than 100 m., as well as for oil tankers and vessels carrying hazardous cargo whatever their size.

BERTHING: Ro/Ro berth outside lock for car ferries.

Duguay Trouin Dock: Length 2,000 (commercial), 2 Ro/Ro ramps for vessels less than 120 m. (Berths No. 6 and 7).

1 wine store house (Berth No.13).
1 grain silo (Berth No. 10) 6,000 tons.

Vauban Docks: St. Louis Quay: 360 m. – marina: 700 berths.

Corsaires Quay: 385 m. comprising:
2 discharge points for caustic soda.
1 discharge point for hydrocarbons.
1 discharge point for phosphoric acid – (1,000 t.p.h.).
2 cranes on rails – 12 tons at 14 m.
1 dry dock: 120 m. × 15.5 m.
1 Ro/Ro ramp: In the North part of the Corsaires Quay.

Bouvet Dock: 641 m. for commercial trade.
260 m. for discharging fish.
850 m. for activities connected with fishing.
1 slipway – for vessels less than 350 tons.

Jacques Cartier Dock: Length 300 m., comprising:
1 dockyard (St. Malo Naval).
2 electrical cranes of 24 tons.
Numerous sheds – vats for caustic soda and acid (6,000 cu.m.)

Grain Silos: 1 of 6,000 tons capacity with loading possibilities of 130 t.p.h. and 2 of 6,500 tons capacity each with loading possibilities about 100 t.p.h. each are situated in Bassin "Duguay Trouin".

CRANES: 5 mobile cranes, 4 – 16 tons, 1 mobile crane 9/40 tons and 8 electric cranes (on rails) – 4×4/8 tons, 2×6/12 tons and 2×12/24 tons.

STEVEDORES: In order to have workers ready on arrival, Masters are kindly requested to give as accurate as possible ETA the day before arrival, especially if there are many ships discharging at same time.

Normal working hours 0800 – 1200 hrs., 1200 – 1800 hrs. and 2000 – 2400 hrs. from Monday to Saturday, except holidays. There is no night overtime. Dispensations may be made to finish a vessel so that she may catch the tide.

MEDICAL: Notice is required to obtain an appointment with doctors or dentists. Hospital is available in St. Malo.

TANKERS: Tanker quay, extension of Quai des Corsaires, length 130 m. Diameter of discharge pipe 200 mm., one mobile arm, vessels to supply reducers. Max. discharge rate, 650 cu.m./hour.

No deballasting facilities. Tankers wishing to effect repairs must leave port and wash out their tanks and obtain a gas-free certificate.

On completion of operations tankers must leave on the next tide. If a second tanker is waiting to berth she must wait in the roads.

Safety instructions are issued when the vessel passes through the locks.

BERTH ALLOCATION: Dependent upon goods to be discharged and characteristics of vessel. Bearing in mind the widths of the channels, their depth and dimensions at the foot of the quays, the height of the dock which varies on average between 11 m. and 12.5 m.

The largest vessels tie up at Quai des Corsaires.

It is recommended that an advance notice be sent via Agents to the Port Office 15 days prior to arrival, so that the vessel may be received under the best possible conditions.

BRIDGES: 3 bridges can be passed during tide vacation, otherwise, notice required to open.

DENSITY: Average density is 1022.

FRESH WATER: Can be delivered from quay. Rate 3 t.p.h. – 10 t.p.h.

FUEL: Bunkers delivered at St. Malo (with notice varying, depending on the Company – Shell 2 days, Esso 1 week, etc.) come from Donges by road lorries and cost of haulage is supported by the ship (expensive). D.O. can be obtained from local suppliers but out of contract.

FIRE PRECAUTIONS: Usual non-smoking precautions (a watchman is compulsory for tankers). In case of fire call Port Captain on VHF Channel 12.

CONSULS:

Belgium	(16-99) 56.07.21.
Denmark (Vice-consul)	(16-99) 56.07.21.
Netherlands	(16-99) 56.07.21.
Norway	(16-99) 56.07.21.

REPAIRS: Deck and engine repairs can be carried out by shipyard or workshops. Electricians are also available. RAMAC Agency can repair radars and radios, also Radio-Ocean agency.

DRY DOCKS: One dry dock. Max. length admissible 120 m., breadth 16.0 m. and draft 8.0 m. One slipway, 350 tons. Length admissible 30 m., breadth 9 m. With sufficient notice.

GANGWAY/DECK WATCHMEN: Watchmen are not compulsory except for tankers.

OPENING/CLOSING HATCHES: This work is normally carried out by crew. Stevedores' cranes may help for the beams, but dockers will not touch them.

CERTIFICATES: As per International Conventions, all Safety Certificates, Load line, Radio, etc.

Important: All vessels entering the port must be up to date with safety certificates as required by international conventions. An attestation must be handed in by the Master when he passes through the lock.

CUSTOMS ALLOWANCES: 200 cigarettes, or 200 grams of tobacco, and 1 bottle of spirit per crew member.

REPATRIATION: Can be effected from St. Malo by train or plane.

AIRPORT: Pleutuit/Dinard Airport 10 km. from port. Wintertime, services to Jersey (C.I.), with onward flights to England and Wales. Summertime, several times per day to Jersey, London, and to Paris except week-ends.

TIME: Local time is GMT plus 1 hour. From April till September GMT plus 2 hours. ETA messages must specify GMT or Summer Time.

HOLIDAYS: French legal holidays. Stevedores do not work on Sundays or public holidays.

POLICE/AMBULANCE/FIRE: Police, 40.85.80 and 17; Ambulance and Fire, 18. Port Captaincy, Tel: 56.23.86, or VHF Channel 12.

TELEPHONES: None.

SERVICES: Compass adjusting, radar or radio repairs can be carried out.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Crew members must have an identification card or their Seaman's Book when going ashore.

DELAYS: Berthing delay will only be due to tide. For loading or discharging, it depends what kind of cargo is handled.

Deadlines: All vessels must leave the quay once unloading has terminated. They may be towed away to another waiting berth – if need be.

Vessels are admitted to port as soon as their berth is vacant, and providing nautical conditions permit.

Time limits for loading or unloading depend on the quantity of the nature of the goods. There is no special rule governing purely port operations.

It is rare for vessels to wait in the roads.

Special Cases: Vessels are not authorised to enter or to leave the port in fog.

In storms, starting at force 8 – Pilots cannot embark, nor disembark from vessels, without danger.

With strong N.W. winds (8 to 9) the port may be ordered to be closed to prevent damage to the lock gates and to structures (bridges).

AUTHORITY: L'Ingenieur Charge de l'Arrondissement de Saint Malo, 1 Rue de la Crosse, 35400 St. Malo, France. *Tel:* 56.55.45. *Telex:* Dde-Atm-950-197 F. *Contact:* J. Lannou, Port Commandant, Ecluse du Naye, 35400 St.Malo. *Tel:* 81.62.86.

Chambre de Commerce et Industrie de Saint Malo, 4 Avenue Louis Martin, B.P. 185, 35409 St. Malo-Cedex, France. *Tel:* 99.20.63.00. *Telex:* 950382. *FAX:* 99.56.61.48. *Contact:* M. Rondeau.

SETE: 43.24 N. 03.42 E. (See Plan)

PORT LIMITS: The seaward boundaries of the Port within which a vessel is considered to be an "Arrived Vessel" are indicated as follows: To the South by a line with the red light of Eastward end of breakwater bearing 257°; to the East by a line with the church tower of Frontignan bearing 005°; to the North by coastline.

A second zone is a circle of 1 mile radius centered on a point located on the bearing 310° and at 2.8 nautical miles from Eastward end (Red Light) of breakwater. This zone is connected from a landing buoy (Lat. 43° 14.9' N., Long. 03° 53.7' E.) by a channel 1 nautical mile wide steering 326°. This channel is compulsory for tankers and chemical carriers who must report to French Navy (Toulon) before entering or leaving.

DOCUMENTS:

Cargo Manifest or Manifest of Ballast.
Certificate of Cargo Space.
Bills of Lading.
Ship's Register.
3 Crew Lists.
4 Passenger Lists.
Health Declaration, eventually vaccination list.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.
2 Provision Lists.
IOPP Certificate – National Certificate of Insurance for Oil Pollution Damage for tankers and "Fitness Certificate" for chemical carriers.

PILOTAGE: The service is permanent.

Masters must inform Pilots of ETA 18 hours before arrival or when leaving previous port, through Telex: 499452, Fax: 67.74.89.95 or Tel: 67.74.34.06.

Vessels may request Pilot by VHF Channel 12 (Call "Sete Pilot") one hour before arrival or departure.

Description of pilot boats: Motor launches with black hull, white band, white anchor on hull at bow.

Pilot embarks between 1 mile and 2 miles South of breakwater. Vessels concerned by Marpol 73 embark Pilot between 4 miles and 6 miles S.E. of the Eastern extremity of the breakwater.

In rough weather, if Port Authority allows, Pilot may embark in the shelter of the breakwater.

ANCHORAGE: In roads from 0.5 miles to 3 miles South of breakwater, included in the compulsory pilotage area (limited by a circle of 6 miles radius centered on Epi Delon's East end).

RESTRICTIONS: *Commercial Harbour:* In the Canal Maritime, length max. 145 m., breadth 20 m., draft 7.0 m. (23 ft.).

MAX. SIZE: C.B.M.: Tankers up to 100,000 d.w.t., lightened draft 13.1 m. (43 ft.).

Bassin a Petrole: New Tanker Berth (P2) – 35,000 d.w.t., length 225 m., draft 11 m. (36 ft.) P1 – length 140 m., draft 33 ft. P3 – Barges.

Darse No. 2 for ore carriers 259 m. length; 13.18 m. draft (43 ft. 2 in.)

Commercial Harbour up to 11.0 m. draft (36 ft.).

Commercial Harbour in the Canal Maritime: max. length 140 m.; breadth 20 m., draft 6.85 m. (22 ft. 6 in.).

HEALTH: Pratique given by Health Officers or by Custom's Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique, Master should radio Agent before arrival, advising full details.

RADIO: Marseille Radio VHF Channel 19. Sete Port Traffic on VHF Channel 12. Port Authority Telex No. 480220, Fax No. 67.46.35.00.

TUGS: 3 tugs (2×1,200 h.p. and 1×2,200 h.p.) to be ordered from Compagnie Setoise de Remorguage. Tel: 67.74.64.49 or VHF Channel 12. Tow line to be furnished by ships. Vessels taken in tow near the breakwaters on the North side.

BERTHING: *Bassin du Midi:*

North Quay: Berths No. 16, 17, 18, 19 and 20
Repairs, fishing vessels and yachts.
Draft 6.50 m. (21 ft. 04 in.)
Cranes: 1 Fives Lille, 7.5 tons at 22 m. with scoop and hook.
All berths: Ore and chemical terminal.

South Quay: Berth No. 14 Draft 7 m.
15 Draft 6.10 m. Ro/Ro
Cranes: 1 Fives Lille, 7.5 tons at 22 m.
All berths: Livestock and general cargo.

Canal Maritime:

Quai Paul Riquet: Berth No. 10 Draft 5.50 m.
11 Draft 6.40 m.
12 Draft 6.40 m.
13 Draft 6.10 m.
All berths: Wine and general cargo.
Cranes: Nil.

Quai Vauban: Berth No. 24 Draft 3.70 m.
25 Draft 4.60 m.
26 Draft 4.10 m.
Berths No. 25 and 26: Wine.
Cranes: Nil.

Quai Francois Maillol: Berth No. 27 Draft 5.80 m.
28 Draft 5.20 m.
29 Draft 5.20 m.
All berths: Wine.
Cranes: Nil.

Quai d'Orient: Berth No. 7 Draft 5.50 m.
8 Draft 5.50 m.
9 Draft 5.50 m.
5 Draft 5.00 m.
6 Draft 4.60 m.
Restriction:
Berths No. 5 and 6: Breadth = 15 m.
All berths: Wine and general cargo.
Cranes: Nil.

Quai de la Republique: Berth No. 30A Draft 5.20 m.
30B Draft 4.30 m.
All berths: Wine.
Berths No. 31 and 32 – Tugs.
Cranes: Nil.

Quai d'Alger (Algier Quay): Berth No. 34 Draft 8.20 m.
35 Draft 8.20 m.
36 Draft 8.20 m.
All berths: Wine.
Passenger Quay: Cruising vessels.
Length 200 m., draft 8.20 m.
For example: M.V. "Statendam", 219 m.

Quai du Maroc (Morocco Quay): Berth No. 37 Draft 7.60 m.
(Ro/Ro) Length 130 m.
Passengers and wine.
Line: Morocco – Passenger terminal.

Bassin Orsetti: Max. Length: 180 m.
Berth B1 Draft 8.25 m.
B2 Draft 8.25 m. Ro/Ro
B1 and B2: Passengers
General cargo.
B2 Ro/Ro Gare Maritime Orsetti.
Line: Baleares (Spring and Summer).
Cranes: 1 Fives Lille, 6 tons at 22 m.
Berths: D1 Draft 8.55 m.
D2 Draft 8.55 m.
D3 Draft 8.25 m. Length 180 m. Ro/Ro.
All berths: General cargo.
Cranes: 4 Caillard 6 tons at 22 m.
Quay "B" – Length 303 m.
Quay "D" – Length 422 m.

Mole Masselin: Cereals
1 berth on 180 m. of quay.
Draft: 10.36 m.
1 loading gantry of a capacity of 550 t.p.h.
2 storage silos of 22,000 tons capacity. (annual 100,000 tonnes).

Dock No. 1 or Colbert Dock: Berth E3 Draft 10.40 m.
E2 Draft 10.40 m.
E1 Draft 11.00 m.
All berths: Containers – general cargo.
Wood pulp and sawn timbers.
Cranes: 2 Caillard, 9 tons at 19 m.
1 container gantry crane 35 tons at 35 m.
1 Peiner multi-use crane, 35 tons at 35 m., 40 tons at 28 m., spreader for 20 ft. and 40 ft. containers.
Berth G1 Draft 7.50 m. Ro/Ro (Dolphin).
G2 Draft 11.00 m.
G3 Draft 11.00 m. Ro/Ro.
All berths: Sawn timbers – logs and general cargo.
Cranes: 2 Callaird and 2 Peiner
7.5 tons at 22 m.; 8 tons at 30 m.

Dock No. 2 or New Dock: Berth H1 Cement storage berth – Draft 13.18 m. (Panamax).
Berth H2 Draft 13.18 m. Ro/Ro. No crane.
Berth I1 Ro-Ro – No crane.
Berth I3 Draft 13.18 m. Ro/Ro.
Named berth for all ponderous bulk cargoes.
Max. length 260 m. (Panamax).
Cranes: 1 Delattre Levivier 20 tons at 44 m., 2 Peiner 12 tons at 30 m. – all with scoop and hook.

Also see "Developments".

BRIDGES: To proceed to or leave, the Bassin du Midi bridges have to be opened. Request to be made to Capitainerie du Port (Tel: 67.46.34.97/67.46.00.81) before 1700 hrs. Friday, when arrival or departure is expected during weekends.

TANKERS: Frontignan Sea Line Terminal North Berth (C.B.M.) 1 berth for tankers up to 100,000 d.w.t. lightened draft 13.1 m. (43 ft.). 2×12 in. hoses for refined products only. Submarine pipeline 28 in. diameter.

Commercial Port: 1 berth (P2) for tankers up to 40,000 d.w.t. draft 11 m. (36 ft.). 3 loading/unloading arms for refined products, 1 unloading arm for methanol and 1 unloading arm for slops and dirty ballast. 1 old berth (P1) for tankers up to 140 m. length or 10,000 d.w.t., draft 10.1 m. (33 ft.) for handling oil, alcohol, molasses and coal tar. Slop disposal facilities available up to 1,000 cu.m.p.h. Also see "Max. Size" and "Shipmaster's Report - March 1985".

FRESH WATER: Available on most quays or by lighter of 140 tons capacity during working hours. Advance notice required for Saturdays and Sundays.

FUEL: All qualities available subject to advance notice given.

CONSULS:

Denmark	Tel: 67.74.30.20	Norway	Tel: 67.74.31.83
Finland	Tel: 67.48.63.16	Sweden	Tel: 67.48.63.16
Netherlands	Tel: 67.48.63.16		

Others at Marseilles.

REPAIRS: Claverie: Tel: 67.48.62.52 – Mechanical workshop for heavy repairs and boiler repairs.
Di Biase: Tel: 67.74.32.12 – general repairs.
C.R.M.: Tel: 67.74.06.83 – Electronic and radio aids to navigation repairs.
Touat: Tel: 67.48.62.37 – Electrical and generator repairs.
Farre: Tel: 67.53.41.28 – Under water work.

WATCHMEN: Service necessary for ships loading or unloading dangerous merchandise. Optional for other ships. (Tel: 67.80.22.02).

CUSTOMS ALLOWANCES: 40 grammes tobacco per day per man (calculated in accordance with the length of voyage undertaken by the ship). Amount of alcohol fixed by Customs in accordance with the crew, and length of ship's stay in port. It is a matter of tolerance and not of right.

REPATRIATION: Repatriation and crew changes are easily arranged.

AIRPORT: Airport (Class B) at Montpellier-Frejorgues, located 30 km. from Sete, (30 minutes by car on the motorway), and has services to Paris, Nice, Bordeaux, Clermont-Ferrand and London. The international airport of Marseilles-Marignane is 160 km.

TIME: GMT plus 1 hour – alteration from end of March to end of September to GMT plus 2 hours.

HOLIDAYS: No labour days: 1st May and St. Louis Day (late August).

Days with possibility of labour at overtime rates: 1st January, Easter Monday, Ascension Day, Whit Monday, National Day (14th July), Assumption Day (15th August), All Saints' Day (1st November), Armistice Day (11th November), Christmas Day (25th December).

N.B. Every Sunday and days with possibility of labour at overtime rates can be worked at the rate of 100%.

IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.

SEAMAN'S CLUBS: Stella Maris, Rue Villaret Joyeuse, Sete. Hours: 1800 hrs. – 0100 hrs. daily.

DEVELOPMENTS: Timber Terminal extension of 5,500 sq.m. at Colbert Dock under construction. On completion, 13,000 sq.m. will be available.

The bulk carrier terminal (Berth I3) is to be upgraded with installation of a conveyor belt and weighing tower.

The Delattre-Laviver crane at the ore quay is to be upgraded.

SHIPMASTER'S REPORT: March 1985.

Berth: Vessel berthed at C.B.M. berth which is a multiple buoy mooring just outside the East Harbour Entrance in position: Lat. 43° 24.3' N., Long. 03° 44.6' E.

Pilot boards just S.E. of the yellow light buoy (Lat. 43° 22.2' N., Long. 03° 46.8' E.), together with Mobil Representative, Cargo Surveyor and a mooring gang of 7 men. At the same time, 3 slings of equipment are placed on board on the port side, including chain stoppers for mooring aft and discharge monitoring equipment.

One tug is used, through the centre lead aft; using ship's lines (2). Vessel approaches the berth on course of approximately 030°; ship's log was used for assessment of ship's speed, the Pilot preferring to drop the first anchor at a speed of between 1.0 – 1.5 knots.

Starboard anchor is dropped first and allowed to run to 10 shackles on deck as the vessel is canted to starboard to a heading of 045°. When about 10 shackles have run, the port anchor is let go and then engine and tug used to manoeuvre the stern towards a group of 3 mooring buoys. 3×42 mm. diameter wires are picked up from these buoys, then 2 further wires from submerged clumps and finally 2×42 mm. wires from submerged clumps are secured forward. Both anchors are then hove in to about 8.5 shackles each to tension the moorings aft, vessel's head being finally 135°. Moorings, distances and dimensions are as per the berth drawing in *Guide to Port Entry* – "Plans". Mooring was very competently accomplished, the anchors being very accurately placed close to 2 small marker buoys (not on chart).

Discharge: The berth has very recently been converted to clean products only. 2×12 in. hoses are connected to the port side manifolds. Each of these is fitted with a butterfly valve, however, a noticeable amount of the previous cargo ran into the drip trays while the hoses were being connected. Connection of hoses was made by the mooring gang.

The sea bed line is 28 in. and maximum pressure permitted is 9 bar. This line has previously received crude oil at rates of up to 5,000 tonnes/p.h. so it was not surprising when vessel did not make this pressure, even at full speed. Discharge of 30,000 tonnes took a total of 15.8 hours, giving a final rate of 1,900 tonnes/p.h. This included approximately 2 hours slow pumping at the start and all the stripping time.

A 30 minute water plug was requested before discharge commenced. Mobil normally expect a vessel to be ballasted within 6 hours of completion of discharge; on this occasion, extra ballast was taken as the vessel would be unmooring in a 30 knot wind.

The Mobil Representative, Cargo Surveyor, Pilot and the 7 man mooring gang all remain on board until after completion of unmooring. Meals and accommodation should be provided.

General: Charterer's Agent, Mobil Oil Francaise, is in Paris (Telex: 610417). Agent attended on berthing and for remainder of stay contact was maintained by portable VHF which proved to be quite satisfactory.

Up to 6 boats per day for shore leave, etc. can be provided; if all 6 boats are taken the cost is high – 7,000 francs. However, for vessel's requirements some boats were required in any case.

Port Health, Immigration and Customs did not attend at any time, all their paper work being carried out by the Agent.

AUTHORITY: Capitainerie du Port de Sete, Quai du Maroc, 34200 Sete, France. *Tel:* 67.46.34.97. *Telex:* 480220. *FAX:* 67.46.35.00. *Contact:* Commandant Joel Gary, Commandant du Port de Sete (Harbour Master).

STRASBOURG: 48.34 N. 07.42 E. (See Plan)

PORT LIMITS: In Strasbourg (Lat. 48° 34' N., Long. 7° 42' E.), the Port Autonome extends from the Km. 285 to the Km. 297 upon the Rhine, occupying an area of 1059 ha., of which 205 ha. are water areas including 15 docks (7 have a constant level, 8 a variable level), and 2 fore-harbours.

Out of these limits, the Port Autonome de Strasbourg includes 13 branches designed for the handling of building materials and cereals, and 2 ports, Marckolsheim (at Km. 242) and Lauterbourg (at Km. 349), all the branches and ports being on the left bank of the Rhine.

DOCUMENTS: The ships must hold some documents, which they have to keep at disposal of the administration or the inspection authority when required, as following:

Certificate of Survey.
Certificate of Tonnage.
Certificate of Registration.
Log-Book.
Booklet of Verification of the used oils.
Attestation for Equipments of liquified gases.
Customs Documents for the carriage of goods.
Fluvial Bill of Lading.
Rhine Manifest.
Certificate of Ability to steer the ship.
Police Regulation for the Navigation on Rhine.
A.D.N.R., regulation for carriage of dangerous goods.
the documents relating to the boilers and other tanks under pression.

PILOTAGE: Pilotage is not compulsory on the Rhine and usually Masters do not ask for a Pilot except for Gebirge and the Haut-Rhin. A Pilot can be obtained in the Port of Kehl by dialling 19-49.7851.20.70.

ANCHORAGES: The ships have at disposal an area of about 10 ha. in the North and South fore-harbours to take anchorage. Depth of water at least 5.20 m.

RESTRICTIONS: Restrictions to navigation are published by the Nautical Corporation of the Inland Water Transport.

MAX. SIZE: The max. sizes of ships allowed on the Rhine are as follows: Length: 110 m., – breadth: 11.4 m. Ships on the Rhine do not exceed a draft of 4.0 m.

Dimensions of the locks: – North lock: length 125 m., breadth: 13.5 m., South lock: length 125 m., breadth: 13.5 m.

In the constant level docks, the water depth is 3.2 m., but only along the North-South axis of the port; if not there, the water depth is 2.5 m.

In the variable level docks, which are the docks with a direct communication with the Rhine, the minimum depth is 4.00 m.

These depths are given, the Rhine being supposed at its lowest bench-mark: 135 m.

HEALTH: There is no Health Service for the Rhine.

RADIO: All communications on the Rhine are performed by radio-link and radiotelephony:

VHF Channels 10 and 13: used for ship to ship communications.

VHF Channels 20 and 22: used for transmitting of nautical advice in the way shore-ship and in the reverse order.

VHF Channels 24, 25, 26 and 27: used for public communications.

RADAR: There is no radar station on shore.

TUGS: The Port Autonome de Strasbourg put at disposal of customers 4 tugs and 2×600 C.V. pushers according to their needs.

BERTHING: 10 km. of quays can be used for mooring. Some of these quays are situated in the constant level docks (max. draft 2.5 m.), some are in the docks that link with the Rhine (max. draft 4.00 m.). Tankers berth only in the Oil Dock Harbour.

SPECIALISED CARGO-HANDLING FACILITIES: One container lifting bridge for containers up to 40 tonnes; heavy packages up to 350 tonnes. A second container lifting bridge will be in service in 1997.

The two operations are carried out at the container and heavy loads terminal at Adrien Weirich Dock and utilise a length of 300 m. of quay. Regular Rhine container lines to the North Sea ports.

A plurimodal international transport centre, "Eurofret Strasbourg" (110 ha.), is being developed in the Southern sector of the port, close to the container terminal and including a road transport centre, a warehousing area and an area grouping various activities (12 ha.). At the present time, it offers a 155,000 sq.m. covered warehouse surface.

BULK CARGO FACILITIES: Grain elevators: 2 berths for loading, and 2 berths for discharging.

Loading of gravel on the Rhine by belt-conveyors (11 facilities).

Loading and unloading of hydrocarbons in the Oil Dock Harbour by 15 facilities operating each at the rate of 300 cu.m./hr.

BRIDGES: The head room under the bridges reaches 8.8 m. in the constant level docks.

MEDICAL: Civil Hospital, 1, place de l'Hospital, 67000 Strasbourg, Tel: 88.11.67.68.

DENSITY: The density of water is about 1000.

FRESH WATER: Fresh water is supplied by Ets. Koejac, Tel: 88.61.26.78.

FUEL: Bunkering can be arranged with Ets. Koejac, Tel: 88.61.26.78.

CONSULS:

Austria	88.35.13.94
Belgium	88.76.61.15
Germany	88.32.61.86
Netherlands	88.61.00.29
Switzerland	88.35.00.70
U.S.A.	88.35.31.04

SURVEYORS: Surveyors of the Commission de Visite, named by the Commission Centrale pour la Navigation du Rhin, can be obtained by the Master.

WATCHMEN: Ship's crew, if required.

OPENING/CLOSING HATCHES: Opening and closing of the hatches are performed by the crew or by the staff of the company freighting the ship, as any other handling. Dockers do not exist in the port of Strasbourg.

REPATRIATION: All the facilities exist for effecting crew changes and arranging any necessary repatriation.

AIRPORTS: Distances from Strasbourg: Strasbourg-Entzheim: 15 km. Strasbourg-Mulhouse: 130 km. (airport Mulhouse Bale). Strasbourg-Francfort: 220 km.

HOLIDAYS: Work is stopped during the weekends and the statutory holidays. Labour can be obtained on these days if necessary.

POLICE/AMBULANCE/FIRE: Police: 17 – Ambulance: 15 – Firemen: 18.

TELEPHONES: Office of the P et T, 5, rue du Port du Rhin, 67000 Strasbourg. In case of emergency: La Capitainerie du Port, 5, rue du Port du Rhin – North Lock of the Port, quai Jacoutot, can be contacted at any time. Tel: 88.21.74.74. There is also a public call box at the disposal of anybody at any time.

SERVICES: For the ship: Tank cleaning: SITAL, 22, rue de Cherbourg, 67000 Strasbourg. Tel: 88.39.50.16.

Supplying of material: Koejac, quai des Belges, 67000 Strasbourg. Tel: 88.61.26.78.

Electronic repairs or supplies: Radio-Metzger, 7 Avenue d'Alsace, 67000 Strasbourg. Tel: 88.35.45.42.

For the crew and various formalities (customs): La Capitainerie du Port, 5 rue du Port-du-Rhin, 67000 Strasbourg. Tel: 88.21.74.74.

SHORE LEAVE: The Master must introduce himself, within the 2 hours following his arrival, to the Commissariat Special du Port, 5 rue du Port du Rhin, 67000 Strasbourg, and produce the passports of the crew. The passenger ships have to comply with the regular supervision of authority. Each member of crew must be holder of an identification card or a passport when he is ashore.

GARBAGE DISPOSAL: Skips are available at both the North and South locks. Contact Societe Sital, 22 rue de Cherbourg, 67026 Strasbourg, Tel: 88.39.50.16, for further details.

WASTE OIL DISPOSAL: Service available at Bassin Albert Auberger (Oil Dock). Contact Tredi, 74 quai Jacoutot, 67000 Strasbourg, Tel: 88.61.82.42, Fax: 88.61.16.82.

SEAMAN'S CLUBS: None.

CURRENCY: French Franc (FFr.). U.S.$1.00 = FFr.5.38 (15.2.96).

REGULATION: The Reglement Particulier de Police du Port is very helpful to the Master and will let him know the particulars of the Port of Strasbourg.

DELAYS: The commercial operations begin and finish at the dates and hours shown upon the fluvial bill of lading. Every delay is subject to the payment of penalties. Except for the passenger ships, ships do not give notice of their arrival to the authority, before they enter into the port.

AUTHORITY: Port Autonome de Strasbourg, BP 407 R/2, 67002 Strasbourg Cedex, France. *Tel:* 88.21.74.74. *Telex:* 880476 F Poronome Strbg. *FAX:* 88.23.56.57. *Contact:* Andre Bayle, Port Director.

TONNAY CHARENTE: 45.57 N. 00.53 W. (See Plan)

DOCUMENTS:

2 copies Crew List.
2 copies Ship's Stores Lists.
2 copies Crew Manifests (Tobacco List).
2 copies Passenger List (if any).
1 Declaration of Ballast.
Manifest form Last Port.
1 copy Bill of Lading (in case of any cargo to be landed).
Ship Register to be shown.
Derat Certificate or Exemption.

PILOTAGE/ANCHORAGE: Vessels have to proceed to about half a mile S.S.W. Isle of Aix Lighthouse and to drop anchor in the No. 115 alignment when safe anchorage is open (lowest tides; minimum depth of water 26 ft.).

River Pilot joins ships there, about 3 hours to 1 hour before HW, depending on draft and size of vessel concerned.

Pilot boat is equipped with VHF.

RESTRICTIONS: As the River Charente is unlit, movements are not possible at night. However, vessels may leave anchorage in dark and come up river at daybreak (anchorage area is about 5.5 miles from the mouth of the river). Sailing up river possible 0300 hrs. – 2100 hrs. and sailing down river possible 0400 hrs. – 2100 hrs.

MAX. SIZE: Max. permissible LOA 120 m.; max. permissible draft 5.7 m. at Neap tides, 6.4 m. for sailing at Spring tides and 6.6 m. for entering at Spring tides.

HEALTH: Free Pratique is to be obtained on arrival at port. Usual yellow flag signal to be raised.

RADIO: Ships coming from South: Bordeaux-Arcachon Radio Station. Ships coming from North: Saint-Nazaire or Brest le Conquet Radio Stations.

VHF: Vessels arriving in the roads must keep watch on Channel 16, and Channel 69 for Pilot.

TUGS: No tug is available. In case of need, tug may be obtained from La Rochelle-Pallice (about 20 miles). A launch is available to run lines.

BERTHING: 1 private berth for grain loading, which can take vessels up to 100 m. length. 1 berth 200 m. long for handling general cargo. 3 waiting berths. The central waiting berth can be used for handling small cargoes from 500 tonnes to 1,000 tonnes. Depth of water along the quays is an average of 6 m.

CRANES: 2×5 tonne cranes, 1×3 tonne crane, 2×5 tonne mobile cranes. All the cranes are capable of working with hooks or scoops.

BRIDGES: The Rochefort Bridge clearance over highest water is about 98 ft. (30 m.).

STEVEDORES: A 24-hour notice is required in order to arrange loading/unloading operations.

Discharge rates:	Coal – about 1,200 tons per day of 8 hours' work. Phosphates – about 1,500 tons per day Zinc concentrates – about 1,400 tons per day.
Loading rates:	Grain 2,000/2,500 tons per day.

MEDICAL: The nearest hospital is at Rochefort (about 4 miles).
FRESH WATER: Fresh water may be obtained alongside, from hydrants, at the rate of about 10 t.p.h.
FUEL: Must be obtained from La Pallice (about 20 miles) by lorries.
REPAIRS: Small repairs may be carried out by local workshops. Nearest shipyard is at La Pallice.
OPENING/CLOSING HATCHES: This is the responsibility of the crew.
REPATRIATION: Changing crew and necessary repatriation formalities may be effected.
AIRPORT: The nearest airport is La Rochelle (about 30 miles). Possible to reach Paris airports in a few hours by train.
POLICE/AMBULANCE/FIRE: Police: Rochefort H.Q. – Tel: 17; Tonnay-Charente Gendarmerie: Tel: 46.88.20.38; Ambulance: Tel: 46.99.30.69; Fire: Tel: 18 or 46.88.20.38.
AUTHORITY: Capitainerie du Port, Quai de la Liberation, 17430 Tonnay Charente, France. *Tel:* 46.88.70.67. *FAX:* 46.99.44.93. *Contact:* M. Chauvet, Surveillant de Port.

Direction des Infrustructures Departementale, B.P. 125, 17306 Rochefort Cedex, France.

Mairie de Tonnay-Charente, Rue Alsace-Lorraine, 17430 Tonnay-Charente, France. *Tel:* 46 88 78 11.

TOULON: 43.07 N. 05.55 E. (See Plan)

DOCUMENTS: Cargo Manifest or Manifest of Ballast.
Certificate of Cargo Space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.

PILOTAGE: Pilot station is situated on Est Quay, address: B.P. 137, Toulon. Tel: 94.41.03.28. Pilotage compulsory for vessels over 150 g.r.t. and over 45 m. LOA. Pilot boards 100 m. North of the semaphore station at Cap Cepet.
ANCHORAGE: Large anchorage area available in Rade des Vignettes (depth 11.0 m. – 15.0 m.). Call Cepet Signal Station on VHF Channel 16 before anchoring.
RESTRICTIONS: Entry can be made by day and night except for vessels loading with refined petroleum or dangerous cargoes which are not allowed to enter between sunset and sunrise.
MAX. SIZE: The port is approached by a channel 125 m. wide. The docks can accommodate without tug assistance ships up to 250 m. length and 9.5 m. draft.
HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique, Master should radio Agent before arrival, advising full details.
VHF: IMPORTANT – To get authorisation to enter Toulon Harbour, ships should call the Naval Signal Station "CEPET" on Channel 16, one hour before arrival at the Pilot Station.
TUGS: 3 tugs available, 1×500 h.p., 1×750 h.p. and 1×1,000 h.p. Ships should arrange tugs one hour before berthing. Number of tugs will depend on Pilot's requirements and weather.

Naval Tugs: There are many harbour tugs up to 1,000 h.p. and several deep sea tugs up to 2,000 h.p. controlled by the French Navy which may be called on for assistance by the Harbour Master or Pilots.
BERTHING: President Fournel Quay, 345 m. length, depth alongside 9.5 m.

Corsica Quay, 170 m. length, depth alongside 8.2 m.

Minerve Quay, length 128 m., depth alongside 7.4 m.

La Seyne – Bregaillon: One Ro/Ro Berth, depth 9.60 m. Ore quay (2 berths), length 215 m., depth 9.50 m., 2×26 tonne cranes.
TANKERS: No facilities.
STEVEDORES: There is a permanent working force of 14 dockers which can be increased by casual labour to 60 men if required. Shifts are available for 4 hours, 8 hours or 9 hours with possibilities for overtime.
FRESH WATER: Available from hydrants.
FUEL: Available by tanker lorries and by barges from Port de Bouc companies (Sanara or Citerna).
REPAIRS: Serra Fres: Floating dock 1,700 tons, length 85 m.

All types of repairs can be carried out at the Naval Dockyard.
DRY DOCKS: Several dry docks available in the Naval Dockyard, of which 3 can accommodate vessels in excess of 250 m. length.
AIRPORT: The Toulon-Hyeres Airport is 23 km. from the centre of Toulon. There are 4 flights daily to Paris where passengers may transfer to national or international flights. Marseille Airport 70 km. by motorway and Nice Airport 150 km. by motorway.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.
IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.
GARBAGE DISPOSAL: Skips available alongside. Contact Agent for service.
WASTE OIL DISPOSAL: Collection service available by tanker trucks or barges. Contact Agent for service.
SEAMAN'S CLUBS: None.
AUTHORITY: Direction Departementale de l'Equipment, Capitainerie du Port de Toulon, 244 Avenue de l'Infanterie de Marine, (P.O.Box 501), 83041 Toulon Cedex 9, France. *Tel:* 94.03.27.60. *Telex:* 430742. *FAX:* 94.03.38.69. *Contact:* Captain Alain Dague, Harbour Master.

TROUVILLE-DEAUVILLE: 49.23 N. 00.05 E. (See Plan)

The port situated on mouth of River Touques, is composed of 2 parts: Trouville for small fishing vessels, and Deauville including 2 docks for cargo ships and pleasure boats.
DOCUMENTS:
1 Crew List.
1 Passenger List.
Tonnage Certificate.
2 Cargo Manifests.
Bills of Lading.
1 Crew Manifest.

PILOTAGE: Pilotage on entry and leaving is carried out by the Seine Pilots. Request for a Pilot must be made 12 hours in advance by radio or telephone, either to the Port Captaincy of Trouville-Deauville or to the Pilotage Office for the Seine at Le Havre or at Rouen. Vessels bound for Trouville/Deauville anchor in the "Rouen Waiting Area" Roads at Carosse where they take on the Pilot.

It is recommended to anchor near the pilot boat of Rouen and contact her by VHF for instructions.
ANCHORAGE: The best one is Rade de la Carosse (Lat. 49° 27' 30" N., Long. 0° 01' E.).
RESTRICTIONS: No restrictions at night time. Draft allowed 2.80 m. Neap tides, 4.0 m. Spring tides, Entrance is dangerous with wind from N.W. to N. over force 6.

Access channel has a depth of 2.80 m. and dries out (zero on French charts). Lock gates are opened about 2 hours before time of commencement of flood tide at Le Havre. Lock gates are closed 2.5 hours after time of commencement of flood tide at Le Havre. The fore port and river quays at Trouville are uncovered at low water. The Trouville fishing port is one where craft are beached.
MAX. SIZE: Length: 210 ft. (64 m. OA); breadth: 45 ft.
RADIO: Radio-Boulogne FFB.
TUGS: No tugs available.
STEVEDORES: Loading and discharge by shore crane.
MEDICAL: All hospital facilities available.
DENSITY: 1025.
FRESH WATER: Available from quay.
FUEL: Small quantity by tank-lorry on demand.
CONSULS: See "Caen" or "Le Havre".
REPAIRS: Small repairs only.
AIRPORT: Deauville St. Gaitien 3 miles away.
GARBAGE DISPOSAL: Available.
AUTHORITY: Direction de la Station, S.E.R. Port Deauville, Quai des Marchands, 14800 Deauville. *Tel:* 31.98.30.01. *Contact:* Mr. Meslay, Directeur du Port.

NOTES

Please also advise Shipping Guides Ltd.

Gabon

CAPE LOPEZ: 00.38 S. 08.43 E. (See Plan)

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists.
4 Lists of Ports of Call.
4 Manifest of Ship's Stores.
Clearance from Previous Port.
4 Arms and Ammunition Lists.
4 Narcotics Lists.
4 Birds and Animals Lists.

PILOTAGE: No official radio station. Pilotage not necessary to approach Cape Lopez Roads.

Pilotage to Cape Lopez Terminal is assumed by Elf-Gabon Pilots, while pilotage to Pointe Clairette Terminal depends on Port Gentil Harbour Authority.

For the private tanker port at Cape Lopez, pilotage is compulsory. On Cape Lopez Roads Pilot will board vessel 1.5 miles offshore on a line with Cape Lopez Lighthouse bearing 255° True, distance 2.4 miles in a launch carrying proper Pilot signals. The Mooring Master will stay on board throughout the vessel's time in port to assist in mooring, hose handling and loading operations.

ANCHORAGES: The waiting anchorage position is 2 nautical miles in a 075° direction from Cape Lopez Lighthouse. Depth of water 55 m.

It is necessary to guard against violent tornadoes occurring between December and May coming from the East or the North. These tornadoes occur very suddenly and are extremely strong.

MAX. SIZE: Max. Summer d.w.t. 250,000 and LOA 340 m. Max. draft 20.50 m. (67 ft.).

The above may be increased with spot approval.

Minimum size of vessel: LOA: 215 m. (Approx. 35,000 d.w.t.).

Maximum arrival displacement 160,000 tonnes.

RESTRICTIONS: Berthing is effected day and night, however, certain vessels may be berthed in daylight only. Unberthing is effected by day or night. Vessels must arrive with sufficient ballast and correct trim in order to manoeuvre safely.

Ballast should not be less than 30% of deadweight (See "West Africa Ballast Clause" below). Fresh water and stores are not considered as ballast; draft on arrival should not be less than 50% of loaded draft. Elf Gabon reserve the right to leave vessels which do not comply with these regulations at anchor.

Berthing is not effected in rough weather. At the berth mooring lines must be in good condition and well tended. In case of storm or tornado loading operations must cease and vessel be prepared to leave the berth if so directed by the Terminal Superintendent or Pilot.

West Africa Ballast Clause: Vessel must be able to deballast and load cargo simultaneously (or load part cargo, deballast, and load balance of cargo), with 2 valve segregation, while maintaining 30% of Summer deadweight.

HEALTH: Formalities carried out on berthing by Police Forces. However, ships remaining at anchor may have Customs and health formalities carried out through their Agent.

RADIO: *Elf Gabon Terminal:* VHF watch on Channel 72. The working Channel of the terminal is Channel 72.

When a ship is expected, a permanent watch on VHF Channels 16 and 72 is kept by the Pilot, one hour before ETA if berthing on arrival, for short distance communications.

All ships must contact the terminal in advance of their arrival. Elf Gabon will inform the vessel whether berthing will take place on arrival or whether it should anchor.

Arrival Advice: Advise Agent 72 hours, 48 hours and 24 hours before arrival, also if any appreciable alteration thereafter.

VHF: Before vessel's arrival watch is kept on Channel 16. During loading and mooring, watch is kept on Channel 72.

TUGS: Compulsory. Owned by Elf-Gabon, can be contacted on VHF Channel 72. Ship tow lines are not required, 3 tugs are available up to 3,200 h.p. There are 2 launches for handling mooring lines.

BERTHING: Anchors are not required for mooring operations but must be ready for emergency case. Vessel berths port side alongside on 6 dolphins, heading 044° True. Depth of water along the berth is 25 m. Mooring ropes used as follows: fore and aft 3 head/sternlines, 3 breastlines, 2 springs. 2, 3, or 4 tugs are used for mooring operations, in accordance with the d.w.t. Vessel's engines must be ready for immediate operation all the time vessel is at the berth. 2 or 3 tugs will remain standing by. Ship's gangway is not required, an automatic one is supplied by Terminal.

Connecting Hoses: Connection and disconnection is carried out by Elf Gabon personnel with the assistance of the crew.

The vessel's cargo derricks are not used except in the case of absolute necessity or in the case of breakdown of the platform hoisting gear.

The 4 loading arms are 16 in. diameter, with hydraulic couplers for 16 in., 14 in. and 12 in. flanges. The arms are located on either side of the dolphins' centreline.

Reducers shall be provided by the ship for the other flange diameters.

Before connecting arms, the ship will be connected to the ship-shore bonding wire, and disconnected only after loading arm uncoupling.

Hose Handling: 5 arms. Crude: 4 × 16 in. arms. Loading rate: 12,000 cu.m./hr. Finished products (Diesel and Naphtha) are loaded by means of a 5th loading arm; 2 loading arms can be used for Fuel Oil.

Loading: Communication between ships and shore loading installations, in any case (loading, fire, etc.), will be effected on VHF Channel 72.

An Elf Gabon representative, responsible for loading and safety is on permanent watch at the berth. The Master must supply him with all relevant information and assistance required to ensure operations run smoothly.

The Master will be held entirely responsible for operating the valves and for safe loading on board his ship. If necessary, pumping speed can be reduced.

At least 10 minutes before loading is finished, the terminal should be notified of the moment pumping should be stopped.

When loading is completed, the tank ullages will be taken by a ship's officer in the presence of an Elf Gabon representative and surveyors, if any.

Average samples taken from each tank from which the crude was pumped will be furnished to the ship by the terminal.

These samples will be numbered, sealed and labelled showing the origin of the crude.

Notice of Readiness: To Elf Gabon Terminal.

MEDICAL: Doctors and hospital facilities available. All vaccinations can be arranged.

BALLAST: Vessels must arrive with clean ballast only. There are no facilities for discharging dirty ballast at the terminal. In no circumstances should dirty ballast be pumped overboard.

DENSITY: Varies between 1021 and 1025.

FRESH WATER: Fresh water supplies can be obtained within a few hours from a 120 ton barge. Apply to Port Gentil.

FUEL: 1,500 secs. and 3,500 secs. fuel can be supplied by barge or by the terminal, subject to 48 hours' notice. No barges allowed alongside during loading operations.

CONSULS: France, Germany, Netherlands (Honorary Consul) and United Kingdom.

REPAIRS: There are facilities for hull and engine repairs for barges and river craft. Slipway for vessels up to 300 tons.

Vessels are forbidden to turn propellers, carry out repairs, or handling operations on deck during stay alongside.

CUSTOMS ALLOWANCES: No restrictions for quantities tobacco and spirits held on board the ship. It is prohibited to allow dutiable articles to leave the ship.

REPATRIATION: Facilities available. Contact ship's Agent.

AIRPORT: Can be reached in 15 minutes by road. Regular services to Europe every day.

TIME: GMT plus 1 hour all the year round.

HOLIDAYS: Holidays do not affect tanker working.

POLICE/FIRE/AMBULANCE: Police tel. 17; Fire tel. 18; Ambulance tel. 23-33.

SHORE LEAVE: Crew members are allowed ashore, but walking through the installations of the terminal is forbidden. There is no regular immigration control but identification papers should be carried. Bathing alongside the ship and the berth is strictly prohibited.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Francs CFA. 1,000 CFA = 10 French Francs.

SAFETY: During the whole time the ship remains at the loading berth, the Master shall:

Maintain on board sufficient number of crew members to carry out any manoeuvre without difficulty, and to enable first fire fighting measures to be taken; maintain engines ready for manoeuvring; ensure that mooring is satisfactory without undue wear on mooring lines.

Fire Precautions: It is forbidden: To smoke, use naked flame or tools likely to create sparks outside the zones generally authorised for tankers; to carry out repairs or handling operations on deck; to turn the propellers; to use in danger areas any equipment or tools not of a type approved by a competent organisation. Elf Gabon reserve the right to take any steps considered necessary in case of danger and, in particular, to suspend loading; loading of bunkers, supplies, water, etc., will be submitted for the approval of Elf Gabon.

During loading:

All hull valves should be shut, except for those required for water circulation; all scuppers of main deck should be sealed; two fire hoses will be connected and set up, one at the bow. the other at the stern of the ship. The fire main shall be maintained under pressure at all times; two long robust steel safety ropes should be placed on the starboard side of vessel, one at the bow and one at the stern. The eyes should be maintained at the right distance from the water so that tug boats can easily catch hold of them.

Movement Restrictions: It is forbidden to enter the zone of Elf Gabon installations without due authorisation. Smoking or use of lighters or matches are strictly prohibited.

In case of fire on board a ship moored to the loading berth, the Shipmaster shall give the alarm by sounding a series of short blasts on the siren and advise Terminal on VHF Channel 72. He is responsible for organising fire fighting and ensuring the stability and safety of his vessel, taking all the necessary steps in this respect.

Elf Gabon may order any safety measures to be taken in the general interest of everyone.

If considered necessary, during a storm, the Loading Operator may suspend loading and disconnect the loading arm.

Safety Look-out:

Elf Gabon have a permanent look-out on the loading platform under the orders of the Chief Loading Operator.

Equipment at disposal of ship:

Stand-by tugs (2×2,000 h.p. minimum); mooring launches 140 h.p.; equipment permanently available at berth (water screen, hoses, etc.).

A Kleber anti-pollution barrier 500 m. in length can be launched within a few minutes.

A "Vortex" device can be used to re-pump the crude oil spilt in the sea. This crude oil is then collected in plastic tanks.

When a ship pollutes the sea, the above action and use of these devices will be charged to the vessel.

WEATHER:

Meteorology: From June to September the prevailing wind comes from S.S.E. and can reach force 6. From October to end of May, and especially during February, March and April there is a risk of tornadoes. They can come from any direction and are always very dangerous.

Tide: Mean amplitude of Spring tide is 2.20 m.

Swell: The terminal is protected from ocean swell. Wave height created by tornadoes can reach 2.50 m.

Current: Generally less than 0.5 knots but can reach 1 knot. Average direction 040° and 215°.

GENERAL: *Ships spares:* Customs require originals of invoices for clearing spares. Copies are not acceptable.

SHIPMASTER'S REPORT: 1977. (Updated 1994).

This vessel is an OBO carrier of 159,250 d.w.t. and called for a part cargo of 85,000 tons of Mandji Crude.

Mandji Crude has an API of between 30.0 and 30.4 and was on this occasion loaded at 97°F.

It appears to be wax-free and has a slight suspended water content.

Vessel size: Accepts vessels from 35,000 d.w.t. to 250,000 d.w.t., max. sailing draft is 67 ft.

Berth: Berth face about 420 ft. long with connected mooring posts. "Floating" type fender piles. Pilots are cautious of impacts as berth is piled into very deep soft mud. Moorings on our visit were: Forward: 3 head lines, 3 breast ropes and 2 springs. Aft: 3 stern lines, 3 breast ropes, and 2 springs. (See "Plan").

The springs were sent ashore first, fore and aft.

All lines are run, 1 at a time, by mooring boat, and there is no problem running wire rope moorings.

There is a shore gangway mounted on a tower.

Load Rate: Total max. rate of 12,000 t.p.h. using 4 Chicksan loading arms. The connections are 16 in. and hydraulically coupled.

Berthing: Straight forward operation, no significant currents, vessels tie up bow out, port side to jetty.

Berthing Operations: From end of passage to all secure was accomplished in just over 3 hours, from Pilot aboard to secure took 2 hours. Connection of the loading arms used by this vessel took 1 hour.

From commencement of singling up to Pilot away took 1.5 hours.

Tugs: There are 2 modern 3,000 h.p. Kort Nozzle tugs and 1 older tug of 2,000 h.p. stationed in the port. The larger tugs made fast fore and aft, and the smaller pushed midships. On sailing only one of the larger and the smaller tug were used. The tugs normally use their own lines and remain fast until mooring is completed.

Weather: Mild and pleasant apart from tornadoes which occur from October to May, but especially February, March and April.

These spring up without notice to very violent winds in minutes, and though it is understood loading may be suspended, the tugs are used to assist vessel to remain on the berth if required.

Bunkers: A bunker line is being installed on the jetty, a barge is used temporarily, but it is understood that delays can be expected in taking bunkers, and they must be ordered beforehand from Elf Paris.

Fresh Water: Said to be available by barge from Port Gentil.

Usage: According to the Pilot, about 12 ships a month use the berth.

Slop Reception: There are no facilities, vessels must arrive with clean pumps and clean lines.

Radio: Tugs and Pilot are on VHF 16/72 and Marine and Terminal Operations are on VHF 72.

Repairs: Doubtful if any repairs could be undertaken, possibly in emergency the refinery workshops would assist.

Communications: There are regular daily flights to Libreville, and connections from there worldwide with minimal delay. Flight time Cape Lopez to Paris is said to be 7 hours.

Crew Changes: Could be carried out easily from a point of transportation, Port Gentil only has 2 hotels (Novotel and Meridien) and 3 guest houses.

Medical Service: Could not be obtained because vessel berthed on Saturday. However, there is a hospital.

Chandler: The port has a chandler, but there is no local produce whatsoever, all vegetables, etc., being airlifted from France and prohibitively expensive.

Cargo: Mandji Crude at loading temperature 95° to 100°F., API 30.25, has slight percentage suspended water.

Shore Leave: Permitted, but walking through the installation is forbidden for security reasons, and transportation is apparently difficult to obtain.

General: I understood no clearing or formalities are completed until vessel is berthed.

Pilotage: Pilot is on board for berthing and unberthing, and stays at the terminal for security all the time.

Loading Master performs all loading operations.

Accommodation: No longer required to provide accommodation for shore personnel.

SHIPMASTER'S REPORT: November 1981.

Agency listens on VHF Channel 16 during normal working hours and they also listen at 0900 and 1500 LMT on frequency 2506 kHz. Cargo papers usually take 2 hours after completion of loading. There was no problem with crew going ashore.

SHIPMASTER'S REPORT: January 1988.

This vessel calls frequently at the port.

The updates from Shipmasters are generally correct, but Pilots state that they do not berth vessels during darkness. Usual hours for berthing are from about 0700 hrs. until about 1800 hrs. The decision whether or not to berth any particular vessel outside those times is made by the Pilot, depending upon vessel's size, weather conditions, etc. It is considered highly unlikely that they would berth a large vessel after dark.

In addition to the latest papers required, we have also been asked for one copy of List of Vaccination Dates and one copy of Crew Personal Effects Manifest.

Customs and other formalities are usually only effected alongside after berthing. Usually two officials and Agent board. No problems encountered.

Documentation on completion of loading usually takes about 4 hours.

Fresh provisions are available from chandler in Port Gentil, but as they are mostly imported, prices are about three times those in Europe. They are of good quality and variety, cost being the only problem.

We have always found that mail posted in this port reaches its destination properly, (7–10 days to Europe).

SHIPMASTER'S REPORT: December 1995.

Vessel supplied with Port and Safety Regulations on arrival. We confirmed that the max. 160,000 tonnes arrival is displacement. Other restrictions – only daylight berthing for ships this size (269,880 d.w.t.), but can sail anytime. Max. draft 20.5 m. They gave us dispensation to load to 20.8 m. for full cargo. Max. Summer Deadweight is 250,000 tonnes. Dispensation given on this occasion.

Slow loading rate, due clearing tanks, end of year. Issued with 3 Bills of Lading to cover different suppliers and tanks.

Well organised port with modern facilities. Tugs double up as supply boats and appeared underpowered.

AUTHORITY: Elf Gabon, B.P. 525, Port Gentil, Gabon. *Tel:* (241) 556309, 556938. *Telex:* 8210 – 8216 Go Elferap. *FAX:* 556968, 556476. *Contact:* P. Jahan, Operations Manager.

Terminal: Cape Lopez Terminal, B.P. 524, Port Gentil, Gabon. *Tel:* 75.63.09. *Telex:* 8210, 8216. *Contact:* Mr. Jesberger, Terminal Manager.

AGENT: Socopao-Gabon, BP 560, Port Gentil. Tel: 552005, 552491. Cables: "Freight Portgentil". Telex: 8223. Fax: 550751.

GAMBA: 02.52 S. 09.58 E. **(See Plan)**

LOCATION: Gamba SBM acts as the export facility for oil which is produced onshore from the Gamba/Ivinga and Rabi/Kounga oilfields in Gabon.

The SBM is located in the following position:

Latitude 02° 51.6' S.
Longitude 09° 58.2' E.

DOCUMENTS:

Last Port Clearance.
3 Lists of Last Ports (during last 3 months).
3 Stores Lists.
4 Crew Lists.
3 Personnel Effects Lists.
3 Lists of Vaccinations.
2 Arms and Ammunitions Lists.
2 Animals Lists.
2 Narcotics Lists.
2 Passenger Lists.
1 Notice of Readiness.
Also see "Radio".

APPROACHES/AIDS TO NAVIGATION: Approaches to the berth are direct from the sea, stemming the predominant current which usually runs Northward parallel to the coast.

Occasionally the berth is subject to heavy swell delays and from October to May tornados can be experienced from any direction and can be particularly dangerous.

Gamba Lighthouse :	Lat. 02° 47.0' S., Long. 10° 01.4' E. Red and white lattice tower. Height 47.0 m. GP. FL. (2) W 10 seconds. 18 miles.
W. Cardinal Buoy :	Lat. 02° 51.6' S., Long. 09° 55.8' E. Height 6.0 m. GP. FL. (9) 15 seconds. 6 miles.
SBM :	Lat. 02° 51.6' S., Long. 09° 58.2' E. Yellow. FL. W 0.3 second every second. 5 miles.
Radio Beacon :	Lat. 02° 46.8' S., Long. 10° 02.3' E. An aircraft radio beacon is in operation at Gamba airfield. Signals are sent continuously. Frequency 359 kHz. Call sign GZ.
Old SBM : (Not in use)	Lat. 02° 50.0' S., Long. 10° 09.6' E. Yellow. Fl. W 0.3 second. 5 miles.

PILOTAGE: All tankers using the SBM must use the Shell Gabon pilotage service for both mooring and unmooring. The Berthing Master boards in a position approximately 2 miles N.W. of the SBM.

Pilot ladder should be rigged on the port side as per international requirements with the accommodation ladder 5.0 m. above the water and the pilot ladder 3.0 m. above the water.

Vessels should arrive with derrick rigged and topped on the port side (minimum SWL 10 tonnes) in order to lift on board the mooring equipment and for the floating hose connections. The maximum stern trim of the vessel should be 8 ft.

The Berthing Master and his assistant, who both remain on board throughout the loading, act as Loading Masters and maintain contact with the shore on VHF Channel 12.

The pilot boat/mooring launch will assist mooring/unmooring and will stand-by throughout loading. A buoyant mooring rope should be provided aft by the tanker. Ship's engines should be kept ready for use at any time at the Berthing Master's request.

ANCHORAGE: Vessels anchor without assistance. The recommended anchorage is in a location 2.0 miles N.W. of the SBM in a water depth of 82 ft. (25 m.). The sea bottom is sand and is good holding ground.

Anchoring is prohibited within port limits. Both anchors must be fully secured prior to berthing.

READINESS: Notice of Readiness will be accepted by the Berthing Master either:

(a) At the vessel anchoring time, if delayed at the request of the terminal, provided the vessel is within her date range.

(b) On completion of mooring if vessel is berthed on arrival.

(c) On commencement of the laydays if the vessel is berthed before the commencement of laydays.

MAX. SIZE: Max. ship size 150,000 tonnes d.w.t., weather permitting. Max. distance bow to manifold – 467 ft. (142.4 m.).

Draft:

Lowest Astronomical Tide	22.90 m.
Sub-Sea Structure Height	– 2.65 m.
	20.25 m.
Underkeel Clearance	– 3.00 m.
Max. draft	17.25 m.

HEALTH: When advising ETA include in message whether any sickness on board. In case of emergency, vessels should call before or after loading, at Port Gentil for medical attendance or for crew changes. For this purpose send separate message to "Marine Gamba" and to Agency.

RADIO/VHF: *Arrival Advice:* The initial ETA should be sent to "Gamba Marine" via Telex or Fax at least 4 days before arrival. Subsequent confirmatory ETA messages should be passed to Gamba Marine by Telex or Fax every 24 hours.

Information required by Terminal prior to Arrival:

A. ETA.
B. Cargo required in barrels.
C. Type and number of bow stoppers.
D. Oil Pollution Certificate details.
E. Last port of call.
F. Owner, Operator, Charterer, flag, port of registry.
G. S.d.w.t., g.r.t., n.r.t.
H. Master's full name.
I. Tel./Telex numbers of Owners and Operators, plus address if known.
J. Ship's call sign.
K. U.S.C.G. identifier for Bills of Lading, if required.
L. Arrival and departure drafts.
M. Power voltage available in Pilot's cabin.
N. Deballast concurrent with loading? (If not deballast time).
O. Vessel inerted and I.G. plant fully operational.

Telecommunications: Telexes can be sent to "Shell Gabon OLS/4/41". Shell Gabon's Telex No. is 8206-GO. If the matter is urgent please prefix the telex with "VERY URGENT".

Telephone communcation is also available with the following numbers: (Country code 241) Tel. No. 75 83 60 or 75 84 65. Fax No.75 85 77. Out of hours number: (241) 759114.

If no telex is available then all messages to be sent to Gamba Marine (OLS/4) through Gamba Radio "TRP 8", which is a private station operated free of charge by Shell Gabon.

Telegraphy: Telegraphy A1. Power 500 Watts. Frequency 500 kHz. Watch from 0700 hrs. to 0900 hrs. on request by Gamba Marine.

VHF: Power 25 watts. Call sign "Gamba Marine". Watch on Channel 6. Working Channels 12 and 6. Range about 30 nautical miles.

Watch in English language during office hours (0700 – 1200 and 1400 – 1700).

Pilot launch: Watch on Channel 6 (when at sea). Range about 20 nautical miles.

Note: Local time is GMT plus 1 hour.

BERTHING: *SBM Description:* The buoy is 11 m. in diameter, 5 m. high. A double 16 in. manifold is provided on the turntable 90° clockwise from the tanker securing point. The SBM is moored by means of 6 chains which are secured to the seabed by 200 tons holding power anchors.

MOORING: Vessels moor with 2×15 in. nylon ropes (length 45 m.) from SBM secured on board ship by 2×76 mm. stud link chain. Berthing Master will advise on mooring procedure.

Mooring Procedure: Prior to the vessel's approach to the buoy, the mooring launch will have carried out the following:

(i) All cargo valves on the SBM opened, i.e. 2 seabed pipeline valves, 2 submarine pipeline valves and 2 SPM valves.

(ii) Both floating hoses turned back and secured to the SPM.

(iii) Starboard mooring line turned back around the SPM.

The mooring launch will then connect a 150 m. long × 250 mm. circumference polypropylene messenger to the mooring chain pick-up rope by means of a special screw type shackle and then stand-by to receive the tanker at the end of the floating hose line. During night time operations the mooring launch can assist by illuminating the position of the floating hose.

When the tanker is within range, launch will connect the messenger to the ship's rope and the vessel will then be manoeuvred up towards the SPM until the mooring chain is on board and stoppered.

Vessel should use a fixed drum to heave in the messenger, if one is available. This may require removing a wire from the drum prior to arrival.

On no account should the vessel be warped up to the buoy by means of the winches and at no stage should excessive weight be allowed to come on to the messenger, especially during adverse swell conditions.

The use of OCIMF stoppers is *obligatory* at Gamba and, if only one is available, the starboard rope should be made fast clear of the water, but at a lesser tension.

LOADING: *Derrick/Crane:* Vessels should arrive with derrick rigged and topped on the port side (Min. SWL 15 tonnes), in order to lift on board the equipment for mooring and for the floating hose connections.

Shore Line System: SBM – 1×30 in. submarine pipeline (total length to Terminal 10.3 km. (33,790 ft.)). Reduced to 2×16 in.×120 ft. for connection to ship's manifold (total length of floating hoses: 830 ft. and 890 ft.).

Rabi Export Blend Crude Characteristics:

Density at 15° C	:	0.8535
A.P.I. at 60° F	:	34.0
B.S.W.	:	0.05
Salinity	:	20 – 30 PPM
Temperature	:	40° – 46° C
Loading Rate	:	4,600 cu.m/hr.

Deballasting: There are no facilities for discharging ballast or slops ashore. Vessels must therefore arrive at the loading terminal with clean ballast on board.

Clean ballast to be discharged concurrent with loading. If not possible, deballasting can commence once the vessel has loaded 25% of d.w.t. Loading will then be suspended for deballasting.

Connection/Disconnection of Hoses: Connection and disconnection is carried out by the ship's crew with advice from the Berthing Master or his assistant. The hoses are connected to the port side manifold using a 16 in. ASA 150 flanged connection. A proper secure mooring point for the hoses is required 1.0 m. to 3.0 m. from the rail.

Loading Procedure: During the loading, the Berthing Master remains on board and acts as Loading Master and maintains permanent contact with the terminal on VHF Channel 6.

If required, the loading rate can be adjusted for topping-off tanks and for completion of loading, or at any time if required. The minimum loading rate is 2,000 cu.m./hr. The Loading Master should be advised at least 1 hour before the completion of loading. A watchman must be stationed on the forecastle and in the manifold area throughout loading.

The normal loading rate is 4,000 cu.m./hr. and the maximum loading rate is 4,600 cu.m.p.h.

Documentation: All documentation will be completed by the Berthing/Loading Master after the completion of loading on receipt of the shore figures. Normally this is 3 hours – 4 hours.

Engines: Engine immobilisation is forbidden at the SBM. Engines should be kept ready for use at any time at the Berthing Master's request.

MEDICAL: No medical or dental facilities at Gamba (See "Health").

DENSITY: 1025.

FRESH WATER/FUEL: Not available.

CONSULS: None, French Consul in Port Gentil.

REPAIRS: No facilities available.

BALLAST: There are no facilities for discharging ballast ashore. Vessels must arrive at the loading terminal with clean ballast only, apart from contents of the slop tank. Clean ballast cannot be discharged prior to loading. See "Loading".

GANGWAY/DECK WATCHMEN: Not required.

CUSTOMS ALLOWANCES: No restrictions on Tobacco/Wine.

REPATRIATION: Not permitted.

AIRPORT: Gamba airport is local airstrip and is connected to Port Gentil by daily service (Except Sunday). Port Gentil airport is connected to Libreville International Airport by daily services. Mail reaches any European country within seven days.

TIME: GMT plus 1 hour throughout the year.

HOLIDAYS: None which affect the Terminal.

SHORE LEAVE: Not allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

DELAYS: Occasionally the berth is subject to heavy swell delays and from October to May tornadoes can be experienced from any direction and can be particularly dangerous.

GENERAL: *Deck Watch:* When on the SBM, a responsible officer must be present on deck and a permanent watch must be maintained on the forecastle.

Territorial Waters: The sovereignty of the Republic of Gabon extends up to 200 nautical miles from the lowest sea water mark along the coast.

Mail: Mail will reach any European country within one week.

Ship's Spares: Customs require originals of invoices for clearing spares. Copies are not acceptable.

Stores/Laundry: Not available.

AUTHORITY: Shell Gabon, Gamba Marine (OLS/4), B.P.146, Port Gentil, Republique du Gabon. *Tel:* (241) 558360. *Telex:* 8206 Go., 8214 Go., 8249 Go. and 8260 Go. *Cables:* Shell Gabon Port Gentil. *FAX:* (241) 558577. *Contact:* Captain R.A. Battye, Marine Superintendent.

AGENT: See "Port Gentil".

LIBREVILLE: 00.23 N. 09.26 E.

PORT LIMITS: The seaward boundaries of the port within which a vessel is considered to be an "arrived ship" and (subject to C/P terms) laytime will commence is 2 miles off shore at Libreville Harbour.

DOCUMENTS: See "Port Gentil".

PILOTAGE: None available.

ANCHORAGES: Bottom of roads in Libreville slopes very gently down towards open sea. The greater the vessel's draft, the further out it must moor. e.g., ship of 7 m. to 8 m. draft will be moored approx. 1,500 m. from Harbour Pier. Ship 5 m. – 6 m. draft will be able to approach the Harbour Pier as near as 500 m. to 600 m. For reasons of safety, forbidden to come nearer, particularly during tornado season – February to May and September to December.

RESTRICTIONS: No restriction imposed on entering or leaving the Estuary. Channel marked by 5 buoys provided with radar reflectors and flashing lights. Sixth buoy, called a "landing buoy" moored in roads, where vessels moor.

MAX. SIZE: *Shipmaster's Report:* March 1980. Max. draft 7.4 m.

HEALTH: If there is sickness on board, Health Service warned by Consignor of vessels. Health Service can go on board to check state of crew's health. Immigration Service can also board to check crew list and condition of passengers, if any.

RADIO: *Libreville Radio:* Radio-telephony from 0600 to 1800 hrs. GMT on 2182 kHz, Radio-telegraphy from 0600 to 1800 hrs. GMT on 500 kHz, call sign TRA 22; from 0800 to 0830 hrs.on 13101 kHz, call sign TRA 8; from 1630 to 1700 hrs. GMT on 8722 kHz, call sign TRA 8.

TUGS: Tugs intended only for towing lighters, horse power 150 to 250, unsuitable for any harbour towing.
BERTHING: Only for lighters and small coasters with a draft of less than 3 m. Crews working unloading or loading of vessels in roads supplied by Consignor of the ship. Harbour Services have no radio apparatus. Shipping companies all have radio-telephone extensions, which allows them to be in permanent contact with vessel moored in roads. Unloading or loading operations of goods carried out by lighters which, towed by small tugs, ensure rotation between vessel in operation and quay. All this equipment belongs to shipping companies dealing with consignment of vessels in the roads. Every vessel arriving in roads must have its consignor.
STEVEDORES: Available.
MEDICAL: Hospital available, and in case of necessity, patient or patients will be admitted.
FRESH WATER: Water supply real problem, as there is no tanker to transport it. Therefore strongly recommended that any ship touching Douala coming from the North or Pointe Noire coming from South, should fill up at one of these ports.
FUEL: There are fuel-tankers belonging to shipping companies. The tanker which provisions Libreville two or three times a week is brought alongside buoys in roads, (Position: Lat. 0° 23' 51" N., Long. 9° 25' 42" E.); fuel is transhipped by sea-line to tank on shore.
FIRE PRECAUTIONS: No special precautions.
CONSULS: None.
REPAIRS: Small repairs possible.
GANGWAY/DECK WATCHMEN: Carried out by crew.
OPENING/CLOSING HATCHES: This is done with the tacit agreement of the ship's Officer and the Consignor.
CARGO GEAR: Ship's own gear used.
DRY DOCKS: None.
REPATRIATION: No facilities.
AIRPORT: 9 km. from the harbour. Links with French-speaking Africa, Switzerland, and France, also Johannesburg.
TIME: GMT plus 1 hour.
HOLIDAYS: 17th August, Independence of Gabon; 1st May, Labour Day – these are the only holidays in force.
SERVICES: None.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required.
DELAYS: First come, first served method.
GENERAL: *Ship's Spares:* Customs require originals of invoices for clearing spares. Copies are not acceptable.
AUTHORITY: Capitainerie du Port.

AGENT: Socopao-Gabon, B.P.4., Libreville. Tel: 70.26.35 and 70.21.53. Telex: 5212. Cables: "Freight Libreville". Fax: (241) 70.23.34.

LUCINA MARINE TERMINAL: 03.40 S. 10.46 E.

(See Plan)

LOCATION: Lucina offshore development consists of 6, four pile production platforms linked by submarine pipeline to the LP-1 production platform then to the Floating Storage Unit (FSU) "Banio", which itself is linked to an export SBM.

The production platforms are:

LD1	Lat. 03° 41.0' S.,	Long. 10° 44.3' E.
LD2	Lat. 03° 41.8' S.,	Long. 10° 45.0' E.
LD3	Lat. 03° 42.5' S.,	Long. 10° 46.0' E.
LD4	Lat. 03° 41.9' S.,	Long. 10° 44.6' E.
LD5	Lat. 03° 42.2' S.,	Long. 10° 45.8' E.
LWD1	Lat. 03° 41.4' S.,	Long. 10° 43.7' E.

The 85,000 tonnes FSU "Banio" (Ex-tanker "Sitala") is moored by means of 10 anchors in position Lat. 03° 40.0' S., Long. 10° 45.8' E.

The FSU is connected with the export SBM by a 20 in. × 1.0 km. submarine line.

DOCUMENTS:
Last Port Clearance.
3 Lists of Ports for last 3 months.
3 Stores Lists.
4 Crew Lists.
3 Vaccination Lists.
3 Personal Effects Lists.
4 Arms and Ammunition Lists.
2 Animals Lists.
2 Narcotics Lists.
2 Passenger Lists.
1 Notice of Readiness.

APPROACHES: *Navigation Aids:*

LD-1	:	Conspicuous flare, Morse "U" white 15 seconds.
LD-2,3,4,5.	:	2 lights Morse "U" white 15 seconds.
LWD-1	:	2 lights Morse "U" white 15 seconds.
SBM Buoy	:	QK. FL. White 2 seconds, 5 miles.
FSU "Banio"	:	Floating storage unit shows: (a) All deck lights operational at night. (b) 2 lights, Morse "U" 15 seconds, 1 forward and 1 aft.

PILOTAGE: All tankers using the SBM must use the Shell Gabon pilotage service for both mooring and unmooring. The Berthing Master boards in a position approximately 2 miles N.W. of the SBM. Berthing takes place both day and night; should the Master be unwilling to berth at night then delays will be for the vessel's account.

The pilot ladder should be rigged on the port side as per international requirements with the accommodation ladder 3.0 m. above the water.

Vessels should arrive with derrick rigged and topped on the port side (minimum SWL 10 tonnes) in order to lift on board the mooring equipment and for the floating hose connections. The maximum stern trim of the vessel should be 8 ft.

The Berthing Master and his assistant, who both remain on board throughout loading, also acts as the Ship's Agent and is the focal point for liaison with the shore, communications being by VHF.

The pilot boat/mooring launch will assist mooring/unmooring and will stand-by throughout loading. A buoyant mooring rope should be provided aft by the tanker. Ship's engines should be kept ready for use at any time at the Berthing Master's request.

ANCHORAGE: Vessels must anchor without assistance. The recommended anchorage is in a location 2.0 miles N.W. of the FSU in a water depth of 19 fathoms (34.0 m.).

READINESS: Notice of Readiness will be accepted by the Berthing Master either:
(a) At vessel anchoring time, if delayed at the request of the terminal, provided the vessel is within her date range.
(b) On completion of mooring if vessel is berthed on arrival.
(c) On commencement of lay-days if vessel berthed prior to commencement of lay-days.

RESTRICTIONS: No draft restrictions. Depth of water is 114 ft.
MAX. SIZE: Max. ship size 130,000 tonnes d.w.t., weather permitting; this is the absolute maximum. Max. distance bow to manifold – 465 ft.
RADIO/VHF: *Arrival Advice:* Initial ETA should be sent to "Gamba Marine" via Telex or Fax at least 4 days before arrival. Subsequent confirmatory ETA messages should be passed to Gamba Marine by Telex or Fax every 24 hours.

Telecommunications: Telexes can be sent to "Shell Gabon OSU/4/41". Shell Gabon's Telex No. is 8206-GO. If the matter is urgent please prefix the telex with "GETIM".

Telephone communication is also available with the following numbers: (Country code 241) Tel. No. 55 83 60 or 55 84 65. Fax No. 55 85 77. After hours telephone No. (241) 559114 or (241) 559071.

VHF: Power 25 watts. Call sign "Gamba Marine" or "Banio".

Watch on Channel 12. Working on Channels 12 and 6. Range about 30 nautical miles.

Watch in English language during office hours (0700 – 1200 and 1400 – 1700).

Pilot launch: Watch on Channel 12 (when at sea). Range about 20 miles.

HEALTH: Any sickness on board should be reported in the ETA. No facilities are available for medical or dental treatment at Lucina. Vessels should therefore call at Port-Gentil before or after loading.

BERTHING: *SBM Export Facility:*

Position	:	Lat. 03° 39.6' S., Long. 10° 46.2' E.
Moorings (to buoy)	:	2×16 in. nylons × 45.0 m.
Moorings (to ship)	:	2×76 mm. stud link chafe chain.
Buoy diameter	:	8.0 m.
Buoy height	:	4.0 m.
Buoy connection	:	Connection to submarine lines on free rotating centre swivel section.
Buoy mooring	:	Chains with 120 ton holding power anchors.
Floating hose	:	865 ft. × 16 in. diameter hose.
Submarine hose	:	2×150 ft. × 16 in.
Submarine line	:	1,100 m. × 20 in. diameter line from FSU.
Loading rate	:	Maximum 2,700 cu.m.p.h.

MOORING: *Mooring Procedure:* Prior to the vessel's approach to the buoy, the mooring launch will have carried out the following:
(i) All cargo valves on the SBM opened, i.e. 2 seabed pipeline valves, 2 submarine pipeline valves and SPM valve.
(ii) The floating hoses turned back and secured to the SPM.
(iii) Starboard mooring line turned back around the SPM.

The mooring launch will then connect a 150 m. long × 250 mm. circumference polypropylene messenger to the mooring chain pick-up rope by means of a special screw type shackle and then stand-by to receive the tanker at the end of the floating hose line. During night time operations the mooring launch can assist by illuminating the position of floating hose.

When the tanker is within range, launch will connect the messenger to the ship's rope and the vessel will then be manoeuvred up towards the SPM until the mooring chain is on board and stoppered.

On no account should the vessel be warped up to the buoy by means of the winches and at no stage should excessive weight be allowed to come on to the messenger, especially during adverse swell conditions.

The use of OCIMF stoppers is *obligatory* at Lucina and, if only one is available, the starboard rope should be made fast clear of the water, but at a lesser tension.

LOADING: *Lucina Crude Oil Characteristics:*

Density at 15° C	:	0.8300
A.P.I. at 60° F	:	39.06
B.S.W.	:	0.02
Salinity	:	40 PPM.
Loading Rate	:	2,700 cu.m/hr.

Deballasting: There are no facilities for discharging ballast or slops ashore. Vessels must therefore arrive at the loading terminal with clean ballast on board.

Connection/Disconnection of Hoses: Connection and disconnection is carried out by the ship's crew with advice from the Berthing Master or his assistant. The hose is connected to the port side manifold using a 16 in. ASA 150 flanged connection.

Loading Procedure: During the loading, the Berthing Master remains on board and acts as Loading Master and maintains permanent contact with the terminal on VHF Channel 12.

If required, the loading rate can be adjusted for topping-off tanks and for completion of loading, or at any time if required. The Loading Master should be advised at least 1 hour before the completion of loading. A watchman must be stationed on the forecastle and in the manifold area throughout loading.

Documentation: All documentation will be completed by the Berthing/Loading Master after the completion of loading, on receipt of the shore and ship's figures.

MEDICAL: See "Health".

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No facilities. Engines not to be immobilised whilst at the SBM.

REPATRIATION: Not permitted.

TIME: GMT plus 1 hour throughout the year.

HOLIDAYS: None that effect operations.

SHORE LEAVE: Not allowed.

GARBAGE DISPOSAL/WASTE OIL DISPOSAL/SEAMAN'S CLUBS: S.B.M., so no facilities.

CURRENCY: Currency is C.F.A. Rate is fixed at 50 C.F.A. equal to 1 French Franc.

GENERAL: *Ship's Spares:* Customs require originals of invoices for clearing spares. Copies are not acceptable.

Territorial Waters: The sovereignty of the Republic of Gabon extends up to 200 nautical miles from the lowest sea water mark along the coast.

Mail: Mail will reach any European country within one week.

AUTHORITY: Shell Gabon, Gamba Marine (OSU/4), B.P. 146, Port Gentil, Republique du Gabon. *Tel:* (241) 558465. *Telex:* 8206 Go. *Cables:* Shell Gabon Port Gentil. *FAX:* (241) 55-8577. *Contact:* Marine Superintendent.

M'BYA TERMINAL (Mayumba): 03.53 S. 10.56 E.

LOCATION: The terminal is approximately 35 miles Southwest of Mayumba, in position Lat. 03° 53.4' S., Long. 10° 55.8' E.

PILOTAGE: All tankers mooring at the M'Bya loading buoy must use the Elf Gabon Pilot who should also be called upon in respect of all manoeuvres and unmooring operations.

ANCHORAGE: *Temporary Anchorage:* Situated 2,000 m. West of the loading buoy.

Ships shall come to anchor without the assistance of the Pilot. Depth of water 30 m. Nature of sea floor is sand and mud.

Under no circumstances shall vessels anchor in the prohibited zone.

MAX. SIZE: 150,000 d.w.t. Max. draft 18.0 m.

For tankers on second loading, the displacement shall not exceed 100,000 tons.

Depth of water at the loading buoy is 30 m. at mean lowest tide.

HEALTH: *Sanitary Inspection:* This is carried out on arrival. However, ships remaining at anchor may have Customs and Health formalities carried out through their Agent.

RADIO: *Notice of Arrival:* Tankers shall have their arrival at M'Bya notified by their agency representative 72 hours, 48 hours and 24 hours in advance.

Hereafter, they shall notify any appreciable change in the anticipated time of arrival.

Elf Gabon Terminal (Port Gentil):

Permanent watch by radiophone 2,182 kHz (400 watt).

(7,895 kHz information wavelength).

When a ship is expected, a permanent watch on VHF Channel 16 is kept by the Mayumba Terminal for short distance communications.

Ships must contact the Terminal in advance of their arrival. Elf Gabon will inform the vessel whether berthing will take place on arrival or whether it must anchor.

VHF: A permanent watch on Channel 6 is compulsory whilst at anchorage and at the loading buoy.

TUGS: All vessels coming to moor at M'Bya Terminal are obliged to use Elf Gabon tugs, the tugs supply their own towrope.

Elf Gabon also supply line handling boats.

LOADING BUOY: The CALM type buoy consists of a floating shell with a square cross section (side 8.50 m. × 8.50 m.) rotating freely around a central well equipped with 4 anchoring chains. This buoy was designed for loading ships of 30,000 d.w.t. to 150,000 d.w.t.

The crude is conveyed from the sealine to the buoy by 2 × 16 in. diameter subsea flexible lines and from the buoy to the tanker by 1 × 16 in. floating flexible line made up of 24 × 35 ft. sections and1 × 30 ft. tanker rail hose, i.e. a total length of 270 m. The maximum operating pressure of this flexible line is 10.5 bars. The connecting flange is equipped with a Camlock quick-connection system.

The tanker is moored with a "Samson" type system nylon hawser 150 ft. long with a SWL of 348 tonnes. The hawser is spliced and equipped with a galvanized thimble and with 5 m. of chafing chain at each end (438 tonnes SWL). The length of chain to be taken on board the tanker is equipped with a float which has a buoyancy of 5,000 lb.

Attached to this chain is a 150 m. long polypropylene hawser (diameter 100 mm.) and a 50 m. long inhaul (diameter 45 mm.).

One of the tanker's hawsers is used as a safety mooring line, i.e. as a back-up to the main mooring line.

The field personnel are responsible for line handling. A sufficiently long messenger line (minimum 150 m.) should be available on the tanker to enable the Elf Gabon personnel to work in complete safety.

MOORING: On board, mooring operations are carried out by the ship's crew which should comprise a sufficient number of competent hands to enable operations to be carried out quickly and safely.

The vessel shall be equipped with a boatrope at least 150 m. in length to enable Elf Gabon personnel to work in complete safety.

Notice of Readiness: Notice of Readiness shall be sent to Elf Gabon through the tanker's Agent.

Mooring Procedure: After having taken the Pilot on board in the temporary anchoring zone, the tanker shall approach the buoy at a reduced speed, following the instructions of the Elf Gabon Pilot.

The means provided for mooring are as follows:

1 supply boat (throughout the duration of the mooring period).

1 small boat and a crew of 3 line handlers.

1 Loading Master – Pilot who will remain on board the tanker throughout the mooring period.

When the tanker's bow is within 150 m. of the buoy, the tanker crew will hand to the line handling crew the end of a messenger line which is long enough (minimum length 150 m.) to be connected in complete safety by the Elf Gabon personnel to the inhaul of the main hawser. The tanker crew will then haul in the chafing chain of the main hawser by heaving on the floating inhauls. This manoeuvre requires the full attention of the crew. The Pilot shall be immediately notifed of any modification in the behaviour of the hawser. The distances between the bow of the tanker and the buoy shall be regularly communicated to the Pilot as well as the orientation of the hawser (the crew must be well trained in this manoeuvre). When the chafing chain has been heaved on to the forecastle, it will be connected as quickly as possible to another rope of the tanker as indicated by the Pilot.

During the entire operation, the supply boat will have the 16 in. flexible loading line in tow by its end and will keep it well away from the buoy so that it is not damaged during the manoeuvre.

Once the ship is moored, the supply boat will draw near the end of the flexible loading line under the cargo boom of the tanker (on the port side and rigged in advance) and the end of the flexible loading line shall be slung and heaved on board.

The ship shall be equipped with derricks and slings or straps required for stopping and securing the loading line at the tanker's rail. Once this is connected to the manifold on board, the supply boat shall be taken in tow by its stern. The supply boat will then be at the disposal of the tanker personnel who will keep a permanent watch on the buoy and, if necessary, increase the tension in the tow rope in order to avoid collision of the ship and the buoy. Once the ship is under tow, the loading operations may begin.

NOTE: For tankers on second loading, the mooring procedure may be modified according to the Pilot's instructions.

LOADING: An Elf Gabon representative, responsible for loading and safety is on permanent watch on board. The Master must supply him with all relevant information and assistance required to ensure operations run smoothly.

All exchanges of information on the site shall be on VHF Channel 6. Permanent watch on this channel is compulsory during the entire mooring period.

When the tanker is ready for loading, i.e. when the circuits have been set up and have been checked, the Chief Officer (i.e. the officer-in-charge of loading operations) will ask USF 1 to begin pumping.

Pumping rate 3,000 cu.m.p.h.

The Master will be held entirely responsible for operating the valves and for safe loading on board his ship.

If necessary, pumping speed can be reduced.

At least 10 minutes before loading is finished, the Terminal should be notified of the moment pumping should be stopped.

When loading is over, the tanks (ullages) will be inspected by a ship's officer in the presence of an Elf Gabon representative.

Average samples taken from each tank where the crude was loaded will be furnished to the ship by the Terminal.

These samples will be numbered and labelled showing the origin of the crude.

Handing Over of Documents: Generally speaking, handing over of documents takes place while on site. However, Elf Gabon reserves the right to order a ship to get underway immediately after loading and await documents at anchor.

BALLAST: *Ballast on Arrival:* Ships must arrive with clean and sufficient ballast and correct trim and be able to manoeuvre with complete safety.

Ballast on arrival shall be at least 30% of the deadweight capacity or must provide the vessel with an average draft of not less than 50% of the loaded draft.

Fuel tanks, fresh water tanks and miscellaneous supplies are not considered as ballast in the weight estimate.

Deballasting – Sea Pollution: Any vessel mooring with polluted ballast may be requested to leave the loading buoy. The cost of any resulting delay will be for the account of the vessel. Furthermore, Elf Gabon reseves the right to refuse to load the tanker.

Elf Gabon decline all responsibility in respect of any violation committed on board, in respect of the International Regulations for the prevention of sea pollution by hydrocarbons. Masters will be notified in writing each time any violation of these regulations is observed by the Elf Gabon representative.

Inspection of tanks after deballasting and before loading is carried out in the presence of the Elf Gabon representative.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

GENERAL: *Charts/Publications:* Masters will find the following particularly useful:

French Chart drawn up by the Marine Hydrographic Department No. 6666 SH.

French nautical instructions, Volume V – Series C, African West coast, 2nd volume.

Book of Lights and Fog Signals, Series C.

AUTHORITY: Elf Gabon, P.O. Box 525, Port Gentil, Gabon. *Tel:* 75 60 00. *Telex:* 8210-8216, 8262.

OGUENDJO TERMINAL: 01.27 S. 08.55 E. (See Plan)

LOCATION: Oguendjo Oil Terminal is located in the territorial waters of the Republic of Gabon and consists of:

1. Production Platform "B" located offshore in position Lat. 01° 26' 44.5" S., Long. 08° 57' 15" E. and Production Platform "C" located offshore in position Lat. 01° 28' 13.5" S., Long. 08° 54' 00" E.and Production Platform "Z" located offshore in position Lat. 01° 26' 1.04" S., Long. 08° 56' 43.27" E.
2. An offshore loading berth composed primarily of a floating storage vessel, "Bon Bateau", permanently affixed by a "wishbone" rigid mooring arm to a single point mooring buoy.
3. A submarine pipeline which runs from Production Platform "B" to the floating storage vessel, and a submarine pipeline which runs from Production Platform "C" to the floating storage vessel.

The floating storage vessel is located S.W. of Port Gentil in approximately 90 ft. of water and is situated in open and unsheltered waters approximately 9.5 miles off the coast in position Lat. 01° 27' 20.5" S., Long. 08° 55' 00" E. (See "Plan".)

The Company's administrative offices are located in Port Gentil. The Company's terminal offices, storage facilities and laboratory for testing stock are located onboard the floating storage vessel located at the loading berth.

DOCUMENTS: 4 copies each of the following documents are required when calling at Oguendjo Oil Terminal:

(a) Health Declaration and Vaccination Certificate for each crew member (vaccination against yellow fever is mandatory).
(b) Crew List.
(c) Derat Certificate/Derat Exemption.
(d) Crew Customs Declaration.
(e) Stores List.
(f) Animal List.
(g) Passenger List.
(h) Narcotics List.
(i) Clearance from Last Port.
(j) Arms and Ammunition List.
(k) Manifest.

The vessel's registry and the up-to-date oil record book shall also be made available to the Mooring Master and appropriate governmental officials.

APPROACHES: *Approaches, Navigational Aids and Landmarks to Oguendjo Oil Terminal:* Vessels are referred to the appropriate Hydrographic Office publications, Admiralty publications and official charts for the approaches, navigational aids and landmarks to Oguendjo Oil Terminal. Caution, however, is required when navigating near the Terminal since oil installations and marine activities may be encountered and mariners are recommended to pass to seaward of all such areas and are advised not to anchor or fish in the vicinity of such oil installations or their pipelines. Mariners are specifically cautioned that an oil well area exists S.S.W. of Port Gentil and all navigation is restricted in the area within a line joining the following positions: Lat. 00° 44' 30" S., Long. 08° 45' 00" E.; Lat. 00° 46' 40" S., Long. 08° 38' 26" E.; Lat. 01° 09' 22" S., Long. 08° 28' 36" E.; Lat. 01° 35' 54" S., Long. 08° 38' 03" E.; Lat. 01° 35' 54" S., Long. 09° 12' 35" E. (See "Plan").

Approach to Terminal:

Anchorage Area: The customary anchorage area for vessels awaiting the loading berth at the Terminal is a rectangular area with the following co-ordinates: Lat. 01° 36' S., Long. 08° 57' E.; Lat. 01° 36' S., Long. 09° 02' E.; Lat. 01° 40' S., Long. 08° 57' E.; Lat. 01° 40' S., Long. 09° 02' E. and with its centre located about 14 miles S.S.E. of the loading berth in position: Lat. 01° 38' S., Long. 08° 59.5' E. (See "Plan"). Anchorage within the restricted area referred to in Section above is prohibited unless otherwise designated by the Company or the Mooring Master.

Access Lane: The access lane from the customary anchorage to the Terminal is an area approximately 1.7 miles in width and with axis which runs from the anchorage area for approximately 12 miles in a direction of 325° true to the Mooring Master's pick-up zone. (See "Plan").

Mooring Master Pick-up Zone: The Mooring Master pick-up zone is a N.W. aligned semi-circle with a radius of 2.2 miles and with a centre position at Lat. 01° 27.5' S., Long. 08° 54" E. Following receipt of instructions from the Company or the Mooring Master, a lifting vessel should proceed from the anchorage area through the access lane to the Mooring Master's pick-up zone where the lifting vessel will be boarded by the Mooring Master for berthing or where the lifting vessel may be requested by the Company or the Mooring Master to temporarily anchor to await permission to enter the loading berth. (See "Plan").

Terminal Safety Zone: Lifting vessels are prohibited from navigating within the safety zone at the Oil Terminal at any time unless the Mooring Master is on board. The safety zone is bounded by lines connecting the following points:

Point	*Latitude (South)*	*Longitude (East)*
(a)	01° 28.75'	08° 54.10'
(b)	01° 26.85'	08° 57.82'
(c)	01° 26.32'	08° 57.27'
(d)	01° 26.32'	08° 55.66'
(e)	01° 27.96'	08° 53.52'

PILOTAGE: *Mooring Master:* Lifting vessels to be moored at the Loading berth will be boarded by a Mooring Master either at the customary anchorage or at the Mooring Master pick-up zone (See "Approaches"). The Mooring Master will be provided by the Company and will act as the Loading Master during loading operations. Lifting vessels will not be allowed to approach or depart from the loading berth without the assistance of the Company-designated Mooring Master. The Mooring Master will advise the lifting vessel personnel on the approaches to the loading berth; the operations of mooring and unmooring; the raising, connecting, disconnecting and lowering of the floating cargo hose, and in all other operations within the loading berth area. The Mooring Master will be in direct charge of the portable VHF radiotelephone and all the ship-to-tug and ship-to-launch communications will be by portable VHF radiotelephone. The lifting vessel's oil residue book shall be made available for inspection by the Mooring Master on his arrival at the lifting vessel. All manoeuvring of lifting vessels within the loading berth area shall be performed by the lifting vessel personnel as directed by the lifting vessel's officer in charge and in accordance with the procedure advised by the Mooring Master. the lifting vessel's Master or licensed deck officer must be on the bridge at all times while lifting vessels are manoeuvring.

Pilot Ladder: Lifting vessels are required to have a clean and efficient pilot ladder fitted with spreaders and manropes, safely and securely rigged, ready for the Mooring Master to embark and disembark on the port side of the lifting vessel and of sufficient length to reach the Mooring Master's launch. If at night, adequate lighting must be rigged overside for the Mooring Master to approach or depart from the port side of the lifting vessel and to use the pilot ladder safely. A lifebuoy with safety line and self-igniting light together with a rope messenger for the Mooring Master's bag shall also be available at the pilot ladder head. Lifting vessels shall afford a "Good Weather Lee" and shall reduce speed as directed by the Mooring Master in order to effect the safe embarking or disembarking of the Mooring Master.

Whenever, as in the case of large lifting vessels in light condition, the freeboard exceeds 30 ft., the accommodation ladder shall also be in use in conjunction with the pilot ladder and shall be lowered to about 12 ft. above the water with the pilot ladder rigged immediately adjacent to the bottom platform of the accommodation ladder. A mechanical hoist of an improved pattern shall be considered an acceptable alternative to a conventional pilot ladder for use in conjunction with the accommodation ladder, but a mechanical hoist whose operation relies upon a single wire shall not be considered of an approved pattern. The rigging of the pilot ladder for the embarkation and disembarkation of the Mooring Master shall be supervised by a licensed officer of the lifting vessel and shall be positioned so that the ladder is well clear of any overboard discharge and so that each step of the ladder rests securely against the lifting vessel's side. If, in the opinion of the Mooring Master, the pilot ladder is not safe, the Mooring Master may refuse to board the lifting vessel and any delay caused by such refusal shall be for the lifting vessel's account.

Lifting vessels shall provide food for the Mooring Master while on board the lifting vessel and shall accommodate the Mooring Master in the Pilot's cabin. Should the lifting vessel not be equipped with a pilot cabin, the Mooring Master shall be accommodated in a cabin equivalent to that required for an officer on the lifting vessel. The Mooring Master shall have access to the bridge and/or central area of the lifting vessel and such areas shall not be locked or otherwise arranged to prevent immediate entry at any time by the Mooring Master.

ANCHORAGES: See "Approaches".

RESTRICTIONS: The Terminal is operated 24 hours a day, 7 days a week, weather and other circumstances permitting. Vessels are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, weather and other circumstances permitting.

MAX. SIZE: Max. draft 60 ft. Max. d.w.t. 170,000. Max. displacement 200,000 tons.

The Mooring Master may allow lifting vessels in excess of 170,000 d.w.t. to moor at the loading berth provided the lifting vessel first obtains the written permission of the Company to moor at the facility.

RADIO/VHF: *Initial Radio Communications:* The radio station on the "Bon Bateau" will handle the initial radio communications between lifting vessels and the Company. The "Bon Bateau", call sign ELCT, is equipped with Mariset and maintains Mariset number SINGX 1241411.

Advice of Arrival: It is important that lifting vessels establish radio contact with the Company when 3 days' distance from Oguendjo Oil Terminal and maintain such contact until just prior to arrival at the Terminal. Lifting vessels should send an ETA message to the Company (Telex: 981-8268) not less than 72 hours prior to arrival at the Terminal, providing the following information:

1. The estimated time of arrival and name of local Agent.
2. The estimated draft, fore and aft, upon arrival.
3. The quality of crude oil to be loaded and the grade of such.
4. The estimated sailing draft.
5. The last port of call.
6. Whether the lifting vessel has a clean Bill of Health.
7. The distance from the bow to the centre of the lifting vessel's manifold.
8. Mooring equipment available on the bow of the lifting vessel (e.g.) Smit's Bracket, chain stoppers).
9. Confirmation that hose handling gear and mooring equipment, navigation equipment, radars, steering gear, and engine propulsion are in good order and condition, that the lifting vessel can accept a 20 in. (reducing to 16 in.) diameter floating hose fitted with a 150 ASA Camlock flange.
10. Whether the lifting vessel intends to load-on-top of existing slops and, if so, advise as to the quantity of slops in each tank on which cargo will be loaded-on-top.

This first ETA message should also include a definite statement of the details of any equipment required from the floating storage vessel for connecting the floating cargo hose to the lifting vessel's manifold. Further ETA messages should be sent to the Company when the vessel is 48 hours and 24 hours distance from Oguendjo Oil Terminal confirming or giving notice of any change in the 72 hour ETA and any other time after the 24 hour ETA message when a change by more than 2 hours occurs in the ETA. The 24 hour ETA message should include a positive statement regarding the lifting vessel's Readiness to Load on arrival and the number of hours that will be required by the lifting vessel to discharge clean ballast.

TUGS: The Company has a tug in the area equipped with fire fighting apparatus. Also see "Berthing – Mooring Operation".

BERTHING: *Loading Berth:* Lifting vessels are loaded by means of a floating cargo hose which runs from the floating storage vessel to the lifting vessel. The floating storage vessel is loaded by means of a submarine pipeline which runs from Production Platform "B" and a submarine pipeline which runs from Platform "C" to the single point mooring buoy to which the floating storage vessel is permanently affixed.
Mooring Facilities: The floating storage vessel is permanently affixed by a "wishbone" rigid mooring arm to the single point mooring buoy which has been secured to the seabed by 4 anchor legs. Lifting vessels are moored from their bow to the bow of the floating storage vessel by means of a terminal supplied 16 in. braided mooring hawser with a 20 ft. length of 3 in. chain attached to each end of the hawser. Upon completion of mooring, the mooring hawser will run from the bow of the floating storage vessel to the bow of the lifting vessel and will allow about 200 ft. of water to separate the bow of the two vessels. The loading berth will accept vessels up to 170,000 d.w.t. (Also see "Max. Size"), with displacement not to exceed 200,000 tons. The floating storage vessel is equipped with anchorage lights and a red (360°) displayed on its top mast.
Mooring Operation: The Company will provide a mooring launch to assist tug to assist in the mooring and unmooring of the lifting vessel. The mooring launch and assisting tug will be based at the loading berth and will operate under the direct control of the Mooring Master. When the lifting vessel proceeds to within a reasonable distance from the loading berth and upon advice from the Mooring Master, the messenger line of the lifting vessel will be lowered to the mooring launch and will be carried by the launch to a floating buoy where the messenger line will be secured to an 8 in. circumference pick-up rope. The Mooring Master will advise the lifting vessel to heave in the ropes until the chafing chain located at the end of the pick-up rope comes aboard. This chafing chain will be secured to the lifting vessel's bitts or Smit Bracket or chain stopper in such a manner that the Terminal-supplied 180 ft. long braided nylon hawser, which is affixed to the opposite end of the chafing chain, will remain outside the lifting vessel thereby allowing the chafing effect at the fairleads of the lifting vessel to be taken by the chafing chain. All mooring details in the sequence of movements shall be directed by the lifting vessel's officer in charge following consultation with the Mooring Master.

When the mooring operations have been completed, fire wires should be secured to the lifting vessel's bitts and one fire wire led out of the bow and one fire wire led out of the stern of the lifting vessel's port side. The fire wires should be of at least such a length that the eyes will be approximately 6 ft. above the surface of the water at all times so that they can be readily available to a tug in case of an emergency.
Vessel's Alertness: The loading berth is in open and unsheltered waters and the mooring is a flexible system; therefore, from the time the Mooring Master boards the lifting vessel until the lifting vessel has loaded her cargo and the Mooring Master has disembarked, full power must be available at all times on all deck winches and windlass and other gear of the lifting vessel. The lifting vessel's engines, steering machinery and other efficient manoeuvring equipment must likewise be maintained in constant readiness with full power for immediate use so as to allow the lifting vessel to manoeuvre in order to avoid a possible collision with the floating storage vessel or so as to allow the lifting vessel to depart from the loading berth at any time following a request by the Mooring Master or the Company to do so.

The lifting vessel's personnel should be at their stations and alert at all times during mooring, unmooring, hose handling and cargo loading operations. Where lifting vessels are equipped with an electric clutch control to the propeller shaft, such lifting vessels must disconnect the electrical clutch control and the manual clutch control so that there will be no possibility of the engine engaging the propeller shaft while the lifting vessel is moored. Where lifting vessels are turbine vessels are required to turn their propellers, such lifting vessel must turn such propellers in reverse motion. A constant watch in the engine room, control room, cargo control room and on the bridge shall be provided at all times aboard any lifting vessel while at/or in the vicinity of the loading berth.
Ship-to-Terminal Communications: The floating storage vessel is equipped with VHF radiotelephone using international frequencies and maintains a radio watch on the international VHF marine Channel 16. Not less than 12 hours prior to the lifting vessel's ETA at Oguendjo Oil Terminal, the lifting vessel is required to maintain a radio watch on R/T Frequency 2182 kHz and on VHF Channel 16. Masters are recommended to use this facility as soon as the lifting vessel is within range since such communications are the best means of avoiding delay in the mooring of the lifting vessel. While the Mooring Master is on board the lifting vessel, the Mooring Master will be in direct charge of the portable VHF ship-to-terminal radiotelephone and all ship-to-terminal, ship-to-tug and ship-to-launch communications will be by portable VHF radiotelephone. The Mooring Master will advise the Master and officers regarding the emergency whistle signals set up for use in the event the VHF radiotelephone units become inoperative. The use of the lifting vessel's radio station and/or battery charging equipment is prohibited during cargo loading operations.
Radio Watches: While at the anchorage awaiting the loading berth, lifting vessels should maintain a listening watch on R/T Frequency 2182 kHz and on VHF Channel 16 with the floating storage vessel.
LOADING: *Vessel's Gear:* Prior to the arrival of any lifting vessel at the loading berth, the derrick of the lifting vessel should be up and ready to lift the mooring and hose connection gear onboard the lifting vessel. The lifting vessel must be equipped on the forecastle head with all equipment recommended in the latest OCIMF publication on standards for equipment recommended for employment in the mooring of ships at single point moorings. The Smit Bracket or chain stopper shall be free, open and greased and a large coil of messenger line with sledgehammer and other necessary tools for mooring must be available. In the event that the lifting vessel is not equipped with Smit Brackets, snotter ropes shall be employed. The warping winches or windlass should be in good working order and condition at all times while at the loading berth and must be adequate to handle mooring lines under heavy strain and efficient stoppers must be readily available to "hang-off" the mooring lines and transfer same from the winch to the bitts.

On the starboard side opposite the lifting vessel's manifold, there must be equipment rated by an approved Classification Society and capable of lifting the floating cargo hose safely and efficiently (a 10 long ton lift) from the sea surface over the starboard rail to the lifting vessel's manifold. Lifting vessels must also have an adequate supply of nuts, bolts, gaskets and wrenches to connect the floating cargo hose. If, in the opinion of the Mooring Master, the lifting vessel is not equipped with adequate mooring or loading facilities or lines or gear, the Mooring Master must so inform the lifting vessel's Master and in such event the lifting vessel will not be bought into the loading berth until the facilities or lines or gear are deemed satisfactory by the Mooring Master.
Rate of Loading: The crude oil flow is by pump and the maximum crude oil loading rate for lifting vessels using 1×16 in. deck hose is approximately 30,000 bbls.p.h. or approximately 4,000 cu.m.p.h. In order to save vessel time and make the loading berth available for other lifting vessels, it is requested that clean ballast be pumped as fast as possible and that lifting vessels receive oil as fast as it can be delivered, with both operations having due regard for safety. It is also requested that any "Y" pieces, strainers or mud boxes restricting the flow of crude oil into the lifting vessel, be removed before the arrival of the lifting vessel at the loading berth.
Berthing: Tenders to load crude oil will normally be accepted and the loading berth will be assigned to a lifting vessel in the order of its arrival, provided the lifting vessel has a nomination for crude oil valid at the time and is in all respects equipped and ready to moor. In the event that mooring is delayed on account of weather, the lifting vessel will keep its position in line. Should the lifting vessel be required to leave the area on account of weather, the lifting vessel should keep in radio contact with the Terminal in order to make the lifting vessel available as soon as the weather moderates. The Company reserves the right to load lifting vessels "out of turn" following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other lifting vessels in line. For example, should weather make it necessary for a specific lifting vessel waiting at the loading berth or at the anchorage to vacate the area, the Company may load another lifting vessel which arrived at the anchorage after the specific lifting vessel but before the return of the specific lifting vessel which was waiting in line ahead of the other lifting vessel.
Connecting Hose: After the lifting vessel has been securely moored, the floating cargo hose will be hoisted to the lifting vessel's starboard side rail amidship by the lifting vessel's equipment. The floating cargo hose is a 20 in. (reducing to 16 in.) diameter floating hose, about 1,025 ft. in length, fitted with a 150 A.S.A. Camlock flange for connection to the vessel's manifold. The lifting vessel should have adapters and fittings onboard so as to enable such floating cargo hose to be connected to the lifting vessel's manifold. The raising, connecting, disconnecting and lowering of the floating cargo hose will be performed by the lifting vessel's crew as directed by the lifting vessel's officer-in-charge who must be present at all times during such operation and in accordance with the procedure advised by the Mooring Master who will remain on board as Loading Master during the entire time the lifting vessel is at the loading berth. Particular care should be taken during all such hose operations to avoid damage to the floating cargo hose and its fittings.
Loading Readiness and Arrival Time: Upon the arrival of the lifting vessel at the customary anchorage for the loading berth, the Master or his agent shall give the Company notice by letter, telegraph, wireless, or telephone that the lifting vessel is ready to load. Laytime shall commence upon the expiration of 6 hours following the acceptance of such notice by the Company provided that the lifting vessel has been nominated to load cargo and the Terminal holds such cargo nomination and further provided that the Mooring Master has deemed the lifting vessel to be in all respects ready to moor and load. The Notice of Readiness will be accepted only between 0600 hrs. and 1800 hrs. but will not be accepted at any time when Oguendjo Oil Terminal is closed. If, however, the lifting vessel is moved to the loading berth without delay after having arrived at any time and the lifting vessel is in all respects ready to moor and load in the opinion of the Mooring Master, the Notice of Readiness will be accepted at the time the Mooring Master boards the lifting vessel. Laytime shall continue until the floating cargo hose has been disconnected from the lifting vessel's manifold.
Responsibility: Prior to the commencement of any cargo loading operation, the Mooring Master and the officer-in-charge of the loading operations for the lifting vessel shall engage in a pre-loading conference to formulate a loading plan and to ensure that the lifting vessel is in all respects ready to load. No cargo loading shall take place without the permission of the Mooring Master which permission shall not be given until the pre-loading conference and the Lifting Vessel Safety Check List, have been completed. The lifting vessel's Master shall remain responsible for the safety of the lifting vessel and all operations on board the lifting vessel at all times. The Mooring Master will advise the officer-in-charge of the loading operations for the lifting vessel with respect to the loading pressures and hazards but the Mooring Master will not direct any aspect of the loading expect as may be necessary to protect the loading berth and related facilities and equipment. The manipulation of the lifting vessel's valves is the direct responsibility of lifting vessel's personnel. The Mooring Master shall have the right to suspend cargo loading operations or to require the lifting vessel to unmoor and depart from the loading berth at any time when the mooring plan, pre-loading plan or the safety requirements and regulations set forth herein are not being followed by the lifting vessel or at any time the Mooring Master believes or becomes aware of the existence of any other reason which in his opinion shall require the suspension of the mooring or the loading of the lifting vessel.
Oil Valve Control: The incoming oil stream is controlled on the floating storage vessel and the lifting vessel's valves must not be closed against the incoming oil stream. Such a procedure creates an excessive pressure which may damage the hose or other terminal facilities and

could result in a pollution incident. Lifting vessels will be held legally responsible for any damage resulting from the lifting vessel's failure to observe this precaution. Frequent checks of the cargo loading must be made by lifting vessel personnel during the loading operation so that a reduction in the loading rate, before topping-off the final tank or tanks, may be arranged through the Mooring Master by the officer-in-charge of the loading operations for the lifting vessel. A normal standby warning should be given about 20 minutes before the shutdown of the loading operations. Upon the request from a lifting vessel to shut down the loading operations, a minimum of 3 minutes will normally be required to stop the flow of crude oil. Lifting vessel's personnel shall be responsible for the call to stop the loading of the lifting vessel. When cargo has ceased to flow, the valves on the floating storage vessel will be closed and the lifting vessel's manifold valves may then be closed.

Emergency Signal: The emergency signal employed at Oguendjo Oil Terminal shall be the continuous blast on a vessel's whistle. Should normal ship-to-terminal communications fail, the emergency signal must be sounded by the lifting vessel. Steam or air should never be shut-off from the whistle of the lifting vessel during loading. Whenever the emergency whistle signal is used, the tug will be summoned to standby and all loading operations will be shut down until communications can be established with the vessel giving the signal. For this reason, it is requested that lifting vessels in the area refrain from using their whistles for other than essential purposes and that the use of the "continuous blast" whistle signal be reserved for emergency purposes only. All crew members who stand a deck watch during the transfer of crude oil are expected to know the emergency shutdown signal.

Code Flag: During all cargo loading operations, the International Code Flag "B" shall be displayed from a topmast signal halyard during daylight hours and a red light shall be displayed during the hours of darkness. The red light should be of a character as to be visible at a distance of at least 2 miles and show an unbroken light around the horizon.

Terminal Stops: Request for the terminal to stop the flow of crude oil at a predetermined tonnage must be made in writing to the Company and will be deemed to include the statement and understanding that the Company will not be responsible for (1) any errors, cost or claims arising from such request and (2) any crude oil loaded in excess of that requested will not be pumped back aboard the floating storage vessel. Some delays in stopping the flow of crude oil are always incurred when such a stop request is made.

BALLAST: *Precautions and Rules:* There are no facilities for the off-loading of dirty ballast but clean oil-free ballast may be discharged overboard from the lifting vessel. It is the responsibility of the Master of the lifting vessel to see that no oil (crude, bunker, diesel, bunker C, slops, residues, contaminated ballast water, or oily bilge water) is pumped or spilled overboard from the lifting vessel. All deck scuppers must be plugged tight and adequate drip pans with sand and sawdust must be provided where necessary on deck for use at all times, especially when disconnecting hoses, in order to prevent any such loss of oil overboard. The waters in and adjacent to the loading berth must not be polluted and only clean, oil-free, ballast may be discharged inside of a line running 50 miles from and parallel to the coastline of the Republic of Gabon.

The discharge of oil mixtures from lifting vessels while en route to Oguendjo Oil Terminal is prohibited except when the following conditions are all satisfied:

(1) The instantaneous rate of discharge of oil content of the oily mixture does not exceed 60 litres per mile.

(2) The total quantity of oil discharged on the ballast voyage does not exceed that quantity permitted by the International Convention for the Prevention of Pollution from ships 1973 as modified by the Protocol of 1978 related thereto, and

(3) The lifting vessel is more than 50 miles from the nearest point on the coastline of the Republic of Gabon.

Masters are warned that when disposing of dirty ballast or bilge water, (50 miles or more from the coastline of the Republic of Gabon), all pipelines, sea suctions, strainers and pumps which are later to used to discharged clean ballast, must be flushed clean, so that there will be no chance of even a small amount of pollution when the clean ballast is pumped overboard.

Lifting vessels must have sufficient ballast for safe manoeuvring and where practicable, should arrive at the loading berth with the propeller completely submerged amd properly trimmed. The Mooring Master may refuse to permit the mooring of any lifting vessel not in compliance with these requirements until the vessel takes on sufficient ballast and/or alters her trim to meet these requirements.

As soon as practicable after arrival, lifting vessel's tanks will be inspected for evidence of oil in ballast and during the discharge of ballast a similar inspection will take place. If evidence of oil appears at either of these inspections, the lifting vessel must vacate the loading berth and discharge such dirty ballast.

Any lifting vessel required to vacate the loading berth for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered and at the same time loses any priority held for loading. Lifting vessels must tender a new Notice of Readiness upon their return and lifting vessel will be entered for loading upon the Company's acceptance of the new Notice of Readiness.

Lifting vessels must keep a constant watch on the side of the lifting vessel from which clean ballast is being discharged for any indication of water discolouration or oil sheen. Discharge of ballast must be immediately suspended should there be any indication of discolouration or sheen and the Mooring Master shall be immediately informed of such. An investigation of any such discolouration or sheen shall be carried out by the lifting vessel and the findings reported to the Mooring Master. Discharging shall not resume without permission of the Mooring Master.

If, during any inspection or during the process of loading, it is revealed that a lifting vessel's tank is not oil-tight, the lifting vessel will be rejected by the Mooring Master and refused further loading until satisfactory evidence of effective repairs is submitted and the lifting vessel is duly certified by Lloyd's Register of Shipping, American Bureau of Shipping or another similarly recognised classification society.

In addition to the lights usually displayed, lifting vessels are required to illuminate the lifting vessel and the waters around the lifting vessel with all available and suitable searchlights and floodlights during the discharge of clean ballast and the loading of crude oil during the hours of darkness and restricted visibility. Such illumination must be to the satisfaction of the Mooring Master and must be undertaken so as to assist in the loading operations and in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Lifting vessels unable to illuminate the sea satisfactorily may not discharge ballast or engage in the loading of crude oil during the hours of darkness and any such delay shall be for the account of the lifting vessel.

Loading and Deballasting Simultaneously: Lifting vessels equipped with a separate system of ballast tanks will be allowed to discharge clean ballast and load oil simultaneously, providing that the approval of the Mooring Master if first obtained.

MEDICAL: *Emergency Medical Assistance:* Lifting vessels requiring emergency assistance should contact Oguendjo Oil Terminal by VHF radio and supply the necessary pertinent information which will be passed on to the vessel's Agent. Neither medical nor hospital facilities are available at Oguendjo Oil Terminal, but private doctors and hospital facilities are available in the town of Port Gentil.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Consular or diplomatic representatives for many nations maintain offices in the town of Port Gentil and Libreville.

REPAIRS: The Masters of lifting vessels loading at the loading berth are advised that the loading berth is located in open and unsheltered waters and under no circumstances may engines be shut down for repairs while the lifting vessel is at the loading berth or at the anchorage. There are no facilities for making repairs to a lifting vessel at the Terminal and no repairs will be allowed at the loading berth. However, arrangements can be made through the vessel's Agent to utilise the repair facilities at other ports.

SURVEYORS: *Marine Survey and Cargo Inspection Service:* No cargo inspectors or marine surveyors are based in the area, but inspectors and surveyors who reside at other ports can be arranged through the vessel's Agent.

REPATRIATION: No facilities available.

TIME: GMT plus 1 hour. Summer time not kept.

SHORE LEAVE: Lifting vessel personnel (other than medical emergency cases) are not allowed to embark or disembark from the lifting vessel at the loading berth.

WEATHER: *General:* The Company can advise of the following general environmental characteristics for the area off the coast of the Republic of Gabon, but the navigator is referred to the published sailing instructions and directions for the area for more detailed information on the climate, weather, wind, tide, current and sea.

Climate: The coast between Cape Lopez and the Congo River is dominated by the Basin of the Ogooue and is covered with a dense equatorial forest which is frequently subjected to heavy rainfall. The area exhibits a characteristic diurnal variation in cloudiness, and the climate along the coastline is heavily influenced by the heated continental interior, the extratropical storms, and the cool Benguela current. The average annual rainfall is 123 in. and ranges from a maximum of 19.9 in. in November to a minimum of 0.04 in. in July. Temperatures seldom exceed 95°F. and seldom fall below 65°F. and are moderately high throughout the year with an average yearly temperature of 79°F. and a mean maximum temperature of 86°F.

January is the stormiest month because thunder squalls (combined thunderstorms and squalls) are frequent. Summarised wind data does not indicate strong winds during this month, but gusty winds occur during the thunderstorms, these being brief and irregular. In February and March, the weather is unsettled with occasional rain. In April weather generally improves, becoming cooler and drier. In May the weather becomes fair, but by the end of the month it again becomes more settled and a breeze flows steadily from a Southeasterly direction. In June and July, the weather is very misty and gloomy, decreasing visibility significantly. In August, light breeze persist, generally cloudy and overcast conditions exists, by the end of the month, heavy mists clear away. In September, hotter weather and more Southwesterly wind develops with frequent light showers. Sea breezes become stronger to the end of the month, and thunder squalls moving from the S.E. occur. In October, the wind is still more Westerly with occasional small showers, and generally overcast skies till noon. In November and December, strong breezes move off the land sometimes with rain, thunder and lighting.

Average annual rainfall	123 in.
Average daily maximum air temperature	84°F.
Average daily minimum air temperature	74°F.
Extreme highest average monthly air temperature	99°F.
Extreme lowest average monthly air temperature	60°F.
Average relative humidity (0700 hrs.)	92%
Average relative humidity (1300 hrs.)	76%

Winds: The prevailing winds off the Republic of Gabon are characteristically light and Southerly the year around. Land and sea breezes dominate along the coast and generally blow between the S.W. and S.E. The highest offshore wind speeds occur during local thunder squalls (combined occurrences of thunderstorms and squalls) which may have brief wind gusts up to 60-70 knots. These thunder squalls may be violent, occur quickly and without warning, and are often accompanied by heavy winds, seas, swell, and rain which may reduce visibility substantially.

Tides: The tides can be predicted with reasonable accuracy, though use of the tide tables for Takoradi in Ghana, with the appropriate correction factor for Cape Lopez applied.

Currents: The Benguela Current flows North along the West coast of Africa from the vicinity of the Cape of Good Hope to the Gulf of Guinea. The general direction of the current off the Republic of Gabon is parallel to the coast, although in the vicinity of Cape Lopez the main body takes a more Westerly course. The current is generally stronger during December and January when the current flows Southward at 10 to 20 miles off Cape Lopez, but during the remaining months of the year, the current generally sets in a Northwesterly direction and sometimes attains a velocity of about 2 knots. The current is usually more rapid close to the coast than it is farther offshore, but its velocity is variable because of the effect of the winds.

Seas: The coast is influenced by swells from the South and S.W., but most of the higher waves occur in association with thunder squalls. The highest collection of waves can be expected during March and April and during October and December, but waves of 6 ft. or more do not occur more than 2.5 per cent of the time.

GENERAL: *Flag:* Lifting vessels are required to fly the flag of the Republic of Gabon on the foremast during daylight hours while in the territorial waters of the Republic of Gabon. The territorial waters extend 12 nautical miles seaward from the coastline of the Republic of Gabon.

Government Officials: Governmental officials such as the Customs Officer, Quarantine Officer, Immigration Officer, Captain of the Port and the Police, are stationed in the town of Port Gentil. Should Customs guards be stationed on board the lifting vessel while at the loading berth, it is expected that the lifting vessel will provide food for these guards and other governmental officials. Lifting vessels calling at the loading berth must provide an accommodation ladder rigged on the port side for such governmental officals.

Quarantine Regulations: The rules governing the quarantine of lifting vessels are the same as those found in other parts of the world.

Supplies: Commissary supplies, steward stores, laundry services, fresh water, marine lubricants and bunkers are not available through the Company and may not be loaded at the loading berth. Any questions concerning the availability of such items from other sources and the loading of such items elsewhere should be handled through the vessel's Agent.

Agency: The Company does not perform any vessel agency functions. Lifting vessels calling at Oguendjo Oil Terminal must arrange for their own Agents.

Contraband: The Company prohibits unauthorised craft from coming alongside lifting vessels while at the loading berth without the permission of the Mooring Master. To avoid the possibility of undesirable elements getting aboard lifting vessels, it is recommended that Masters discourage any such craft from coming alongside while lifting vessels are at or in the vicinity of the loading berth.

Garbage: The dumping of garbage, sewage, and refuse overboard is prohibited and there are no facilities for receiving such at the Terminal.

Visitors: Vistors are not allowed to embark or disembark from the lifting vessel at the loading berth.

AUTHORITY: Kelt Gabon, B.P. 780, Port Gentil, Republic of Gabon.

Contact: T. Botrel, Operations Manager.

OVENDO (Owendo): 00.17 N. 09.30 E. (See Plan)

SHIPMASTER'S REPORT 1978:

Vessel, length 156 m., breadth 22.0 m. Draft at the time, 30 ft.

APPROACHES: The channel buoys showed very well on radar on the 3 and 6 miles ranges, even during heavy rain, but the lights on the red buoys are poor and all buoys occasionally unlit.

PILOTAGE: There are 2 French Pilots who may be contacted on VHF Channel 16 when in range, they are ordered by the Agent to berth vessels only, although they will pass on advice to vessels regarding anchoring.

ANCHORAGES: Depths in the channel and river were found to be as stated during low water with a depth of 33 ft. over all the anchorage. Maximum draft allowed at this time was 30 ft.

The holding ground is good, 4 shackles were used for a total ship weight of 19,000 tons plus a small coaster alongside.

The tides are regular with only a very short slack water period, and run at between 4 and 6 knots.

TUGS: There is 1 tug of approximately 1,000 h.p. which assists in berthing, either towing or pushing.

BERTHING: Well fendered modern concrete quay, 450 m. in length, laid out as per "Plan" in the "Guide". The normal practice is for there to be 2 ships of around 150 m. and one smaller ship alongside at one time. The inshore side of this quay is for small craft only.

Depths alongside Berth No. 1, 23 ft.; No. 2, 18 ft. and No. 3, 22 ft.

FRESH WATER: This is obtainable while alongside the quay but only in a dire emergency at the anchorage from the tug which can supply up to 8 tons.

REPAIRS: Only very small repairs are possible and it is suggested that a receipt is obtained for any parts sent ashore.

REPATRIATION: There are 2 flights a week from Libreville to Paris and approximately 12 flights weekly to Abidjan.

SHIPCHANDLER: There is no chandler for any form of stores, the only possibility being self-purchase at the local (Libreville) supermarket. All goods are imported and therefore very expensive.

HOLIDAYS: 12th March, Gabonese Independence.

MARINE CLUB: There is a marine club about 1 km. from Ovendo in the Libreville direction (swimming pool, etc.).

SHIPMASTER'S REPORT: February 1979.

DOCUMENTS: Ship's Papers (sighted), Crew Lists (5), Passenger Lists (5), Port of Call (4), Crew's Custom Declaration (1), Marine Health (1), Arms and Ammunition (1).

APPROACHES: Gambia Lighthouse range 20 miles is easy to pick up, channel is well marked by buoys with good radar reflectors. No Pilot is available for the channel. After last buoy proceed directly to anchorage.

Soundings taken throughout channel showed a least depth of 20 m.

PILOTAGE: Pilot boards by tug which is compulsory for docking and undocking. Vessels berthed head out for sailing.

ANCHORAGES: Waiting anchorage is 0.5 to 1 mile West of the wharf.

RADIO: Agent keeps watch on VHF Channel 16.

BERTHING: A new port has been built about 4 miles South of old lighter jetties at Libreville, consisting of 1 wharf at right angles to the shore in 15 m. of water, capable of docking 2 ocean-going vessels.

STEVEDORES: Slow but efficient, about 6 tons per gang man hour.

REPATRIATION: Airport 12 miles from port, 6 flights per week direct to Paris.

TRANSPORT: Available by bus or taxi to the town.

SHORE LEAVE: Allowed.

SEAMEN'S CLUB: Within 1 mile of port with bar and swimming pool.

SHIPMASTER'S REPORT: March 1980.

PILOTAGE: Pilot compulsory. Pilot boards 1 mile S.W. of Ovendo Pier and requires 24 hours' and 12 hours' notice.

ANCHORAGE: One mile S.W. of the pier.

RESTRICTIONS: Pilot advises that vessels can only berth on slack water as a 5 – 6 knot (approx.) ebb tide runs. Vessels able to sail at any time, however, it is not advisable to manoeuvre during darkness as buoys are frequently unlit. Vessels are able to proceed from sea to anchorage at any time.

MAX. SIZE: Max. draft at Ovendo is 9.2 m. Mean tidal range 1.5 m.

TUGS: One tug available.

VHF: Pilot and Port Authority on Channel 16. Agent on Channel 9.

BERTHING: The berth at Ovendo is 20 miles from the entrance. There is one jetty 450 m. in length. The mean tidal range at the berth is 1.5 m. and the bottom in the vicinity of the berth is mud. Container vessels use the port and discharge using ship's gear. There is ample handling and storage space for containers. "Delmas" container vessels use the port frequently and they take preference over most other vessels.

SERVICES: The following are available:

Fresh water (rate 25 tonnes p.h.), airport, doctor and hospital.

The following are not available:

Fresh provisions, repair facilities, dry dock facilities, machine shop, surveyors, laundry service, fuel, lubricating oils, groceries, meats and slop facilities.

GENERAL: Arriving from a S.W. direction no difficulties were encountered, Point Gonbe was visible 18 miles on the radar and later the Fairway Buoy was visible at 10 miles. All the channel buoys showed up at 6 to 8 miles on radar.

The Fairway Buoy is very large, similar to the type used on the American coast. Chart used 1877 (Estuaire du Gabon).

Conspicuous wreck marked in position Lat. 0° 24.4' N., Long. 9° 17.2' E. is no longer visible.

On entering inward I checked the buoys' positions against the land and found:

Fairway Buoy Gp. Fl.(2) 6 secs. In position. Unlit.
(Course 090°×3.2 M) Fl. G. 4 secs. In position. Lit.
(Course 115°×2.1 M) Gp. Occ(2) G. 6 secs. In position. Unlit.
(Course 115°×2.1 M) Between { Occ. R. 4 secs. In position. Unlit.
Fl. G 4 secs. In position. Unlit.
(Course 137°×3.0 M) Fl. R. 4 secs. Out of position. Unlit.
(Course 137°×6.1 M) Occ. 6 secs. In position. Lit.

After passing the Fl. R. 4 sec. buoy, vessel was about to set a course to the anchorage off the port of Libreville but was told that vessels carrying cars were to proceed to the new port of "Ovendo" some 8.5 miles further up the river.

On arrival I was told to anchor 1 mile S.W. of the new pier.

Quite a modern port as described in the "Guide".

Laying alongside the berth is not very comfortable when the ebb tide starts to flow, anything up to 6 knots within half an hour of HW, getting its force from three rivers, River Egoume, River Ikoy and the main river Komo.

Vessels always berth on slack water with the aid of a tug to push. Vessels can leave at any time. Port employs two French Pilots.

REPORT: 1982.

SHIP SPARES: Customs require originals of invoices G11 for clearing spares. Copies are not acceptable.

SHIPMASTER'S REPORT: February 1989.

APPROACHES: All the buoys in the Channel, including the Fairway Buoy, are missing and they are unlikely to be replaced, according to the Pilot. During the transit to the berth all positions are by radar, due to lack of visual points. Arrival and departure should be in daylight.

Great care must be taken on arrival off the Fairway Buoy position as some of the points of land do not show up well.

The sailing draft of 10.4 m. is governed by the depth in the channel. There are several 9 m. patches and banks. The best plan is to leave the berth at LW, in order to avoid the 5 knot current during unberthing, then anchor off the berth until about 1 hour before HW, then proceed outward. This gives the vessel the benefit of 1.7 m. – 2.0 m. rise in tide.

PILOTAGE: 2 pilots (French) available for berthing and unberthing.

On arrival, Pilot boards at the Fairway Buoy position. This has to be arranged by the Charterer or Owner. Many ships, shallow draft or regular traders, do not take the Pilot at the Fairway Buoy position.

TUGS: One tug assists with berthing and unberthing.

BERTHING: *New Ore Berth:* This is a single "T" jetty with dolphins. We were the second vessel to berth here. There is a single loading arm that covers the whole 6 hatches, without ship having to shift. Loading rate is about 3,000 t.p.h. when in full operation. During our stay, technicians were still working on varous items. Manganese Ore is either supplied ex-stock or directly from wagons.

Vessel berths port or starboard side to, with one tug assisting. Moorings consisted of 3/2/2 each end and no wires if possible. One anchor is let go on approach.

The berth is situated just down river from the Port of Ovendo. The port itself handles large vessels and has a depth alongside of about 8.0 m.

FRESH WATER: Not available ex-berth.

FUEL: Not available ex-berth.

REPATRIATION: Possible. One crew member landed ashore for medical treatment and repatriation.

SHORE LEAVE: Difficult, as launches are required and they are expensive. The town of Libreville is some distance from the port.

GENERAL: *Officials:* Boarding party boarded on arrival. Usual paperwork required. The bond was not sealed.

Communications: The telephone and telex service to the Agent's office was good.

Draft Survey: This is undertaken by ship's staff. The shippers require a loading plan prior to arrival. The Bill of Lading figures were the same as the ship's figures.

Supplies: There is no ship chandler at the port. There is an excellent supermarket in Libreville which is of European standard but items are very expensive.

SHIPMASTER'S REPORT: February 1989.

I was in Owendo in February 1989, and I wish to advise you that an elevator for loading manganese ore has been completed (B.A. Chart No. 1877 – Works in progress – 1987).

The elevator has a maximum loading capacity of 3,000 tonnes per hour and is situated on dolphins. Berthing is also on dolphins with maximum draft of 12.5 m. Density is brackish. Pilot boards the vessel 1.77 nautical miles off the berth.

For information on the position of the buoys in the Passe de la Penelope, Masters should contact Owendo Pilot on VHF Channel 16, as the positions of buoys are unreliable.

SHIPOWNER'S REPORT: April 1989.

One of our vessels suffered propeller damage from underwater obstacles in Owendo in April 1989. We know of two other cases, both in 1984.

SHIPMASTER'S REPORT: May 1991.

Vessel: 10,300 g.r.t., 5,580 n.r.t., LOA 150 m., Summer draft 9.05 m.

Vessel anchored off Port Owendo in a position about 1.1 miles S.W. of the head of the Mangan Pier, in position Lat. 00° 16.15' N., Long. 09° 29.00' E.

The pilot requested the vessel to anchor in or near this position, which seems to be the normal anchorage requested. The bottom is heavy grey mud with good holding. Water depths are as according to Chart No. 1877.

At the anchorage, the flood tide starts 2 hours 30 minutes after L.W. Libreville, and runs at about 2.5 knots. The ebb tide starts about 2 hours after H.W. Libreville, and runs at about 3.25 knots. This velocity was confirmed by the local pilot as an average, only after extended heavy rains does the ebb tide attain a speed of over 4 knots.

The buoy in Passe de la Penelope lies about 1.5 cables further South. The buoy 2.7 miles North of Pt.Pongara is in position, but has been reported as being unreliable. Both buoys are properly lit, the buoy in Passe de Penelope was visible at night at 5.6 miles, the buoy North of Pt.Pongara at about 4.3 miles. The bell buoy 1.6 miles East of Pt.Pongara is missing, and according to the pilot, it is not intended to replace it. The buoy at the pilot boarding area is in position, but unlit.

One tug available for berthing, which for our vessel (no bow thruster) was quite sufficient.

Pilot usually boards from the tug, about one mile South of the Mangan Berth.

Pilot usually berths vessel just after L.W. (day and night, if requested by Agent) with starboard side alongside. For vessels with draft over 6.5 m., only Berth No. 3 is available., but even here the forward draft should not exceed 6.5 m. The aft draft can be up to 9.0 m. Berth No. 2 is presently not available, as heavy silting has occurred. Vessels up to 6.5 m. draft will be berthed at Berth No. 3 (See "Plan").

A small dredger is available, but progress is very limited, as the silting at Berth No. 2 is heavy.

At Berth No. 3, starboard side alongside, the vessel should moor very carefully, as it is possible, according to the pilot, that the ebb tide can run up to nearly 6 knots after long and heavy rain. We experienced a current of about 5 knots on the corner of the berth. As it is a pier on pilings, the water can run freely underneath the pier. At ebb tide, the current is setting off from the pier. Bollards on the berth are strong and sufficient.

Departure is possible at any time, but preferable just before L.W., when the current is not so strong and assists in getting the vessel off the berth.

SHIPMASTER'S REPORT: September 1994.

Circular Letters from Agent:

WARNING TO CAPTAINS OF ORE CARRIER
VESSELS BERTHING AT OWENDO TERMINAL

Captains of ore carrier vessels berthing at Owendo Manganese Terminal, are hereby advised by COMILOG, as Owner of the Terminal, that vessels are systematically submitted to strong currents when berthed at the Terminal, especially during the ebb period.

Therefore, they are kindly requested to stick to Pilot recommendations, to double mooring ropes and, when the current is becoming stronger, to keep a crew member on watch.

In case of damage to the Terminal caused by the vessel, COMILOG will keep the Owner, or disponant Owner of the vessel, fully responsible.

Dear Captain,

The characteristics of our ore port do not allow crew to move about freely from vessel on shore. For moving, it is necessary to take a shuttle boat and for this purpose, COMILOG envisages to put in its place a boat service. The tariff is as follows:

One Trip	Quay/vessel/quay, during working days (0700 hrs. – 1800 hrs.):	FF 1,113.00
One Trip	Quay/vessel/quay, Sunday/holidays:	FF 1,669.50

Editor's Note:
100 FCFA = 1 French Franc.
500 FCFA = U.S.$ 1.00.

SHIPMASTER'S REPORT: July 1995.

Pilotage: There is one Gabonese Pilot and 2 trainee Pilots. Pilot boards at Fairway Buoy (Pilot Buoy: Lat. 0° 17.46' N., Long. 9° 27.21' E.). Vessels berth and unberth at high water during daylight only. There is no night pilotage.

Approaches: The approach channel is marked by buoys:

(1) Themis Buoy (red): Lat. 0° 25.72' N., Long. 9° 13.57' E. Flashing red 4 seconds.
(2) Penelope Buoy (green): Lat. 0° 25.20' N., Long. 9° 16.73' E. Light not working.
(3) Caraibe Buoy (red): Lat. 0° 23.87' N., Long. 9° 20.83' E. Light not working.
(4) Papillon Buoy (green): Missing.
(5) South East Buoy (red): Lat. 0° 21.59' N., Long. 9° 23.01' E. Light not working.
(6) Pilot Buoy (red and white vertical stripes): Lat. 0° 17.46' N., Long. 9° 27.21' E. Light not working.

Arrival and departure should be undertaken during the daylight only as channel buoy lights are not working. All the buoys can be picked-up on radar at a distance of about 6 miles. Position plotting should be done by radar, using land contours, as lighthouses become obscured in the thick mangroves, and lights are not working.

Maximum draft in the channel is 11.0 m., which is at a bar near Pilot Buoy. Navigation in the channel should be done with caution, as during the flood tide current is about 3 knots, and during ebb tide current is about 5 knots. The strongest and most erratic current was experienced at Themis Buoy.

Anchorage: Anchoring position as advised by Pilot (Approximately 5 cables West of Pilot Buoy). There is also an inner anchorage, but it is mostly used by vessels loading logs at anchorage. Holding ground is good. Enough cable should be paid out, taking into account the strong current. Vessels anchor in a depth of 10 m. – 11 m. (We anchored with starboard anchor with 6 shackles on deck and experienced no difficulties).

Tugs: One tug assists during berthing and unberthing.

Berthing: Ore berth is "T" jetty with dolphins. There is about 5 knots current at the berth, hence strong mooring ropes are required. Usual mooring arrangement is 4-3-2 at each end. Care should always be taken to keep the vessel alongside, as parting of ropes is quite frequent during the change of tide. We berthed starboard side alongside, using port anchor with 4 shackles on deck.

Density: Dock water density was found to be 1022, and at times 1021.

VHF: Port Control on Channel 16 and pilot station on Channel 12.

Health: Free Pratique is granted only after vessel is berthed.

Loading: There is a single loader which can load Manganese Ore at a rate of 2,800 tonnes/hr., but during the vessel's stay an average rate of 2,200 tonnes/hr. was observed. Vessels can load without having to shift. An error of 0.8% was observed between shore figures and draft survey conducted by the ship's staff.

Identification Card: Required.

Shore Leave: Permitted.

Fresh Water: Fresh water is available at Commercial Wharf (Container Jetty) through pipeline. Cost of fresh water is about U.S.$1.00 per ton.

Fuel: All grades of fuel can be supplied by barge to any berth. Ample notice for fuel supply is required as fuel comes from Port Gentil.

Repatriation: There is an international airport at Libreville, which is about 20 km. from Owendo. International flights go via Paris.

Medical: Good medical facilities are available at Libreville.

Documents:

1 copy Crew List.
1 copy Stores List.
1 copy Personal Property List.
1 copy Health Declaration.
1 copy Vaccination List.
1 copy Ports of Call List.
1 copy Passenger List.
1 copy Arms and Ammunition List.
1 copy Dangerous Cargo List.

All the official work was handled by Agent. No Customs or Immigration Officer boarded the vessel. Bond was not sealed.

Draft Survey: Draft survey was carried out by the ship's staff.
Supplies: There is no shipchandler in the port. There is a very good supermarket in Libreville, but goods are very expensive. Even the general market is very expensive. All articles of general type can be purchased at the supermarket.

AGENT: See "Libreville".

PORT GENTIL: 00.43 S. 08.48 E. (See Plan)

LOCATION: The deep water port of Port Gentil is located between Point Clairette (Sogara Refinery) and the Alcyon Bank (CFG factory).
DOCUMENTS:
Cargo Manifest.
Stores List.
Crew's Personal Effects List.
Crew List.
List of Ports of Call (not compulsory).
Health Certificate.
Ship's Official Papers.
APPROACHES: Buoyed channel, no lights. Minimum depth 15 m.
PILOTAGE: Pilot service operates 24 hours a day. Vessels berth day and night, including Sogara Quay where small white products tankers berth.
ANCHORAGES: An anchorage area for timber vessels faces the old port. Access to the zone is with Pilot onboard. 5 anchorages available (See "Plan").

An anchorage area for waiting vessels intending to berth at the new port, or at the Sogara Refinery is 3 miles N.E. of Pointe Clairette.
RESTRICTIONS: See "Pilotage".

The water area in the port is clear with no obstructions apart from the Alcyon Bank to the CFG factory. Dredging carried out permits manoeuvring of vessels to Berth No. 2 of the Commercial Quay.
VHF: Port Control on VHF Channel 16, Working Channel 12.
TUGS: Not available.
BERTHING: *Commercial Quay:* 210 m. of quay with 11 m. depth, 180 m. with 9.0 m. depth, 30 m. with 6.5 m. depth and 75 m. of quay with a depth of 2.5 m. which constitutes the barge quay. The quay bollards are spaced 30 m. apart. This quay is able to accommodate 2 × 170 m. LOA vessels.
Fish Quay: The fish quay runs at right angles to the Commercial Quay (107° – 287°). 80 m. with 8 m. depth of water; 197 m. with 7 m. depth of water.

This quay is reserved as a priority for fishing vessels, but can be partially used for berthing vessels of a commercial nature. The quay bollards are spaced 20 m. apart.
Storage: 6,000 sq.m. of covered storage, divided into 6 bays of 1,000 sq.m. each. 3 bays leased to SDV (8 reefer points available). 3 bays leased to SAGA (1 reefer point available). 1 Customs warehouse located in the SDV and SAGA bays. 1 shed and 2 bays leased to Eagle with 12,657 sq.m. in 2nd Zone. 1 shed and 3 bays leased to SATRAM with 19,682 sq.m. in 2nd Zone.

Open storage area: Current paved surfaces of open storage areas – 14,000 sq.m. (All 1st Zone is paved).
40,000 sq.m. for large (heavy) logs.
STEVEDORES: Work in 3 shifts throughout 24 hours.
MEDICAL: The port infirmary is located in the SDV Building.
TANKERS: *Commercial Quay:* Two pipelines with own connection take vegetable oil to Agrogabon tanks.

One pipeline with connection takes industrial oil to Pizzolub tanks.
Fish Quay: One pipeline with 2 connections takes gas oil to Mobil tanks (available for small tankers).

Prince's Bay, point for unrefined petrol by sealine is available to North of Prince's Bay (See "Cape Lopez").
FRESH WATER: Available at commercial quay and fishing quay.
CONSULS:

France	BP. 511	Tel: 20.86
Netherlands	BP. 792	Tel: 28.09
Sweden	BP. 518	Tel: 21.71
Switzerland		Tel: 20.19

REPAIRS/DRY DOCKS: Not available.
WATCHMEN: Available.
HATCHES: Opened and closed by crew.
REPATRIATION: Obtainable on medical grounds. No facilities for crew changes.
AIRPORT: 4 km. distant. Regular services.
TIME: GMT plus 1 hour. No alterations.
HOLIDAYS: No work on Independence Day, 17th August.
SHORE LEAVE: Permitted with shore pass.
GENERAL: *Ships' Spares:* Customs require original of invoices for clearing spares. Copies are not acceptable.
AUTHORITY: Direction du Port de Port Gentil, B.P. 43, Port Gentil, Gabon. *Tel:* 55.50.53. *FAX:* 55.53.03. *Contact:* Le Directeur du Port (Tel: 55.38.11, 55.38.12). Capitainerie (Harbour Master) (Tel: 55.36.70, 55.27.11).

AGENT: Socopao-Gabon, B.P. 560, Port Gentil. Tel: 552491 and 552005. Telex: 8223. Cables: "Freight Portgentil". Fax: 550751.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Gambia

BANJUL: 13.27 N. 16.34 W. (See Plan)

DOCUMENTS:
7 Crew Lists.
7 Passenger Lists.
7 Ports of Call Lists.
Health Documents.
Derat (or Exemption) Certificate.
Yellow Fever Innoculation Certificates.
Customs Crew Declaration.
2 signed copies of Manifest.
Bills of Lading (may be sent in advance of vessel).

PILOTAGE: ETA and draft to be communicated to "Harbour Master Banjul" 48 hours before ETA and confirmed 12 hours before. Vessel arriving Monday, ETA preferably not later than Saturday morning.

Pilot station situated in Harbour Master's Office has VHF station, calling Channel 16 (156.80 MHz) working Channels 12 (156.60 MHz) and 14 (156.70 MHz). Continuous listening watch kept 0800 – 1600 hrs. Monday – Thursday. 0800 – 1300 hrs. on Friday. Listening watch at weekends if vessels are expected. Reception generally good within 100 nautical miles radius. Pilot boat has blue hull and white superstructure, exhibiting usual signals.

Pilotage from any point inwards from Fairway Buoy by request, but compulsory from No. 5 Buoy inwards.

ANCHORAGES: Good and spacious anchorages to the East and S.E. of Government Wharf in depths of 8 to 15 fathoms.

RESTRICTIONS: Vessels may enter and proceed to anchorage at all times and states of tides. Minimum depth in sea approach channel is 8.54 m. LWOST. Average rise of Spring tides 1.83 m., Neap tides 1.22 m.

MAX. SIZE: Max. LOA 182.9 m., max. draft 8.5 m.

HEALTH: Vessels exhibit the appropriate International Code signals. Port Health Officer usually boards the vessel at the harbour anchorage or alongside between 0800 and 1700 hrs. daily, at all times in case of emergency.

RADIO: Coastal radio station on MF/HF for W/T and R/T.

VHF: Port VHF on Channels 16, 14 and 12.

TUGS: One ocean-going tug of 1,000 h.p. with VHF keeps watch on Channel 16 throughout 24 hours.

BERTHING: Maximum permissible draft alongside Banjul Old Wharf 8.2 m. Mooring bollards on foreshore. Banjul Wharf berthing face 122 m., breadth 29 m. Mooring dolphin each end, set back from wharf face. Inner berth of length 102 m. suitable for small vessels up to 5.3 m. draft. Public Jetty berthing face 60 m., maximum draft 3.3 m.

New Banjul Wharf: Length 123 m., width 29 m., depth alongside 10 m. (outer side) and 6.0 m. (inner side). Wharf is flanked by 2 mooring dolphins at each end at distance of 24 m.

Storage: The port has a total storage area of 36,220 sq.m., of which 29,700 sq.m. is uncovered for containers and breakbulk cargo and 6,520 sq.m. covered area comprising two transit sheds.

These figures do not include the new container terminal and bonded warehousing area.

Containers: Containers can be worked along the four Banjul Wharf berths. Ship's own gear to be used.

Cargo: Average rate per gang hour:
Bagged cargo: 48 tonnes.
General cargo: 25 tonnes.
Containers: 20.

BRIDGES: No bridges.

STEVEDORES: Normally 48 hours notice addressed to Agent. If arriving Monday preferable Agent notified requirements latest Friday. Normal working hours 0730 – 1900 hrs.

MEDICAL: Emergencies and cases requiring hospitalisation attended to at all times, giving as much advance notice and information as possible. Other cases attended to as convenient to ships after arrival. For certificates required see "Documents". Inoculation and vaccination for yellow fever given on request.

TANKERS: Tankers (discharging only) berth on Banjul Old Wharf. Maximum permissible draft 8.2 m. Discharge of residue and bilge prohibited. Ballasting by permission of Harbour Master. Ground nut oil can be loaded at New Banjul Wharf.

DENSITY: Normally salt water at Banjul, reducing to about 1020 ozs. per cu.ft. during River Gambia flood water period: August – February.

FRESH WATER: Fresh water available at Banjul wharves from hydrant. Notice of requirements should be sent with ETA. No water barge. Tug can supply up to 18 tons of fresh water to vessels at anchorage.

FUEL: Bunkering facilities available at Banjul Wharf by road tankers for reasonable quantities. Advance notification required for all bunkers.

FIRE PRECAUTIONS: For tankers and vessels carrying explosives Fire Brigade will be in attendance.

CONSULS: In Banjul: Belgium, Denmark, France, Germany, Ghana, Lebanon, Mali, Nigeria, Norway, Sierra Leone, Spain, Sweden. U.S.A. has resident Charge d' Affairs and U.K. has High Commissioner. Senegal has resident Ambassador.

REPAIRS: Minor hull, deck and engine repairs and welding undertaken by G.P.A. dockyard.

DRY DOCK: A slipway of capacity of 500 tons displacement is included in the dockyard facilities.

GANGWAY/DECK WATCHMEN: Recommended. By arrangement with Agent.

OPENING/CLOSING HATCHES: Opening of hatches is done by the stevedores upon request by the ship.

CERTIFICATES: Registry, Articles of Agreement, Load Line, Safety, Safety Equipment Radio Licence/Certificate.

CUSTOMS ALLOWANCES: Reasonable allowance of wine/spirits and tobacco/cigarettes out of bond, as per Master's request.

CARGO GEAR: In accordance with U.K. Factories Act. Ship's lifting gear for loading and discharging, also 4×6 ton and 1×30 ton mobile cranes available. Adequate plant for handling 20 ton and 40 ton containers.

REPATRIATION: Possible.

AIRPORT: Yundum Airport, 14 miles from Banjul. Regular services.

TIME: GMT kept throughout the year.

HOLIDAYS: New Year's Day (1st January); Independence Day (18th February); Good Friday; May 1st; August 15th; Christmas Day; Boxing Day; Islamic Festivals of Eid-El-Fitr (Ramadan) and Eid-El-Kabir. No cargo work on Islamic Holidays.

TELEPHONE: Telephones installed on board at ship's/Agent's request.

BANKS: Standard Chartered (Gambia) Ltd., Meridien BIAO (Gambia) Ltd., BICI, Continent Bank.

SHORE LEAVE: No restriction on normal shore leave.

IDENTIFICATION CARDS: Needed.

GARBAGE DISPOSAL: Skips available. Contact Harbour Master for service.

WASTE OIL DISPOSAL: There are private contractors who are willing to collect waste oil. Contact Harbour Master for service.

SEAMAN'S CLUBS: None.

CURRENCY: Local currency is the Dalisis. No restrictions and no problems with changing foreign currency.

GENERAL: The Gambia River Transport Company operates a limited fleet of lighters, mainly for transporting groundnuts from river ports to Banjul. Ships stores: fresh vegetables, beef and fish, fruit (in season) and bonded stores are available.

Other Ports: River Ports: Kaur and Kuntaur at 118 and 150 miles upriver respectively from Banjul. River Pilots available at Banjul. Max. loaded draft 5.0 m.

DEVELOPMENTS: The Third Banjul Port Project aims at safeguarding the international competitiveness of the Port of Banjul by providing adequate facilities for the efficient handling of cargoes, expanding the quay space, acquiring new floating craft, building bonded warehouses, a new container terminal and container freight station, and working towards making the port a free port. These developments will give the Port of Banjul the facilities and capability to handle all types of ships and cargoes, thus enhance its role as a service centre and enable it to fully assume its role as a facilitator in the development of trade and business activities in The Gambia and the sub-region.

REPORT: August 1990.
Message from agent to ship's Master:
Quote
Banjul buoys as follows:
No. 1 is about 7 cables S.E. of charted position and unlit.
No. 2 in position but superstructure missing.
No. 3 is about 8 cables south of charted position and superstructure missing.
No. 4 in position unlit.
No. 5 in position with flashing lights.
Please proceed straight into harbour. Pilot will board for berthing after passing buoy No. 5.

Georgia

BATUMI: 41.39 N. 41.38 E. (See Plan)

PILOTAGE: Compulsory. Batumi situated in South of Black Sea Caucasian coast, at head of Batumi Bay. Navigation is year round. Navigational range marks to note when approaching port are: Batumi Beacon, Burun-Tabia Light, Batumi Light Buoy with siren and Batumi Leading Light Marks. When proceeding Batumi, Master should give 96 hours' notice prior arrival, advising Port Controller and "Inflot" Agency: time of arrival, description and quantity of cargo brought in, location, ship's draft and length, as well as declare services required. 4 hours' prior to approaching port, Master shall advise more precise time of arrival. Inflot will arrange Pilot. Pilot on VHF Channels 16 and 12.

Pilot boards vessel either at the Receiving Buoy or in the Outer Port Roads. Watch is kept by a pilot boat day and night.

ANCHORAGES: The port harbour is protected by a mole from the seaward and provides a safe anchorage except at times when S.W., West and N.W. winds blow and the "Tyagun", strong variable current with surge is formed.

At the time of "Tyagun" vessels are recommended to stop cargo handling operations and go out to sea.

During S.W. winds which are considered particularly dangerous and usually accompanied by heavy surge, Masters should observe special precautions and take all necessary measures to avoid impact with the mole.

The Outer Roads of the port with depths of about 9 m. – 20 m. and 0.5 cables in width, extend for a distance of about 1.5 miles to the E.N.E. from the Batumi Light Buoy along the edge of the shoal. The bottom is mud and sand.

The Inner Roads are situated between the Western coast of the Batumi Bay and the shoal extending from the Southern and S.E. coasts of the Bay. Depths in the Inner Roads are between 25 m. – 11.5 m.

The anchorage in the Inner Roads is exposed to North winds. However it is not safe during strong winds blowing from other directions.

Every vessel when in the inner roads must take necessary measures so as not to drag her anchors.

The recommended anchorage is in the Outer Roads at a distance of 7.8 cables to N.N.E. from the Eastern side of Batumi Point, depths 9 m. – 14.4 m.

In the Outer Roads vessels may anchor only after having obtained the Harbour Master's permission and according to Pilot's recommendation.

In the Inner Roads vessels may obtain anchorage only Eastward of the entrance leading line. It is strictly prohibited to lie at anchor both on the leading line and to the West of it.

BALLAST: In case of stormy weather, in Autumn and Winter particularly, vessels without cargo must enter the port with ballast water on board, having ensured fore draft not less then 1.5 m. – 1.8 m.

There are shore separators, where dirty ballast can be discharged.

RESTRICTIONS: Vessels may enter and leave the port at any time of day and night. All vessels when entering or leaving the port must have keel clearance of not less than 0.3 m. (1 ft.).

In the event of stormy weather vessels approaching the port at time of S.W. and N.W. winds particularly, should obtain Harbour Master's entry permit. Vessels coming to the port without cargo are obliged to enter the port with ballast water taken in such a way that bow draft should not be less than 1.5 m. – 1.8 m. Ballast water must be clean.If due to the "Tyagun" vessels are not allowed to enter the harbour, they should anchor either in the Outer or Inner Roads.

All necessary information as regard to changes of wind, possibility or turn of entry to the port for vessels at anchor in the Outer Roads, is given by the Harbour Master over the VHF radio-telephone or by the signal station by flags of the International Code of Signals, in Morse Code or by semaphore signals.

MAX. SIZE: For oil carriers: Berth No. 1, 175 m. LOA, 36.0 ft. draft; Berth No. 2, 165 m. LOA, 30.5 ft. draft; Berth No. 3 165 m. LOA, 30.5 ft. draft; Berth No. 4, 150 m. LOA, 29.5 ft. draft: Berth No. 5, not operational; Buoy Mooring, LOA 200 m. – 210 m., max. draft 12.0 m.

For Cargo ships: Three berths where vessels may discharge. Maximum draft 32.5 ft.

RADIO: Send ETA to "Inflot Batumi" 96 hours and 48 hours in advance and confirm 4 hours in advance.

All vessels when approaching the port of Batumi should establish radio contact via Batumi Radio port radio station operating 24 hours per day on the following frequencies:

Call Sign	*Frequencies (kHz) Working*	*Frequencies (kHz) Calling*	*Type of Transmission*	*Time*
UFA	500	500	A1A	H24
"Batumi-Radio"	2182	2182	H3E	H24
"Batumi-2" (Port Controller)	156.8*(16)	156.8*(16)	F3E	H24
"Batumi-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24

Radio-telephone communication via VHF Channels is carried out in A1A type of transmission after preliminary arrangement.

*Frequencies are given in MHz.

**CPR – Central Port Radio Station.

Shore signal station is situated 1.6 cables W.N.W. from Batumi Point. International Code signals, and sometimes storm signals, are hoisted at the mast of the signal station.

VHF:

Station	*Call Sign*	*Channel*
Port Radio	Batumi 1	16, 27
Port Dispatcher	Batumi 2	16,14,13
Harbour Master/Pilot Station	Batumi 5	16,14

BERTHING: The berths of the port with depths alongside 8.0 m. – 13.0 m. are equipped to handle crude oil and oil products, bulks (coal, grain, ores) and general (machinery and mechanical equipment) as well as passenger shipping.

A vessel should lie at a berth with her bow directed to the port entrance and with her anchor dropped from the proper side. Berthing in the harbour may only be effected with tugs' assistance.

A vessel may be berthed at the outer side of the Oil Jetty after having obtained the Harbour Master's permission.

Vessels entering or leaving the harbour are not allowed to pass vessels loading at the outer (Northern) side of the Oil Jetty at a distance of less than 80 m.

The berths of the port are equipped with electric cranes of up to 20 tons capacity. There is also a floating crane of 100 tons capacity. Other cargo handling equipment, covered warehouses and concrete floor sheds are available. Rate of grain loaders 5 t.p.h. – 120 t.p.h.

MEDICAL: Medical attendance in local seamen's hospital. Masters to advise by radio prior arrival of medical attendance required on board.

TANKERS: Mooring buoys are placed to the North of the Oil Jetty and a pipeline for loading tankers of up to 40,000 d.w.t. (Max. LOA 200 m. – 210 m. Max. draft 12.0 m.) is led up to them. Mooring of such tankers is effected with tug assistance under control of the Senior Port Pilot. Vessels moored to these buoys should drop 2 anchors from the bow with 7 – 8 shackles of anchor chain and strong mooring lines should be lead to mooring buoys from the stern and made fast.

When lying at mooring buoys a vessel should keep a 24 hour VHF watch on receiving Channel and observe rules of the Port.

Products Handled: Light fuel oil, heavy fuel oil and gas oil.

Report: September 1994.

Name:	Batumi Oil Terminal.
Tel:	3-21-55.
Total Storage Capacity:	Fuel Oil 78,000 tonnes Gas Oil 70,500 tonnes Jet Fuel 8,000 tonnes Crude Oil 100,000 tonnes
Distance from Terminal to Berth:	Fuel Oil/Gas Oil and Jet Fuel – 2 km. Crude Oil – 5 km.

Berth No.		1	2	3	Offshore
Max. Draft	(m.)	10.20	9.00	9.00	12.00
Length	(m.)	200	140	165	
Diameter F.O.	(mm.)	500	500	500	500
Diameter G.O.	(mm.)	400	400	400	400
Diameter Jet Fuel	(mm.)	300	300	300	300
Diameter Hoses (all)	(mm.)	200	200	200	
Load Rate F.O.	(tonnes/hr.)	750	750	750	800
Load Rate G.O.	(tonnes/hr.)	1,000	1,000	1,000	1,000
Load Rate Jet Fuel	(tonnes/hr.)	300	300	300	

TIDE: The range of water level in the port area is small and is due to the effects of strong winds. The maximum range observed 0.6 m.

DENSITY: 1018.5.

FRESH WATER: Supplied ex-shore to ship directly. Maximum pressure 20 t.p.h. Also supplied ex-water barge. Maximum quantity delivered by barge is 650 tons. Rate about 60 – 80 t.p.h.

FUEL: Bunkers may be taken at the oil berths and can also be delivered by bunkering vessel to a ship handling non-dangerous cargo. In the latter case fire precautions must be strictly observed by the vessel taking bunkers.

FIRE PRECAUTIONS: No special precautions. There is 1 firefighting boat.

CONSULS: Turkey.

REPAIRS: Only minor repairs are possible.

OPENING/CLOSING HATCHES: According to Charter Party and contract.

CUSTOMS ALLOWANCES: Tobacco: No restrictions. Wine and/or spirits: No restrictions.

AIRPORT: Batumi Airport situated about 5 km. from port.

TIME: GMT plus 4 hours. GMT plus 5 hours in Summer.

SHORE LEAVE: Crew members allowed ashore throughout 24 hours.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Service available.

WASTE OIL DISPOSAL: Collection facilities available.

SEAMAN'S CLUBS: Club available with all services.

SHIPMASTER'S REPORT: (Updated 1986). There is now a sea-loading berth at this port immediately outside the harbour, the vessel lying to 2 anchors and stern on close to the breakwater and close Eastward of the harbour entrance.

The stern is secured to 2 buoys, using ship's ropes, 5 to a port quarter buoy and 3 to a starboard quarter buoy.

The bow is in about 60 ft. of water and the stern in about 42 ft., and vessels of up to about 40,000 tons d.w.t. are loaded there, this vessel loading safely to a draft of 37 ft. 6 in. (40 ft. in 1986).

Two 10 in. pipelines are connected on the starboard side, 1 for discharging ballast ashore and 1 for loading at a rate of about 1,600 t.p.h. The charge for discharging ballast ashore is 0.25 rbls. per ton and it is not permitted to discharge any ballast into the harbour.

1 copy of a Money List was required.

AUTHORITY: The Port of Batumi Authority, 20 Gogebashvili Street, 384500 Batumi, Georgia. *Tel:* 3-29-59. *Cables:* Morport, Batumi.

AGENT: The Port of Batumi Main Maritime Agency "Inflot", Postal address: 20 Gogebashvili Street, Port of Batumi, Georgia. Cables: Inflot Batumi. Tel: 3-23-07, 2-54-19, 2-54-17. Telex: 412673.

POTI: 42.09 N. 41.39 E. (See Plan)

GENERAL: The Port of Poti is situated 1.5 miles North of the Rioni River mouth and on the S.E. coast of the Black Sea.

Port open for navigation all the year round.

Changes of the water level in the port area are caused by the winds and usually reach 0.6 m.

The max. range of the water level observed in the river is 0.9 m.

PILOTAGE: Compulsory. Radio 48 hours prior arrival to Port Controller and agent advising ETA, description and quantity of cargo, location and weight of heavy lifts, if any, number of passengers, ship's length and draft, as well as any services required. Confirmation of ETA required 4 hours prior arrival. Inflot will arrange Pilot basis above information.

Pilot will board vessel in the outer roads at 5 cables length from the Poti Light Buoy. (Lat. 42° 09' N., Long. 41° 38' E.).

The Harbour Master will give the Master of a vessel appropriate instructions if the Pilot is not able to disembark in the outer roads due to stormy weather or heavy waves.

ANCHORAGES: In outer port which is protected by Novy Severny, Yuzhny, and Zapadny Moles, and by Zapadny Breakwater. Safe anchorage for deep drafted vessels, except in periods when "Tyagun", a strong variable current with surge, occurs, with winds from N.W., W., and S.W.

The roads are open to winds blowing from the sea. Therefore, in the event of stormy weather vessels are recommended to leave anchorage in the outer roads for sea.

Protected by the New Northern, Southern and Western moles the port ensures a good anchorage for deep-drafted vessels, except periods when N.W., West and S.W. winds form a strong, variable current with surge ("Tyagun"). Strong Westerly, S.W. and Easterly winds make the entry to the port more difficult.

A good anchorage with depths of 10 m. to 30 m. can be obtained at a distance of 1.3 miles N.W. and 1.1 mile West of the head of the Western mole, in Anchorages No. 421 and No. 422 respectively on B.A.Chart No. 2263.

Vessels are prohibited from anchoring in the S.W. part of the Southern Harbour and in the centre of the Inner Basin.

Vessels at anchor must keep watch of VHF Channel 16.

RESTRICTIONS: Vessels are prohibited from entering the port when the entrance and the leading lights are covered with fog.

Vessel's speed shall not exceed 4 knots in the port areas marked by navigation marks.

There are no restrictions for night entry.

Least depth in approaches 7.0 m.

MAX. SIZE: The max. permitted draft for entry to the port is 9.4 m. and the length 190 m.

HEALTH: Free Pratique automatic for vessels from another Georgian port. Other vessels are boarded on arrival.

RADIO: Vessels can establish radio contact through the port radio station Poti Radio operating 24 hours on the following frequencies:

Call Sign	*Frequencies (kHz)*		*Type of trans- mission*	*Time of work*
	Working	*Calling*		
UFA	500/484	500/484	A1A	H24
"Poti-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24
	156.45*(9)	156.45*(9)	F3E	H24
"Poti-2"	156.8*(16)	156.8*(16)	F3E	H24
Port (Controller)	156.6*(12)	156.6*(12)	F3E	H24
(Vessels' movement control post)	156.675*(73)	156.675*(73)	F3E	H24

*Frequencies are given in MHz.

**CPR – Central Port Radio Station.

Traffic signals for vessels entering and leaving the port are exhibited at the signal mast located at the head of the Northern mole.

BERTHING: Berthing can be effected with tug assistance only.

The berths of the port, with depth alongside up to 12.5 m., are equipped to handle general and bulk (ore, coal) cargoes, mineral oil products, metals, fruits, vegetables, etc., as well as passenger traffic.

Portal electric cranes of up to 16 tons capacity are operated on the quays. There are also floating cranes with lifting capacity of up to 100 tons.

STEVEDORES: Arranged by Agent.

MEDICAL: Qualified medical service is available free of charge, including dispensary and hospital treatment.

DENSITY: About 1015, variable with season.

FRESH WATER: Fresh water supplied ex-shore to ship directly or ex-water barge in boundaries of port.

FUEL: Bunkers in small quantities are available. Fuel in quantities over 500 tons will be supplied if an order is placed not less than 5 days prior to a vessel's bunkering. Bunkers are delivered by barges.

REPAIRS: Only minor repairs can be effected. There are no dry docks.

CUSTOMS ALLOWANCES: No restriction on quantities but nothing to be taken ashore.

AIRPORT: Nearest at Sukhumi/Batumi.

TIME: GMT plus 4 hours. GMT plus 5 hours in Summer.

POLICE/FIRE/AMBULANCE: Police service, Tel: 02; Ambulance, Tel: 03; Fire Service, Tel: 01.

SHORE LEAVE: Crew members allowed ashore up to midnight.

GARBAGE DISPOSAL: Service available.

WASTE OIL DISPOSAL: No service.

SEAMAN'S CLUBS: Club available with all services.

AUTHORITY: The Commercial Port of Poti, 52 Lenin Street, 384691 – Port of Poti, Georgia. *Cables:* Morflot Poti. *Tel:* 57201, 57204, 57205.

AGENT: Potimar Shipping Agency, 17 D. Agmashenebeli Str., Poti 384695, Republic of Georgia. Tel: 995-393-21262, 21527. Fax: 995-393-21265. Telex: (583) 1405632 Poti (Inmarsat).

SUKHUMI (Port Sukhum): 42.57 N. 41.00 E. (See Plan)

GENERAL: Port Sukhum is situated at the head of the Sukhum Bay, 2 miles E.N.E of the Sukhum Point. The port is open for navigation all the year round. Both the port itself and the Gulf are open to winds blowing from the sea.

Several berths of the port are equipped to handle passenger traffic.

The port area is bounded by the shore line and the imaginary line connecting the Sakhum Point and the mouth of the Kelasuri River.

The port is visited by regular and cruise passenger vessels.

PILOTAGE: Compulsory. Pilotage is available 24 hours. Pilot boards in the roadstead, along the leading line, in position 42° 58.5' N., 41° 01.7' E. When navigating in the port waters, a constant listening watch must be maintained on VHF Channel 16. During adverse weather conditions, vessels must, at the first request from Port Control (Port Control on VHF Channel 14), leave the quay and follow instructions.

ANCHORAGES: Anchorages are situated in the outer roads on the Northern coast of the Sukhum Bay, opposite the mouth of the Beslet River. Depths are from 12 m. to 50 m. The bottom is mud.

RESTRICTIONS: Vessels may enter or leave the port at any time of day or night.

MAX. SIZE: The max. permitted draft is 6.0 m., length 190 m.

RADIO/VHF: Ship-shore radio contact can be established via the port radio station Sukhum Radio operating 24 hours a day on the following frequencies:

Call Sign	*Frequencies (kHz)*		*Type of trans- mission*	*Time of work*
	Working	*Calling*		
UFF	500/450	500/454	A1A	H24
"Sukhum Radio"	2182	2182	H3E	H24
"Sukhum-1"	156.8*(16)	156.8*(16)	F3E	H24
(Port Controller)	156.45*(9)	156.45*.(9)	F3E	H24

*Frequencies are given in MHz.

Storm signals are exhibited at a signal mast located on the roof of the Port Authority's office.

TUGS: 1×300 h.p. and 1×800 h.p.

BERTHING: Vessels of up to 190.0 m. in length are allowed to moor at the passenger pier. The permitted draft is restricted by the depth of water (6.0 m.). Vessels are not allowed to moor to berths during dense fog and in restricted visibility when navigational lights and the current indicator on the passenger berth are not visible. In this event vessel should anchor and disembark passengers in the outer roads.

When mooring, Master should bear in mind the direction of the current and the effect on the mooring angle of vessel.

By day, the direction of the current indicated by a spar buoy located at the head of the passenger pier, and at night, by lights exhibited from the elevation of the front leading light.

A green light shown lower than the front leading light indicates Easterly current, and a red light, current of Westerly direction.

The rate of the current is usually determined by the Master himself.

Due to the constant influence of the current, mooring is usually effected without tug assistance.

Masters of vessels moored at the port berths should keep the main engines ready bearing in mind the fact that the outer roads of the port are not protected from the effect of winds.

CRANES: There is an 8 ton tower crane on the berth. Mobile cranes of 7 tons, 15 tons and 20 tons available. There is a 100 ton floating crane for heavy cargoes.

TANKERS: There is a berth for tankers 3 miles N.E. of Sukhum Port. Depth of water 5.0 m.

FRESH WATER: Supplied ex-shore. Cost U.S.$6.0/ton.

FUEL: Can be supplied by lighters.

REPAIRS: Not possible.

TIME: GMT plus 4 hours. GMT plus 5 hours in Summer.

GARBAGE DISPOSAL: No service available.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: None.

AUTHORITY: The Port of Sukhumi Authority, 66 Naberezhnaya Makhadzhirov Street, 384900 Port Sukhum, Abkhazia, Georgia. *Tel:* (88122) 2-82-02, 2-34-03, 2-34-00. *FAX:* 7 (503) 232-91-03. *Cables:* Morport Sukhumi.

Federal Republic of Germany

GENERAL:

RIVER ELBE: **(See Plan)**

GENERAL INFORMATION ON ELBE PILOTAGE, DEEPSEA PILOTAGE, HELICOPTER AND RADAR SERVICE, ANCHORAGE ON THE RIVER ELBE.

Elbe Pilots for all ports on the River Elbe, Cuxhaven, Brunsbuttel, Butzfleth, Stadersand, HEW-Wedel and Hamburg.

Pilot Vessel: For inward bound vessels near Elbe Lightvessel, a 2-masted pilot vessel with black hull and yellow funnel and "Lotse" painted in white letters on both sides of hull is stationed in approx. position Lat. 53° 59.5' N., Long. 08° 09.0' E. (1.5 miles E.S.E. of Elbe Lightvessel).

In bad weather pilot vessels shift to Lightbuoy "9". Such shifting is reported by Norddeich Radio in a navigational warning.

Pilot vessel can be contacted on VHF Channel 16 or 8, by showing flag "G", by sound or morse light signals.

During the night pilot vessels show the lights mandatory for pilot craft according to Rule 29 of the International Regulations for Preventing Collisions at Sea.

The vessel used for embarking Pilots will, in addition, show white flares for 30 seconds at 2-minute intervals according to Rule 36 of the International Regulations for Preventing Collisions at Sea.

Traffic Separation Scheme in the "Approaches to River Elbe": The separation zone of this traffic separation scheme also constitutes a safety zone around Elbe Lightvessel. Ships are urged to give the Lightvessel a good berth when passing.

Masters are requested not to leave the traffic lane in question when taking a Pilot.

There is an anchorage lying 3 miles to the N.E. of the traffic separation scheme. Special care should be applied when approaching or leaving the anchorage. See "Anchorage".

Land-based radar contact can be requested through radar station "Elbe Approach Radar Radio", on VHF Channel 19 during bad weather conditions, e.g. when visibility drops below 3,000 m., when there are ice floes, when buoys have been removed from their respective positions or when pilot vessels are leaving their positions, for further particulars please see "Radar".

PILOTAGE: Vessels requiring Elbe Pilot must order same at least 12 hours prior to arrival at Elbe Lightvessel by radiotelegram to "Elbelotse Brunsbuttel".

Cable address:	"Elbelotse Brunsbuttel" via Norddeich Radio, call-sign DAN
Telex:	28343 Ellots D
Telephone:	(04852) 87295

Vessels coming from nearby ports should make the request on departure or as soon as possible.

If the ETA alters, a correction should be transmitted.

Message must include:

1. Name of vessel,
2. g.r.t,
3. ETA Elbe Lightvessel, date 2 figures and time of vessel's arrival 4 figures,
4. draft,
5. vessel's destination.

(For example: 1., Eleka, 2. 12854, 3. ETA Elbe 02 1030,4. 24 ft. 04 in., 5. Kiel Canal).

1 hour before arrival at Elbe Lightvessel, Masters are advised to contact the pilot vessel by VHF Channel 16 or 8.

Compulsory District Pilotage: Pilotage is compulsory on the River Elbe to and from Elbe Lightvessel for all sea-going vessels over 1,000 g.r.t., furthermore for all oil, gas and chemical tankers and, in addition, for all such tank-vessels over 10,000 g.r.t. on their way to and from Deutsche Bucht Lightvessel.

These tank-vessels over 10,000 g.r.t. have to use the Western Approach Traffic Separation Scheme Deutsche Bucht.

Pilots for these vessels will be embarked and disembarked only at the Deutsche Bucht Lightvessel by helicopter or pilot boat. See "Deutsche Bucht Pilot Service".

Furthermore, pilotage is compulsory for all bulk carriers of more than 35,000 g.r.t. and other vessels of more than 60,000 g.r.t. on the River Elbe and on their way to and from Deutsche Bucht Lightvessel; all these vessels can embark and disembark Pilots only at the Deutsche Bucht Lightvessel by helicopter or pilot boat, they have to use the Western Approach Traffic Separation Scheme Deutsche Bucht. See "Deutsche Bucht Pilot Service".

Compulsory pilotage exists for outward-bound sea-going vessels of more than 20,000 g.r.t. other than oil, gas, and chemical tankers as far as to the outer range of the pilot vessel position at Elbe Lightvessel even when, under bad weather conditions, the pilot vessel has been moved up-river.

The disembarkation of Pilots can take place by helicopter at Elbe Lightvessel, if ships of the last category (20,000 g.r.t. other than oil, gas, and chemical tankers) are equipped with a properly marked winching or landing area according to International Chamber of Shipping (ICS) Guide to Helicopter/Ship Operations.

See "Deck-markings and Dimensions Plan" in Plan Section.

Exemptions:

The compulsory district pilotage regulations do not apply to tankers of less than 300 g.r.t. and other sea-going vessels of less than 5,000 g.r.t., provided that:

- such vessels navigate a route which the Master of the vessel in question has navigated at least 6 times within the preceding 12 months in that same vessel;
- the Master of the vessel has an adequate knowledge of the German language;
- such vessels are equipped with an operational radar as well as with an operational VHF radiotelephone installation featuring the Channels specified for the pilotage district in question.

Nevertheless, it is most advisable for any vessel to take a Pilot not only because of his local navigational knowledge but also for his familiarity with the special provisions for the River Elbe, the quarantine and Customs regulations.

In principle all vessels have to take 1 Elbe Pilot.

Bulk carriers and tankers having a draft of more than 37 ft. in salt water (38 ft. in fresh water) - regardless of size – and all vessels exceeding 60,000 g.r.t. – regardless of draft – must take 2 Elbe Pilots.

Pilotage District divided into 3 areas:

1st District: From Elbe Lightvessel to Brunsbuttel (entrance of Kiel Canal) 40 miles (from Deutsche Bucht Lightvessel to Brunsbuttel 68 miles) – operated by Elbe Pilots;

2nd District: From Brunsbuttel to Hamburg Seemannshoft (entrance to Port of Hamburg) 40 miles – operated by Elbe Pilots;

3rd District: Covers the whole area of the Port of Hamburg – operated by Port Pilots.

First change of Pilots takes place at Brunsbuttel for either a Kiel Canal Pilot or a second River Pilot, the Harbour Pilot for Hamburg will embark at Hamburg – Seemannshoft.

Vessels expecting Pilot may wait in vicinity of Elbe Lightvessel or Deutsche Bucht Lightvessel.

Contact either the Elbe pilot vessel or the Heligoland Pilot Station on VHF Channel 8, 13 or 16.

No restriction imposed on night entry for any vessels on the River Elbe.

Current velocity 2-3 knots; mean tidal range at Outer Bar Light-buoy "9" 9 ft. 10 in.; Brunsbuttel 9 ft. 2 in. and Hamburg 10 ft. 4 in. nature of bottom, sand and mud.

River pilotage dues (Lotsabgaben) have to be paid by all vessels exceeding 300 g.r.t., irrespective of whether they have used a river Pilot or not.

Pilotage fee (Lotsgeld) will only be charged if a Pilot is employed.

Deutsche Bucht Pilot Service: A central pilot service has been established at Deutsche Bucht Lightvessel.

Elbe Pilots will be transferred: By helicopter stationed at Wilhelmshaven-Mariensiel and Brunsbuttel-St. Michaelisdonn or by pilot vessel operating from Heligoland. There is a Pilot Station on the island of Heligoland equipped with VHF operating on Channels 13 and 16 and which responds to calls addressed to "Heligoland Pilot".

Vessels expecting their Pilot at Deutsche Bucht Lightvessel should stand by on VHF Channel 13 or 16 on approaching the rendezvous position.

Vessels bound for the Jade or Weser ports and requesting the Weser Pilot at Deutsche Bucht Lightvessel should contact: By radio telegraph linked with the code word "ETA Deutsche Bucht Lightvessel" to the telegram address "Weser Pilot II Bremerhaven". Telex No. 0238605. Tel: 0471/42220. VHF Channel 16.

Procedure for ordering pilot and Compulsory District Pilotage Regulations are similar to the article about Elbe Pilotage.

During bad weather conditions the pilot cutter operates at an up-river position. Compulsory pilotage to the outer range and to the Weser Lanby exists for outward – bound vessels of more than 20,000 g.r.t., other than oil, gas and chemical tankers and for car carriers and Ro-Ro vessels of more than 10,000 g.r.t.

HELICOPTERS: Helicopter Pilot service is available for vessels exceeding 10,000 g.r.t. at Deutsche Bucht Lightvessel.

The service to embark or disembark Pilots onto or from ships "at anchor" or "underway" can be provided day and night.

A twin-turbine powered Bell 212 S and/or Sikorsky S-76 helicopter is available for this service. Only suitably equipped vessels may have a Pilot transferred by helicopter.

There must be a properly marked landing area or a marked winching area available according to International Chamber of Shipping (ICS) Guide to Helicopter/Ship Operation.

See "Deck-markings and Dimensions Plan" in Plan Section.

If such a marking is lacking, it will not be possible for the helicopter to touch down or drop a Pilot.

These vessels have to send aforementioned information together with their ETA.

(a) Pilots for the Elbe pilotage region are to be requested 24 hours prior to arrival at the helicopter rendezvous position in the vicinity of Deutsche Bucht Lightvessel by radiotelegram to "Elbelotse Brunsbuttel".

Cable address:	"Elblotse Brunsbuttel" via Norddeich Radio, call-sign DAN.
Telex:	28343 Ellots D
Telephone:	(04852) 87295

Vessels coming from nearby ports should make the request on departure or as soon as possible.

Message must include:

1. name of vessel,
2. g.r.t.,
